Whisker reinforcement of metals and effects on linear elastic stress-strain relations 21 p3752 A66-39367

Strength test results on special small rocket covering bending, stiffness and internal pressure strength of various components 23 p4133 A66-41423

**ELASTIC SYSTEM**

Parametric resonance of elastic systems with infinite number of degrees of freedom 05 p0775 A66-15310

Nonconservative loading on linear two-degree of freedom elastic system, discussing damping effects on equilibrium stability [ASME PAPER 65-WA/APM-17] 05 p0777 A66-15439

Forced oscillations of elastohydrodynamic systems, using Rabotnov functions as kernels of integral operators, permitting description of creep curves for materials 08 p1307 A66-18884

Asymptotic method of integral estimation of space-time broadband random vibrations boundary value problem for elastic systems 11 p1781 A66-22616

Lower bounds for frequencies of continuous linear elastic systems in free vibration 12 p1960 A66-23947

Nonconservative loading on linear two-degree of freedom elastic system, discussing damping effects on equilibrium stability [ASME PAPER 65-WA/APM-17] 12 p1961 A66-23983

Dual integral equation and dual series analysis and application to mixed boundary value problems in elasticity, hydrodynamics and electrostatics 15 p2526 A66-28953

Dual integral equations in elasticity theory, noting Mehler-Fok transformation of spherical functions, Fredholm equation and application to mixed boundary value problems 15 p2526 A66-28954

Monograph on digital computer solution of matrix problems of elastic system vibrations 17 p2877 A66-32987

Electric analogs construction for stability and oscillation of elastic system 20 p3670 A66-37674

Internal nonlinear material damping effects on whirling motion of elastic shaft, noting response curves for Mentel-Fu stress-strain

law 21 p3745 A66-39434

Movchan theorem for stability of continuous systems, considering example of vibrating string and derivation of stability criterion for nonlinear elasticity 22 p3990 A66-40134

Plane stressed state of nonlinear plate with opening reinforced by thin elastic rod in case of small deviations from Hooke law 22 p3991 A66-40152

Generalized constraints applied in stiffness method of structural analysis 22 p3993 A66-40341

Book on nonlinear theory of vibration absorbing systems especially elastic shock absorbers 23 p4137 A66-41053

Asymptotic solution of broadband random vibration BVP for elastic systems, based on excitation spectral width and natural frequency density 23 p4142 A66-41953

**ELASTIC WAVE**

**SA MAGNETOELASTIC WAVE**

Screen defects of various size and shape, effect on ultrasonic pulses for approximate solution of diffraction problem of elastic waves 01 p0077 A66-10419

Longitudinal elastic wave of finite amplitude propagation in isotropic solid 01 p0057 A66-10421

RF electromagnetic and elastic oscillations in ferrites 01 p0121 A66-10568

Spherical elastoplastic waves in expansion of spherical cavities in impulsively loaded thick metal spheres 02 p0300 A66-11853

Stress wave propagation in elastic-plastic solid with cylindrical or spherical symmetry and expanding core 02 p0301 A66-12166

Laser excitation in quartz of elastic modes of thick plate, suggesting energy coupling mechanisms 03 p0376 A66-12423

Unified approach to propagation of plane, cylindrical and spherical dilation waves in elastic media, using method of characteristics [ASME PAPER 65-WA/APM-21] 05 p0778 A66-15443

Longitudinal elastic-plastic pulse propagation for smooth stress-strain curves concave toward strain axis, applied to long bar loaded at end by short pressure pulse [ASME PAPER 65-WA/APM-29] 05 p0778 A66-15450

Two-dimensional problems of diffraction of weak shock or acoustic and elastic waves on obstacles of various shapes, equivalent to supersonic gas flow three-dimensional problems 06 p0909 A66-16706

Propagation of elastic disturbance in conical rod with varying elasticity 07 p1145 A66-18228

Self-excited vibrations of damped systems with traveling waves, using oscillators moving along beam resting on elastic foundation, noting flutter of plates and shells 08 p1309 A66-19116

Axisymmetric and spherical symmetric elastic stresses and deformations in cylindrical and spherical shells determined by direct numerical analysis method 08 p1309 A66-19141

Elastic wave propagation in helical springs of small helix angle, including effect of coupling between extension and rotation for large helix angle 08 p1311 A66-19293

Direct piezoelectric coupling to surface elastic waves by spatially periodic electrode, noting measurements in quartz plate and CdS film 10 p1533 A66-21068

Numerical computation verifying Forte contention in connection with relaxation phenomena associated with thermoelastic dissipation in solids 10 p1555 A66-21197

Velocity distribution of P and S waves in lunar interior, based on elastic wave propagation in rocks and P and S wave distribution in upper Earth layer 10 p1607 A66-21287

Screen defects of various size and shape, effect on ultrasonic pulses for approximate solution of diffraction problem of elastic waves 11 p1705 A66-22604

Longitudinal elastic wave of finite amplitude propagation in isotropic solid 11 p1736 A66-22606

HF elastic-wave propagation and detection in study of structural properties of condensed matter 12 p1925 A66-23658

Time-dependent variation of cross sectional

area used to generalize classical theory of elastic-plastic loading waves in thin rods 12 p1960 A66-23949

Unified approach to propagation of plane, cylindrical and spherical dilation waves in elastic media, using method of characteristics [ASME PAPER 65-WA/APM-21]

Elastic plane wave diffraction on solid strip soldered into infinite elastic medium 12 p1968 A66-24351

Phase difference due to elastic waves produced by cyclic heating of targets by impacting ions from pulsed beam 13 p2159 A66-25070

Elastic wave diffraction on rigid edge analyzed by employing acoustic analogy 13 p1991 A66-25637

Electro-optic effect and elastic wave propagation in single-domain ferroelectric lithium tantalate 13 p2170 A66-26589

Interaction between surface elastic wave and semiinfinite plasma 14 p2346 A66-28236

Stress wave propagation in inhomogeneous rod applied to measurement of dynamic overpressure on moving vehicle subjected to sudden intense blast loading 14 p2409 A66-28398

Wave propagation in elastic solids with linear stress-strain curve 15 p2607 A66-28651

Modes of elastic wave propagation and orientation dependence of dislocation damping in aluminum 16 p2821 A66-31452

Propagation of elastic waves in thin cylindrical shell in terms of exact three-dimensional elastic theory 17 p3028 A66-32788

Longitudinal elastic-plastic pulse propagation for smooth stress-strain curves concave toward strain axis, applied to long bar loaded at end by short pressure pulse [ASME PAPER 65-WA/APM-29]

Pressure distribution, surface roughness, dry friction and elastic coupling effects on wave propagation and reflection in elastic rod, using modified-Laplace transformations 18 p3259 A66-34940

Asymptotic solutions for large time obtained for predominantly mechanical mode of one-dimensional solution of coupled thermoelastic equations 19 p3400 A66-35853

Plane elastic waves of finite amplitude in Hadamard materials and harmonic materials 21 p3771 A66-39274

Elastic-plastic and stress shock wave propagation in finite-length bar with monotone decreasing cross-sectional area 22 p3995 A66-40509

Stress wave propagation, particularly dilatational waves in high polymers, rate-of-strain effects in metals and wave propagation in nonlinear time dependent solids 24 p4287 A66-42268

Plane stationary elastic wave diffraction by stress-free circular cylinder, noting cylindrical cavity case 24 p4175 A66-42841

SA PLASTICITY

Radiation conditions in terms of motion equations of classical elasticity and field equations show uniqueness of solution to wave scattering problems 01 p0153 A66-10431

Potential and elasticity theories for solving basic problems for hollow and compound regions 01 p0153 A66-10466

Stressed state of curved rod of rectangular cross section subject to bending, shearing, tension and compression determined from theory of elasticity 01 p0155 A66-10740

Charpy test modification using ram to deform sample, obtaining data on elastic limit corresponding to high stress rates 02 p0246 A66-12005

Shock waves in elasticity discussing upstream, downstream and Lagrange coordinate-related configurations,

propagation conditions in isotropic medium and developing equations for arbitrary shock amplitudes 03 p0392 A66-12535

Stress analysis in inelastic range at elevated temperature covering stress-strain law, point/ axially symmetric deformations of thick-walled sphere and cylinder with numerical values 03 p0436 A66-12718

Vibrational characteristics, natural frequencies and associated composite loss factor of finite-length laminated beam with alternate elastic and viscoelastic layers [ASME PAPER 65-WA/APM-1]

Book on point matching technique for solving boundary value problems of elasticity theory for multiply connected regions 06 p0962 A66-16249

Asymptotic solution to elasticity theory problem for hollow isotropic cylinder of finite dimensions and small thickness under axisymmetric load distributed over entire surface 07 p1144 A66-18183

Stability of plane Poiseuille flow between elastic boundaries 07 p1026 A66-18194

Nonlinear elasticity model for materials with partially constrained or unconstrained internal rotations 07 p1145 A66-18242

Bispherical coordinates of stresses in semiinfinite homogeneous isotropic elastic solid containing rigid spherical inclusion and subjected to point load perpendicular to plane boundary 07 p1145 A66-18243

Lower bound estimates of shakedown pressure for flush cylinder-sphere intersection, using Melan theorem and elastic analysis 07 p1146 A66-18275

Equations of motion in elasticity theory for thin-walled rod in rotating inertialess system of coordinates 08 p1307 A66-18860

Three-dimensional problem of isotropic continuous nonaxisymmetrical body of revolution, applying analytic functions of complex variable 08 p1307 A66-18885

Stress-strain state of infinite plate with two holes of different diameter solved, using integral equation derived for two-dimensional problem in elasticity theory for anisotropic medium 08 p1314 A66-19578

Asymptotic integration of equations in theory of elasticity to develop approximate theory of momentless shells 08 p1314 A66-19587

Monograph on potential methods in theory of elasticity, basing boundary value solution on theory of singular integral equations 09 p1466 A66-20332

Integration of Laplace transformed elastokinetic equations, examining stress function, displacement vector field and boundary and initial value problems 10 p1555 A66-21226

Vibrational characteristics, natural frequencies and associated composite loss factor of finite-length laminated beam with alternate elastic and viscoelastic layers [ASME PAPER 65-WA/APM-1]

Analog simulation of nonlinearly rigid systems for hard and soft elasticity by electrodynamic analogy methods 11 p1779 A66-22236

Passive element analogs for linearized three-dimensional elasticity derived in rectangular, cylindrical and polar coordinates equating power dissipation and strain energy [ASME PAPER 65-AV-4]

Russian monograph covering theory of elasticity, plasticity and creep 12 p1960 A66-23898

Russian studies of elasticity and plasticity 12 p1965 A66-24056

Two-dimensional problems in moment theory of elasticity for multiply coupled regions weakened by finite number of arbitrarily distributed circular holes 12 p1967 A66-24106

Field equations of elasticity theory used to solve problem of penny-shaped crack opened by unidirectional displacement in plane 12 p1969 A66-24531

Stress concentration methods and results, noting plane problems, holes in shells, notches, role in elasticity and plasticity, etc 13 p2195 A66-25574

State equation for rubber elasticity taking into account effect of intermolecular obstruction on configurational

entropy 13 p2116 A66-26445  
Polynomial solutions to system of differential equations in theory of elasticity 14 p2321 A66-27201

Boundary value problem of elastic/viscoplastic beams solved, using iteration method, noting wave propagation and effect of shear and inertia of axial motion of beam in motion equation 14 p2397 A66-27386

Dual trigonometric integral equations solved, then applied to determining stress field due to crack 14 p2325 A66-28391

Compatibility conditions for stress-strain and Galerkin-Papkovich representations of field equations for linear asymmetric elasticity theory 14 p2408 A66-28392

Asymptotic integration of elasticity theory equations and analysis of stressed state of anisotropic shell 15 p2609 A66-28963

Linearized theory of coupled stress elasticity and stress distributions around simple edge and screw dislocations 15 p2609 A66-29241

Soviet papers on elasticity theory problems concerning stress concentrations, equilibrium and oscillation 15 p2611 A66-29423

Harmonic approximation of infinite crystal dynamics problem, noting collisional case and action of external force on atoms 16 p2820 A66-31169

Elasticity equations for materials with different resistance to tension and compression 17 p3025 A66-32590

Two Fredholm integral equations encountered in elasticity theory solved by Wiener-Hopf method 17 p2947 A66-32783

Plane elasticity theory problem for curve with mixed boundary conditions having radial load distribution 17 p3028 A66-32784

Stress distribution in neighborhood of crack in infinitely long elastic strip 17 p3032 A66-33503

Hashin-Shtrikman theorems application in three types of boundary value problem in elasticity 18 p3249 A66-33600

Elastic-plastic antiplane problems for bonded dissimilar media containing cracks and cavities on interface and subjected to longitudinal shear loads 19 p3475 A66-36430

Contact problem of half-plane inelasticity theory using Jacobi polynomials and taking into account thermal stresses and presence of adhesion and friction in contact area 19 p3476 A66-36835

Singular integral equations with constant coefficients solved by Jacobi polynomials and applied to problems in fluid dynamics, crack propagation, plane elastic theory, etc 19 p3393 A66-36836

Contact problem for elastic rectangle solved by reducing problem to solution of quasi-fully regular infinite set of linear algebraic equations with bounded free terms 19 p3476 A66-36837

Stress concentration factors at notches, fillets and circular holes in plates under uniaxial load obtained from equations for elastic stress distribution 20 p3667 A66-37481

Elastic and elastoplastic distribution of stresses and strains around 45 degree V notch, with circular base determined by photoelastic and moire techniques 20 p3667 A66-37483

Stress function and displacement vector for linear, homogeneous, isotropic and elastic material body occupying bounded simply connected region of space 21 p3772 A66-39354

Iterative linear-elastic analysis of plane pin-jointed frames and space ball-jointed frames, accounting for temperature and geometrical changes 21 p3833 A66-39537

Classic plane problem of elasticity theory for circular beam 21 p3833 A66-39596

Book on plane problems in elasticity theory for calculation of deep beams with arbitrary boundary curvilinear coordinates 21 p3834 A66-39616

Mixed boundary value problem in elasticity of circular and quarter-plane segments 22 p3991 A66-40153

Linear theory of micropolar elasticity, noting all components of asymmetric stress tensor are determined and motion of media is fully described when deformation and microrotation vectors are

- known 22 p3995 A66-40566  
Asymptotic method for solving equations of the theory of elasticity and mathematical physics 22 p3996 A66-40687  
Three-dimensional and axisymmetric problem in elasticity theory with particular reference to photoelasticity 23 p4135 A66-40989  
Numerical analysis methods in elasticity theory for constructing models, approximate problems and analytical solutions 23 p4135 A66-40993  
Elasticity theory and passing of three-dimensional problems to two-dimensional problems 23 p4136 A66-40995  
Soviet literature survey of exact and approximate solution of two-and three-dimensional mixed boundary value problems in theory of elasticity 23 p4136 A66-40999  
Approximate solution of boundary value problems in elasticity theory as applied to thin plate theory, using homogeneous equations 23 p4136 A66-41000  
Elasticity problems solutions as related to stress distribution at holes in shells and plates 23 p4137 A66-41002  
Three-dimensional linear-anisotropic elasticity with inertia effects analyzed in isotropic and anisotropic Cosserat continua, deriving static and kinematic components 23 p4141 A66-41945  
Free and forced vibrations, static and dynamic stability and air elasticity of orthotropic shells and plates in time-alternating temperature field 23 p4142 A66-41955  
Stress concentration around curvilinear holes in plate, discussing plane problem of elasticity theory and shell theory 23 p4143 A66-41960  
Plate or shell theory analysis reduced from three-dimensional elasticity to two-dimensional problem, using power series or iterative method 23 p4143 A66-41962  
Trefftz method applied to derivation of integral for general boundary value problem in classical theory of elasticity 23 p4144 A66-41968  
Certain tensorial character of concentrated loads 24 p4289 A66-42288
- ELASTODYNAMICS**  
Saint Venant principle applied to dynamics of bars regarding boundary conditions and reliability problems 16 p2822 A66-31508  
Galerkin vector for elastodynamic problem of isotropic inhomogeneous body 16 p2823 A66-31707  
Frequency equations and mode displacement functions derived for plane strain free-transverse vibration of solid cylinder with elastic core bonded to thin elastic shell 16 p2823 A66-31716  
Elastodynamic reciprocity theorem for impulsive disturbances in linear viscoelastic medium 21 p3772 A66-39347  
Rall theorem on variational principle for linear elastodynamic BVPs on Hilbert space 23 p4138 A66-41538  
Elastodynamic buckling of circular cylindrical shells, unstiffened and longitudinal stringers-stiffened 23 p4147 A66-42000
- ELASTOHYDRODYNAMICS**  
Pressure distribution, surface temperature and deformation profile in conjunctive region of lubricated cylindrical disks rolling or sliding on their peripheral surfaces [ASLE PREPRINT 65AM 4A3] 07 p1039 A66-18290  
Thermal elastohydrodynamic lubrication of rolling and sliding cylinders, noting correlation with film thickness and friction experimental data [ASLE PREPRINT 65AM 4A2] 07 p1040 A66-18291  
Lubricant film thickness in elastohydrodynamic range measured as function of speed in rolling configuration for mineral oils and esters 07 p1040 A66-18292  
Lubrication review, 1964 24 p4217 A66-42579
- ELASTOMER**  
SA PLASTIC  
SA SYNTHETIC RUBBER  
Uniaxial tensile data for elastomers including stress-strain curve characteristics 02 p0248 A66-11428  
Fluids and elastomers for low temperature heat transfer and hydraulic systems [ASLE PREPRINT 65-LC-7] 02 p0249 A66-12256  
Oil seals such as lip seal discussing structure, performance factors and materials used 04 p0525 A66-13781  
Elastomeric silicone for aerospace electric and thermal insulation, discussing properties, application and new developments 06 p0900 A66-16297  
Properties of nonirradiated heat-shrinkable silicone and fluorosilicone rubbers for insulating and encapsulating electrical and electronic apparatus, including resistance to aging, fuels, ozone, etc 06 p0900 A66-16298  
Qualities required of materials for joint sealing, particularly elastomers, noting properties and possibilities 12 p1899 A66-23818  
Fluids and elastomers for low temperature heat transfer and hydraulic systems [ASLE PREPRINT 65-LC-7] 12 p1901 A66-24992  
Uniaxial tensile test data on stress-strain properties of polymers and elastomers as function of strain rate and temperature 13 p2115 A66-26118  
Nitroso rubbers, fully fluorinated elastomers for nitrogen tetroxide application 14 p2371 A66-28015  
Elastomeric ablative thermal shield material to meet system requirements for lifting reentry vehicles having lift-drag ratio of 0.5 to 1.5 18 p3240 A66-33801  
Complex shear modulus measuring apparatus for viscoelastic materials, including data obtained for butyl rubber and other elastomers 18 p3256 A66-34560  
Stress relaxation of gamma irradiated fluorocarbon elastomers to study radiation induced chain scissions in copolymers 20 p3587 A66-37310  
High temperature behavior of organic materials for aircraft, noting elastomers and elastomers [ICAS PAPER 66-33] 22 p3938 A66-40660
- ELASTOPLASTICITY**  
Elastoplastic matrix displacement of three-dimensional continua 01 p0152 A66-10343  
Spherical elastoplastic waves in expansion of spherical cavities in impulsively loaded thick metal spheres 02 p0300 A66-11853  
Stress wave propagation in elastic-plastic solid with cylindrical or spherical symmetry and expanding core 02 p0301 A66-12166  
Stresses in elliptical cross section rod subjected to elastoplastic torsion, using Legendre transforms 02 p0301 A66-12173  
Rigid body mechanics noting elastoplastic and ductile formation, deformation, defect appearance, etc 03 p0439 A66-13166  
Finite elastoplastic strains in thin rotating annular disk with radially varying temperature 03 p0375 A66-13293  
Generalization of Koiter theorem applied to study of adaptability of nonuniformly heated elastoplastic bodies to variable loads 04 p0594 A66-14427  
Elastic-plastic stress and strain distribution in solid or hollow shaft containing external or internal hyperbolic notches [ASME PAPER 65-WA/APM-20] 05 p0689 A66-15442  
Longitudinal elastic-plastic pulse propagation for smooth stress-strain curves concave toward strain axis, applied to long bar loaded at end by short pressure pulse [ASME PAPER 65-WA/APM-29] 05 p0778 A66-15450  
Elasto-plastic matrix displacement analysis of arbitrary three-dimensional continuum under strain hardening 06 p0963 A66-16464  
Model of elastoplastic body undergoing strain hardening, examining microstresses via internal viscosity 07 p1143 A66-17629  
Propagation of spherical waves produced by thermal shock acting on boundary of spherical cavity in infinite elastoviscoplastic body 08 p1309 A66-19115  
Transition process whereby plate approaches limiting load state under effect of transverse load that creates torques and bending moments in plate cross sections 08 p1312 A66-19436  
Approximation method solution for elastoplastic distribution of stresses in infinite plane with square hole for case of compressive force plane deformation 08 p1313 A66-19444  
Statically indeterminate elastoplastic problem under condition of complex shear 08 p1315 A66-19589  
Stability of steady state response of one degree of freedom double bilinear hysteretic model [ASME PAPER 65-WA/APM-4] 10 p1616 A66-21489  
Polarization and birefringence of photoelastoplastic medium 11 p1781 A66-22613  
Successive approximation method for elastic-plastic plane stress-strain analysis 11 p1781 A66-22690  
Crack opening displacement approach to fracture mechanics in yielding materials 11 p1782 A66-22693  
Elastoplastic deformation of bodies exposed to random forces 11 p1784 A66-23328  
Relating general theory of elastic-plastic continuum, valid for nonisothermal deformations and explicit thermodynamic restrictions, to Drucker postulate 12 p1959 A66-23862  
Time-dependent variation of cross sectional area used to generalize classical theory of elastic-plastic loading waves in thin rods 12 p1960 A66-23949  
Elastic-plastic stress-strain distribution in solid or hollow shaft containing external or internal hyperbolic notches [ASME PAPER 65-WA/APM-20] 12 p1885 A66-23977  
Finite deformations of rotating disk of variable thickness, consisting of elastoplastic strain-hardening material, determined from stress-strain diagram 12 p1964 A66-24051  
Elastoplastic behavior of anisotropic plates elastically uniform in depth, using asymptotic integration for bending problem 12 p1966 A66-24057  
Behavior of rotating solid and hollow cylinders of ideal elastoplastic material subjected to rotation and action of quasi-steady-state temperature field, considering adaptability when physicommechanical characteristics are constant 14 p2301 A66-27175  
Elastoplastic properties of copper, aluminum alloys and brass under explosive load, noting increased temperature effect on elastoplastic wave parameters 14 p2314 A66-27370  
Stress field of thermal shock on surface of spherical cavity in infinite elastic-plastic body 14 p2399 A66-27457  
Solution of plane problem of physically nonlinear bodies by method of finite differences 15 p2608 A66-28772  
Bending moment, longitudinal force, radial displacement and transverse deflection of circular plate undergoing elastoplastic bending accompanied by radial tension 16 p2822 A66-31622  
Compressibility of material in stability problems of elastoplastic plates and shells 17 p3029 A66-32809  
Longitudinal elastic-plastic pulse propagation for smooth stress-strain curves concave toward strain axis, applied to long bar loaded at end by short pressure pulse [ASME PAPER 65-WA/APM-29] 18 p3247 A66-33568  
Linear and nonlinear nonassociated flow laws analyzed for elastoplastic work-hardenable solids 18 p3255 A66-34392  
Constitutive equations for behavior of elastic/viscoplastic materials at finite strain, assuming isotropic material and isothermal processes 18 p3256 A66-34394  
Load level as stability loss condition for bulging of elastoplastic rod in presence of creep 19 p3473 A66-35753  
Complex loading problems in plastic flow theory solved by analogy with elastic solutions in elastoplastic theory 19 p3473 A66-35755  
Elastic and elastoplastic distribution of stresses and strains around 45 degree V notch, with circular base determined by photoelastic and moire techniques 20 p3667 A66-37483  
Elastoplastic bending of thin annular plates with free inner edge, based on Mises yield condition and Hencky stress-strain relation 20 p3671 A66-38102  
Inelastic buckling of rod with initial slight

sinusoidal deflection subjected to short-term longitudinal compressive dynamic load 20 p3672 A66-38268

Plastic strain distribution near axisymmetric slit in ideally elastoplastic material described by Dugdale model 20 p3673 A66-38269

Two-dimensional elastoplastic problem of stress distribution in plane with hole under compressive forces at infinity, assuming exponential yield condition controls plastic state of material 21 p3830 A66-38981

Variable load theorem applied to alternating cyclic loads problem, based on equations of small elastoplastic deformations 21 p3830 A66-38984

Thermodynamics of irreversible processes methods applied to stress-strain relations of single-phase nonelastic continuous medium 21 p3830 A66-38986

Elastic-plastic and stress shock wave propagation in finite-length bar with monotone decreasing cross-sectional area 22 p3995 A66-40509

Stress-strain determination in elastoplastic problems with aid of photoelastic epoxy resin coating 23 p4135 A66-40990

Variational techniques in solving BVPs for nonlinear plastic, elastoplastic and viscous media and in predicting existence, uniqueness and equilibrium conditions 23 p4136 A66-40996

Elastic wave radiation possible in collision of unloading wave with shock wave 23 p4054 A66-41354

Relaxation of temperature stresses in thin walled pipe under conditions of elastoplastic deformation 23 p4140 A66-41797

Membrane force in axisymmetric elastoplastic bending of clamped thin circular plate 23 p4142 A66-41951

Laminated structure with dominant displacement from reference point for solid medium working beyond elastic limit 23 p4144 A66-41969

Time dependent stress distribution in elastoplastic cyclic deformation, emphasizing cycle hardened stainless steels 23 p4144 A66-41971

Notched plates stress distribution solution under conditions of plane stress in elastoplastic domain of straining 23 p4146 A66-41994

Photoplastic method of solving plane elastoplastic problems, using celluloid as model material 24 p4287 A66-42212

Stability of ideal plate under compression loading beyond elastic limit 24 p4290 A66-42437

Successive approximation analysis of large deflections of elastoplastic shell under bending deformation and load carrying capacity 24 p4290 A66-42440

Stability analysis of thin two-layer shell in Gaussian coordinates with moment initially zero, including applications to stability of circular cylindrical shell 24 p4290 A66-42441

Critical loading and stability of three-layer sloped asymmetric shells beyond elastic limit for arbitrary stress-strain diagram 24 p4290 A66-42442

Stability theory methods for small elastoplastic deformations generalized to include creep effects in cylindrical shells compressed at ends 24 p4292 A66-42885

**ELASTOSTATICS**

Resolution of two fundamental problems of elastostatic plane into complex variables under conditions of analytical limits 05 p0775 A66-15096

Uniqueness theorem of axisymmetric exterior traction boundary value problem in linear elastostatics theory 12 p1971 A66-24818

Quantitative examination of Saint Venant principle in context of elastostatic boundary problems, i.e., axisymmetric pure torsion of bodies of revolution 19 p3473 A66-35485

Displacement boundary value problem in classical linear elastostatics, deriving ellipticity condition for uniqueness theorem 19 p3474 A66-35852

Constitutive equations for elastic solids sustaining deformation for which displacement gradients are small but where nonlinearity is permitted, formulating plane elastostatic problem 19 p3475 A66-36429

Linear elastostatic BVPs for inhomogeneous anisotropic elastic body

including existence-uniqueness theorem, based on Korn inequality 21 p3755 A66-38463

Eigenfunctions of full dislocation solution of cut annulus in plane elastostatics 23 p4144 A66-41970

**ELBOW**

Pressure losses in vaned elbows of circular cross section and possibility of gain in efficiency by splitting vanes 24 p4195 A66-42582

**ELDO LAUNCH VEHICLE**

Testing installations for third stage of ELDO rocket noting test stands, control center and fuel depot 02 p0214 A66-11247

Design and development of high energy standard engine for ELDO-B carrier rocket 02 p0279 A66-11669

Applicability of liquid hydrogen-oxygen technology to development of European launch vehicles 02 p0295 A66-11671

Research satellite projects sponsored by ELDO, ESRO and West-German Projects 625A and 625B 04 p0583 A66-13498

Shock wave frontal ionization effect on electromagnetic transmission and reception from telemetering equipment on ELDO satellite launching vehicle 09 p1406 A66-19851

European Launcher Development Organization /ELDO/ program for Europa I three-stage rocket and satellite design and testing 09 p1464 A66-20467

ELDO launch vehicle third stage configuration, propulsion system, guidance and control system and ground installations and equipment 09 p1464 A66-20468

Remote-control signaling system for ELDO satellite 09 p1345 A66-20544

CECLES/ELDO space vehicle booster program, noting design of three-stage rocket, including control and guidance system, telemetry, etc 09 p1464 A66-20655

Future programs for ELDO including launchers, guidance systems, bases, etc 09 p1464 A66-20656

Difficulties encountered in applying system of overall project management to ELDO initial program, noting PERT use, costs plans, etc 09 p1473 A66-20657

Space research in Netherlands during 1964 including work done for European Launch Development Organization 09 p1459 A66-20719

Vacuum simulation facility near Munich for testing third stage of ELDO rocket 10 p1519 A66-21374

Design and operation of test stands for ELDO rocket engines under simulated high altitude conditions 10 p1519 A66-21384

Optimization of high energy turbopump unit engine for ELDO-B carrier rocket, employing system specific impulse 10 p1591 A66-21396

European space program of launcher development 11 p1788 A66-22433

Electron beam welding of high-strength titanium alloy propellant tank for third stage of ELDO carrier rocket and determination of optimum welding parameters 12 p1885 A66-23783

Fiat design and manufacture of heat shields, satellite frame and telemetry antennas for ELDO space booster 12 p1885 A66-23914

ELDO-B program and ELDO-B 2 rocket, correlating performance of first and second stages 17 p3015 A66-32368

Performance characteristics and specifications of Coralie missile, second stage of ELDO rocket 17 p3015 A66-32369

Welding and gluing of third stage of ELDO-A rocket 23 p4073 A66-41533

**ELECTRET**

**S BARIUM TITANATE**

**ELECTRIC ANALOGY**

Temperature fields in pipe filled with Raschig rings with internal heat source during gas flow calculated by electrical analogy method 01 p0166 A66-10999

Relationship between three symbolic circuit representations of charge-capacitance effects in 4-terminal field effect transistors 04 p0500 A66-14099

Electrical analog model with distributed capacitance and resistance generates charge flow equivalent to two-dimensional transient heat conduction [ASME PAPER 65-HT-66] 05 p0786 A66-14766

Passive electrical simulation of properties of Maxwell type viscoelastic connection in

vibration absorber, noting dynamical analogy and velocity-acceleration optimization 05 p0775 A66-15300

Geometric electrical analog for two-dimensional transient heat conduction [ASME PAPER 65-WA/HT-42] 05 p0792 A66-15666

Source flow in analog solution using finite size electrode, noting potential error [ASME PAPER 65-WA/FE-6] 05 p0665 A66-15716

Equivalent h parameters for n transistors connected in cascade, establishing effect of circuit impedances 06 p0854 A66-16887

Analog method for simulating visual receptor network as model for inhibitory interaction in retina 06 p0819 A66-16849

Video densitometer to extract data from video display, specifically densitodiagram 06 p0819 A66-16851

HF analog computers for representing algebraic and differential systems and solving problems due to loop instability and drift in DC amplifiers 07 p1003 A66-17818

Torsional vibration analog computer and determination of torsional oscillation frequencies in multimass in-line systems 07 p1144 A66-18164

Equivalent circuit obtained from device charge equations for analysis of HF properties of four-terminal field effect transistors 08 p1189 A66-18669

Mathematical foundations of analog simulation proceeding from Laplace, diffusion and wave equations 08 p1187 A66-18861

Electric analogy to derive sound laboratory test specification and procedure for testing Nike-Tomahawk payload vibration 08 p1308 A66-18928

Analog computers used in modeling of heat conduction and diffusion processes for Fourier differential equation 08 p1319 A66-19427

Equivalent circuit diagram determination of change in quadrupole parameters in transistor due to current-induced heating 08 p1198 A66-19729

Circuit techniques for performing analog pulse arithmetic, using logarithmic p-n junctions on amplitudes of random nuclear pulses 09 p1356 A66-20604

Analog method for solution of unsteady radiant heat transfer problems with combined conduction and convection 10 p1622 A66-21938

Passive element analogs for linearized three-dimensional elasticity derived in rectangular, cylindrical and polar coordinates equating power dissipation and strain energy [ASME PAPER 65-AV-4] 11 p1780 A66-22467

Analog computer, programmed on digital computer, used in examination of lumped and distributed parameter models of cardiovascular system 12 p1809 A66-24230

Electrocardiogram interpretation by computer, using pattern recognition approach which permits differentiation between normal and abnormal rhythms 12 p1810 A66-24231

Source flow in analog solution using finite size electrode, noting potential error [ASME PAPER 65-WA/FE-6] 12 p1864 A66-24545

Pipeline simulation by triggered monostable multivibrator driving chopper as logarithmic function generator 13 p2027 A66-25220

Electrical analogy for wing in unsteady supersonic flow, determining distribution of lifting power for various aspect ratios 13 p1990 A66-25405

Electrical analog method used in determining potential gas flow past airfoil lattice, noting components of solution 13 p2068 A66-26541

Electrical analogy for turbulent liquid metal heat transfer in noncircular duct entrance region, solving Fourier equation, determining fluid boundary conditions, temperature distribution, etc 13 p2210 A66-26717

Tabulated data method for synthesizing third order linear transfer functions, using chain of inverted L-sections of passive resistor-capacitor elements in conjunction with single operational amplifier 16 p2671 A66-31203

- Thermal analysis of ceramic-based hybrid microcircuits, using lumped-constant electrical analog 16 p2667 A66-31594
- Waveguide-slot antenna design, considering interaction of radiators on principal wave 17 p2879 A66-31855
- Conductive sheet analogy applied to steady heat conduction problem, noting evaluation without use of potentiometers 18 p3265 A66-34491
- Critical jets of symmetrical perfect-gas flow determined by analogy between impedance network node equation and velocity potential and stream function in Tricomi plane 19 p3341 A66-36250
- Fluid circuit theory, discussing transmission lines, matching, pulse forming and definitions of current and voltage analogies 20 p3500 A66-37643
- Electric analog approximation of static and dynamic performance of Kearfott ball valve switching device, discussing application to complex circuit design 20 p3501 A66-37650
- Electric analogs construction for stability and oscillation of elastic system 20 p3670 A66-37674
- Book on boundary value problems and partial differential equations for electric circuits and other engineering problems 22 p3938 A66-39703
- RF behavior of one-dimensional plasma in electrical circuit analog with coupled resonant circuits representing normal modes 22 p3884 A66-39816
- Wind tunnel simulation of transient state of takeoff and landing of V/STOL aircraft, noting application of electric circuit analogy to measure flow dynamic response to control valve movement 23 p4053 A66-41388
- ELECTRIC ARC**
- SA SPARK
- Energy balance of cylindrically symmetric hydrogen arc immersed in axial magnetic field led to current-voltage characteristic and radial temperature distribution 04 p0554 A66-14298
- Electric arc interaction with argon flow analyzed in crossed convective and magnetic fields [ASME PAPER 65-WA/ENER-1] 05 p0728 A66-15626
- High-pressure pulse arc created by discharging capacitor bank through steadily burning argon arc 06 p0919 A66-16874
- Brightness dependence of pulse arc on power per unit length of arc, estimating charged particle density and plasma temperature 06 p0919 A66-16875
- MHD problems associated with wall-stabilized and convection-stabilized electric arcs 07 p1090 A66-18114
- Thermal shock resistant carbides, using arc-casting techniques, noting microstructure, phase diagram, mechanical properties, etc 07 p1055 A66-18504
- Parameter predicting transition from low to medium blowing rate in arc with transpiration cooled anode 08 p1168 A66-19156
- High temperature black body as spectral radiance standard for high intensity arc 09 p1471 A66-20504
- Electrical conduction behavior of laminar arc-heated flow in contact with cooled anode, noting anode current parameters [AIAA PAPER 66-188] 10 p1561 A66-21435
- Electric arc interaction with argon flow analyzed in crossed convective and magnetic fields [ASME PAPER 65-WA/ENER-1] 10 p1563 A66-21503
- Equations for electric arc column based on MHD equation 11 p1746 A66-23237
- Current-voltage characteristics of electric arcs approximated by dimensionless criteria 11 p1747 A66-23312
- Recovery of electric strength of gap after arcing related to Paschen law and measured from atmospheric pressure to vacuum by device with copper contacts 12 p1842 A66-24665
- Hydrogen arcs, sulfur hexafluoride arcs, decaying nitrogen arcs and nitrogen arcs with forced convection 13 p2137 A66-25110
- Experiments with arc jet characterized by composite electromagnetic and vortex stabilization and propelled by hydrogen or nitrogen, noting heat loss through electrodes 14 p2373 A66-27097
- Range of gas dynamic stability of arc-type electric heaters, characteristics for design and calculation of electrode diameter ensuring vortex stabilization 14 p2348 A66-28314
- Tangential electrode forces on cathode and anode electrode for arc moving in magnetic field are not negligible in plasma driving 15 p2428 A66-28687
- Existence of convective interaction mechanism affecting direction and stability of electric current in flowing gas, using electric arc confined in supersonic flow 15 p2481 A66-29744
- Electron temperature measurements in low voltage arc in saturated cesium vapor 16 p2756 A66-30105
- Electric conductivity parameters for plasma gap formed by discharge in argon and potassium mixture in electric-arc heater 16 p2766 A66-31601
- Symptomatic behavior and anode regimes of arc for electric arc with superimposed subsonic flow of argon [AIAA PAPER 66-479] 17 p2970 A66-32768
- Fastax films showing development and instability of pulsed DC arc in 30 mm Vycor tube at peak currents up to 1500 amp [AIAA PAPER 66-731] 18 p3141 A66-33667
- Composition, heat conduction and radiative energy transfer characteristics of hydrogen and argon plasmas produced by arc in cylindrical channel with cooled walls 18 p3142 A66-34023
- Thruster device using self-induced magnetic Lorentz forces to attain velocities up to 50,000 m/sec for plasma jet ejected by electric arc engines 19 p3451 A66-36637
- Low pollution electric arc air heater of CH9 and CH10 type, using metal electrodes to provide air mass flow rates at 4000 degrees K 20 p3540 A66-36950
- Field of high temperatures produced by transitional and steady state processes, using electric arcs in nonrarefied gases, obtaining existence and stability criteria for arc 20 p3606 A66-36965
- ELECTRIC BREAKDOWN**
- SA SHORT CIRCUIT
- SA VOLTAGE BREAKDOWN
- Charge trapped in electron or ion beams at pressures below breakdown determined from general integro-differential equation, using approximation method 01 p0111 A66-10375
- External electric field effects on volt-ampere characteristics and breakdown in p-n, p-n-p and p-n-p-n structures 02 p0277 A66-12090
- Multilayer circuit board defect detection and repairing using computer-controlled IR radiometer 04 p0498 A66-14016
- Atmospheric breakdown limitations to optical maser propagation 05 p0632 A66-14837
- Nonlinear microwave breakdown induced in thin high-density plasma slab when plane wave is normally incident upon it 06 p0844 A66-16038
- Second breakdown model for transistors 06 p0832 A66-16437
- Avalanche multiplication factors other than impact ionization leading to breakdown in p-n junctions 06 p0850 A66-16445
- Evolution of spark channels initiated in oxygen at 411, 680 and 950 torr by current pulses of approximately 30 amperes with durations of 30 and 40 nanoseconds 06 p0920 A66-17028
- Gas breakdown by laser can be accounted for by both microwave breakdown theory and inverse bremsstrahlung 06 p0893 A66-17040
- Origin of channel currents associated with P plus regions in silicon, discussing breakdown of field-induced junction 08 p1195 A66-19357
- Frequency components of microwave-range oscillations from pulsed avalanche diodes of Read type driven to breakdown 09 p1350 A66-19927
- Second breakdown volt-ampere characteristics in triple diffused n-p-n Si transistor 09 p1351 A66-19936
- Separation formulas of potential fields of constant currents into lower half-space with application to geomagnetic field 09 p1373 A66-20481
- Secondary breakdown in germanium alloy and diffused-alloy transistors 09 p1358 A66-20817
- Plasma instability in solids occurring in microwave frequency region 10 p1576 A66-21537
- Microplasma breakdown in reverse biased p-n junctions in epitaxial gallium arsenide 10 p1577 A66-21571
- Small-signal impedance of space-charge region of p-n junctions under avalanche breakdown conditions, using realistic physical assumptions 10 p1586 A66-22084
- Breakdown regime of diffusion-controlled HF resonance gas discharge analyzed kinetically, solving Boltzmann equation for electron distribution function 11 p1740 A66-23081
- Injection of plasma blobs into mirror trap and subsequent compression of plasma by increasing magnetic field, using longitudinal current, noting X-ray radiation 12 p1925 A66-24877
- Nonlinear dielectric laser light absorption by neutral gas resulting in avalanche breakdown of gas due to thermal ionization 13 p2090 A66-25425
- Electrical breakdown of gases by optical frequency radiation, noting laser beam attenuation and subsequent energy absorption by plasma 13 p2134 A66-26190
- Threshold data for ruby and neodymium laser pulse-induced breakdown in Xe, Ar, Kr, Ne, He, oxygen, nitrogen, air and carbon dioxide 13 p2100 A66-26191
- Plasma resonance and scattering, threshold variation and optical reflectivity in pulsed laser beam-induced gas breakdown 13 p2134 A66-26192
- Growth rate of ionization by electron impact in presence of laser beam, elastic and inelastic scattering cross sections, free-free absorption, excitation and ionization coefficients, breakdown times and thresholds 13 p2134 A66-26193
- Giant-pulse laser-induced atmospheric electric breakdown causing optical frequency discharge 13 p2134 A66-26194
- Two-dimensional analysis of flow in electrofluid dynamic generator showing effect of radial fields and viscous forces on performance, stressing effect on electrical breakdown of gas, noting basic equations 13 p2001 A66-26257
- Electric breakdown and insulation properties of vacuum and design of vacuum devices 14 p2249 A66-27105
- Breakdown of biennial oscillation of ozone and of lower stratospheric temperature of Southern Hemisphere and relation to sunspot cycle observations 14 p2286 A66-27904
- Electrical failure in solids from excess energy storage or internal disordering 15 p2568 A66-29669
- Breakdown by neodymium glass laser radiation in atomic and molecular gases, determining power densities, noting relation of pressure to breakdown power 16 p2718 A66-30938
- Avalanche breakdown voltage calculated for planar p-n junction 17 p2981 A66-32688
- Microplasma internal parameter measurement including switch-on voltage, switch-off voltage, plasma resistance, parallel capacity and internal series resistance 17 p2896 A66-33320
- Transistor testing and secondary breakdowns, featuring application of constant collector current and power with arbitrary waveform 18 p3078 A66-34087
- Separation formulas of potential fields of constant currents into lower half-space with application to geomagnetic field 19 p3346 A66-35499
- Electrical breakdown in beams of hydrogen and nitrogen produced by expanding H or N gas out of Laval nozzle cooled by liquid hydrogen or nitrogen in high vacuum 20 p3605 A66-38055
- Injection of plasma blobs into mirror trap and subsequent compression of plasma by increasing magnetic field, using longitudinal current, noting X-ray radiation 23 p4099 A66-41084
- Diffusion controlled breakdown theory applied to compute breakdown potential of helium in coaxial geometry by solving

continuity equation 23 p4105 A66-41584  
 Surge-proof silicon power diode combining  
 p-n and p-i-n structures 24 p4182 A66-42505  
 Reverse breakdown voltage increase  
 resulting from ion drift in silicon p-n  
 junctions formed by sodium ion  
 bombardment 24 p4257 A66-42621  
 Dielectric breakdown phenomena in  
 evaporated silicon monoxide thin film,  
 noting electron collision  
 effect 24 p4260 A66-43106

## ELECTRIC CELL

Gamma-electric cell, solid state device for  
 direct conversion of gamma-ray energy into  
 electrical energy 07 p1079 A66-18323  
 Oxygen regeneration in solid electrolyte  
 cell, constructed from zirconia based  
 ceramic material for space flights  
 [AICE PREPRINT 20E] 17 p2848 A66-32672

## ELECTRIC CONDUCTIVITY

## SA IONOSPHERIC CONDUCTIVITY

## SA RESISTANCE

## SA SUPERCONDUCTIVITY

Unsteady convective flow of electrically  
 conducting fluid through vertical channel in  
 magnetic field, using differential  
 equations 01 p0111 A66-10426  
 Stochastic aspects of low mobility theory  
 applied to electrical conductivity problem in  
 Wannier representation 01 p0106 A66-10723  
 Friction, diffusion, and electrical  
 conductivity tensors obtained for plasma  
 subjected to strong external magnetic  
 field 01 p0114 A66-10961  
 High temperature vacuum furnace for  
 noncontact measurements of electrical  
 conductivity of semiconductor materials in  
 liquid and solid states 01 p0071 A66-11047  
 Electric conductivity anisotropy of n-type  
 silicon in range of warm and hot  
 carriers 01 p0128 A66-11199  
 Electric conductivity of N-component gas  
 mixture containing one partially ionized  
 component 02 p0265 A66-11389  
 Fourier coefficients of tunnel diode  
 conductivity and noise current determined  
 along with conversion factor and amplitude  
 of mixer 02 p0196 A66-11424  
 Modes existing in infinite parallel-plate  
 waveguide with centrally placed  
 unidirectional conducting  
 screen 02 p0198 A66-11578  
 Semiconductor characteristics of barium  
 titanate with n-type conductivity produced  
 after heat treatment with hydrogen and  
 doping with lanthanum 02 p0273 A66-11716  
 Electrical conductivity of narrow energy  
 band semiconductors as function of electric  
 field strength 02 p0274 A66-11732  
 Electrical conductivity, Hall effect and  
 thermoelectric power as function of  
 temperature in CdSb single crystals strongly  
 doped with silver 02 p0275 A66-11968  
 Temperature dependence of surface  
 conductivity and Hall effect in germanium  
 alloyed with gold 02 p0276 A66-12078  
 Low energy nitrogen ion irradiation of  
 germanium plates resulting in conductivity  
 and inverse current  
 variation 02 p0277 A66-12081  
 Motion of medium of variable electric  
 conductivity in rectangular channel situated  
 in magnetic field 02 p0270 A66-12172  
 Germanium conductance measurement  
 when immersed in aqueous electrolyte using  
 DC and LF AC methods as polarization  
 function 03 p0407 A66-12403  
 Dielectric relaxation effects, dissipation  
 factor peak and capacitance and conductivity  
 dispersions in pure and doped sapphire  
 single crystals 03 p0409 A66-12638  
 Electric conductivity of argon  
 plasma 03 p0400 A66-12834  
 E-layer disturbances caused by particles  
 impinging upon atmosphere during auroras  
 noting ionization, X-rays and electrical  
 conductivities 03 p0365 A66-12858  
 Piezoresistance of doped n-type  
 germanium, determining nature of carrier  
 scattering mechanism in degenerate  
 materials and modification of conduction-  
 band edge resulting from impurity  
 states 03 p0412 A66-13148  
 Plasma behavior in MHD accelerators and  
 electrical nonequilibrium conductivity,  
 noting energy loss mechanisms and  
 techniques for improving cross field  
 accelerators 04 p0550 A66-13543

Temperature dependence of electric  
 conductivity in indium antimonide and  
 gallium arsenide measured by noncontact  
 method in terms of Q-factor  
 change 04 p0563 A66-13892  
 Donor and acceptor concentration on  
 electrical conductivity of n-type  
 silicon 04 p0567 A66-14341  
 Electrical conductivity of polar  
 semiconductors in electric fields, calculating  
 lattice and Coulomb electron scattering  
 mechanism by kinetic equation  
 method 04 p0568 A66-14350  
 Temperature, annealing time and radiation  
 dosage effect on electroconductivity of  
 inversion layers generated in n-type silicon  
 during bombardment with boron  
 ions 05 p0730 A66-14646  
 Electric conductivity, electrode  
 temperature and potential distribution  
 across channel in potassium seeded-argon  
 atmospheric-pressure Faraday accelerator  
 [AIAA PAPER 66-75] 05 p0723 A66-15035  
 Conduction phenomena in active base of  
 transistor and interpretation by electrical  
 model 05 p0648 A66-15103  
 Electron drift velocity and mobility of  
 indium antimonide obtained from pulsed  
 measurements of conductivity and Hall  
 effect at various  
 temperatures 06 p0922 A66-16173  
 Current voltage characteristics of cadmium  
 sulfide semiconductors showing departures  
 from Ohm law associated with ultrasonic  
 amplification, crystal length and increasing  
 conductivity 06 p0923 A66-16183  
 Low level garnet limiter with operating  
 range greater than one octave, using  
 conductivity change due to impact ionization  
 in n-type germanium, noting volt-ampere  
 characteristic 06 p0851 A66-16459  
 Various conduction mechanisms through  
 thin insulating films and relevance to  
 possible thin film devices 06 p0852 A66-16508  
 Decay of K-state in Ni-Cr, Ni-Cr-Mo and  
 Fe-Ni-Cr-Mo alloys studied in terms of  
 electric conductivity during plastic  
 deformation 06 p0896 A66-16606  
 Radial distribution of electrical  
 conductivity in ionized gas jet based on  
 value measured by induction method and  
 known temperature  
 distribution 06 p0919 A66-16880  
 Impurities effect on electrification of  
 cadmium telluride dust, specifically n and p  
 types, with electrification increasing with  
 impurity concentration 06 p0928 A66-16891  
 UV irradiation effect on electrical  
 conductivity of zinc oxide single  
 crystals 07 p1097 A66-17469  
 Electron energy levels in CdS single  
 crystals from Hall effect, conductivity and  
 space-charge-limited current  
 measurements 07 p1098 A66-17739  
 Frequency dependence of hot carrier AC  
 conductivity of covalent semiconductors,  
 considering scattering due to acoustic and  
 optical phonons 07 p1098 A66-17740  
 Piezoresistance in semiconductors, noting  
 anisotropic effect of mechanical stresses on  
 electrical conductivity 07 p1034 A66-17834  
 Mechanism of conduction in  
 pyropolysiloxanes studied for electrophysical  
 properties of vinyl  
 polymers 07 p1099 A66-17870  
 Temperature dependence of electrical  
 conductivity in organic semiconductors,  
 examining compounds during transition from  
 solid to liquid state 07 p1100 A66-17931  
 Electrical conductivity variation of low and  
 high resistance germanium due to X-ray  
 radiation absorption 07 p1100 A66-17932  
 MHD generator based on repetitive  
 injection of liquid metal slugs into head of  
 MHD channel, obtaining high  
 conductivity 07 p0993 A66-18310  
 Induced electric conductivity in germanium  
 bombarded by potassium ion in different  
 crystallographic directions 07 p1104 A66-18363  
 Volt-ampere characteristics of n-silicon in  
 strong electric field from 77 to 300 degree  
 K 07 p1105 A66-18365  
 Conductivity and Hall coefficient for zinc-  
 mercury-telluride solid  
 solution 07 p1105 A66-18366  
 Jump-conductivity surface dependence on  
 surface potential in semiconductor, based on  
 field effect basic

geometry 07 p1105 A66-18374  
 Diamond-like semiconductors in glassy  
 state, investigating structure and  
 characteristics of cadmium-germanium-  
 arsenide 07 p1106 A66-18383  
 Specific heat, thermal expansion and  
 conductivity and electrical conductivity of  
 nearly perfect crystalline  
 materials 07 p1109 A66-18497  
 Channel conductance measurements on  
 silicon power rectifiers and midgap donor  
 and acceptor detection on oxidized and  
 lacquered rectifiers 08 p1189 A66-18664  
 Electrical properties of alpha ferric oxide  
 containing magnesium, noting temperature  
 effect, carrier concentration, conductivity  
 variations, etc 08 p1271 A66-19221  
 High-field surface conductance of n-type  
 germanium observed to be negative and  
 magnitude to increase with field in high-  
 field region 08 p1271 A66-19222  
 Electrical conductivity, Hall coefficient and  
 thermoelectric power of tellurium  
 calculated, using models for anomalous sign  
 reversal of Hall  
 coefficient 08 p1271 A66-19240  
 Microwave measurement of anisotropy in  
 conductivity of semiconductor in strong  
 electrical field, using comparison of  
 absorption of two intersecting plane-  
 polarized waves 08 p1224 A66-19288  
 Contact area of boiling bubbles observed  
 through electroconductive glass/heating  
 surface/ into tank 08 p1320 A66-19556  
 Unilateral conductivity of thin high-density  
 film of refractory metal oxides, discussing  
 formation of p-i-n  
 junctions 08 p1276 A66-19568  
 P-type cadmium tin arsenide crystals,  
 plotting temperature dependences of  
 specific electroconductivity, Hall coefficient  
 and thermal electromotive  
 force 08 p1277 A66-19622  
 Hall effect, thermal emf and electrical  
 conductivity of SmS in temperature range  
 300 to 1000 degrees K 09 p1412 A66-19988  
 Dark electric conductivity, Hall effect and  
 thermally stimulated currents in gallium  
 arsenide single crystals 09 p1413 A66-19998  
 Electrical conductivity and field strength  
 in symmetrically contacted rectangular  
 samples as effected by geometrical  
 factors 09 p1425 A66-20187  
 Conductivity measurements on silver  
 bromide and silver  
 chloride 09 p1426 A66-20194  
 Variations of turbulent plasma electric  
 conductivity with input oscillation intensity  
 and with square of RF input  
 voltage 09 p1409 A66-20853  
 N-type germanium electric conductivity  
 dependence on applied electric and  
 magnetic field 09 p1430 A66-20857  
 Temperature dependence of electrical  
 conductivity in molybdenum and tungsten at  
 4.2 to 300 degrees K 09 p1391 A66-20862  
 Idealized problems concerning motion of  
 cylindrical plasma sheets in magnetic field,  
 noting application in  
 geophysics 10 p1527 A66-21128  
 Thermal and electrical conductivities of  
 molybdenum-rhenium alloys in  
 superconducting and normal  
 states 10 p1573 A66-21178  
 Preparation and physical properties of  
 polytetraacyanoethylene /TCNE/ copper  
 chelate film, noting electric conductivity and  
 heat treatment effect 10 p1574 A66-21348  
 Electric conductivity of plasma measured  
 by miniature immersed coil with RF  
 magnetic field  
 [AIAA PAPER 66-181] 10 p1561 A66-21431  
 Model for interpretation of positive column  
 two-dimensional striations of diffuse mode  
 gas discharge in uniform magnetic  
 field 10 p1564 A66-21569  
 Electrical conductivity of thin metallic  
 films with two surfaces having different  
 probabilities of specular  
 scattering 10 p1579 A66-21681  
 Electric and photoconductivity of vacuum  
 sintered and zone refined semiconductor  
 boron 10 p1579 A66-21722  
 Trap dominated conductivity changes and  
 optical absorption phenomena in near IR in  
 crystalline beta-rhombohedral  
 boron 10 p1580 A66-21723  
 Electron paramagnetic resonance, electrical

- conductivity and impurity diffusion in doped  
iron 10 p1580 A66-21724
- Electrical conductivity of single crystals of  
lithium and strontium  
oxides 10 p1581 A66-21878
- Vanadium pentoxide-boron oxide-lead oxide  
system IR absorption spectra and  
electroconductivity 10 p1582 A66-21917
- Electron excitation in germanium by alkali  
metal ions, noting effect on electrical  
conductivity 10 p1587 A66-22154
- Electroconductivity of n-type Ge in strong  
HF electrical fields 10 p1587 A66-22155
- Static instability in piezosemiconductors  
with negative differential  
conductivity 10 p1589 A66-22170
- Average electrical conductivity and state  
ionization in RF plasma flow device  
[AIAA PAPER 66-165] 11 p1742 A66-22209
- Neutron irradiation of InSb single crystals,  
noting conductivity type change in p-type  
and conductivity magnitude in n-type  
crystals 11 p1749 A66-22285
- Electrical conductance of turbulent  
magnetically active plasma, assuming  
oscillation is possible, determining width of  
peak shock wave in collisionless  
plasma 11 p1744 A66-22448
- High temperature vacuum furnace for  
noncontact measurements of electrical  
conductivity of semiconductor materials in  
liquid and solid states 11 p1709 A66-23294
- Pump conductivity of lightly doped p-  
germanium single crystals, noting Hall  
coefficient temperature dependence and  
specific resistance with low donor and  
acceptor concentrations 12 p1927 A66-23724
- Constant oil monitoring system using  
electric conductivity tester for extending oil  
life in gas turbine engines  
[SAE PAPER 650814] 12 p1935 A66-23844
- Conductivity effective-mass of holes of  
gallium arsenide crystals with various hole  
concentrations determined from frequency  
dependence of spectral reflectivity in  
12 p1928 A66-23942
- Earth electrical conductivity, determined  
from data concerning northern and vertical  
components of cyclic geomagnetic variations,  
suggests increases with  
depth 12 p1871 A66-24297
- Electric conductivity and spectral  
distribution of impurity photoconductivity of  
p- and n-silicon bombarded by fast neutrons,  
noting role of annealing 12 p1929 A66-24450
- Electric conductivity and thermal emf of  
solid solutions of silicon-germanium with  
near silicon composition and various  
current-carrier concentrations and test  
temperatures 12 p1929 A66-24454
- Evolution of plane switch-on and switch-off  
locks in gas of finite electrical  
conductivity in presence of small normal  
disturbances 12 p1866 A66-24950
- Direct current conduction of thin  
evaporated silicon oxide films, noting  
functional dependence on degree of  
oxidation, composition, temperature and  
adherence to Schottky emission  
law 13 p2157 A66-25034
- Dependence of electric properties of  
deblimited zinc telluride films on specimen  
thickness, substrate preheating temperature  
and sign of current  
carriers 13 p2160 A66-25098
- Conductivity of ionized gas in DC  
discharge in argon for various magnetic  
field intensities 13 p2139 A66-25406
- Nonstationary two-dimensional channel flow  
compressible electrically conducting fluid  
subject to traveling magnetic  
field 13 p2140 A66-25422
- Iron selenides of nickel arsenide structure  
analyzed, noting dependence of  
semiconductor characteristics on iron gap  
arrangements 13 p2164 A66-25471
- Solid electrolytes which exhibit appreciable  
electron conduction for use in galvanic  
cells 13 p1999 A66-25675
- Temperature, annealing time and radiation  
damage effect on electroconductivity of  
version layers generated in n-type silicon  
during bombardment with boron  
ions 13 p2167 A66-25921
- Electrical fluctuations in argon-potassium  
nonequilibrium plasma measured and  
correlated with theories of electrothermal  
and magnetoacoustic  
waves 13 p2149 A66-26261
- Self-compensation in electric conductivity  
and other properties of binary  
semiconductor with temperature  
variations 14 p2357 A66-27079
- Stability criteria of system with negative  
differential conductivity showing generation  
of longitudinal waves, noting amplitude  
buildup increment 14 p2358 A66-27085
- Cuprous oxide conductivity caused by  
ionization of thermal lattice  
defects 14 p2358 A66-27091
- Thallium admixture effect on electrical  
conductivity of crystalline and liquid  
selenium, noting decrease and increase in  
conductivity, determining temperature  
dependency and activation  
energy 14 p2359 A66-27177
- Effective-mass approximation of conduction  
electron scattering in very thin  
films 14 p2360 A66-27192
- Temperature dependence of Hall effect  
and conductivity of lead telluride single  
crystals containing  
bismuth 14 p2364 A66-27645
- Temperature-dependence of electric  
conductivity and Hall coefficient in  
semiconductors 14 p2364 A66-27730
- Electroconductivity, Seebeck effect and  
charge carrier mobility in Li-doped  
NiO 14 p2366 A66-27766
- Donor and acceptor concentration on  
electrical conductivity of n-type  
silicon 14 p2367 A66-28235
- Electrical conductivity of polar  
semiconductors in electric fields, calculating  
lattice and Coulomb electron scattering  
mechanism by kinetic equation  
method 14 p2368 A66-28247
- Nonconducting fluid motion in infinite  
tube applied to violent thunderstorm  
dynamics, reducing current intensity to  
value for convection  
currents 14 p2346 A66-28268
- Conductivity of n-silicon in strong  
magnetic field 14 p2370 A66-28332
- Electron gas electroconductivity relaxation  
time and energy loss in n-type InSb at  
cryogenic temperatures 15 p2558 A66-28611
- Hot electron redistribution in multivalley  
conductors in electric fields, based on  
variation under pressure of valley  
population levels, using silicon  
samples 15 p2559 A66-28622
- Electric conductivity in thin metal films  
deposited on single crystal sodium chloride  
substrates, thermally activated with negative  
temperature coefficient of  
resistance 15 p2561 A66-28704
- Pure selenium conductivity, thermal emf  
and Hall effect 15 p2563 A66-28737
- Conductivity of compressed powdered  
refractory compounds found to be  
exponential function of ratio between  
material/compact  
densities 15 p2520 A66-28749
- Electrical conductivity of Earth interior  
from data concerning annual geomagnetic  
variations for all years of solar  
cycle 15 p2487 A66-29101
- Correction of Fatkullin expressions for LF  
conductivities of homogeneous plasma in  
presence of electron-ion collisions in  
ionosphere 15 p2488 A66-29109
- Two-dimensional isothermal liquid flow  
electrically conducting in channel under  
electromagnetic fields, finding self-modeling  
solutions, using Jacobi  
functions 15 p2551 A66-29221
- Dielectric constant, permeability and  
conductivity of random media determining  
electric field, current, magnetic field, etc,  
assuming these quantities are time harmonic  
plane waves 15 p2451 A66-29619
- Temperature dependence of electric  
conductivity in indium antimonide and  
gallium arsenide measured by noncontact  
method in terms of Q-factor  
change 15 p2568 A66-29705
- Recombination rate, ionization in  
nonequilibrium electric  
prediction for dense  
plasma 15 p2554 A66-29752
- Thermal instability causes negative-  
resistance region in nonohmic point contact  
conduction in semimetals 16 p2769 A66-30155
- Thermoconductivity and electrical  
resistivity measurements with derived  
Lorentz functions for various compounds,  
using longitudinal heat  
flow 16 p2771 A66-30252
- Modulator resulting from application of  
Welker effect in semiconductor and used in  
Q and E bands, obtaining conductivity  
variations 16 p2662 A66-30960
- Ohm law for nonisothermal plasma,  
considering thermal diffusion forces,  
obtaining expressions for electric  
conductivity and Hall  
coefficient 16 p2761 A66-31085
- Thickness of gold, silver and copper thin  
films determined, using measurements of  
resistance and Hall  
voltage 16 p2780 A66-31096
- Electrical conductivity of metals,  
explaining electron scattering amplitude  
changes, phonon spectrum distortion and  
temperature effects caused by impurity  
concentration in  
conductor 16 p2780 A66-31180
- Electric conductance and capacity of  
pressed chemically-pured manganese dioxide  
powder at various  
temperatures 16 p2781 A66-31340
- Reynolds analogy computation of heat  
transfer coefficient of turbulent  
electroconducting liquids in transverse  
magnetic field 16 p2765 A66-31401
- Conduction mechanism in discontinuous  
metal films involving image forces, potential  
barrier, activation energies, saturation effect  
in conductivity, etc 16 p2783 A66-31427
- Magnetic field influence on AC surface  
field effect in germanium resulting from  
change in sample conductance and not from  
change in surface barrier  
height 16 p2784 A66-31450
- MHD wave propagation emphasizing  
viscosity, heat and electrical conductivity,  
Hall current, no nonequilibrium phenomena  
and effect of medium  
inhomogeneity 16 p2766 A66-31583
- Change in conductivity at surface of  
semiconductor due to changes in relaxation  
time and charge carrier  
densities 16 p2786 A66-31689
- Electric conductivity of CdS single crystals  
in atmosphere, dry air, oxygen, water vapor,  
carbon dioxide and in transverse electric  
field 16 p2786 A66-31730
- Dark conductivity of cadmium sulfide  
single crystals as affected by contacts,  
voltage and transverse electric  
field 16 p2786 A66-31731
- Energy levels in forbidden band of gallium  
arsenide alloyed with silver or gold,  
determining impurity levels from  
temperature dependence of electric  
conductivity and Hall  
constant 16 p2789 A66-31791
- Tunnel diode circuit stability, equivalent  
circuit and conductivity  
holograph 17 p2880 A66-31867
- Electrical conductivity and Hall mobility of  
p- and n-type semiconductors at various  
temperatures 17 p2975 A66-31900
- Electrical conductivity of concentrated  
phosphoric acid from 25-60 degrees  
C 17 p2870 A66-32042
- Decay time on sunspot magnetic fields,  
calculating conductivity of solar plasma  
while neglecting influence of negative and  
positive hydrogen ions 17 p3000 A66-32334
- Electric conductivity of multicomponent  
partially ionized gas calculated by simplified  
Chapman-Enskog method 17 p2967 A66-32446
- Electric conductivity in low voltage  
atmospheric pressure gas discharge, noting  
Maxwellian electron density  
distribution 17 p2968 A66-32484
- Quantum theory of electric conductivity of  
semiconductors with nonstandard band,  
discussing influence of spin splitting of  
Landau levels on oscillations of transverse  
magnetoresistance in  
n-InSb 17 p2978 A66-32508
- Electrical conductivity and thermoelectric  
measurements of intermediate phases in  
erbium tellurium system 17 p2979 A66-32631
- Dominant mode perturbation theory  
applied to treatment of influence of  
imperfect waveguide contact on measured  
complex permittivity of  
semiconductors 17 p2887 A66-32643
- Unsteady slip flow of electrically  
conducting viscous fluid over porous flat

plate under transverse magnetic field 17 p2973 A66-32980

P-type cadmium tin arsenide crystals, plotting temperature dependences of specific electroconductivity, Hall coefficient and thermal electromotive force 17 p2984 A66-33136

Gold and silver doping effect on Hall effect, electroconductivity thermal emf and conductivity of CdSb 17 p2984 A66-33145

Surface characteristics of semiconductors with intrinsic conductivity, determining potential distribution electric field, carrier concentrations, etc 17 p2984 A66-33146

Electron-hole conductivity effect on temperature variations of Hall coefficient and Nernst-Ettingshausen effect in semiconductor 17 p2986 A66-33309

Radiation-induced electroconductivity and secondary emission in alkali halide single crystals under positive ion bombardment 17 p2988 A66-33458

Plasma jet electrical conductivity, using inductances with different diameters as measurement device 18 p3144 A66-34101

Low temperature plasma conductivity of combustion products, particularly of exhaust gases in duct of MHD oscillator 18 p3145 A66-34107

Various experiments explaining fundamental properties of probes used in measurements of plasma arc columns 18 p3112 A66-34115

Fermi surface shape and size determination and thermoconductivity and conduction electron properties in metals 18 p3155 A66-34135

Negative temperature coefficient of electrical resistance, anomalous Hall constant and magnetoresistance constant for thin films of Be and Pb 18 p3157 A66-34627

Wyatt anomalies in tunneling conductance centered at zero bias, noting magnetic effect 18 p3159 A66-35035

Impurity conduction for arsenic diffused into p-type germanium and boron into n-type silicon 19 p3433 A66-35342

Nuclear polarization by hot carrier flow in homogeneous semiconductor, taking into account effect of strong electric field on spin lattice relaxation time 19 p3437 A66-35474

Impurities effect on electrical conductivity of air between 1000 and 10,000 degrees K 19 p3406 A66-35743

Electron excitation in germanium by alkali metal ions, noting effect on electrical conductivity 19 p3440 A66-35768

Electroconductivity of n-type Ge in strong SHF electrical fields 19 p3440 A66-35769

Sonic instability in piezosemiconductor with negative differential conductivity 19 p3441 A66-35784

Spontaneous LF conductivity fluctuations in n-type gallium arsenide samples at 77 degrees K 19 p3442 A66-35822

Texture and electric conductivity of cadmium sulfide thin films 19 p3442 A66-35865

Singularities of temperature dependence of electric resistivity of aluminum at helium temperatures 19 p3382 A66-36072

Electrical conductivities of boron trifluoride in chlorine and bromine trifluorides studied as function of temperature and concentration 19 p3295 A66-36367

Normalized self-and mutual admittances of two identical bare circular loop antennas in air or conducting medium evaluated, obtaining single integral equation for current distribution 19 p3321 A66-36405

Electric conductivity of beta and gamma phases of tantalum-carbon system as affected by temperature and composition 19 p3386 A66-36424

Anodic oxidation process for silicon, examining current flow in strong electric field as function of time, Curie-von Schweidler law and Tafel law 19 p3448 A66-36755

Electric conductivity of argon plasma 19 p3433 A66-36776

Electrical and thermal conductivity and integral degree of blackness of tantalum at temperatures above 1000 degrees C 20 p3582 A66-36977

Electromagnetic field effect on heat

transfer during laminar flow of electrically conducting incompressible fluid in flat channel 20 p3607 A66-36980

Pinch effect in InSb degenerate plasma, discussing electric conductivity and recombination emission spectra 20 p3615 A66-37371

Dependence of Hall effect and conductivity of irradiated samples on reciprocal temperature in nuclear transmutations produced in InSb by bombardment with slow neutrons 20 p3617 A66-37485

Thermoelectric device for semiconductor analysis, determining whether material is of n-or p-type conductivity 20 p3560 A66-37586

Electric conductivity and spectral distribution of impurity photoconductivity of n-and p-silicon bombarded by fast neutrons, noting role of annealing 20 p3619 A66-37682

Electric conductivity and thermal emf of solid solutions of silicon-germanium with near silicon composition and various current-carrier concentrations and test temperatures 20 p3619 A66-37686

Thin dielectric film wave scattering, EM interaction responses and conductivity tensor 20 p3622 A66-38385

Moisture content determination in liquid HF based on electroconductivity 21 p3702 A66-38519

Shubnikov-de Haas effect for transport properties of electron gas in magnetic field, noting oscillatory parts of thermal and electric conductivities 21 p3776 A66-38632

Electric conductivity of magnetically balanced arc in transverse argon flow at atmospheric pressure 21 p3777 A66-38718

Electron conduction and phosphorus doping effects on room temperature and cryogenic electron spin resonance in n-type silicon 21 p3797 A66-38752

Impurity conduction effect on electron donor recombination cross section in n-type germanium and silicon at liquid helium temperatures 21 p3801 A66-39001

Flow of strongly rarefied ionized plasma past electrically charged body solved by kinetic and Poisson equations in absence of magnetic field 21 p3795 A66-39604

Phthalocyanine crystal phase change effect on electric conductivity 22 p3860 A66-39921

Experimental results of VLF dipole tests on Greenland ice cap including measurements of self-impedance, amplitude current distributions, relative efficiency and complex conductivity 22 p3874 A66-39942

Deep centers in conducting n-type GaAs and production of Schottky layer 22 p3963 A66-40088

Taxonomy of electric charges in Si-silicon dioxide metal insulator semiconductor /MIS/ systems under presence or absence of bias 22 p3877 A66-40178

Conductivity of potassium-seeded argon plasma, assuming variable collision cross sections and Maxwellian distribution for electrons 22 p3951 A66-40363

Applications for new class of materials termed oxide-dispersion strengthened materials offering stability at high temperatures and high thermal and electrical conductivity 22 p3935 A66-40526

Self-compensation in electric conductivity and other properties of binary semiconductor with temperature variations 22 p3967 A66-40835

Stability criteria of system with negative differential conductivity showing generation of longitudinal waves, noting amplitude buildup increment 22 p3967 A66-40841

Cuprous oxide conductivity caused by ionization of thermal lattice defects 22 p3967 A66-40847

Four-point probe technique to measure conductivity of epitaxial layers on conducting substrates 23 p4110 A66-41157

Surface charge mobility measurement method applied to Si and Ge and time variation of surface conductivity 23 p4110 A66-41183

Electrical conductivity variation with temperature of chlorine and bromine trifluoride, noting maximum conductivity below freezing point of chlorine trifluoride 23 p4118 A66-41241

Spatial distributions of carrier concentration and internal field in cadmium selenide for various voltages, measuring

conductivity and Hall coefficient 23 p4112 A66-41292

Optimum seed concentrations of alkali metal in rare gas for maximum electroconductivity of slightly ionized nonequilibrium plasma 23 p4104 A66-41511

Semiconductor conductivity in strong SHF electric fields, measuring dielectric constant and Fourier component 23 p4068 A66-41620

Correct conductance and susceptance of infinite cylindrical antenna determined via asymptotic evaluation of parametric integrals 23 p4047 A66-41636

Electric and thermal conductivity effects on MHD instabilities in diffuse linear pinch 23 p4105 A66-41706

Variation of resistivity and inversion of sign of conductivity of quenched specimens of p-type silicon 23 p4115 A66-41838

Viscous electrically conducting liquid oscillating in laminar regime between parallel planes when applying magnetic field normal to planes and motion direction 23 p4108 A66-42047

Decaying free carrier concentration increase in GaAs when subjected to increased level of drive during first cycle 24 p4253 A66-42370

Hall coefficient, electrical conductivity and thermoelectric power of GaSb-Ga<sub>2</sub>Te<sub>3</sub> solid solutions as functions of composition and temperature 24 p4254 A66-42425

Effective-mass approximation of conduction electron scattering in very thin films 24 p4259 A66-43090

MHD flow, examining effects of finite electric conductivity on basic flows due to compression and shear 24 p4246 A66-43115

**ELECTRIC CONDUCTOR**

**SA DIELECTRICS**

Stability of flexible conductor in longitudinal magnetic field, using scalar potential to determine disturbed state 18 p3152 A66-35081

Plastic electric conductivity, discussing conduction by fillers in plastic matrix and conduction of polymers by virtue of molecular structure [ASME PAPER 66-MD-31] 21 p3753 A66-38486

Electrical explosion of copper wire in air and in vacuum, discussing plasma emission and I-V characteristics 21 p3791 A66-39084

**ELECTRIC CONNECTOR**

Reliability prediction and production control of electrical connection by combination of stress survival matrix test and special strength control chart 01 p0076 A66-10067

Worst case design for high reliability welded electrical connections, emphasizing encapsulation stresses and quantitative parameter 02 p0234 A66-11325

Multilayer circuit boards for interconnecting integrated circuits in computer and other large systems 04 p0498 A66-14015

Solder flow under wire insulation and effect on reliability, noting destructive and vibration test results 11 p1665 A66-22680

Intermittent connection testing for digital logic module 20 p3523 A66-37949

Microbonding difficulties in joining flat pack circuits to printed circuit boards, examining parallel gap welding connections with board material and use of dissimilar metals 23 p4043 A66-41189

Electric contact design factors for shock vibration environments 24 p4186 A66-43058

**ELECTRIC CONTACT**

Dependence of barrier height of metal-semiconductor systems on metal work function, surface states and thickness of interfacial layer 02 p0271 A66-11438

Photovoltage profiles of rhodium to p-silicon contact at high and low level injection and various temperatures 02 p0275 A66-11873

Frequency dependence of dynamic properties of semiconductor small area ohmic contacts in volt-ampere characteristic regions when constant current and sinusoidal pulses are applied 06 p0838 A66-15893

Macroscopic quantum interference effects through superconducting point contacts, with results for several superconductors 07 p1109 A66-18439

Electric Ag-CdO contacts obtained by internal high temperature oxidation method 08 p1239 A66-18900

Make-before-break contacts effect on degree of complexity of film and hybrid microelectronic nodes 08 p1191 A66-18921

Rectifying and ohmic contacts used in manufacture of gallium phosphide diodes that emit light when current is reversed 08 p1273 A66-19291

Effect of conditions of fabrication of alloyed contacts between semiconductors and metals on dislocation structure of these contacts 08 p1274 A66-19315

Electrical contact for very small planar functions and embodiment in millimeter-wave mixer diode 09 p1350 A66-19926

Schottky diode and metal-base transistor design and operation with metal-semiconductor contact 11 p1660 A66-22271

Behavior of trace elements in gallium arsenide and materials and methods used for ohmic contacts to n-and p-type specimens, stressing importance of indium 11 p1757 A66-23283

Resonance properties of germanium analyzed by passing DC and AC through samples of various specific resistance with tungsten needle contacts 11 p1759 A66-23419

Parts, materials and packaging reliability and electric contacts - IEEE International Convention, New York, March 1966 12 p1842 A66-24663

Sliding contact wear under very dry high altitude or space conditions due to lack of contact film prevented by using chemical compounds like graphite or lithium carbonate 12 p1888 A66-24664

Clad metals concept applied to low energy contact using materials system, analyzing material, mechanical and electrical properties of thin precious metal inlays 12 p1930 A66-24666

Weimer triode with contact rectifier for use as component of microminiature radio circuits, noting effect of contact rectification on current-voltage characteristics and amplifying power of such triodes 13 p2031 A66-25228

Contact bouncing in protective gas relays measured in circuit with inductive and real load 13 p2031 A66-25484

Lubricants for space environment, noting experiences with satellites and application to ball bearings and electrical contacts 13 p2086 A66-25770

Functional transformations revealing topological properties of single contact /SC/ network, simplifying task of synthesis 13 p2051 A66-26064

Properties of hydrothermally grown single crystals of tetragonal lead monoxide, with contacts applied by metal evaporation 14 p2359 A66-27099

Jet plating of gold to make ohmic contacts on silicon 14 p2361 A66-27277

High performance contactor design and development 15 p2460 A66-28993

Electric contact effect and transition temperature measurement in superconducting Cu-Pb double layer films at low temperatures, using He 3 cryostat 16 p2772 A66-30322

Dominant mode perturbation theory applied to treatment of influence of imperfect waveguide contact on measured complex permittivity of semiconductors 17 p2887 A66-32643

Excess carriers lifetime in semiconductors nonstatic measurement by photoconductive phase shift of spreading resistance under point contact 19 p3433 A66-35330

Superconducting point contact diodes for observation of microwave radiation generated by bridge with and without constant voltage steps 20 p3620 A66-37776

Voltage oscillations as function of applied magnetic field in weak contacts between superconductors in resistive region when applying currents above critical value 23 p4111 A66-41251

**ELECTRIC CONTROL**

Conversion of small-telescope mounting to electrical control 05 p0680 A66-15210

Network theory - Conference, Cranfield, England, September 1965 07 p1014 A66-17744

Circuits for variable impedance control at centimeter-wave frequencies, using varactor

semiconductors and dephasing ferrites in waveguide 07 p1002 A66-17828

Redundant electrical systems for Titan II and Gemini Titan II launch vehicles 20 p3499 A66-37193

Electrical control of boundary layer flip-flop fluidistor by disruptive discharges between electrodes producing pneumatic pressure shocks that switch output flow 20 p3501 A66-37648

Optimal discrete binary system of electrical control of beam position of phased linear antenna array 21 p3712 A66-39251

**ELECTRIC CURRENT**

SA ALTERNATING CURRENT /AC/

SA DIRECT CURRENT /DC/

SA EDDY CURRENT

SA JOSEPHSON CURRENT

SA LIGHTNING

SA PONDEROMOTIVE FORCE

SA POTENTIOMETRY

Short-circuit current change in silicon solar cell performance as function of cell thickness 01 p0014 A66-10397

Cross-sectional geometry of Nernst-Ettingshausen devices optimized for rectangular geometry and for Norwood spiral screw thread configuration 02 p0270 A66-11430

Superconducting coil degradation, noting flux jumps causing sudden decrease in series current which causes field disturbances throughout coil 02 p0271 A66-11440

Approximation method reproducing assigned time functions by using exponential polynomials in synthesis problems of electrical circuits 02 p0207 A66-11752

Coherence of Gunn oscillations enhanced by transverse magnetic field for certain applied voltages 03 p0332 A66-12427

Multicircular sector slow wave structure in millimeter wave range as modified structure of circular symmetrical circuit, noting dispersion characteristics 03 p0339 A66-12452

Beating effect of current oscillations in cadmium sulfide due to nonuniform illumination and indicating sinusoidal oscillations of different frequencies and comparable amplitude 03 p0408 A66-12453

Operation principle, design and application of coloristors which change color at predetermined temperatures determined by current passing through them 03 p0340 A66-12475

Electrochemical oxidation of p-n junctions on silicon surface in potassium nitrate solution in ethylene glycol, noting electric current 03 p0413 A66-13203

Electric current system arising from sudden enhancement of ionospheric conductivity in auroral zone 04 p0516 A66-13853

Roberts method determining accommodation coefficients of gases on bare wires leads to erroneous conclusions due to thermal inertia of experimental apparatus in vicinity of current paths 04 p0545 A66-14170

Plasma measurements including temperatures, electron density, current density, etc, noting behavior of probes in magnetic fields 05 p0726 A66-15247

Cesium filled diodes measured at various cathode temperatures, noting effect of ions generated in interelectrode space on current 05 p0728 A66-15549

Mass and energy state dependence of plasma, generated by titanium source, on electrical operating conditions of source 06 p0919 A66-16878

Magnetic-pulse working of metals based on current surge in coil inducing magnetic field to generate electric current in metal articles around coil 06 p0888 A66-17073

Transport theory based on relaxation time applied to bismuth, deriving analytic expressions for electric resistance, thermoelectricity and Hall, Seebeck and Nernst coefficients 07 p0990 A66-17237

Stimulated state, stable, lasting and reproducible, in electroluminescent cells of sublimated zinc sulfide film obtained upon passage of increasing DC voltage through them at 77 degrees K 07 p1099 A66-17914

Electric current passage through multivalley n-germanium semiconductor plates, noting nonuniform electron distribution 08 p1273 A66-19275

Batteries - International Symposium at Brighton, England in September 1964 08 p1169 A66-19641

Amplitude and phase of first harmonic of load current of differential magnetic amplifier determined, using generalized characteristics 09 p1352 A66-20303

AC current measurement to determine contribution in semiconductors, which appears as displacement current, from space charge caused by injected and alternatively modulated carriers 09 p1432 A66-20970

Current pulse measurement of thin polarized ferroelectric ceramic disks connected by short circuit under stress wave 10 p1576 A66-21546

Quasi-linear current instability in two-temperature plasma for Coulomb collision and free electron acceleration 10 p1569 A66-21972

CW microwave oscillation in bulk GaAs, discussing harmonic content, linewidth, circuit and electronic tunability, etc 10 p1585 A66-22077

Microwave oscillations in epitaxial layers of gallium arsenide 10 p1585 A66-22080

Fast coincidence circuit with high sensitivity and low recovery time, analyzing triggering and self-oscillating operation and using avalanche operating transistors 11 p1662 A66-22402

Radiation field and surface waves generated by linearly phased electric line current and electric current component oriented in plane parallel to unidirectional conducting screen, solved by modal method 11 p1652 A66-22549

Superconducting systems partitioned by thin barriers allow supercurrents to pass through, noting magnetic field penetration into barrier, AC supercurrents, structure in DC, current-voltage characteristics of barrier, etc 11 p1756 A66-22978

Density of electron states and classical effective mass of current carriers in magnetic field for semiconductor with wurtzite-type lattice 12 p1930 A66-24457

Electrical precursors in immediate vicinity of ionizing shock waves in argon analyzed, using model describing electron diffusion through shock 12 p1923 A66-24579

Capacitive probe measurements of potential fluctuation in current-oscillating CdS crystals under ultrasonic amplification conditions at room temperature 12 p1931 A66-24812

Double stream instability in finite diameter beams analyzed by numerical experiments on digital computer, showing electron trapping as cause of RF current saturation 13 p2137 A66-25044

Reversal of diode with delay between last direct pulse and first reversed pulse 13 p2031 A66-25230

Voltage drop in direction of current flow produced in superconducting alloys by current perpendicular to magnetic field explained by assuming Abrikosov filaments move under influence of Lorentz force 13 p2168 A66-26022

Precursor wave structure in electromagnetic shock tube, determining precursor velocity, electron density and current content, comparing precursor behavior with ionizing electromagnetism wave 13 p2064 A66-26259

Alfven wave propagation in inhomogeneous magnetic fields satisfying magnetohydrostatic equation and allowing for electric currents solved, using differential equation 13 p2156 A66-26710

Current changes in gas discharge as affected by laser action 14 p2306 A66-27055

Spontaneous LF current oscillations in germanium with copper, with compensated energy levels under illumination, low temperatures and electric fields, noting formation of electric domains 14 p2357 A66-27076

Stabilization of gas conductor carrying HF current with aid of steady state magnetic field, noting MHD perturbations role 14 p2341 A66-27149

Sectorial structure effect on current carrier concentration of germanium doped indium antimonide single crystals 15 p2558 A66-28565

Time variation of current, temperature and

resistance in premelt stage of wire explosion expressed in terms of initial wire and circuit data 15 p2537 A66-28722

Electric current density in semiconductor, noting harmonic mixing of microwaves by warm electrons in 15 p2564 A66-28875

Excitation of ion-acoustic waves in potassium-cesium plasma when passing current through it, finding natural frequencies of system when plasma is drifting along axis 15 p2550 A66-29214

Existence of convective interaction mechanism affecting direction and stability of electric current in flowing gas, using electric arc confined in supersonic flow 15 p2481 A66-29744

Ambipolar diffusion of plasma cloud imbedded in ionized gas with homogeneous magnetic field, assuming electric current is not vanishing 15 p2494 A66-30045

Electric potential and space charge density near Langmuir probe in hot rarefied plasma at rest, calculating current collected from plasma 16 p2759 A66-30372

Gallium arsenide and silicon solar cells under proton irradiation, noting decrease of short circuit current and open circuit voltage 16 p2636 A66-31018

Bulk oscillations in n-type Si compensated with either Au or Co deep level impurities 16 p2778 A66-31078

Effect of finite width on performance of polyphase rectangular MHD converter, showing that for isotropic fluid electric current extends in two dimensions 16 p2637 A66-31102

Efficiency criterion for semiconductors, using equations for flux density of electric current and energy for isotropic semiconductor in absence of magnetic field 16 p2789 A66-31790

Radial temperature distribution within argon plasma column determined spectroscopically at various arc currents, noting argon thermoconductivity 17 p2966 A66-32427

Space-charge-limited electron current in silicon 17 p2980 A66-32646

High-field superconductors, noting role of defects in pinning, magnetization, critical currents, applications in solenoids, etc 17 p2985 A66-33156

Critical current enhancement and degradation due to hysteresis in nonideal type II superconductors in axial magnetic fields 18 p3153 A66-33612

Stimulated state, stable, lasting and reproducible, in electroluminescent cells of sublimated zinc sulfide film obtained upon passage of increasing DC voltage through them at 77 degrees K 18 p3155 A66-34174

Current source for vacuum tube circuits delivering constant and fairly large current from cathode of pentode 18 p3079 A66-34246

Voltage and density of contact-corrosion current arising at contact surface of different metals 18 p3124 A66-35011

Energy band structure, carrier behavior and characteristic curve of p-n junction diode at high-current level, solving transport and Poisson equations 19 p3312 A66-35346

Constant current sources consisting of sealed ionization chambers for calibrating electrometers 19 p3357 A66-35809

Transient charge and discharge currents in tantalum oxide with anodic electrolyte and tantalum oxide with anodic metal 19 p3448 A66-36754

Destructive grounding system fault currents and abortive interference and elimination, using functional diagrams 20 p3542 A66-37241

Anomalous permanent changes in transistor gain after low exposure dosage of electron and/or gamma radiation related to recombination current-component buildup 20 p3526 A66-37320

Anomalous photocurrent generation in transistors, noting carrier generation and transport processes 20 p3526 A66-37321

Viscous thermoconductive model of solar wind motion, using Navier-Stokes equations 20 p3631 A66-37335

Axially oriented point source current and filament with triangular current distribution in magnetoionic medium, examining ion sheath effect on radiation

characteristics 20 p3516 A66-37624

Density of electron states and classical effective mass of current carriers in magnetic field for semiconductor with wurtzite-type lattice 20 p3620 A66-37689

Testing of silicon solar photoelectric battery when exposed to large light fluxes, noting overheating, current saturation, efficiency decrease, etc 20 p3503 A66-38439

Thermostability of germanium power transistors, noting collector leakage current 21 p3709 A66-38673

Electromagnetic wave excitation in magnetoplasma by external currents using kinetic theory, obtaining expression for energy losses, analyzing electron and ion cyclotron resonance 21 p3782 A66-39016

Quasi-linear current instability in two-temperature plasma for Coulomb collision and free electron acceleration 21 p3794 A66-39551

Negative resistance in cathode current and grid and plate current of tube in which electrodes are situated behind cathode 22 p3871 A66-39658

Cesium-plasma diode effect dependence on material output of cathode in vacuum, plotting short circuit current vs vapor pressure, voltage distribution, etc 22 p3952 A66-39752

Curve analysis of current instabilities including Gunn effect in n-type gallium arsenide 22 p3961 A66-40045

Neutron irradiation-induced defects in vapor deposited niobium stannide and effects on current-carrying capacity 22 p3962 A66-40083

Spontaneous LF current oscillations in germanium with copper, with compensated energy levels under illumination, low temperatures and electric fields, noting formation of electric domains 22 p3966 A66-40833

Domain and circuit properties effect on oscillations in GaAs 22 p3967 A66-40865

Voltage oscillations as function of applied magnetic field in weak contacts between superconductors in resistive region when applying currents above critical value 23 p4111 A66-41251

Sectorial structure effect on current carrier concentration of germanium doped indium antimonide single crystals 23 p4112 A66-41286

Sliding magnetic field effect on electric current in conducting annular channel flow, noting energy-transfer efficiency and acoustic resonance 23 p4107 A66-42030

Radiation response of low power nuxistors, noting cause of grid current and relation between grid structure and induced current 24 p4258 A66-42961

Stabilization of gas conductor carrying HF current with aid of steady state magnetic field, noting MHD perturbations 24 p4244 A66-42969

Light emission in near IR by semiconducting GaAs under current oscillations caused by electron-phonon coupling 24 p4258 A66-43000

**ELECTRIC DIPOLE**

**SA MAGNETIC DIPOLE**

**SA QUADRUPOLE**

Magnetic particle motion, analyzing effect of Earth electric dipole field 05 p0752 A66-15387

Radiation fields of moving electric dipole falling off faster than  $1/r$ , having two nonspinning point charges, variable point and moving at relativistic velocities 06 p0832 A66-16453

Radiation from axially oriented electric dipole situated at center of infinitely long axially magnetized column of uniform plasma 08 p1186 A66-19747

LF admittance measurements on orthogonal dipoles in ionosphere 09 p1341 A66-19855

Matrix formulation determination radar cross section arising when smooth conducting obstacle is illuminated by incident electromagnetic wave 10 p1497 A66-21590

Feed polarization incident upon conic reflector in antenna system specified in terms of crossed electric and magnetic dipoles 11 p1663 A66-22544

Dipolar resonances when axially uniform

warm plasma column is subjected to transverse RF electric field 12 p1815 A66-23962

MHD approach to axisymmetric perturbations in plasma permeated by static dipole field 12 p1951 A66-24574

Radiation due to axially oriented electric dipole situated on axis of infinite cylindrical column of insulating free space surrounded by uniaxially anisotropic plasma 13 p2026 A66-26103

Radiation due to time-harmonic source and field solution of electric dipole in moving uniaxial anisotropic medium by Minkowski theory 14 p2234 A66-26861

Oscillator strengths for electric dipole transitions in neutral helium 14 p2338 A66-28127

Low temperature vibronic transitions between electronic states involving destruction of photon and creation of phonon via electric dipole term of Hamiltonian 19 p3446 A66-36394

Electric dipole radiation through finite conical plasma sheath about reentry vehicle, calculating radiation pattern 19 p3304 A66-36403

Short distance expansion method used to calculate ground radio wave propagation over mixed path on spherical Earth 19 p3305 A66-36421

Electric quadrupole transition in fourth positive system of CO observed in bands of electric dipole allowed transition 19 p3404 A66-36800

Single-axis meter design and development for measuring feeble torques on massive bodies, discussing calibration, testing results, evaluation of static dipole moments and spacecraft spin-rate control moments 21 p3722 A66-38880

Light absorption by optically pumped atoms undergoing magnetic resonance, noting modulation amplitudes and modulation frequency limitation for primary interaction 22 p3930 A66-39807

Antenna radiation theory, noting reiteration of incorrectness of infinity catastrophe theory and application to oscillating dipole in uniaxial medium 23 p4047 A66-41633

Elimination of singularity in power radiated by point electric dipole in unbounded magnetoplasma within certain frequency range 24 p4241 A66-42373

Self-impedance of electric dipole immersed in plasma half-space with finite temperature 24 p4243 A66-42625

Nonlinear optics emphasizing parametric oscillation, self-focusing and trapping of laser beams and stimulated Raman, Rayleigh and Brillouin scattering, using Maxwell equations and electric dipole approximation 24 p4225 A66-42810

**ELECTRIC DISCHARGE**

**SA ARC DISCHARGE**

**SA CORONA DISCHARGE**

**SA GAS DISCHARGE**

**SA GLOW DISCHARGE**

**SA LIGHTNING**

**SA PENNING DISCHARGE**

**SA RADIO FREQUENCY DISCHARGE**

**SA SPARK**

Helium-neon laser output dependence on hollow cathode discharge conditions for electron transitions in neon 02 p0239 A66-11422

Double sheath presence in front of hot cathode in low pressure DC discharge 02 p0265 A66-11433

Excitation of ruby lasers using double-pumped high-intensity helical flash tubes, obtaining time-resolved spectra of electrical discharges and plasma temperatures 02 p0240 A66-11446

Equilibrium electron density of RF discharge excited with frequency higher than electron-neutral collision frequency and controlled by resonance from plasma dispersion 03 p0405 A66-12986

Pressure range determination where stable plasmoids exist in electric field discharge, with measurements made on rare gases 03 p0405 A66-12987

Synthesis by electrical discharge of porphine-like substances imply abiogenic possibility under primitive Earth condition 03 p0331 A66-13261

Dielectric properties of noble gases afterglows following electrodeless discharge over signal frequency and pressure ranges 04 p0551 A66-13813  
 Reflex arc in lithium vapor analyzed, using spectrographic, mass spectrometric and probe measuring techniques 04 p0554 A66-14293  
 Effect of heat removal through MHD channel walls on stability of temperature distribution during electrical discharge in gas between two planes 04 p0557 A66-14421  
 Book on theoretical and engineering problems arising in capacitor discharge technique of pulse generation 06 p0878 A66-16046  
 Preparation and properties of oxygen fluorides OF<sub>2</sub> and O<sub>6</sub>F<sub>2</sub> by electrical discharge apparatus used to prepare OF<sub>2</sub> 07 p1000 A66-18344  
 Selection, design and utilization of electrical discharge machine 08 p1229 A66-18688  
 Comparative determination of HF electrical discharge threshold in electromagnetic system 09 p1349 A66-19852  
 Discharge in germanium thin films at liquid helium temperatures, noting electrostatic ionization of impurities and shock-ionization region expansion 09 p1412 A66-19990  
 Radial distributions of number density, electron temperature and plasma potential measured in electrodeless discharge, using symmetric and asymmetric double probes [AIAA PAPER 66-194] 10 p1562 A66-21440  
 High voltage capacitor discharge from Marx circuit, using stepup transformer 10 p1486 A66-21862  
 Point-discharge currents between negative points and positive plane 11 p1695 A66-22376  
 Lightning and static electricity discharges effects on helicopter design and performance, noting blade and rotor hub protection, fuel ignition, etc 11 p1638 A66-23259  
 High speed photography determination of current cut-off and recurrent breakdowns during electrical discharges in water 12 p1922 A66-24221  
 Electrical discharge theory of cosmic atmospheric phenomena, relating lightning, novae and quasars 12 p1950 A66-24394  
 Giant-pulse laser-induced atmospheric electric breakdown causing optical frequency discharge 13 p2134 A66-26194  
 Ion pressure theory to describe steady state collisionless discharge 13 p2155 A66-26679  
 Localization conditions of high power linear HF discharge at low gas pressure, achieving localization of current and plasma density in magnetic field by using diaphragms 14 p2340 A66-27148  
 Shock tube study of high temperature gas flow around circular cylinders caused by electrical discharge 14 p2218 A66-27348  
 Measurement of plasma density generated by underwater explosions, noting modes of electrical discharge and shock front role 15 p2549 A66-28693  
 Energy balance of stationary discharges in quartz containers filled with gas at various pressures, determining relation of heat and light loss of discharge to gas pressure and discharge power 15 p2551 A66-29215  
 Electrical discharge in air, mercury vapor and nitrogen, using RF signal probe, determining electron density and temperature and random velocity in plasma 15 p2548 A66-29715  
 Electrical discharge probe for transient density measurements in rarefied gas flow, noting density range, flow velocity, etc 16 p2701 A66-30380  
 Linear electric shock tubes including segmented series-discharge driver, switchless shock tube, metal-walled driver for radiant energy conservation, etc 16 p2674 A66-30418  
 Magnetoplasma diffusion measurements in narrow discharge tube, using classical ambipolar diffusion model for weak magnetic fields 16 p2760 A66-30802  
 Discharge current, discharge voltage pressure and radius of discharge channel for filaments in water induced by tungsten filaments 18 p3142 A66-33841

Electrodeless annular discharges in argon and air 18 p3144 A66-34039  
 Electrical discharge machining of sintered aluminum powder with different alumina content 18 p3116 A66-34061  
 Plasma turbulent heating by direct current discharge in magnetic mirror trap, analyzing adiabatic compression 19 p3430 A66-36589  
 Mechanism of electrode erosion by supersonic flame jets during pulsed discharge 20 p3607 A66-36981  
 Gas pressure effect on excitation of 4.38-ev level in Pb during hollow cathode discharge in magnetic field 20 p3579 A66-37780  
 Frequency distribution of atmospheric emissions by multiple lightning discharges 20 p3553 A66-38075  
 Electric component of radiation field from same flashes recorded with histograms of product of field strength and distance, showing concentration around mean values 20 p3553 A66-38076  
 Plasmoid in shock tube with electrical discharge, measuring pressure, velocity and conductivity with magnetic probe 20 p3611 A66-38119  
 Electrochemical machining advantages over electrical discharge machining and traditional machining processes 21 p3743 A66-38669  
 Emission and absorption capacity of /zero-/ band of CN violet system at high temperatures, determining parameters of oscillator system power 21 p3775 A66-39079  
 Oscillographic studies of point discharge pulses in individual points in multiple point discharger 22 p3920 A66-40802  
 Radial distributions of number density, electron temperature and plasma potential measured in electrodeless discharge, using symmetric and asymmetric double probes [AIAA PAPER 66-194] 23 p4107 A66-41907  
 Pressure distribution in slug of shock wave excited in electrical discharge shock tube 24 p4242 A66-42405  
 Localization conditions of high power linear HF discharge at low gas pressure, achieving localization of current and plasma density in magnetic field by using diaphragms 24 p4244 A66-42968

# ELECTRIC ENERGY

Energy conversion into electrical power considering solar cells, thermoelectrics and thermionics noting advantages over fuel cells, dynamic machines and MHD 03 p0324 A66-13272  
 Utilization of microorganisms to generate electrical energy 05 p0627 A66-15478  
 Thermionic converter transforming calorific energy of flame into electric energy having protective coating of enamel-covered alumina 05 p0623 A66-15594  
 Particle detection with electric charges of two-thirds in cosmic radiation 07 p1131 A66-18238  
 IR applications to reliability assessment, stress analysis, testing, etc, of electrically energized components, thermally or by power dissipation 12 p1842 A66-24671  
 Output power and thermal efficiency of molten salt thermocell, examining applicability as generator for direct conversion of heat into electric energy 16 p2636 A66-30673  
 Transfer efficiency of theta pinch in converting capacitively stored electrical energy to plasma energy measured, using calorimeter technique 16 p2761 A66-31090  
 Electrical energy by direct conversion, noting fuel cell, thermoelectric generator, solar cell, etc 18 p3053 A66-33722  
 Frequency sensing for protection of frequency aircraft electric power systems, applying storms saturating reactor concept 20 p3499 A66-37175  
 Component reliability and failure rates in aerospace electric power systems with relays 20 p3525 A66-37180  
 Function, method of operation, complexity and effect on weight and cost for BITE /built-in test equipment/ as applied to electric power systems for jet aircraft 20 p3499 A66-37189  
 HF electric power transmission lines in aircraft noting effect of frequency, ground plane elevation and feeder configuration on impedance 20 p3499 A66-37190  
 Determination of electric power system

requirements for short-range missile 20 p3499 A66-37192  
 Electric energy from helical and coaxial explosive generators noting design, performance, limitations and loss mechanisms 21 p3699 A66-39510  
 Faraday unipolar induction in solid cylinder of nonideal type II superconductor, noting contributions to observed emf 23 p4114 A66-41629  
 Solar photovoltaic cell design for lower temperature operation, noting application to near-Sun missions 23 p4019 A66-41745

## ELECTRIC ENERGY STORAGE

Range, sensitivity and accuracy of meteorological radar improved by use of storage device 02 p0252 A66-11271  
 Fuel cells with molten carbonate electrolytes such as matrix cells and free and paste electrolyte cells, noting construction, operation, performance 07 p0996 A66-18473  
 Logarithmic pulse storage device, basic characteristics and choice of parameters as function of pulse length and measurable frequency range 09 p1356 A66-20773  
 Signal transmission factor and noise storage coefficient of two-stage pulsed-signal storage system 09 p1347 A66-20774  
 Logarithmic pulse storage device, basic characteristics and choice of parameters as function of pulse length and measurable frequency range 22 p3873 A66-39832  
 Signal transmission factor and noise storage coefficient of two-stage pulsed-signal storage system 22 p3873 A66-39833

## ELECTRIC EQUIPMENT

### SA Q-FACTOR

Progress in constant speed drive generating systems and control equipment for constant frequency aircraft electric systems [SAE PAPER 650827] 01 p0016 A66-10827  
 Comparison of inflector unmatched with line with matched one using additional capacitors, showing both devices have identical electric and time characteristics 01 p0046 A66-11057  
 Nonlinear properties of complete tunnel diode equivalent circuit emphasizing conductance, susceptance and oscillatory characteristics of barrier layer 03 p0346 A66-13317  
 Report on transistor industry covering manufacturing techniques, materials, geometries, advantages, disadvantages, etc 03 p0347 A66-13342  
 Precision coaxial standard and component designs based on constant impedance, coplanar compensation and mechanical tolerance sensitivity 10 p1514 A66-21907  
 Circulators from lumped circuit elements examined, calculating coil properties and analyzing construction 11 p1664 A66-22660  
 Mechanical-electrical components for printed circuits including rheostat with step-by-step mechanism, connectors, push buttons, etc 11 p1665 A66-22684  
 Long-term storage effects on reliability of electronic equipment, covering testing results and available data on failure rates 12 p1830 A66-23755  
 Aircraft electrical system design, power requirements, instrumentation, excess loads, etc 12 p1803 A66-24387  
 Instruments, measurements, industrial electronics, nuclear science, ultrasonics - IEEE International Convention, New York, March 1966 12 p1842 A66-24672  
 Nonlinear properties of complete tunnel diode equivalent circuit emphasizing conductance, susceptance and oscillatory characteristics of barrier layer 14 p2260 A66-28290  
 Range of gas dynamic stability of arc-type electric heaters, characteristics for design and calculation of electrode diameter ensuring vortex stabilization 14 p2348 A66-28314

## ELECTRIC FIELD

### SA ATMOSPHERIC ELECTRIC FIELD

### SA ELECTROMAGNETISM

### SA FIELD EMISSION

### SA SPARK GAP

Thin metal film growth under applied electric field 01 p0118 A66-10246  
 Spatial distribution of electrical field

obtained by focusing radiation of ruby laser 01 p0080 A66-10250

Langevin equation used to study interaction between radio wave and plasma, taking into account collisions between electrons and heavy ions and electric field caused by group displacement 01 p0022 A66-10322

Pinch effect in low pressure discharge theory, examining effect of magnetic field produced by discharge and electric field effect 01 p0110 A66-10334

Controlled bulk semiconductor amplification possible using n-type gallium arsenide with applied electric field greater than 3000 v/cm 01 p0036 A66-10351

Charged Styropor ball motions in free float between plates of perforated capacitor with alternating electric field 01 p0119 A66-10374

Tonks-Datner resonances of plasma column irradiated by RF electric field due to plasma acoustic wave propagation 01 p0025 A66-10536

Prebreakdown current in high vacuum noting field strength and field emission hypothesis 01 p0106 A66-10641

Book on satellite-caused ionospheric disturbances, particularly in particle density and electric and magnetic fields in vicinity of artificial body 01 p0138 A66-10975

Electric field configuration in oversized rectangular waveguide excited by pyramidal transition and terminated by movable short circuit 01 p0046 A66-11078

Elliptical waveguide for H-11 modes transmittance, expressed as power transmission along waveguide and square of electric field maximum value 02 p0196 A66-11417

RF electric field in electron beam/plasma interaction measurement, using nonperturbing probing technique 02 p0265 A66-11432

Penetration of electric field into metallic sphere located in stationary plasma as prototype of electric fields about Earth-Sun system 02 p0267 A66-11656

Electrical conductivity of narrow energy band semiconductors as function of electric field strength 02 p0274 A66-11732

Oscillations of electron-ion plasma in external electric field assuming uniformly accelerated motion of plasma components 02 p0268 A66-11784

External electric field effects on volt-ampere characteristics and breakdown in p-n, p-n-p and p-n-p-n structures 02 p0277 A66-12090

Self-acceleration of ionizing particles in electric field of polarized ionization trail 02 p0270 A66-12279

Polarization effects in magnetic and nonmagnetic barium plus bismuth oxide and magnesium-zinc ferrites when subjected to DC low-voltage electric fields 03 p0409 A66-12690

Wave function, polarization and decay of negative ion atoms in electric field 03 p0395 A66-12833

Spatial distribution of HF electric field in resonant discharge determined, using electron beam probing technique 03 p0404 A66-12985

Electric field effect on light absorption by silicon throughout region of phonon-assisted indirect transitions 03 p0412 A66-13150

High electric fields effect on propagation of 24-GHz microwaves along surface on n-type indium antimonide 04 p0562 A66-13749

Vortical electric field effect on inhomogeneities spreading in weakly ionized plasma /ionosphere/ in magnetic field 04 p0577 A66-13842

Electric field effect on long wave edge of extrinsic photoconductivity in zinc and mercury doped germanium 04 p0565 A66-14266

Internal electric field induced by ionized particles and current carriers on impurity diffusion in semiconductors, noting diffusion and Poisson equation 04 p0568 A66-14349

Electrical conductivity of polar semiconductors in electric fields, calculating lattice and Coulomb electron scattering mechanism by kinetic equation method 04 p0568 A66-14350

Transmission of hole-type germanium in strong electric fields, noting spectral

dependences of radiation modulation and hole absorption cross section 04 p0568 A66-14352

Penetration of external longitudinal electric field into semibounded plasma containing electron beam in absence of instabilities in system 04 p0556 A66-14416

Effects of variable ionic mobility on current collection by cylindrical body and of fringing electric field on sheath size, noting role of diffusion phenomenon 05 p0722 A66-14724

Self-acceleration of ionizing particles in electric field of polarized ionization trail 05 p0727 A66-15458

Pressurizing thrust bearings through use of ions and high electric fields [ASME PAPER 65-WA/LUB-1] 05 p0689 A66-15525

Estimation in equilibrium state surface potential and distributions of electric potential field and electron density in vicinity of object moving in ionized medium 05 p0685 A66-15795

Time dependent theory of tunneling for semiconductor junction with inhomogeneous electric field 06 p0922 A66-16174

Response of plasma in magnetic field to electric field oscillating with frequencies higher than collision frequency 06 p0915 A66-16179

Gas adsorption on molecular sieves, discussing separation caused by electrostatic forces and electric fields 06 p0819 A66-16730

Measurement of exciton absorption of gallium selenide at low temperatures in presence of electric field, noting line broadening and no splitting 06 p0929 A66-16942

Built-in electric field effect on simultaneous diffusion of oppositely charged impurities in semiconductors 08 p1268 A66-18659

Paramagnetic resonance occurring in plasma located in external electric field, noting relation between oscillation amplitude and electron frequency 08 p1262 A66-18976

Electron distribution over energy level in valence semiconductor in presence of electric field 08 p1269 A66-18977

Lorentz force maximization in continuous-flow Hall current plasma accelerators, using either axial electric field and radial magnetic field or radial electric field and slanted magnetic field 08 p1263 A66-19154

Charge density distribution, electric field strength and flow rate of turbulent flow of incompressible fluid in flat nonconducting channel 08 p1263 A66-19172

Turbulent condition in plasma beam with virtual cathode characterized by electric field oscillation spectrum, off-center plasma torch spinning into ion side and ion acceleration 08 p1264 A66-19270

Interaction of drift oscillations in homogeneous weakly turbulent plasma which tends to develop flute instability along magnetic field 08 p1264 A66-19274

Two-port network representations derived for general linear magnetic and electric field transducers, showing energy conversion leading to nonlinear relationships and applications to DC motor 08 p1224 A66-19298

Photoadsorption effect on semiconductor surfaces determined as function of various parameters, noting role of external electric field 08 p1276 A66-19378

MHD models used for analysis of stability of nonhomogeneous magnetized plasma with regard to perturbations whose electrical field is calculated from potential 08 p1265 A66-19469

Interband Faraday effect in semiconductors in strong crossed electric and magnetic fields 08 p1277 A66-19619

Electroreflectance effect on gallium arsenide surfaces at various ranges of photon energies 08 p1279 A66-19838

Kinetic equation for fast electrons in plasma in stationary electric field, taking into account electron interaction 09 p1407 A66-19963

Fluctuation of electric field distributions within germanium sample when one contact of sample is used to inject holes 09 p1412 A66-19994

Effect of electric field and crystalline

dimensions on position of optical absorption edge in cadmium sulfide thin films obtained by vacuum deposition 09 p1412 A66-19995

Electric conductivity, electric field and space charge of atmosphere under fair weather or thunderstorms 09 p1371 A66-20275

Three-centimeter wavelength frequency multiplier using gas-discharge plasma in nonuniform electric field, examining amplitude and phase instability 09 p1358 A66-20793

N-type germanium electric conductivity dependence on applied electric and magnetic field 09 p1430 A66-20857

Amplification coefficient for weak electric field arising on surface of large body in ionosphere in absence of magnetic effect, photoeffect and secondary emission 09 p1465 A66-21019

Magnetic and electric field and current density distributions in propagating current sheet [AIAA PAPER 66-200] 10 p1563 A66-21442

Plasma density instability induced by electron-hole generation in impact ionization as affected by electric field 10 p1575 A66-21536

Local magnetic field, ion density flow and electric field in plasma measured downstream of theta-pinch accelerator in presence of uniform guide field [AIAA PAPER 66-155] 10 p1565 A66-21684

Boltzmann equation for Gunn effect in GaAs, discussing scattering processes, unjustifiability of use of drifted Maxwell distribution, etc 10 p1583 A66-22067

Current oscillations and microwave emission in indium antimonide subjected to high applied parallel electric and magnetic fields at 77 degrees K 10 p1585 A66-22082

Spiraling electrons in geomagnetic field and superimposed electric field aligned with magnetic field lines 11 p1695 A66-22371

Electron-phonon coupling in piezoelectric semiconductors, obtaining electric field and current density vectors for application to ultrasonic amplification 11 p1750 A66-22401

Effect of electric field on LF oscillations of nonhomogeneous plasma contained by magnetic field, using geometrical optics approximation 11 p1744 A66-22449

Ionization charge stage for spectral lines determined by sending particle beam through field which separates components of different net charge 11 p1739 A66-22949

Thermally grown silicon dioxide layers examined, noting ionic and structural changes induced by applied electric fields at different temperatures 11 p1756 A66-23023

Space radiation shielding for space vehicles using electric and magnetic fields 11 p1778 A66-23166

Low temperature chromatographic separation of hydrogen isotopes based on interaction with alumina surface electric fields 11 p1650 A66-23209

Electric polarization field components appearing in plasmoid moving in toroidal magnetic field 11 p1747 A66-23305

Electric polarization of plasmoid moving in curvilinear magnetic fields with different signs of curvature of lines of force 11 p1747 A66-23306

Spatial variation of electric field in amplifying CdS measured, using electro-optic effect to study acoustic flux from thermal noise 11 p1758 A66-23356

Constant electric field effect on transverse dielectric constant of semiconductor 12 p1926 A66-23714

Pressurizing thrust bearings through use of ions and high electric fields [ASME PAPER 65-WA/LUB-1] 12 p1888 A66-24546

Polarization of particle counters, noting distortion of internal fields through pre-irradiation spatial polarization 12 p1883 A66-24788

Exact mathematical solution for elastic dielectrics in controllable states, noting Rivlin and Toupin theory, cuboid deformation into rectangular block, electric field effect, etc 12 p1933 A66-24961

Electroreflectance effect on gallium arsenide surfaces, noting reflectance response upon electric field modulation 13 p2158 A66-25051

- HF and LF alternating electric fields effect on weakly ionized argon, temperature modulation and production of harmonics 13 p2141 A66-25447
- Gunn effect in gallium arsenide, noting negative differential electron mobility at high electric fields in conduction band 13 p2165 A66-25546
- Photo emf of gallium arsenide determined as function of temperature, light intensity, external electric field and surface quality 13 p2165 A66-25679
- Plasma stability with plane boundary, noting effect of perturbed electric field, particle trajectory and equilibrium distribution 13 p2144 A66-25726
- Spatial distribution of electrical field obtained by focusing radiation of ruby laser 13 p2092 A66-25967
- Nonlinear optical polarization of gases and liquids, stressing second degree contribution in macroscopic electric field 13 p2132 A66-26147
- Electric fields in hydrogen plasma leading to forbidden free-bound transitions, considering photodetachment of electrons and radiative capture cross sections 13 p2135 A66-26265
- Electric field force dragging of fine jets from surface of conducting fluid in form of cylinder and hemispheroid on earthed plate 13 p2129 A66-26301
- Spherical drop in electric field with equilibrium maintained through balance between electric stress and variable pressure difference between inside and outside of drop, existing only if outside and inside fluids are in motion 13 p2129 A66-26302
- Propagation of linear polarized electromagnetic waves through helium plasma along magnetic field, measuring phase and intensity of components of electric field 13 p2155 A66-26673
- Steady state motion of Couette plasma flow in electric field, assuming transfer of collective motion is effected by ions and heat transfer by electrons 14 p2339 A66-26774
- First-order formula for component of electric field very near surface and parallel to axis of perfectly conducting center-driven cylindrical antenna 14 p2247 A66-26864
- Electromagnetic wave scattering and depolarization from rough surface, noting existence of surface current vector component pointing in direction of incident wave 14 p2235 A66-27038
- Spontaneous LF current oscillations in germanium with copper, with compensated energy levels under illumination, low temperatures and electric fields, noting formation of electric domains 14 p2357 A66-27076
- Conformal transformation to determine electrical field of symmetrical air-filled strip line under static conditions 14 p2264 A66-27242
- Microwave radiation from inductive posts of indium antimonide in broadband spectrum occurring when placed in DC magnetic field and pulsed to average electric field, results suggest solid state plasma instabilities 14 p2363 A66-27517
- Surface charge of semiconductor in strong electric field, considering quantization 14 p2364 A66-27644
- Internal electric field induced by ionized particles and current carriers on impurity diffusion in semiconductors, noting diffusion and Poisson equation 14 p2368 A66-28246
- Electrical conductivity of polar semiconductors in electric fields, calculating lattice and Coulomb electron scattering mechanism by kinetic equation 14 p2368 A66-28247
- Transmission of hole-type germanium in strong electric fields, noting spectral dependences of radiation modulation and hole absorption cross section 14 p2368 A66-28250
- Field effect measurements in n-and p-type CdTe at room temperature and pressure 15 p2558 A66-28612
- High amplitude LF current and optical transmission oscillations in CdS single crystals under high electric field and monochromatic illumination near fundamental absorption edge 15 p2558 A66-28613
- Hot electron redistribution in multivalley conductors in electric fields, based on variation under pressure of valley population levels, using silicon samples 15 p2559 A66-28622
- High field properties of gold doped germanium at liquid nitrogen temperature 15 p2560 A66-28633
- Electric field in hot plasma waveguide with infinite magnetostatic field due to harmonically varying slot and double-grid excitation 15 p2549 A66-28712
- Perturbations caused by cylindrical body in plasma, obtaining electric field and electron and ion concentration dependences on distance 15 p2595 A66-29086
- Satellite observations of primary cosmic rays compared with predictions of solar wind and electric field models of long-term intensity modulation 15 p2576 A66-29233
- Gallium arsenide absorption edge dependence on strong electric fields 16 p2769 A66-30166
- HF instabilities in plasma situated in superimposed magnetic and radial electric fields 16 p2758 A66-30293
- Ion beam velocity measurement, using radial electric and tangential magnetic field 16 p2701 A66-30347
- Absorption coefficient change due to electric field measured for indirect absorption edges of silicon and germanium, determining energies of phonons taking part in indirect optical absorption 16 p2775 A66-30728
- Model potential consisting of Coulomb potential and linear terms in electric field potential, obtaining eigenfunctions of model and deriving optical absorption coefficient for electric field excitons 16 p2775 A66-30729
- Lattice distortions and field gradients in alkali halide solutions, noting discrepancy in calculation of electric field gradients 16 p2775 A66-30731
- Change in reflectance of semiconductor induced by electric field at approximately photon energies of interband transitions 16 p2776 A66-30734
- Intrinsic electric field of rarefied ion-electron plasma in external magnetic field and plasma stability, noting use of Galerkin method to determine plasma layer slippage 16 p2760 A66-30790
- Pulse field effect technique investigation of electrical properties of surface states on practical Si surfaces with various surface 16 p2781 A66-31356
- Space charge formation and decay during passage of electric current through plasma moving in electric field, obtaining V-I characteristics 16 p2766 A66-31598
- Oxide film thickness effect on field effect silicon, noting concentration of surface electron states 16 p2787 A66-31735
- Electric field dependence of piezoresistance in germanium, noting correlation with intervalley scattering in energy balance 16 p2788 A66-31778
- Spatial periodic modulation of high field domain in cadmium sulfide 17 p2974 A66-31813
- Electric field effect for free carrier absorption, determining coefficient for acoustic phonon scattering 17 p2976 A66-32264
- Magnetoresistance effect in semiconductors applied to microwave power measurement, noting multiplying action between electric and magnetic field components of wave 17 p2885 A66-32288
- Computer-derived contour plots of electric and magnetic fields for acoustic electromagnet plane wave pulse incident on wedge 17 p2875 A66-32390
- Plasma wave quasi-linear theory, noting nonlinear effect treatment via distribution function, electric field, Fourier component decay, etc 17 p2966 A66-32422
- Gravitational instability of magnetoplasma in radial electric field, noting resistive drift modes, stabilization criterion effect of Coriolis force, Landau damping, etc 17 p2966 A66-32425
- Electron velocity distribution in ionized gas under alternating electric field as function of density, temperature, etc, including effects of recombination, ionization, etc 17 p2960 A66-32426
- Plasma heating rate in stochastic electric fields determined, using nonrelativistic collisionless lossless test particle 17 p2967 A66-32436
- Electric field influence on thin metal film growth inducing coalescence of three-dimensional island-like structure 17 p2979 A66-32632
- Stability of weakly ionized plasma in strong electric field against formation of longitudinal waves, examining hydrodynamic equations 17 p2970 A66-32715
- Sinusoidally varying HF electric field effect on glow discharge plasma, showing capability of confinement 17 p2971 A66-32785
- Longitudinal electric field effect on redistribution of emitting particles in combustion front of plane methane-air flame 17 p2870 A66-32828
- Ambipolar potential in magnetoactive cold plasma applied to power generation and effects of electric field on diffusion coefficient 17 p2973 A66-32984
- Interband Faraday effect in semiconductors in strong crossed electric and magnetic fields 17 p2983 A66-33133
- Surface characteristics of semiconductors with intrinsic conductivity, determining potential distribution electric field, carrier concentrations, etc 17 p2984 A66-33146
- Impurity concentration and electric field distribution determined in drift region of silicon p-n detectors from capacity as function of reverse voltage 17 p2986 A66-33303
- Current instability of plasma injected into germanium, noting effect of strong electric field in presence of temperature gradient 17 p2987 A66-33313
- Gas-phase heat-transfer augmentation by steady and alternating electric field in pipeflow 17 p3039 A66-33473
- Nonlinear generation of combination frequencies due to strong uniform parallel electric fields in homogeneous plasma 18 p3142 A66-33918
- X-ray irradiated MOS structure behavior, noting ionic charge motion in oxidized silicon that depends on electric field 18 p3155 A66-34083
- Ionization probability of bound state of atoms in variable electric field 18 p3140 A66-34690
- Cosmic ray intensity attenuation due to energy loss of particles passing through electric field in solar system 18 p3180 A66-34773
- Plasma instability in HF electric and constant magnetic field for sufficiently low pressure 18 p3151 A66-35067
- Operation of electron image time dissector framing camera achieving time resolution by multiple reflection in crossed magnetic and electric fields in electron image storage device 19 p3353 A66-35313
- Spatial distribution of acoustoelectric field in photoconductive CdS measurement under conditions of current saturation, determining carrier drift mobility 19 p3435 A66-35415
- Semiconductor cyclotron resonance during application of constant electric field, determining carrier distribution function 19 p3437 A66-35460
- Resonant birefringence in potassium vapor under influence of electric field of ruby laser emission 19 p3375 A66-36066
- Weak field effective mass approximation calculations of absorption coefficient in presence of electric field for transitions at normal threshold extended to arbitrary orientation of electric field in solid 19 p3447 A66-36397
- Plasma oscillation and stability in HF external electric field 19 p3417 A66-36531
- Production of hot plasma by Penning discharge in inhomogeneous magnetic field accelerating ions to high energy level by strong electric field 19 p3431 A66-36592
- Wave function, polarization and decay of negative ion atoms in electric field 19 p3404 A66-36775
- Electric field in MHD channels in presence of near-electrode potential drop 19 p3433 A66-36828
- Splitting of EPR lines of trivalent Cr ion in zinc tungstate by external electric field,

noting angular dependence and corresponding spin 20 p3615 A66-37370

Hamiltonians 20 p3615 A66-37370

Electric field in MHD generator channel under mixed boundary conditions solved by Wiener-Hopf technique, evaluating ohmic losses 20 p3500 A66-37491

Spherical coupler for fastening mirrors and plane-parallel plates at Brewster angle in gas laser 20 p3578 A66-37523

Stabilization criteria for drift instabilities in inhomogeneous plasma with external electric field derived from drift wave frequency variation 20 p3612 A66-38430

Electric field effect on donors diffusion into intrinsic semiconductor 21 p3799 A66-38927

Stabilization criteria for drift instabilities in inhomogeneous plasma with external electric field derived from drift wave frequency variation 21 p3777 A66-38963

Electric field distribution in plane-parallel layer of electron-ion plasma situated in external electric field normal to walls, deriving energy losses by kinetic theory 21 p3782 A66-39020

Longitudinal and transverse electric fields in electron beam due to interaction with plasma, showing that both fields are components of same wave 21 p3782 A66-39020

Electric field intensity of helium and argon arc column as affected by pressure and current intensity 21 p3783 A66-39021

Externally imposed oscillating electric field excites transverse electromagnetic waves propagating perpendicular to it in cold plasma 21 p3791 A66-39176

Plasma instability in HF electric field perpendicular to given magnetic field under low pressures 22 p3952 A66-39754

Equations for ionized positive plasma column of gas discharge between infinite dielectric planes under oblique magnetic field with component in direction of external electric field 22 p3953 A66-39756

Three-centimeter wavelength frequency multiplier using gas-discharge plasma in nonuniform electric field, examining amplitude and phase instability 22 p3874 A66-39852

VLF electric fields in magnetosphere surveyed with polar orbiting spacecraft 1964-45A may produce large amplitude plasma oscillations 22 p3903 A66-39937

Electric field domain motion in Ge samples with Au and Sb impurities, noting temperature and illumination effect on V-I characteristics 22 p3964 A66-40312

Infinite plate consisting of monopolar semiconductor of given thickness under effect of electric field results in change in galvanomagnetic, piezoresistance and optical properties 22 p3965 A66-40317

Spontaneous LF current oscillations in germanium with copper, with compensated energy levels under illumination, low temperatures and electric fields, noting formation of electric domains 22 p3966 A66-40833

Steady state behavior of free steadily traveling electrical domain in gallium arsenide 22 p3967 A66-40864

Parallel and transverse magnetic field effects on electric field induced optical absorption at photon energies below direct gap in Ge 23 p4109 A66-41036

Large-signal AC field effect experiments with A and B real surfaces of indium antimonide exposed to various chemical reactions and high electric field described by tunnel equation 23 p4111 A66-41185

Domain propagation with velocity of sound from negative to positive electrodes in GaAs single crystal rods under acoustoelectric oscillation 23 p4112 A66-41297

Electric microfields in plasma taken as system of charged particles moving in uniform neutralizing background, using approximations and Monte Carlo study 23 p4101 A66-41363

Electric field normally incident onto warm semimfinite plasma obtained by Wiener-Hopf technique and Vlasov equation 23 p4103 A66-41492

Quasi-linear approximation for turbulent plasma obtained via Wiener-Hermite functional expansion for electric field and

distribution function 23 p4104 A66-41504

Semiconductor conductivity in strong SHF electric fields, measuring dielectric constant and Fourier component 23 p4068 A66-41620

Constant voltage avalanche breakdown state of gallium arsenide diodes after switching attributed to peak in hole generation rate 23 p4047 A66-41623

Potential oscillations in neutral completely ionized plasma-neutral charged-particle beam system in HF electric field and growth rate of plasma instability 23 p4106 A66-41707

Electric field effects on collision efficiency of charged cloud droplets 23 p4065 A66-41846

Boundary layer control of conducting fluid by transverse magnetic field and spanwise electric field 23 p4107 A66-41904

Drop bursting by surface forces such as electric fields and fluid environments with larger viscosity 23 p4060 A66-42018

Spectral energy density of turbulent plasma determined from spatial autocorrelation functions of electric fields of HF oscillations 24 p4240 A66-42132

Surface pinned layer-like field inhomogeneities in cadmium sulfide, investigating visibility of field layer by corresponding shift of absorption edge, using Franz-Keldysh effect 24 p4254 A66-42427

Nonlinear dependence of current in electric field in thin semiconductor film in quantizing magnetic field 24 p4256 A66-42525

Mode coupling in ruby laser with reactance placed within cavity resonator with modulation frequency close to separation of axial modes, examining electric field envelope 24 p4223 A66-42565

**ELECTRIC FIELD STRENGTH**

Electric field intensity in disturbed quasi-neutral plasma homogeneity when problem is formulated as one-dimensional 01 p0115 A66-11107

Semiconductor devices at high injection levels, discussing electric fields and potential distribution in multilayer structures 04 p0495 A66-13769

Electron collision-ionization avalanches in cadmium sulfide crystal due to electric field intensities 04 p0570 A66-14489

One-dimensional plasma flow in crossed electric and magnetic fields covering subsonic, transonic and supersonic flow 05 p0720 A66-14508

Splitting of electron paramagnetic resonance lines of zinc-tungstate crystals, discussing parameters and experimental technique 05 p0738 A66-15356

Magnetic particle motion, analyzing effect of Earth electric dipole field 05 p0752 A66-15387

Opposed jet diffusion flames subjected to electrostatic fields, estimating volumetric heat release rate and mass flow behavior [ASME PAPER 65-WA/ENER-3] 05 p0789 A66-15628

Electric field effect on optical absorption edge, discussing exponential tail influence on magnitude of absorption coefficient 05 p0741 A66-15869

Hydrogen molecule multiphoton ionization, determining probability of absorption, effected by ruby laser emission 06 p0891 A66-16517

Longitudinal and transverse voltages in superconductors, noting Hall effect, resistivity and functional relation to applied magnetic field 06 p0940 A66-17162

Variation spectrum stability of Forbush decrease and small cosmic ray flare during intensity recovery, noting electric field effect, calculation methods, etc 07 p1129 A66-18023

Microwave emission from InSb, measuring energy generated at low temperatures and intense electric and magnetic fields 07 p1103 A66-18218

Instabilities of current and potential distribution in n-type GaAs and InP in electric field of several thousand v/cm 07 p1104 A66-18221

Antenna radiation shows relationship to tangential component of electric field intensity along antenna 08 p1197 A66-19606

Electric field meter /E-meter/ measurement of field strength at given point on spacecraft surface [AIAA PAPER 66-74] 08 p1227 A66-19726

Hydrogen molecule multiphoton ionization, determining probability of absorption, effected by ruby laser emission 09 p1387 A66-20898

Electric field intensity and plasma perturbation near charged infinite cylindrical body 09 p1465 A66-21018

Gradient instability of galvanomagnetic and galvanomagnetoacoustic waves in electrical fields 10 p1587 A66-22156

Field effect theory in semiconductors with capture centers, noting basic equation, quadrature expressions, etc 11 p1751 A66-22732

Uniform electric field meters for measurement at Earth surface and on aircraft and satellites 12 p1915 A66-24647

Plasma stability analysis, discussing low density fluid equations, variational principle and sufficiency condition at moderate densities, electric field effect, etc 15 p2554 A66-29746

Excitation and thermalization of plasma oscillations in stellarator 16 p2758 A66-30292

Opposed jet diffusion flames subjected to electrostatic fields, estimating volumetric heat release rate and mass flow behavior [ASME PAPER 65-WA/ENER-3] 16 p2825 A66-30341

Electric field distribution in gas discharge counters at moment radiation recorded, allowing for space charge effect 17 p2928 A66-33490

Gradient instability of galvanomagnetic and galvanomagnetoacoustic waves in electrical fields 19 p3440 A66-35770

Lightning flash mechanisms and electric field strengths in clouds 21 p3759 A66-38533

Field effect theory in semiconductors with capture centers, noting basic equation, quadrature expressions, etc 23 p4113 A66-41470

Graphical comparison of military RF interference specification limits based on electric field intensity at one meter antenna spacing 24 p4176 A66-43192

**ELECTRIC GROUNDING**

Destructive grounding system fault currents and abortive interference and elimination, using functional diagrams 20 p3542 A66-37241

**ELECTRIC IMPEDANCE**

Impedance behavior and frequency dependence of radiation pattern of wideband sheet antenna 01 p0036 A66-10366

Admittance of rectangular waveguide radiating into compressible plasma 01 p0038 A66-10517

Surface impedance of ferromagnetic metals at frequencies approaching ferromagnetic resonance, considering spatial dispersion of magnetic permeability 01 p0123 A66-10721

Surface impedance of nonhomogeneous plasma with sharply varying parameters, noting skin effect and permittivity gradient 02 p0192 A66-11840

Evaluation of AC small signal impedance of semiconductor surfaces in connection with physics of MOS structures 03 p0408 A66-12443

Impedance matrix of single three-pole and two-stage amplifier determined by Kron method 03 p0348 A66-12497

Tunable calibrated impedance for measurement of unknown terminations in millimeter range and based on reflection coefficient adjustments 03 p0371 A66-13242

Impedance cavity on radiation resistance of electromagnetic source 04 p0497 A66-13915

Impedance of dielectric oxide with uniformly distributed monoenergetic traps 04 p0501 A66-14253

Enhancement of radar cross section of cylinder by impedance loading, with determination of optimum impedance 05 p0631 A66-14636

Varactor evaluation using series resonance and determination of impedance locus of coaxially mounted varactors 07 p1008 A66-17513

Electromagnetic conductivity of superconducting alloys in critical regions in high magnetic fields 07 p1108 A66-18435

Dielectric loaded waveguides, defining surface, transverse and longitudinal impedances in analogy with circuit theory definition 08 p1200 A66-19121

Electron transit time and impedance

- relation in rarefied plasma diode, considering electron and ion velocity dragging 08 p1193 A66-19193
- Magnetic field dependence of microwave surface impedance of superconducting aluminum 09 p1416 A66-20024
- Integral equation method solution of scattering from cylinders with arbitrarily varying anisotropic surface impedance 10 p1497 A66-21591
- Electromagnetic scattering from conducting object controlled by loading portions of surface with impedances, distributed or lumped 10 p1499 A66-21610
- Filter with two tuned circuits and distributed coupling based on equations for complex values of tuned circuit currents, noting formulas for mutual impedance 10 p1510 A66-21673
- Impedance of finite slot 10 p1505 A66-21912
- Location of poles and zeros of small-signal RF impedance function of Read diode and how they affect oscillation and current tunability 10 p1516 A66-22100
- Coupling impedance of thin hollow electron beam injected into magnetic field and tripping at cyclotron frequency in cylindrical waveguide carrying E01 mode 11 p1661 A66-22395
- Geometrical theory of diffraction applied to calculation of radiation pattern and impedance of monopole antenna 11 p1663 A66-22545
- Minor lobe suppression in rectangular horn antenna through utilization of high impedance choke flange 11 p1663 A66-22556
- Ten-element band pass filter section and derivatives with classification of image-impedance functions 11 p1669 A66-23113
- Impedance of distributed surface states in MOS structures as function of frequency and bias, noting charge carrier exchange 11 p1757 A66-23206
- Reactance of gallium arsenide bulk oscillator in oscillating state, plotting values together with capacitance 12 p1835 A66-24140
- Explicit relation between mutual coupling and radiation pattern of array antenna evaluated via scattering formalism, based on spherical modes 12 p1841 A66-24627
- Approximate theory for lumped impedance loaded traveling wave linear antenna, considering possibility of nondissipative loading 12 p1841 A66-24631
- Circuit design for high impedance amplifier for control systems, considering input and output impedance and amplifier gain 12 p1844 A66-24731
- Terminal properties of Alfvén waveguides, deriving electrical input impedance of set of coaxial excitor electrodes 13 p2137 A66-25046
- Small-signal impedance of transferred-electron diodes, stable against domain formation 13 p2030 A66-25212
- Design and integrated circuit fabrication of negative impedance converter, using two transistors and two resistors 13 p2036 A66-25523
- Outer and inner bounds on driving-point impedance functions of LLFP networks with various resistance and reactance configurations 13 p2055 A66-26095
- Electromagnetic scattering by circular wire loops loaded with lumped impedances, obtaining solution to integral equation by Fourier series 14 p2247 A66-26863
- Fan-out filters giving flat response over broad bandwidths and minimization of variation of input impedance with frequency 14 p2249 A66-27106
- Characteristic admittances of comb-type and undulating waveguide filters, considering diaphragm thickness and TE propagation mode 14 p2250 A66-27147
- Inductive impedance of dynistor and relationship to positive and negative differential resistance of V-I characteristics 14 p2254 A66-27742
- Impedance integral evaluation for antenna loop immersed in conducting medium 14 p2256 A66-27923
- Mutual impedance between two rectilinear and parallel top-loaded elements of directional antenna when elements have nonzero current at ends 14 p2257 A66-27924
- Impedance transforming compensated balance to unbalanced line transformer /balun/, discussing bandwidths 14 p2258 A66-27959
- Input and output impedances and gain of hybrid-coil feedback amplifier 14 p2268 A66-28038
- High impedances obtained over wide frequency range with bipolar or unipolar transistors, noting current multiplication, bootstrapping, etc., and FET 14 p2262 A66-28377
- Input impedance of small loop of uniform electric current immersed in anisotropic cold magnetoplasma calculated by induced emf method 15 p2548 A66-28593
- Ferrite-air interface in waveguide with conducting thin film coated core solved by use of boundary condition or impedance condition 15 p2565 A66-29053
- Frequency transformations used in derivation of positive real and biquadratic immittance functions in three groups consisting of equivalent circuits 17 p2899 A66-32051
- Integral equations of current derived for TM and TE waves in excited inhomogeneous impedance band in half-plane 17 p2885 A66-32246
- Two-dimensional excitation problem of circular cylinder with surface impedance varying over cylinder circumference 17 p2874 A66-32247
- VLF dipole antenna impedance values, magnetoionic and collision effects in ionospheric magnetoplasma 17 p2874 A66-32386
- Electrophysiological patterns and cerebral impedance characteristics in orienting and discriminative behavior 17 p2860 A66-32832
- Admittance problem of cylindrical antenna in homogeneous anisotropic medium formulated and analyzed, using Fourier transforms and Wiener-Hopf technique 17 p2897 A66-33428
- Self and mutual admittance of coupled dipoles in dissipative medium 18 p3065 A66-33529
- End-fire radar echo of long thin body minimized by impedance loading technique 18 p3065 A66-33535
- Experiments of internal impedance of MHD generator show wide range of working conditions as slowly varying function of applied current 18 p3053 A66-34112
- Topological formulae for sensitivity coefficients of three-terminal-pair-network functions derived by dual procedure in terms of impedance 19 p3328 A66-36020
- Radiated fields for plasma external to dielectric coating surrounding biconical antenna, equivalent circuit developed for terminating impedance 19 p3305 A66-36422
- Attenuation, guide wavelength and characteristic impedance of rectangular waveguides with indium antimonide side wall derived for propagating modes 20 p3524 A66-37113
- Jet aircraft electric power system performance affected by transmission line impedances 20 p3499 A66-37191
- Domain velocity, stability and impedance in Gunn effect, presenting framework for analyzing space-charge waves in two-valley semiconductor 20 p3618 A66-37599
- Surface impedance of ferromagnetic metals at frequencies approaching ferromagnetic resonance, considering spatial dispersion of magnetic permeability 20 p3619 A66-37659
- Input admittance, gain and noise performance in dipole antennas with Esaki diodes 20 p3531 A66-37731
- Impedance cavity on radiation resistance of electromagnetic source 20 p3532 A66-37873
- High input impedance fluid amplifier noting electric and fluid analogs, fluid triode and mathematical model of fluid FET 21 p3697 A66-38595
- Negative resistance phenomena in metal oxide semiconductor /MOS/ diodes made from degenerate silicon substrate observed in course of investigating electrical characteristics 21 p3712 A66-39223
- Generalized method of calculating multielement antenna and feeder system 21 p3712 A66-39250
- High impedance electrode technique for large-scale flight physiological data collection, emphasizing skin preparation 22 p3856 A66-39790
- Scattering parameters for design of HF transistor circuits 22 p3877 A66-40334
- Antenna in interplanetary plasma, noting fluctuation noise in exosphere and radiation impedance when exposed to solar wind 22 p3877 A66-40466
- Impedance of flat strip antenna embedded in planar dielectric slab surrounded by layers of compressible isotropic electron plasma 23 p4047 A66-41639
- Discontinuity gas model for high pressure plasmas and application to DC confined arc and AC impedance 23 p4108 A66-42032
- Self-impedance of electric dipole immersed in plasma half-space with finite temperature 24 p4243 A66-42625
- Electric impedance measurements in hippocampus, amygdala and midbrain reticular formation during altering, orienting and discriminative responses in cat 24 p4166 A66-43167
- ELECTRIC IMPULSE**
- Impulses originating in dendrite region in most dorsal part of dorsal horn, noting correlation between membrane potential and cell firing rate 12 p1805 A66-23567
- ELECTRIC INSULATION**
- SA DIELECTRICS**
- Thin film epitaxial single crystal silicon on insulating substrate sapphire and advantages of these microelectronic devices 01 p0048 A66-11145
- Single crystal silicon films on sapphire in terms of materials properties and impact on thin film semiconductor microelectronics 01 p0048 A66-11146
- Electronic insulation - IEEE Conference, New York, September 1965 02 p0247 A66-11284
- Space environment factors in designing electrical insulation systems for space vehicles 02 p0247 A66-11290
- Simulated space environment effects on performance of silicone insulating materials 02 p0247 A66-11291
- Rigid polyurethane foam encapsulation of high-voltage aerospace electronic systems, noting vacuum effect 02 p0248 A66-11292
- Simulated nuclear power plant gamma radiation effects on magnetic film-insulated magnetic wire 02 p0248 A66-11293
- Strain gauge sensing element readiness for use dependent upon quality of base characterized by value of insulation resistance 02 p0231 A66-12000
- High temperature insulating adhesives for vacuum applications tested, including outgassing rate, mass spectra of evolved gases, electrical and mechanical properties 17 p2942 A66-31980
- High temperature, electrically insulating refractory tubes of boron carbonitride for protection of metal thermocouples 17 p2944 A66-33144
- Prebreakdown currents, conditioning rates and ultimate voltage capability of vacuum gaps and solid insulation, analyzing data on large-gap concentric cylinder configuration 23 p4042 A66-41041
- Environmental testing and evaluation of useful life of insulation material for aircraft electrical equipment operating at 280 degrees C 24 p4229 A66-43083
- ELECTRIC LEAD**
- Induction in cylinder by field of current-carry leads, calculating input parameters and ponderomotive force 03 p0396 A66-12285
- Microparallel gap welding approach for bonding fine leads to thin films 13 p2040 A66-25842
- ELECTRIC MEASUREMENT**
- SA MAGNETIC MEASUREMENT**
- Nonstationary processes measurement method in semiconductor devices by linear electron accelerator 01 p0035 A66-10189
- Microwave permeability and permittivity measurement, knowing resonant frequency of unperturbed cavity and distribution of electric and magnetic field 01 p0025 A66-10527
- Measuring equivalent circuit parameters of tunnel diode by method which forward-biased junction to valley voltage point 02 p0195 A66-11368
- Measuring properties of semiconductor grade materials, particularly resistivity, compensation and minority carrier lifetime 02 p0229 A66-11766

Multiplex measuring device and choice of analog or digital computers in electronic measurement 02 p0230 A66-11792

Measuring circuit and functional components in modern electronic measuring technique 02 p0230 A66-11793

AC technique for Hall effect measurement in low mobility semiconductor 03 p0371 A66-13249

Effective thickness of plasma sheath at cold electrode determined from electrode-plasma system capacitance 03 p0406 A66-13281

Basic techniques for measuring macroscopic plasma properties 04 p0521 A66-14189

Electric and electrostatic probes for plasma measurement 04 p0522 A66-14191

Measurement of diffusion length of excess minority carriers in semiconductors in region where carriers are generated 06 p0924 A66-16506

Reaction cavity method of measuring low-resistance semiconductors in which entire end wall of cylinder is replaced by sample being measured 06 p0881 A66-16642

Skin effect in semiconducting cylinder analyzed for electric and magnetic cases 07 p1001 A66-17350

Space-charge-limited currents and electron traps in CdS crystals thermally stimulated after electron injection 07 p1097 A66-17738

International coordination and standardization of HF quantity measurements, considering economic, psychologic and accuracy benefits 07 p1002 A66-18224

Miniature Rogowski coil probes for direct measurement of current density distributions in transient plasmas 07 p1037 A66-18494

Induction method for measuring electrical conductivity of steady plasma flow 08 p1262 A66-18858

High impedance semiconductor DC amplifier for use as measuring amplifier or operational amplifier 08 p1194 A66-19279

Hall effect measured by splitting alternating voltage produced in Hall circuit into two components, one with phase coinciding with Hall emf and other with phase departing by 90 degrees 08 p1273 A66-19289

Electric field meter /E-meter/ measurement of field strength at given point on spacecraft surface [AIAA PAPER 66-74] 08 p1227 A66-19726

Measurement of nonelectrical quantities with aid of transducers and representation of process by action diagrams 10 p1535 A66-21336

Contactless AC method for measuring small variations in resistance of highly conducting materials /zinc/ 10 p1536 A66-21703

Single probe method for measuring semiconductor resistivity, using alternating current, noting tests with germanium and silicon samples 11 p1705 A66-22598

Length changes and conductivity variations in electron irradiated n-and p-type germanium, noting methods of measurement, effects of isochronic annealing at liquid helium and nitrogen temperatures 12 p1926 A66-23717

Load capacitance method for measurement of quartz crystal parameters 12 p1845 A66-24855

Capacitance transducer characteristics and applications as fuel gauge, level detector, interface detector, pressure and proximity sensors, etc 13 p2078 A66-25360

Semiconductor diode and transistor application to various current and voltage measurement techniques 13 p2079 A66-25894

Probe measurement theory for determining thin semiconductor film electrical conductivity 13 p2168 A66-25945

Book on measurement of specific electronic parameters in circuit design 13 p2042 A66-26121

Accuracy of test device determining conductivity of semiconductor materials increased by using error calculation and design systematology 13 p2085 A66-26761

Dielectric constant of gold-plated rectangular parallelepiped solid at hyperfrequencies determined via resonant

frequency method 14 p2366 A66-27944

Semiconductor properties measurement using resonator with slit 15 p2560 A66-28639

Measuring modulus and phase angle of transistor current gain 15 p2464 A66-29058

Intermodulation effect on measurement of small Hall coefficients with double AC method 16 p2702 A66-30424

Direct measurement procedure for Hall emf semiconductor samples of circular shape 16 p2777 A66-30868

Bridge, transmission and microwave coaxial line measurement methods for evaluating high cut-off frequency varactor diode equivalent circuit 17 p2892 A66-32915

Bridge, transmission and microwave coaxial line measurement methods for evaluating high cut-off frequency varactor diode equivalent circuit 18 p3074 A66-33563

Electrical measurements of stannic oxide in ceramic form, noting forming and firing of samples, dielectric dispersion, grain boundary capacitances, etc 18 p3155 A66-34197

Capacitance transducer for measuring capacitance ratios with minimum environmental problems, noting wide application range 19 p3355 A66-35470

Dynamic resistance and derivative of superconducting tunnel junction measured by combined harmonic detection and bridge techniques 21 p3793 A66-39384

Departure phenomena of pointer type moving-coil instrument for electrical measurement with capability of torsional vibrations 23 p4071 A66-41952

Current measuring device for EHV transmission line, obtaining instantaneous magnetic field by gauging Faraday rotation angle of laser beam in flint glass rod 24 p4222 A66-42556

## ELECTRIC MOTOR

Western Electronic Show and Convention, San Francisco, August 1965, Part 3, Power electronics 02 p0179 A66-11276

Desireability of brushless DC motor when minimum size, weight, maintenance, explosive hazard and power consumption is required 02 p0179 A66-11277

Electrostatic hysteresis synchronous motor discussing development, operation characteristics, test results, advantages and limitations 04 p0459 A66-13681

Brushless induction hysteresis motor for extreme environments 07 p0991 A66-17849

Cavitation induced between rotating and stationary cylinder in vaporizing liquid within gap of simulated electric motor configuration 07 p1039 A66-18176

Two-port network representations derived for general linear magnetic and electric field transducers, showing energy conversion leading to nonlinear relationships and applications to DC motor 08 p1224 A66-19298

Motor controllers for DC current supply must be inverters of constant or variable frequency 08 p1168 A66-19299

Electronically switched DC motor commutated by light beam directed onto photodiodes 11 p1640 A66-23167

Brushless motors of various types described and compared in order of increasing cost and complexity for spacecraft application 11 p1640 A66-23174

High voltage DC brushless torpedo propulsion motor using sea water as power return and controlled by thyristors 12 p1804 A66-24660

Three-phase half-wave inverter circuit consisting of ring of three SCRs and converting DC into AC power supplied into zigzag motor load 12 p1804 A66-24662

Contactless machine with variable current and dual power supply operating with variable rotation rate, determining optimum limits of rotation speed variation 16 p2636 A66-30780

Electric or hydraulic drives for steerable satellite trackers and heightfinder radars 18 p3055 A66-34317

DC motor without commutator, run by rectified RF energy from antenna pickup probe inside waveguide 24 p4162 A66-42947

## ELECTRIC NETWORK

## SA RC NETWORK

## SA TRANSMISSION LINE

Automatic gain control circuits, discussing performance and comparing theoretical and

experimental results 04 p0501 A66-14409

Correcting network with nonlinear inductance for high voltage pulse generator noting operation, design and fabrication 08 p1194 A66-19283

Combinatorial problems in theory of application of graphs to networks, primarily trees of ladder 08 p1202 A66-19725

Circuit conveying continuously variable signals between points with large steady potential differences, having commercial resistors and capacitors and no RF coil 09 p1363 A66-20665

Automatic time-domain equalizer consisting of delay line with adjustable taps 10 p1503 A66-21649

Nonlinear circuit theory, discussing invariant imbedding, dynamic programming and quasi-linearization 11 p1675 A66-22629

Electric circuit equivalent to metal-oxide semiconductor structure 13 p2031 A66-25480

Book on electric network theory, functions and filters 14 p2263 A66-26960

Smoothing of stationary random noise by discrete smoothing network, analyzing conditions for discrete white noise, harmonic noise, etc 14 p2264 A66-27359

Transverse equalizer for reduction of time sidelobes /residues/ in phase-coded pulse compression systems 15 p2463 A66-29039

Parallel-filter automatic random equalizer for improved vibration testing 16 p2679 A66-30478

Results derived from dissipative four-terminal networks applied to varactor converter, leading to capacitance variations determination as function of polarizing potential 16 p2662 A66-30961

Computer analysis of interference in complex network resulting from common impedance coupling of signals 20 p3538 A66-37196

Continuous group and infinitesimal transformation in linear dynamic system application, considering linear network 20 p3539 A66-38148

Theoretical interpretation of expansions in nonzero determinants formed from vertex and circuit matrices 20 p3539 A66-38283

## ELECTRIC POTENTIAL

## SA BIOELECTRIC POTENTIAL

## SA VOLTAGE

Stationary germanium potentials in oxidizing media and light illumination 09 p1410 A66-19895

Electric potential and space charge density near Langmuir probe in hot rarefied plasma at rest, calculating current collected from plasma 16 p2759 A66-30372

Hill climbing in self-optimizing control systems, noting effect of sinusoidal perturbation, application, etc 16 p2671 A66-31059

Space nuclear reactor induction of positive potential and remedy by ambient plasma or positive-ion source 19 p3398 A66-35493

Optimization of MHD generating duct by varying cross-sectional area and electrical loading 19 p3281 A66-36372

Method for calculating distribution of electric potential above conducting media with parallel interfaces for general case of n layers and arbitrary resistivities of base 20 p3551 A66-37512

Electric potential method used to study slow crack growth in center-notched plate specimens 20 p3670 A66-37794

Potentials for cylindrical warm plasmas, noting anisotropic effects caused by external magnetic field 20 p3611 A66-38362

Photoresponse measurements of depletion capacitance and diffusion potential of GaP Schottky-Barrier diodes 20 p3534 A66-38390

Effectiveness parameters of spherical shield electrode surrounding negative dielectric junction of insulator in high vacuum 23 p4042 A66-41040

Spatial distributions of carrier concentration and internal field in cadmium selenide for various voltages, measuring conductivity and Hall coefficient 23 p4112 A66-41292

Oxygen electrolytic reduction using porous sintered silver electrode, noting effects of gas pressure, current and cathode thickness on potential as applied to fuel cells 24 p4161 A66-42333

Transmission coefficient and tunnel

current for trapezoidal potential barrier calculated as function of applied voltage 24 p4254 A66-42385

**ELECTRIC POWER CONVERSION**  
**SA MAGNETOHYDRODYNAMIC GENERATOR**  
 Electric power of thermionic converters, discussing electron space charge effects and relation to gas converters 05 p0615 A66-15534  
 Emitter of thermionic converter with cesium plasma heated by solar energy, determining electric power values 05 p0623 A66-15595  
 Electric power plant survey for space application, noting Rankine and Brayton cycles 10 p1485 A66-21464  
 Electrical output and conversion cycle efficiency of vortex type MHD induction generator, considering viscosity effects 13 p2156 A66-26708  
 Reservoirless thermionic energy converter developed for obtaining large quantity of electrical power in space [AIAA PAPER 65-472] 19 p3280 A66-35623  
 Ultrasonic welding uses electric power of electronic generator applied to piezomagnetic transducer for converting AC electric power into mechanical vibration 19 p3372 A66-36819  
 Electric power generator selection for Mars probe/lander 23 p4020 A66-41748  
 Isotope and solar thermoelectric generator, solar cell and battery electric power sources for unmanned scientific exploration of solar system 24 p4162 A66-42681

**ELECTRIC PROPERTY**  
**SA CAPACITANCE**  
**SA CONDUCTIVITY**  
**SA HYSTERESIS**  
**SA IMPEDANCE**  
**SA INDUCTANCE**  
**SA MAGNETIC PROPERTY**  
**SA RESISTANCE**  
 Electric properties of titanium carbide as function of number of vacancies in carbon sublattice 01 p0126 A66-10783  
 Electrical and electroluminescent properties of gallium arsenide diodes with high resistivity region flanked by low resistivity R and N regions 01 p0043 A66-10896  
 Temperature dependence of electric conductivity and Hall effect of single crystal cadmium tin arsenide 01 p0126 A66-11026  
 Electrical properties of copper diffused p-type indium antimonide 01 p0127 A66-11030  
 Transistorized LF amplifier design, determining transistor nonlinearity coefficients 02 p0199 A66-11755  
 Current gain and transconductance of silicon planar transistor for collector currents used in design of DC amplifiers 02 p0200 A66-11886  
 Electric properties of n-type GaAs after alloying with Cu, determining impurity concentrations 02 p0277 A66-12095  
 Electrical properties of cadmium selenide evaporated films prepared on substrates at various substrate temperatures 03 p0409 A66-12725  
 Electrical resistivity and Hall coefficient of undoped n-type gallium arsenide with carrier concentrations measured at various temperatures as function of uniaxial compression and hydrostatic pressure 03 p0412 A66-13149  
 Electric properties of germanium and silicon filamentary diodes in which base volume diode structure contains disintegrated region 03 p0346 A66-13319  
 Electrical and magnetic properties of cobalt telluride /gamma phase/ to verify semiconductor character 04 p0559 A66-13479  
 Magnetic and electrical transport properties of superconducting whiskers and platelets of NbC/NbN 04 p0559 A66-13716  
 Electrical, IR property measurements and annealing experiments on electron-irradiated oxygen doped germanium 04 p0562 A66-13747  
 Electrical effect of large meteorite moving in lower atmosphere 04 p0577 A66-13846  
 Complex output resistance and conductivity of electromagnetic cylindrical resonators transmitting across gaps, using variational method, noting role of incident and reflected waves 04 p0496 A66-13905  
 Influence of anisotropic stress effect on

output voltage and frequency of Colpitts oscillator with mesa NPN transistor 04 p0501 A66-14208  
 Transverse Dember effect in anisotropy of electrical and photoelectrical characteristics of indium selenide 04 p0565 A66-14259  
 Electrical properties of germanium-gallium arsenide heterojunctions of p-n and n-n structure 04 p0569 A66-14362  
 Structure, electrical properties and paramagnetic resonance absorption of barium titanate with admixtures of oxides of triple valent element 05 p0730 A66-14651  
 Dielectrics theory using average field approximation containing random concentration of ellipsoidal inclusion 06 p0908 A66-16027  
 Strain dependence of impurity conductivity measured in compensated p-type germanium, using uniaxial compression 06 p0922 A66-16171  
 Cloud physics - International Conference, Tokyo and Sapporo, Japan, May 1965 06 p0904 A66-16266  
 Radiation damage in nondegenerate germanium at low temperatures, using hot carrier technique for measuring resistivity and Hall coefficient on antimonide doped samples 06 p0932 A66-17114  
 Energy spectrum of current carriers in germanium telluride, investigating electrical properties of polycrystalline and single crystal samples 07 p1105 A66-18376  
 Experimental apparatus for studying temperature dependence of electrical properties of semiconductors at low temperature 08 p1221 A66-18705  
 Physical, thermal, electrical and optical properties of beryllium 08 p1238 A66-18849  
 Crystal structure and allotropic transformation of cobalt and thermal, thermodynamic, electrical and magnetic properties 08 p1240 A66-18961  
 Thin film microelectronics including passive and active circuit element, electric properties, vacuum apparatus and instruments 08 p1192 A66-18962  
 Electric properties of passive circuit thin film components in microelectronics, discussing resistors, capacitors and microcircuit interconnections on method of preparation 08 p1192 A66-18963  
 Resistance-grown pyrolytic graphite in crystallographic, thermal and electrical measurements 08 p1244 A66-19223  
 Electrical and magnetic properties of ten synthesized perovskite compounds of complex composition 08 p1273 A66-19268  
 Electric properties of single crystal p-type InSb, obtaining samples by zone melting, thermal processing, etc, noting hole concentration plotting 08 p1278 A66-19625  
 Metal oxide semiconductor /MOS/ transistors constructed on single crystal cadmium sulfide, noting transconductance, gate source, gate drain capacitance, etc 09 p1360 A66-20980  
 Lithium diffusion effects on electrical properties of tellurium doped n-type GaSb 10 p1578 A66-21582  
 Boron, Volume 2, Preparation, properties and application 10 p1579 A66-21718  
 Semiconductor properties including conductivity, resistivity, band gap, optical absorption, etc, analyzed on very pure and doped beta-rhombohedral boron 10 p1579 A66-21719  
 Vacuum deposited amorphous boron films, presenting structure, optical measurements and electrical properties 10 p1580 A66-21726  
 150 mc strip-line circulator using Airtron garnet material, noting isolation, insertion loss, input impedance, etc 10 p1514 A66-21910  
 Electric properties of titanium carbide as function of number of vacancies in carbon sublattice 11 p1750 A66-22296  
 Exponential resonators in filters and matching networks, determining reactance or susceptance frequency behavior by plotting curves with analog computer 11 p1661 A66-22382  
 Indium antimonide thin film preparation via vacuum deposition, noting evaporation rate effects on electrical properties of film 11 p1756 A66-23022  
 Double injection in long p-p-n diffused silicon junctions subjected to heat

treatment, noting donor density energy level and electrical properties 11 p1756 A66-23027  
 Finite size electrode effect on electrical parameter in MHD generators with segmented electrodes 12 p1802 A66-23576  
 Electric properties of antimony-doped stannic oxide in terms of optical mode lattice scattering 12 p1928 A66-23932  
 Equation relating voltage, current, ampere-hours consumed and temperature for silver oxide-zinc batteries, noting dual potential concept 12 p1804 A66-24667  
 Effects of recoil in semiconductor with thermal-neutron-absorption cross section, measuring changes in luminescence and conductive properties of CdS 13 p2166 A66-25792  
 Nonlinear differential equations in theory of electrical oscillation 13 p2118 A66-25826  
 Structure, electrical properties and paramagnetic resonance absorption of barium titanate with admixtures of oxides of triple valent element 13 p2167 A66-25926  
 Electrical characteristics of linear, segmented electrode, Hall and Faraday MHD generators operating in equilibrium and nonequilibrium ionization modes, obtaining data on loss mechanisms 13 p2001 A66-26256  
 Magnetic and electrical properties of intermetallic compound FeRh, discussing preparation of thin films 14 p2355 A66-26911  
 Electrical properties of germanium-gallium arsenide heterojunctions of p-n and n-n structure 14 p2369 A66-28260  
 Electric properties of germanium and silicon filamentary diodes in which base volume diode structure contains disintegrated region 14 p2260 A66-28293  
 Optical and electrical characteristics of n-type indium oxide films prepared by spraying, noting relation between carrier mobility and particular impurity used 15 p2559 A66-28623  
 Mercury selenide thin film transistors, measuring electric properties 15 p2560 A66-28634  
 Electrical properties of nickel ferrite in terms of Jonker model, noting magnitude of energy gap between Fe and Ni levels and mobilities of electrons and of positive holes 16 p2781 A66-31215  
 Busbar effect on interaction between conducting fluid flow and traveling wave magnetic field created by long line with concentrated inductance and capacitance, deriving line gain 16 p2765 A66-31374  
 Physical properties of thin films of CdS and CdSe formed by vacuum deposition analyzed as function of deposition and processing conditions 16 p2782 A66-31422  
 Electrical properties of impure silicon carbide obtained from Tashkent carborundum plant 16 p2786 A66-31672  
 Electrical properties of SiO films, noting independence of dielectric constant on film thickness and dependence of conductivity on applied field 17 p2978 A66-32411  
 Electric properties of single crystal p-type InSb, obtaining samples by zone melting, thermal processing, etc, noting hole concentration plotting 17 p2984 A66-33139  
 Scattering matrix properties of symmetrical octupoles 17 p2898 A66-33519  
 Relation between optical and electrical properties of interplanetary dust in upper atmosphere and comparison with twilight-optical and ionospheric parameters 18 p3105 A66-33961  
 Spatial charge region, excess electron concentration, capacitance and conductivity in semiconductor layer with Lorentz forces acting on carrier determined as functions of surface potential and applied electromagnetic field 19 p3442 A66-35819  
 Critical temperatures and critical magnetic fields determined for superposed normal and superconducting films, noting dependence on metal thickness 19 p3443 A66-36003  
 Effect of electric and magnetic properties of titanium oxide explained through Matsubara and Yokota theory extended to finite temperatures 19 p3444 A66-36175  
 Magnetic, electric and SHF properties of oxides and solid solutions of bivalent europium from 1.6 to 300 degrees K 20 p3617 A66-37478  
 Resistance and heat transfer coefficient

relation theoretically determined for flow of electrically conducting liquid in magnetic field 20 p3679 A66-37614

Electrical and photoelectrical properties of silicon photocells with different impurities, examining load characteristics, V-I forward and reverse branches plotted for silicon cells 20 p3502 A66-37734

Niobium alloys properties noting effect of molybdenum and titanium additions 20 p3585 A66-37749

Complex output resistance and conductivity of electromagnetic cylindrical resonators transmitting across gaps, using variational method, noting role of incident and reflected waves 20 p3532 A66-37863

Relation between electrical properties and structural features of gold- and antimony-doped germanium single crystals, noting abrupt decrease in mobility 21 p3799 A66-38928

Electrical properties of indium antimonide single crystals with noncompensated impurity concentration, determining position of deep-seated levels in forbidden band 21 p3799 A66-38929

Electrical and photoconductivity properties of high-resistivity gallium phosphide in intrinsic and near IR region, noting electron trap effect 21 p3800 A66-38992

Heat treatment of silicon at high temperatures leads to donor centers affecting electric and photoelectric properties 21 p3802 A66-39157

Temperature gradient-induced GaAs crystal inhomogeneity effects on electric properties 22 p3959 A66-39742

Spherical plasma probe behavior in AC potential with frequency near plasma frequency 22 p3954 A66-39811

Electric and magnetic properties in TaC systems and dependency on C-to-Ta ratio 22 p3934 A66-40091

Barium titanate semiconductors containing controlled amounts of neodymium prepared, showing dependence of electrical properties on preparative conditions and amount of rare earth 23 p4109 A66-41128

Resonance absorption of gamma-quanta by tin in germanium 23 p4110 A66-41133

Thermoelectric properties of solid solution of germanium telluride in copper antimony telluride 23 p4114 A66-41572

P-type conductivity and stored electron charge densities in high resistivity cadmium sulfide crystals 23 p4114 A66-41625

Electrical properties and fabrication of zinc oxide-bismuth oxide low Q capacitor with high apparent dielectric constant over wide frequency range 24 p4180 A66-42311

**ELECTRIC PROPULSION**

Electric propulsion for manned interplanetary mission evaluated in light of new optimum planetary transfer trajectories of power-limited flight 02 p0289 A66-11623

Thermionic converters used in combination with core reactor for auxiliary propulsion of spacecraft 04 p0573 A66-13548

Radiation tolerant electric propulsion system to operate on SNAPSHOT satellite, permitting orbital test of ion engine and ion propulsion with nuclear power supply /SNAP-10A/ 04 p0544 A66-13630

Electric drive operating parameters and design, using exploding wire type device and electromagnetic apparatus for plasma production and acceleration 06 p0942 A66-15917

Electric and photon propulsion systems in German-American research 06 p0942 A66-15931

Electric rocket propulsion system requirements for space propulsion, comparing capabilities with chemical and electrical rockets 08 p1280 A66-18575

Electrostatic ion propulsion and electromagnetic engine experiments in Germany for application to space travel, noting nuclear energy power source 08 p1281 A66-18614

Pulsed ablating-plastic thruster in momentum and mass consumption measurements 08 p1282 A66-19138

Electric propulsion for space travel, discussing propellant consumption economics, mass energy, specific impulse

acceleration, etc 09 p1433 A66-19864

Electric propulsion in 1965, discussing electron bombardment and contact ionization thrusters, nuclear and solar-electric power systems, etc 09 p1434 A66-20246

Electric propulsion including thrusters, power systems, solar power, hybrids, etc 09 p1434 A66-20247

Vacuum arc thruster experiments in development of electric propulsion system for spacecraft [AIAA PAPER 66-202] 10 p1592 A66-21444

Microthruster power conditioning and control system design and ion propulsion [AIAA PAPER 66-215] 10 p1485 A66-21449

Geomagnetic thruster form of Alfvén wave propulsion system, using ionospheric plasma contacts [AIAA PAPER 66-257] 10 p1594 A66-21462

Electric propulsion system effective mass dependent on trajectory, vehicle parameters and thruster characteristics [AIAA PAPER 64-676] 10 p1595 A66-21936

Electrical propulsion engine performance accurately measured by thrust balance design, using flotation and flexible propellant lines [AIAA PAPER 66-228] 11 p1761 A66-23085

Performance characteristics of two-stage pulsed coaxial plasma engine [AIAA PAPER 66-240] 12 p1935 A66-24518

Lithium, ammonia and hydrogen-fueled MPD arc jets [AIAA PAPER 66-239] 12 p1936 A66-24520

Solid propellant electric thruster /SPET/ for attitude control and drift correction of space vehicles [AIAA PAPER 66-229] 12 p1937 A66-24525

Potentials of solar power electric propulsion including photovoltaic devices, array structures and weight reduction [AIAA PAPER 66-210] 12 p1937 A66-24527

Electric propulsion for space missions with regard to vehicle weight and mission cost, using manned Mars flight as example [AIAA PAPER 64-715] 13 p2173 A66-26609

Electric propulsion for spaceflights, discussing nuclear rocket technology, mission planning, payload optimization, etc 13 p2173 A66-26610

Weight criteria for integration of nuclear-electric power supply with electric thruster system as primary spacecraft propulsion [AIAA PAPER 64-765] 13 p2173 A66-26611

Experiments with arc jet characterized by composite electromagnetic and vortex stabilization and propelled by hydrogen or nitrogen, noting heat loss through electrodes 14 p2373 A66-27097

Electron cyclotron resonance plasma thruster for spacecraft electric propulsion systems 14 p2374 A66-27520

Power conditioning and ion thruster module size and number effect in terms of reliability [AIAA PAPER 65-68] 14 p2375 A66-27883

Predicted and observed calorimetric exhaust efficiencies of capacitor powered coaxial plasma guns [AIAA PAPER 65-340] 15 p2551 A66-29275

Electron cyclotron resonance plasma accelerator design for thruster application and measuring techniques [AIAA PAPER 65-301] 15 p2572 A66-29277

Test program philosophy of electric propulsion and power for planetary mission application [AIAA PAPER 65-67] 16 p2791 A66-30901

Trajectory energy requirements for low-thrust flights throughout solar system using nuclear-electric propulsion [AIAA PAPER 66-497] 16 p2805 A66-31495

Suitability of Saturn IB/Centaur and Atlas/Centaur launched solar-electric propulsion vehicles for performing 0.1-AU solar probe mission [AIAA PAPER 66-496] 17 p2991 A66-32773

Collector target complex eliminating target life time and test equipment contamination by sputtered target material, applied in testing of electrical propulsion systems [AIAA PAPER 66-500] 17 p2991 A66-32774

Electric propulsion for transfer mission between parking orbits in cislunar space under optimum payload conditions 17 p2992 A66-33238

Low-power electric propulsion systems characteristics and design

[AIAA PAPER 66-578] 18 p3165 A66-34445

Advantages of plasma propulsion include zero energy consumption when stopped and functioning by pulses, thus facilitating telecommands 20 p3628 A66-37396

Reliability consideration effect on solar-powered electric-propulsion system design 20 p3568 A66-37908

Velocity field of conducting fluid interaction with electromagnetic fields, noting applications to electric propulsion, MGD power generation and reentry 24 p4240 A66-42281

Electrical propulsion devices for space vehicles related to plasma physics, ion-beam generation and particle dynamics 24 p4262 A66-43120

Van der Pauw method for measuring resistivity, Hall mobility and thickness of thin metallic film under vacuum, considering copper films 01 p0119 A66-10393

Series resistance of epitaxial silicon diodes as function of bias, using transmission loss method 01 p0036 A66-10396

Electric resistivity of solid phase of lutetium hydrogen system noting action of hydrogen atom 01 p0127 A66-11090

Current amplification factor decrease and input resistance increase with current decrease in transistor circuits in microregime 02 p0207 A66-11414

Electric resistivity of carbon resistor material determined as temperature function, calculating static response characteristics of carbon bolometer 02 p0228 A66-11445

Electrical resistivity, Hall effect and magnetoresistance of bismuth antimony single crystal solid solutions 02 p0272 A66-11712

Load resistance effect on selectivity of notch filters using hyperbolically shaped RC lines 02 p0200 A66-11876

Dependence in transistorized multistage amplifiers of Q on resistances in collector loops 02 p0206 A66-12270

Variations in resistivity of silicon slices before and after irradiation 03 p0339 A66-12435

Acceptor level in iron doped Ga-As moves toward valence band with increasing temperature at approximately same rate band gap decreases 03 p0410 A66-13004

Local resistivity of semiconductor by measuring RF spreading resistance of probe on sample surface without attaching electrical contacts 03 p0371 A66-13252

Electromagnetic groundwave propagation along Earth surface, noting transmission and reflection when meeting abrupt electrical discontinuity 04 p0475 A66-13430

Resistivity and Hall coefficient vs temperature in heavily doped n-type GaSb and related semiconductors 04 p0561 A66-13734

Electrical resistivity of Nb-Zr alloys of four compositions determined as functions of temperature from 4.2 to 273.2 degrees K with nearly linear dependence 04 p0562 A66-13740

RC circuit resistance effect on characteristics of selective filters consisting of semiconductor or thin film RC circuit with range multiplier and distributed parameters 04 p0496 A66-13908

Increase in collector voltage at constant power dissipation will increase junction temperature and give apparent effect of higher thermal resistance 04 p0500 A66-14102

Pseudopotential method for determining temperature-dependent electric resistance of lithium, neglecting free electron approximation and examining electron-phonon interaction 04 p0566 A66-14316

Niobium resistivity dependence on hydrogen-impurity content at various temperature ranges 05 p0699 A66-14697

Electrical resistivity and characteristic temperature of technetium based on

thermoconductivity of pure element at and above room temperature 05 p0703 A66-15470

Metal surface structure, semiconductors and dielectric films analyzed, using image orthon technique for data on work function, electron reflection coefficient and electric resistance 05 p0621 A66-15578

Hall coefficient, electric resistance and thermoelectric power in indium-rich solid solutions measured at various pressures and at 110 degrees C 06 p0922 A66-16172

Matrix elements of electron-phonon interaction and electric resistance in nickel, using electronic structure of Fermi surfaces and phonon spectrum 06 p0894 A66-16175

Resistance across opposite vertices of n-dimensional cube with each edge at one ohm resistance expressed by equivalent circuit 06 p0851 A66-16458

Reaction cavity method of measuring low-resistance semiconductors in which entire end wall of cylinder is replaced by sample being measured 06 p0881 A66-16642

Current oscillations accompanied by mobile regions in high resistance-gallium arsenide subjected to electric field, measurement of Hall effect shows these regions are of high resistance 06 p0930 A66-17066

Hall effect and resistivity measurements on high resistance n-silicon related to formation conditions at low temperature of level placed at 160 mev from conduction band 06 p0935 A66-17128

Resistive properties of vacuum-deposited chromium films determined by grain size and impurity content 07 p1098 A66-17741

Design variables for high pressure cell with supported taper pistons that can be used for optical, electrical resistance, X-ray diffraction and Mossbauer resonance studies 07 p0997 A66-18484

Quenched-in vacancy data estimated by analysis of quenched-in resistivity in zone-refined aluminum 08 p1240 A66-19062

Electric resistivity change in Pt produced by electron bombardment 08 p1275 A66-19364

Effect of voltage and film thickness on sputtered tantalum film resistivity when used as microcircuits 09 p1411 A66-19941

Change in resistance of tin films upon destruction of superconductivity by current 09 p1411 A66-19958

Book on theory and measuring techniques for electrical resistance of metals at low temperatures and cryogenics 09 p1388 A66-19976

Sample resistance of niobium oxy-nitrides as function of temperature, using four-contact DC technique 09 p1424 A66-20073

Low temperature study of resistivity and thermoelectric power variations of silver-palladium alloys as function of concentration, caused by electron diffusion 09 p1425 A66-20079

Surface potential in high and low resistivity semiconductors determined by comparing surface and contact potentials and Fermi levels 09 p1427 A66-20537

Palladium-silver and palladium-rhodium alloys electrical resistance, Hall effect and Nernst effect as affected by temperature 09 p1389 A66-20805

Low temperature resistivity of yttrium-based alloys containing small amounts of rare earth metals, deriving exchange integrals from resistivity data 09 p1430 A66-20846

Logarithmic temperature dependence of electrical resistivity found in metallic impurity conduction in n-type germanium 09 p1430 A66-20849

Seebeck and Thomson coefficients and variable resistivity effects on thermoelectric heat pump performance 09 p1333 A66-20971

Lattice constants of ultrapure phenanthrene to determine resistivity anomaly association with polymorphic transformation 10 p1576 A66-21553

Contactless AC method for measuring small variations in resistance of highly conducting materials /zinc/ 10 p1536 A66-21703

Electrical and optical experiments performed on single crystals of beta-rhombohedral boron, noting resistivity decrease and differences between thermal and optical band gap 10 p1579 A66-21720

Neutron irradiation of InSb single crystals,

noting conductivity type change in p-type and conductivity magnitude in n-type crystals 11 p1749 A66-22285

Single probe method for measuring semiconductor resistivity, using alternating current, noting tests with germanium and silicon samples 11 p1705 A66-22598

Electrical resistivity, thermoelectric power and thermal conductivity of pseudoternary alloys in temperature range of 77 to 300 degrees K measured 11 p1750 A66-22697

Current distribution and input resistance of T-type, corner and bent tape vibrators powered by lumped electromotive force, using method of integro-differential equations 11 p1666 A66-22719

Oxygen content effect on recovery of cold worked tantalum investigated by measuring Snoek damping, electric resistivity and dynamic E modulus 11 p1717 A66-22997

Current dependence of resistivity and mobility measured in silicon epitaxial layers on control wafer 11 p1756 A66-23021

Temperature dependence of electrical resistivities of dilute binary alloys, using phenomenological approach of Krishnan and Bhatia 11 p1718 A66-23367

Dependence in transistorized multistage amplifiers of Q on resistances in collector loops 12 p1831 A66-23874

AC resistivity profiles through anodic oxide films on Al and Al alloys 12 p1895 A66-24392

Transistor base resistance measured, using input method where equivalent circuit is determined through simultaneous application of three separate frequencies to bridge 12 p1845 A66-24853

Electrical resistivities of gold-erbium alloys measured at low temperatures 12 p1933 A66-24919

Electrical resistance changes in quaternary alloy during simultaneous occurrence of phase solution coalescence and silicon spheroidization, noting effects of aging and various metal additions 12 p1898 A66-25023

Quantum size effects in thin bismuth film and specific resistance, Hall effect and reluctivity 13 p2160 A66-25107

IR emission and electrical resistivity measurements of TA 2000 plasma by interference spectrometer 13 p2138 A66-25124

Electrical resistance and thermoelectric power of Ni-Cu solid solutions near Curie point 13 p2162 A66-25407

Resistivity and thermoelectric power of copper telluride at various temperatures, finding that it retains semiconducting properties in liquid state 13 p2162 A66-25411

Instability due to coupling between compressibility and resistivity in cylindrical plasma with surface currents, noting growth rate near acoustic velocity phase 13 p2142 A66-25705

Anisotropic resistance in permalloy films based on imperfection orientation model 14 p2352 A66-26895

Semiconductor properties of reduced barium titanate analyzed by electron spin resonance measurements at various temperatures 14 p2359 A66-27132

Stannic oxide ceramic formation and dielectric constant and resistivity measurements and evaluations 14 p2362 A66-27499

Effective resistivity of metal-plate conductor with single ellipsoidal Fermi surface and specularly reflecting boundaries is independent of thickness 14 p2364 A66-27706

Series resistance of silicon microwave varactors 14 p2254 A66-27731

Instabilities occurring in tunnel diode amplifiers resulting from changes in input resistance of load circuit and method for reducing them 14 p2255 A66-27749

Resistivity and Seebeck coefficient of liquid thallium-tellurium semiconductors 14 p2366 A66-27760

Conductivity of n-silicon in strong magnetic field 14 p2370 A66-28332

Plastic deformation effect on resistivity and Hall constant of silver-palladium alloys, noting decreasing rate of change for increasing strain 15 p2560 A66-28648

Cleavage behavior of solid solution alloy Ta-Mo, noting electric resistivity, tensile

properties, lattice parameters, diffraction coefficients, etc 15 p2520 A66-28650

Temperature dependence of Hall emf and electrical resistance of Sendust type Fe-Si-Al alloys 15 p2560 A66-28678

Time variation of current, temperature and resistance in premeit stage of wire explosion expressed in terms of initial wire and circuit data 15 p2537 A66-28722

Anisotropy and annealing behavior in extrinsic single-crystal tellurium studied by measuring electric resistivity and Hall coefficient 15 p2562 A66-28725

Heat treatment effect on superconducting properties of cold-worked niobium, noting results of magnetization, critical current and resistivity measurements 15 p2564 A66-28760

Electron spin resonance saturation causing sharp decrease of DC resistance for reduced rutile crystals 15 p2567 A66-29401

Resistivity increase in Cadmium Telluride, attributed to conduction band separation due to deionization into impurity levels 16 p2768 A66-30131

Nonlinear flux flow in type II superconductor, noting resistance characteristics 16 p2768 A66-30135

RF resistance in mixed state for subcritical currents 16 p2771 A66-30193

Thermoconductivity and electrical resistivity measurements with derived Lorentz functions for various compounds, using longitudinal heat flow 16 p2771 A66-30252

Quantum size effects in thin bismuth film and specific resistance, Hall effect and reluctivity 16 p2771 A66-30286

Temperature dependence of resistivity of zirconium oxide with copper oxide additions indicates suitability as heat sensitive resistor material in 300 to 1000 degree C range 16 p2777 A66-30872

Hall effect and resistivity of Zn doped GaAs 16 p2778 A66-31069

Effect of annealing on thin gold films sandwiched between two evaporated layers of zinc sulfide, presenting resistance curves 16 p2779 A66-31083

Temperature and structure effect on hydride precipitation kinetics in titanium, using resistometric technique, noting nucleation problem 16 p2724 A66-31266

Thin silicon film deposition on amorphous fused quartz substrates by cathodic sputtering in argon atmosphere, noting resistivity data 16 p2782 A66-31421

Molybdenum films prepared by sputtering onto oxidized silicon substrates, analyzing resistivity, lattice parameter, orientation and grain size as function of substrate temperature and bias 16 p2783 A66-31424

Structure and electrical resistance as function of temperature for Nichrome-silicon monoxide cermet films on single crystal Si substrates 16 p2783 A66-31425

Effect of storage in air at high temperatures on resistance, temperature coefficient of resistance of metal alloy film resistors, noting effect of silicon oxide protective overcoating 16 p2783 A66-31426

Thermal expansion and electrical resistivity measurements below 400 degrees K on niobium and two niobium alloys containing tungsten 16 p2725 A66-31454

Proper current input for true resistivity measurements of single-crystal silicon and silicon slices 16 p2785 A66-31596

Temperature dependence of magnetization and resistivity in SHF magnesium-aluminum ferrite 16 p2786 A66-31677

Change in resistance of titanium films deposited in high vacuum from argon ion bombardment, noting dependence on energy value 16 p2789 A66-31786

Temperature dependence of electrical resistance of thin nichrome films investigated by vacuum deposition on mica base 17 p2939 A66-31969

Anisotropy of electrical resistance of indium in magnetic field shown to be nearly absent, confirming absence of open Fermi surface 17 p2977 A66-32315

Doping and firing atmosphere effects on electric resistivity of polycrystalline barium titanate, noting oxidation of small grain and positive temperature coefficient effect on large grain 17 p2978 A66-32404

Thermoelectric power and electric

resistivity measurements of n-type silver telluride at melting point and in liquid state 17 p2981 A66-32955

Low temperature resistivity, magnetic susceptibility and superconductive transition point in La containing rare earth impurities 17 p2982 A66-32972

Volt-ampere characteristics, electrical resistivity, and pressure effect on Gunn phenomena in n-type GaAs in high electric fields 17 p2985 A66-33292

Resistivity of semiconductors with periodic inhomogeneity, noting cases of surface perpendicular and surface parallel striations 18 p3155 A66-34229

Optimum aging temperatures obtained from electric resistance of beryllium alloys containing chromium and zirconium 18 p3124 A66-34406

Zero bias anomalies in normal metal tunnel junctions, noting dependence of dynamic resistance of junction on voltage and temperature 18 p3156 A66-34469

Thermal conductivity and electrical resistivity measurements on nickel alloyed steels in cast and wrought conditions 18 p3124 A66-34895

One-dimensional diode model with high resistivity n region and built-in electrical field 18 p3088 A66-35038

Thermal and electric properties of InAs-GaAs alloy as function of composition, impurity additions and temperature 19 p3436 A66-35427

Two-stage field effect transistor amplifier with high input resistance and modification of circuit enabling input resistance to be adjusted to infinity 19 p3315 A66-35560

Resistance and frequency response range of sheath surrounding electrostatic probe floating in tenuous plasma 19 p3357 A66-35808

Hardening during deformation in stoichiometric nickel manganite alloy noting temperature effect, surface characteristics and electric resistance 19 p3381 A66-35930

Microwave absorption in normal conducting films of gold plated onto superconducting tin indicates resistivity and transition temperature of gold consistent with proximity effect 19 p3443 A66-35999

Low effective resistivity of gold film plated onto tin determined by low temperature microwave absorption measurement and explained by free-electron model and superconductivity proximity effect 19 p3443 A66-36000

Minimum electric resistivity of chromium in antiferromagnetic state shows no disappearance in longitudinal magnetic field 19 p3444 A66-36071

Electrical resistance and Hall effect measurements in layer structures, confirming existence of interaction with optical relaxation vibration modes 19 p3446 A66-36343

Electric resistance and thermal expansion of Ti-Nb-Cr alloys, noting phase composition 19 p3387 A66-36450

Resistive effects in type II superconductors near upper critical field examined, using Ginzburg-Landau equations 20 p3616 A66-37374

Work function of semiconducting barium titanate as function of temperature for testing Heywang theory of polycrystalline material anomalous resistance behavior 20 p3616 A66-37404

RC circuit resistance effect on characteristics of selective filters consisting of semiconductor or thin film RC circuit with range multiplier and distributed parameters 20 p3532 A66-37866

Plasma slab resistance between juxtaposed disk electrodes, obtaining exact two- and approximate three-dimensional solution 21 p3776 A66-38546

Four-probe head sensitivity increase in measurement of volume and surface resistance of semiconductor materials by increasing separation of potential probes 21 p3709 A66-38613

Kadomtsev current-convective instability and damping as affected by current density, wave frequency, resistivity gradient and azimuthal wave number 21 p3791 A66-39178

Flux flow in type II superconductors, measuring critical current, longitudinal and

transverse voltages for varied orientation of magnetic field 21 p3802 A66-39201

Dynamic resistance and derivative of superconducting tunnel junction measured by combined harmonic detection and bridge techniques 21 p3793 A66-39384

Resistivity and Hall coefficient of Sb doped Ge at He temperatures measured as function of magnetic field and temperature to determine high field effects on impurity conduction 21 p3805 A66-39579

Input resistance of short filamental antenna in warm isotropic plasma from kinetic /Vlasov equation/ rather than hydrodynamic approach 22 p3874 A66-39939

Temperature coefficient of resistance in thin metal films, using Sondermayer analysis for vapor deposited Au, Ag and Cu films 22 p3963 A66-40105

Resistivity measurement of large number of samples of bulk-grown n-type GaAs as function of temperature near 300 degrees K 22 p3877 A66-40179

Electric resistance of amorphous iron films, noting film structure dependence on evaporation parameters 23 p4110 A66-41138

Microbonding techniques such as thermocompression bonding, soldering, electrical resistance and ultrasonic welding, noting applicability in transistor manufacture 23 p4043 A66-41190

Current distribution and input resistance of T type, corner and bent tape vibrators powered by lumped electromotive force, using method of integro-differential equations 23 p4045 A66-41457

Conversion of finite discrete frequency spectrum by n-dimensional frequency converter with nonlinear active resistance with ideal characteristics 23 p4038 A66-41519

Thermoelectric power and electric resistivity of copper-gold alloy doped with 3d transition metals as function of temperature and atomic number of impurity 23 p4114 A66-41712

Variation of resistivity and inversion of sign of conductivity of quenched specimens of p-type silicon 23 p4115 A66-41838

Sputtering voltage and current effects on resistivity of films sputtered from pure tantalum appear to be traceable to pressure and growth rate 24 p4251 A66-42297

Two-transistor circuit with output resistance of approximately 50 M ohms with improved temperature stability and high internal resistance 24 p4181 A66-42378

Electron irradiation effect on resistivity of epitaxial layers of Si and on lifetime of ordinary samples 24 p4258 A66-43008

**ELECTRIC STIMULUS**

Relaxation oscillations in n-type epitaxial silicon with point contact, discussing generation via electrical excitation of impurity centers 05 p0731 A66-14655

Electromagnetic energy transport between coils or coils external to human body and coil implanted inside body is increased by using suitable ferrite core for receiving coil 06 p0820 A66-16852

Mathematical theory relating neuronal geometry to parameters of excitation in unconditioned response of planarians to electric shock 10 p1486 A66-21296

Importance of neural site and experimental conditions in determining motivational direction /positive or negative/ produced by electrical stimulation of brain in animals 11 p1644 A66-22976

Holtzman strain experiments on rats, determining if electrical stimulation of various neural sites produce motivational consequences of appetitive or defensive behavior 13 p2009 A66-25790

Relaxation oscillations in n-type epitaxial silicon with point contact, discussing generation via electrical excitation of impurity centers 13 p2167 A66-25930

Optical art, discussing mechanism of visual perception, necessity of stimulation of visual cortex, etc 15 p2443 A66-28844

Medial forebrain bundle, lateral hypothalamic area and reinforcing brain stimulation, discussing self-stimulation 17 p2859 A66-32552

Dissociation of rhinencephalic or thalamic self-stimulation and epileptiform activity in rats 20 p3506 A66-37602

Induction and suppression of hypothalamic

self-stimulation behavior by microinjection of endogenous substances at self-stimulation site 20 p3506 A66-37603

Square-wave electropulse evaluated as more effective tactile stimulus for cross modality comparison of reaction times than more traditional stimuli 23 p4030 A66-41576

**ELECTRIC TERMINAL**

Realization of directed graph having prescribed terminal connection matrix without self-loops and minimum number of arcs 20 p3539 A66-38284

**ELECTRIC WELDING****SA PLASMA ARC WELDING**

Worst case design for high reliability welded electrical connections, emphasizing encapsulation stresses and quantitative parameter 02 p0234 A66-11325

Aircraft and commercial application of three-phase direct current resistance welding, using silicon 05 p0685 A66-14518

Relationship between metallurgy of weld and characteristics of electrical pulse producing it 05 p0686 A66-14520

Argon-arc welding of 3-mm high-strength steel sheet and molten slag arcless electric welding of 100-mm high-strength steel plate 08 p1231 A66-19168

Integrated circuit welding into electronic equipment via parallel gap method, noting military applications in forward area communications 23 p4044 A66-41198

**ELECTRIC WIRING**

Nonreactive high-voltage pulse resistors, applying transmission line principles and noting Chaperon winding 03 p0341 A66-12575

Color temperature measurement in first stage of electrical explosion of copper, silver and constantan wires as function of magnitude of energy input for various heating times 20 p3599 A66-36985

**ELECTRICALLY SUSPENDED GYROSCOPE /ESG/**

Navigation gyro design with respect to cost factors noting electrically suspended, gas bearing and other types 01 p0104 A66-10676

Development of inertial navigation system based on Electrically Suspended Gyroscopes /ESG/, with comparison to conventional inertial and hybrid systems 07 p1078 A66-17807

ESG strapdown inertial navigation system based on double integration of acceleration and analysis of electronic gimbal-induced errors 13 p2124 A66-25653

**ELECTRICITY**

**SA ANTIFERROELECTRICITY**

**SA ATMOSPHERIC ELECTRICITY**

**SA BIOELECTRICITY**

**SA GEOELECTRICITY**

**SA GYROELECTRICITY**

**SA PHOTOELECTRICITY**

**SA PIEZOELECTRICITY**

**SA PYROELECTRICITY**

**SA STATIC ELECTRICITY**

**SA THERMOELECTRICITY**

Circuit theory, information theory, basic sciences, electrostatic processes - IEEE International Convention, New York, March 1966 12 p1855 A66-24645

**ELECTRO-OPTICS**

Strain-free electro-optic effect in single crystal barium titanate as function of temperature between 10 and 120 degrees C 01 p0126 A66-10969

Mechanical and electro-optical parameters for some acetylene derivatives evaluated from IR spectra 01 p0109 A66-11004

Electro-optic diffraction grating for light beam modulation and diffraction 02 p0239 A66-11371

Switching with optical signals classifying polycrystalline noncoherent and coherent types of optoelectronic devices 02 p0200 A66-11890

Curie temperature, static dielectric constant and electro-optic coefficient of large single crystals of barium titanate 03 p0411 A66-13007

Commercial aerial camera objectives estimated with TsNIIGAIK electron-optical bench 04 p0519 A66-13662

Laser Q-switch arrangement with roof prism end reflector and electro-optical retarder 04 p0531 A66-13957

Static characteristics of gas laser internal modulation circuit, using electro-optical

crystal inserted into gas laser resonator 04 p0531 A66-14059  
Optimum receiver as ideal two-dimensional cross-correlator for any desired modulation function 04 p0486 A66-14118  
Optical and electro-optical information processing technology - Symposium, Boston, November 1964 05 p0636 A66-14818  
Standing wave read-only memory based on Lippmann color photography for information storage 05 p0636 A66-14819  
Semiconductor injection laser for use in electro-optical and optical information processing 05 p0692 A66-14823  
All-optical computer techniques, noting semiconductor laser digital devices for near future 05 p0637 A66-14824  
Electro-optical signal processors for phased linear array antennas, discussing time and spatial delay multiplexing 05 p0648 A66-14832  
Electro-optical scanning system for multiaxial strain measurements 05 p0682 A66-15302  
Systems design techniques applied to laser rangefinder and imaging devices, emphasizing relation between operational requirements and laser technology 06 p0889 A66-15967  
Transmission of large number of instrumentation channels over parallel pulse-modulated light beams, using electro-optical mosaic sources and detectors 06 p0824 A66-15970  
Practical electro-optical devices which give electrical signal in response to incident light 06 p0852 A66-16558  
Electro-optical system measuring spectral response of photosensitive material or device and output under arbitrary light spectrum as in silicon solar cell 07 p0997 A66-18485  
Vertical sweep circuit for electron-optical tubeless ferrite transformer producing nanosecond high-voltage pulses 08 p1224 A66-19290  
Mechanical and electro-optical parameters for some acetylene derivatives evaluated from IR spectra 09 p1404 A66-19942  
Electro-optic system superiority over radio and inertial techniques for space navigation determined by simulation 10 p1554 A66-21893  
Projectile detection in hyperballistics range by using electro-optics and triggering of instrumented stations with luminous and nonluminous projectiles 10 p1538 A66-22042  
Quadratic electro-optical effect in paraelectric phase of barium titanate single crystals as affected by temperature 10 p1587 A66-22153  
Spatial variation of electric field in amplifying CdS measured, using electro-optic effect to study acoustic flux from thermal noise 11 p1758 A66-23356  
Light beam deflection due to linear temperature gradients across electro-optic modulator crystals 11 p1737 A66-23431  
Absolute measurement of optical rectification coefficient in ammonium dihydrogen phosphate 12 p1912 A66-23715  
Electro-optical celestial guidance system with minaturized computer and scanning sensor 12 p1909 A66-24104  
Electro-optic device with nonreciprocal properties which does not depend on Faraday magneto-optic effect 12 p1837 A66-24313  
Optoelectronic amplitude modulator using gallium arsenide diode as carrier source and lead sulfide photoconductor as modulation element 13 p2030 A66-25207  
Electro-optical automatic celestial guidance system for spacecraft and satellites 13 p2124 A66-25643  
Electro-optic effect and elastic wave propagation in single-domain ferroelectric lithium tantalate 13 p2170 A66-26589  
Digitization system based on photoelectron counting for scanning spectrometer 13 p2084 A66-26750  
Coherent transmission of optical radar from laser source and use of RF subcarriers placed on optical beams for wideband communications purposes 14 p2244 A66-28404  
Low-cost computer design using electro-optics for information processing 16 p2657 A66-31240  
Coherent optical systems in signal

processing techniques, information theory and antenna pattern simulation 16 p2657 A66-31242  
Epitaxial-planar diffusion techniques to fabricate monolithic electro-optical mosaics of 2500 phototransistor element with internal row and surface column interconnections 16 p2665 A66-31431  
Static characteristics of gas laser internal modulation circuit, using electro-optical crystal inserted into gas laser resonator 17 p2933 A66-32225  
Retardation-type laser modulators, examining driving power, transmission and dynamic range 17 p2935 A66-32820  
Temperature autostabilizing nonlinear dielectric element /TANDEL/ to obtain desirable and optimal working temperatures of ferroelectric crystal and electro-optical devices 17 p2896 A66-33298  
Optical modulation in bulk gallium arsenide, using Gunn effect 18 p3152 A66-33606  
Quadratic electro-optical effect in paraelectric phase of barium titanate single crystals as affected by temperature 19 p3440 A66-35767  
Book on laser receivers covering noise performance, atmospheric effects, detection techniques, hardware and systems available, optical communication in visible and IR spectrum, etc 19 p3375 A66-36060  
Electroluminescent photodiodes and diode light detectors applied to microcircuit design as relays, photochoppers or multichannel couplers 19 p3320 A66-36267  
Q modulation of laser theory and application, presenting giant pulse production, phenomenological theory, output response to step function change, electro-optic and mechanical modulators 20 p3576 A66-36971  
Semiconductor optoelectronic circuits for electric signal conversion into visible light 21 p3717 A66-39627  
Semiconductor electronics, Gunn effect in optical communications, electro-optics, optoelectronics and light coupling in microminiaturization 22 p3878 A66-40623  
Dynamic laser wavelength selection by insertion of dispersive tunable electro-optic Q-spoiler within laser cavity 22 p3933 A66-40866  
Absorption coefficient of light in semiconductors in crossed electric and magnetic fields, examining conditions for Franz-Keldysh effect occurring in magnetic field 24 p4256 A66-42524  
GaAs crystal as electro-optic modulator at 10.6 microns due to small carrier absorption, freedom from interband transitions and high resistivity 24 p4222 A66-42553  
Electro-optic light modulation using Pockel and Kerr effects in crystals for communications applications, using lasers 24 p4225 A66-42811  
Split angle, total internal reflection and Wollaston prism-digital light deflection techniques 24 p4174 A66-42815  
Electro-optic modulators for IR region 0.9 to 16 microns constructed by using large single crystals of high resistivity gallium arsenide 24 p4258 A66-42957

# ELECTROACOUSTIC WAVE

Piezoelectric crystals and ceramics properties that affect application in electroacoustic transducers 03 p0408 A66-12408  
Conductivity dependence of acoustoelectric effect in cadmium sulfide samples 05 p0731 A66-14653  
Microscopic theory of electroacoustic effect for n-type Ge and Si semiconductors of many energy minima, noting electron scattering 09 p1412 A66-19986  
Influence of boundaries on wave propagation in compressible warm plasma 10 p1566 A66-21730  
Scattering of incident beam of microwaves by self-excited plasma waves in mercury arc column, deriving dispersion curve for plasma waves, identifying propagating electroacoustic waves as responsible for scattering 12 p1825 A66-24964  
Conductivity dependence of acoustoelectric effect in cadmium sulfide samples 13 p2167 A66-25928  
Influence of trapping on acousto-electric

effect in piezoelectric semiconductors, noting ultrasound absorption and experimental results in cadmium sulfide 14 p2359 A66-27101  
Acoustoelectric effects for various sound waves, using rate of energy exchange between two coupled systems in relative motion 15 p2564 A66-28970  
Excitation of electroacoustic lateral waves in compressible plasma in contact with conducting boundaries 17 p2962 A66-31817  
Slow wave interaction with drifting stream of carriers, including collision and diffusion effects, noting TWT and acoustic semiconductor amplifier cases 17 p2878 A66-31820  
Electromagnetic wave interaction with uniform isotropic plasma in cylindrical interface considered for various types of excitations, using Green functions 17 p2962 A66-31821  
Acoustic amplification in piezoelectric semiconductors, examining present state of the art 17 p2892 A66-32919  
Dispersion relations for small-amplitude electroacoustic wave propagation in dense degenerate plasma, considering ion mobility and ion gas screening effects 18 p3148 A66-34727  
Electroacoustic assembly for determining time-dependent noise frequency characteristics in recognition and identification of noise source 19 p3356 A66-35564  
Light emission from semiconducting cadmium selenide crystals when not excited with photons, electron beam or tunneling, noting association with acoustoelectric field domain 20 p3620 A66-37767

# ELECTROCARDIOGRAM

Deterministic type waveform analysis techniques for noisy repetitive transient functions, noting application to hybrid computer processing of exercise ECGs 12 p1810 A66-24233  
Electrocardiogram P wave changes relation to body position changes in space 14 p2227 A66-26810

# ELECTROCARDIOGRAPHY

Electrocardiography as related to flying personnel including case histories 01 p0019 A66-10605  
Observations on heart rates and cardiodynamics during prolonged weightlessness, discussing immersion experiment on animals 04 p0465 A66-14073  
Electrocardiogram interpretation by computer, using pattern recognition approach which permits differentiation between normal and abnormal rhythms 12 p1810 A66-24231  
ECG P wave changes due to body tilt in space of rabbits deprived of afferent impulses from pressure-receptive areas 17 p2859 A66-32230  
Space cardiology, discussing methods of biological telemetry such as ECG, seismocardiography, kinetocardiograph, arterial oscillography, etc 18 p3059 A66-34364

# ELECTROCATALYST

Platinum metal as electrocatalyst for oxidation of methanol and number of saturated hydrocarbons 02 p0188 A66-11870  
Hydrocarbon fuel cell anodes containing boron carbide as support for platinum electrocatalyst 14 p2226 A66-27902

# ELECTROCHEMICAL CELL

SA NICKEL-CADMIUM BATTERY  
Fuel cell operation utilizing liquid fuels, evaluating hydrazine and alcohol fuels and electrode materials 04 p0459 A66-13546  
New cathode and electrolyte materials for high energy electrochemical batteries 05 p0612 A66-15307  
Characteristics of electrochemical cells in which concentration of ionic species in chamber can be varied via applied electrical signal as analog of junction transistor 06 p0852 A66-16637  
Lunar and terrestrial vehicle wheels, frame, steering, suspension, electrochemical energy converters, electric traction power systems and vehicular propulsion [SAE PAPER 660150] 07 p1018 A66-17867  
Electrochemical energy conversion, discussing fuel selection, oxidants, fused salt electrolytes, liquid metal, etc 07 p0995 A66-18325

Electrode potentials and efficiency, noting significance, types and associated equations 07 p0996 A66-18468

Kinetic effects in fuel cells, measuring rate of change of electrode process characteristics 07 p0996 A66-18470

Nickel-cadmium, silver-cadmium and silver-zinc alkaline batteries for secondary spacecraft power supplies [AIAA PAPER 64-455] 08 p1168 A66-18813

Batteries - International Symposium at Brighton, England in September 1964 08 p1169 A66-19641

Photomicrographic analysis of reactions during charging and discharging of nickel-cadmium alkaline cells 08 p1170 A66-19643

Oxygen reduction in sealed nickel-cadmium cells 08 p1171 A66-19646

Microporous metallic gas-diffusion electrodes in low temperature acid-electrolyte fuel cells 08 p1172 A66-19651

Cell voltages and Coulomb efficiency in oxygen electrodes and hydrogen and hydrazine fuel cells for long duration discharges 08 p1172 A66-19652

Low temperature low pressure hydrogen/oxygen alkaline fuel cell and electrode selection 08 p1172 A66-19653

Thermodynamic and kinetic effects of gas pressure on performance of fuel cell using one or two gas electrodes 08 p1172 A66-19654

Methanol-air fuel cell with alkaline electrolyte, Ni or Pt catalysts and carbon diffusion electrode, for use in signaling devices 08 p1172 A66-19655

Power and efficiency analysis of molten salt thermocell as thermoelectrochemical energy converter 09 p1333 A66-20499

System selection for hydrogen-oxygen low temperature fuel cell with aqueous KOH electrolyte [AICE PREPRINT 13B] 10 p1484 A66-21182

Double-layer capacitance of solid silver bromide determined against platinum and gold electrodes, using electrochemical cell 12 p1933 A66-25002

Two-and three-phase boundary electrodes for fuel cells 13 p1997 A66-25113

Electrochemical kinetics of fuel cells - Conference, Moscow, 1964 13 p1998 A66-25667

Oxygen regeneration from solid electrolytic reduction of carbon dioxide for space cabin atmosphere [AICE PREPRINT 47D] 17 p2867 A66-32673

Hydrolysis under space cabin atmosphere conditions using hydrogen diffusion cathode to remedy current-blocking effect of gas between electrodes [AICE PREPRINT 47F] 17 p2867 A66-32674

Stability and lifetime of electrochemical controlled resistances depend on reading electrode material, configuration and choice of electrochemical system 17 p2878 A66-33493

Reversible light-modulated electrolytic cell for use as real-time spatial filter 18 p3077 A66-33995

Improved operating characteristics of solid-electrolyte cell at room temperature by using silver sulfur iodide 18 p3055 A66-34901

Open circuit half-cell potentials of calcium in thiocyanate-liquid ammonia solutions 18 p3055 A66-34902

Equation explaining polarization of solid electrolyte cell with silver plate anode, noting role of current density 18 p3056 A66-34903

Electrochemical power generator using silver cathode and zinc anode 21 p3698 A66-39474

Nonaqueous lithium-nickel halide batteries capabilities and limitations, explaining methods of selection and evaluation of solvent, solutes and combinations for electrolytes 23 p4021 A66-41752

High energy density Zn/O battery system, noting good low oxygen pressure and low temperature performance characteristics 23 p4022 A66-41759

Primary electrochemical power systems including gas recombination devices, sterilizable battery, fuel cells, alcohol-air units, etc 23 p4023 A66-41768

Fuel cells with ceramic electrolyte operating at high temperatures, calculating voltage and efficiency 24 p4161 A66-42503

Onboard spacecraft generation system extracts necessary breathing oxygen from ambient air, using electrochemical cell that

separates oxygen from inert gases and impurities 24 p4162 A66-42956

**ELECTROCHEMICAL CORROSION**

Corrosion rate of BT-1 titanium and 9Kh18N12MT stainless steel in manganese-ammonium sulfate solutions 01 p0089 A66-10990

Effect of corrosive environments on various metals and anticorrosion techniques to protect metal surfaces 04 p0534 A66-13374

Galvanic corrosion in panel-type couples of dissimilar metals with magnesium evaluated from tensile strength loss 08 p1241 A66-19714

Corrosion resistance and electrochemical properties of alloys of niobium-titanium system 09 p1390 A66-20838

Corrosion resistance, electrochemical and mechanical properties of alloys of titanium-niobium system 09 p1390 A66-20839

Surface hydride corrosion film effect on electrolytic corrosion and oxidation of titanium 09 p1390 A66-20841

Corrosion resistance of yttrium is higher at higher pH because of slower anodic process 10 p1546 A66-21747

Corrosion of rhenium in various acids and hydroxides is electrochemical in nature and determined by kinetics of anodic and cathodic processes 10 p1546 A66-21748

Corrosion occurrence and control, noting prone areas, detection and removal 11 p1717 A66-23014

Corrosion mechanism for eutectic or near-eutectic Mg-Zn alloys in halide solution 13 p2110 A66-26026

**ELECTROCHEMICAL MACHINING**

Electrochemical metal removal using component to be machined as anode and near mirror image of finished shape as cathode in electrolysis 01 p0079 A66-10974

Electrochemical shaped-electrode method of machining complex shapes compared to conventional method by three-dimensional copying 08 p1228 A66-18624

Structure and wear resistance of chromium-molybdenum deposits, noting parameters of electrolytic deposition, Amsler machine tests, etc [ONERA TP 319] 12 p1894 A66-24366

Electrode machining, nonliquid etchants developed for shaping metals by electrochemical milling [ASTME PREPRINT MR66-711] 12 p1886 A66-24416

Electrochemical machining at speed and control useful to shaping metal parts, analyzing electrolyte composition, temperature, pressure, voltage, penetration rate, etc [ASTME PAPER MS66-156] 14 p2299 A66-26954

Electrochemical machining of complex parts and comparison with electric discharge process [ASTME PAPER MR66-157] 14 p2299 A66-26955

Tooling and manufacturing technique and requirements for controlled removal of metal by chemical and electrochemical processes [ASTME PAPER MR66-165] 14 p2300 A66-26957

Electrochemical machining, discussing relationship between total current, applied potential, electrolyte flow rate, electrolyte conductivity and electrode gap [ASME PAPER 66-PROD-5] 14 p2300 A66-26978

Electrochemical machining techniques, noting PERA die-sinking system 20 p3562 A66-37426

Electrochemical machining advantages over electrical discharge machining and traditional machining processes 21 p3743 A66-38669

Electrochemical machining of refractory metals and complex shape 21 p3744 A66-39132

Surface alterations in manufacturing, discussing effects of electrochemical grinding and electrical discharge grinding in comparison with abrasive grinding and face milling 21 p3744 A66-39194

Manufacturing techniques for turbojets, considering metals difficult to machine and components of shapes difficult to form 23 p4074 A66-41656

Chemical and electrical energies in manufacturing noting role of numerical control, hydrostatic processes, forming, electrochemical machining, etc 24 p4217 A66-42336

**ELECTROCHEMICAL OXIDATION**

Electrochemical oxidation of p-n junctions on silicon surface in potassium nitrate solution in ethylene glycol, noting electric current 03 p0413 A66-13203

Fuel cell systems, particularly hydrogen peroxide type, noting electrochemical oxidation, water production, thermal energy, electrolyte, etc 06 p0808 A66-16391

Electrolyte-soluble fuels such as methanol, ammonia and hydrazine, noting electrochemical oxidation properties, power output, stored energy content, etc 07 p0996 A66-18472

Fuel cells oxidizing saturated and unsaturated hydrocarbons at high temperatures 07 p0996 A66-18475

Anodic luminescence in electrochemical oxidation of silicon crystal 09 p1410 A66-19897

Adsorptive phenomena effect on reaction kinetics of electrochemical oxidation involving organic materials on platinum electrode 13 p2017 A66-25676

Polarization characteristics of oxidation electrochemical oxidation-reduction processes of metallic single crystals in acid chloride solution 14 p2232 A66-27311

Solid state reduction of lanthanide ions in laser hosts, effect of presence of recombination hole-centers in photoreduced samples and elimination during electrochemical process 14 p2362 A66-27464

Performance analysis of carbon-supported platinum-ruthenium alloy catalysts with respect to anodic oxidation of methanol in acid electrolyte 17 p2870 A66-31898

Oxygen reduction on titanium nitride noting rate of electrochemical oxidation in fuel cell studies 24 p4170 A66-42422

**ELECTROCHEMISTRY**

Carbon dioxide reduction systems using chemical, electrochemical and thermal energy 02 p0185 A66-11641

Semiconductor electrochemistry and principal theoretical and experimental problems in future 03 p0331 A66-13155

Electrochemical current generator principles based on oxyhydrogen fuel cell for space travel, stressing regeneration by using solar radiation in photochemistry 04 p0459 A66-13545

Electrochemical and chemiluminescent ozonesonde performance, using analysis of comparative ascents 04 p0517 A66-14451

Selective separation of nickel titanium and nickel aluminum alloys and electrochemical behavior in various electrolytes 06 p0896 A66-16542

Potential distribution at germanium-electrolyte interface in iodide ion solutions 08 p1278 A66-19824

Electrochemical and corrosion behavior of Al-based Fe, Ni, Ti, Cu and Sb alloys and intermetallic compounds 09 p1390 A66-20840

Diffusion of electrolytic hydrogen through membranes of iron crystals as function of stress, temperature and dissolved hydrogen concentration 11 p1718 A66-23071

Potential sweep method for organic and adsorption analyses, showing relation between galvanostatic and fast potential sweep transients, noting mathematical analysis of current-potential transients 12 p1812 A66-25000

Chemiluminescent technique for flow visualization using electrochemical system and water tunnel 15 p2476 A66-29688

Chemical deposition fabrication techniques to integrate isolated thermal and electrical path into thin film substrate 17 p2883 A66-32118

Water electrolysis unit designed as flight prototype to support four-man crew for one-year mission with 90-day resupply intervals [AICE PREPRINT 47B] 17 p2867 A66-32671

Continuous flow, solid state electrochemical device for simultaneous carbon dioxide removal and oxygen generation [AICE PREPRINT 47E] 17 p2867 A66-32675

Thermodynamic properties and electromotive force of germanium telluride

used in electrochemical schemes 19 p3434 A66-35360  
Carbon dioxide decomposition and oxygen reclamation by chemical reaction with electrochemically reduced lithium 19 p3292 A66-36234  
Semiconductor electrochemistry and principal theoretical and experimental problems in future 20 p3511 A66-38134  
**ELECTROCUTANEOUS COMMUNICATION**  
Reaction time to electrocutaneous stimulation confirmed as being faster to onset than to cessation of stimulation 24 p4163 A66-42318  
**ELECTRODE**  
**SA ANODE**  
**SA CATHODE**  
**SA DIFFUSION ELECTRODE**  
**SA PLASMA ELECTRODE**  
Cobalt electrode performance in high temperature fuel cells, presenting V-I characteristics 01 p0014 A66-10358  
Focusing and accelerating electrode materials for cesium contact ion engines, noting advantages of copper, beryllium and molybdenum [AIAA PAPER 64-684] 02 p0278 A66-11537  
Two ohmic electrodes or one ohmic and one barrier electrode for current-voltage stable-negative characteristic of cadmium sulfide, noting IR radiation effects 04 p0568 A66-14351  
Low work function collector with Ba-covered thin aluminum trioxide film electrodes for high efficiency thermionic converters 05 p0621 A66-15575  
High-pressure high-temperature hydrogen-oxygen fuel cells employing nonnoble metal catalyst /porous nickel/ as electrode 06 p0808 A66-16392  
Porous gas-diffusion electrodes analyzed by using four different models, comparing resulting current density-polarization characteristics 07 p0990 A66-17239  
Hydrogen-oxygen fuel cells, using ion exchange electrolytes 07 p0996 A66-18471  
Electrode types used in low temperature fuel cells, considering porous gas-diffusion, pore-free palladium membrane and slurry electrodes 08 p1168 A66-19064  
Welding properties of high strength steels, noting electrodes and carbon diffusion 08 p1231 A66-19169  
Chemical analysis, X-ray examination, surface area determination, Tafel overvoltage and porosity measurements applied to battery electrode behavior during cycling 08 p1170 A66-19642  
Electrical capacity of galvanic cell and crystal habit and surface property effects on porous cadmium hydroxide electrode electrochemical properties 08 p1171 A66-19644  
Charging current density, electrolyte concentration and temperature during charge effects on porous cadmium electrodes in nickel cadmium cells 08 p1171 A66-19645  
Deposition kinetics of solid phases on electrodes of second kind, noting conditions affecting crystal growth and lattice formation 08 p1171 A66-19648  
Low temperature low pressure hydrogen/oxygen alkaline fuel cell and electrode selection 08 p1172 A66-19653  
Zinc-silver oxide battery for extreme temperatures, noting electrode utilization efficiencies as function of current density 08 p1173 A66-19662  
Sputtering yields of aluminum, copper and titanium measured as function of cesium ion energies for use as electrodes on cesium ion engines [AIAA PAPER 66-203] 10 p1575 A66-21445  
Electron-ion emitting characteristics of various electrode materials with cesiated surfaces for cesium contact ion thrusters [AIAA PAPER 66-208] 10 p1592 A66-21447  
Space-charge theory for steady one-dimensional current flow across evaluated space between plane electrodes 10 p1557 A66-21573  
Finite size electrode effect on electrical parameter in MHD generators with segmented electrodes 12 p1802 A66-23576  
Double-layer capacitance of solid silver bromide determined against platinum and gold electrodes, using electrochemical

cell 12 p1933 A66-25002  
Two-and three-phase boundary electrodes for fuel cells 13 p1997 A66-25113  
Functional mechanism of gas diffusion electrode 13 p1998 A66-25668  
Performance of porous gas diffusion electrode 13 p1999 A66-25669  
Theory of gas porous electrode with model 13 p1999 A66-25670  
Design of gaseous diffusion electrode 13 p1999 A66-25671  
Performance of wetted porous electrodes with reactant feed by diffusion 13 p1999 A66-25672  
Operation of porous electrodes where reactant is fed in and reaction product is removed by forced stream of electrolyte, reactant and product mixture 13 p1999 A66-25673  
Capillary equilibrium in gaseous porous electrode 13 p1999 A66-25677  
Segmented electrode MHD generator performance for various electrode-insulator length ratios 13 p2000 A66-25714  
Diaphragm-shaped external electrode used to define shape of plasma column in Tokamak machines, noting ways of maintaining plasma column equilibrium 13 p2148 A66-25755  
Electrical characteristics of linear, segmented electrode, Hall and Faraday MHD generators operating in equilibrium and nonequilibrium ionization modes, obtaining data on loss mechanisms 13 p2001 A66-26256  
Cryogenic resistance spot welding of refractory metals and conventional aerospace materials [ASTME PAPER AD66-111] 14 p2299 A66-26950  
Effect of vacuum arc remelting of air-melt electrodes on structure and elevated temperature properties of nickel base gas turbine superalloy [ASME PAPER 66-GT-113] 14 p2313 A66-27007  
Properties of second-gate electrode of MOS-FET and application as voltage-controlled integrator 14 p2248 A66-27052  
Two ohmic electrodes or one ohmic and one barrier electrode for current-voltage stable-negative characteristic of cadmium sulfide, noting IR radiation effects 14 p2368 A66-28249  
Tangential electrode forces on cathode and anode electrode for arc moving in magnetic field are not negligible in plasma driving 15 p2428 A66-28687  
Electrode implantation in dogs and detection of action currents in vegetative nerves after ten months 15 p2444 A66-29499  
Interaction of plasma jets ejected from electrode spots with accelerating magnetic field as possible cause of electrode polarity effect on flat-electrode-type plasma acceleration 16 p2757 A66-30106  
Electrode geometry, optimum configuration of hot-filament vacuum ionization gauges, and ion-collector burying technique 17 p2923 A66-31981  
Formation process of rotating plasma in homopolar-type short coaxial-electrode system in hydrogen, nitrogen or argon discharge 17 p2972 A66-32973  
Atmospheric electrode effect equations solved for case with no nuclei and convection and constant ionization 17 p2922 A66-33350  
Atmospheric electrode effect where condensation nuclei are present 17 p2922 A66-33351  
Derivative chronopotentiometry approach to measurement of transition times and study of electrode process 18 p3064 A66-34457  
Advantages and disadvantages of liquid fuels and oxidizers for direct fuel cells and electrode manufacturing techniques, noting role of nitric acid, methanol and hydrazine 18 p3056 A66-35239  
Possible measurement of current flow through electrode in plasma by inserting Rogowski coil in electrode 19 p3357 A66-35807  
Low-inductance hydrogen gas discharge switch tube based on gas pressure-electrode spacing control of ionizing collisions 19 p3280 A66-35812  
Two-dimensional problem of current

distribution on surface of permeable electrodes adjacent to flow of conducting medium under Hall effect 20 p3611 A66-38110  
High impedance electrode technique for large-scale flight physiological data collection, emphasizing skin preparation 22 p3856 A66-39790  
Output characteristics of cesium thermionic converter as function of size of electrode gap, using device with movable air-cooled stainless steel anode 22 p3853 A66-40943  
Effectiveness parameters of spherical shield electrode surrounding negative dielectric junction of insulator in high vacuum 23 p4042 A66-41040  
W-diffusion bonding of lead telluride base thermoelements with nonmagnetic electrodes 24 p4216 A66-42117  
Oxygen electrolytic reduction using porous sintered silver electrode, noting effects of gas pressure, current and cathode thickness on potential as applied to fuel cells 24 p4161 A66-42333  
Hall effect influence on characteristics of MHD generator with two pairs of electrodes with symmetrical or crosswise connections 24 p4162 A66-42873  
**ELECTRODE FILM BARRIER**  
Hall constant of semiconductors noting dependence on specimen size, film and current electrode parameters 07 p1100 A66-17933  
Ion propulsion engine with replenishable liquid-film-protected tungsten electrode, discussing construction and mass loss rate vs temperature [AIAA PAPER 65-378] 20 p3629 A66-38167  
**ELECTRODEPOSITION**  
Rhenium electrodeposition on molybdenum in study of adhesion as affected by heating, chromium codeposition and cracks 01 p0088 A66-10989  
Electroless nickel plating using hypophosphite as means of producing coatings with smooth hard surface for metal mirror blanks for solar simulation 02 p0233 A66-11235  
Iron and nickel concentrations effect on composition, quality and current yield of electrodeposition of titanium from aqueous solutions 08 p1229 A66-18794  
Deposition kinetics of solid phases on electrodes of second kind, noting conditions affecting crystal growth and lattice formation 08 p1171 A66-19648  
Electrolytic deposition of copper and gold on germanium surface 09 p1338 A66-19896  
Structure and wear resistance of chromium-molybdenum deposits, noting parameters of electrolytic deposition, Amsler machine tests, etc [ONERA TP 319] 12 p1894 A66-24366  
Structural properties correlated with magnetic characteristics of annealed electrodeposited permalloy film 14 p2354 A66-26906  
Chemically deposited thin ferrite and garnet films 14 p2249 A66-27104  
Surface structure and superconductive properties of electrodeposited tin films 15 p2564 A66-28761  
**ELECTRODYNAMICS**  
**SA QUANTUM ELECTRODYNAMICS**  
Approximate solution of principal boundary value problem of electrodynamics 02 p0262 A66-12246  
Electrodynamical jump conditions and momentum-energy laws at arbitrary moving boundary derived three-dimensionally 06 p0917 A66-16435  
Electromagnetic conductivity of superconducting alloys in critical regions in high magnetic fields 07 p1108 A66-18435  
Quantitative electrodynamical experiment on Josephson oxide tunneling junction, verifying time dependence of Josephson equation 07 p1108 A66-18438  
Extension of Ward relations to gravity, in close analogy to electrodynamics, using Gupta formulation of Einstein theory 08 p1255 A66-19078  
Text on electromagnetic force principles including Maxwell equations, electrostatics, electromagnetic waves, electron theory, relativity, etc 08 p1256 A66-19465  
Measurement of magnetic field produced by rotating singly and multiply-connected

- superconductors, formulating macroscopic electrodynamics of rotating body at low angular velocities 09 p1418 A66-20041
- Analogue simulation of nonlinearly rigid systems for hard and soft elasticity by electrodynamic analogy methods 11 p1779 A66-22236
- Friction and inertia fields induced by electromagnetic effects arising in motion of hard magnetic moment in thin circular film 11 p1753 A66-22808
- Variational formulation for linearly coupled magnetothermoelasticity, examining electrodynamics of slow moving media, equations of motion and coupled thermoconductivity equation 12 p1963 A66-24028
- Relativistic electrodynamics of moving medium, discussing Maxwell-Minkowski equations, Born equations, field vector transformations, etc 12 p1915 A66-24650
- Vibration constant of electromechanical transformation in electrodynamic vibrators 13 p1997 A66-25079
- Standard inductive energy formulas lead to error if applied to vortices in rotating fields 13 p2068 A66-26684
- Electrodynamic boundary conditions at moving boundary, determining fields in interior of semiminfinite fixed channel 14 p2235 A66-27041
- Local equations of electrodynamics for magnetic penetration and stability in London-type superconductors 16 p2784 A66-31564
- Electrodynamic properties of homogeneous magnetoactive plasmas including wave propagation, excitation, scattering, etc 20 p3608 A66-37488
- ELECTROENCEPHALOGRAM /EEG/**
- Sleep restriction effects, discussing electroencephalographic measurement results 06 p0812 A66-16733
- Experiments with rats under anesthesia subjected to acceleration, noting electroencephalograms 08 p1175 A66-19085
- EEG and cortical and subcortical responses analysis of sensory stimulation in restricted dogs and normally reared littermates 11 p1644 A66-22950
- EEGs of monkeys stimulated cyclically by whole-body vibration, plotting coherence functions relating brain records to acceleration records 12 p1806 A66-24228
- Chest-to-back accelerations effect on human electroencephalograms and work capacity 15 p2437 A66-29475
- Periodometer automatic analysis of periodic diurnal variations in EEG observations of six healthy men 15 p2440 A66-29503
- Effect of head-to-foot accelerations of up to 10 g on rabbits, noting changes in ECG, EEG, brain histology, etc, leading to ischemic conditions 18 p3060 A66-34408
- Amplitude and wave shape of averaged evoked responses in awake animals including man 20 p3505 A66-37055
- Spectral analysis of human EEG generators in posterior cerebral regions 20 p3506 A66-37604
- EEG relation to average evoked potentials and human reaction time to visual stimuli for trials with and without feedback 23 p4029 A66-41550
- Neuronal spike populations and EEG activity in chronic unrestrained cats, noting multiple unit responses of acceleration/inhibition during behavioral conditioning procedures 24 p4169 A66-43098
- ELECTROENCEPHALOGRAPHY**
- Rheographic regional method for evaluation of cerebral and ocular circulation in cardiac and cerebrovascular disease 04 p0463 A66-14002
- Heart and breathing rate and electroencephalographic responses of rats during weightlessness 04 p0467 A66-14083
- Electroencephalographic variations in albino rats, discussing transverse acceleration effects before and after splenectomy 06 p0810 A66-15908
- EEG experiments on men exposed to intermittent photic stimulation under simulated IFR conditions produced drowsiness as primary response 17 p2864 A66-32165
- Correlation of adrenal steroids and alpha frequency in EEG 17 p2860 A66-32556
- Electrophysiological patterns and cerebral impedance characteristics in orienting and discriminative behavior 17 p2860 A66-32832
- Perceptual masking and enhancements of two flashes in evoked cortical potentials recorded by electroencephalography 23 p4029 A66-41549
- ELECTROEROSION**
- S SPARK EROSION MACHINING**
- ELECTROEXPLOSIVE DEVICE**
- Mathematical evaluation of RF energy effects on electroexplosive devices, taking into account limited maximum response of circuits 03 p0334 A66-12570
- Electroexplosive device testing via pulse reflection techniques 12 p1934 A66-24674
- Electroexplosive devices in aerospace vehicles in two classes, propellants and high explosives, noting methods for controlling detonation desired 20 p3625 A66-37159
- Apollo launch escape tower electroexplosive bolts produced heat transfer to surrounding structural members, obtaining sound intensity maps 23 p4119 A66-41310
- ELECTROFORMING**
- Sintering and electroforming of complex shapes of pure chromium from hexavalent chromium bath with fluoride ions as catalyst 05 p0702 A66-15135
- Electroforming of large metal mirrors for aerospace application 15 p2509 A66-28823
- Aspheric and other irregular curve generation, using ordinary machinery 15 p2509 A66-28827
- Room and cryogenic temperature mechanical properties and microstructure of electroformed nickel 20 p3582 A66-37090
- ELECTROHYDRAULIC CONTROL**
- Electrohydraulic servovalve presenting essential characteristics of redundancy by majority choice in analog servosystem 05 p0612 A66-15413
- Static characteristics of electrohydraulic amplifier for pulse-width control drive 07 p0991 A66-17390
- Theoretical behavior and frequency response of electrohydraulic valve-controlled cylindrical vibrator capable of high thrust over wide frequency range 12 p1803 A66-23798
- Electrohydraulic digital actuator design and conversion of discrete electric input signal in binary code to linear motion 14 p2227 A66-28366
- Selection of size of hydraulic servomotor with rotary hydraulic motor controlled by electrohydraulic spool valve to reduce open-loop gain for given closed-loop stiffness 22 p3852 A66-40515
- ELECTROHYDRAULIC FORMING**
- Magnetomotive forming noting strain rate effect on material deformation, applications to aerospace technology and magnetohydraulic vs electrohydraulic forming [ASME PAPER 66-MD-19] 21 p3742 A66-38480

- Electrodynamic boundary conditions at moving boundary, determining fields in interior of semiinfinite fixed channel 14 p2235 A66-27041
- Polarization vector in strong electromagnetic field, using two-band semiconductor, calculated from density matrix equation, relaxation times and recombination time 14 p2360 A66-27189
- Method of constructing particle distribution function for quasi-neutral plasma consisting of electrons and singly charged heavy ions 14 p2344 A66-27648
- Quasi-linear perturbation theory of transverse electromagnetic waves from instabilities in nonthermal magnetoactive plasma, using Boltzmann equation, applied to magnetospheric MHD 14 p2286 A66-27982
- Microvariations of Earth electromagnetic field with results recorded on tape in digital pulse code form 14 p2287 A66-28082
- Light transmission through optical diffraction lattice consisting of medium in EM field of laser beam 15 p2511 A66-28626
- Calculation of electromagnetic field within two-dimensional plasma sheath with static magnetic field, noting effect of electron-cyclotron frequency on refractive index of medium 15 p2549 A66-28707
- Huygen principle for electromagnetic field moving, isotropic, homogeneous and near medium, using Maxwell-Minkowski equations and Green function for field equation 15 p2537 A66-28783
- Two-dimensional isothermal liquid flow electrically conducting in channel under electromagnetic fields, finding self-modeling solutions, using Jacobi functions 15 p2551 A66-29221
- Covariant treatment of solutions of Einstein field equations representing pure gravitational radiation propagating in fluid and electromagnetic 15 p2542 A66-29621
- Media Interband optical absorption in germanium a crossed electric and magnetic fields, noting band perturbation theory, differential spectra, Stark broadening, experimental techniques, etc 16 p2776 A66-30736
- Rocket attitude determined by simultaneous measurement of geomagnetic field and electromagnetic field generated by radio wave transmitted by rocket-mounted dipole 16 p2810 A66-30958
- Coherence conditions effects on electromagnetic field density operators and photon density distribution in single excited mode 17 p2957 A66-31975
- Electric and magnetic fields effect on three-dimensional laminar boundary layer of conducting fluid near line of intersection of two surfaces 17 p2971 A66-32865
- Steady-state axially-symmetric channel flow of ionized gas in external electromagnetic field in one-dimensional approximation 17 p2971 A66-32867
- Electromagnetic field equations for plane near induction pump with secondary boundary effects 17 p2972 A66-32872
- Conducting fluid flow velocity measuring technique using properties of pulsed electromagnetic field 17 p2926 A66-32873
- Computer code study of magnetospheric trapped-particle drift under influence of magnetic field gradient, magnetic line curvature, electric rotational field and electric field across tail of magnetosphere 18 p3168 A66-34350
- Gravitational shielding and absorption, examining tidal effects induced in solid sphere by another sphere, analogy to electromagnetic fields, 18 p3135 A66-34450
- Electromagnetic cavity resonances in rotating systems investigated through covariant space-time formulation of classical electromagnetic field 18 p3119 A66-34451
- theory Green function applied to obtain alternative representations of source excite vector and scalar electromagnetic fields 18 p3071 A66-34564
- Energy characteristics of 11-year cosmic ray variations, evaluating electromagnetic conditions in interplanetary space for proton, alpha particle and electron variations in energy regions 18 p3176 A66-34752
- Hamilton principle applied to force equation for nonrelativistic and relativistic flow of compressible inviscid fluid with polarization and magnetization in connection with electromagnetic momentum 18 p3102 A66-34923
- Integration of equations, approximating Maxwell equations, in curvilinear coordinates separating scalar Laplace equation, with vectors representing electric and magnetic fields 18 p3136 A66-34971
- LF electromagnetic field behavior in cold magnetoactive plasma near resonance layer, noting condition for energy absorption increase 18 p3151 A66-35064
- Oscillations of inhomogeneous weakly ionized plasma situated in external electric and magnetic field, noting causes and conditions of plasma instability 18 p3151 A66-35066
- Derivation of two equations for electromagnetic field and population inversion in solid state laser 19 p3372 A66-35370
- Electron-phonon interaction current density, thermodynamic Green function and other electromagnetic properties of superconductors, using Froehlich-Hamilton model 19 p3438 A66-35481
- Frequency and spatially variable electric and magnetic polarizations induced in nonlinear media by electromagnetic fields 19 p3399 A66-35594
- Spatial charge region, excess electron concentration, capacitance and conductivity in semiconductor layer with Lorentz forces acting on carrier determined as functions of surface potential and applied electromagnetic field 19 p3442 A66-35819
- Thermometer for continuous temperature measurement of dielectrics and semiconductors in electromagnetic HF fields 19 p3358 A66-35836
- LF plasma oscillations in constant external static electrical and magnetic fields 19 p3407 A66-36089
- Spatial density distribution of cold plasma probed by electromagnetic field 19 p3407 A66-36089
- Common representation of electromagnetic field tensor and stress 19 p3474 A66-36319
- Governing equations for electromagnetic phenomena in lossy magnetoionic media in terms of compressivity tensor, deriving wave equations which are decoupled, giving resulting uncoupled differential equations 19 p3305 A66-36412
- Electromagnetic field analysis, determining dispersion relationship of array of identical fibers, assuming surface wave modes of each fiber are excited 19 p3305 A66-36418
- Ionospheric thermal radiation, discussing noise power per unit volume, spectral distribution, frequency, etc 19 p3352 A66-36631
- Electromagnetic field effect on heat transfer during laminar flow of electrically conducting incompressible fluid in flat channel 20 p3607 A66-36980
- Electromagnetic field penetration into magnetoactive plasma with calculation of total surface impedance of plasma 20 p3512 A66-37135
- Approximate solution for dipole radiator field in space containing two conducting long cylinders with parallel axes 20 p3512 A66-37146
- Gravitational waves in presence of electromagnetic field, deriving Einstein-Maxwell equations 20 p3550 A66-37308
- Resistive effects in type II superconductors near upper critical field examined, using Ginzburg-Landau equations 20 p3616 A66-37374
- Optical phonon production, showing existence of electric field strength range at low temperature scattering in which phonon emission results in electron stoppage 20 p3577 A66-37376
- Power transmission, gain, directivity pattern and reception between large aperture antennas in near-field region 20 p3529 A66-37709
- Electromagnetic and gas dynamic effects on magnetic compression of plasma loop 20 p3611 A66-38120
- Instability of noncollision plasma in strong external field in terms of development of nonpotential oscillations 20 p3611 A66-38133
- Antenna field calculations in Fresnel and induction regions 22 p3873 A66-39831
- Electromagnetic field of concentric rotating mass shells, noting Machian effects on cosmological models with near-Schwarzschild radius 22 p3948 A66-40525
- Adiabatic motion of auroral particles in model of electric and magnetic fields surrounding Earth, commenting on importance of higher order terms in asymptotic expansion 22 p3914 A66-40561
- Steady pearl type oscillations in terrestrial electromagnetic field, noting role of diurnal and seasonal variations 22 p3915 A66-40784
- Functioning of progressive wave plasma accelerators, discussing role of electromagnetic forces 23 p4100 A66-41177
- Energy gap and critical field rules for superconductors, discussing empirical and experimental values 23 p4113 A66-41375
- Velocity field of conducting fluid interaction with electromagnetic fields, noting applications to electric propulsion, MGD power generation and reentry 24 p4240 A66-42281
- Drift approximation of motion equations for relativistic charged particle in electromagnetic field, adiabatic trap, HF magnetic field, etc 24 p4241 A66-42332
- Book on instrumentation for high speed plasma flow including magnetic field balance, transducers, flow angle indicator, MHD profile meter, etc 24 p4211 A66-42487
- Plasma stabilization by HF electromagnetic fields, noting mode spectrum spacing along sample axis and dependence on field strength 24 p4242 A66-42517
- Maxwell field equations and constitutive equations, discussing best pedagogical formulation for electrodynamics 24 p4189 A66-42633
- Polarization vector in strong electromagnetic field, using two-band semiconductor, calculated from density matrix equation, relaxation times and recombination time 24 p4259 A66-43087
- ELECTROMAGNETIC INSTRUMENT**
- High temperature electromagnetic transducers applied as sensors for physical variables, including mechanical displacement and liquid metal flow and level 05 p0676 A66-14775
- Au continuous electromagnetic drive consisting of plasma generator and radial electric and axial magnetic fields acting as plasma accelerator 06 p0942 A66-16796
- Electromagnetic isotope separators used in nuclear physics for analysis of ion-matter interaction 08 p1257 A66-18694
- Design and operation of electromagnetic LF vibration counter, also used as tachometer when connecting electric timer into counter circuit 09 p1380 A66-20308
- Electronic components for microwave power engineering, employing electromagnetic amplifying lens, microwave rectifiers, etc 13 p2039 A66-25784
- Electromagnetic shutter for electroretinography has opening and closing times of 0.50 and 0.70 msec and range of varying controlled durations 13 p2083 A66-26552
- Problems when using RF diagnostic systems in flight test evaluation of ICBM systems, specifically when using EM systems during reentry [AIAA PAPER 66-406] 18 p3239 A66-33634
- Electromagnetic induction electrodeless plasma accelerator for thrust generation applicable to space vehicle propulsion [AIAA PAPER 66-567] 18 p3164 A66-34429
- ELECTROMAGNETIC INTERACTION**
- SA PLASMA-ELECTROMAGNETIC INTERACTION**
- Nonlinear interaction of two electromagnetic waves in infinite cold magnetoactive plasma 02 p0192 A66-11839
- Electromagnetic excitation of spherical radially laminar medium with interfaces solved rigorously by derived algorithm 03 p0331 A66-12286
- Phase angles of reflection and transmission coefficients for microwave energy of

rectangular waveguide whose electromagnetic field interacts with ferrite spheroid 04 p0496 A66-13909

Gravitational field interactions with Dirac fields and electromagnetic fields studied in framework of special relativity to find possible C-, P-and T-violating effects 05 p0717 A66-15349

Microwave induced generation of DC voltage across thin n-type germanium rod in waveguide 06 p0925 A66-16678

Nonlinear interaction between ordinary and extraordinary wave modes for collisionless cold magnetoplasma 07 p1090 A66-18203

Electromagnetic interaction between moving conducting ring and magnetic field inducing voltage in search coil 07 p1091 A66-18416

Electron temperature variation in argon MGD channel in crossed magnetic and electrical fields 08 p1263 A66-19174

Interaction of drift oscillations in homogeneous weakly turbulent plasma which tends to develop flute instability along magnetic field 08 p1264 A66-19274

Probability of high-energy cosmic ray muon undergoing electromagnetic interaction in lead with energy transfer at various ranges 08 p1286 A66-19836

Ionospheric electrodynamics, discussing conductivity, wind and dynamo theory, drift effect on ionospheric formation and wind-electromagnetic field interaction 10 p1533 A66-21852

Electromagnetic phenomena inside weak MHD shock wavefront 10 p1569 A66-21916

Thin nonrectilinear electron beam interaction with electromagnetic field of waveguide transmission line 11 p1655 A66-22723

Solar wind as radial flux of electromagnetic inhomogeneities, galactic ray modulation by solar wind and cosmic ray intensity variation with sunspot cycle 12 p1940 A66-24162

Cosmic ray variations and solar corpuscular stream in interplanetary space during March 1958 magnetic storm 12 p1940 A66-24164

Variations in cosmic ray neutron component intensity and solar corpuscular flux with H-component of geomagnetic field during magnetic storm 12 p1941 A66-24166

Kinetic theory of passage of s-and p-polarized electromagnetic waves through thin inhomogeneous plasma layer 12 p1816 A66-24225

Compensation and decompensation in ferromagnetic alloys viewed as electric interaction of spins 12 p1930 A66-24684

Nonstationary two-dimensional channel flow of compressible electrically conducting fluid subject to traveling magnetic field 13 p2140 A66-25422

Nonlinear interaction of electromagnetic waves in plasma, noting propagation of total and diffused wave 13 p2141 A66-25458

Models of matter-electromagnetic field interaction for gas lasers, using perturbation theory 13 p2103 A66-26216

Interaction of boundary layer produced by vortex flow of viscous electrically conducting fluid over disk with axial magnetic field and relation to MHD generator and hydromagnetic capacitor 13 p2156 A66-26707

Electromagnetic field interaction with accelerated material medium, considering ponderomotive forces and finiteness of deformations 14 p2335 A66-28048

Equilibrium binary correlations in classical relativistic homogeneous electron gas 14 p2336 A66-28275

Ferromagnetic microwave resonance isolators for use in waveguides 15 p2459 A66-28936

Electromagnetic form factors of electron and muon neutrinos evaluated, using intermediate vector-boson theory, noting renormalization induced by electromagnetic interactions 15 p2544 A66-28944

Electromagnetic cascades in Sydney 20-liter stack of nuclear emulsion 15 p2583 A66-29544

Nuclear radii for electromagnetic interactions of primary cosmic ray particles in nuclear emulsions 15 p2545 A66-29546

Busbar effect on interaction between conducting fluid flow and traveling wave magnetic field created by long line with

concentrated inductance and capacitance, deriving line gain 16 p2765 A66-31374

One-dimensional MHD equation solution, using calculus of variations 16 p2765 A66-31513

Slow wave interaction with drifting stream of carriers, including collision and diffusion effects, noting TWT and acoustic semiconductor amplifier cases 17 p2878 A66-31820

Energy pulse tensor formulation of law of conservation of energy in interacting electromagnetic field, using complete inhomogeneous Lorentz group 18 p3135 A66-34579

Electromagnetic interactions and collisions of particles in cores of EAS studied, using GM counters, plastic scintillators and Wilson cloud chambers 18 p3207 A66-35107

Bursts produced by high energy muons undergoing large energy transfers analyzed for information on muon electromagnetic interactions over region where muon spectrum is known 18 p3220 A66-35195

Electromagnetic interactions of muons analyzed underground using scintillator stack, deducing energy of cascade shower from size 18 p3221 A66-35199

Classification of underground electromagnetic shower events due to muon interactions in scintillator stack 18 p3221 A66-35200

Energy losses of relativistic muons in electromagnetic interactions, noting influence of atomic electrons on bremsstrahlung 18 p3222 A66-35208

Conducting nonmagnetic circular cylinder supported on magnetic field produced by alternating current 19 p3324 A66-35729

Approximation method using sum rules for energy shift in atomic system due to interaction of electrons with vacuum electromagnetic field applied to hydrogen, helium and lithium atom ground states and hydrogen molecule 19 p3402 A66-35995

Hydrodynamic stability of inhomogeneous plasma flows relative to potential electromagnetic oscillations 19 p3408 A66-36272

Phase angles of reflection and transmission coefficients for microwave energy of rectangular waveguide whose electromagnetic field interacts with ferrite spheroid 20 p3532 A66-37867

Thin dielectric film wave scattering, EM interaction responses and conductivity tensor 20 p3622 A66-38385

Electromagnetic interference from pulse circuits, switches and relays produced by photo-optical control systems 21 p3709 A66-38608

High frequency-stability EM wave source, applying thermal excitation methods to pencil quantum generator in IR region 21 p3749 A66-39336

High frequency-stability EM wave source, applying thermal excitation methods to pencil quantum generator in IR region 22 p3929 A66-39706

Kinetic theory of passage of s-and p-polarized electromagnetic waves through thin inhomogeneous plasma layer 22 p3867 A66-40587

Thin nonrectilinear electron beam interaction with electromagnetic field of waveguide transmission line 23 p4037 A66-41461

Linearly and circularly polarized fields in laser amplifier interaction with axial magnetic field, emphasizing combination tone production 23 p4079 A66-41624

Nonlinear interaction of electromagnetic waves in magnetoplasma for field-parallel wave propagation 23 p4041 A66-41642

Ultrarelativistic muon electromagnetic interaction energy loss due to bremsstrahlung and pair production 24 p4271 A66-42936

**ELECTROMAGNETIC MEASUREMENT**

Automatic measuring apparatus based on resonant cavities for measuring permittivity and permeability of ferrites as function of temperature 01 p0068 A66-10558

Transistorized proton magnetometer for observatory and field measurements, analyzing use of free-proton precession to excite electromagnetic signal 01 p0072 A66-11073

Dielectric and metallic rod equivalent circuit, examining resonant frequency change upon placement in waveguide, using perturbation techniques 05 p0649 A66-15120

Measurement of components of permeability and permittivity tensors of magnetized ferrites by cavity method 07 p1009 A66-17928

High sensitivity spinner magnetometer for remnant magnetic polarization measurement of rocks in paleomagnetic research 08 p1223 A66-19081

Absolute energy and power measurements from electromagnetic pressure in optical wavelength range 08 p1256 A66-19285

Microwave measurement of anisotropy in conductivity of semiconductor in strong electrical field, using comparison of absorption of two intersecting plane-polarized waves 08 p1224 A66-19288

High time-resolution measurement of knee position in magnetospheric ion density using whistlers 10 p1527 A66-21137

Measuring apparatus to determining amplitude and phase of components of electromagnetic wave transmitted and reflected by given propagation medium 13 p2022 A66-25465

Electromagnetic and ultrasonic flow measurement of blood flow rate for cardiocirculatory physiology, discussing future application of nuclear resonance and laser 14 p2230 A66-27553

Instantaneous electromagnetic torque measuring system developed by two-phase 60-cycle servomotor 18 p3110 A66-33834

Fast variations of electromagnetic field measured by satellites electron I and II used as indication of state of radiation belts and magnetosphere of Earth 19 p3344 A66-35257

Absolute power measurement at 1.2-mm wavelength, using gas-filled waveguide to measure rotational line absorption 22 p3921 A66-40895

**ELECTROMAGNETIC METHOD**

Magnetic storage, discussing mechanical and thermal energy conversion into magnetic field energy and electromagnetic energy transfer 05 p0717 A66-15335

Magnetic storage, discussing mechanical and thermal energy conversion into magnetic field energy and electromagnetic energy transfer 15 p2543 A66-29982

Magnetic field above surface of conductor with flaws that emerge at surface when direct current is passed through 24 p4218 A66-42897

**ELECTROMAGNETIC PROPAGATION**

**SA IONOSPHERIC PROPAGATION**

Self-field electron kinetic reaction to electromagnetic propagation in three-fluid Brownian plasma 01 p0110 A66-10335

Field structure of electromagnetic surface waves at Yagi array acting as waveguide 01 p0036 A66-10367

Electromagnetic wave propagation through multilayer isotropic and anisotropic structure 01 p0025 A66-10525

Propagation, interaction and scattering of electromagnetic waves on diffusing inhomogeneous cylindrical plasma beam 01 p0027 A66-10550

Propagation of cosmic synchrotron radiation by individual and aggregate electrons and effect on propagation and radiation of electromagnetic waves 01 p0133 A66-10647

Electromagnetic H-wave propagation of given frequency along plasma sheet surrounded by vacuum 01 p0030 A66-10697

Propagation constant of electromagnetic waves in laminated waveguide containing inhomogeneous isotropic plasma 02 p0265 A66-11410

Continuous electromagnetic radiation of two solar flares attributed to bremsstrahlung of nonrelativistic electrons and synchrotron radiation 02 p0283 A66-11660

Extension of Vladimirkii method for wave propagation in circular iris waveguide to include iris waveguides of rectangular cross section 02 p0199 A66-11787

Propagation and diffraction of electromagnetic waves in inhomogeneous magnetotonic medium, noting exoionospheric propagation and Hamiltonian optics 02 p0192 A66-12208

Electromagnetic wave propagation in plasma filled disk-loaded waveguide, obtaining plasma densities 03 p0332 A66-12426

Enhanced audiofrequency electromagnetic radiation between 500 and 1000 cps recorded in auroral zone by swept-frequency analyzer 03 p0418 A66-12659

Electromagnetic propagation in parallel strips of waveguide filled with two dielectric plates 03 p0343 A66-12936

Electromagnetic groundwave propagation along Earth surface, noting transmission and reflection when meeting abrupt electrical discontinuity 04 p0475 A66-13430

Electromagnetic wave propagation in multimode Earth waveguides of variable height 05 p0632 A66-14839

Light waveguide for general lens-like media, ideal lenses and continuous media with square-law index variation 05 p0634 A66-15178

Fundamental electromagnetic wave propagation in coaxial line filled with inhomogeneous dielectric 06 p0823 A66-15886

Propagation of electromagnetic pulses in terrestrial waveguides under transient conditions 06 p0826 A66-16023

Separation constants for finite gyromagnetic plasmas, discussing ion motion effects 06 p0826 A66-16024

Approximation technique for computing transmission and reflection coefficients for plane electromagnetic waves propagating through inhomogeneous stratified dielectric slabs 06 p0826 A66-16025

Nanosecond electromagnetic pulse dispersion in longitudinally magnetized plasma confined in coaxial transmission line 06 p0826 A66-16026

Electromagnetic wave propagation in semiconductor filled rectangular waveguide in presence of transverse magnetic field 06 p0846 A66-16092

Electric field and wave impedance in spin wave propagation in ferrimagnetic materials 06 p0847 A66-16101

Organic superconductor and dielectric IR waveguide, resonator and antenna models of insects sensory hairs, spines and pit pegs 06 p0847 A66-16103

Electromagnetic wave propagation through semiconductor with nonuniform density distribution in transverse magnetic fields 06 p0923 A66-16177

Electromagnetic propagation characteristics of Venus and Mars derived from atmospheric data 06 p0831 A66-16436

Transverse propagation of vertically polarized electromagnetic waves in horizontally stratified horizontally magnetized plasma 06 p0917 A66-16447

Asymptotic solutions of problems in wave propagation, examining electromagnetic field equations, hyperbolic equations, radiation from sources, etc 06 p0835 A66-16900

Propagation of microwaves through circular cylindrical metallic guide filled with two different dielectrics 06 p0857 A66-16951

Slab with periodically modulated refractive index, predicting short wave radiation pattern emitted 06 p0836 A66-16983

Variational method for dispersion curve of electromagnetic slow wave propagation in nonuniform plasma 06 p0836 A66-16988

Monographs on electromagnetic diffraction and propagation problems, particularly radio propagation in troposphere 06 p0836 A66-17087

Beam trajectories of electromagnetic waves in ionized toroid and effective reflecting toroidal surface 08 p1214 A66-19046

Propagation of acceleration and electromagnetic waves in homogeneously deformed uniformly polarized hyperelastic dielectric 08 p1271 A66-19228

Coaxial, rectangular and bandpass waveguides containing ferrite and dielectric plates in E plane, obtaining transcendental equations, determining electromagnetic wave propagation 08 p1194 A66-19312

Text on electromagnetic force principles including Maxwell equations, electrostatics, electromagnetic waves, electron theory, relativity, etc 08 p1256 A66-19465

Russian text on diffraction and radiation of waves 08 p1257 A66-19755

Interaction of ideally conducting sphere of

variable diameter and constant uniform magnetic field 08 p1186 A66-19760

Theory of thermal noise in ionosphere developed from Nyquist theorem expressing thermal fluctuations of current in localized resistance 09 p1340 A66-19846

Transition layer properties in reentry plasmas, examining electromagnetic propagation in plasma surrounding hypersonic missile 09 p1406 A66-19850

Quasi-linear theory of weakly turbulent plasma taking into account correlation of electric and magnetic microfields 09 p1407 A66-19966

Electromagnetic wave propagation characteristics of plasma slab on surface of arbitrary impedance, using simplified approach 09 p1342 A66-20257

Electromagnetic wave propagation in meteorology and geophysics, noting expression for refractive modulus in troposphere, considering attenuation and backscattering 09 p1343 A66-20276

Self-focusing of longitudinal electromagnetic waves in nonlinear plasma in strong magnetic field 09 p1343 A66-20343

Electromagnetic wave propagation in plasmas, surveying literature on RF field-plasma interactions [AIAA PAPER 66-170] 10 p1560 A66-21424

Influence of boundaries on wave propagation in compressible warm plasma 10 p1566 A66-21730

Propagation of quasi-TEM mode in ferrite-filled coaxial line 10 p1506 A66-21913

LF electromagnetic wave propagation peculiarities of semiconductor and negative differential conductivity effects 10 p1582 A66-21967

Electromagnetic wave propagation in plasma located in magnetic field of linear direct current 10 p1506 A66-22003

Kinetic approximation of electromagnetic surface wave propagation in infinite plasma sheath solved by Fourier method, noting resulting dispersion equation 11 p1743 A66-22441

Electromagnetic propagation into cavity formed by two parallel walls, for case of continuous wave impinging perpendicularly 11 p1653 A66-22558

Single scattering model for diffusion and propagation of waves in random media 11 p1654 A66-22635

Linear polarized plane electromagnetic wave diffraction by two pairs of parallel infinite coaxial cylinders 11 p1654 A66-22645

Beam waveguides for long distance electromagnetic wave transmission at optical wavelengths described by theory of focusing antennas 11 p1656 A66-22737

UHF ferrites as magnetically anisotropic media in which electromagnetic wave propagation rate assumes two values and magnetic permeability is of tensor nature 11 p1658 A66-23233

Electromagnetic propagation in rotating systems, classic analysis of mode-splitting phenomena caused by rotation of cavity resonator 11 p1658 A66-23266

Electromagnetic H-wave propagation of given frequency along plasma sheet surrounded by vacuum 11 p1658 A66-23299

Intense HF electromagnetic wave propagation in isothermal isotropic nonhomogeneous plasma, noting interaction with electrons of Langmuir frequency 12 p1921 A66-24212

Amplitude and phase velocity of electromagnetic waves in 1-30 kc range near Earth surface for plane and spherical Earth-ionosphere waveguide 12 p1817 A66-24278

Electromagnetic wave propagation in infinite uniform plasma medium with and without magnetic field 12 p1924 A66-24732

Collisional effects in region of electron cyclotron frequency on electromagnetic wave propagation in plasma 13 p2147 A66-25752

Reflection coefficients for electromagnetic waves in variable refractive index medium from approximate solution of linear differential equations 13 p2025 A66-26040

Propagation of circularly polarized electromagnetic waves in circular semiconductor cylinder surrounded by metal tube and immersed in DC magnetic field 13 p2169 A66-26238

Lower hybrid resonance in VLF range in satellites, noting noise emission due to trapping of electromagnetic wave propagation in transverse magnetic field 13 p2074 A66-26364

Electromagnetic wave propagation near missiles during hypersonic atmospheric reentry and computer program for determination of dissociated and ionized particle density in nonequilibrium nitrogen-plasma flow 13 p2150 A66-26374

Propagation of circularly polarized plane electromagnetic waves through helium plasma along direction of static magnetic field, determining electron density 13 p2154 A66-26672

Propagation of linear polarized electromagnetic waves through helium plasma along magnetic field, measuring phase and intensity of components of electric field 13 p2155 A66-26673

Emergence point of conical microwave beam transmission through nonuniform electron plasma 14 p2234 A66-26860

Light reflection from dielectric films of continuously varying refractive index 14 p2356 A66-26966

Magnetoionic couplings and electromagnetic wave propagation in horizontally stratified layer of gyrotropic medium 14 p2283 A66-27125

VLF electromagnetic propagation parameter determination by field strength measurements over medium distances in ionosphere 14 p2235 A66-27130

Electromagnetic wave propagation in two waveguides with different cross section connected by long continuous slot 14 p2251 A66-27169

TE surface wave determined by propagation and external magnetic field directions used in microwave circuits 14 p2363 A66-27518

Book on electromagnetic wave propagation, noting wire antenna radiation, radio astronomical antennas and plasma EM wave 14 p2239 A66-27719

Electromagnetic transmission through thin silver film on dielectrics 14 p2364 A66-27747

Plane wave behavior, as deduced from Mathieu function, analyzed in permittivity modulated slab immersed in medium of arbitrary constant permittivity 14 p2240 A66-27913

Propagation of ionizing fronts across magnetic field, examining flow behind and ahead of front 14 p2347 A66-28305

Antenna and propagation - IEEE International Symposium, Washington, D.C., August 1965 15 p2454 A66-28566

Electromagnetic and plasma wave propagation in inhomogeneous compressible isotropic collisionless electron plasma bounded by closed surface in free space 15 p2449 A66-28592

Helicon wave propagation in InSb and InAs at room temperature 15 p2559 A66-28630

Nonlinear terms of electromagnetic field in ionized gas reduced to linear system and single nonlinear equation 15 p2547 A66-29648

Propagation behavior of circular waveguide enclosing column of isotropic plasma, considering effect of glass walls for microwave device application 15 p2467 A66-29859

Frequency of arising stationary finite-amplitude waves in ferrites depends on properties of medium, angle between magnetic field and propagation direction and wave amplitude 16 p2784 A66-31548

Propagation of cosmic synchrotron radiation by individual and aggregate electrons and effect on propagation and radiation of electromagnetic waves 17 p2992 A66-32062

Parametric amplification by monochromatic pumping of electromagnetic oscillations of substance contained in resonator 17 p2885 A66-32244

Emission of electromagnetic waves by electron flux moving inside ring waveguide 17 p2874 A66-32248

Kinetic theory of electromagnetic propagation in confined magnetoactive plasma 17 p2968 A66-32539

Transverse electromagnetic wave transformation into ion-acoustic plasma oscillations with formation of intermediate

Langmuir electron wave 17 p2969 A66-32542  
 Electromagnetic wave propagation in cylindrically stratified plasma, noting ODE describing transverse propagation of axial component 17 p2876 A66-33279  
 Angular propagation constants for electromagnetic modes which may exist in continuously curved waveguide bends of rectangular cross section for microwave application 18 p3072 A66-34569  
 Time harmonic wave propagation in perfectly conducting large waveguides containing random media, emphasizing computation and physical interpretation of wave motions 18 p3072 A66-34570  
 Longitudinal propagation of superlow frequency electromagnetic waves through plane-laminar magnetoactive ionospheric plasma 19 p3296 A66-35298  
 Lunar line waveguide parameters calculated for inner conductor displacement and ratio of radii 19 p3311 A66-35301  
 Transverse propagation of electromagnetic waves in cylindrically stratified axially magnetized plasma, noting profiles of permittivity tensor 19 p3303 A66-35856  
 Configuration interaction in helium continuum between first and second quantum thresholds 19 p3402 A66-35994  
 Exact solution of nonlinear relativistic equations of motion for electron in right circularly polarized wave propagating in whistler mode parallel to external magnetic field 19 p3303 A66-35998  
 Electromagnetic wave propagation in plasma located in magnetic field of linear direct current 19 p3303 A66-36087  
 Skin-effect theory for axisymmetric plasma-field configurations 19 p3409 A66-36309  
 Incidence of cylindrical /spherical/ local-plane electromagnetic wave on weak plasma, using ray-optics methods, leading to field peculiarities 20 p3512 A66-37139  
 Self-focusing of electromagnetic waves in nonlinear anisotropic medium 20 p3513 A66-37154  
 Ionospheric electric current effects on upper atmospheric electromagnetic wave transmission and propagation, discussing magnetospheric effects, solar wind, geomagnetic field, etc 20 p3550 A66-37434  
 Behavior of transverse wave numbers /separation constant/ for electromagnetic wave propagation in anisotropic homogeneous cold plasma of arbitrary cross section 20 p3608 A66-37454  
 Antenna radiation pattern synthesis for various array distributions, noting methods applied 20 p3529 A66-37706  
 Antennas with leaky wave characteristics, noting similarities and differences with wave diffraction 20 p3529 A66-37707  
 Slot antenna research, discussing arrays and polarization characteristics 20 p3530 A66-37710  
 Formula derivation for directivity of short endfire antenna array, obtaining current amplitude and phases for maximum gain 20 p3531 A66-37725  
 Recognition and subsequent amplification of difference frequency in plasma-beam system with two electromagnetic waves propagating in opposite direction 20 p3519 A66-38006  
 Propagation paths between hemispheres followed by usual and unusual whistlers, giving rise to series of echoes 20 p3553 A66-38077  
 Cathode ray oscillograph-directional antenna recordings of electromagnetic pulses from lightning discharges 20 p3553 A66-38081  
 Book on tropospheric radiowave propagation, discussing diffraction theories, scattering phenomena, transhorizon propagation, etc 20 p3520 A66-38091  
 Microwave transmission power loss for electromagnetic propagation through bounded solid state plasma waveguide in transverse magnetic field 21 p3703 A66-38755  
 Electromagnetic wave radiation from dipole source in thin plasma slab becoming weak outside plasma, considering total reflection 21 p3703 A66-38759  
 Electromagnetic wave propagation in plasma along weakening magnetic field, considering spatial dispersion associated

with ion thermal motion 21 p3781 A66-39010  
 Longitudinal and transverse electric fields in electron beam due to interaction with plasma, showing that both fields are components of same wave 21 p3782 A66-39020  
 Electromagnetic wave propagation, excitation and dispersion in metals in magnetic field 21 p3792 A66-39300  
 Refractive index equation derived for oblique wave propagation in compressible general magnetoplasma with arbitrary directed magnetostatic field 21 p3793 A66-39350  
 LF electromagnetic wave propagation peculiarities of semiconductor and negative differential conductivity 21 p3804 A66-39546  
 Vector potential function solution to Maxwell-Minkowski equations describing cut-off phenomena for EM wave propagation in wave guide filled with homogeneous isotropic lossless moving medium 22 p3862 A66-39783  
 Numerical solution of full-wave equation with mode coupling governing electromagnetic wave propagation in horizontally stratified inhomogeneous anisotropic medium 22 p3863 A66-39938  
 Three-dimensional electric field wave equation for homogeneous gyrotropic compressible drifting plasma derived for case having magnetostatic field and drift velocities in arbitrary directions 22 p3865 A66-40099  
 Uniform magnetic field effect on plane acceleration wave propagation and growth in homogeneously deformed perfectly electroconductive elastic material 22 p3955 A66-40135  
 Growth of plane acceleration discontinuities propagating into homogeneously deformed hyperelastic dielectric material in presence of magnetic field 22 p3948 A66-40136  
 Polarized EM wave propagation and microwave Faraday rotation in solid state plasma in circular waveguide under strong magnetic field 22 p3964 A66-40170  
 Quasi-optical measurement of Faraday rotation in oversize waveguide at 2-and 1-mm wavelengths 22 p3876 A66-40172  
 Intense HF electromagnetic wave propagation in isothermal isotropic nonhomogeneous plasma, noting interaction with electrons of Langmuir frequency 22 p3956 A66-40576  
 Generalized full wave theory equations derived for EM plane wave propagation through magnetotonic medium for electron collision frequencies proportional to electron energy 22 p3869 A66-40805  
 Beam waveguides for long distance electromagnetic wave transmission at optical wavelengths described by theory of focusing antennas 23 p4037 A66-41475  
 Parabolic cylindrical waveguide formed by intersection of two confocal parabolic metal surfaces, determining eigenvalues of wave functions subject to boundary conditions yielding TE and TM modes 23 p4047 A66-41587  
 Reflection and propagation of electromagnetic pulses through dispersive media, degradation of step carrier in magnetoplasma analyzed by Laplace inversion technique 23 p4039 A66-41589  
 Radiation and propagation of electromagnetic waves, noting solution to initial value problem for moving point source in infinite homogeneous medium 23 p4040 A66-41635  
 Boundary conditions for unique solution to linearized warm plasma equations 23 p4105 A66-41640  
 Linearly polarized incident electromagnetic waves propagated along static magnetic field through plasma in region of electron cyclotron frequency, noting wave modes behavior 24 p4242 A66-42400  
 Electromagnetic propagation in semiconductor with account of nonlinear effects such as skin effects arising from electron heating by field 24 p4256 A66-42526  
 Electromagnetic wave transmission through and reflection from homogeneous nonlinear anisotropic slab between two linear isotropic media 24 p4173 A66-42706

Carbon disulfide traveling wave Kerr cells with identical microwave and dielectric constants, noting light modulator construction at microwave frequencies 24 p4185 A66-42814  
 Electromagnetic propagation in slowly rotating anisotropic dielectric single band waveguide modulator 24 p4175 A66-42967  
 Fourier analysis of Riemann-Hilbert problem of diffraction of normally incident plane electromagnetic wave by plane metallic grid above dielectric sheet and semilinear plasma 24 p4175 A66-42978  
**ELECTROMAGNETIC PROPULSION**  
 Space travel projects noting ion propulsion, electromagnetic drive and tests of flight simulation 03 p0415 A66-12483  
 Predicted and observed calorimetric exhaust efficiencies of capacitor powered coaxial plasma guns [AIAA PAPER 65-340] 15 p2551 A66-29275  
**ELECTROMAGNETIC PUMP**  
 Electric drive operating parameters and design, using exploding wire type device and electromagnetic apparatus for plasma production and acceleration 06 p0942 A66-15917  
 Experimental assembly using liquid gallium cycle for testing electromagnetic pumps and flow meters 06 p0918 A66-16847  
 Russian monograph on MHD of liquid metals, discussing application for transport and technological treatment of metals, molten salts and slags 08 p1266 A66-19566  
 Transverse magnetic field applied to high Reynolds number flow of liquid mercury in pipes and ducts inhibits convective mechanism of heat transfer [AIAA PAPER 65-539] 15 p2616 A66-29279  
**ELECTROMAGNETIC RADIATION**  
**SA ALPHA RADIATION**  
**SA BETA RADIATION**  
**SA MICROWAVE RADIATION**  
 Overall profile of ophthalmic injury associated with ionizing and nonionizing electromagnetic radiation fields based on human response to radiation exposure 01 p0018 A66-10793  
 Radio noise measurements at high altitudes using rocket probe, suggesting electromagnetic radiation from plasma waves as source mechanism 02 p0288 A66-11506  
 Effect of radiation on various types of materials and application of irradiation processes to field of industrial technology 04 p0537 A66-13375  
 Contribution of nonlinear interaction of surface oscillations in plasma to emission of electromagnetic radiation from plasma 04 p0552 A66-13882  
 Laser beam use in biology and medicine, noting interaction of electromagnetic radiation with biological systems, hazards, diagnostics, therapeutics, etc 04 p0534 A66-14455  
 Light flow amplification in inhomogeneous layer taking nonlinearity into account 05 p0692 A66-14725  
 Circular filament of electric current in unbounded magnetotonic medium, measuring radiation resistance for constant current distribution 05 p0633 A66-15122  
 Solar flares, discussing continuous electromagnetic radiation, hard X-ray radiation and microwave radio bursts 05 p0752 A66-15378  
 Expected diffraction effects on electromagnetic radiation from Mariner IV due to Martian atmosphere and occultation 06 p0827 A66-16039  
 Electromagnetic waves from plasma penetrated by pulsed electron beam in magnetic field 06 p0914 A66-16147  
 Radiation resistance of elongated conducting electromagnetic radiator in vacuum or linear dielectric 07 p1002 A66-17831  
 Mariner II solar wind measurements including data on Venus electromagnetic radiation, space magnetic fields and charged particles, energy spectra, solar plasma, etc 07 p1130 A66-18077  
 Energy sources of lunar luminescence noting effects of solar wind, corpuscular radiation, electromagnetic radiation and radioactivity 07 p1139 A66-18090  
 Model of cosmic ray shower, measuring time-integrated energy flux in radiation

- Field 08 p1283 A66-18619
- Green function method in theory of dispersion and absorption of electromagnetic radiation in semiconductors, considering resonance line shapes 09 p1411 A66-19961
- Solar electromagnetic radiation studied in terms of irradiance, UV and X-rays and radio emission 09 p1454 A66-20283
- Electromagnetic-wave radiation peculiarities in homogeneous anisotropic dispersive magnetic plasma 09 p1343 A66-20342
- Galactic X-rays, discussing soft X-rays, UV radiation, isotropic X-rays, electromagnetic radiation from X-ray sources, etc 10 p1600 A66-21854
- Continuous electromagnetic radiation from solar flares, examining X-ray bursts from synchrotron, Compton and bremsstrahlung mechanisms 11 p1762 A66-22406
- Primary cosmic ray energy spectrum, including primary flux of protons and heavier nuclei, and EM cascade pair production rates 11 p1765 A66-23192
- Interaction of electromagnetic radiation falling on plasma surface with plasma surface wave, showing that wave amplitude increases or decreases exponentially 12 p1921 A66-24211
- Nonrotating star with spherical symmetry emitting electromagnetic radiation analyzed, using gravitational field analogy 13 p2072 A66-25417
- Surface wave emission by charges passing through interface between vacuum and real dielectric, emphasizing energy loss equations 13 p2025 A66-26051
- Radiation due to time-harmonic source and field solution of electric dipole in moving uniaxial anisotropic medium by Minkowski theory 14 p2234 A66-26861
- Contribution of nonlinear interaction of surface oscillations in plasma to emission of electromagnetic radiation from plasma 14 p2343 A66-27580
- Radiation from vertical dipole in warm plasma determined by asymptotic series expansion of integral solutions, noting surface wave propagation, transformation from acoustic to electromagnetic mode on boundary, etc 14 p2240 A66-27917
- Electromagnetic waves from plasma penetrated by pulsed electron beam in magnetic field 15 p2557 A66-29877
- Naturally occurring electromagnetic radiation in audiofrequency range studied at Kiruna Geophysical Observatory 16 p2691 A66-30232
- Physical principles in plasma application for amplification and generation of electromagnetic oscillations 16 p2760 A66-30797
- Direct measurement of attenuation length of extensive air showers through water 18 p3212 A66-35136
- Light variations of flare and T Tauri stars due to surface electromagnetic activity connected with turbulence in convective zone and rotation, using Hertzprung-Russell diagram 20 p3652 A66-37610
- Electrons trapped in magnetosphere, discussing dynamo electrostatic field, energetic electron electromagnetic drift and magnetic mirror-electron orbit effects 20 p3635 A66-38226
- Equivalent circuit for pyroelectric materials used in obtaining noise equivalent power for detection of electromagnetic radiation and heat transfer measurement 20 p3562 A66-38405
- Radio astronomy satellite with extendible antennas achieves gravity gradient stabilization while receiving electromagnetic radiation, analyzing dynamic behavior and effect of passive damper 21 p3820 A66-38863
- Mathematical analysis of radiation from slotted magnetic line source on conducting cylindrically capped wedge covered by dielectric layer or plasma 21 p3705 A66-39349
- Dielectric loss tangent measurement in pyroelectric materials for EM radiation detectors and heat transfer sensors 21 p3740 A66-39386
- Chemical energy conversion to electromagnetic energy by flux compression, discussing process and obtained efficiency 21 p3698 A66-39502
- Effects of low density, temperature, proton radiation and electromagnetic radiation on thermal control materials, using synergistic testing 22 p3889 A66-40219
- Interaction of electromagnetic radiation falling on plasma surface with plasma surface wave, showing that wave amplitude increases or decreases exponentially 22 p3956 A66-40575
- Radiation in magnetoplasmas, noting correctness of infinity catastrophe theory for dielectric radiation sources in magnetotonic media 23 p4105 A66-41632
- Radiation and propagation of electromagnetic waves, noting solution to initial value problem for moving point source in infinite homogeneous medium 23 p4040 A66-41635
- Ring laser rotation rate sensor noting relation to electromagnetic radiation 24 p4223 A66-42564
- Processes for producing electromagnetic radiation including applications of spectroscopic methods, noting relation to plasma physics 24 p4238 A66-43117
- Electromagnetic and corpuscular radiation hazards to astronauts deduced from data on dogs 24 p4166 A66-43140
- ELECTROMAGNETIC SCATTERING**
- Book on satellite-caused ionospheric disturbances, particularly in particle density and electric and magnetic fields in vicinity of artificial body 01 p0138 A66-10975
- Plane wave diffraction by sinusoidal network 01 p0031 A66-11074
- Homogeneous isotropic plasma diagnosis using beam displacement in reflection of electromagnetic wave 02 p0264 A66-11240
- Interaction between electromagnetic waves and turbulent plasma 02 p0191 A66-11731
- Russian monograph on turbulent plasma theory covering turbulence formation, hysteresis, plasma oscillations, self-consistent wave interactions, etc 03 p0406 A66-13283
- Electromagnetic wave scattering discussing beam trajectories, flux density decrease and radar detection in ionized trail in form of paraboloid of revolution 03 p0337 A66-13314
- Plasma resonance of cylindrical plasma in absence of magnetic field noting conductivity kernel, scattering of radiation, nonuniformity of plasma sheath and Landau damping 04 p0474 A66-13425
- Electromagnetic wave reflection from rough surface 04 p0481 A66-13748
- Scattering of H-polarized plane waves by infinitely long axially magnetized cylinder of uniform plasma 04 p0484 A66-14100
- Electromagnetic scattering by refractive index distribution characterized by one-dimensional pressure 05 p0675 A66-14554
- Temperature dependence of Mie scattering, covering absorption and scattering of electromagnetic radiation on spherical aluminum oxide particles 05 p0718 A66-14917
- Plane electromagnetic wave scattering at rectangular conducting strips, examining front end backscattering and current distribution measurements 05 p0649 A66-15121
- Radiation absorption and scattering by small spherical solid carbon particles in wavelength range 0.2 to 40  $\mu$  calculated by classical Mie theory [AIAA PAPER 66-134] 06 p0911 A66-16261
- Long wavelength limit in scattering from homogeneous dielectric cylinder at oblique incidence 06 p0830 A66-16277
- Tonks-Dattner resonances, describing frequency modulated technique to study microwave energy irradiated plasma column 06 p0920 A66-16993
- Electromagnetic scattering by finite dense plasma sphere, discussing effects of surface wave, absorption and inhomogeneity 07 p1091 A66-18409
- Equivalence of oscillating electric field on plasma boundary, with specularly reflecting bounding wall, to unbounded plasma with planar oscillating grid at wall position 08 p1261 A66-18546
- Electromagnetic wave scattering by satellite caused by ionized coating, noting effect on echo 08 p1182 A66-18754
- Equilibrium electron density distribution in F-2 region of equatorial ionosphere, noting effects of photoionization, loss, diffusion along geomagnetic field lines and electromagnetic drift 08 p1216 A66-19210
- Comparison of signals received on two VHF scatter circuits of different geometry but viewing common scattering region 08 p1184 A66-19211
- Electromagnetic wave scattering due to plasma oscillations in plane plasma layer used as evidence of noise existence in turbulent plasma 08 p1184 A66-19273
- Interferometer for interference perturbation of electromagnetic three-cm waves 08 p1224 A66-19320
- Wave propagation equations in inhomogeneous warm plasma, emphasizing separation into quasi-electromagnetic and dynamic components 08 p1266 A66-19736
- Antennas in ionized medium - Colloquium, Paris, June 1965 09 p1339 A66-19841
- Diffraction of plane electromagnetic wave by cylinder of inhomogeneous plasma calculated by method that considers plasma as electron dipoles 09 p1406 A66-19843
- Electromagnetic wave diffraction by arbitrary shaped dielectric bodies treated by perturbation method, based on Taylor series expansion 09 p1342 A66-20086
- Relativistic mechanism of electromagnetic wave scattering at velocity fluctuations and emission from plasma in external field 09 p1344 A66-20353
- Spatial scattering of associated electromagnetic waves arising during passage of fast charged particles through semiconductors, noting role of Cerenkov radiation 09 p1428 A66-20596
- Matrix formulation determination radar cross section arising when smooth conducting obstacle is illuminated by incident electromagnetic wave 10 p1497 A66-21590
- Integral equation method solution of scattering from cylinders with arbitrarily varying anisotropic surface impedance 10 p1497 A66-21591
- Modal expansions for resonance scattering phenomena 10 p1498 A66-21595
- Saddle point, Watson transformation and residue series in survey of asymptotic methods for HF scattering 10 p1498 A66-21596
- Bistatic scattering and derivation of bistatic RCS from monostatic RCS measurements for small angles 10 p1499 A66-21608
- Electromagnetic scattering from conducting object controlled by loading portions of surface with impedances, distributed or lumped 10 p1499 A66-21610
- Scattering of electromagnetic wave by metallic sphere loaded with circumferential slot in presence of electric field 10 p1499 A66-21611
- Electromagnetic propagation and scattering in temperate plasma with dielectric regions, noting application to ionosphere and reentry condition 10 p1500 A66-21613
- Bibliography of articles on radar reflectivity and related subjects, 1957-1964 10 p1500 A66-21614
- Electromagnetic theory to determine nose-on radar cross section of perfectly conducting finite cone 10 p1500 A66-21615
- Born approximation applied to electromagnetic scattering from finite cone to determine radar cross section 10 p1500 A66-21616
- Short-pulse scattering by simple geometric shapes useful for heuristic models of electromagnetic scattering, illustrating creeping-wave return 10 p1500 A66-21618
- Electromagnetic scattering model of turbulent plasma wake behind reentry vehicle 10 p1502 A66-21634
- Anechoic chamber facility for surface field measurement in scattering studies using probes 10 p1520 A66-21638
- Electromagnetic wave scattering from 30 degree metal wedge and thick plate over wide range of bistatic angles, comparing results with Keller geometrical theory of diffraction 10 p1503 A66-21644
- Electromagnetic wave scattering from very rough surfaces, noting contribution of small and large scale roughness to scattered power 10 p1504 A66-21658

Electromagnetic scattering by cylinder with inhomogeneous sheath 11 p1652 A66-22392

Tube shaped and solid cylinder antennas compared, calculating surface current distribution and radiation patterns 11 p1662 A66-22543

Scattering theory by perfectly conducting irregular surface at very short wavelength developed, using vector field theory 11 p1652 A66-22550

Validity of two approximations for removing corners and slope discontinuities from cylindrical metallic bodies in digital approach to Maxwell equations 11 p1653 A66-22563

Plane electromagnetic wave diffraction on slot and tape having magnetic and electric fields parallel to edges of slot and tape respectively 11 p1655 A66-22717

Scattering coefficients caused by sudden change in electrical properties of narrow wall of rectangular waveguide 11 p1666 A66-22720

Plane electromagnetic wave scattering by conducting cylinder surrounded by hot magnetoplasma sheath 11 p1657 A66-23112

Backscattered and surface fields for acoustically hard and soft prolate spheroids at end-on incidence computed, using tabulation of spheroidal functions 12 p1815 A66-24119

Radar cross polarization measurements for target surface property determination, noting application to lunar studies 12 p1819 A66-24603

Maxwell equation as basis for studying multiple scattering of electromagnetic waves in inhomogeneous medium 12 p1825 A66-24886

Electromagnetic scattering by circular wire loops loaded with lumped impedances, obtaining solution to integral equation by Fourier series 14 p2247 A66-26863

Electromagnetic wave scattering and depolarization from rough surface, noting existence of surface current vector component pointing in direction of incident wave 14 p2235 A66-27038

Resonance peaks due to electromagnetic scattering by argon plasma jet observed during change in electron concentration, noting dependence of scattering on argon flow rate and electric power of arc 14 p2341 A66-27151

Electrostatic interaction effect on EM waves scattering by atmospheric aerosol particles 14 p2284 A66-27539

Normally incident plane electromagnetic wave scattering by circular cylinder coated with radially stratified sheath 14 p2238 A66-27587

Electromagnetic wave scattering by radially inhomogeneous spherical object 14 p2240 A66-27918

Plane electromagnetic diffraction by wide aperture in conducting screen immersed in anisotropic medium 14 p2241 A66-27981

Scattering of plane electromagnetic wave at infinite circular cylinder with spatially varying dielectric constant 14 p2242 A66-28155

Electromagnetic wave scattering, discussing beam trajectories, flux density decrease and radar detection in ionized trail in form of paraboloid of revolution 14 p2242 A66-28287

Omnidirectional scattering of ultrasonic waves from rough surfaces satisfying Kirchhoff theory with respect to electromagnetic scattering 15 p2536 A66-28571

Plane electromagnetic scattering by unidirectionally conducting sphere 15 p2448 A66-28573

Theoretical and experimental investigations of electromagnetic scattering by conducting cylinder coated with anisotropic ferrite sheath magnetized along axis 15 p2449 A66-28594

Electromagnetic scattering from infinite cylinder at oblique orientation 15 p2537 A66-28976

Radio wave emission due to shock wave propagation in magnetospheric boundary and electromagnetic scattering in plasma wave field 15 p2575 A66-29083

HF backscattering by plane electromagnetic wave incident on imperfectly conducting sphere covered with

concentric layers of different materials, noting refractive index value 16 p2647 A66-30224

Scattering of electromagnetic waves in plasma, noting effect of eddy current fluctuations 16 p2654 A66-31179

Electromagnetic scattering by perfectly conducting elliptical cylinder in uniaxially anisotropic medium, transforming boundary value to Helmholtz equation 16 p2654 A66-31442

Maximum beam displacement parallel to plane of incidence in plasma reflection of linear or elliptically polarized waves 17 p2974 A66-33286

Harmonic series solution for electromagnetic scattering by unidirectionally conducting helical sheath when incident field is E-polarized 18 p3065 A66-33530

Initial boundary value problems involving Maxwell equations in isotropic media solved numerically 18 p3065 A66-33533

Equivalence between scalar three-dimensional diffraction problems in homogeneous medium and two-dimensional diffraction problems in inhomogeneous medium with inverse square permittivity profile 18 p3065 A66-33534

Shadowing effect and anomalous backscattered intensity in diffuse reflection from plane-parallel layer of random particles 18 p3068 A66-34014

Improved correlation function in Kirchhoff-Huygen method of solution of scattering of waves from statistically rough surfaces 18 p3068 A66-34015

Augmented Born approximation based on variational principles applied to electromagnetic scattering from inhomogeneous dielectric spheres of finite extent 18 p3071 A66-34452

Reflection coefficient of electromagnetic wave polarized in plane normal to magnetostatic field and falling from vacuum perpendicularly on plasma boundary parallel to field 19 p3303 A66-36198

Diffraction of electromagnetic plane by half-plane in uniaxially anisotropic medium solved in terms of Sommerfeld approximation 19 p3304 A66-36284

Induced scattering of electromagnetic waves from magnetoactive plasma particles 19 p3418 A66-36533

Depolarization of electromagnetic waves backscattered from rough surface boundary 20 p3515 A66-37293

Perfectly conducting prolate spheroid illuminated by plane wave at arbitrary incidence with LF solution and expansion terms predicted from symmetries 20 p3516 A66-37622

Plane linearly polarized electromagnetic wave diffraction on several spheres forming linear system, showing solution of boundary value problems 20 p3603 A66-37754

Spatial scattering of associated electromagnetic waves arising during passage of fast charged particles through semiconductors, noting role of Cerenkov radiation 20 p3622 A66-38130

Electromagnetic scattering by obliquely oriented cylinders, noting extinction efficiency, propagation in cylindrical waveguides and polarization reversal 20 p3603 A66-38403

Microwave and optical range electromagnetic wave scattering in plasma, noting frequency and power of probing signal 21 p3789 A66-39066

Conformal mapping technique applied to boundary value problem of plane wave diffraction by perfectly conducting elliptic cylinder, noting integral equation 22 p3866 A66-40185

Uniqueness theorem for particular inverse problem of plane wave perpendicularly incident on long cylinder of complex refractive index 22 p3866 A66-40455

Resonance scattering of electromagnetic waves on arbitrary rarefied plasma region with near-zero intrinsic wave number relative to small perturbation 22 p3869 A66-40758

Phase shift from scattering by atoms with attractive potentials, predicting virtual energy states for incident energies in three-turning point range 22 p3951 A66-40906

Maxwell equation as basis for studying multiple scattering of electromagnetic waves in inhomogeneous medium 23 p4036 A66-41093

Diffraction of electromagnetic waves at dielectric wedge, considering skin depth and internal problem 23 p4036 A66-41134

Plane electromagnetic wave diffraction on slot and tape having magnetic and electric fields parallel to edges of slot and tape respectively 23 p4037 A66-41455

Scattering coefficients caused by sudden change in electrical properties of narrow wall of rectangular waveguide 23 p4045 A66-41458

Asymptotic expansion of electromagnetic field scattered from convex cylinder near grazing incidence, using boundary layer theory 23 p4038 A66-41546

Electromagnetic wave scattering by stratified medium, noting Mathieu and Floquet type wave representation 24 p4171 A66-42292

Electrostatic interaction effect on EM waves scattering by atmospheric aerosol particles 24 p4198 A66-42325

Scattering of circularly polarized electromagnetic wave in Coulomb field, noting coalescence of two-wave quanta into one quantum of double frequency 24 p4220 A66-42529

Backscatter of electromagnetic waves from rough layer simulated by acoustic backscattering from partially submerged Plexiglas layer 24 p4173 A66-42624

Diffraction of waves by transparent screen studied to determine what information about diffracting screen can be obtained by observing diffraction pattern 24 p4173 A66-42712

Resonance peaks due to electromagnetic scattering by argon plasma jet observed during change in electron concentration, noting dependence of scattering on argon flow rate and electric power of arc 24 p4244 A66-42971

**ELECTROMAGNETIC SHIELDING**

Attenuation of transient electric and magnetic fields by imperfectly conducting spherical shells 06 p0843 A66-16029

Shielding effect on modulating microwave ferrite switch in applied magnetic field and relation between inside and outside fields for thin waveguide 06 p0857 A66-16952

Plane wave shielding effectiveness of vacuum deposited thin films, using section of air-filled coaxial transmission line 12 p1835 A66-24142

Optimum antenna placement within metallic enclosure 13 p2044 A66-26748

Ground clutter shields for L-band radar using 60-ft parabolic reflector with Cassegrain geometry 15 p2457 A66-28596

Electromagnetic shielding for sensitive electronic components, noting Netic and Co-Netic magnetic alloys 15 p2465 A66-29670

Near field beyond perfectly conducting plane screen with small circular aperture 18 p3066 A66-33542

Electromagnetic interference shielding for conductors that excludes interference energy caused by both magnetic and electric fields over broad frequency range 20 p3499 A66-37195

Short wave transmission station conduction, noting shielding to prevent interference from TV transmission 20 p3543 A66-37723

Clutter shield for L-band monopulse radar employing Cassegrain parabolic reflector 24 p4173 A66-42620

**ELECTROMAGNETIC SHOCK TUBE**

Electromagnetic shock generator of high voltage nanosecond pulses with controlled length 04 p0495 A66-13885

Mach-Zehnder interferometer for electromagnetically accelerated shock waves in hydrogen 04 p0554 A66-14285

Velocity measurements of electron front in electromagnetically generated T-tube shock waves made with microwave interferometer 04 p0558 A66-14479

Electric shock tube flow modes at low pressure and conditions for shock wave detached from plasma flow 05 p0659 A66-14706

Thomson scattering measurements of magnetic annular shock tube plasmas using

Q-switched ruby laser light  
beam 05 p0660 A66-14707  
Bursting shock tube diaphragms  
electrically, using two piezoelectric  
gauges 06 p0869 A66-16947  
Detection of ionized gas front passage and  
differentiating it from current sheet in  
magnetically driven shock  
tube 07 p1020 A66-17956  
Gas and sound velocity measurements  
downstream of shock wave in  
electromagnetic tube for subsonic and  
supersonic flows 07 p1023 A66-18119  
Precursor electron front measuring  
velocity, electron temperature dependence  
on operating parameters,  
etc 08 p1259 A66-18525  
Magnetic field measurement in shock tube  
when plasma moves with respect to  
probe 08 p1226 A66-19695  
Microwave reflection measurements for  
precursor in electromagnetically driven  
shock tube, discussing axial distribution and  
electron density 09 p1409 A66-20855  
Photographic results compared with  
calculations for shock wave reflection  
velocity and wake processes in  
electromagnetic shock  
tube 12 p1921 A66-24214  
Propagation of fast shock waves in  
electromagnetic shock tube, using acoustical  
method, noting time distribution of  
pressure, wave reflection,  
etc 13 p2059 A66-25083  
Time resolved Langmuir probe  
measurements of plasma density in  
electromagnetic shock  
tubes 13 p2149 A66-26243  
Precursor wave structure in  
electromagnetic shock tube, determining  
precursor velocity, electron density and  
current content, comparing precursor  
behavior with ionizing electromagnetic  
wave 13 p2064 A66-26259  
Electromagnetic shock generator of high  
voltage nanosecond pulses with controlled  
length 15 p2466 A66-29697  
Nonstationary flow past spheres and  
cylinders in electromagnetic shock tube,  
determining time required for flow to  
become stationary 16 p2682 A66-31295  
Physical model for ionizing switch-on shock  
wave and electric field situated in  
electromagnetic shock  
tube 17 p2967 A66-32431  
Stark broadening of singly ionized argon  
lines in helium-argon plasma behind  
reflected shock wave in electromagnetic T  
tube with backstrap 18 p3138 A66-34233  
Air flow luminescence front propagation in  
electromagnetic shock tube measured, using  
phase synchronized high-speed  
photography 21 p3790 A66-39080  
Emission spectra of ionized air and H in  
electromagnetic shock tube, giving frame  
scans of spectra 21 p3726 A66-39081  
Electron density distribution in  
electromagnetic shock tube measured, using  
transverse microwave cavity and radiating  
slots in oversize plasma  
waveguide 21 p3739 A66-39382  
Photographic results compared with  
calculations for shock wave reflection  
velocity and wake processes in  
electromagnetic shock  
tube 22 p3957 A66-40578  
Electromagnetic shock generator of high  
voltage nanosecond pulses with controlled  
length  
[ASME PAPER 64-WA/FE-29]  
24 p4157 A66-42580

**ELECTROMAGNETIC WAVE**

**SA RADIO WAVE**

Microwave polarization changes during  
passage through low pressure  
plasma 01 p0110 A66-10371  
Phase shift in electromagnetic waves  
between unmagnetized and magnetized  
ferrite partially filling  
waveguide 01 p0039 A66-10538  
RF electromagnetic and elastic oscillations  
in ferrites 01 p0121 A66-10568  
Coherent nonlinear interaction of two  
electromagnetic waves in plasma, noting F  
layer radio  
communication 01 p0029 A66-10594  
Autocorrelation and spectral density of  
energy of stationary electromagnetic wave

expressed as function of same parameters of  
its component trains of  
waves 01 p1016 A66-10645  
Electromagnetic wave absorption and  
cosmic noise absorption measurements  
useful in radio  
communication 01 p0072 A66-11101  
Electromagnetic wave reflectivity  
coefficients from 1957 to 1963 statistically  
analyzed 01 p0032 A66-11102  
Diffraction of electromagnetic centimeter  
waves passing metal screen depends on  
curvature of screen edge 01 p0032 A66-11200  
Electromagnetic problems in anisotropic  
and compressible plasma solved by  
characterizing compressibility as  
compressivity tensor 02 p0266 A66-11447  
Charged particle motion in field of plane  
traveling wave and acceleration by  
transverse wave 03 p0397 A66-12387  
Reflection and transmission of  
electromagnetic waves by dielectric medium  
moving parallel to and perpendicular to  
interface, determining  
coefficients 04 p0481 A66-13739  
Refractive index obtained from equation  
describing electromagnetic wave propagation  
in ionosphere 04 p0481 A66-13826  
Ray dispersion of electromagnetic waves  
by free electrons produced in cone-shaped  
ionized wake 04 p0481 A66-13843  
Complex output resistance and  
conductivity of electromagnetic cylindrical  
resonators transmitting across gaps, using  
variational method, noting role of incident  
and reflected waves 04 p0496 A66-13905  
Interaction of energetic electrons with  
bounded electromagnetic waves near  
cyclotron resonance, noting plasma  
diagnostics, maser and gain  
mechanism 04 p0530 A66-13953  
Reflection of acoustic /electromagnetic/  
waves from geometrically complex body  
oscillating according to random  
law 04 p0483 A66-14048  
Electromagnetic wave diffraction by  
moving bodies of revolution subjected to  
pulsed radiation when spatial dimension of  
impulse may be less than linear dimension  
of body 04 p0483 A66-14050  
Distortion of electromagnetic pulse after  
propagating through dispersive channel,  
using approximate procedures and obtaining  
transient response 05 p0631 A66-14834  
Analogies of statistical electromagnetic  
wave theory to quantum field theory, noting  
probability density function of waves and  
Green function 05 p0632 A66-14843  
Dispersion theory and multilayer structure  
approximation of IR reflectivity of  
semiconductor with n on n plus stratified  
structure 05 p0736 A66-14965  
Third harmonic component of current  
density in plasma in presence of electric  
and magnetic fields, analyzing generation  
and propagation of third harmonic of  
electromagnetic wave in  
magnetoplasma 05 p0724 A66-15188  
Faraday effect in anisotropic plasma  
treated as fluid with collisions, deriving  
relations for rotation of polarization plane  
and electromagnetic wave  
ellipticity 05 p0727 A66-15531  
Book on radio wave propagation for  
aircraft radio communication including  
frequency ranges, waveguides, ionospheric  
layer influence, noise, antenna properties,  
etc 06 p0832 A66-16520  
Planar gap in plasma medium as idealized  
model for studying electromagnetic and  
plasma waves in plasma sheaths and  
ionospheric layers 06 p0920 A66-17015  
Linear demodulation of AM  
electromagnetic wave propagating through  
dispersive medium 06 p0836 A66-17033  
Intensity distribution of fringe systems  
used to verify phase inversion between two  
lobes of laser in TEM-10  
mode 07 p1043 A66-17453  
Absorption and spontaneous and stimulated  
emission for homogeneous isotropic  
nonferromagnetic Maxwellian media at  
rest 07 p1081 A66-18037  
Electromagnetic theory of waveguides  
including circular and rectangular  
waveguides, mode theory,  
etc 08 p1189 A66-18665

Electromagnetic momentum in relation to  
waveguide modes, discussing relationship  
between momentum transfer and mechanical  
forces 08 p1189 A66-18667  
Text on wavefronts and wave propagation  
in classical electromagnetic theory, general  
relativity, MHD and nonlinear  
electrodynamics 08 p1180 A66-18680  
LF electromagnetic wave excitation in  
electron-ion and electron-hole plasmas  
situated in external electrical  
field 08 p1262 A66-18975  
Electromagnetic waves in optically-inactive  
isotropic semiconducting media bounded by  
vacuum 08 p1276 A66-19609  
Quantum statistical electromagnetic wave  
propagation and relativistic damping effects  
in uniformly magnetized electron-positron  
gas 08 p1187 A66-19809  
Boundary surface roughness effect on  
polarization of thermal electromagnetic wave  
emission from dielectric  
medium 09 p1401 A66-20115  
Formation and expansion of  
electromagnetic shock waves in  
communication lines, using ferroelectric  
crystals 09 p1344 A66-20346  
Computer program for numerical solution  
of uniform hollow waveguides with  
boundaries of arbitrary  
shape 09 p1346 A66-20607  
Combination scattering of UHF  
electromagnetic waves in turbulent plasma  
in external electromagnetic  
field 09 p1347 A66-20767  
Diffraction of plane electromagnetic wave  
at planar array consisting of thin  
rectangular plates 09 p1347 A66-20787  
Inhomogeneous thick plasma layer formed  
above metallic surface, effect on reflection  
and absorption of electromagnetic  
waves 09 p1347 A66-20788  
Electromagnetic wave deflection where  
transmitted power is inherently guided by  
stored energy component, noting effect of  
Sun gravitational  
interaction 10 p1496 A66-21292  
Coherency matrix expression of  
phenomenological Stokes four-vector  
describing intensity and polarization of  
electromagnetic wave 10 p1504 A66-21651  
Electromagnetic wave diffraction around  
finite perfectly conducting  
cone 10 p1506 A66-21924  
Kinetic approximation of passage of  
electromagnetic wave through plasma layer,  
noting angle of incidence of wave on  
layer 10 p1506 A66-21993  
Kinetic theory of passage of  
electromagnetic waves through plasma  
layer 10 p1506 A66-22004  
Amplification of electromagnetic waves in  
solid state plasma in presence of carrier  
drift in external electric and magnetic  
fields 10 p1586 A66-22147  
Aperture field of leaky-wave antenna of  
finite length 11 p1661 A66-22394  
Harmonic wave generation by EM plane  
wave normally incident on collisionless  
plasma with linear density  
profile 11 p1652 A66-22548  
Coupling of ordinary and extraordinary  
electromagnetic waves in CdS induced by  
external magnetic field or  
stress 12 p1926 A66-23719  
Electromagnetic waves in isotropic laminar  
plasma waveguide 12 p1919 A66-23779  
Perturbation method approximation of  
eigenvalue and eigenfunction of fundamental  
wave propagating in H-plane bend of  
rectangular waveguide 12 p1815 A66-23958  
Boundary value problem of acoustic point  
source antenna within compressible plasma  
region with assumed rigid boundary, noting  
acoustic power conversion into  
electromagnetic waves 12 p1920 A66-24116  
Inequality of cross-polarized components of  
electromagnetic wave reflected from plane  
surface for arbitrary angle and arbitrary  
reflector properties 12 p1816 A66-24149  
Behavior of electric field of expanding  
wave in magnetically active  
plasma 12 p1921 A66-24213  
Reflection of resonance frequency  
monochromatic wave from half-space filled  
with nonlinear medium 12 p1816 A66-24226  
Electroexplosive device testing via pulse  
reflection techniques 12 p1934 A66-24674

Charged particle motion in field of plane traveling wave and acceleration by transverse wave 13 p2139 A66-25392

Plane electromagnetic wave diffraction by narrow strip-grating, obtaining reflection coefficient via optical approximation method 13 p2021 A66-25395

Decay of electron Langmuir waves in plasma in presence of magnetic field into electromagnetic waves 13 p2143 A66-25712

Plasma acceleration in circular waveguides in presence of high-power electromagnetic wave 13 p2147 A66-25746

Damping constant of electromagnetic wave in plane parallel waveguide with ferrite resonant isolator, using perturbation theory, considering dielectric and magnetic losses 14 p2250 A66-27143

Dissimilar and analogous characteristics of electromagnetic and gravitational waves 14 p2333 A66-27220

Combination scattering of UHF electromagnetic waves in turbulent plasma in external electromagnetic field 14 p2236 A66-27302

Cross section method to solution of diffraction of electromagnetic wave at inhomogeneous sphere, using membrane function 14 p2239 A66-27736

Electromagnetic wave reflection and transmission coefficients for moving dielectric slab as function of velocity of medium 14 p2239 A66-27761

Radiation characteristics of vertical dipole in warm plasma, expressing vector potential functions in Fourier integrals 14 p2240 A66-27916

Permanent magnetized ferrite antenna waveguide windows for improving EM wave transmission through plasma and reducing transmission losses during reentry 14 p2241 A66-27930

Energy propagation lines in diffraction of vertically polarized electromagnetic wave by conducting half-plane shield 14 p2241 A66-27939

Nonlinear interaction between two modulated electromagnetic waves propagating in homogeneous anisotropic Lorentz plasma 14 p2344 A66-27941

Electromagnetic waves in isotropic plasma layer and in plasma layer in magnetic field, determining second harmonics of wave and obtaining nonlinear dispersion equation 14 p2348 A66-28470

Reflection, transmission and absorption coefficients of circularly polarized electromagnetic wave incident on plasma layer situated in stationary magnetic field 14 p2348 A66-28471

Ultrasonic-electromagnetic wave interaction in metals including resonance effects from waves arising in external magnetic field, determining Fermi levels 15 p2559 A66-28621

Excitation of longitudinal electron plasma oscillations by nonlinear resonance of two TEM waves with frequencies differing by plasma frequency 16 p2757 A66-30195

Interplanetary plasma stream analysis using bistatic radar transmissions, considering wave propagation in presence of uniform magnetic field, stream velocity, Faraday rotation, etc 16 p2801 A66-30716

Diffraction of axisymmetric electromagnetic wave at surface discontinuity of impedance cylinder forming core of coaxial waveguide 16 p2861 A66-30864

Ionospheric sounding using random diffusion of electromagnetic wave by ionospheric plasma with continuous wave through two separate antennas 16 p2653 A66-30953

Electromagnetic spectrum of upper atmosphere examined, using microwave techniques, noting molecular rotation of gases with permanent electric or magnetic dipole moments 16 p2698 A66-31044

Quasi-linear approximation of Cerenkov and cyclotron damping of electromagnetic waves in magnetoactive plasma, considering collisions of wave-absorbing resonance particles with plasma 16 p2762 A66-31173

Classification of modes in electromagnetic waveguides using model solutions of source-free homogeneous wave equation 16 p2663 A66-31204

Plasma plate and cylinder oscillation

compatibility with radiation from positive argon column at four discrete frequency bands and low pressure 17 p2962 A66-31815

Density and diameter of inhomogeneous plasma cylinder determined from numerical calculation of diffraction of electromagnetic wave 17 p2963 A66-31843

Plane electromagnetic wave diffraction at two parallel circular cylinders for TM and TE polarization 17 p2879 A66-31862

Nonlinear conversion of HF transverse electromagnetic waves into plasma ion-acoustic oscillations 17 p2964 A66-31897

Reflection of acoustic /electromagnetic/ waves from geometrically complex body oscillating according to random law 17 p2873 A66-32214

Electromagnetic wave diffraction by moving bodies of revolution subjected to pulsed radiation when spatial dimension of impulse may be less than linear dimension of body 17 p2873 A66-32216

Computer-derived contour plots of electric and magnetic fields for acoustic electromagnetic plane wave pulse incident on wedge 17 p2875 A66-32390

Plasma motion and confinement in octupole magnetic field, noting electron temperature density and field fluctuation 17 p2966 A66-32428

Electromagnetic waves in optically-inactive isotropic semiconducting media bounded by vacuum 17 p2983 A66-33123

Dual mode frequency discriminator for microwave source frequency stability, discussing application of beam waveguide resonator 17 p2895 A66-33274

Diffraction of linearly polarized electromagnetic wave by coaxial cylinders, deriving approximate solution for wavelengths smaller than distance between cylinder centers 18 p3068 A66-33977

Coupled electromagnetic and electroacoustic wave propagation in inhomogeneous compressible plasma 18 p3069 A66-34089

Kinetic approximation of passage of electromagnetic wave through plasma layer, noting angle of incidence of wave on layer 18 p3072 A66-34970

Plasma half-space impedance for diffusive electron reflection from plasma vacuum boundary, noting damping decrement of surface electromagnetic wave, electric field Fourier components and absorption capacity 18 p3151 A66-35065

Amplification of electromagnetic waves in solid state plasma in presence of carrier drift in external electric and magnetic fields 19 p3440 A66-35761

Design principles of waveguide systems applicable to electromagnetic wave transmission by reflection and refraction 19 p3319 A66-36033

Bending of plane electromagnetic waves around elliptically ideally conducting cylinder of infinite length and around parallel circular dielectric cylinder, with solution as Mathieu-type series 19 p3303 A66-36064

Kinetic theory of passage of electromagnetic waves through plasma layer 19 p3303 A66-36088

Absorption of polarized electromagnetic waves at zero degrees K in n-type germanium under high uniaxial stress 19 p3446 A66-36396

Propagation constants of quasi-transverse electric modes measurement in cylindrical waveguide partially filled with anisotropic plasma 20 p3525 A66-37116

Absorption coefficients for monomers of water vapor and oxygen for various altitudes, noting seasonal variation 20 p3511 A66-37133

Electromagnetic wave propagation in plasma boundary, considering electron collision with boundary, noting role of thermal velocities of electrons 20 p3512 A66-37137

Fourier series solution to electromagnetic wave diffraction on metallic gratings with anisotropic dielectric 20 p3512 A66-37148

Radiation from open-ended circular waveguide, comparing solution for electromagnetic wave propagation with method based on Huygens principle 20 p3529 A66-37705

Absorbing materials used in construction of anechoic chambers for electromagnetic waves 20 p3543 A66-37724

Complex output resistance and conductivity of electromagnetic cylindrical resonators transmitting across gaps, using variational method, noting role of incident and reflected waves 20 p3532 A66-37863

Electromagnetic wave emission excited by electron stream over diffraction grating lying on boundary of semiinfinite anisotropic dielectric 20 p3519 A66-37998

Reflection and transmission of EM waves by dispersive dielectric cold plasma 20 p3611 A66-38394

Energy transport by electromagnetic waves, using successive approximations 21 p3770 A66-38946

Charged particle and electromagnetic wave interaction with nonequilibrium plasma, noting conversion of transverse into longitudinal waves and angular distribution of scattered radiation 21 p3781 A66-39011

Electromagnetic wave excitation in magnetoplasma by external currents using kinetic theory, obtaining expression for energy losses, analyzing electron and ion cyclotron resonance 21 p3782 A66-39016

Plasma-particle interaction in absence of magnetic field, leading to electrostatic and transverse electromagnetic waves instability 21 p3783 A66-39025

Scattering and transformation of electromagnetic waves during critical fluctuations in nonequilibrium plasma 21 p3789 A66-39065

Birefringence of certain crystals sufficiently large to allow collinear backward wave interaction of three electromagnetic waves with signal frequency tunable over large portion of IR spectrum 21 p3771 A66-39113

Externally imposed oscillating electric field excites transverse electromagnetic waves propagating perpendicular to it in cold plasma 21 p3791 A66-39176

Velocity dependent collision frequency effect on harmonic generation in ionized gas through which electromagnetic wave passes 21 p3792 A66-39180

Exact solution for transverse electromagnetic wave in plasma with diffuse boundary, noting reflection and transmission coefficients 22 p3952 A66-39719

Passage of normal plane electromagnetic wave through bi-gyrotropic plate, examining transmission and reflection components 22 p3862 A66-39828

Diffraction of plane electromagnetic wave at planar array consisting of thin rectangular plates 22 p3862 A66-39846

Inhomogeneous thick plasma layer formed above metallic surface, effect on reflection and absorption of electromagnetic waves 22 p3862 A66-39847

Vacuum sheath effect on surface currents excited on plasma-immersed cylinder by EM and EK plane waves 22 p3954 A66-39940

Behavior of electric field of expanding wave in magnetically active plasma 22 p3957 A66-40577

Reflection of resonance frequency monochromatic wave from half-space filled with nonlinear medium 22 p3867 A66-40588

Fresnel formulas for transformation of transverse electromagnetic wave into longitudinal plasma wave at dielectric-plasma interface, using Laplace transforms 22 p3869 A66-40929

Modified Fock function for current distribution in penumbra and shadow region of plane electromagnetic wave incident upon convex cylinder, with application to backscattering 23 p4040 A66-41637

Power conversion enhancement of acoustic-electromagnetic wave coupling across plasma-air boundary by suitable thickness and charged particle density 24 p4241 A66-42304

Line shape of RF dimensional effect in metals showing correlation with electromagnetic wave attenuation in skin layer 24 p4172 A66-42528

Dispersion equation for cyclotron electromagnetic waves for magnetoactive plasma injected with charged particles 24 p4245 A66-43016

Textbook reissue on diffraction of

electromagnetic and acoustic waves at open end of waveguide studied, using Wiener-Hopf-Fock factorization method 24 p4177 A66-43225

# ELECTROMAGNETISM

Intermediate text on fields and waves in communication electronics covering basic equations, oscillating systems, transmission lines, waveguides, microwave circuits, etc 01 p0031 A66-10977

Soviet and other literature on diurnal variations of cosmic ray intensity used for analysis of electromagnetic conditions in outer space 06 p0949 A66-16587

Text on electromagnetic theory for undergraduates 08 p1256 A66-19234

Comparative determination of HF electrical discharge threshold in electromagnetic system 09 p1349 A66-19852

Superfluid hydrodynamics and kinetic theory of superfluids, noting relation of macroscopic concepts of Bardeen-Cooper-Schrieffer theory to microscopic characteristics 09 p1415 A66-20006

Radio waves and circuits - URSI Conference, Tokyo, September 1963 11 p1653 A66-22626

Book on principles of antenna design, discussing fundamental laws of electromagnetism, Maxwell equations and practical forms 19 p3312 A66-35311

Book on foundations for microwave engineering 22 p3875 A66-39993

Approximate differential operator replacing integral operator, taking ionization losses into account in electromagnetic cascade theory 24 p4269 A66-42923

# ELECTROMECHANICAL DEVICE

Tape recorders of flight parameters, tabulating characteristics of ten instruments 01 p0071 A66-11072

Gyrator circuit with only three transistors designed by providing active feedback path so that circuit behaves like two-way feedback system 02 p0201 A66-11908

Reliability, life and relevance of circuit design in electromechanical switching devices 06 p0839 A66-15946

Electromechanical correction of vibrometric devices, using Lagrange-Maxwell method for refining expressions 06 p0879 A66-16421

Metal-insulator-piezoelectric semiconductor electromechanical transducer, discussing transistor and transducer operation characteristics 06 p0883 A66-16960

Capacitive biasing transducer is electromechanical analog of parametric system 06 p0860 A66-17199

Hytrol electronic/hydraulic antiskid braking system for automatic braking pressure modulation in BAC one-eleven 400 series aircraft 07 p0992 A66-18165

Two-port network representations derived for general linear magnetic and electric field transducers, showing energy conversion leading to nonlinear relationships and applications to DC motor 08 p1224 A66-19298

Reliability, life and relevance of circuit design in electromechanical switching devices 12 p1831 A66-23791

Theoretical behavior and frequency response of electrohydraulic valve-controlled cylindrical vibrator capable of high thrust over wide frequency range 12 p1803 A66-23798

Torsional-coupler mechanical filters, particularly types with higher harmonic suppression and piezoelectric material, utilized with simple structure 12 p1845 A66-24852

Frequency characteristics of bending vibrations of bounded rods with electromechanical feedback, possibility of artificially attenuating resonance vibrations and conditions for self-excitation 13 p2194 A66-25088

Characteristics and application of electromechanical switches 13 p2043 A66-26313

Nonstructural materials for space utilization including lubricants, sliding electrical contacts and dielectrics 14 p2319 A66-28006

Relay design by statistical methods 15 p2460 A66-28995

Ten-inch stroke electrodynamic thruster, noting modifications in armature guidance,

base, rotation system, trunnion lifting mechanism, etc 16 p2678 A66-30464

Computer system for control of deceleration of electrodynamic shaker during vibration test 16 p2678 A66-30465

Pulse energy and release energy dependence on electrical and mechanical parameters of magnetoelectrically driven electromechanical timing devices 17 p2928 A66-33499

Coupling of resonators in electromechanical filter, noting application of energy trapping in piezoelectric resonators 18 p3078 A66-34090

Block program testing on fatigue testing machines, noting modifications introduced and operational results 18 p3259 A66-34893

Capacitive biasing transducer is electromechanical analog of parametric system 19 p3356 A66-35557

Quasi-static processes in energy conversion statics, deriving stability criteria 19 p3281 A66-36293

Electropneumatic transducer using principle that heating moving gas increases velocity 19 p3362 A66-36811

Miniaturized piezoresistive transducer pressure diaphragm for experimental stress analysis 20 p3559 A66-37501

Strain gauge technology in U.S.A. emphasizing organization, education and performance 20 p3559 A66-37506

Frequency characteristics of bending vibrations of bounded rods with electromechanical feedback, possibility of artificially attenuating resonance vibrations and conditions for self-excitation 21 p3822 A66-38513

# ELECTROMECHANICS

Effect of poor surface finishes on existence of electromechanical effect in germanium 01 p0124 A66-10773

Effect of poor surface finishes on existence of electromechanical effect in germanium 11 p1749 A66-22284

Vibration constant of electromechanical transformation in electrodynamic vibrators 13 p1997 A66-25079

Electromechanical effects of ferroelectric crystals based on thermodynamic theory 18 p3153 A66-33630

# ELECTROMETER

SA GALVANOMETER  
Electrometer using temperature-autostabilizing nonlinear dielectric element as receiver 02 p0230 A66-11815

Constant current sources consisting of sealed ionization chambers for calibrating electrometers 19 p3357 A66-35809

# ELECTROMOTIVE FORCE

## SA PONDEROMOTIVE FORCE

Inhomogeneity distribution in single crystal semiconductor considering specific resistance and carrier lifetime and using volume gradient photoelectromotive force values 01 p0124 A66-10763

Variation in thermoelectromotive force and magnetoresistance in quantizing magnetic field in indium antimonide semiconductor, considering electron spin and conduction band nonparabolicity 01 p0124 A66-10770

Photo-emf of germanium in presence of surface recombination rate gradient 02 p0277 A66-12089

Temperature dependence of heat conductivity and thermal emf in n-type InP 02 p0277 A66-12094

Thermoelectric emf related to entropy in quantizing magnetic field in semiconductor with polyellipsoidal conduction band 04 p0564 A66-14252

Emf induced by plasma moving across constant transverse magnetic field used to determine rate of flow behind shock wave in shock tube 04 p0557 A66-14434

Photo emf effect calculated at p-n junction of crystal photodiode 08 p1268 A66-18696

Method of induced emf and integral antenna equation 08 p1197 A66-19605

P-type cadmium tin arsenide crystals, plotting temperature dependences of specific electroconductivity, Hall coefficient and thermal electromotive force 08 p1277 A66-19622

Thermal conductivity and emf of gallium arsenide at low temperatures, showing phonon drag effect 08 p1278 A66-19626

Resistance temperature dependence, Hall

constant, thermal emf and Hall mobility of silicon with phosphorus

impurities 08 p1278 A66-19772

Random nonuniformities effect on measurements of thermal emf and Nernst coefficient in strong magnetic field 09 p1412 A66-19982

Magnetophonon fluctuation of thermal emf of n-InSb in longitudinal magnetic field 09 p1412 A66-19985

Hall effect, thermal emf and electrical conductivity of SmS in temperature range 300 to 1000 degrees K 09 p1412 A66-19988

Anisotropy of balanced photoelectromagnetic emf in p-type germanium sample in which normal to illuminated surface coincides with crystallographic axis 09 p1413 A66-20002

Inhomogeneity distribution in single crystal semiconductor, considering specific resistance and carrier lifetime by using volume gradient photoelectromotive force values 11 p1748 A66-22274

Variation in thermoelectromotive force and magnetoresistance in quantizing magnetic field in indium antimonide semiconductor, considering electron spin and conduction band nonparabolicity 11 p1749 A66-22281

Electric conductivity and thermal emf of solid solutions of silicon-germanium with near silicon composition and various current-carrier concentrations and test temperatures 12 p1929 A66-24454

Thermocouple emf, noting pressure dependence and effects of contamination, plastic deformation, electrical shunting, temperature gradients, etc 13 p2076 A66-25042

Thermocouple emf pressure dependence measured for Chromel/Alumel and platinum/platinum-10 percent rhodium and platinum/platinum-13 percent rhodium 13 p2076 A66-25073

Photo emf of gallium arsenide determined as function of temperature, light intensity, external electric field and surface quality 13 p2165 A66-25679

Emf amplitude and phase for pumping and resonant circuit current calculated for inductive parametron 14 p2252 A66-27251

Entropy and heat of formation of lead telluride determined by emf temperature coefficient measurement 14 p2369 A66-28330

Input impedance of small loop of uniform electric current immersed in anisotropic cold magnetoplasma calculated by induced emf method 15 p2548 A66-28593

Surface charge sign effect on capacitor photoelectromotive force in semiconductors and photoinduced contact potential change 15 p2559 A66-28628

Direct measurement procedure for Hall emf semiconductor samples of circular shape 16 p2777 A66-30868

Thermal emf of metallic liquid couples measured as function of thermal difference between junctions and alloys composition, noting correlation between thermodynamic and thermoelectric properties of alloys 16 p2781 A66-31410

Photo emf variation with radiation power of Q-switch ruby laser incident on silicon crystal with p-n junction 17 p2978 A66-32509

Longitudinal Faraday emf, thermoelectric and Hall effects on channel flow of ionized gas 17 p2972 A66-32868

P-type cadmium tin arsenide crystals, plotting temperature dependences of specific electroconductivity, Hall coefficient and thermal electromotive force 17 p2984 A66-33136

Thermal conductivity and emf of gallium arsenide at low temperatures, showing phonon drag effect 17 p2984 A66-33140

Gold and silver doping effect on Hall effect, electroconductivity thermal emf and conductivity of CdSb 17 p2984 A66-33145

Emf expressions for substrate and gate transconductances of MOS transistor 18 p3077 A66-34074

Effect of partial substitution of silicon, germanium and lead for tin on thermal emf and thermoconductivity of solid solutions of tin telluride 20 p3612 A66-37123

Conductivity, temperature dependence, thermal emf Hall constant, thermal conductivity and resistivity of aluminides of transition metals 20 p3584 A66-37417

Quantum oscillation of transverse and longitudinal magnetothermal emf in n-type indium antimonide compared with oscillations of transverse and longitudinal magnetoresistance and Hall coefficient 20 p3618 A66-37557

Electric conductivity and thermal emf of solid solutions of silicon-germanium with near silicon composition and various current-carrier concentrations and test temperatures 20 p3619 A66-37686

Liquid junction cell design, noting equation integration for ideal diffusion potential and salt effects potential for heteroionic junctions of uniform ionic strength and cation concentration 20 p3502 A66-38188

Thermodynamics of molten lithium nitrite galvanic cell, noting emf temperature dependence 20 p3503 A66-38189

Effective electron mass dependence on pressure in InSb determined by measuring electron concentration and thermal emf 20 p3624 A66-38427

Effective electron mass dependence on pressure in InSb determined by measuring electron concentration and thermal emf 21 p3800 A66-38960

Distribution of capacitive photo-emf over surface of semiconductor determined by measuring value created by scanning surface of sample with narrow modulated-light beam 22 p3965 A66-40316

Faraday unipolar induction in solid cylinder of nonideal type II superconductor, noting contributions to observed emf 23 p4114 A66-41629

Electrical properties of barium plumbate noting conductivity, Hall field, thermoelectromotive force, magnetization, etc 24 p4253 A66-42382

**ELECTROMYOGRAM**

Electromyography signals to control external power based upon pattern recognition [ASME PAPER 65-WA/HUF-3] 05 p0628 A66-15700

**ELECTRON**

SA CONDUCTION ELECTRON

SA FAST ELECTRON

SA FREE ELECTRON

SA HIGH ENERGY ELECTRON

SA HOT ELECTRON

SA PHOTOELECTRON

SA PHOTON-ELECTRON INTERACTION

SA POSITRON

Intensity and spectra of cosmic ray electrons and positrons in determining mean confinement time, density and solar modulation 20 p3630 A66-37303

**ELECTRON ACCELERATOR**

Nonstationary processes measurement method in semiconductor devices by linear electron accelerator 01 p0035 A66-10189

Drain currents from iron and copper ion accelerator electrodes of ion engine as functions of cesium flux, temperature, voltage difference and oxygen pressure [AIAA PAPER 64-686] 03 p0416 A66-12782

Parameter perturbations of magnet and accelerating systems of electron synchrotron determined from position of center of gravity of beam 13 p2147 A66-25747

Elastic electron scattering cross sections for titanium relative to C and Be measured, using linear electron accelerator 14 p2337 A66-27795

Microtron principles, parameters and application, including comparison with other accelerators 14 p2347 A66-28308

Plasma heating rate in stochastic electric fields determined, using nonrelativistic collisionless lossless test particle 17 p2967 A66-32436

Electron-cyclotron heating of plasma via high power oscillator, noting experimental setup and characteristics 18 p3151 A66-35068

Single-wave approximation of fields of cylindrical delay system with basic E-type wave propagating at variable phase velocity 20 p3515 A66-37381

Energy distribution of trapped electrons producing solar microwave impulsive radio bursts and X-ray bursts from Sun 20 p3634 A66-38213

Magnetospheric tail instabilities, auroral electron acceleration and deformation due to dipole magnetic field acceleration of plasma particles 20 p3635 A66-38222

Acceleration of high energy electrons by means of Parker-Wentzel version of Fermi mechanism due to geometry and distorted structure of interplanetary magnetic field near magnetopause in transition region 22 p3972 A66-40003

**ELECTRON ATTACHMENT**

Ambipolar diffusion and electron attachment in photoionized nitric oxide by presence of negative ions, noting electron loss and electron density 03 p0394 A66-12326

Electron attachment and detachment coefficients for pure oxygen determined from current waveforms in drift tube 18 p2130 A66-25374

Dielectric constant obtained by bound electron theory is not distinguished from one obtained by warm plasma theory when considering main resonance and related phenomena 16 p2758 A66-30277

Gas pressure dependence of attachment and recombination coefficients for thermalized electrons in air and oxygen 18 p3143 A66-34035

Positive electron affinity of tungsten determined by evaporation of positive and negative ions from incandescent tungsten surface 20 p3605 A66-38247

**ELECTRON AVALANCHE**

HF noise from electron avalanches and relation to mechanism of cold cathode arc 04 p0502 A66-14480

Electron collision-ionization avalanches in cadmium sulfide crystal due to electric field intensities 04 p0570 A66-14489

Electron avalanches in anode and cathode directed streamers detected by high-gain image intensifier and streak shutter 08 p1263 A66-19079

One-dimensional small signal analysis of negative resistance in p-n junctions under avalanche breakdown conditions 10 p1586 A66-22083

Small-signal impedance of space-charge region of p-n junctions under avalanche breakdown conditions, using realistic physical assumptions 10 p1586 A66-22084

Metallurgical junction radius of curvature effect on avalanche breakdown voltage in Ge, Si, GaAs and GaP spherical and cylindrical p-n junctions 22 p3959 A66-39740

Avalanche breakdown voltage of quasi-planar/circular cylindrical/silicon junction and relation to increased electric field intensity in curved portion 22 p3959 A66-39741

**ELECTRON BEAM**

SA BEAM-PLASMA AMPLIFIER

SA BRILLOUIN FLOW

Electron beam pumping of noble gas ion laser 01 p0081 A66-10350

Charge trapped in electron or ion beams at pressures below breakdown determined from general integro-differential equation, using approximation 01 p0111 A66-10375

Potentialities of cylindrical plasma structures considering electron beam interaction and microwave devices, noting dispersion of waveguide containing plasma 01 p0039 A66-10526

Conventional periodically loaded waveguides with ferrimagnetic materials used in devices involving traveling wave interaction with electron beam 01 p0025 A66-10533

Electric wave growth and amplification in electron beam interaction with plasma in microwave amplifier, noting longitudinal inhomogeneity 01 p0112 A66-10588

Density distribution before sphere in low density hypersonic gas flow measured with electron beam 01 p0059 A66-10635

RF electric field in electron beam/plasma interaction measurement, using nonperturbing probing technique 02 p0265 A66-11432

Electron beam generating plasma in tube aligned with magnetic field, measuring plasma density, beam velocity distribution and RF noise spectrum 02 p0266 A66-11442

Flow visualization technique by thin high-energy electron beam moved with respect to flow 02 p0215 A66-11550

Plasma diagnostics by relativistic electron beam consisting of separate electron clusters emitting ultrashort electromagnetic

waves 03 p0396 A66-12291

Line structured pattern by vidicon tube and beam control logic 03 p0337 A66-12438

Electron beam-hot plasma interaction at low frequencies, explaining cesium discharges and gas noise 03 p0398 A66-12539

Harmonic generation in double beam system in presence of magnetic field 03 p0404 A66-12981

Harmonics in cylindrical electron beams traveling in circular drift tube and velocity-modulated by gridless buncher gap 04 p0491 A66-13421

Harmonics of electronic gyro-magnetic high-frequency in spectrum of two-electron beam collision 04 p0550 A66-13473

Electron beam-plasma interactions used to predict occurrence of amplifying waves having growth rates maximizing near to electron plasma frequency 04 p0552 A66-14036

Semiconductor and dielectrics for generation of coherent short-wave radiation, using electron beam for excitation 04 p0568 A66-14346

Penetration of external longitudinal electric field into semibounded plasma containing electron beam in absence of instabilities in system 04 p0556 A66-14416

Dispersion equation for LF electronic oscillations in electron beam Maxwell collision-free plasma 05 p0722 A66-14722

Frequency oscillation role as drift waves excited during interaction of electron beams with plasma, made impossible by ion transverse motion 05 p0722 A66-14723

Metal surface structure, semiconductors and dielectric films analyzed, using image orthicon technique for data on work function, electron reflection coefficient and electric resistance 05 p0621 A66-15578

Negative depression coefficient in traveling wave tubes at small helix parameters and different radii for helix and electron beam 06 p0838 A66-15901

Electromagnetic waves from plasma penetrated by pulsed electron beam in magnetic field 06 p0914 A66-16147

Thin film deposition by electron-beam and glow-discharge activation of various gaseous ambients 06 p0848 A66-16302

Cold quasi-neutral beams focusing in electromagnetic fields 06 p0916 A66-16347

Traveling wave characteristics of Cerenkov interaction studied by circular waveguide with electron beam flow 06 p0850 A66-16441

Space-charge wave propagation on nonuniform drifting electron beam explained, using coupled mode theory 06 p0855 A66-16767

Coupled monotron analysis of band-edge oscillations in high power traveling wave tubes, discussing electron beam interaction with coupled-cavity structure 06 p0855 A66-16768

Cyclotron harmonic amplification of wave propagation in electron beams and plasmas with internal motions in presence of static magnetic field 06 p0920 A66-17013

Energy levels and optical transitions between them which give rise to optical gain in injection lasers, examining use of PbTe and electron beam-pumping techniques 07 p1041 A66-17327

Electron beam acceleration by means of toroidal systems in which equilibrium of beam in annular orbit is achieved by image currents in metallic coating of vacuum chamber 07 p1085 A66-17648

Nonlinear effects of induced scattering of oscillations of plasma particles, examining influence on dynamics of beam instabilities 07 p1086 A66-17649

Mirror ratio is principal parameter controlling heating of plasma by electron beam in magnetic mirror system 07 p1090 A66-18260

Plasma formation during unstable electron beam passage through air, argon and hydrogen in magnetic field, determining plasma density, oscillation frequency and amplitude 08 p1263 A66-19176

Time dependent frequency spectra variations of plasma oscillations induced by electron beams during instability onset 08 p1263 A66-19177

Effective compensation of perturbation

- effects in three-turn helical magnetic field, using combinations of two-turn and perpendicular stationary magnetic fields 08 p1264 A66-19178
- Cerenkov radiation in circularly symmetrical waveguide filled with uniform dielectric in presence of flowing modulated electron stream 09 p1351 A66-20258
- Nonlinear TWT equations simplified for computing finite modulation of electron beam relative to velocity 09 p1357 A66-20778
- Mirror ratio is principal parameter controlling heating of plasma by electron beam in magnetic mirror system 09 p1409 A66-20904
- Interaction of primary unmodulated beam of electrons and plasma in magnetic field 10 p1559 A66-21349
- Coherent radiation effect on stability of crossed field electron beam, noting raising of potential of space vehicle 10 p1564 A66-21544
- Radiated power from modulated electron beam passing near diffraction grating surface 10 p1557 A66-21567
- Electron beam/nonisothermal plasma interaction and nonlinear stabilization of beam instability 10 p1569 A66-21973
- Forced emission from electron-excited cadmium selenide 10 p1544 A66-22174
- Oxidation of artificial graphitic carbon 14 oxidized to carbon 14 dioxide in presence of nonsterile soils, noting inhibition of biological activity by electron beam irradiation 11 p1649 A66-22304
- Cold quasi-neutral beams focusing in electromagnetic fields 11 p1743 A66-22346
- Coupling impedance of thin hollow electron beam injected into magnetic field and rippling at cyclotron frequency in cylindrical waveguide carrying Eo1 mode 11 p1661 A66-22395
- Thin nonrectilinear electron beam interaction with electromagnetic field of waveguide transmission line 11 p1655 A66-22723
- Raster magnification effect of moire images to observe plane deformation in specimens subjected to impact 11 p1782 A66-22857
- Density variation in Ar shock waves during translational adjustment for Mach 5 to 10 velocity range, using electron beam techniques 11 p1691 A66-22915
- Shock front density distributions in Ar and He determined in shock tube, using electron beam attenuation 11 p1691 A66-22916
- Electron beam measurement of shock wave thickness used to determine limits of validity of Navier-Stokes equations 11 p1691 A66-22917
- Flat plate in hypersonic flow analysis in shock tunnel, obtaining surface pressure, using electron beam densitometer 11 p1634 A66-22931
- Electron beam pumped lasers, discussing energy dissipation in fast electrons passing through crystal, laser semiconductor characteristics, etc 11 p1715 A66-23433
- Monograph on microwave frequency space-charge waves in electron beams including electron-wave oscillators, resonators and magnetrons 12 p1813 A66-23740
- Fresnel zone beam scanning antenna array, considering patterns, maximum scan ability and effect of interelement spacing 12 p1841 A66-24633
- Partial dislocation detection in silicon, using scanning electron beam technique 13 p2159 A66-25069
- Ion cyclotron instabilities in bounded cold beam-plasma system, noting growth rate parameters, instability conditions, etc 13 p2138 A66-25190
- Electron-beam-controlled CRT scanlaser 13 p2091 A66-25557
- Detection and analysis of oscillations excited in electron beam and plasma as result of interaction, noting frequency spectrum, phase velocities, etc 13 p2146 A66-25745
- Strength and plasticity of some electron beam melted niobium alloys in cast and annealed specimens 13 p2110 A66-25886
- Parametric amplifier design using transverse interaction and electrostatic focusing of electron beam 13 p2042 A66-26048
- Stimulated emission from electron beam excitation of tellurium and pure and n-type doped indium antimonide in semiconductor lasers 13 p2099 A66-26179
- Q-switched lasers, interaction of high power light pulse with matter and semiconductor lasers pumped with optical radiation and electron beams investigated, using quantum oscillator and amplifier 13 p2099 A66-26180
- Excitation in electron beam pumped /EBP/ GaAs lasers including electron scattering, energy dissipation pattern, phonon emission, pair production, etc 13 p2099 A66-26181
- Vacuum deposited films of titanium dioxide examined, using electron microscopy and diffraction methods, noting crystal dislocation due to electron beam irradiation 14 p2359 A66-27133
- Spurious X-band output signals observed during interaction of dual reflex klystron cavities and klystron beams 14 p2258 A66-27956
- Semiconductor and dielectrics for generation of coherent short-wave radiation, using electron beam for excitation 14 p2368 A66-28242
- Electrostatic and magnetic pinch effects in electron beam-generated plasmas 15 p2549 A66-28717
- Electron beam analyzer for determining crossed field space charge beam analyzer 15 p2549 A66-28719
- Decay of space-charge waves as due to ballistic or free-streaming process in electron beam with velocity spread 15 p2550 A66-28724
- Single crystal germanium films grown on molybdenum or tungsten substrates, using electron beam zone melting process 15 p2563 A66-28726
- Focusing of long cylindrical electron beam by means of short-period permanent magnet or long-period reversed field magnet 15 p2467 A66-29709
- Multivelocity stream effects and efficiency of slow-cyclotron wave amplifiers, noting electron velocity spread which decreases predicted efficiency 15 p2467 A66-29711
- Shock wave thicknesses and density ratios measured in helium, argon and nitrogen, using electron beam fluorescence method at various Mach numbers in wind tunnel 15 p2480 A66-29736
- Rotational distribution function of flowing nitrogen in low density wind tunnel using electron beam fluorescence 15 p2481 A66-29737
- Rotational energy distribution through shock waves in nitrogen measured, using electron beam fluorescence 15 p2481 A66-29738
- Small-signal energy conservation theorem for one-dimensional multivelocity electron beam according to Boltzmann and multistream descriptions 15 p2467 A66-29755
- Nonlinear diffusion equations in electron beam excited plasma noting two- and three-body recombination, radial distribution of electron density, light intensity, etc 15 p2555 A66-29761
- Electromagnetic waves from plasma penetrated by pulsed electron beam in magnetic field 15 p2557 A66-29877
- Injection of helical electron beams into magnetic mirror trap, examining plasma lifetime, density and electron and ion energies produced 16 p2755 A66-30092
- Energy transfer measurements in gas-sold surface interactions initiated by electron beam-excited photoemission 16 p2701 A66-30397
- Unscanned large area uniform electron beams for space /Starfish/ radiation environmental studies, using magnetic quadrupole pair and beam collimation 16 p2676 A66-30443
- Metal film preparation by electron-beam melting of metal in water-cooled crucibles 16 p2661 A66-30693
- Excitation of backward Doppler shifted cyclotron radiation in magnetoactive plasma by electron stream 16 p2761 A66-30921
- Semiconductor lasers with high power efficiency obtained via electron beam excitation on crystals of mixed cadmium-sulfide-selenide alloy 16 p2720 A66-31533
- Transport of AC disturbance /emission noise/ on electron beams magnetically compressed in microwave tubes, deriving power flow invariants 17 p2878 A66-31819
- Interaction of modulated high current pulsed electron beams with plasma in longitudinal magnetic field 17 p2963 A66-31826
- Longitudinal wave excitation in modulated electron beam interacting with plasma 17 p2963 A66-31830
- Emission of electromagnetic waves by electron flux moving inside ring waveguide 17 p2874 A66-32248
- Plasma bremsstrahlung power derived for relativistic, nonrelativistic and electron beams 17 p2965 A66-32256
- Convective excitation of ionic oscillations in plasma by inhomogeneous electron beam as result of spatial gradient of distribution function 17 p2968 A66-32537
- Response of finite relativistic beam plasma system to small disturbances analyzed, using coupled Vlasov-Maxwell equations 17 p2970 A66-32640
- Cylindrical electron beam behavior in axial, monotonically increasing magnetic field, noting compression, percentage scalloping, etc 17 p2887 A66-32696
- Ideal and perturbed focusing conditions effect on spread of immersed flow beam 17 p2971 A66-32821
- Plasma oscillation theory of nonlinear deceleration effect and thermal conversion of electron beams upon passage through plasma 17 p2974 A66-33284
- Laser based on excitation of gallium phosphorus arsenide solid solution by beam of fast electrons 17 p2937 A66-33304
- Vibrational and rotational nonequilibrium flow effects in hypersonic conical nozzle expansion of nitrogen flows and airflows 17 p2842 A66-33478
- Wave coupling and generation of gyromagnetic half-frequency harmonics in double electron-beam system 18 p3142 A66-33911
- Plasma stabilization mechanism for electron beam caused density variation, noting use of nonlinear effects 18 p3152 A66-35082
- Forced emission from electron-excited cadmium selenide 19 p3441 A66-35788
- Nonaccelerated electron beam envelope trajectory equation reformulated and solved allowing for finite emittance, space charge and self-magnetostatic forces 19 p3319 A66-36170
- Collective interactions of charged particle beams with plasma produced by electron beam, noting power loss of electron beam coincides with power of HF oscillations caused by interaction 19 p3416 A66-36524
- Plasma equilibrium in torus with HF fields and plasma heating caused by beam of escaping electrons, measuring plasma density, time-dependent plasma luminescence, etc 19 p3424 A66-36558
- Electron beam interaction with plasma in mirror magnetic fields and heating of plasma components under beam instability, noting oscillation spectrum and thermal energy 19 p3430 A66-36586
- Plasma stability, density, energy, etc, resulting from electron beam/plasma interaction which excites microwave oscillations, creating microwave discharge 19 p3430 A66-36587
- Langmuir current-density limit derived for differing axial and radial electron beam temperatures in high-resolution image devices 20 p3524 A66-36899
- Reversible property of Vlasov equation describing thermalization of electron beam in plasma and Landau damping, noting entropy is constant in nonlinear approximation 20 p3608 A66-37460
- Pulsed operation of electron-beam pumped zinc oxide laser emitting radiation in UV at very low temperatures, noting importance of use of cavity 20 p3579 A66-37768
- Electron beam rotation experiments on linear spiratron with M-type electron gun 20 p3533 A66-38005
- Electron beam scanlaser based on laser cavity directly and/or transversely degenerate having Q-spoiled for all modes but one 20 p3581 A66-38244
- Crossed-field electron beam stability for

- arbitrary values of Q /ratio of plasma frequency to cyclotron 20 p3606 A66-38404
- Electron beams from duoplasmatron using hollow cathode arc, noting current density distributions 20 p3606 A66-38406
- Electron gun with voltage drop across cathode using space charge streams for M-beam generation 21 p3710 A66-38833
- Electron beam interaction with plasma in magnetic field, obtaining stronger interaction when beam has initial modulation 21 p3782 A66-39018
- Plasma generation by electron beam with developing instability, noting plasma parameters 21 p3782 A66-39019
- Longitudinal and transverse electric fields in electron beam due to interaction with plasma, showing that both fields are components of same wave 21 p3782 A66-39020
- Characteristics of efficient semiconductor lasers in UV portion of spectrum obtained at both liquid helium and nitrogen temperatures, using pulsed electron beam excitation on ZnS 21 p3747 A66-39114
- Preferential formation of peaks of single-crystal silicon and germanium samples exposed to short-duration electron beam 21 p3801 A66-39117
- Electron beam flow visualization study of density field about skimmer entry in small free jet 21 p3727 A66-39186
- Instability of three-component plasma system studied to analyze beam-plasma interaction, noting restraining effect of electrons on instability of beam-ion coupling 21 p3792 A66-39188
- Electron beam/nonisothermal plasma interaction and nonlinear stabilization of beam instability 21 p3794 A66-39552
- RF behavior of one-dimensional plasma in electrical circuit analog with coupled resonant circuits representing normal modes 22 p3884 A66-39816
- Nonlinear TWT equations simplified for computing finite modulation of electron beam relative to velocity 22 p3873 A66-39837
- Electron beam density measurements, discussing effect of elevated rotational and vibrational temperatures 22 p3918 A66-40365
- Spectroscopic electron beam diagnostic technique, examining negligible effect elevated vibrational temperatures have on measured rotational temperatures of molecular nitrogen [AIAA PAPER 66-747] 22 p3919 A66-40633
- Gas ionization by fast electron beam directed along waveguide leading to longitudinal distribution of secondary electron concentration 22 p3958 A66-40938
- Nonsymmetric oscillations in plasma in magnetic field arising from electron beam passage through plasma, deriving dispersion equation 22 p3958 A66-40939
- Thin nonrectilinear electron beam interaction with electromagnetic field of waveguide transmission line 23 p4037 A66-41461
- Flow visualization via afterglow produced in pure low temperature nitrogen and air by electron beam projection 23 p4058 A66-41911
- Density and temperature measurement in base region flow field of clustered rocket model, using electron beam technique 24 p4210 A66-42200
- Quantitative fast response visualization technique for low density flow fields based on electron beam fluorescence probe 24 p4210 A66-42201
- ELECTRON BEAM WELDING**
- Electron beam welding as production process using Steigerwald or telefocus system, Rogowski system or special Rogowski system 02 p0236 A66-11700
- Electron beam welding with particular reference to fixture design, weld preparation, field of application, advantages and limitations 02 p0236 A66-11869
- Nonvacuum electron beam welding technique as fabricating technique for production welding 05 p0685 A66-14513
- Electron beam welding for in-space welding of spacecraft and space stations noting welding modes, power requirements, environmental influences, etc 06 p0888 A66-17072
- Electron beam machines for thermal milling, noting factors influencing size of heat affected zones such as current density, lens aberration, temperature rise, etc 11 p1710 A66-22700
- Electron beam welding of high-strength titanium alloy propellant tank for third stage of ELDO carrier rocket and determination of optimum welding parameters 12 p1885 A66-23783
- Focused energy techniques for joining, including laser welding [ASTME PREPRINT AD66-718] 12 p1886 A66-24413
- Chemical milling of columbium reentry vehicle skin panels using powdered metallurgy, vacuum processing, refractory alloy sheet rolling and electron beam welding [ASTME PREPRINT MR66-712] 12 p1886 A66-24417
- Porosity at weld fusion zone-base material interface in gas tungsten-arc and electron beam welds of tantalum 13 p2110 A66-26018
- Electron beam heating of alloy specimen and liquid-nitrogen cooled anvils for rapidly cooling it 13 p2084 A66-26560
- Vacuum and nonvacuum electron beam welding 16 p2713 A66-30593
- Welding characteristics of four advanced commercial columbium base alloys using gas tungsten arc and electron beam processes 16 p2725 A66-31437
- Electron beam welding in partial vacuum 19 p3362 A66-35325
- Applicability of electron beam welding techniques for in-space welding and maintenance, examining fabrication of typical aerospace joints 19 p3363 A66-35951
- Electron beam welding suitable for joining tungsten sheet for fabrication of solid rocket nozzles and nozzle accessories 19 p3369 A66-36128
- Electron beam welding of maraging steel, noting tensile test results on efficiency, defect formation, region of fracture nucleation, etc 19 p3371 A66-36632
- Sciaky electron beam welding equipment applications, including joining lengths of tubing for nuclear reactor 21 p3743 A66-38670
- Electron beam welding of aircraft turbine gears 21 p3744 A66-39233
- Gas turbine compressor rotor and power shaft fabrication using electron beam welding 22 p3924 A66-40258
- Electron beam welding outside of vacuum, discussing performance and tolerance parameters 22 p3924 A66-40261
- Electron beam welding and application to aerospace industry, noting basic weld joint configurations 22 p3925 A66-40268
- Plasma electron beam gun at rough vacuum pressures for welding ferrous and aluminum alloys 22 p3925 A66-40270
- Nonvacuum electron beam welding compared with vacuum process, noting effect of voltage, distance, speed, etc, in aerospace applications 22 p3925 A66-40271
- Analog and digital controls used in electron beam welding and metal working machinery including electron beam milling machine 24 p4217 A66-42345
- ELECTRON BOMBARDMENT**
- SA SECONDARY EMISSION
- Transition and bremsstrahlung spectrum from measurement of energy dependence on visible and UV radiation emitted from electron bombarded Ag targets 01 p0108 A66-10195
- Laser transition identification in electron beam pumped gallium arsenide, primarily on concentration of shallow donors and acceptors 01 p0081 A66-10348
- Equivalence of stress and electron-irradiation induced defects in degenerate p-n germanium junctions as indicated in similar voltage-anneal characteristics 04 p0562 A66-13751
- Power transistors used for stabilization of emission current of electron bombardment ion source for mass spectrograph 04 p0498 A66-14037
- Luminescence decay of electron bombarded CdS, measuring time constants 05 p0737 A66-15173
- High pressure thermionic converter, discussing current-voltage characteristics at high collector temperatures 05 p0616 A66-15545
- Elastic differential scattering of helium ions discussing energy analysis, geometry and target particle motion effects, and interference phenomena 05 p0719 A66-15767
- Optical properties of spacecraft temperature control coatings under simulated geomagnetically trapped electron bombardment [AIAA PAPER 65-137] 05 p0706 A66-15792
- Four-lobed rosette stress patterns in X-ray topography of silicon bombarded by electron beam 06 p0928 A66-16761
- Hall effect and conductivity measurements of carrier removal rate in oriented specimens of n-type Si under electron irradiation at energies from 0.3 to 2.0 mev 06 p0930 A66-17049
- Radiation damage in silicon and germanium semiconductors 06 p0932 A66-17112
- Metastable defect annealing in germanium by bombardment with short pulse of high-energy electrons from Van de Graaff generator 06 p0932 A66-17115
- Lattice vacancies and interstitials in II-VI compounds of cadmium sulfide and zinc selenide caused by electron bombardment often determine advantages or limits of material 06 p0935 A66-17130
- Proton and electron bombardment induced defects in GaAs studied by examining spectral composition and intensity of proton and cathode luminescence 06 p0936 A66-17135
- Semiconducting properties of electron irradiated silicon carbide 06 p0936 A66-17138
- Anisotropy of electron displacement energy in silicon specimens by measuring changes in net carrier concentration caused by steady monoenergetic electron irradiations 06 p0939 A66-17152
- Isolated vacancy interstitial pairs produced in ZnSe lattice by electron bombardment at low temperature 06 p0939 A66-17153
- Nature and yield of photon and neutron induced defects in semiconductors determined from changes in electrical properties 06 p0939 A66-17154
- Excitation of semiconductor lasers by beam of fast electrons, discussing work of Shockley, Popov, Keldysh and Krokhin 07 p1043 A66-17337
- Spectral distribution of luminescence excited in n-type GaAs and p-type GaP by fast-electron bombardment 07 p1096 A66-17339
- Spectral distribution of recombination radiation observed in various samples of GaAs irradiated by electron beam 07 p1043 A66-17340
- Laser action achieved in n-type indium antimonide excited by 15-kv electron beam at 20 and 4 degrees K 07 p1043 A66-17341
- Laser emission in pure cadmium sulfide crystals bombarded by electron beams 08 p1233 A66-18650
- Electric resistivity change in Pt produced by electron bombardment 08 p1275 A66-19364
- Impurity-photoconductivity spectra of silicon single crystals containing lithium and arsenic impurities 09 p1413 A66-19999
- Hysteresis nature of current-voltage characteristics observed in p-n junctions obtained by bombarding germanium crystals with fast electrons 09 p1413 A66-20001
- Electric propulsion in 1965, discussing electron bombardment and contact ionization thrusters, nuclear and solar-electric power systems, etc 09 p1434 A66-20246
- Electric propulsion systems development, discussing ion beam neutralization, nuclear power sources, contact ionization engine, etc 09 p1434 A66-20248
- Line intensities of first negative bands of nitrogen molecular ion measured as function of bombarding electron energy and gas pressure 09 p1404 A66-20377
- Plasma oscillation of electrons in Be, Mg, Al, Si, Ge, Sn, Sb and Bi studied by electron bombardment of thin foil of these solids 09 p1429 A66-20842
- Lunar X-ray detectability, noting generation by solar wind electron bombardment and flux intensity 09 p1459 A66-20885
- Ionizing role of photon radiation in gas thermionic converter, noting experimental results and application to solar energy

converters, tubular emitter converters, etc 09 p1405 A66-20923  
 Plasma measurements in cesium electron bombardment ion engine indicate that reversed cathode-anode configuration improves radial ion distribution [AIAA PAPER 66-246] 10 p1593 A66-21455  
 Ion thruster, including mercury feed system and shielded neutralizer, designed and tested for spacecraft station keeping and attitude control [AIAA PAPER 66-247] 10 p1593 A66-21456  
 Electron bombardment ion thrusters with two accelerator-grid systems for producing ion beams in directions 180 or 90 degrees apart [AIAA PAPER 66-248] 10 p1593 A66-21457  
 Life testing of electron-bombardment cesium ion engine designed for power-to-thrust ratio of 160 kw/lb [AIAA PAPER 66-233] 10 p1594 A66-21701  
 Ionization currents in diamond exposed to pulsed excitation and to applied pulsed electric field 10 p1586 A66-22144  
 Durability test of mercury electron-bombardment ion thrusters, measuring lifetime, output, power efficiency, etc [AIAA PAPER 66-231] 11 p1760 A66-22218  
 Electron impact ionization cross section of H<sup>2</sup>s/ and H<sup>2</sup>p/ in Born A, Born B, Born-Dechurk and classical approximations 11 p1738 A66-22498  
 Emission spectra of nitrogen excited by electron beam of 0.1 to 20 keV and oxygen and air bombarded by 13-keV electrons 11 p1740 A66-23040  
 Length changes and conductivity variations in electron irradiated n-and p-type germanium, noting methods of measurement, effects of isochronic annealing at liquid helium and nitrogen temperatures 12 p1926 A66-23717  
 Electron bombardment thrusters using liquid mercury cathodes, noting lifetime, propellant and power efficiency, feed system, temperature limits, etc [AIAA PAPER 66-232] 13 p2172 A66-25172  
 Design of gravity-independent force-fed liquid-metal cathode providing unlimited cathode life in gas discharge devices and mercury electron-bombardment thrusters [AIAA PAPER 66-245] 13 p2106 A66-25175  
 Measurement of total cross section for excitation of metastable atoms of helium by electron bombardment 13 p2135 A66-26266  
 Superradiance in n-type gallium arsenide at room temperature excited by electron beam 14 p2306 A66-27028  
 Laser oscillations in CdSe and CdS bombarded by fast electron beam 14 p2306 A66-27031  
 Lifetime measurement for minority carriers injected into germanium by electron bombardment 15 p2567 A66-29409  
 Model of discharge in electron bombardment thrusters noting mechanism and interplay between discharge plasma and cathode [AIAA PAPER 66-244] 16 p2791 A66-31153  
 Combination of point counting and electron microprobe techniques in mineralogical planimetric integration analysis 16 p2707 A66-31196  
 Number transmission coefficients for isotropically incident electrons determined for spacecraft shield design [AIAA PAPER 66-511] 16 p2811 A66-31497  
 Photoconductivity spectra and kinetics of p-and n-type germanium crystals bombarded by fast electrons at 5.2 and 100 degrees K 16 p2788 A66-31776  
 Additional measurements from electron-magnetic field interactions and power limitations in coaxial filament and anode geometry in electron bombardment heated thruster 17 p2990 A66-32462  
 Fluorescence bands produced by electron bombardment of ZnSe show threshold of annealing stages of radiation damage 17 p2985 A66-33154  
 Electron bombardment ion thrusters and electrostatic accelerators, discussing electrode geometry and composition and electrode erosion 17 p2991 A66-33233  
 Electrostatic ion drives technology problems, discussing gaseous discharge ion sources, duoplasmatron and electron bombardment ion

generator 17 p2991 A66-33234  
 Recrystallization of Ge and Si thin films and structural changes due to electron bombardment and thermal annealing 17 p2988 A66-33456  
 Probability of atomic excitation by electron bombardment 18 p3143 A66-34033  
 Transition radiation in optical region of spectrum for case of oblique incidence of nonrelativistic electrons on metal surface 19 p3399 A66-35593  
 Comparison of electromagnet and permanent magnet versions of electron bombardment cesium ion engine [AIAA PAPER 65-373] 19 p3450 A66-35617  
 Ionization currents in diamond exposed to pulsed excitation and to applied pulsed electric field 19 p3440 A66-35758  
 Catastrophic failures in glass diode packages and integrated circuit chips exposed to high-intensity electron pulse 19 p3318 A66-35920  
 Dissociation of hydrogen molecules by electron impact, using first-order exchange approximation and separated atoms approximation 19 p3403 A66-36328  
 Visible and UV transition radiation, bremsstrahlung and plasma due to electron bombardment of metal surfaces 20 p3604 A66-37280  
 Minority carrier trapping centers introduced by irradiation of n-type germanium analyzed, particularly effect of donor species on production, recovery and annealing of defects 20 p3623 A66-38408  
 Thermal conductivity change in single crystal InSb irradiated with electrons, noting additive thermal resistivity increases 24 p4249 A66-42228  
 Radiative recombination in annealed electron irradiated zinc doped gallium arsenide 24 p4250 A66-42229  
 Electron paramagnetic resonance and Hall effect measurements to determine properties of dominant paramagnetic defect in electron irradiated p-type silicon 24 p4250 A66-42230  
 Electron irradiation effect on resistivity of epitaxial layers of Si and on lifetime of ordinary samples 24 p4258 A66-43008  
**ELECTRON BUNCHING**  
 Electron pitch distribution anomaly as observed by Cosmos V satellite, noting possible causes of phenomenon 09 p1378 A66-21009  
 Electron injection and E-layer buildup in Astron device theoretically studied by one-dimensional model, using Green functions for self-electric and self-magnetic fields 19 p3423 A66-36552  
**ELECTRON CAPTURE**  
 Capture and recombination levels in CdS single crystals examined from photoconductivity analysis 02 p0277 A66-12087  
 Spin-orbit coupling and electron-affinity determinations from radiative capture of electrons by oxygen atoms 04 p0547 A66-13641  
 Electrical behavior of microplasmas for determination of density and energy level of capture sites induced by radiation in silicon single crystals 04 p0566 A66-14320  
 Cadmium sulfide and cadmium selenide recombination centers, discussing temperature dependence of electron capture cross sections 05 p0731 A66-14661  
 Captured electron drift from trap with spatially periodic helical magnetic field, using time variable 06 p0919 A66-16879  
 Electron capture and hole capture by impurity atoms due to radiative transitions in silicon and germanium 07 p1095 A66-17323  
 Thermal ionization of small traps in cubic piezoelectric 07 p1105 A66-18377  
 Cathodic depolarization theory of bacterial corrosion, using Desulfovibrio desulfuricans with benzyl viologen as electron acceptor 11 p1647 A66-22303  
 Injection of plasma blobs into mirror trap and subsequent compression of plasma by increasing magnetic field, using longitudinal current, noting X-ray radiation 12 p1925 A66-24877  
 Measurement of cross section for excitation of cesium atom by electron impact in prethreshold energy region, using electron trap method 12 p1925 A66-24878

Monte Carlo calculations of cross section magnitude of electron-positive-molecular-ion dissociative recombination 13 p2130 A66-25375  
 Cadmium sulfide and cadmium selenide recombination centers, discussing temperature dependence of electron capture cross sections 13 p2168 A66-25936  
 Rate of dissociative electron capture by heavy molecular ions developed in semiclassical formalism 13 p2136 A66-26271  
 Impurity photovoltaic effect in cadmium sulfide, noting radiative enhancement of spectral response upon illumination with green light 15 p2561 A66-28709  
 Static properties and interactions of neutrinos noting mass, spin, helicity, charge, lepton number, etc 15 p2546 A66-29582  
 Temporary capture of charged particles in static magnetic bottle, based on resonant perturbations and Stoermer neck 16 p2760 A66-30588  
 Electron capture detector parameters in pulse sampling mode analyzed, noting kinetic processes, temperature effect, etc 17 p2961 A66-32660  
 Electron collection from VLF receiving antennas and plasma-density probe on board FR-1 satellite, using cathode-grid device 22 p3876 A66-40162  
 Injection of plasma blobs into mirror trap and subsequent compression of plasma by increasing magnetic field, using longitudinal current, noting X-ray radiation 23 p4099 A66-41084  
 Measurement of cross section for excitation of cesium atom by electron impact in prethreshold energy region, using electron trap method 23 p4099 A66-41085  
**ELECTRON CLOUD**  
 Electron cloud drifting axially outside conducting toroidal cylinder in presence of radial electric and azimuthal magnetic fields 08 p1260 A66-18545  
**ELECTRON COLLISION**  
 Velocity dependence effect of electron collision frequency on electromagnetic wave interaction with anisotropic plasma 01 p0028 A66-10570  
 Mean electron density and collision frequency determined from radio noise absorption, average electron drift velocity and magnetic disturbance intensity observations 01 p0065 A66-11167  
 Electron recombination in monoatomic ionized gas expanding symmetrically into vacuum, particularly triple collisions with electron capture on upper atomic level 02 p0264 A66-11383  
 Electron collision cross sections of atoms and molecules of argon, helium, nitrogen and dissociation products of carbon dioxide by dual beam radiosonde methods to study low temperature plasma behind shock front 02 p0268 A66-11780  
 Third harmonic current in plasma due to velocity-dependent collision frequency of electron 03 p0401 A66-12954  
 Harmonics of electronic gyro-magnetic half-frequency in spectrum of two-electron beam collision 04 p0550 A66-13473  
 Rate of electron-ion recombination by collision of two electrons in ion field obtained by Thomson formula, noting recombination rate of three-body collision 04 p0550 A66-13710  
 Book on lower ionosphere physics noting radio wave propagation, ionospheric currents, solar radiation and flares, ion kinetics, electron collision frequencies, etc 04 p0515 A66-13835  
 Hard X-ray emission during few half-cycles of theta pinch discharge before breakdown explained by bremsstrahlung of free accelerated electrons colliding with tube wall 04 p0555 A66-14326  
 Coulomb collision effect on transverse electron oscillations in fully ionized hot plasma determined by Fokker-Planck equation 05 p0721 A66-14715  
 Consistent-field Monte Carlo method used to calculate electron and ion diode characteristics, including effect of collisions 05 p0616 A66-15539  
 Plasma conductivity as function of Larmor electron frequency and mean electron-atom collision interval in transverse magnetic field of argon and mercury

plasma 06 p0918 A66-16835  
 Scattering and conversion cross section for inhomogeneous plasma in presence of electron collision 07 p1084 A66-17529  
 Excitation cross sections of helium lines in electron-atom collisions 07 p1044 A66-17874  
 Theoretical performance of idealized infinitely segmented MHD generator with potassium-seeded argon working fluid under nonequilibrium electron heating, using energy dependent electron collision cross sections 07 p0993 A66-18312  
 Current driven instabilities slowed down by increasing electron-ion collisions in configurations with sheared magnetic fields 08 p1260 A66-18539  
 Electron loss rate dependence on internal excitation and deactivation processes in F region ion-molecule reactions 08 p1218 A66-19405  
 Field harmonics of HF plasma discharge, taking nonlinear interaction into account 09 p1407 A66-20349  
 Breakdown of theta pinch in helium at high initial densities without preionization 09 p1408 A66-20422  
 Weak collisions effect on ion waves instability in cesium plasma solved via linearized Fokker-Planck equation 10 p1568 A66-21823  
 Solid state amplifiers using streaming carriers analyzed, noting different role played by collisions when electron stream interacts with TM and TEM waves 10 p1584 A66-22072  
 Contribution of electron-electron correlations to longitudinal dielectric constant for case of one-component plasma, noting resonance effect and formula for plasma oscillation damping 11 p1744 A66-22446  
 Effective electron collision frequency from electron temperature profile for ionospheric heating in F region 11 p1697 A66-22499  
 Perturbation theory determination of third harmonic current density generated in plasma by AC field for velocity-dependent plasma 12 p1924 A66-24593  
 Electron-atom collision studied, using helium-neon laser to obtain energy transitions between excited states 13 p2137 A66-25106  
 Collisionless nonlinear coupling of electromagnetic waves near electron gyrofrequency by plasma electrons 13 p2145 A66-25734  
 Seaton formulas used to determine when gas is collision-dominated 14 p2337 A66-28115  
 Average diffusion cross section for elastic collisions of electrons with heavy particles, comparing calculated and measured values 15 p2551 A66-29225  
 Ionospheric absorption effects in D and E layers, noting refraction role and effective collision frequency 15 p2493 A66-30036  
 Electron-atom collision studied, using helium-neon laser to obtain energy transitions between excited states 16 p2758 A66-30285  
 Intergalactic matter temperature parameters such as heating by cosmic ray ionization, dissipation of hydrodynamic turbulence, inelastic electron collision with H, He and He-ions 17 p2996 A66-31912  
 Collisional Stark broadening in RF discharges, noting large ion and electron broadening contribution 17 p2960 A66-31921  
 Electric conductivity in low voltage atmospheric pressure gas discharge, noting Maxwellian electron density distribution 17 p2968 A66-32484  
 Excitation cross sections of cesium in collisions with slow electrons 17 p2989 A66-33507  
 Steady state distribution functions for photoexcited carriers in semiconductors bands determined by competition between intraband intercarrier collisions and recombination processes 18 p3154 A66-33919  
 Collision cross sections and energy scattering of atoms with slow electrons 18 p3137 A66-34024  
 Charge ratio of cosmic ray electrons, examining excitation of baryon resonances in high energy collisions with no exchange of isospin 18 p3193 A66-34850  
 Iron and nickel lines in solar UV spectrum, abundance of various metallic elements in

solar atmosphere, electron collision cross sections and oscillator f-values of electron transitions 18 p3237 A66-35050  
 Cosmic radio wave absorption dependence on frequency and number of electron-ion collisions during atmospheric magnetic storms 19 p3344 A66-35267  
 Excitation of lithium-like ions by electron impacts, with computation of cross sections for resonance and nonresonance transitions 19 p3409 A66-36326  
 High energy cross sections for electron excitations of excited hydrogen atoms in which principal quantum number is changed by 2 19 p3409 A66-36327  
 Ionosphere as anisotropic dissipative medium where charged particles random thermal motion acts as thermal radiation source, noting relation between driven AC conduction current density and applied AC electric field intensity 19 p3352 A66-36630  
 Electromagnetic wave propagation in plasma boundary, considering electron collision with boundary, noting role of thermal velocities of electrons 20 p3512 A66-37137  
 Electron concentrations and effective frequencies for electron collisions with neutral particles in atmospheric gases in shock wake 21 p3726 A66-39085  
 Electron-collision-induced magnetoplasma instability, using Boltzmann equation for wave dispersion 21 p3794 A66-39571  
 Electron-ion recombination process due to electron collision in plasma with capture electrons transferred to ground level 22 p3954 A66-39767  
 Excitation cross sections of cesium in collisions with slow electrons 24 p4249 A66-42122

## ELECTRON DECAY TIME

Effect of satellite size on electron lifetime in artificial belt, causing charged particles in radiation belts to decay at surface 10 p1596 A66-21052  
 Lifetimes of low energy electrons in outer radiation belt at magnetically quiet times 12 p1938 A66-24120  
 Decay of electron Langmuir waves in plasma in presence of magnetic field into electromagnetic waves 13 p2143 A66-25712  
 Transient behavior of energetic electrons in artificial radiation belts analyzed via satellite observations 20 p3643 A66-38341  
 Electron and neutral atom densities in helium and argon afterglow plasma obtained by two helium-neon laser interferometers, noting temporal dependence of electron decay 23 p4101 A66-41364

## ELECTRON DENSITY

SA IONOSPHERIC ELECTRON DENSITY  
 SA MAGNETOSPHERIC ELECTRON DENSITY  
 Laser interferometer to measure time and spatial variation in repetitively pulsed plasma 01 p0079 A66-10243  
 Radiative transfer equation for isothermal model of solar corona, noting radiation flux and electron density variation 01 p0131 A66-10267  
 Electron concentration, length and temperature of limb chromospheric flare, using steady state equation of hydrogen atom 01 p0131 A66-10270  
 Electron density, collision frequency and electron drift velocity obtained from plasma column interaction with electromagnetic wave on physically separated helix 01 p0025 A66-10537  
 Brush cathode used in abnormal glow region, determining features of produced plasma 02 p0196 A66-11429  
 Plasma resonance modifications in magnetic field used for electron density finding 02 p0265 A66-11434  
 Ionospheric, auroral and geomagnetic observation at Syowa Base, Antarctic 02 p0222 A66-11684  
 Transformation of metal into dielectric by application of magnetic field to shift band boundaries 02 p0274 A66-11734  
 Oscillations of electron-ion plasma in external electric field assuming uniformly accelerated motion of plasma components 02 p0268 A66-11784  
 Electron energy and momentum dissipation in n-type InSb at low temperatures, discussing collision effects on hot electron

escape 02 p0276 A66-12079  
 Plasma electron concentration measured by Fabry-Perot interferometer partially filled with gas-discharge plasma and incorporating ruby laser 03 p0375 A66-12294  
 Ambipolar diffusion and electron attachment in photoionized nitric oxide by presence of negative ions, noting electron loss and electron density 03 p0394 A66-12326  
 Electron-ion recombination in photoionized nitric oxide neon gas mixture, noting decay of electron density and correlation factors 03 p0394 A66-12327  
 X-ray spectrum of plasma electrons after passage through plane layers of obstacle immersed in plasma, setting up equations for electron energy and density 03 p0397 A66-12392  
 Fabry-Perot resonators compared with cavity resonators and microwave interferometers for plasma diagnostics, noting electron density application 03 p0398 A66-12525  
 Resonance probe noting HF voltage to excite plasma oscillation for electron density 03 p0403 A66-12971  
 Equilibrium electron density of RF discharge excited with frequency higher than electron-neutral collision frequency and controlled by resonance from plasma dispersion 03 p0405 A66-12986  
 Space shift between electron density and luminous intensity of plasma in stationary striation by microwave resonator 03 p0372 A66-13282  
 Spatial distribution and temporal decay of electron and atom concentrations in pulsed /argon afterglow/ plasma measured with laser interferometer 04 p0551 A66-13741  
 Magnetic resonance applied to semiconductors, determining electron density at nucleus sites and kinetic energy temperature of hot electrons in indium antimonide 04 p0563 A66-14030  
 Plasma electron concentration, using nonlinear light scattering on geometrical optical path 04 p0554 A66-14295  
 Quantum effects in theory of space charge layer in semiconductors, noting electron and hole density 04 p0570 A66-14366  
 Ratio of ionospheric electron to ion temperature determined independently of spectral measurements, using electron density data obtained with topside sounder 04 p0517 A66-14374  
 Finite discharge-coil length effect on axial behavior of theta pinch plasma column determined from time and space-resolved electron densities 04 p0558 A66-14496  
 Reflected shock waves in helium and argon plasmas noting electron density, Saha equations and Newtonian technique 05 p0720 A66-14505  
 Thomson scattering measurements of magnetic annular shock tube plasmas using Q-switched ruby laser light beam 05 p0660 A66-14707  
 Fractional deviation of nose whistler group delay from zero-temperature model, assuming Maxwellian magnetosphere and gyrofrequency electron density distribution 05 p0631 A66-14836  
 Computer calculation of relative populations of atomic energy levels not in thermodynamic equilibrium 05 p0718 A66-14871  
 Electron density fluctuations in turbulent wake, using stochastic analysis and statistical averaging [AIAA PAPER 65-818] 05 p0606 A66-15187  
 Plasma measurements including temperatures, electron density, current density, etc, noting behavior of probes in magnetic fields 05 p0726 A66-15247  
 Electron density variation effect on Doppler shift of satellite signal reflections from ionization irregularities in ionosphere 05 p0634 A66-15265  
 Electron density and pressure in solar atmosphere from growth curve with Stark effect of Fraunhofer lines 05 p0765 A66-15420  
 Estimation in equilibrium state surface potential and distributions of electric potential field and electron density in vicinity of object moving in ionized medium 05 p0685 A66-15795  
 Semiconductor cathode thermionic emission

- solving simultaneously Boltzmann and Poisson equations relating field intensity with electron concentration 06 p0838 A66-15892  
 Measurement of electron density of gas discharge plasma by laser interferometer 06 p0916 A66-16379  
 Electron density measurement using plasma resonance excited by swept frequency signal 06 p0917 A66-16759  
 Electron concentration and temperature distribution in argon DC arc measured with hot wire probe 06 p0918 A66-16834  
 HF electrodeless discharge in argon and krypton at high pressure noting energy adiation losses, electron density and plasma temperature 06 p0919 A66-16873  
 Time dependent ambipolar diffusion waves, solving electron density equation 07 p1088 A66-17951  
 Anomalous densities of states in normal tantalum and niobium 09 p1417 A66-20029  
 Electron density in gas-discharge attenuator with hollow cathode 09 p1358 A66-20811  
 Microwave reflection measurements for precursor in electromagnetically driven shock tube, discussing axial distribution and electron density 09 p1409 A66-20855  
 Hydrogen ion concentration, electron density and proton gyrofrequency determined from proton whistler dispersion 10 p1528 A66-21140  
 Plasma electron density as function of radius compared with ion cyclotron heating theory and stability criteria AIAA PAPER 66-158] 10 p1560 A66-21423  
 Microwave cavity techniques to measure electron precursors in shock tube AIAA PAPER 66-175] 10 p1560 A66-21427  
 Criterion of electron-heavy particle thermal nonequilibrium encountered in subsonic arc jet plasma at pressure of 1 atm AIAA PAPER 66-192] 10 p1562 A66-21438  
 Radial distributions of number density, electron temperature and plasma potential measured in electrodeless discharge, using symmetric and asymmetric double probes AIAA PAPER 66-194] 10 p1562 A66-21440  
 Single and double Langmuir probe for low density plasma, noting measurement of electron temperature and density 10 p1535 A66-21514  
 Ionization phenomena in argon due to laser radiation by measuring electron density and energy as time function after laser pulse initiation at different gas pressures and preionized conditions AIAA PAPER 66-176] 10 p1565 A66-21690  
 Electron density and temperature measured in exhaust of magnetoplasma dynamic /MPD/ source, using Langmuir probe and spectrometry AIAA PAPER 65-298] 10 p1594 A66-21780  
 Loss rates of charged particles from chemically-heated discharges in C-Stellarator, showing confinement time parameters 10 p1568 A66-21825  
 Gunn effect oscillations in high resistivity gallium arsenide cease when product of conduction electron density and sample length drops below certain level 10 p1585 A66-22076  
 Temperature and electron concentration in RF induction discharge argon plasma investigated by optical method 11 p1745 A66-22585  
 Electron concentration in AC carbon arc determined from H-beta linewidth 11 p1748 A66-23416  
 Coefficients of space charge effects for growing oxide films, derived from perturbation treatment, evaluated in terms of boundary concentrations of diffusing species 12 p1811 A66-23624  
 Computer method for determination of distribution of low lying ionization, using ordinary and extraordinary wave traces in monograms 12 p1873 A66-24838  
 Rapid electron-density oscillations on axis of imploding plasma annulus with radial oscillations 13 p2137 A66-25055  
 Silicon-silicon dioxide interface charge density in MOS structure 13 p2161 A66-25197  
 X-ray spectrum of plasma electrons after passage through plane layers of obstacle immersed in plasma, setting up equations for electron energy and density 13 p2139 A66-25398  
 Electron irregularity size and motion in interplanetary medium determined from radio source scintillation phenomena 13 p2182 A66-25571  
 Electron density and temperature in decaying hydrogen plasma determined, using monochromator 13 p2145 A66-25730  
 Electron density and temperature of hydrogen plasma determined from intensity of spectral line and continuum in region adjacent to line 13 p2145 A66-25733  
 Radiative energy losses for charge moving in magnetoactive plasma with random electron density inhomogeneities 13 p2148 A66-26038  
 Electron density at large distances from Sun determined by photoelectric measurements during total solar eclipse of July 20, 1963 13 p2187 A66-26134  
 Electron density calculations in solar corona to distance of 16 radii from center of solar disk 13 p2187 A66-26135  
 Cross section for inelastic scattering of electromagnetic radiation by electron density fluctuations in anisotropic solids, using laser sources, investigating Landau and collision damping of plasmons 13 p2132 A66-26153  
 Helium-neon gas laser used to determine electron density variation, spatial and temporal, in afterglow of Z-pinch in H at 100 mtorr 13 p2104 A66-26239  
 Surface electron density in magnetoplasmas and microwave reflection from anisotropic plasma surface 13 p2149 A66-26241  
 Precursor wave structure in electromagnetic shock tube, determining precursor velocity, electron density and current content, comparing precursor behavior with ionizing electromagnetic wave 13 p2064 A66-26259  
 Time resolved electron density measurements with microwave interferometer used in weak afterglow plasma diagnostics 13 p2083 A66-26556  
 Propagation of circularly polarized plane electromagnetic waves through helium plasma along direction of static magnetic field, determining electron density 13 p2154 A66-26672  
 Hyperfrequency interferometer measurement of plasma profile and electron density 14 p2290 A66-26821  
 Laser beam techniques for study of plasmas with high electron densities 14 p2305 A66-26822  
 Electron density in shock-produced argon plasma measured by microwave reflection probe 14 p2340 A66-27025  
 Ultrasonic flux effect on electrons in semiconductor with charged impurity centers 14 p2358 A66-27086  
 Beryllium diffusion into gallium arsenide in /111/ plane with various electron concentrations through vacuum deposition 14 p2358 A66-27087  
 Resonance peaks due to electromagnetic scattering by argon plasma jet observed during change in electron concentration, noting dependence of scattering on argon flow rate and electric power of arc 14 p2341 A66-27151  
 Laser radiation to determine electron density in dense high temperature plasma 14 p2374 A66-27507  
 Association rate between solar flares and type II bursts 14 p2376 A66-27798  
 Quantum effects in theory of space charge layer in semiconductors, noting electron and hole density 14 p2369 A66-28265  
 Electrostatic probe measurements of velocity displacement and electron density of plasma using laser compared with measurements using microwave interferometer 14 p2346 A66-28269  
 Waveguide system using Chebyshev filters for channel separation in wide frequency ranges, applied for sounding plasmas with various electron concentrations 14 p2298 A66-28473  
 Electron density in laser-induced spark in air determined, measuring simultaneously fundamental laser wavelength and second harmonic 15 p2512 A66-28685  
 HF magnetic fields within homogeneous plasma sheath measured as function of plasma parameters and perpendicularly superimposed static magnetic field, noting resonance of electron cyclotron wave 15 p2549 A66-28708  
 Outer solar corona during declining portion of solar activity cycle, noting discrepancy between radio and optical values of electron density 15 p2593 A66-28816  
 Perturbations caused by cylindrical body in plasma, obtaining electric field and electron and ion concentration dependences on distance 15 p2595 A66-29086  
 Statistical equilibrium of fundamental particles at elevated temperatures, determining degeneration parameters 15 p2618 A66-29645  
 Electrical discharge in air, mercury vapor and nitrogen, using RF signal probe, determining electron density and temperature and random velocity in plasma 15 p2548 A66-29715  
 Plasma perturbation by large probe, determining electron density and temperature and plasma potential as function of distance from probe 15 p2555 A66-29754  
 Plasma electron density and formation determined, using Fabry-Perot resonator 16 p2756 A66-30104  
 Mars atmosphere models based on Mariner IV occultation deriving electron number density, temperature, pressure, mass density, etc, noting carbon dioxide presence 16 p2800 A66-30713  
 Rocket borne ionospheric direct sounding instruments to measure ion and electron density, electron temperature, thermal electron energy distribution and space electric potential versus rocket potential 16 p2705 A66-30819  
 Activation energy and corresponding concentration of unknown donor level in n-type gallium arsenide 16 p2777 A66-31002  
 Scattering of electromagnetic waves in plasma, noting effect of eddy current fluctuations 16 p2654 A66-31179  
 Perturbation of electron density at large distances from body at high velocity in collisionless plasma under steady external magnetic field 16 p2782 A66-31181  
 Sigma-type phase occurrence in austenitic superalloys, discussing electron/atom density, residual matrix composition, etc 16 p2725 A66-31456  
 Electron density distribution in titanium carbide determined by X-ray techniques 16 p2786 A66-31678  
 Exact determination of electron density distribution in finite anisotropic plasma by integral equation relating tangential electric field and HF plasma current 16 p2787 A66-31691  
 Superconductivity of nondegenerate semiconductor thin films, dependence on current carrier concentration, impurity level positions and film thickness 16 p2787 A66-31762  
 Optical reflection, transparency and Faraday effect for indium antimonide, calculating effective electron mass, relation between energy and wave number, etc 16 p2788 A66-31777  
 Peculiarities of Hall curves of n-type alpha silicon carbide, noting concentration of conduction electrons related to temperature 16 p2789 A66-31789  
 Electron density of plasma measured by multibeam Fabry-Perot radio interferometer 17 p2963 A66-31831  
 Electronic energy of interacting atoms at short range, noting Heilmann-Feynman theorem for electron density in elliptic coordinates 17 p2961 A66-32550  
 Radiation spectra of plasma jets from IR to UV, determining electron density and argon excitation temperature, noting bremsstrahlung 18 p3144 A66-34103  
 Ionization processes in hot products of combustion processes /flame gases/ as weak plasma media, noting flame properties, mass spectroscopy, electron concentration, etc 18 p3260 A66-34106  
 Interplanetary electron number density determination by Pioneer VI radio propagation experiment 18 p3233 A66-34541  
 Electron-positron components of primary cosmic radiation, noting energy spectrum, flux, charge composition, origin, etc 18 p3176 A66-34748

Longitude dependence of distribution function of electrons for fixed value of McIlwain parameter, using kinetic equation 18 p3197 A66-34873

Shock wavefront structure in plasma, noting use of SHF diagnostics, electron concentration growth, etc 18 p3104 A66-35063

Langmuir probe curves for pulsed plasma obtained by time-sampling probe technique and compared with BBM analysis for ion saturation current 19 p3405 A66-35411

Output current characteristics of thermionic converters derived without reference to elastic and inelastic collisions and expressed as plasma electron density and temperature profile 19 p3405 A66-35428

Layer of CdS crystals photoconduction measurements suggesting change in space charge under illumination due to increase of free electron concentration in volume 19 p3438 A66-35478

Spatial charge region, excess electron concentration, capacitance and conductivity in semiconductor layer with Lorentz forces acting on carrier determined as functions of surface potential and applied electromagnetism field 19 p3442 A66-35819

Excitation and ionization of hydrogen plasma under influence of two electron groups with different temperatures and densities, using coupled system of rate equations 19 p3407 A66-36063

Stability, heating and end loss of 3.5-MJ theta pinch measured by various methods 19 p3413 A66-36507

Electron density, temperature and other related electromagnetic effects of deuterium plasma focus formed by coaxial electrode discharge as result of Z 19 p3425 A66-36561

Abnormal high electron escape rate in Tokamak-2 toroidal chamber determined by microwave probe, noting plasma-loop equilibrium breakdown as possible cause 19 p3427 A66-36575

Radio wave guiding in horizontally stratified magnetoionic medium in which electron density varies monotonically with height 19 p3305 A66-36629

Equilibrium deviation occurring in plasma with variable kinetic temperature due to radiation transport within plasma volume and outflow beyond limits of volume 20 p3606 A66-36973

Magnetization curves for two specimens of semiconducting strontium titanate of given electron density, noting magnetic hysteresis and heat capacity 21 p3796 A66-38553

Electron concentrations and effective frequencies for electron collisions with neutral particles in atmospheric gases in shock wake 21 p3726 A66-39085

Microwave cavity resonant frequency sampler for direct oscilloscope-photographic recording of electron density, recombination and diffusion time in decaying plasma 21 p3740 A66-39389

Radio electron density and magnetic field in galactic halo from primary cosmic ray and radio brightness measurements 21 p3817 A66-39563

Exact solution for transverse electromagnetic wave in plasma with diffuse boundary, noting reflection and transmission coefficients 22 p3952 A66-39719

Microwave beam incident on linearly graded plasma for electron density profile determination, using ray theory 22 p3861 A66-39723

Diurnal variation in electron densities and temperatures in F region above Puerto-Rico, using backscatter measurements 22 p3910 A66-39978

Langmuir type probe in argon arc jet, discussing surface contamination problems, causes of high electron temperature and development of automatic cleaning technique 22 p3899 A66-40368

Ultrasonic flux effect on electrons in semiconductor with charged impurity centers 22 p3967 A66-40842

Beryllium diffusion into gallium arsenide in /111/ plane with various electron concentrations through vacuum deposition 22 p3967 A66-40843

Steady state beam induced plasma parameters and behavior when affected by HF noise oscillations and effect on electron

concentration in plasma 22 p3958 A66-40933

Surface magnetoconcentration in intrinsic-conductivity semiconductors, noting space-charge region characteristics dependence on surrounding fields 23 p4110 A66-41131

Resonant frequencies of VHF Lecher line coupled to mercury arc plasma via split cylinder coupler measured as function of electron density 23 p4100 A66-41155

Multiple-pass laser interferometer used to confirm electron density inferred from Stark broadening of hydrogen beta line 23 p4101 A66-41260

Optical interferometers for low electron density measurements of transient plasmas 23 p4068 A66-41289

Spectroscopic measurements of electron densities and temperatures in argon-hydrogen plasma jet 23 p4068 A66-41290

P-type conductivity and stored electron charge densities in high resistivity cadmium sulfide crystals 23 p4114 A66-41625

Radial distributions of number density, electron temperature and plasma potential measured in electrodeless discharge, using symmetric and asymmetric double probes [AIAA PAPER 66-194] 23 p4107 A66-41907

Transmission resonant cavity measurements of electron line densities and collision frequencies in ionized wakes of hypervelocity projectiles 24 p4191 A66-42195

Electron number densities measured behind shock wave in pressure driven shock tube by microwave resonant cavity technique and by electrostatic quasi-Langmuir probe 24 p4191 A66-42197

Resonance peaks due to electromagnetic scattering by argon plasma jet observed during change in electron concentration, noting dependence of scattering on argon flow rate and electric power of arc 24 p4244 A66-42971

Allowed bands for wave generation by nonlinear effects in plasma with varying electron density 24 p4245 A66-43005

Absorption of solar energy by polar cap, noting electron concentration 24 p4204 A66-43153

**ELECTRON DENSITY PROFILE**

Electron density decay in wakes of hypervelocity aluminum and copper spheres in air and nitrogen as function of time, using transmission resonant cavity 02 p0267 A66-11529

Plasma electron density measurements, interferometric and spectroscopic techniques compared with Stark H-beta line and absolute continuum intensity method 03 p0405 A66-13136

Stark profiles of singly ionized nitrogen lines from T-tube plasma, measuring shifts and half-widths of N-ion lines, plasma temperature and electron densities 03 p0405 A66-13137

Microwave bridge to determine electron density in weakly ionized decaying plasmas 04 p0555 A66-14321

Shock wave formation in collisionless plasma investigating magnetic compression pulse, electron density and radial magnetic field profile 05 p0722 A66-14720

Rocket measurements of energetic particles discussing electron fluxes, energy spectra, angular distribution and data 05 p0745 A66-14777

Rocket measurements to investigate vertical current distribution of electrojet over India to correlate magnetic profiles with simultaneous electron density measurements 05 p0668 A66-14794

Electron density measurements in transient plasma using resolution repeater rapid-scan spectrograph 05 p0677 A66-14914

Stratospheric measurements of electrons and gamma radiation in cosmic rays, using plastic scintillator and lead sheet supplemented Geiger counters 05 p0752 A66-15386

Polar rays of solar corona, discussing distribution, magnetic field approximation, electron density and kinetic temperatures 07 p1133 A66-17418

Amplitude and duration distribution for underdense echoes from lognormally distributed meteor trails 07 p1135 A66-17638

Data analysis from Explorer XIV satellite, noting magnetic field measurements in tail of geomagnetic cavity 07 p1029 A66-18086

Ionospheric research from space vehicles, comparing experimental data with theoretical models of D, E and F regions 07 p1029 A66-18089

Radar echo effects of satellite disturbance in plasma medium, noting electron and positive ion density distribution 08 p1302 A66-18755

Electron concentration profiles above maximum of F layer calculated from measurements made on Earth surface 08 p1213 A66-19026

Messiaen theory for resonance effect in plasma electron density probe 09 p1406 A66-19856

Horizontal plate Mach-Zehnder interferometer for hypervelocity range vacuum use, high speed photography problems and electron density measurement 10 p1537 A66-21871

Microwave transmission tests in pure air plasma using hypersonic shock tunnel, obtaining electron density and collision frequency profiles, predicting propagation path signal loss and antenna radiation pattern distortion [AIAA PAPER 66-173] 11 p1742 A66-22211

Cadmium sulfide space charge limited diodes, noting current voltage characteristics and field and electron density distributions 11 p1668 A66-23026

Ionospheric effect of sudden magnetic storm eruption, noting propagation of disturbance above terrestrial surface 12 p1870 A66-24288

Transverse magnetic field effect on drifting hot plasma resonance peaks, noting oscillation mechanism and application of successive moments of Boltzmann equation 13 p1244 A66-25725

Ionospheric electron density profile and Scholmich integral equation for oblique incidence 13 p2075 A66-26740

Emergence point of conical microwave beam transmission through nonuniform electron plasma 14 p2234 A66-26860

Vertical drift of charged particles effect on electron density profile as cause of seasonal variations in ionospheric absorption 15 p2490 A66-29944

Density fluctuation effect on radar determination of total electron content in terms of recent cisunar density measurement 17 p2917 A66-32520

Lunar semidiurnal tides in ionosphere over Puerto Rico determined from electron density profiles for heights between 150 and 300 km 17 p2923 A66-33362

Instrumentation for plasma diagnostics noting electron density profile, temperature, ion-atom and electron-atom interaction, etc 20 p3556 A66-36964

Electron density distribution in electromagnetic shock tube measured, using transverse microwave cavity and radiating slots in oversize plasma waveguide 21 p3739 A66-39382

Born approximation for phase shift of microwaves scattered from underdense cylindrical plasma used to determine plasma electron density 21 p3794 A66-39572

Electron density profiles in ionosphere and exosphere - NATO Advanced Study Institute, Finse, Norway, April 1965 22 p3903 A66-39943

Negative ion associative detachment reaction with atomic oxygen in determination of nighttime D region electron density profiles at high latitudes 22 p3905 A66-39945

Winter variability of electron number density and collision frequency in lower ionosphere measured, using partial reflection method 22 p3906 A66-39950

Electron density profile measurements in auroral zone D layer during quiet ionospheric conditions, using partial reflection method 22 p3906 A66-39951

Collision frequency gradient effect on weak partial reflections from ionosphere 22 p3906 A66-39952

Electron density and collision frequency profiles for D region obtained through simultaneous measurement of radio wave phase and amplitude interaction 22 p3906 A66-39953

True height in-line computation of electron density profile from ionograms, using analog

- computer in real time 22 p3908 A66-39969  
Alouette I topside ionograms analyzed, discussing mathematical procedures and digital computer programs in use and orbit and electron density profiles 22 p3909 A66-39973  
Spectral analysis of laser discharge in pure and impure He, obtaining spectra of spark at various pressures, determining electron concentration at various stages 22 p3934 A66-40946  
Ionospheric cross modulation analysis by computer-oriented simulation process, noting D region electron density and collision frequency profiles 23 p4041 A66-41641
- ELECTRON DETECTOR**  
Wide-range automatic electron-counting frequency meter for sinusoidal and pulsed signals 02 p0230 A66-11813  
Lens technique for measuring yield and energy spectrum of secondary electrons generated by fission fragments through metal foil 12 p1916 A66-23704  
Low energy electron position detection with composite surface barrier type diode, noting design, fabrication and operation 12 p1879 A66-23705
- ELECTRON DIFFRACTION**  
Increase in extinction distance with temperature in silicon determined via high temperature electron microscopy 02 p0272 A66-11709  
Tungsten single crystal study by electron microdiffraction for distribution and effects of interstitial phases 03 p0385 A66-13194  
Thin surface films covering structure, nucleation, growth and epitaxy observation techniques such as electron and X-ray diffraction field emission, field ion microscopy, etc 04 p0559 A66-13452  
Hall effect of bismuth evaporated films, discussing structural dependence of sign and magnitude, effects of pathlength, impurities, gas adsorption and experimental techniques 05 p0729 A66-14510  
Properties of chromium particles obtained by vaporization of metal in argon at low pressure, noting cubic shape, electron diffraction pattern, etc 06 p0894 A66-16185  
Heterojunction preparation by vacuum evaporation, describing epitaxial deposition of germanium on gallium arsenide substrate 08 p1270 A66-19058  
Small angle scattering technique with high resolution electron microscopy to determine columnar structure of thin vacuum condensed Pd films 10 p1573 A66-21247  
Low-energy electron diffraction studies adsorption of cesium on Si /111/ 10 p1576 A66-21551  
Strength and structure of thin films of Al, Ag, Ge and Ni studied with electron microscope and electron diffraction technique 10 p1578 A66-21663  
Gallium arsenide whiskers on germanium structure, using electron diffraction photography and electron microscopy 11 p1757 A66-23280  
Low energy electron diffraction study of epitaxial deposition of copper on single crystal /110/ face of tungsten under ultrahigh vacuum 12 p1894 A66-23911  
Low energy electron diffraction observation of calibrated epitaxial nickel film on /111/ copper 12 p1894 A66-23912  
Effect of preparation conditions on formation of carbide phases in iron-carbon thin films, using vacuum condensation 12 p1933 A66-25025  
Domain structure of partially oriented thin permalloy films analyzed through appearance of adjoining 180 degree walls of equal contrast and by electron microscopy 12 p1934 A66-25029  
Electron diffraction study of structural defects in cubic phases in epitaxial tantalum oxide thin films 15 p2557 A66-28560  
Production of thin copper and nickel ferrite films in inert gas plasma reveal spinel structure in electron diffraction patterns 15 p2557 A66-28564  
Clean and oxygen-covered molybdenum /110/ surface analysis using low energy electron diffraction, noting various oxygen structures 16 p2721 A66-30109  
Magnetic and structural properties of monoferrite films prepared by cathode sputtering, noting electron diffraction and micrograph patterns of films, crystal structure, etc 16 p2774 A66-30690  
Existence of twins in single crystalline films of barium titanate, obtaining electron diffraction patterns 21 p3805 A66-39581  
Electron diffraction study of structural defects in cubic phases in epitaxial tantalum oxide thin films 23 p4112 A66-41281  
Production of thin copper and nickel ferrite films in inert gas plasma reveal spinel structure in electron diffraction patterns 23 p4112 A66-41285
- ELECTRON DIFFUSION**  
Electron passage from surface ion into semiconductor layer interior during charging from corona discharge, estimating thermal overshoot and tunneling through potential barrier 01 p0071 A66-11025  
Shock wave propagation phenomena including ionization relaxation, electron diffusion from shock wave front and structure of shock waves in highly rarefied gases 04 p0508 A66-13503  
Ionospheric diffusion probe determining ion and electron temperatures 05 p0674 A66-15112  
Electron diffusion in mutually perpendicular static electric and magnetic fields based on stability of laminar flow 07 p1081 A66-17953  
Hole diffusion constant dependence on electric field in n-type germanium 07 p1106 A66-18395  
Lifetime degradation rate due to cobalt gamma irradiation reduced in p-silicon due to electron injection at low temperature 07 p1106 A66-18400  
Precursor electron front measuring velocity, electron temperature dependence on operating parameters, etc 08 p1259 A66-18525  
Electron diffusion coefficient estimated and compared with theory for case of infinite plane parallel plasma and constant electric field 08 p1264 A66-19226  
Boltzmann transport equation solution for electrons in ionized gas with nonuniform electron concentration gradient 12 p1916 A66-23728  
Electrical precursors in immediate vicinity of ionizing shock waves in argon analyzed, using model describing electron diffusion through shock 12 p1923 A66-24579  
Diffusion and lifetime of plasma charged particles in magnetic field covering instability, contraction, decay, recombination, etc 13 p2138 A66-25222  
Electronic structure and Seebeck coefficient for chromium-iron alloys from 125 to 625 degrees K, emphasizing phonon drag and electron diffusion effects 14 p2310 A66-26879  
Stable domain propagation for case when electrons have field-independent diffusion coefficient and follow arbitrary static velocity field characteristic exhibiting negative resistivity 19 p3446 A66-36371  
Loss rates of trapped electrons by atmospheric collisions 20 p3640 A66-38321  
Pitch angle diffusion perturbing relativistic electrons in Van Allen zones and violating adiabatic invariants of electron motion, using Fokker-Planck equation 20 p3641 A66-38328  
RF-induced plasma shield propagation and electron diffusion 21 p3792 A66-39190  
Internal electric field effect on singly ionized acceptor or donor impurity diffusion in uniformly doped n-or p-type semiconductors 21 p3804 A66-39468  
Relativistic-electron diffusion wave in outer radiation belt recorded by device mounted on Cosmos XLI satellite in high geomagnetic latitudes 22 p3974 A66-40756  
Approximate steady state solutions of continuity equation containing effects of diffusion, drift and recombination for carrier diffusion region of forward-biased p-n junction over wide range of injection 24 p4249 A66-42225
- ELECTRON DISTRIBUTION**  
One-dimensional collisionless plasma in computer simulation with randomized electrons compared with static theory for equivalent diode 01 p0112 A66-10591  
Electron concentration-distribution data for ten quiet days during spring 1958 in F-2 layer 01 p0063 A66-11027  
Electron density distribution in linear pinch discharge with transverse rotating magnetic field 02 p0266 A66-11471  
Radiation hazard for cosmonaut inside or outside spaceship from Earth radiation belt, considering electron radiative effect, tissue sensitivity, etc 02 p0182 A66-11663  
Equatorial F-region electron density distribution is natural steady state distribution for charged fluids as shown by momentum transport equation for charged gaseous fluids 03 p0364 A66-12678  
Electron distribution function in semiconductors discussing steady state illumination effects, energy and spectral characteristics and photoconductivity oscillations at low temperatures 03 p0410 A66-12938  
High energy electron influence on electron distribution function and effect on spectra of nonthermal galactic and extragalactic radio sources 04 p0575 A66-14171  
Electron density distribution in magnetosphere inferred from dispersion characteristics of hydromagnetic wave propagating between hemispheres along geomagnetic field as in atmospheric whistlers 05 p0747 A66-14787  
Directional intensity of electron distribution of energies larger than 40 keV with respect to pitch angles in inner belt from Cosmos V data 06 p0951 A66-17172  
Photoelectron impact excitation effect on dayglow intensity, calculating energy distribution for various altitudes 07 p1028 A66-17374  
Anisotropy of microwave conductivity and absorption in semiconductors with hot carriers, studying distribution function of electrons 07 p1106 A66-18380  
Leigh theory concerning effect of electron concentration on elasticity of Al and Al alloys compared with experiment 07 p1053 A66-18520  
Electron distribution over energy level in valence semiconductor in presence of electric field 08 p1269 A66-18977  
Electric current passage through multivaleley n-germanium semiconductor plates, noting nonuniform electron distribution 08 p1273 A66-19275  
Magnetic field level in solar corona determined from generation mechanism of type II radio bursts 08 p1297 A66-19454  
Fluctuations of electron numbers in general M-level system, using difference equation 08 p1279 A66-19837  
Anisotropic effect of interelectronic scattering on semiconductor conductivity of ellipsoidal isoenergetic surface 09 p1411 A66-19981  
Electron pitch distribution anomaly as observed by Cosmos V satellite, noting possible causes of phenomenon 09 p1378 A66-21009  
Spatial distribution of protons and electrons captured by terrestrial magnetic field, as measured by Cosmos satellites 09 p1443 A66-21011  
Plasma sheath properties near discharge tube anode, noting relation of electron current distribution along discharge radius and ion energy spectrum to pressure 10 p1558 A66-21999  
Solution of two first equations of BBGYK hierarchy, obtaining dielectric constant of plasma by using Guernsey solution, giving two-particles distribution function 11 p1744 A66-22445  
Longitudinal plasma oscillations excited in warm plasma column at microwave frequencies in presence of magnetic field, manifest themselves as absorption peaks near harmonics of electron cyclotron frequency 11 p1748 A66-23395  
Boltzmann transport equation solution for electrons in ionized gas with nonuniform electron concentration gradient 12 p1916 A66-23728  
Electron distribution from 400 to 1200 km measured, using Ariel I satellite, noting latitudinal and longitudinal anomalies associated with geomagnetic field [AIAA PAPER 66-395] 12 p1872 A66-24511  
Negative conductivity, induced by nonequilibrium state in semiconductors, due to short electron lifetime in conduction band 13 p2160 A66-25101

Quasi-linear approximation method and Poisson equation used in determining static fields and electron redistribution in plasma waveguides 13 p2039 A66-25678

D-region electron distribution, collision frequency and amplitudes of partially reflected waves 13 p2075 A66-26739

Hot electron redistribution in multivalley conductors in electric fields, based on variation under pressure of valley population levels, using silicon samples 15 p2559 A66-28622

Electron concentration inhomogeneities during traveling gravity wave propagation through F layer 15 p2485 A66-29084

Plasma probe in thermal emission converter with high cesium vapor, noting parameters of diffusion, electron concentration, etc 16 p2756 A66-30103

Negative conductivity, induced by nonequilibrium state in semiconductors, due to short electron lifetime in conduction band 16 p2771 A66-30280

Trapped electron effect and stationary longitudinal wave propagation in Maxwellian hot plasma based on exact solution of nonlinear collisionless Boltzmann equation compatible with equilibrium electron distribution 16 p2761 A66-31009

Nonlinear effects in homogeneous Lorentz plasma, calculating anisotropies of electron distribution function 17 p2963 A66-31842

Electron velocity distribution in ionized gas under alternating electric field as function of density, temperature, etc, including effects of recombination, ionization, etc 17 p2960 A66-32426

Satellite observation on correlation between outer radiation zone electrons and solar activity cycle 17 p2993 A66-32518

Electron-ion emission pattern distribution obtained by pulsed laser focusing on solid target 17 p2937 A66-33256

Magnetic field level in solar corona determined from generation mechanism of type II radio bursts 18 p3232 A66-34483

Energy characteristics of 11-year cosmic ray variations, evaluating electromagnetic conditions in interplanetary space for proton, alpha particle and electron variations in energy 18 p3176 A66-34752

Plasma sheath properties near discharge tube anode, noting relation of electron current distribution along discharge radius and ion energy spectrum to pressure 18 p3140 A66-34976

Evaporated and recrystallized CdS layers, discussing electron mobility, level distribution, capture cross section and techniques of measurement 19 p3435 A66-35408

Electron levels in afterburning region of rocket exhaust plume with aluminum or alkali content 19 p3477 A66-35633

Plateau formation mechanism for electron velocity distribution function during damping of monochromatic plasma waves 19 p3406 A66-35737

Solution of Boltzmann and rate equations for electron distribution function and state populations in nonequilibrium MHD plasmas 19 p3406 A66-35801

Electron velocity distribution function in nonequilibrium plasma having spatial distribution governed by electron-electron and inelastic collisions 20 p3606 A66-36974

Energy-selective redistribution of trapped electrons in inner radiation belts associated with magnetic disturbances 20 p3630 A66-37294

Quantum oscillations of Hall effect and longitudinal and transverse reluctance in n-indium antimonide, noting spin splitting and temperature and electron concentration effect on oscillation maximum 21 p3799 A66-38924

Microwave and X radiation from plasma produced by electrodeless discharge in hydrogen, showing presence of accelerated electrons leading to plasma oscillations 21 p3783 A66-39023

Field intensities and electron distribution functions in hollow cathode, graphs show potential distribution along cathode axis 22 p3953 A66-39758

Back contact effect on distribution of current carrier concentration in

semiconductors based on diode volt-ampere characteristic 22 p3873 A66-39825

Infinite plate consisting of monolayer semiconductor of given thickness under effect of electric field results in change in galvanomagnetic, piezoresistance and optical properties 22 p3965 A66-40317

Conductivity of potassium-seeded argon plasma, assuming variable collision cross sections and Maxwellian distribution for electrons 22 p3951 A66-40363

Difluoramine chemistry for understanding nature of N-F and N-X bonds, electron distributions and existence and stabilities of N-F radicals and ions 23 p4031 A66-41233

Capture effect on I-V characteristics of junction diodes and injection coefficients in forbidden transition zone 23 p4045 A66-41444

Millimeter wave resonant interferometer capable of measuring spatial distribution of electrons in low density transient plasma column subject to perturbation 24 p4209 A66-42191

Anisotropic electron distribution in pure semiconductors near avalanche, considering indium antimonide 24 p4252 A66-42355

Numerical solution of Boltzmann kinetic equation for weakly ionized plasma in thermoelectronic converter 24 p4239 A66-42871

## ELECTRON EMISSION

SA EXO-ELECTRON EMISSION

SA PHOTOELECTRIC EMISSION

SA RADIO FREQUENCY DISCHARGE

Radiative recombination in thin film structures observing characteristic of aluminum 01 p0127 A66-11089

Radio emission in ionosphere during high solar activity explained as electron emission produced by particles moving as corpuscular fluxes 02 p0284 A66-12133

Doubly differential cross sections of electrons ejected from helium bombarded by protons 04 p0547 A66-13709

Impulsive emission of approximately 40-keV electrons from Sun observed from Mariner IV 05 p0746 A66-14779

Titanium, zirconium and hafnium, row of metals and platinum metals as new electron emitters for thermionic generators 05 p0621 A66-15576

Work function distribution of different refractory metals by Shelton method, noting dependence of electron emission of thermionic converter 05 p0621 A66-15577

Electron microscope study of emitter inhomogeneity influence on determination of electron emission constants and performance of thermionic converters 05 p0622 A66-15583

Time resolution of electron and ion emission produced by Q-switched ruby laser pulse focused on metal surface 07 p1045 A66-18358

Thermostimulated induced electron emission from samples cut from laser ruby crystals detected with open point counter 08 p1232 A66-18609

Satellite charge and sheath formation resulting from photoelectric and secondary emission 08 p1302 A66-18748

Surface physics of ion and electron emission during cesium adsorption on polycrystalline wire surfaces [AIAA PAPER 66-222] 10 p1575 A66-21450

Electron and ion emission from pulsed ruby laser illuminated metallic surface into vacuum, determining application to pulsed ion thruster [AIAA PAPER 66-230] 10 p1542 A66-21453

Hot electron emission from thin metallic films of island structure 10 p1589 A66-22171

Intensity of early postexplosion radiation field and high energy electron emission from supernovae 12 p1938 A66-23918

Secondary electron emission in zinc sulfide and magnesium fluoride thin dielectric films and semiconductor layers due to electric field stimulation 12 p1930 A66-24459

Hot-electron transistors, discussing application of Schottky-emitter transistor to VHF operation 13 p2038 A66-25561

Hot wire electron emissive probes for potential measurements in quiescent plasmas, noting plasma densities, emission levels, etc 13 p2154 A66-26554

Electron energy distribution for emission from aluminum-aluminum oxide-gold thin films 14 p2257 A66-27943

Radio emission in ionosphere during high solar activity explained as electron emission produced by particles moving as corpuscular fluxes 14 p2241 A66-28090

Rejection of Jones ionospheric model where Venus microwave emission is attributed to free-free electron emission, analyzing formation of dense Cytherean ionosphere 15 p2597 A66-29255

Electron secondary emission from interaction of ion, atom and molecular energetic beams with solids, especially when kinetic energy is significant 16 p2776 A66-30796

Time resolution of laser-induced electron emission from cesium diode at high laser power 16 p2719 A66-31135

Laser induced spontaneous electron emission from rear side of metal foils, noting electron energy vs laser energy pulse magnitude, etc 16 p2784 A66-31536

Work function of polycrystalline rhenium surface in cesium 17 p2983 A66-33103

External electron emission measurement from polished n-germanium and n-silicon surfaces 17 p2986 A66-33310

Energy distribution of electrons emitted from alkali halide films on Mo substrates during positive helium and argon ion bombardment 17 p2988 A66-33459

Solar flare electron propagation observations in interplanetary space 18 p3166 A66-34239

Increases of ionizing radiation in stratosphere correlated with recurrent magnetic storms, ionospheric perturbations in auroral zone, etc, possibly due to electrons from outer radiation belt 18 p3197 A66-34874

Zr-coated tungsten cathode in reducing divergence of electron beam emission 18 p3088 A66-35077

Various light nuclei considered as possible solar neutrino detectors, deriving cross sections and angular distributions of electrons 18 p3223 A66-35216

Direction of collapsing star determined by detecting generated neutrino front by time delay method 18 p3223 A66-35217

Hot electron emission from thin metallic films of island structure 19 p3441 A66-35785

Anisotropy of secondary electron emission in ion bombarded Si single crystals, using electron microscope 19 p3445 A66-36340

Primary and afterglow emission decay time from low temperature gaseous nitrogen excited by fast electrons explained by possible energy transfer 19 p3404 A66-36799

Energy spectrum of primary auroral electrons determined from vertical luminosity profiles of 16 auroral arcs 20 p3550 A66-37297

Secondary electron emission in zinc sulfide and magnesium fluoride thin dielectric films and semiconductor layers due to electric field stimulation 20 p3620 A66-37691

Electromagnetic wave emission excited by electron stream over diffraction grating lying on boundary of semiinfinite anisotropic dielectric 20 p3519 A66-37998

Electron drift velocity, ionization and attachment coefficients in water vapor and dry air measured by recording short photoelectron pulses 20 p3605 A66-38095

Subshell photoelectron emission in germanium at angle of 90 degrees to converting X radiation determined for two radiation sources using photographic techniques and track counting method 20 p3621 A66-38096

Electron and ion emission from polycrystalline surface of Be, Ti, Cr, Ni, Cu, Pt and type-304 stainless steel in cesium vapor 20 p3623 A66-38400

Woven and knitted electron emitters noting reliability, mechanical stability, efficiency 24 p4180 A66-42369

X-rays and Auger electron emission by krypton 81 measured, using proportional counter 24 p4282 A66-42430

## ELECTRON ENERGY

Quantum levels of electron moving in periodic field of semiconductor crystals in strong electric field 02 p0274 A66-11733

HF discharge in rectangular high vacuum waveguide in crossed magnetic and electric

- fields, calculating electron energy 02 p0268 A66-11773
- Achromatic electromagnetic quadrupole lens functioning for case of slight misalignment of fields 02 p0199 A66-11783
- distribution 02 p0199 A66-11783
- Heat capacity related to quantizing of energy levels of electron excitation of superconductor in intermediate state 02 p0277 A66-12278
- Photoelectron energy distribution in F region 03 p0364 A66-12684
- Electron energy spectrum during auroral absorption measured by Nike-Cajun analyzer 03 p0366 A66-12880
- Doubly differential cross sections of electrons ejected from helium bombarded by protons 04 p0547 A66-13709
- Interaction of energetic electrons with bounded electromagnetic waves near cyclotron resonance, noting plasma diagnostics, maser and gain mechanism 04 p0530 A66-13953
- Energy flux of electron beam absorbed by atmosphere derived from resulting intensity of first negative system of molecular nitrogen 05 p0670 A66-14948
- Radio source spectrum, discussing spectral indices, electron energy and H II density in quasi-stellar and high brightness-temperature sources 05 p0762 A66-15279
- Heat capacity related to quantization of energy levels of electron excitation of superconductor in intermediate state 05 p0738 A66-15457
- Electron energy diffusion in superconducting thin Sn and In films bombarded by alpha particles observed in terms of IR drop 06 p0927 A66-16755
- Energy dependence of threshold curve in separating collision from ionization effects and in interpreting anisotropies of electron threshold energies 06 p0938 A66-17150
- Electron energy levels in CdS single crystals from Hall effect, conductivity and space-charge-limited current measurements 07 p1098 A66-17739
- Electron energy spectra in neon, xenon and helium-neon laser discharges, calculating production and destruction rate parameters 07 p1045 A66-18354
- Measurement of energy required to form the hole-electron pair in gallium phosphide by alpha particles 07 p1107 A66-18407
- Work function of metals and semiconductors measured, using retarding potential analyzer to determine field emission electron energy distribution 08 p1228 A66-19825
- Relation of thermodynamic parameters to energy gap of superconducting elements and alloys 09 p1424 A66-20074
- Comparison between auroral effects and experimentally observed electron leakage from magnetic mirror with electron acceleration 09 p1373 A66-20471
- Thermal emf quantum oscillation and quantization of electron energy spectrum of n-InAs 09 p1429 A66-20768
- Plasma oscillation of electrons in Be, Mg, Al, Si, Ge, Sn, Sb and Bi studied by electron bombardment of thin foil of these solids 09 p1429 A66-20842
- Plasma oscillation of electrons in aluminum compound eutectoids studied, using energy analysis of electrons passed through thin foil of eutectoid, noting dependency of oscillation energy on component grain size 09 p1429 A66-20843
- Plasma oscillation of valence electrons and exciton in alkali halides, measuring differential cross section, dispersion relation and loss peak in spectrum 09 p1430 A66-20844
- Plasma oscillation of conduction electrons in sodium 09 p1430 A66-20845
- Electron excitation cross section of individual energy levels of inert gases calculated, using Born-Oppenheimer method 09 p1405 A66-20939
- Electron energy spectrum measurements by Cosmos V satellite, noting concentration and intensity at various geographic areas 09 p1378 A66-21010
- Electron excitation in germanium by alkali metal ions, noting effect on electrical conductivity 10 p1587 A66-22154
- Bremsstrahlung of nonrelativistic plasma, treating nondegenerate electron component of plasma simultaneously with degenerate component by applying Fermi-Dirac distribution 12 p1925 A66-24996
- Statistical theory of electronic energies, calculating binding energy at theoretical equilibrium separation of molecular hydrogen ion 13 p2130 A66-25370
- Photoluminescence for p-and n-type gallium arsenide as function of exciting light intensity, noting minority carrier recombination mode, electron energy spectrum, etc 13 p2169 A66-26187
- Rotational excitation of oxygen by slow electrons, calculating electron energies, quadrupole moments and energy loss rates 13 p2135 A66-26270
- Electron acceleration near Earth bow shock measured, using Explorer XVIII satellite, noting solar wind effect, energy spectrum in radiation belt and magnetospheric boundary, etc 13 p2175 A66-26355
- Polarized pyrometric probe for direct measurement of ion and electron energy in hot dense plasma 14 p2290 A66-26825
- Thermal emf quantum oscillation and quantization of electron energy spectrum of n-InAs 14 p2361 A66-27303
- Energy dependence of elastic resonance scattering of low energy electrons from He, Ne, Ar and nitrogen gases at angles ranging from 8 to 110 degrees 14 p2337 A66-27797
- Fluorescence lifetime measuring technique employing pulsed or modulated RF discharges applied to emission of second positive and first negative systems of nitrogen 14 p2337 A66-27974
- Electron excitation cross section of individual energy levels of inert gases calculated, using Born-Oppenheimer method 15 p2543 A66-28528
- Ruby phosphorescence under intense optical excitation, inferring possible recombination characteristics from initial brightness decay 15 p2558 A66-28607
- Electron energy losses in diamond, noting correlation between plasma excitation energy and interband transition energies 15 p2564 A66-28876
- Acoustoelectric effects for various sound waves, using rate of energy exchange between two coupled systems in relative motion 15 p2564 A66-28970
- Relation between frequency spectrum of pulsations in auroral luminosity and energy spectrum of auroral electrons, using photometer 15 p2489 A66-29235
- Deuterium plasma jet injection into simple biconical cusped magnetic field, noting ion energy transfer to electrons and plasma potential variations 15 p2554 A66-29748
- Single-configuration open-shell calculations for ground state of boron isoelectronic sequence, using doublet-spin-state wave function 16 p2750 A66-30122
- Electron component of plasma sheet of terrestrial magnetic trail, noting energy distribution and densities 16 p2792 A66-30142
- Energy spacing of geometrical resonance structure in very thick indium films, noting interference between electron-like states which propagate with different velocities 16 p2769 A66-30159
- Type I comet tail origin due to energetic electrons in shock structure, noting inertial slowing down of interplanetary field lines trapped in solar wind 16 p2801 A66-30919
- Laser induced spontaneous electron emission from rear side of metal foils, noting electron energy vs laser energy pulse magnitude, etc 16 p2784 A66-31536
- Ultrahigh frequency plasma oscillations, noting Maxwellian equilibrium between plasma electrons and primary, monoenergetic electrons 16 p2766 A66-31651
- Secondary electron interaction with solid state plasma, noting energy distribution, Boltzmann equation solution, etc 16 p2789 A66-31783
- Plasma injected into magnetic trap with aid of conical theta pinch investigated to determine ion and electron energy, lifetime and charged particle concentration variation 17 p2969 A66-32546
- Single donor-type randomly distributed impurity and effect on electron energy spectrum of semiconductor 17 p2982 A66-32969
- Ionization potential, dissociation energy and electron affinity for molecular oxygen 18 p3137 A66-33989
- Ion-molecular reactions of hydrogen with inert gases caused by low energy electrons in low temperature plasmas, considering energy level populations, reaction cross sections, etc 18 p3064 A66-34026
- V-I characteristics of GaAs Schottky barrier rectifiers applied in determining relation between electron energy and complex wave vector over portion of forbidden energy gap 18 p3155 A66-34161
- Electron energy loss spectra of Ge and Si in amorphous, polycrystalline and monocrystalline form 18 p3159 A66-34710
- Balloon observation of high energy primary electrons with counter system 18 p3187 A66-34816
- Electron component of primary cosmic radiation at energies greater than or equal to 15 gev studied, using nuclear emulsion stack 18 p3187 A66-34818
- X-ray spectrum produced by thermal bremsstrahlung of gas, taking Gaunt factor into account 18 p3200 A66-35049
- Electron energy quantization phenomenon in thin film studied by using dielectric barrier sandwiched between semiconductor films of same conductivity type 19 p3433 A66-35309
- RF breakdown in air studied for two electrode configurations leading to nonlinear Mathieu-like differential equations for confined electron motion 19 p3296 A66-35417
- Electron excitation in germanium by alkali metal ions, noting effect on electrical conductivity 19 p3440 A66-35768
- Buildup and confinement of plasma with high-energy electrons in PR-5 apparatus, using magnetron injection method 19 p3412 A66-36497
- Plasma with relativistic electrons in magnetic mirror trap, discussing stability and fast pulsed heating of ions 19 p3423 A66-36553
- Optical constants of silver and gold in various energy regions, measuring relative refractivities of polarized light, analyzing collective motions of conduction electrons 20 p3615 A66-37283
- Optical phonon production, showing existence of electric field strength range at low temperature scattering in which phonon emission results in electron stoppage 20 p3577 A66-37376
- Schottky diffusion theory applied to calculation of coefficients of homogeneous positive column in neon, using Druyvesteyn electron-energy distribution 20 p3608 A66-37462
- Electron energy distribution function obtained by Druyvesteyn analysis in low-current positive column neon discharge compared with theoretical distribution function 20 p3608 A66-37463
- Galvanomagnetic effect of anisotropic electron energy spectrum on acoustical branch perturbation spectrum of system of electrons and ions in homogeneous magnetic field 20 p3618 A66-37559
- Electron energy spectrum for alloyed semiconductors, determining state densities via Thomas-Fermi statistical method 20 p3618 A66-37562
- Magnetospheric boundary phenomena, noting dependence of charged particle observations on character of associated magnetic fields 20 p3641 A66-38329
- Auroral absorption analysis during geomagnetic storm, noting satellite measurement of energetic particles 20 p3642 A66-38335
- Magnetosphere tail sheet pinch model, discussing motion of particles for cases of surface crossing 20 p3642 A66-38336
- Spatial distribution of trapped particles measured by Explorer XV satellite, noting decay time constants and energies 20 p3643 A66-38340
- Electron energy spectrum of silicon, examining effect of screw dislocations parallel to crystallographic direction 21 p3803 A66-39296
- Effective mass in nuclear deformational Hamiltonian calculated by asymptotic approximation method which is two orders of magnitude better than liquid drop

- model 22 p3951 A66-40422  
Generalized full wave theory equations derived for EM plane wave propagation through magnetotonic medium for electron collision frequencies proportional to electron energy 22 p3869 A66-40805  
Mean energy required to create electron-hole pair in Si measured as function of temperature, using 23 p4111 A66-41264  
cryostat 23 p4111 A66-41264  
Instabilities resulting in loss of energetic electrons and fast electrons analyzed in electron cyclotron plasma confined by magnetic mirrors 23 p4103 A66-41490  
Electron self-energies in Fermi gas arising from coupling to optical and acoustic phonons 24 p4250 A66-42231  
Electromagnetic propagation in semiconductor with account of nonlinear effects such as skin effects arising from electron heating by field 24 p4256 A66-42526  
Temporal variations of electron energy flux in outer radiation zone measured during geomagnetic activity with instrumentation on board Explorer XII satellite 24 p4263 A66-42601
- ELECTRON FLUX**  
Rocket measurements discussing electron and proton flux, energy spectra and angular distribution in high altitudes 05 p0676 A66-14776  
Flux and energy spectrum of primary electron component measured by balloon at period near solar activity minimum 06 p0944 A66-16075  
Silicon planar transistors, noting electron flux induced surface damage mechanism 06 p0854 A66-16684  
Plasma transition from macroscopic stable state to state with virtual cathode 06 p0918 A66-16770  
Radiation tests on N/P silicon solar cells and other cover materials performed with one mev energy electrons for integrated fluxes, noting effects on physical, optical, electrical and thermal characteristics 07 p0990 A66-17238  
Explorer XV and Telstar I satellite trapped radiation measurements, noting connection between magnetospheric trapped particles and natural plasmas in space 07 p1131 A66-18084  
Explorer satellite XII, XIV and XV measurements, noting directional intensity energy flux, spatial distribution and spectra of low energy trapped protons and electrons 07 p1131 A66-18085  
Scintillation counter satellite data on low energy electron flux and particle trapping in dark magnetosphere 08 p1218 A66-19394  
Kinetic instability of terrestrial outer radiation belts calculated, using magnetospheric electron flux data 08 p1286 A66-19789  
Soft electron fluxes in upper atmosphere measured, using open type secondary electron multiplier ejected in container from rocket 09 p1443 A66-21012  
Flux of soft electrons in outer radiation belt as measured by Elektron II 09 p1445 A66-21032  
Electron flux at upper boundary of outer radiation belt measured by Elektron I and II satellites 09 p1445 A66-21034  
Auroral electrojet index and universal time variations, discussing polar disturbance statistics 10 p1528 A66-21144  
Space-charge theory for steady one-dimensional current flow across evaluated space between plane electrodes 10 p1557 A66-21573  
Auroral zone electron flux and relation to broadband radiowave absorption 11 p1703 A66-23495  
Steady state modulation by given frequency external signal of electron flow through straight waveguide, determining relation of counterradiation phase and amplitude to system parameters 12 p1921 A66-24210  
Electrons from linear accelerator directed in collimated beam at normal incidence upon thick targets of various materials, obtaining energy spectra of retrofugal electrons 13 p2136 A66-26280  
Periodic modulations of energetic electron fluxes observed throughout distant radiation zone by Geiger counters aboard satellites suggest MHD wave activity 13 p2175 A66-26354  
L-3 rocket observation of proton and electron fluxes at high altitudes, using solid state detectors 15 p2574 A66-28910  
Formation mechanism of ionospheric narrow sporadic E layers by high energy electron fluxes captured by geomagnetic field 15 p2488 A66-29110  
Rocket measurements of electron fluxes in upper atmosphere of middle latitude at altitudes of 200-500 km 15 p2592 A66-30063  
Energy spectra of electrons and protons in islands at back of magnetosphere compared with electron fluxes observed by satellites, noting similarity between particles in islands and those in aurora 16 p2695 A66-30714  
Book on electronics and electron physics advances including fast ion scattering, kinetic ejection of electrons, plasma application in microwaves, etc 16 p2747 A66-30794  
Instability of nonlinear stationary oscillations of potential in electron-ion flows useful in distribution functions of ions and electrons 16 p2754 A66-31174  
Electron flux induced excitation of magnetostatic oscillations of magnetized ferrite 16 p2784 A66-31549  
Galactic acceleration and solar modulation of cosmic rays examined via energy spectrum of galactic electrons, estimating Fermi acceleration, low energy electron flux, etc 18 p3177 A66-34756  
Flux and energy spectrum of primary electron component measured by balloon at period near solar activity minimum 18 p3187 A66-34814  
Flux and East-West asymmetry of primary electrons at geomagnetic rigidity cut-off of about 4.5 gv 18 p3187 A66-34817  
Plasma transition from macroscopic stable state to state with virtual cathode 19 p3405 A66-35367  
Correlation of magnetic fields and energetic electrons on IMP I satellite, noting depression in geomagnetic tail region, electron fluxes and diamagnetic effect 20 p3633 A66-38201  
Energetic electrons from shock heating of exosphere, discussing formation of artificial radiation belt via MHD shock wave heated and density gradient accelerated electrons 20 p3644 A66-38346  
Kinetic instability of terrestrial outer radiation belts calculated, using magnetospheric electron flux data 21 p3809 A66-38785  
Fluxes, intensities and energy distributions of magnetically trapped electrons and fluxes of magnetically trapped protons at lower edge of radiation belt 22 p3974 A66-40557  
Interplanetary electrons and associated solar flares 22 p3974 A66-40564  
Steady state modulation by given frequency external signal of electron flow through straight waveguide, determining relation of counterradiation phase and amplitude to system parameters 22 p3878 A66-40574  
Increment of constant HF electron flux in resonance probe determined for case of large constant potential, noting role of plasma 22 p3920 A66-40770  
Electron field operator derivation from dynamical rearrangement formulation applied to neutral superconductivity 23 p4112 A66-41275  
Auroral zone electron source properties deduced from electron fluxes, spectra and angular distributions measured by rocket flown into breakup phase of IBC I aurora 24 p4199 A66-42584  
Auroral zone proton-electron anticorrelations, proton angular distributions and electric fields 24 p4199 A66-42585  
Cosmic-ray electron flux above 4.7 BV measured, using lead-plate spark chamber, determining upper limit to primary flux 24 p4265 A66-42717  
Cosmic ray electron sign ratio and absolute flux measured by balloon-borne equipment 24 p4272 A66-43041
- ELECTRON GAS**  
Diagrammatic method to obtain Helmholtz free energy of classical electron gas used to derive pair distribution function beyond Debye-Huckel result 02 p0266 A66-11478

- Superconducting critical field curves for tin, indium and mercury below one degree K, with entropy difference linear in temperature for free electron gas 02 p0271 A66-11480  
Phonon field effect on plasma frequency of dense electron gas for nonzero temperatures 02 p0267 A66-11708  
Pressure dependence of initial recombination of ions in oxygen 04 p0549 A66-14287  
Isotropic photon gas interacting with electron plasma with Maxwellian distribution via Compton effect 05 p0722 A66-14721  
Radial distribution function computed for classical particles interacting with Coulomb, shielded Coulomb and truncated Coulomb forces 06 p0908 A66-16120  
Plasmon dispersion relation and damping constant derived from Green function formulation of random approximation for inverse dielectric function of electron gas 07 p1090 A66-18211  
Electron gas energy scattering in n-type indium antimonide at helium temperatures under action of DC field 07 p1104 A66-18259  
Opacity due to Compton scattering at relativistic temperatures in semidegenerate electron gas 08 p1258 A66-18779  
Electron and ion recombination coefficient in weakly ionized gas of homeopolar molecules 09 p1407 A66-19965  
Electron gas energy scattering in n-type indium antimonide at helium temperatures under action of DC field 09 p1431 A66-20903  
Extension of electron gas model to transition metals /titanium, zirconium, hafnium/, considering atom interaction up to fourth neighbor 10 p1546 A66-21664  
Injection and extraction of hot electrons in n-n heterojunctions with rapid Maxwellization of electron gas, negative resistance and semiconductor characteristics 13 p2166 A66-25920  
Electro-magnetoplasma-gas-dynamics /EMPGD/ equations for warm compressible electron gas drifting at constant velocity, finding equation for refractive index of plasma waves 14 p2339 A66-26862  
Hall coefficient and thermal emf of electron gas of PbTe in strong magnetic field 14 p2358 A66-27088  
Equilibrium binary correlations in classical relativistic homogeneous electron gas 14 p2339 A66-28275  
Electron gas electroconductivity relaxation time and energy loss in n-type InSb at cryogenic temperatures 15 p2558 A66-28611  
Meissner effect in superconducting electron gas in magnetic field 16 p2749 A66-31758  
Neutral atmosphere reduces electron gas thermal conductivity below 200 km during both day and night 20 p3552 A66-37590  
Shubnikov-de Haas effect for transport properties of electron gas in magnetic field, noting oscillatory parts of thermal and electric conductivities 21 p3776 A66-38632  
Electrical conductivity of dense plasma in strong electric field, when electron gas accelerated by field produces beam of runaway electrons 21 p3784 A66-39029  
Radiation peak formation in nonhomogeneous gas behind shock wave due to radiating atom distribution and heating of electron gas by inelastic molecular collisions 21 p3728 A66-39334  
Radiation peak formation in nonhomogeneous gas behind shock wave due to radiating atom distribution and heating of electron gas by inelastic molecular collisions 22 p3897 A66-39704  
Time dependent thermal behavior of ionospheric electron gas 22 p3913 A66-40552  
Hall coefficient and thermal emf of electron gas of PbTe in strong magnetic field 22 p3967 A66-40844  
Radiative equilibrium of electron gas in magnetic field based on quantized particle motion and perturbation theory 23 p4101 A66-41365  
Screening function of interacting electron gas at high and metallic densities by many-body perturbation theory 24 p4236 A66-42294  
Laser oscillation effect on characteristics of electron gas of helium-neon laser plasma studied in terms of wave attenuation in plasmaguide 24 p4225 A66-43006

## ELECTRON GUN

## SA CATHODE RAY TUBE

Electron image of CRT cathode formed directly on view screen, eliminating emission patchiness from oxide coated tubes 01 p0036 A66-10395

Impedance of growing wave in interaction region used to calculate minimum value of traveling wave tube noise coefficient 06 p0837 A66-17190

Low energy electron position detection with composite surface barrier type diode, noting design, fabrication and operation 12 p1879 A66-23705

Vacuum-evaporation method of fabricating thin film circuits, using resistance-heating process or electron beam 12 p1847 A66-24954

Optimum potential distribution in electron gun of low noise traveling wave tube calculated, using plasma wave number changes in accelerating portion of gun 14 p2236 A66-27236

Multistage ion gun using separate acceleration and deceleration stages and neucryptite or spodumene emitters 16 p2760 A66-30428

Axially symmetric or two-dimensional electrode system with emitting surface, discussing convergence and accuracy criteria of iteration methods 17 p2887 A66-32700

Impedance of growing wave in interaction region used to calculate minimum value of traveling wave tube noise coefficient 19 p3297 A66-35548

Cathode current density distribution, beam minimum radius and location and electrode current interception, using computer techniques on electron guns 20 p3528 A66-37490

Electron beam rotation experiments on linear spiratron with M-type electron gun 20 p3533 A66-38005

Electron gun with voltage drop across cathode using space charge streams for M-beam generation 21 p3710 A66-38833

**ELECTRON IMPACT**

Excitation and inversion method in gas lasers noting characteristics of helium-neon laser and ionized and three-level laser system 04 p0530 A66-13951

Ionization cross section of ground state helium cation by electron impact in Born exchange approximation 04 p0549 A66-14312

Vibrational excitation cross sections of diatomic molecules calculated, using Born approximation by including polarization interaction between incident electron and molecule 06 p0912 A66-16630

Quantitative comparison of systematic approaches to generation of inelastic impact cross section with aid of simple universal excitation cross section function [AIAA PAPER 66-150] 06 p0913 A66-17097

Photoelectron impact excitation effect on dayglow intensity, calculating energy distribution for various altitudes 07 p1028 A66-17374

Absolute cross section for single ionization of lithium ions by electron impact over 75.6 to 800 ev electron energy 07 p1084 A66-18425

Mass spectrometric electron impact ionization potentials rapidly obtained by electronic control and automatic data processing systems 07 p1091 A66-18489

Absolute cross section for ionization of atoms and diatomic molecules by electron impact 09 p1410 A66-20958

Born approximation of cross sections for electron and proton impact ionization of Na and Mg 11 p1737 A66-22496

Born-exchange and Ochkur approximations used to calculate electron impact ionization cross sections for He, Li, Be, Na and Mg atoms in ground states 11 p1737 A66-22497

Mass spectrometric fragmentation behavior of N-n-propyl and N-n-butyl pyrrolidone and N-alkyl succinimides subsequent to electron impact 11 p1651 A66-23412

Measurement of cross section for excitation of cesium atom by electron impact in prethreshold energy region, using electron trap method 12 p1925 A66-24878

Gas discharge by laser pulse, taking into account photoionization due to electron impact 12 p1891 A66-24887

Electron impact excitation mechanism of

argon-ion continuous and long pulse lasers 13 p2102 A66-26206

Quantitative comparison of systematic approaches to generation of inelastic impact cross section with aid of simple universal excitation cross section function [AIAA PAPER 65-150] 15 p2545 A66-29268

Fast ion molecule reaction in carbon dioxide analyzed, using mass spectrometer 16 p2645 A66-30116

Ionization of oxygen examined, using charge exchange in double mass spectrometer, noting break in electron impact ionization efficiency curve and constructing breakdown graph 20 p3605 A66-38097

Absorption spectrum of sulfur hexafluoride in far UV due to electron impact and inelastic scattering and oscillator strengths for three absorption bands 21 p3774 A66-38524

Discrepancies in electron-impact broadening of isolated ion lines due to neglect of collision-induced transitions between upper and lower levels of line and Coulomb interactions with perturbed ions 22 p3951 A66-40419

Measurement of cross section for excitation of cesium atom by electron impact in prethreshold energy region, using electron trap method 23 p4099 A66-41085

Gas discharge by laser pulse, taking into account photoionization due to electron impact 23 p4076 A66-41094

Ionization cross sections and efficiencies by electron impact and photoionization for molecular ionization at low energies 23 p4098 A66-41268

Excitation of hydrogen molecule from ground state to B and C electronic states by electron impact, using one-center wave functions of Huzinaga together with Born approximation 23 p4098 A66-41360

Small neutral hydrogen flux in total solar wind flux and electron impact and photoionization mechanisms 23 p4123 A66-41689

Windowless total radiation gauge for shock tube measurements of high temperature gas radiance 24 p4208 A66-42183

**ELECTRON INTENSITY**

Longitudinal asymmetry of trapped energetic electron intensities attributed to lowering of mirror points in South African anomaly 10 p1599 A66-21160

Energy spectrum of electrons recorded by fluorescent screen indicators onboard Cosmos satellites, noting ratio of electron intensities 11 p1763 A66-23042

Length changes in electron irradiated high purity germanium at liquid helium and nitrogen temperatures, noting large initial expansion 13 p2157 A66-25047

Data from satellite 1963 38C, showing existence of 27-day periodicity in intensities of trapped electrons undergoing two increases and linked to interplanetary magnetic field 13 p2175 A66-26353

Correlation of time variations of proton and electron intensity of outer radiation belt and dependence on geomagnetic environment 15 p2575 A66-29103

Temporal variations of outer radiation zone electron intensities at 1000 km as affected by geomagnetic storms observed by Alouette I satellite 20 p3631 A66-37623

High energy trapped electrons in outer zone for 27-day, diurnal and storm time variations 20 p3639 A66-38317

**ELECTRON INTERACTION****SA PHOTON-ELECTRON INTERACTION**

Relationship between cyclotron resonance and interaction among current carriers in semiconductors 04 p0564 A66-14256

Surface photoeffect from highly alloyed semiconductor accounting for Coulomb electron interaction 04 p0567 A66-14344

Coulomb interaction of electrons and holes in contacts of degenerate n-and p-type semiconductors causes ground state instability relative to electron-hole pair formation 05 p0730 A66-14645

Ion-electron interaction in plasma 05 p0725 A66-15243

Gorkov Ansatz in superconductivity theory exactly satisfied by system of definite number of fermions 06 p0923 A66-16273

Vector pairing in small dimensional

superconductors vanishes when pair dimensions are larger than sample or electron mean free path 06 p0930 A66-17054

Electron interaction with quadrupole pumping field, noting phase-focusing character in quadrupole region and determination of amplifier effect 06 p0859 A66-17186

Cosmic ray particle interaction at hundred bev range, discussing parameters of inelasticity for collision with nucleus 07 p1113 A66-17538

Green function/Gorkov variational procedure calculation of transition temperatures of superposed superconducting films dominated by inhomogeneous electron-electron interactions 07 p1108 A66-18436

Superimposed normal superconducting films used in conjunction with theory to investigate nature and magnitude of electron-electron interaction in normal metal 10 p1572 A66-21174

Electron Coulomb interaction in strongly alloyed semiconductor films tends to reduce all energies to constant value without changing spectrum shape 11 p1750 A66-22344

Self-consistent theory of curvilinear electron fluxes interaction with wave conducting line, taking into account space charge 11 p1655 A66-22722

Electron correlation theory in nonclosed-shell states, discussing orbital wave functions and perturbation theory 13 p2130 A66-25376

Coulomb interaction of electrons and holes in contacts of degenerate n-and p-type semiconductors causes ground state instability relative to electron-hole pair formation 13 p2166 A66-25918

Microwave amplification by interaction of electron beam with cesium plasma 14 p2345 A66-28045

Surface photoeffect from highly alloyed semiconductor accounting for Coulomb electron interaction 14 p2367 A66-28239

Ionospheric plasma movement, neutral-neutral and charged-neutral particle collisional interactions, electron-ion collision frequencies, mobility and LF Hall conductivity, irregularities, etc 15 p2495 A66-30053

Magnetization-density-wave instability of quantum plasma in random phase approximation 16 p2757 A66-30192

Book on nonlinear electron-wave interaction phenomena and application to amplifiers, oscillators and other crossed electric and magnetic field devices 16 p2653 A66-30873

Cross sections for sticking electrons to spherical charged particles, considering Debye screening distance of Coulomb force field 16 p2754 A66-31158

Light absorption coefficient for indirect photon transitions during Coulomb interaction of electrons at high electron densities 16 p2787 A66-31766

Helium plasma in confining magnetic field, noting spectral efficiency in optical region, electron temperature and density, electron ion recombination, etc 17 p2965 A66-32409

Additional measurements from electron-magnetic field interactions and power limitations in coaxial filament and anode geometry in electron bombardment heated thruster 17 p2990 A66-32462

Ferromagnetic semiconductors with exchange interaction due to conduction electrons 17 p2986 A66-33306

Suggested origin of low energy tails in radiative recombination spectra due to degenerate conduction band 19 p3437 A66-35475

Electron interaction with quadrupole pumping field, noting phase-focusing character in quadrupole region and determination of amplifier effect 19 p3314 A66-35544

Exchange interaction between f-electrons and s-electrons in atomic shells of crystal lattice of rare-earth metals, examining calculation methods for Hamiltonian of s-f exchange 20 p3617 A66-37476

Collision frequency in E and D regions of ionosphere for electrons and neutral molecules 22 p3906 A66-39948

Behavior of wave function for system of charged particles near coalescence of any

two of them, noting electron-nucleus cusp conditions for diatomic molecules 22 p3861 A66-40904

Self-consistent theory of curvilinear electron fluxes interaction with wave conducting line, taking into account space charge 23 p4037 A66-41460

Approximate ground state wave functions used in calculation of interaction energies by second-order perturbation theory 23 p4033 A66-42081

Resonance of antineutrino-electron interaction cross section, calculating electron density and velocity distribution via Ritz method 24 p4270 A66-42932

#### ELECTRON-ION RECOMBINATION

Ambipolar diffusion and electron attachment in photoionized nitric oxide by presence of negative ions, noting electron loss and electron density 03 p0394 A66-12326

Electron-ion recombination in photoionized nitric oxide neon gas mixture, noting decay of electron density and correlation factors 03 p0394 A66-12327

Optical interferometric, spectrographic and microwave techniques of electron-ion recombination in neon-spectral line 03 p0394 A66-12330

Electron-ion recombination rate and effective ionization calculated for cesium plasma by Bates method 03 p0398 A66-12510

Helium afterglow discussing stability of collisional-radiative recombination of ions with electrons and neutral particles 04 p0547 A66-13652

Rate of electron-ion recombination by collision of two electrons in ion field obtained by Thomson formula, noting recombination rate of three-body collision 04 p0550 A66-13710

Equilibrium statistical mechanics of electron-ion plasma developed in terms of Wigner distribution function 04 p0551 A66-13713

Ion-pairing process in nickel and lithium doped germanium 04 p0565 A66-14270

Electron-ion recombination processes in nonequilibrium plasma, noting validity of commonly made assumptions 05 p0625 A66-15810

Recombination rate of electrons in plasma containing ions of molecule with both repulsive and bound neutral states 05 p0729 A66-15863

Plasma formation by dissociation of molecular ions by arc discharge in apparatus for adiabatic plasma confinement 06 p0915 A66-16152

Electron and ion recombination coefficient in weakly ionized gas of homeopolar molecules 09 p1407 A66-19965

Ionosphere formation theory, reviewing solar radiation, absorption, ionization cross section rate, electron removal in F and upper E layer, etc 10 p1533 A66-21851

Monte Carlo calculations of cross section magnitude of electron-positive-molecular-ion dissociative recombination 13 p2130 A66-25375

Ionization enhancement from Van Allen electrons in South Atlantic magnetic anomaly, noting longitudinal variation of trapped electrons, electron-ion recombination, etc 13 p2176 A66-26362

Plasma formation by dissociation of molecular ions by arc discharge in apparatus for adiabatic plasma confinement 15 p2557 A66-29882

Electron-ion recombination coefficients for atmospheric ions determined in laboratory and compared with ionospheric analysis 15 p2548 A66-29947

Mean probability of coupling between electrons of flame on electronegative gas and radioactive bromine tracer injected into flame, calculating electrons coupling cross section on bromine atoms 16 p2763 A66-31208

Conductivity and electron-ion recombination coefficient in argon determined from collision cross sections of electrons with neutral particles 16 p2755 A66-31599

Gas pressure dependence of attachment and recombination coefficients for thermalized electrons in air and oxygen 18 p3143 A66-34035

Ionization outside equilibrium and

relaxation of ionization in cesium seeded argon 18 p3144 A66-34102

Steady state donor-acceptor recombination rate and effects on diode current and injection electroluminescence, using Shockley-Read-Hall semiconductor phenomenological model 21 p3800 A66-38993

Cryogenic optically excited recombination emission in single crystal InSb semiconductor and transitions involving phonon creation, acceptor impurities and band-to-band emissions 21 p3800 A66-38996

Electron-ion recombination process due to electron collision in plasma with capture electrons transferred to ground level 22 p3954 A66-39767

#### ELECTRON IONIZATION

Current discharge of helium neon laser on laser action 03 p0376 A66-12439

Thermodynamic properties of hydrogen ionized plasma in equilibrium 03 p0403 A66-12966

Spatial distributions of free electrons in near wakes of spheres in hypersonic flight [AIAA PAPER 66-55] 07 p0983 A66-18449

Intensity estimation for lunar X-rays excited by high energy terrestrial electrons from solar stream induced geomagnetic cavity 09 p1442 A66-20388

Relaxation to steady state, electron collision ionization, recombination and collision cross section uncertainties in conducting nonequilibrium plasma stream [AIAA PAPER 66-193] 10 p1562 A66-21439

Growth rate of ionization by electron impact in presence of laser beam, elastic and inelastic scattering cross sections, free-free absorption, excitation and ionization coefficients, breakdown times and thresholds 13 p2134 A66-26193

Experimental evidence of inverse bremsstrahlung and electron-impact ionization in low pressure argon ionized by giant pulse laser 15 p2544 A66-29115

Asymptotic form of wave function and threshold behavior of cross section for ionization of atomic hydrogen by electron impact 15 p2544 A66-29116

Ionized electron centers in irradiated lithium fluoride crystals investigated by observing emission and absorption spectra 15 p2568 A66-29641

Plasma ionization associated with thermal electron or nonthermal distribution of electron velocities for various gas densities 15 p2554 A66-29751

Ionization of hydrogen and hydrogenic positive ions by electron impact 19 p3409 A66-36324

Asymptotic approximation of distribution of small ionization bursts produced by high energy muon under thick layer of matter in direct electron-pair production 24 p4271 A66-42935

#### ELECTRON MASS

Temperature dependence of effective electron mass of indium antimonide 04 p0565 A66-14275

Effective mass of electrons and holes in semiconductors from magneto-optical laser emission studies 05 p0741 A66-15832

Effective mass of electrons in n-type gallium arsenide deduced from measurements of Hall coefficient and thermoelectric power 09 p1426 A66-20197

Variation and behavior of ionospheric electron concentration at altitudes of 100 to 300 km as measured by rocket probes 09 p1378 A66-21007

Composition of outer ionosphere measured, using RF mass spectrometers mounted on board Elektron I and II satellites 09 p1378 A66-21008

Effective mass in InAs and InSb from Landau shift of peak emission in laser diodes 10 p1543 A66-21579

Twelve distinct mass series identified and mass values determined as function of orientation of magnetic field in Fermi surface of zinc at cyclotron resonance 10 p1581 A66-21735

Identification of mass series and mass values in Fermi surface of cadmium at cyclotron resonance compared with results for zinc 10 p1581 A66-21736

Optical reflection, transparency and Faraday effect for indium antimonide, calculating effective electron mass, relation

between energy and wave number, etc 16 p2788 A66-31777

Effective electron mass in n-type indium arsenide at high temperatures and high carrier density, noting temperature dependence of effective electron mass 20 p3616 A66-37444

Effective electron mass dependence on pressure in InSb determined by measuring electron concentration and thermal emf 20 p3624 A66-38427

Effective electron mass dependence on pressure in InSb determined by measuring electron concentration and thermal emf 21 p3800 A66-38960

#### ELECTRON MICROSCOPE

Constructing and evaluating electrostatic filter lenses with wide image angles for low voltage electron microscope 02 p0228 A66-11498

Electron microscope filter lenses with unconventionally shaped electrodes and large image angles 02 p0228 A66-11499

Electron microscope using electrons suffering energy loss to form images for qualitative microanalysis 05 p0649 A66-15104

Improved resolution of scanning electron microscope used to define geometry of electrode areas during fabrication of solid state devices 06 p0855 A66-16769

Electron microscope observation of active centers at surface of semiconductor crystals, applying to p-type Si single crystals 09 p1412 A66-19989

Text on electron optics covering principles and application, electron lenses, cathode ray tubes, mass and beta ray spectrographs, quadrupole systems, image converters, etc 09 p1402 A66-20333

Scanning electron microscope observation of electrical leakage paths due to crystal defects in silicon diodes 11 p1668 A66-23028

Hot and cold hardening of aluminum-copper-magnesium alloys for application to missiles and aircraft skins analyzed, using electron microscope, noting metastable phases 12 p1893 A66-23747

Aluminum alloy with various metal additions analyzed for aging, using electron microscope 12 p1898 A66-25022

Electron microscope investigation of dislocation structure of silicon single crystals after compressive deformation at various stages of deformation curve 15 p2557 A66-28562

Scanning microscope for studying Si p-n junctions by electron or ion bombardment 17 p2927 A66-33454

Stroboscopic electron mirror microscope observations of Si p-n junctions in pulsed regime 17 p2928 A66-33455

Scanning electron microscope observations of p-n junctions using small periodic bias voltages 17 p2988 A66-33457

Electron microscope investigation of dislocation structure of silicon single crystals after compressive deformation at various stages of deformation curve 23 p4112 A66-41283

#### ELECTRON MICROSCOPY

Quantitative analysis of stress level, material characteristics or temperature level at which fracture occurs, using electron microscope 01 p0088 A66-10962

Aberration of width of linear image created by skew rays in composite quadrupole lens 02 p0199 A66-11782

Combined effect of carbon impurity atoms and neutron radiation on structure of molybdenum studied by transmission electron microscopy 02 p0246 A66-12193

Transmission electron microscopy to determine white etching alteration around inclusion in cyclically stressed bearing steel due to cellular grain formation [ASME PAPER 65-WA/CF-1] 05 p0703 A66-15614

Electron micrographs from fraction I protein of Chinese cabbage leaves, noting substructure in individual particle 06 p0811 A66-16119

Width of depletion region of reverse-biased silicon p-n junction 06 p0923 A66-16382

Length change, X-ray lattice parameter, small angle X-ray scattering, electron microscopy and thermal conductivity measurements related to radiation-induced

- defects in semiconductors 06 p0933 A66-17117
- Replica techniques and electron and optical microscopy to study laser irradiated metal surfaces 07 p1052 A66-18393
- Large dislocation loops on basal plane and rows of prismatic dislocation loops in quenched magnesium 07 p1052 A66-18513
- Diffraction contrast analysis, using transmission electron microscope, of two-dimensional defects present in mechanically damaged silicon after annealing 07 p1109 A66-18516
- Imperfection formation in epitaxial gold films, observing crystal-lattice dislocations due to rotation and displacement misfits between neighboring islands of deposit film 07 p1110 A66-18517
- Light and electron microscopic metallography and X-ray diffraction microanalysis of phase reaction during heat treatment of Ni-base 08 p1236 A66-18757
- Transmission electron microscopy observation of microhardness, of shock-hardened iron and bcc iron-based alloy structures 08 p1236 A66-18758
- Transmission electron microscopy structural analysis of dislocations in stress-corrosion cracking of 7075 aluminum alloy 08 p1236 A66-18761
- Martensitic transformation kinetics and maraging mechanism in Fe-Mn-Ni-Ti alloy observed by electron and X-ray diffraction 08 p1236 A66-18762
- Electron microscopic estimation of perpendicular anisotropy of magnetic thin film originating from nonmagnetic grain boundaries 08 p1270 A66-19012
- Domain structure of single-crystal epitaxial iron films as function of perfection of crystalline structure, using Lorentzian electron microscopy, noting two-axis anisotropy 11 p1753 A66-22806
- Structured water forms in biological systems, relationship to macromolecular system, detection and evaluating electron microscopy 11 p1645 A66-22992
- Domain structure of partially oriented thin permalloy films analyzed through appearance of adjoining 180 degree walls of equal contrast and by electron microscopy 12 p1934 A66-25029
- Immobile dislocation network of high density in Campo del Cielo observed by thin-film transmission electron microscopy 13 p2177 A66-25136
- Transmission electron microscopy determination of structure and morphology of oxide films during Ti oxidation initial stages 13 p2107 A66-25584
- Transmission electron microscopic observations on preexisting dislocation as sinks for neutron-irradiation-induced point defects and dislocation reaction to subsequent deformation 13 p2107 A66-25586
- Fracture surfaces of metals and alloys examined, using optical and electron microscopy, noting fracture mechanisms during crack initiation and propagation 13 p2108 A66-25768
- Aging behavior of explosively deformed 2219 Al investigated by transmission electron microscopy 13 p2086 A66-25775
- Spatial interrelations between mitochondrial apparatus of capillary cells and synapses of these cells in utricular receptor of animals at rest and after exposure to accelerations, using electron microscopy 13 p2011 A66-26250
- Domain boundaries and superdislocations of structure of Alnico V by thin film electron transmission microscopy 14 p2311 A66-26882
- Vacuum deposited films of titanium dioxide examined, using electron microscopy and diffraction methods, noting crystal dislocation due to electron beam irradiation 14 p2359 A66-27133
- Cleavage behavior of solid solution alloy Ta-Mo, noting electric resistivity, tensile properties, lattice parameters, diffraction coefficients, etc 15 p2520 A66-28650
- Structure and electrical resistance as function of temperature for Nichrome-silicon monoxide cermet films on single crystal Si substrates 16 p2783 A66-31425
- Stacking faults in titanium carbide shown by electron microscopy bounded by partial dislocations 17 p2976 A66-32263
- Dissociation and reassociation reactions of hemocyanin mixtures analyzed by electron microscopy, noting original molecular structures 18 p3060 A66-34459
- Macromolecular organization of hemocyanins and apohemocyanins as revealed by electron microscopy 18 p3060 A66-34460
- Aluminum particle combustion noting changes from preignition to burnout, flame structure, particle geometry, etc 18 p3266 A66-35021
- Optical absorption of island films of gold as function of island density obtained from electron micrographs and film thickness 19 p3435 A66-35416
- Thin film transmission electron microscopy on n-type silicon irradiated with fast neutrons, noting erratic polishing process and irregular surface 19 p3436 A66-35431
- Thin film transmission electron microscopic analysis of stress corrosion of heat-treated aluminum 21 p3749 A66-38471
- Transmission electron microscopic analysis of initial epitaxial growth stage of evaporated Au films on NaCl cleavage surfaces 21 p3798 A66-38758
- Transmission electron microscopy on polycrystalline Al, determining hardening and tensile yield stress variations as function of quenching temperature 21 p3753 A66-39586
- Transmission electron microscopic and molecular beam study of nucleation and growth in chemical vapor of epitaxial silicon films on carbon-contaminated silicon substrates 21 p3806 A66-39589
- ELECTRON MOBILITY**
- Stochastic aspects of low mobility theory applied to electrical conductivity problem in Wannier representation 01 p0106 A66-10723
- Photovoltaic response in semiconductors based on Demer effect which does not overtly depend on hole and electron mobility 02 p0275 A66-11976
- Cadmium selenide thin film transistors /TFT/ where electron mobility values exceed bulk single crystal values 02 p0276 A66-11979
- Transport effects in semimetals and narrow-gap semiconductors including nonlinear, thermomagnetic and superconductive effects and tunneling 04 p0559 A66-13451
- Transverse Demer effect in anisotropy of electrical and photoelectrical characteristics of indium selenide 04 p0565 A66-14259
- Temperature dependence of effective mass and influence of two-phonon processes on mobility in semiconductors with narrow forbidden bands 04 p0565 A66-14263
- Individual and group defect contribution to variation in carrier concentration and mobility in n-type germanium irradiated with fast neutrons 05 p0730 A66-14644
- Oxygen alloyed gallium arsenide, explaining anomalous mobility distribution in crystals during fusion in presence of oxygen 05 p0731 A66-14658
- Drift mobility induced by pulsed gamma irradiation of polystyrene 05 p0735 A66-14858
- Electron mobility in potassium and cesium DC glow discharges at low electron temperature 05 p0728 A66-15809
- Electron drift velocity and mobility of indium antimonide obtained from pulsed measurements of conductivity and Hall effect at various temperatures 06 p0922 A66-16173
- Electron mobility of gallium arsenide-phosphorus alloys 06 p0923 A66-16380
- Point defect mobility and annealing in irradiated germanium and silicon by electron or gamma ray irradiation 06 p0937 A66-17140
- Drift mobility of radiation induced defects in silicon between zero and 120 degrees C 06 p0937 A66-17141
- Electron mobility changes in GaAs single crystals due to electron irradiation interpreted in terms of ionized-scattering theory 06 p0939 A66-17151
- Coherent increase of spin wave semiconductors by electric current, if electron drift velocity exceeds spin wave phase velocity 07 p1105 A66-18368
- Mobility of hot electrons in runaway regime of n-type InSb and GaAs at low temperatures 09 p1412 A66-19987
- Three-centimeter wavelength frequency multiplier using gas-discharge plasma in nonuniform electric field, examining amplitude and phase instability 09 p1358 A66-20793
- Low temperature resistivity of yttrium-based alloys containing small amounts of rare earth metals, deriving exchange integrals from resistivity data 09 p1430 A66-20846
- Electron Hall mobility from 4 to 300 degrees K with undoped single crystals of GaAs grown in quartz boats by Bridgman method and zone-melting technique 09 p1430 A66-20848
- Plasma density instability induced by electron-hole generation in impact ionization as affected by electric field 10 p1575 A66-21536
- Nonisothermal wave motion in nondegenerate semiconductors with charge carrier possessing scalar effective mass 10 p1586 A66-22091
- Generalized equation for steady state motion of electrons in cylindrical electrostatic system with arbitrary cross section, calculating critical focusing current 11 p1735 A66-22493
- Electrophysical parameters of epitaxial p-n junction regions determined, using galvanomagnetic and photomagnetic measurements 11 p1751 A66-22734
- Indium antimonide thin film preparation via vacuum deposition, noting evaporation rate effects on electrical properties of film 11 p1756 A66-23022
- Electron attachment and detachment coefficients for pure oxygen determined from current waveforms in drift tube 13 p2130 A66-25374
- Ohm law in partially ionized inhomogeneous plasmas in presence of magnetic field derived, accounting for electron, ion and fluid motion 13 p2140 A66-25418
- Electron mobility in inversion layer on p-type silicon surface 13 p2163 A66-25439
- Consistency of Gunn effect with excitation of conduction band electrons from high mobility minimum to low mobility valleys 13 p2164 A66-25517
- Gunn effect in gallium arsenide, noting negative differential electron mobility at high electric fields in conduction band 13 p2165 A66-25546
- Effect of nonlinearities on electron cyclotron resonance, stressing determination of maximum velocity of plasma under cyclotron resonance conditions 13 p2143 A66-25711
- Individual and group defect contribution to variation in carrier concentration and mobility in n-type germanium irradiated with fast neutrons 13 p2166 A66-25917
- Oxygen alloyed gallium arsenide, explaining anomalous mobility distribution in crystals during fusion in presence of oxygen 13 p2167 A66-25933
- Equatorial electrojet cross section profile, describing longitudinal variations, current density, magnetic field produced and electron drift velocity 13 p2074 A66-26357
- Minority carrier drift mobility in p-type germanium single crystal under uniaxial lattice compression 14 p2365 A66-27758
- Transient acoustoelectric interaction in CdS and ZnS crystals during single transit, measuring electron drift 15 p2563 A66-28758
- High fields effect on negative field effect electron carrier mobility on MOS surfaces 16 p2771 A66-30196
- Radiative corrections to Thomson scattering in laser beams arising from damping of electron motion and photon density, using quantum mechanics 16 p2717 A66-30628
- Coupling of electron motion to lattice longitudinal acoustic mode in n-gallium antimonide leading to variations in sound velocity 16 p2775 A66-30732
- Structure and electron mobility of thin indium arsenide films prepared by co-evaporation technique 16 p2780 A66-31094
- Electrical properties of nickel ferrite in terms of Jonker model, noting magnitude of energy gap between Fe and Ni levels and mobilities of electrons and of positive

holes 16 p2781 A66-31215

High-mobility InSb thin film preparation by flash evaporation of elemental In and Sb in vacuum and oxidation of film surface prior to recrystallization in inert atmosphere 16 p2785 A66-31575

Origin of polarization of radiation from GaAs diodes, noting intensity dependence on current density and effect of anisotropic electron velocity distribution 16 p2667 A66-31770

Electron mobility in p-type indium antimonide, noting entrainment of minority carriers by majority carriers 16 p2789 A66-31784

Electron motion examined as major contributor to conductivity of thermally ionized gas in electrical field 17 p2964 A66-31892

Distribution function and electron mobility in polar semiconductors for nonparabolic dispersion law 17 p2986 A66-33305

Evaporated and recrystallized CdS layers, discussing electron mobility, level distribution, capture cross section and techniques of measurement 19 p3435 A66-35408

Fluid equations used in describing electron and ion motion perpendicular to field lines in slab of plasma supported against gravitational field by sheared magnetic field 19 p3417 A66-36527

Plasma electron thermal motion influence on propagation of plane oscillations of plasma which are adiabatic 21 p3781 A66-39014

Current density, electron mobility, magnetoresistance, negative resistance and impact-ionization-produced solid state magnetoplasma oscillations in InSb single crystal semiconductor at high electric and magnetic fields 21 p3805 A66-39568

Three-centimeter wavelength frequency multiplier using gas-discharge plasma in nonuniform electric field, examining amplitude and phase instability 22 p3874 A66-39852

Carrier density, mobility and space-charge-limited current in p-type silicon 22 p3962 A66-40049

Electrophysical parameters of epitaxial p-n junction regions determined, using galvanomagnetic and photomagnetic measurements 23 p4113 A66-41472

Electron effective mobility variation in AC for small signals as function of operating frequency of thin film transistors and dielectric diodes 24 p4181 A66-42392

Temperature dependence of Hall coefficient and resistivity of n-type epitaxial gallium arsenide in 4.2 to 300 degree K temperature range 24 p4254 A66-42423

Signal excitation in negatively charged antenna rod in effect of unfocused laser beam 24 p4224 A66-42753

**ELECTRON MULTIPLIER**

**SA PHOTOMULTIPLIER**

High sensitivity fast-response laser detection system, describing microwave response photoelectric detector with amplification and mixing functions 10 p1544 A66-22046

Correlation function of response of multichannel electronic multiplier to Gaussian input noise 11 p1676 A66-22711

Triaxial electron spectrometer, mounted on OGO-E spacecraft, measures flux and energy distributions of electrons, noting electron multiplier 12 p1877 A66-23689

Frequency response of avalanche photodiodes, discussing multiplication rate and extension of Townsend theory 15 p2458 A66-28889

Gain improvement to electron multiplier used in mass spectrometers 16 p2702 A66-30430

Photoelectron counter stellar photometer noting design, applicability of secondary electron multipliers, etc 18 p3113 A66-34617

Apparatus for teaching and research in electron physics including emitters, cathode ray tubes, electron multipliers and mass spectrometer 18 p3088 A66-35033

Channelled electron multiplication mechanism, discussing ionic feedback and saturation effects 19 p3359 A66-35910

Continuous channel electron multiplier operated in pulse saturated mode, noting

space charge limiting as major cause of gain saturation 19 p3359 A66-35911

Traveling wave HF crossed field photomultiplier with helical output circuit for electron multiplication at microwave modulation rates 24 p4182 A66-42567

**ELECTRON OPTICS**

TV camera, visual display and video-signal information storage tubes, noting secondary electron conduction camera tube 05 p0642 A66-14561

Nonlinear Maxwell equation for optics of many-particle system, noting Raman scattering from electron plasma 05 p0695 A66-14905

Electron-optical converters in astronomy 05 p0681 A66-15212

Text on high energy beam optics including trajectory optics in quadrupole systems and deflecting magnets, spectrometry, envelope optics and particle beams 06 p0911 A66-16306

Text on electron optics covering principles and application, electron lenses, cathode ray tubes, mass and beta ray spectrographs, quadrupole systems, image converters, etc 09 p1402 A66-20333

Electron optical method for study of metallic and semiconducting surfaces, based on low energy electron beam scanning 12 p1884 A66-24939

Quantitative observation of light modulation by electro-optic effect in reverse-biased GaAs p-n junctions at wavelength of 1.15 microns 13 p2159 A66-25067

Operation of electron image time dissector framing camera achieving time resolution by multiple reflection in crossed magnetic and electric fields in electron image storage device 19 p3353 A66-35313

**ELECTRON ORBIT**

Frequency and collisionless damping rate of electronic resonances of one-dimensional plasma in potential distribution 01 p0112 A66-10511

P super n electron configuration for systems where spin-free Hamiltonian is applicable 16 p2754 A66-30861

Core integral and electron repulsion integral for 2p-p1 Slater-type orbitals of allyl radical and benzene molecule transformed to Lowdin orthogonalized basis set of atomic orbitals 16 p2754 A66-31185

Electrons trapped in magnetosphere, discussing dynamo electrostatic field, energetic electron electromagnetic drift and magnetic mirror-electron orbit effects 20 p3635 A66-38226

**ELECTRON OSCILLATION**

Broadband tunable tunnel diode oscillator in waveguide mounting, noting role of variable capacitor 03 p0339 A66-12450

Oscillation and Maxwellian distribution of electrons in cesium plasma 03 p0403 A66-12968

Plasma waves propagating transverse to uniform external magnetic field discussing electron motion, wavelength magnitude, frequencies and application of results 03 p0406 A66-13358

Plasma ion and electron oscillation 05 p0725 A66-15235

Secondary emission ratio and multiplication constant of electron-ion oscillatory discharge 06 p0919 A66-16872

Simultaneous electron and ion oscillations on discharge gap of four-electrode chamber 06 p0919 A66-16881

HF electron oscillations in inhomogeneous plasma, noting kinetic drift instability added to hydrodynamic instability 07 p1087 A66-17915

Transformation of transverse oscillations of electron flux by short magnetic lenses studied by eigenvector concept 08 p1199 A66-18907

Paramagnetic resonance occurring in plasma located in external electric field, noting relation between oscillation amplitude and electron frequency 08 p1262 A66-18976

Gunn effect oscillators including domain formation, microwave source potentialities, power transfer, efficiency, etc 08 p1193 A66-19120

Microwave radiation from high voltage plasma with oscillating electrons and resulting cyclotron frequency

harmonics 08 p1264 A66-19180

Charged particle drift across magnetic field in plasma with oscillating electrons contained in metal chamber 08 p1264 A66-19181

Electron transit time and impedance relation in rarefied plasma diode, considering electron and ion velocity straggling 08 p1193 A66-19193

Instability of noncollision plasma in strong external field in terms of development of nonpotential oscillations 09 p1408 A66-20599

Instability of HF electron oscillations in plasma flows with nonuniform velocity profile along lines of force of external confining magnetic field 10 p1569 A66-21991

Intense HF electromagnetic wave propagation in isothermal isotropic nonhomogeneous plasma, noting interaction with electrons of Langmuir frequency 12 p1921 A66-24212

Oscillator stability affecting electromagnetism compatibility during PRF generation, digital system reception, reception with phase lock, etc 12 p1838 A66-24599

Long-wave electron oscillations excited by electron beam in rarefied plasma in presence of magnetic field 12 p1925 A66-24883

Temperature measurement in shock heated gases via spectrum line reversal method, noting connection between electronic excitation and effective vibrational temperature 13 p2208 A66-25159

Build-up oscillations in system of two identical parallel-plate capacitors flanking quadrupole capacitor in longitudinal magnetic field 13 p2044 A66-26469

Intense radiation emission at electron gyrofrequency harmonics from magnetoplasmas, discussing resonances, dispersion relations, electron trajectory perturbations, etc 13 p2155 A66-26675

Quasi-linear equations for inhomogeneous plasma in magnetic field applied to pumping of energy of Langmuir oscillations 16 p2762 A66-31176

Convective excitation of ionic oscillations in plasma by inhomogeneous electron beam as result of spatial gradient of distribution function 17 p2968 A66-32537

Convective effects role in exciting axisymmetric oscillations in plasma cylinder in magnetic field with aid of radius restricted electron beam 17 p2968 A66-32538

HF electron oscillations in inhomogeneous plasma, noting kinetic drift instability added to hydrodynamic instability 18 p3146 A66-34175

Instability of HF electron oscillations in plasma flows with nonuniform velocity profile along lines of force of external confining magnetic field 18 p3150 A66-34968

Associated nonuniform electron-nucleus oscillations in ferromagnetic substances studied to determine feasibility of maser, using magnetic-reversal nuclear magnetic resonance 20 p3577 A66-37477

Instability of noncollision plasma in strong external field in terms of development of nonpotential oscillations 20 p3611 A66-38133

Stabilization criteria for drift instabilities in inhomogeneous plasma with external electric field derived from drift wave frequency variation 20 p3612 A66-38430

Stabilization criteria for drift instabilities in inhomogeneous plasma with external electric field derived from drift wave frequency variation 21 p3777 A66-38963

Langmuir electron oscillation behavior in inhomogeneous plasma in magnetic field when applied at angle to oscillation axis 21 p3781 A66-39012

Absorption cross section of electron systems in bands of diatomic molecules calculated, noting effects of temperature variation 21 p3775 A66-39077

Intense HF electromagnetic wave propagation in isothermal isotropic nonhomogeneous plasma, noting interaction with electrons of Langmuir frequency 22 p3956 A66-40576

Collective oscillations of electron shells of atom, discussing energy, excitation and damping 22 p3959 A66-40940

Long wave electron oscillations excited by electron beam in rarefied plasma in

- presence of magnetic field 23 p4099 A66-41090
- Impurity photoconductivity spectra of p-type germanium at low temperatures, noting parameters of relative depth of equidistant minima oscillations 24 p4256 A66-42515
- ELECTRON PARAMAGNETIC RESONANCE**
- Asymmetric line near  $g$  equals 2.00 of paramagnetic resonance spectrum of MgO powder as polycrystalline spectrum of ferric ions in cubic field 01 p0123 A66-10602
- Silicon and lead sulfide electron paramagnetic resonance spectra, showing gas action and temperature effect on EPR signal amplitude and absorption lines 01 p0124 A66-10765
- Structures and crystallization processes of semiconductor vanadium phosphate glasses of various composition, using electron paramagnetic resonance 01 p0091 A66-10771
- Quantum RF physics text covering magnetic resonance theory, electron paramagnetic resonance, nuclear magnetic resonances, two-and three-level masers, RF gas spectroscopy and ammonia oscillator 01 p0108 A66-10954
- Electron paramagnetic resonance in biradicals of hydrazine series, discussing structural changes during transition from mono-to biradical state 04 p0572 A66-13877
- Compensation effect on electron paramagnetic resonance spectrum of n-type silicon 04 p0567 A66-14342
- Splitting of electron paramagnetic resonance lines of zinc-tungstate crystals, discussing parameters and experimental technique 05 p0738 A66-15356
- Electron paramagnetic resonance spectrum of carbon dioxide when absorbed on UV irradiated magnesium oxide 05 p0630 A66-15766
- Sensitized photolytic decomposition of ethanol and diethyl ether glasses analyzed at low temperature, using electron paramagnetic resonance /EPR/ spectroscopy 06 p0820 A66-16124
- Electron paramagnetic resonance analysis of low temperature irradiation effects on silicon 06 p0934 A66-17122
- Electron paramagnetic resonance, electrical conductivity and impurity diffusion in doped boron 10 p1580 A66-21724
- Potential fluctuation effect on electron paramagnetic resonance lines in compensated n-type semiconductor 10 p1587 A66-22151
- Silicon and lead sulfide electron paramagnetic resonance spectra, showing gas action and temperature effect on EPR signal amplitude and absorption lines 11 p1748 A66-22276
- Structures and crystallization processes of semiconductor vanadium phosphate glasses of various composition, using electron paramagnetic resonance 11 p1720 A66-22282
- Adsorption of CO radicals on three types of magnesium oxide using EPR techniques, noting spectrum of adsorbed radical, bonding, etc 12 p1916 A66-23619
- Compensation effect on electron paramagnetic resonance spectrum of n-type silicon 14 p2367 A66-28237
- Maser material iron doped rutile, examining theoretical and experimental disagreement in spin Hamiltonian describing paramagnetic behavior 15 p2514 A66-29027
- Hamiltonian describing EPR spectrum of trivalent chromium ion in ordered lithium-aluminum spinel and rhombic distortion causing deviation of axes in octahedron electric field 16 p2787 A66-31763
- Parametric amplification by monochromatic pumping of electromagnestic oscillations of substance contained in resonator 17 p2885 A66-32244
- Electron paramagnetic resonance study of tetraoxygen difluoride, showing existence of FOO free radical giving asymmetric spectrum 17 p2871 A66-32854
- Exchange pairs spectrum analysis based on observation of nonlinear splitting of EPR signals of pairs of exchange-coupled chromium ions in corundum 18 p3154 A66-33943
- Hydroxyl radical concentration in rarefied CO flame by EPR method 18 p3265 A66-34551
- Potential fluctuation effect on electron paramagnetic resonance lines in compensated n-type semiconductor 19 p3440 A66-35765
- EPR detection of dangling bonds at surface of silica and quartz, noting inhomogeneous expansion 19 p3445 A66-36341
- Splitting of EPR lines of trivalent Cr ion in zinc tungstate by external electric field, noting angular dependence and corresponding spin Hamiltonians 20 p3615 A66-37370
- Four electron paramagnetic resonance transitions of SO free radical generated in gas-phase discharge of sulfur dioxide 22 p3859 A66-39908
- Electron paramagnetic resonance and optical spectra of trivalent erbium in type II crystals of calcium fluoride disclose existence of cubic, tetragonal and trigonal sites 22 p3961 A66-39916
- Jahn-Teller shift reorientation in Ni impurity centers of diamond and rise of C-N pair EPR spectrum with temperature 22 p3964 A66-40307
- Optical charge exchange in silicon carbide analyzed, using electron paramagnetic resonance 22 p3964 A66-40311
- EPR spectroscopic analysis of liquid oxygen difluoride, noting photolytic dissociation into paramagnetic species 23 p4097 A66-41237
- Electron paramagnetic resonance and Hall effect measurements to determine properties of dominant paramagnetic defect in electron irradiated p-type silicon 24 p4250 A66-42230
- ELECTRON-PHONON INTERACTION**
- Electron-phonon interaction proportional to applied external electric field and sound amplification in semiconductors 01 p0118 A66-10259
- Stochastic aspects of low mobility theory applied to electrical conductivity problem in Wannier representation 01 p0106 A66-10723
- Electromagnetic field absorption by electrons of semiconductor situated in quantizing magnetic field 01 p0123 A66-10725
- Operator for electron interaction with optical phonons, noting spin-lattice relaxation and additional magnetophonic oscillations of kinetic coefficients for semiconductors 01 p0124 A66-10767
- Phonon field effect on plasma frequency of dense electron gas for nonzero temperatures 02 p0267 A66-11708
- Indirect optical transitions in semiconductors due to photons and impurities, noting absorption and emission of photons, avalanche and long wavelength radiation 02 p0273 A66-11714
- Sudden heat capacity change near electron-phonon system transition point from superconducting to normal state 02 p0277 A66-12080
- Phonon interaction with iron group ions characterized by coupling constant discussing double quantum detection of phonon, propagation in dispersive medium and phonon maser 03 p0376 A66-12420
- Acoustic-mode scattering theory obtained with tight-binding approximation of band theory and applied to narrow-band semiconduction in organic molecular crystals 04 p0560 A66-13721
- Interaction of conduction electrons with lattice vibrations in semiconductor produces additional transmission bands or disappearance of resonance absorption region 04 p0564 A66-14251
- Components of relaxation tensors associated with thermal and spontaneous phonon scattering in semiconductors 04 p0564 A66-14254
- Temperature dependence of effective mass and influence of two-phonon processes on mobility in semiconductors with narrow forbidden bands 04 p0565 A66-14263
- Pseudopotential method for determining temperature-dependent electric resistance of lithium, neglecting free electron approximation and examining electron-phonon interaction 04 p0566 A66-14316
- Electron-phonon interaction for calculation of critical temperature for ordinary and anomalous superconductors 04 p0568 A66-14347
- Electrical conductivity of polar semiconductors in electric fields, calculating lattice and Coulomb electron scattering mechanism by kinetic equation method 04 p0568 A66-14350
- Transport coefficients of n-indium arsenide to calculate electron concentration, mobility and three-band scattering mechanism 04 p0570 A66-14481
- Interaction of charge carriers with acoustic waves by deformation potential in semiconductors 05 p0732 A66-14669
- Emitter-collector current transfer ratio of electron optical phonon scattering in metal semiconductor structures 05 p0732 A66-14670
- Low temperature thermal conductivity of 2-mev electron-irradiated and annealed single-crystal silicon 05 p0741 A66-15868
- Electrically active impurities effect on germanium thermal resistivity at low temperatures measured on n-type single crystals 05 p0742 A66-15875
- Matrix elements of electron-phonon interaction and electric resistance in nickel, using electronic structure of Fermi surfaces and phonon spectrum 06 p0894 A66-16175
- Electron-phonon interaction in semiconductors, explaining electron diffusion in solid in terms of effect of electron-phonon coupling 07 p1098 A66-17824
- Superconducting transition temperatures of Cd-Hg alloys covering complete composition range, considering effect of ordering 07 p1109 A66-18444
- Thermodynamic behavior of strong coupling superconductors, with complex energy gap function and renormalization parameter for lead and mercury 09 p1423 A66-20072
- Relation of thermodynamic parameters to energy gap of superconducting elements and alloys 09 p1424 A66-20074
- Low temperature study of resistivity and thermoelectric power variations of silver-palladium alloys as function of concentration, caused by electron diffusion 09 p1425 A66-20079
- Phonon drag in p-GaAs, graphing temperature dependence of thermoelectric power 09 p1426 A66-20196
- Spin-magnetophonon interaction effect on light absorption in semiconductor 09 p1426 A66-20199
- Resonance carrier scattering and spin-magnetophonon interaction effect on semiconductor magnetic susceptibility 09 p1427 A66-20200
- Volt-ampere and current carrier mobility characteristics of semiconductors with electron-phonon bonds proportional to applied field 10 p1582 A66-21968
- Coherent excitation of optical phonons in polar semiconductors developed, using Boltzmann equations 10 p1584 A66-22071
- Hall effect in alloyed crystals of n-type indium antimonide 10 p1589 A66-22165
- Operator for electron interaction with optical phonons, noting spin-lattice relaxation and additional magnetophonic oscillations of kinetic coefficients for semiconductors 11 p1748 A66-22278
- Electron-phonon coupling in piezoelectric semiconductors, obtaining electric field and current density vectors for application to ultrasonic amplification 11 p1750 A66-22401
- Negative conductivity, induced by nonequilibrium state in semiconductors, due to short electron lifetime in conduction band 13 p2160 A66-25101
- Hot-electron transistors, discussing application of Schottky-emitter transistor to VHF operation 13 p2038 A66-25561
- Electron-phonon interaction proportional to applied external electric field and sound amplification in semiconductors 13 p2168 A66-25976
- Temperature variation and carrier concentration effects on density-of-states effective mass, polar and dipolar thermoconductivity, electron and phonon scattering and electron-phonon interaction in doped Si-Ge alloys 14 p2365 A66-27759
- Electron-phonon interaction for calculation of critical temperature for ordinary and anomalous superconductors 14 p2368 A66-28243
- Electrical conductivity of polar semiconductors in electric fields, calculating lattice and Coulomb electron scattering mechanism by kinetic equation method 14 p2368 A66-28247

Strong electron-phonon interaction which couples electron to lattice motion in F center of alkali halide crystal by measuring temperature dependence of F center absorption and emission bands 15 p2559 A66-28629

Light dispersion and absorption by impurity centers in solids calculated via two-particle Green function method, assuming weak electron-phonon interaction 15 p2559 A66-28632

Phonon spectrum of lead indium alloys noting distinctness of impurity band as inferred from electron tunneling measurements 16 p2768 A66-30130

Scattering of light from pulsed ruby laser by plasma jet, noting cross section, electron-phonon interaction, etc 16 p2716 A66-30139

Negative conductivity, induced by nonequilibrium state in semiconductors, due to short electron lifetime in conduction band 16 p2771 A66-30280

Thermoelectric power in niobium-zirconium alloys noting phonon drag peak attenuation due to Zr solute addition at very low temperatures 16 p2780 A66-31156

Electron vibration spectra of light absorption in molecular crystals, taking oscillation frequency changes as principal mechanism of exciton-phonon interaction 16 p2780 A66-31178

Hot electrons in anisotropic semiconductor, considering case of scattering by acoustic phonons within one energy valley with nondegenerate bottom 17 p2977 A66-32318

Semiconductor photoconductivity dependence on external radiation frequency, examining electron-phonon interaction 18 p3158 A66-34689

Ionization chamber to investigate distribution of energy portion transferred to photons by nuclear active particles colliding with atomic nuclei of C, Fe and Pb 18 p3215 A66-35157

Electron-phonon interaction current density, thermodynamic Green function and other electromagnetic properties of superconductors, using Froehlich-Hamilton model 19 p3438 A66-35481

Hall effect in alloyed crystals of n-type indium antimonide 19 p3441 A66-35779

Electron-phonon interaction phenomena observed in GaAs and CdS, examining current saturation, ultrasonic emission by charge carriers and acoustic amplification 19 p3445 A66-36256

Coupling between plasmons and polar phonons in degenerate semiconductor gallium antimonide analyzed, starting from electron-phonon Hamiltonian 19 p3447 A66-36400

Superconducting transition temperature of thin film, showing growth of temperature and decrease in film thickness due to phonon electron interaction 20 p3616 A66-37378

Thermal conductivity of lanthanum and monochalcogenides, noting role and temperature dependence of crystal-lattice conductivity 20 p3617 A66-37556

Ginzburg-Landau equations for local superconductors in magnetic field starting from equations of coupled electron-phonon system with treatment restricted to temperatures near critical temperature 20 p3619 A66-37641

Electromagnetic field absorption by electrons of semiconductor situated in quantizing magnetic field 20 p3619 A66-37662

Extension of pairing theory of superconductivity to electron-phonon coupling, applying Landau quasi-particle approximation 21 p3796 A66-38552

N-type Ge hot carrier Hall mobility, magnetoresistance, Maxwellian energy distribution, electron-electron and intervalley electron-phonon collisions 21 p3801 A66-38997

HF long wavelength conductivities of solid state plasmas in thermal equilibrium derived, using variational formalism 21 p3791 A66-39106

Ferromagnetic spin correlations from strong Coulomb interactions between valence electrons resulting in enhanced singlet-state repulsion 21 p3803 A66-39263

Volt-ampere and current carrier mobility characteristics of semiconductors with

electron-phonon bonds proportional to applied field 21 p3805 A66-39547

Electron attenuation of ultrasonic waves of arbitrary polarization and propagation direction for superconductors computed on BCS model, noting role of Fermi surface 22 p3960 A66-39802

Superconductivity applications in power engineering, examining properties of superconducting materials such as thin films, wires and ribbons made of ductile and brittle alloys 23 p4114 A66-41741

Electron self-energies in Fermi gas arising from coupling to optical and acoustic phonons 24 p4250 A66-42231

Light emission in near IR by semiconducting GaAs under current oscillations caused by electron-phonon coupling 24 p4258 A66-43000

### ELECTRON PHOTOGRAPHY

Silicon p-n junction analysis using electron photographic developers when space charge region is present 04 p0563 A66-13881

Silicon p-n junction analysis using electron photographic developers when space charge region is present 14 p2363 A66-27579

### ELECTRON PHOTON CASCADE

Angular distribution of secondary particles from interactions in nuclear emulsions, determining energy release ratio in electron photon cascade 07 p1113 A66-17541

Passage of high energy electrons and photons through condensed media such as photographic emulsion in cascade theory and method of moments 07 p1116 A66-17558

Angular moments of lateral-angular distribution functions in electromagnetic cascade theory calculated by method of moments 07 p1116 A66-17561

Energy distribution of particles produced in elementary interaction expressed in terms of shower characteristics derived from cascade theory 07 p1116 A66-17562

Fluctuations in number of particles in electromagnetic cascade and effect on spectrum of ionization bursts produced by mu mesons 07 p1117 A66-17568

Muon detection and energy determination in multilayer system of ionization chambers and probability of finding muon in n-electron shower at depth 07 p1117 A66-17569

Ultrahigh-energy primary cosmic ray particle interactions cause electron photon cascades and muon emission 07 p1117 A66-17570

Electron-photon, mu-meson and nuclear-active components of extensive air showers 07 p1117 A66-17571

Extensive air shower high energy gamma rays in upper third of atmosphere 07 p1118 A66-17573

Energy and density spectra of X-ray photons in extensive air showers and in stratosphere 07 p1118 A66-17574

Fluctuation problem in electromagnetic cascade theory analyzed, using invariant imbedding method 07 p1083 A66-17973

Monte Carlo method analysis of electron photon cascade 09 p1436 A66-20134

Primary cosmic ray energy spectrum, including primary flux of protons and heavier nuclei, and EM cascade pair production rates 11 p1765 A66-23192

Ionization calorimeter for measuring primary cosmic ray components, discussing nuclear interactions, energy spectra, EM cascades, etc 13 p2175 A66-26011

Young air electron-photon showers at 3200 m altitude, noting average nucleon energy and inelasticity coefficient 15 p2583 A66-29552

Electron-photon cascades caused by nuclear active component in atmosphere and on gamma rays, atmospheric absorption spectrum of primary nucleons and generation of pions 15 p2584 A66-29556

Cascade theory of cosmic ray showers 15 p2586 A66-29567

Particle number fluctuation in electron-photon shower, influence on spectrum of bursts produced by high energy mu mesons under thick filters 15 p2589 A66-29585

Delta-electron generation by muons and fluctuations in soft cosmic ray component, assuming thick absorption layer 15 p2547 A66-29598

Neon hodoscope study of energy and

production heights of high energy EAS electron-photon cascades, comparing results to nuclear emulsion study findings 18 p3207 A66-35109

Response to EAS electron-photon cascade of plastic scintillator, cloud chamber and Geiger counter tray 18 p3208 A66-35112

Compared Cerenkov and scintillation counters responses to electron-photon EAS 18 p3208 A66-35113

Photoproduction, lateral density distribution, energy spectrum and muon component fluctuations in electron photon cascades 18 p3208 A66-35114

Barometric effect and density spectrum of photon-initiated EAS 18 p3208 A66-35115

Muons Component composition and photonuclear interactions of photon-initiated EAS 18 p3209 A66-35121

Extensive air showers with fixed muon number and fixed electron number studied, emphasizing correlation between cascade parameter and other EAS characteristics 18 p3212 A66-35138

Mean square angular and lateral spreads of electrons and photons in cascade shower calculated over wide ranges of finite energy and observation points 18 p3213 A66-35142

Inverse problem in cascade theory of showers to derive information about nuclear interaction 18 p3213 A66-35144

One-dimensional cascade theory of photon-electron showers for light and heavy substances, taking into account polarization of medium upon cross section for electron bremsstrahlung 18 p3213 A66-35145

Bremsstrahlung and pair production processes as regarded in cascade theory of showers 18 p3213 A66-35146

Nuclear cascade particles ionization at various depths in iron compared with experimental data in ionization calorimeter 18 p3214 A66-35154

Energy spectra of electromagnetic cascades produced by cosmic rays observed at balloon altitudes, using composite detector 18 p3216 A66-35169

Electron-photon cascade showers recorded with ionization calorimeter, determining influence of value of radiation length on form of mean cascade curve 18 p3221 A66-35198

Counting rate statistics and energy levels of optical photons in electron photon cascade in cooled mercury atoms 22 p3951 A66-40893

Inelasticity in carbon particle nuclei interactions evaluated by variation with depth of energy of electron photon shower in thick absorber 24 p4268 A66-42910

Ratio of energy flux in nuclear active component to energy flux in electron photon component in extensive air showers with given numbers of particles 24 p4269 A66-42918

Equilibrium spectrum of photons from primary electron at photon energies close to primary energy 24 p4269 A66-42921

Ionization calorimeter measurement of number of particles in electron photon cascade with energy transferred from ionization calorimeter 24 p4269 A66-42924

Calculation of rms numbers of particles in three-dimensional theory of electron-photon showers, considering scattering 24 p4270 A66-42928

Asymptotic approximation of distribution of small ionization bursts produced by high energy muon under thick layer of matter in direct electron-pair production 24 p4271 A66-42935

### ELECTRON PLASMA

Nonlinear kinetic equation of self-similar motion of rarefied collisionless electron-ion plasma 01 p0109 A66-10260

Shear instability of spatially dependent electron current flowing in plasma 01 p0110 A66-10325

Self-field electron kinetic reaction to electromagnetic propagation in three-fluid Brownian plasma 01 p0110 A66-10335

Permittivity of dielectric formed from ground state instability of semimetal, considering Coulomb attraction between electrons and holes 01 p0125 A66-10774

Nonlinear scattering effect of Langmuir

- oscillations on electrons of plasma located in strong magnetic field 01 p0115 A66-11055
- Electron distribution function of homogeneous Lorentzian plasma calculated by successive approximation 01 p0115 A66-11077
- X-ray spectrum of plasma electrons after passage through plane layers of obstacle immersed in plasma, setting up equations for electron energy and density 03 p0397 A66-12392
- Longitudinal nonlinear traveling oscillations in hot electron plasma 03 p0401 A66-12956
- Collisionless electron plasma in uniform field possessing unperturbed distribution function for electrons not considered isotropic in plane of velocity 03 p0401 A66-12963
- Kinetic theory of unstable plasma covering growth and stabilization of spatially homogeneous electron plasma in uniform neutralizing positive charge field, Pines-Schrieffer and formally equivalent kinetic equations and Balescu 03 p0406 A66-13359
- Scattering of test particle by enhanced electric field fluctuations in plasma containing nonthermal electrons 05 p0721 A66-14713
- Temperature and electron concentration in argon and nitrogen arc plasmas by photometering plasma cross sections and comparing with reference 05 p0729 A66-15855
- Interaction between circular waves and density fluctuation in cold electron plasma filling waveguide leads to formation of overtones of HF and LF 06 p0918 A66-16869
- Charge balance in plasma formed by passage of electron beam through gas in presence of constant magnetic field 06 p0918 A66-16870
- Computer simulation of randomization of electrons in collisionless plasma 08 p1260 A66-18538
- LF electromagnetic wave excitation in electron-ion and electron-hole plasmas situated in external electrical field 08 p1262 A66-18975
- Diffraction of plane electromagnetic wave by cylinder of inhomogeneous plasma calculated by method that considers plasma as electron dipoles 09 p1406 A66-19843
- Radiation resistance of linear current strip of finite width immersed in uniaxially anisotropic plasma 09 p1408 A66-20370
- Diffusion of light by plasma electrons produced in laboratory for very small effective diffusion area 10 p1566 A66-21712
- Quasi-linear current instability in two-temperature plasma for Coulomb collision and free electron acceleration 10 p1569 A66-21972
- Permittivity of dielectric formed from ground state instability of semimetal, considering Coulomb attraction between electrons and holes 11 p1749 A66-22286
- Generation of echo at cyclotron resonance in plasma provides means of measuring and displaying relaxation 11 p1748 A66-23393
- Feasibility of using Langmuir probe for measuring statistical properties of unsteady or turbulent electron-rich plasmas [AIAA PAPER 65-544] 12 p1919 A66-23580
- Linear spatial response of electron plasma to localized one-dimensional electric field, whose frequency is low compared with electron-collision frequency 12 p1923 A66-24575
- X-ray spectrum of plasma electrons after passage through plane layers of obstacle immersed in plasma, setting up equations for electron energy and density 13 p2139 A66-25398
- Nonlinear kinetic equation of self-similar motion of rarefied collisionless electron-ion plasma 13 p2148 A66-25977
- Random phase approximation of electron conductivity of turbulent plasma and effects of random static inhomogeneities 13 p2149 A66-26245
- Transport equation for classical unstable electron plasma extended to quantum mechanical multicomponent case, rewriting kinetic equation 13 p2155 A66-26674
- Emergence point of conical microwave beam transmission through nonuniform electron plasma 14 p2234 A66-26860
- Electromagnetic and plasma wave propagation in inhomogeneous compressible isotropic collisionless electron plasma bounded by closed surface in free space 15 p2449 A66-28592
- Excited electron plasma nonlinear oscillations, beam-plasma interaction, Langmuir probe measurement of frequency and density, amplification of superimposed RF electric field, etc 15 p2552 A66-29400
- Electron-cyclotron-heated plasma stability in mirror containment systems possessing shear, minimum-B properties or both 15 p2555 A66-29760
- Effective capture of electrons in magnetic mirror trap with stationary field by pulse-type injection of helical electron beam 16 p2755 A66-30093
- Distribution of charged particles of different energies escaping from magnetic trap in which spiral moving electron fluxes are created 16 p2755 A66-30094
- Radiation belt origin, examining acceleration of solar plasma electrons to energies of 30 to 100 kev by nonlinear waves called solitons 16 p2792 A66-30156
- Excitation of longitudinal electron plasma oscillations by nonlinear resonance of two TEM waves with frequencies differing by plasma frequency 16 p2757 A66-30195
- Transverse electromagnetic wave transformation into ion-acoustic plasma oscillations with formation of intermediate Langmuir electron wave 17 p2969 A66-32542
- Strong injection in nondegenerated p-n junction producing electron-hole plasma in n region near junction 17 p2986 A66-33307
- Coupled electromagnetic and electroacoustic wave propagation in inhomogeneous compressible plasma 18 p3069 A66-34089
- Electron wave resonances in bounded plasmas, examining application to average plasma density measurement 18 p3145 A66-34113
- RF electron plasma diagnostics in magnetic field 18 p3148 A66-34730
- Oscillations of inhomogeneous weakly ionized plasma situated in external electric and magnetic field, noting causes and conditions of plasma instability 18 p3151 A66-35066
- Collision damping of transverse electron plasma oscillations 19 p3408 A66-36273
- Verification of Landau theory that longitudinal electron waves in plasma of finite temperature are damped even in absence of collisions 19 p3416 A66-36522
- Microinstability due to non-Maxwellian velocity distribution in hot electron plasma within magnetic mirror configuration 19 p3422 A66-36545
- Energetic neutral hydrogen atom injection into ECP in magnetic mirror and plasma shielding against trapped thermal neutral gas 19 p3422 A66-36547
- Plasma confinement experiments with electron injection parallel to cusped magnetic field axis in nonadiabatic regime 19 p3422 A66-36549
- Motion of plasma stream injected transverse to magnetic field, examining stream action as it crosses region where magnetic field lines reverse direction about field null line 19 p3426 A66-36568
- Beam-plasma interaction used to generate fully ionized plasma and enhance component temperature for study of plasma heating and burnout 19 p3429 A66-36585
- Temperature effect on dispersion and damping of electron plasma wave 19 p3432 A66-36762
- Simplified model of relation between electron concentration and ionization rate in steady-state inert gas discharge column leading to contraction of column 20 p3608 A66-37464
- Chemical kinetics of electron plasma reactions, discussing energy states, ion-molecule reactions, charge transfer, transport properties, phase interactions, etc 21 p3702 A66-38448
- Relativistic electron layer formation by injecting electrons into cylindrical region of Astron, using difference methods in integrating Vlasov-Maxwell equations 21 p3793 A66-39470
- Quasi-linear current instability in two-temperature plasma for Coulomb collision and free electron acceleration 21 p3794 A66-39551
- Landau damping of longitudinal electron plasma waves in finite-diameter uniform-density cylindrical plasma, assuming Maxwellian velocity distribution 22 p3955 A66-40104
- Instabilities resulting in loss of energetic electrons and fast electrons analyzed in electron cyclotron plasma confined by magnetic mirrors 23 p4103 A66-41490
- Impedance of flat strip antenna embedded in planar dielectric slab surrounded by layers of compressible isotropic electron plasma 23 p4047 A66-41639
- Thermodynamic properties of electron plasma investigated by Bogoliubov-Born-Green-Kirkwood-Yvon hierarchy equation, calculating correlation energy 24 p4243 A66-42764
- ### ELECTRON PRECIPITATION
- Particle precipitation measurements with Injun satellites, discussing space and time variations of electron precipitation, trapped Van Allen particles and auroral light emission latitude 03 p0363 A66-12648
- Relativistic electron precipitation into mesosphere at subauroral latitudes and observations of solar proton and absorption event 05 p0747 A66-14785
- Auroral phenomena in integral-invariant coordinate system, discussing pole-centered circular nature of isochasms in geomagnetic dipole coordinates 06 p0876 A66-16280
- Limit on stably trapped particle fluxes determined theoretically and compared with data from Explorer satellites 08 p1184 A66-19391
- Mechanism of electron leakage from outer radiation belt and X-ray bursts in stratosphere 09 p1446 A66-21037
- Energy spectrum of auroral zone X-rays, noting electron precipitation and diurnal pattern for occurrence of bremsstrahlung 10 p1599 A66-21145
- Energy spectrum for auroral zone X-rays, measuring simultaneously bremsstrahlung X-rays and ionospheric absorption 10 p1599 A66-21146
- Localization and motion of energetic electron precipitation regions during negative magnetic bays, noting similarity of motion to that of auroral electrojets 10 p1599 A66-21147
- VHF hiss zone morphology and correlation with particle precipitation events, from Alouette I satellite observations 11 p1700 A66-23136
- Rocketborne measurements of electron precipitation and relative brightness of ionized molecular nitrogen ion and atomic oxygen auroral emissions 11 p1764 A66-23139
- Simultaneous observations of auroral zone X-ray microbursts, using two balloon-borne radiation detectors separated by 300 km to estimate size of region of electron precipitation 12 p1944 A66-24841
- Electron precipitation onto electrodes of quadrupole amplifier and resultant impairment of output current and efficiency 13 p2043 A66-26468
- Electron precipitation in auroral zone, using observations from riometer, balloon, rocket and satellite experiments 17 p2917 A66-32363
- Precipitation flux of quasi-trapped energetic electrons near low altitude fringes of inner radiation belt as they drift into South Atlantic magnetic anomaly 18 p3170 A66-34520
- Electron precipitation in auroral zones caused by magnetospheric instability 20 p3609 A66-37820
- Method for calculating longitude dependence of geomagnetically trapped electrons at low altitude, based of scattering and energy loss due to atmospheric interactions 20 p3640 A66-38324
- Atmospheric electric field change compensation during measuring air-Earth ionic conduction and electron precipitation current densities 22 p3920 A66-40804
- Variation in energy of energetic electron precipitating into atmosphere as function of

initial energy, pitch, angle and altitude, neglecting scattering 24 p4262 A66-42463

Auroral zone microbursts associated with geomagnetic storms, negative magnetic bays and electron precipitation observed by balloon and rocket 24 p4201 A66-42600

**ELECTRON PRESSURE**

Free-free absorption coefficient of electrons in field of neutral carbon atoms calculated per unit electron pressure per carbon atom in static central field exchange approximation 18 p3233 A66-34574

**ELECTRON PROBE**

Satellite probe measurements of irregularities of electron density distribution above F-2 layer in polar region 03 p0363 A66-12642

Scanning electron beam probe for investigating nonuniformity in work function of surfaces known as patch effect 05 p0684 A66-15580

In situ probe measuring nonthermal components of electron energy distribution in ionosphere, small-scale ionization inhomogeneities and negative ion concentrations in lower ionosphere 08 p1223 A66-18745

Liquid titanium reaction with nonmetallic refractory ceramics, Ti melting behavior and electron-probe microstructural analysis 08 p1236 A66-18759

Hot wire electron emissive probes for potential measurements in quiescent plasmas, noting plasma densities, emission levels, etc 13 p2154 A66-26554

Tellurium concentration in doped GaAs correlated by electron probe microanalysis with variations in cathodoluminescence efficiency 15 p2564 A66-28878

Electron saturation current at plane probe in magnetized plasma, considering electron temperature 15 p2554 A66-29753

Spherules from Atlantic Ocean sediments studied by electron microprobe, noting terrestrial alteration and contamination of surfaces 16 p2803 A66-31222

Electron microprobe for studying thermoelectric materials and heat-resistant steel for gas-turbine blading 24 p4211 A66-42507

**ELECTRON RADIATION**

Solar flares, discussing continuous electromagnetic radiation, hard X-ray radiation and microwave radio bursts 05 p0752 A66-15378

Electric power of thermionic converters, discussing electron space charge effects and relation to gas converters 05 p0615 A66-15534

Secular conductivity changes in p-type germanium of both high and intermediate purity indicate defect annealing resulting from electron irradiation 06 p0932 A66-17116

Impurity concentration effect of electron irradiation damage in photovoltaic silicon cell with shallow p-n junction 06 p0938 A66-17145

Characteristics and properties of defects induced in silicon and germanium by 10-to 60-mev electrons and 20-to 130-mev protons 06 p0939 A66-17155

Neutron and electron irradiation damage in uniform silicon avalanche junction diode and effect on avalanche pulse rate 07 p1012 A66-18410

Radiation effects on electronic components noting sensitivity to gamma, fast neutron and electron radiation 09 p1359 A66-20969

Optical properties and thermal behavior of new absorption bands in oxygen doped silicon irradiated at low temperatures 15 p2564 A66-28874

Transmittance of optical materials between 1050 and 3000 angstroms, noting effect of simulated high energy space environment 17 p2979 A66-32615

**ELECTRON RECOMBINATION**

Dielectronic recombination for low density plasma, estimating coefficient and ionization balance for iron and calcium ions in corona 02 p0286 A66-11357

Resonance lines of coronal ions of silicon appearing in two widely separated spectral regions 02 p0286 A66-11358

Electron recombination in monoatomic ionized gas expanding symmetrically into vacuum, particularly triple collisions with electron capture on upper atomic

level 02 p0264 A66-11383

Recombination coefficient and electron production rate in lower D region during solar flare 04 p0574 A66-13444

Recombination parameters in CdS determined from kinetics and IR quenching of photocurrent relative to available illumination 04 p0564 A66-14257

Auger recombination of majority and minority carriers by low and deep-lying centers 04 p0565 A66-14261

Recombination process of electron-hole pairs in germanium irradiated with cobalt 60 gamma rays, using photovoltaic effect in p-n junctions 06 p0938 A66-17146

Distribution function of semiconductor minority current carriers in presence of pronounced spatial inhomogeneity occurring in intensively absorbing films with intensive surface recombination 07 p1099 A66-17873

Hot electron recombination peculiarities, ignoring electron temperature concept, for moderate fields and lattice temperatures 07 p1104 A66-18220

Stationary IR quenching of photocurrent in CdS, discussing recombination channels 09 p1428 A66-20538

Dielectronic recombination for low density plasma, estimating coefficient and ionization balance for iron and calcium ions in corona 10 p1602 A66-21088

Resonance lines of coronal ions of silicon appearing in two widely separated spectral regions 10 p1602 A66-21092

Cascade theory of electron recombination into ionized donors in germanium analyzed, noting several models 12 p1928 A66-23940

Electrical and gas dynamical parameters effect on length of linear constant Mach number MHD duct, assuming gas is ionized by neutron irradiation in expansion nozzle preceding duct and electron recombination takes place in duct 13 p2000 A66-25739

Optical emission from ruby induced by short pulses of relativistic electrons in which electron-hole recombination produces excitation of emission 13 p2098 A66-26173

Hot electron recombination at repulse impurity centers in germanium containing copper 14 p2357 A66-27074

Recombination radiation in semiconductor affected by strong magnetic field 14 p2363 A66-27597

Recombination rate of electron-hole pairs in anthracene determined and compared with theoretical value based on hypothesis of Coulomb capture in dielectric 14 p2369 A66-28272

Recombination centers in gamma irradiated silicon either float-zoned or melt-pulled and doped with phosphorus, arsenic or boron 15 p2562 A66-28721

Electron-hole recombination effect on semiconductor reflectivity modulation study with ruby laser 15 p2563 A66-28757

Volume recombination in transistor base for arbitrary concentrations of minority charge carriers 15 p2468 A66-29921

Formation of sporadic E layer in middle latitudes due to transport phenomenon and local production 19 p3346 A66-35589

Recombination by tunneling in electroluminescent diodes to obtain line shape and light intensity in peak shift region 21 p3801 A66-38998

Impurity conduction effect on electron donor recombination cross section in n-type germanium and silicon at liquid helium temperatures 21 p3801 A66-39001

Varying excitation intensity effects on edge emissions from pure and doped CdS powder samples, noting electron-hole recombination mechanisms 21 p3802 A66-39202

Gold doping effects on recovery time of phosphorus, boron and arsenic impurity gaseous-diffused junction diodes and estimated gold recombination center densities 22 p3873 A66-39749

Measures of electron production and loss and scale height of F-1 layer during summer solar minimum 22 p3916 A66-40808

Hot electron recombination at repulse impurity centers in germanium containing copper 22 p3966 A66-40832

Electron and neutral atom densities in helium and argon afterglow plasma obtained

by two helium-neon laser interferometers, noting temporal dependence of electron decay 23 p4101 A66-41364

Single crystal wurtzite CdS luminescence as function of exciting intensity, noting shift of overlapping band structure of green-edge emission indicative of electron-hole recombination 24 p4219 A66-42250

Generation-recombination noise and lifetime measured using photoconductive decay in n-and p-type Ge samples doped with shallow impurities 24 p4253 A66-42357

Recombination radiation in semiconductor affected by strong magnetic field 24 p4257 A66-42731

**ELECTRON SCATTERING**

Multiple scattering of medium velocity electrons in thin films of Ni, Ge, Ag and Au 01 p0116 A66-10196

Polarization and exchange effects in slow electron scattering from lithium and sodium 03 p0393 A66-12325

Phase-shift analysis of electron and hole optical scattering by high density of ionized acceptors, calculation appropriate to direct band-gap semiconductor 03 p0411 A66-13146

Oscillator strength of ruby R-1 line at liquid nitrogen temperature determined by Rozhdestvenskii hook 03 p0379 A66-13189

Resonances below inelastic threshold of electron hydrogen scattering using Feshbach projection-operator technique, converting to eigenvalue problem for projected Hamiltonian 04 p0547 A66-13711

Parameters associated with inelastic polar electron scattering in indium antimonide 04 p0565 A66-14267

Electrical conductivity of polar semiconductors in electric fields, calculating lattice and Coulomb electron scattering mechanism by kinetic equation method 04 p0568 A66-14350

Emitter-collector current transfer ratio of electron optical phonon scattering in metal semiconductor structures 05 p0732 A66-14670

Thermal diffuse elastic electron scattering in polycrystalline Al foil, using retarding field apparatus 05 p0736 A66-14980

Current-carrier scattering effect on electric and photoelectromagnetic properties of semiconductors in variable magnetic field 06 p0922 A66-16134

Electron drift velocity and mobility of indium antimonide obtained from pulsed measurements of conductivity and Hall effect at various temperatures 06 p0922 A66-16173

Conductivity and transfer coefficients calculated from electron scattering in cesium plasma 06 p0918 A66-16836

Electron distribution disruption by electric current across n-n heterojunction resulting in heating and cooling of respective electron gases in each of semiconductors, noting electron scattering 07 p1104 A66-18362

Galvanomagnetic effects in semiconductors, including Hall effect and magnetoresistivity, noting influence of carrier scattering on lattice vibrations and impurities 08 p1267 A66-18607

Zone behind reflected shock wave in shock tube using electron beam scattering, showing flow spectra and attenuation region of wave 08 p1210 A66-19586

Microscopic theory of electroacoustic effect for n-type Ge and Si semiconductors of many energy minima, noting electron scattering 09 p1412 A66-19986

Forced Mandelstam-Brillouin scattering in gases, determining hypersonic velocity for three gases 09 p1408 A66-20770

Superconductor current acceleration by application of long-wavelength magnetic field below critical temperature 10 p1573 A66-21176

Boltzmann equation for Gunn effect in GaAs, discussing scattering processes, unjustifiability of use of drifted Maxwell distribution, etc 10 p1583 A66-22067

Measurement of shift of cesium absorption lines near series edge, obtaining electron elastic scattering cross section at zero energy by extrapolation of shift 12 p1918 A66-24882

Electron scattering responsible for variable polarization in V444 Cygni 13 p2184 A66-25624

Scattering of electron beam by standing waves of photons inside laser cavity corresponds to stimulated Compton effect 13 p2096 A66-26155

Excitation in electron beam pumped /EBP/ GaAs lasers including electron scattering, energy dissipation pattern, phonon emission, air production, etc 13 p2099 A66-26181

Nearly monoenergetic electrons in collimated beam directed at normal incidence onto thick targets ranging in atomic number from Be to 13 p2136 A66-26279

Effective-mass approximation of conduction electron scattering in very thin films 14 p2360 A66-27192

Forced Mandelstam-Brillouin scattering in gases, determining hypersonic velocity for three gases 14 p2341 A66-27305

Temperature variation and carrier concentration effects on density-of-states effective mass, polar and dipolar thermoconductivity, electron and phonon scattering and electron-phonon interaction in doped Si-Ge alloys 14 p2365 A66-27759

Elastic electron scattering cross sections for titanium relative to C and Be measured, using linear electron 14 p2337 A66-27795

Energy dependence of elastic resonance scattering of low energy electrons from He, Ne, Ar and nitrogen gases at angles ranging from 8 to 110 degrees 14 p2337 A66-27797

Electrical conductivity of polar semiconductors in electric fields, calculating lattice and Coulomb electron scattering mechanism by kinetic equation method 14 p2368 A66-28247

Impurity scattering in theory of interband magneto-optical effects, noting inadequacy of first-order perturbation treatment and low and high impurity-atom concentration with weak interaction 15 p2558 A66-28610

Transmission energy spectra of 1-mev electrons with normal incidence on Al slabs measured in terms of transmission angle 15 p2543 A66-28715

Pressure effect on transition point of superconductors from Bardeen-Cooper-Schrieffer theory, perturbation theory and electron scattering near Fermi surface 15 p2568 A66-29714

Total and differential scattering cross section for slow electron calculation, using nonrelativistic quantum mechanics, shown to be erroneous 16 p2751 A66-30172

Intervalley scattering in III-V semiconductors, noting relation to Gunn effect, scattering in GaAs by longitudinal optic phonons, in InP by longitudinal acoustic phonons 16 p2776 A66-30733

Electrical conductivity of metals, explaining electron scattering amplitude changes, phonon spectrum distortion and temperature effects caused by impurity concentration in 16 p2780 A66-31180

Temperature structure of early type stellar atmospheres noting sources of opacity, electron Rayleigh scattering, etc 16 p2806 A66-31703

Secondary electron interaction with solid state plasma, noting energy distribution, Boltzmann equation solution, etc 16 p2789 A66-31783

Magnetospheric suprathermal-electron scattering in oscillating electrostatic plasma and diffusion of subthermal electrons across magnetosphere, using ion-wave propagation theory for electroconductive plasmas 17 p2993 A66-32521

Electron scattering interpretation of ionization, emission and absorption line spectra of quasi-stellar object 17 p3004 A66-32928

Electron angular distribution in copper and gold thin films attributed to individual close interaction scattering phenomena 17 p2987 A66-33314

Relativistic vs nonrelativistic scattering of slow electrons by neutral heavy atoms 18 p3137 A66-33668

Slow electron scattering on dipolar symmetrical top molecules and quadrupolar linear molecules calculated at energies below threshold for vibrational excitation 18 p3139 A66-34510

Plasma half-space impedance for diffusive

electron reflection from plasma vacuum boundary, noting damping decrement of surface electromagnetic wave, electric field Fourier components and absorption capacity 18 p3151 A66-35065

Detection of solar neutrinos for analysis of solar structure, using various detector types and recoil electrons in neutrino-electron elastic scattering process 18 p3223 A66-35214

Evaluation of predicted effect of elastic solar neutrino scattering on electrons of medium, using graph 18 p3223 A66-35215

Solution of Schroedinger equation for quantum mechanical reflection coefficient of electrons at metal semiconductor barriers 19 p3435 A66-35409

Electron scattering by impurities in dipole form in semiconductors with anisotropic effective mass of current carriers, deriving formula for tensor of relaxation time 19 p3442 A66-35818

Transitions induced by electron impact between all ground-state terms of atomic systems with computed cross sections satisfying unitarity 19 p3463 A66-35990

Phase shifts of elastic electron scattering from neutral helium, considering atomic distortion in adiabatic approximation 19 p3402 A66-35991

Electron scattering in ABO-type semiconductors by long-wave transverse-optical ferroelectric lattice mode evidenced by hydrostatic pressure measurements 19 p3444 A66-36176

Dipole scattering of electrons in germanium and silicon whose conduction-band structure is described by many-valley model, using distribution function and computing relaxation-time ratio 19 p3446 A66-36393

Thermal conductivity of lanthanum and monochalcogenides, noting role and temperature dependence of crystal-lattice conductivity 20 p3617 A66-37556

Cyclotron resonance observation of electron scattering by Ga and In atoms in Ge 21 p3797 A66-38754

Electron scattering mechanism in compensated gallium arsenide determined from Hall effect, Nernst-Ettingshausen effect and reluctance 21 p3798 A66-38914

Domain formation process during passage of current through multivalley semiconductor when electron intervalley scattering drift length exceeds diffusion length 21 p3804 A66-39313

Cyclotron resonance study of electron scattering by thermal acceptors in quenched Ge 21 p3805 A66-39567

Current-carrier scattering anisotropy dependence on antimony impurity concentration in n-Ge established, using measurements on Hall effect and conductivity 22 p3965 A66-40321

Measurement of shift of cesium absorption lines near series edge, obtaining electron elastic scattering cross section at zero energy by extrapolation of shift 23 p4097 A66-41089

Surface scattering of electrons on metallic field effect in thin layers in theory of mean-free-path influences on conductance change 23 p4110 A66-41184

Spatial distribution of hot electrons coherently scattering in thin Au film 23 p4115 A66-42063

Local density and temperature measurement in wind tunnels determined by 50-kev electron scattering, using air as test gas 24 p4192 A66-42199

Critical fields of thin superconducting films determined by specular reflection of electrons from surfaces 24 p4256 A66-42531

Calculation of rms numbers of particles in three-dimensional theory of electron-photon showers, considering scattering 24 p4270 A66-42928

Effective-mass approximation of conduction electron scattering in very thin films 24 p4259 A66-43090

# ELECTRON SOURCE

Local laser heating of cathode for electron extraction from plasmoid 06 p0889 A66-16149

Local laser heating of cathode for electron extraction from plasmoid 15 p2519 A66-29879

# ELECTRON SPECTRUM

Difference magnetic analyzer of low-energy

electrons and protons in which particles are separated before arriving at detector 02 p0284 A66-12143

Damping of electron spectrum and oscillation maximum of magneto-optical effects of semiconductor 03 p0410 A66-12943

Electron spectrum in highly alloyed gallium arsenide 05 p0730 A66-14650

Approximation of exchange operator for system of electrons, examining Slater equation for calculating atomic wave functions 06 p0910 A66-16129

Electron energy spectra in neon, xenon and helium-neon laser discharges, calculating production and destruction rate parameters 07 p1045 A66-18354

Excited ruby crystal phosphorescence noting spectral range, duration, electron excitation mechanism and upper wavelength limit 08 p1234 A66-19667

Mechanism for production of X-rays and gamma rays in galaxies, noting photon and electron spectrum 10 p1598 A66-21100

Nonequilibrium transport properties and electron relaxation at cooled surface of partially ionized argon 10 p1559 A66-21270

Excited ruby crystal phosphorescence noting spectral range, duration, electron excitation mechanism and upper wavelength limit 10 p1543 A66-21834

Continuous electromagnetic radiation from solar flares, examining X-ray bursts from synchrotron, Compton and bremsstrahlung mechanisms 11 p1762 A66-22406

Electron and proton spectrometer detector mounted on OGO-E, measurements cover seven differential energy channels 12 p1877 A66-23690

Electron and proton differential velocity spectra observed for low-energy relativistic cosmic rays, noting spectral neutrality of radiation 13 p2174 A66-25570

Electron spectrum in highly alloyed gallium arsenide 13 p2167 A66-25925

Spectrum of electron excitations with small energies compared to critical temperature of superconducting transition in absence of magnetic field 13 p2168 A66-25978

Production spectrum of high energy electrons from high energy cosmic ray pion decay and proton-proton collisions 13 p2176 A66-26762

Difference magnetic analyzer of low-energy electrons and protons in which particles are separated before arriving at detector 14 p2297 A66-28099

Electron pair production by high energy muons, noting application of Monte Carlo method for appearance of low energy with high energy partner below target plate 15 p2546 A66-29583

Differential electron spectra in radiation belt in ten energy intervals obtained by satellite spectrometer, noting soft and hard components 16 p2794 A66-30703

Hamiltonian describing EPR spectrum of trivalent chromium ion in ordered lithium-aluminum spinel and rhombic distortion causing deviation of axes in octahedron electric field 16 p2787 A66-31763

Quantitative measurement of electron correlation spectrum for deuterium plasma in thermal equilibrium 17 p2963 A66-31885

Energy spectrum change of group of electrons being convected downwind in magnetosheath and behind Earth bow shock 18 p3170 A66-34521

Energy spectra of muon, electron and N components of extensive air showers /EAS/ 18 p3210 A66-35129

Absorption spectra of pure and isotopic impurity crystals of naphthalene in region of first electronic and vibrational /vibron/ transition 19 p3402 A66-36067

Production and equilibrium spectrum of galactic cosmic ray secondary electrons arising from secondary pion and neutron decay 20 p3633 A66-38200

Integral spectrum for low-energy electrons measured with detailed definition of temperature and number density by IMP II 20 p3633 A66-38204

Electron spectra made with five-channel magnetic electron spectrometer from Star Fish explosion and from outer radiation belt 20 p3643 A66-38343

Electron, charged particle density spectrum and temperature measurements in arc jet of

partially ionized argon 21 p3790 A66-39082  
 Angular variation of position of energy loss maxima in indium 23 p4110 A66-41180  
 Equilibrium spectrum of photons from primary electron at photon energies close to primary energy 24 p4269 A66-42921

**ELECTRON SPIN**  
 Variation in thermoelectromotive force and magnetoresistance in quantizing magnetic field in indium antimonide semiconductor, considering electron spin and conduction band nonparabolicity 01 p0124 A66-10770  
 Exchange interaction of localized spins with conduction electrons leading to indirect spin-spin interactions in semiconductor 01 p0125 A66-10782  
 Electron spin effect on quantum oscillations of magnetoresistance and Hall effect in n-InSb single crystal 08 p1269 A66-18971  
 Variation in thermoelectromotive force and magnetoresistance in quantizing magnetic field in indium antimonide semiconductor, considering electron spin and conduction band nonparabolicity 11 p1749 A66-22281  
 Exchange interaction of localized spins with conduction electrons leading to indirect spin-spin interactions in semiconductor 11 p1749 A66-22295  
 Electron spin effect of oxygen and short-range static fields of hydrogen, nitrogen and oxygen molecules upon rotational excitation of these molecules by slow electrons 11 p1741 A66-23389  
 Existence of superconductivity along domain boundaries in ferromagnetic materials having domain structure when induced by nonmagnetic s-electrons or when only magnetic electrons are present 13 p2166 A66-25919  
 Electron-spin paramagnetism effect on critical field of thin aluminum superconductor films 16 p2769 A66-30169  
 Polarized-neutron scattering by tri-vanadium silicide, identifying electronic susceptibility and modification in passing through superconducting transition 16 p2770 A66-30174  
 Fulde-Ferrell effect in type II superconductors 17 p2975 A66-31887  
 Static spin susceptibility of superconductors with p-pairing and collective excitations, noting mercury and tin 24 p4257 A66-42539

**ELECTRON SPIN RESONANCE**  
 Electron spin resonance of radical cations produced by oxidation of aromatic hydrocarbons with antimony pentachloride 03 p0330 A66-12336  
 Electron spin resonance transitions involving simultaneous changes in spin states of two neighboring protons 03 p0395 A66-12343  
 Magnitude of anisotropic line broadening in ruby 03 p0413 A66-13278  
 Ground state ESR saturation effect on ruby laser output frequency at cryogenic temperature 06 p0892 A66-16753  
 Electron spin resonance center in ZnSe after electron bombardment measured with low temperature microwave cavity 06 p0934 A66-17124  
 Correlation between strength of induced optical absorption G band and strength of features in electron spin resonance spectrum in electron irradiated diamonds 06 p0934 A66-17125  
 Temperature and donor concentration of width of electron spin resonance line in center of hyperfine spectrum for phosphorus-and arsenic-doped silicon 08 p1270 A66-19014  
 Gamma irradiation intermediates of polyamide MXD-6 examined, using electron spin resonance and optical spectroscopy 08 p1243 A66-19065  
 Kinetics of hydroxyl radical in aqueous solution, examining electron spin resonance spectrum as function of flow rate, temperature and mixture composition 08 p1178 A66-19066  
 Spin resonance of donor electron in Ge and anisotropic line width in relation to dislocation stress 11 p1750 A66-22463  
 Lower hybrid resonance in VLF range in satellites, noting noise emission due to trapping of electromagnetic wave propagation in transverse magnetic

field 13 p2074 A66-26364  
 Semiconductor properties of reduced barium titanate analyzed by electron spin resonance measurements at various temperatures 14 p2359 A66-27132  
 Electron spin resonance of gamma irradiated single crystal of barbituric acid dihydrate, noting formation and Hamiltonian parameters of free radicals 14 p2367 A66-27979  
 Electron spin resonance saturation causing sharp decrease of DC resistance for reduced rutile crystals 15 p2567 A66-29401  
 High resolution ESR spectra of acyclic semidione radical anions and single aryl substituent cations 15 p2447 A66-29817  
 Electron spin resonance in rubidium and cesium observed, using selective transmission technique 16 p2750 A66-30145  
 Conduction electron spin resonance in rubidium and cesium observed, using reflection technique 16 p2750 A66-30146  
 Electron spin resonance in silicon oxide grown on Si, noting spectral line interpretation of Si-SiO sub 2 boundary 17 p2978 A66-32406  
 Spin-lattice interaction in ruby measured by electron spin resonance in uniaxially stressed crystals 17 p2981 A66-32718  
 Sb concentration and ESR linewidth of Sb donors in compensated and uncompensated n-silicon 18 p3156 A66-34475  
 Neutral-impurity scattering experiments in silicon with highly spin-polarized electrons 19 p3448 A66-36764  
 K-band superheterodyne electron spin resonance spectrometer with MO noise elimination by modified Gordon bridge with reflection cavity 20 p3559 A66-37538  
 Electron conduction and phosphorus doping effects on room temperature and cryogenic electron spin resonance in n-type silicon 21 p3797 A66-38752  
 X-band spectrometric observation of ESR of trivalent gadolinium in reduced barium titanate 21 p3797 A66-38756  
 ESR line width of phosphorus doped silicon measured, noting relation between line width and temperature in metallic impurity conduction 21 p3798 A66-38764  
 Electrical properties of barium plumbate noting conductivity, Hall field, thermoelectromotive force, magnetization, etc 24 p4253 A66-42382

**ELECTRON STATE**  
 Semiconductor superconductivity dependent on presence of different electron states in crystalline films at surface 02 p0277 A66-12277  
 Helium 3-1-P state, discussing pressure dependence of lifetime between free escape and complete blockading 03 p0395 A66-13134  
 Thermodynamic changes in crystal lattice on electron states of semiconductors 05 p0737 A66-15116  
 Potential curves and spectrum absorption of nitrogen, redetermining spectroscopic constants 05 p0763 A66-15285  
 Semiconductor superconductivity dependent on presence of different electron states in crystalline films at surface 05 p0738 A66-15456  
 Comments on radiative recombination of molecular helium ions into dissociative state 06 p0912 A66-16636  
 Population inversions promoted between electronic-excited states by fluid-mechanical techniques 07 p1083 A66-17937  
 CW laser action on triple state phosphorus-sulfur transition, using hydrogen sulfide-noble gas mixtures 10 p1543 A66-21577  
 First order wave function of helium due to one-and two-electron excitation determined by solving differential equations, noting contribution to second order energy 11 p1741 A66-23405  
 Density of electron states and classical effective mass of current carriers in magnetic field for semiconductor with wurtzite-type lattice 12 p1930 A66-24457  
 Schottky theory for metal semiconductors, noting correlation between work function and barrier height, electron affinity, etc 17 p2980 A66-32650  
 Plasma oscillations of electron shell of atom, discussing natural frequency, damping, probability and participation of plasmon in atomic reactions 17 p2962 A66-33505

Partial wave theory of two electron diatomic hydrogen molecules and calculation in zeroth order for sigma g states 18 p3139 A66-34500  
 Individual efficiency curves for excitation of two metastable electron energy states of helium by electron 18 p3139 A66-34504  
 Electron energy spectrum for alloyed semiconductors, determining state densities via Thomas-Fermi statistical method 20 p3618 A66-37562  
 Density of electron states and classical effective mass of current carriers in magnetic field for semiconductor with wurtzite-type lattice 20 p3620 A66-37689  
 Electron correlation analysis method applied to interelectronic repulsion effect on localized electrons near ideal surface of semimetallic diamond-like crystal 24 p4252 A66-42349

**ELECTRON TEMPERATURE**  
 Effect of nonzero plasma electron temperature considered in electron beam-plasma interaction wave growth computation 01 p0112 A66-10531  
 Microwave scattering from nonequilibrium plasmas where electrons have large steady drift velocity with respect to ions 02 p0266 A66-11479  
 Piezoelectric resistance of n-silicon as function of electric field intensity 02 p0273 A66-11713  
 Electron and ion temperatures determination for helium plasma produced by theta-pinch with azimuthal magnetic field, using Doppler broadening and X-ray absorption 03 p0396 A66-12292  
 Relationship between laws of electron temperature and charged particle concentration fall-off in helium plasma diffusion flow 03 p0398 A66-12520  
 Quiet chromosphere and corona noting line intensity and coronal electron and kinetic temperature 03 p0420 A66-12841  
 Ambipolar diffusion and electron-ion recombination coefficients dependence on electron temperature in afterglow of neon plasmas 04 p0554 A66-14294  
 Local electron temperature and electron density in theta pinch measured by means of scattering of laser beam 04 p0555 A66-14334  
 Ratio of ionospheric electron to ion temperature determined independently of spectral measurements, using electron density data obtained with topside sounder 04 p0517 A66-14374  
 Atomic heat of titanium, vanadium and chromium in high temperature range, discussing parameters and experimental techniques 05 p0698 A66-14511  
 Electron energy loss rate for D region determined by Maxwellian velocity distribution of thermal component brought about by collisions with molecular nitrogen involving rotational transition 05 p0672 A66-15021  
 Ionospheric diffusion probe determining ion and electron temperatures 05 p0674 A66-15112  
 Electron temperature distribution in plasma diode, discussing electron transport properties and current-voltage characteristics 05 p0615 A66-15535  
 Phenomenology of ignited cesium diode discharge noting saturation mode, obstructed mode and ball of fire 05 p0728 A66-15552  
 Electron temperature and ion density profiles across interelectrode gap of thermionic diode operating in ignited mode 05 p0621 A66-15573  
 Electron heating effect on acoustic instability of weakly ionized plasma in electric field 06 p0914 A66-16143  
 Electron temperature spectroscopy for atmospheric argon plasmas, sodium vapor seeded at high temperatures, noting relationship with current density 06 p0915 A66-16178  
 Electron concentration and temperature distribution in argon DC arc measured with hot wire probe 06 p0918 A66-16834  
 Electron temperature in plasmas measured using pressure broadening by electron impacts of isolated spectral lines, i.e., temperature dependence of shift to width

ratio 06 p0920 A66-17041  
Electron and ion temperatures in  
ionosphere show no temperature equilibrium  
in F region 06 p0877 A66-17171  
Measurements of plasma from hydrogen-  
coated titanium washer mounted at DC  
magnetic mirror 07 p1088 A66-17954  
Volt-ampere characteristics of n-silicon in  
strong electric field from 77 to 300 degree  
07 p1105 A66-18365  
Precursor electron front measuring  
velocity, electron temperature dependence  
on operating parameters,  
etc 08 p1259 A66-18525  
Water-cooled electrostatic probe capability  
of measuring local electron temperature,  
electron density, floating potential and  
saturation current ratio in dense plasmas  
[AIAA PAPER 66-73] 08 p1262 A66-18956  
Electron temperature variation in argon  
MGD channel in crossed magnetic and  
electrical fields 08 p1263 A66-19174  
Magnetic field effect on electron  
temperature, number of ionization events  
and potential gradient in argon and neon HF  
discharge 08 p1264 A66-19186  
Exchange of energy between ionosphere  
and protonosphere, noting nonlocal heating  
by photoelectrons, thermal conductivity and  
heat input by downward  
flux 08 p1215 A66-19204  
Ionospheric heating by magnetic conjugate  
point photoelectrons, showing variation of  
electron temperature with  
time 08 p1218 A66-19402  
Low pressure, high temperature and low  
values of electrical output effect on plasma  
conductivity, noting operation of MGD  
generators at high Hall  
numbers 09 p1331 A66-20137  
Hot electron emission from semiconductor  
cathode in vacuum-tube diode during  
mapping of thermoelectronic and  
photoelectronic current 09 p1429 A66-20813  
Radio brightness distribution over quiet  
sun and various deductions concerning  
electron temperature and density of corona,  
including data on overdense regions  
radiating thermally 10 p1601 A66-21061  
Nonequilibrium transport properties and  
electron relaxation at cooled surface of  
partially ionized argon 10 p1559 A66-21270  
Radial distributions of number density,  
electron temperature and plasma potential  
measured in electrodeless discharge, using  
symmetric and asymmetric double probes  
[AIAA PAPER 66-194] 10 p1562 A66-21440  
Single and double Langmuir probe for low  
density plasma, noting measurement of  
electron temperature and  
density 10 p1535 A66-21514  
Loss rates of charged particles from  
chemically-heated discharges in C-Stellarator,  
showing confinement time  
parameters 10 p1568 A66-21825  
Electron temperatures in hot argon-  
potassium discharges determined, using ratio  
of electron energy slopes from floating  
double-probe curve 10 p1568 A66-21880  
Electron temperature measurement by  
relative intensity of He I lines shown as  
inapplicable for high plasma  
densities 10 p1571 A66-22021  
Effective electron collision frequency from  
electron temperature profile for ionospheric  
heating in F region 11 p1697 A66-22499  
Electron density distributions in daytime  
F-2 layer and dependence on neutral gas,  
ion and electron  
temperatures 11 p1699 A66-23135  
Satellite observational data indicates that  
nighttime electron temperatures in upper F  
region are larger than neutral gas  
temperature 12 p1868 A66-23559  
Electron temperatures in several RF-  
generated plasmas, using air as  
medium 12 p1919 A66-23599  
Langmuir probe measurements in  
hypersonic plasma flow, evaluating  
properties of plasma jet wind tunnel,  
electron temperature and plasma  
density 12 p1920 A66-23853  
Low pressure plasma electron temperature  
inferred from Langmuir probe  
measurements differs from plasma mean  
electron energy 12 p1920 A66-23959  
Ionospheric processes and measurement of  
variations in ion temperature and

concentration using satellites, noting  
connection with 12 p1871 A66-24400  
Electron temperature determination from  
intensity ratio of singlet and triplet lines of  
neutral helium used in plasma diagnostics,  
noting complications from metastable levels  
and coupling of singlet and triplet  
systems 12 p1924 A66-24592  
Spectral line intensities variation in  
ionization of hydrogen and impurities in TA  
2000 device 13 p2138 A66-25125  
Free jet of arc heated low-density  
supersonic argon plasma examined,  
measuring radiative mechanisms, electron  
temperatures, thrust, jet structure, etc  
[AIAA PAPER 66-163] 13 p2138 A66-25167  
Langmuir probe to measure stagnation  
region shock layer ionization distribution  
under nonequilibrium hypersonic flow  
conditions [AIAA PAPER 66-167] 13 p2138 A66-25168  
Ionization phase of impurity in pulsed  
hydrogen discharge and electron  
temperature measuring  
method 13 p2141 A66-25478  
MHD instability in plasmas during pinch  
discharge, noting wave velocity dependence  
on Larmor radius, Hall effect, electron  
temperature fluctuations,  
etc 13 p2142 A66-25704  
Electron density and temperature in  
decaying hydrogen plasma determined, using  
monochromator 13 p2145 A66-25730  
Electron density and temperature of  
hydrogen plasma determined from intensity  
of spectral line and continuum in region  
adjacent to line 13 p2145 A66-25733  
Spectral characteristics of gallium arsenide  
junction luminescence, noting radiative  
recombination mechanism, energy spread of  
impurity states and line shape temperature  
dependence 13 p2168 A66-26186  
Triple-probe measurement of electron  
temperature of transient plasma from  
plasma gun 13 p2149 A66-26242  
Time behavior of 3889 and 5016 angstrom  
line helium emission during initial transient  
of RF discharge, noting pressure  
dependence and signal 13 p2104 A66-26335  
Hydrogen plasmoid density, ionization and  
electron temperature measured by fast-  
particle probing 13 p2153 A66-26526  
Spatial variations in electron temperature  
produced in steady state plasma by  
electromagnetic standing  
wave 13 p2155 A66-26678  
Pulsed type radiometer, which samples  
noise emitted by ionized medium, used to  
measure electron temperature of  
nonpermanent plasmas 14 p2290 A66-26823  
Recombination coefficient and high  
electron temperature in midlatitude sporadic  
E layer with ions of oxygen and nitrogen  
oxide 14 p2281 A66-26849  
Electron temperature in helium plasma  
determined from intensity ratios of spectral  
lines 14 p2344 A66-27643  
Law of mass action derivation of chemical  
equilibrium ionization of multitemperature  
system when electron and heavy particle  
temperature differ 15 p2551 A66-29218  
Recombination rate, ionization in  
nonequilibrium electric conductivity  
prediction for dense seeded  
plasma 15 p2554 A66-29752  
Plasma perturbation by large probe,  
determining electron density and  
temperature and plasma potential as  
function of distance from  
probe 15 p2555 A66-29754  
Electron temperature correlation with  
excitation in temperature in argon plasma  
established, using spectral analysis and  
Langmuir probe 15 p2555 A66-29762  
Electron heating effect on acoustic  
instability of weakly ionized plasma in  
electric field 15 p2556 A66-29873  
Sounding rocket measurement of  
ionospheric electron  
temperature 15 p2494 A66-30043  
Early morning ionospheric characteristics  
measured by geophysical rocket, noting  
electron concentration, solar UV emission  
intensity changes, electron temperature,  
absorption profile, etc 15 p2494 A66-30052  
Plasma electron temperature measured

from soft X-ray bremsstrahlung absorption  
by beryllium foil 16 p2756 A66-30096  
Measurement of sticking coefficient for  
thermal electrons in oxygen and air, using  
microwave circuits 16 p2756 A66-30101  
Plasma probe for dense isothermal cesium  
plasma, noting electron concentration and  
temperatures, potential  
distribution, etc 16 p2756 A66-30102  
Electron temperature measurements in low  
voltage arc in saturated cesium  
vapor 16 p2756 A66-30105  
Pressure dependent energy loss process  
determined in atomic light analysis of  
helium positive column, noting molecular-ion  
concentration relation to 3 D super 3  
population 16 p2750 A66-30114  
Spectrum of plasma fluctuations in ionized  
turbulent gas explained by statistical  
turbulence theory, noting that electron  
temperature is larger than gas  
temperature 16 p2757 A66-30173  
Electron temperature measurement by  
relative intensity of He I lines shown as  
inapplicable for high plasma  
densities 16 p2760 A66-30840  
Effect of heating of ionosphere by  
photoelectrons coming from magnetically  
conjugate point, using electron temperature  
measurements 16 p2698 A66-31214  
Double-slit spectrograph attachments for  
determining electron temperature from  
changes in linewidth and relative intensity  
of two He lines 16 p2709 A66-31614  
Plasma electron temperature measurement  
by intensity ratio of two  
lines 17 p2965 A66-32284  
Helium plasma in confining magnetic field,  
noting spectral efficiency in optical region,  
electron temperature and density, electron  
ion recombination, etc 17 p2965 A66-32409  
Plasma motion and confinement in  
octupole magnetic field, noting electron  
temperature density and field  
fluctuation 17 p2966 A66-32428  
Electron temperature determination in  
argon plasma as function of distance  
measured to axis of inductive  
windings 17 p2974 A66-33255  
Electron temperature and concentration in  
DC plasma arc determined from Thomson  
scattering of laser  
radiation 18 p3118 A66-33840  
Coupling between free electron and  
molecular vibrational temperatures in  
plasma environments, noting energy  
distribution, application to MHD generation,  
etc 18 p3145 A66-34105  
Plasma ion and electron temperature  
measurement via forward scattering  
spectrum of deuterium  
plasma 18 p3146 A66-34235  
Negative temperature coefficient of  
electrical resistance, anomalous Hall  
constant and magnetoresistance constant for  
thin films of Be and Pb 18 p3157 A66-34627  
Charged particle beam interaction with  
plasma, determining electron-ion  
temperatures and HF  
field 18 p3152 A66-35074  
Excitation and ionization of hydrogen  
plasma under influence of two electron  
groups with different temperatures and  
densities, using coupled system of rate  
equations 19 p3407 A66-36063  
Population temperatures within argon-  
calcium plasma generated by reflected  
aerodynamic shock determined by spectral  
line-reversal method 19 p3409 A66-36332  
Nonuniform plasma stability in magnetic  
field gradient 19 p3417 A66-36530  
Electron density, temperature and other  
related electromagnetic effects of deuterium  
plasma focus formed by coaxial electrode  
discharge as result of Z  
pinch 19 p3425 A66-36561  
Langmuir current-density limit derived for  
differing axial and radial electron beam  
temperatures in high-resolution image  
devices 20 p3524 A66-36899  
Instrumentation for plasma diagnostics  
noting electron density profile, temperature,  
ion-atom and electron-atom interaction,  
etc 20 p3556 A66-36964  
Electron temperatures and concentrations  
of charged particles behind strong shock  
wave in air measured, noting techniques,  
maximal values and

accuracy 20 p3545 A66-37369  
 Neutral atmosphere reduces electron gas thermal conductivity below 200 km during both day and night 20 p3552 A66-37590  
 Electron temperature of solar corona, noting radiative transfer of radio emission in corona, deriving distribution of brightness temperature over solar disk 21 p3811 A66-38638  
 Low pressure, high temperature and low values of electrical output effect on plasma conductivity, noting operation of MGD generators at high Hall numbers 21 p3698 A66-39409  
 Nonlinear modulation distortions of high power radio waves propagating in ionosphere, noting electron temperature increase from radio wave 22 p3861 A66-39647  
 Electron density, electron and ion temperature and ionic composition measurements in Peru, using incoherent scattering technique 22 p3910 A66-39977  
 Diurnal variation in electron densities and temperatures in F region above Puerto-Rico, using backscatter measurements 22 p3910 A66-39978  
 F layer electron temperature fluctuations and resultant electron density changes in daytime 22 p3910 A66-39980  
 Nighttime F layer recombination and diffusion coefficients estimated from incoherent scatter measurements of electron densities and electron and ion temperatures 22 p3910 A66-39983  
 Langmuir type probe in argon arc jet, discussing surface contamination problems, causes of high electron temperature and development of automatic cleaning technique 22 p3899 A66-40368  
 Incoherent scattering of radio waves by plasma extended to include effects of unequal ion and electron temperatures and magnetic field 22 p3867 A66-40550  
 Time dependent thermal behavior of ionospheric electron gas 22 p3913 A66-40552  
 Electron thermalization effect on semiconductor laser behavior, noting optical transition between impurity level and band, taking into account diffusion process 22 p3933 A66-40790  
 Coulomb interaction in two-zone superconductor model, noting variation of critical electron-temperature and effect on superconductivity 22 p3968 A66-40916  
 Plasmoid density, electron temperature and radius variation during propagation through magnetic field, using electric and magnetic probes 22 p3958 A66-40932  
 Singlet and triplet populations in helium and electron temperature determination from optical excitation cross sections 23 p4100 A66-41161  
 Spectroscopic measurements of electron densities and temperatures in argon-hydrogen plasma jet 23 p4068 A66-41290  
 Nighttime electron temperatures in upper F region suggest corpuscular energy input 23 p4064 A66-41682  
 Solar UV emission lines for 11 elements heavier than helium analyzed, obtaining relative abundances values and relation between electron temperature and temperature gradient in chromosphere-corona transition region 23 p4130 A66-41809  
 Radial distributions of number density, electron temperature and plasma potential measured in electrodeless discharge, using symmetric and asymmetric double probes [AIAA PAPER 66-194] 23 p4107 A66-41907  
 Ruby laser light scattering measurements of electron and ion temperatures of hydrogen and deuterium plasmas produced in theta pinch devices 24 p4222 A66-42558  
 Energy dependence of effective interaction in superconductivity, calculating critical field and specific heat 24 p4259 A66-43018  
 Automatic double probe to determine electron temperatures in ion engine exhaust 24 p4215 A66-43208

## ELECTRON TRAJECTORY

Equivalence of paramagnetic impurities in superconductor and magnetic field parallel to thin superconducting film with short mean free path 04 p0560 A66-13717  
 Radiation unit of length, calculating path-length for passage of high-energy electrons and photons through matter 06 p0912 A66-16575

Electrostatic field from E region and effect on motion of electrons trapped in magnetosphere 07 p1027 A66-17252  
 Superconductors with ferromagnetically aligned impurities, assuming electron mean free path due to spin-orbit interaction is small compared to coherence distance 07 p1108 A66-18431  
 Velocity and attenuation of ultrasonic waves in thallium when product of sound wave vector and electron mean free path is less than unity 07 p1109 A66-18445  
 Spiralling electrons in geomagnetic field and superimposed electric field aligned with magnetic field lines 11 p1695 A66-22371  
 Response of spherical plasma probe to alternating potentials determined by Boltzmann-Vlasov equation together with Maxwell equations 11 p1746 A66-23070  
 Electron trajectory equations for outer and inner flux boundaries, taking into account thermal velocities under static conditions of centrifugal electrostatic focusing 14 p2236 A66-27246  
 Multivelocity stream effects and efficiency of slow-cyclotron wave amplifiers, noting electron velocity spread which decreases predicted efficiency 15 p2467 A66-29711  
 Cylindrical electron beam behavior in axial, monotonically increasing magnetic field, noting compression, percentage scalloping, etc 17 p2887 A66-32696  
 Exact solution of nonlinear relativistic equations of motion for electron in right circularly polarized wave propagating in whistler mode parallel to external magnetic field 19 p3303 A66-35998  
 Line shape of RF dimensional effect in metals showing correlation with electromagnetic wave attenuation in skin layer 24 p4172 A66-42528

## ELECTRON TRANSFER

Vertical electron transport velocity in ionosphere 06 p0877 A66-16895  
 Hot electron transfer from light mass central valley to surrounding heavy-mass satellite valleys in n-type gallium arsenide, indium phosphide and cadmium telluride analysis based on Boltzmann equation 06 p0929 A66-17035  
 Characteristic radiation spectra emitted in process of spontaneous electron transfer from shallow donors to shallow acceptors at liquid helium temperatures in silicon 07 p1095 A66-17321  
 Kinetic effects in fuel cells, discussing declining efficiency with increasing output, slow electron transfer effects, concentration polarization, etc 07 p0996 A66-18469  
 Participation of ferredoxin of clostridium nigrificans in sulfite reduction, describing transportation of electrons for sulfide formation 08 p1177 A66-18699  
 Electron conservation equation and effects of laminar or turbulent flow on breakdown in gases 08 p1206 A66-18933  
 Interaction of dislocations with coherent ordered zones, discussing results of electron transmission and tensile test experiments 08 p1240 A66-19251  
 Binary transport of electrons and ions in equatorial ionosphere and effect on brightness of 6300 angstrom airglow at Huanayo 09 p1372 A66-20376  
 Thin-film triode devices to investigate hot-electron penetration of oxide films 10 p1509 A66-21540  
 Bipolar excitation of photoconductivity in silicon due to structural disarrangement caused by IR radiation 10 p1583 A66-22019  
 Threshold field dependence on intervalley separation in transferred electron GaAs oscillator 10 p1586 A66-22093  
 K absorption spectra of germanium and selenium in germanium selenide based on band theory of solids by assuming electrons transfer, using X-ray spectroscopy 11 p1758 A66-23368  
 Transition of group IV elements to metallic state confirmed as equivalent to generation of intrinsic current carriers 11 p1759 A66-23447  
 Thermodynamics of new generalized transport laws for liquids, gases and electrons in matter 12 p1977 A66-23557  
 Boltzmann transfer equation for electrons and generation of nonlinear second harmonic of current density in inhomogeneous

plasma 12 p1924 A66-24806  
 Gunn effect involving current oscillations higher than 1000 mc in GaAs crystal under applied electric field 14 p2355 A66-26920  
 Electron transfer from alkali metals to aromatic hydrocarbons, examining rate of chain scission in case of poly(4-vinyl biphenyl/ and poly(alpha/ vinyl naphthalene/ 17 p2870 A66-32300  
 LF common-base current transfer ratio for hot electron transport in semiconductor-metal-semiconductor point-contact-transistor structures measured as function of metal film thickness and temperature 19 p3435 A66-35410  
 Theoretical distribution of charges and potential in vicinity of metal-dielectric barrier in absence and presence of applied field 19 p3448 A66-36753  
 Recharge cross section in collisions of slow atoms or ions involving interparticle transfer of one electron 20 p3604 A66-36987  
 Electron tunneling from metal to doped indium antimonide through oxide layer measured, obtaining characteristics of conductance vs applied voltage for n-and p-type crystals 20 p3620 A66-37769  
 Crystal dislocation distribution effect on low temperature electrical transport properties in plastically deformed metals 21 p3753 A66-39587

## ELECTRON TRANSITION

Laser transition identification in electron beam pumped gallium arsenide, primarily on concentration of shallow donors and acceptors 01 p0081 A66-10348  
 Laser action at 5401 angstroms in pure neon pulsed high voltage discharge 01 p0081 A66-10353  
 Atomic beam lasers, particularly for population inversion in levels of optical transition 01 p0082 A66-10448  
 Indirect transition and temperature dependence of absorption limit in single crystal cadmium sulfide 01 p0126 A66-11006  
 Helium-neon laser output dependence on hollow cathode discharge conditions for electron transitions in neon 02 p0239 A66-11422  
 Two-and three-step laser cascades detected experimentally in helium-neon mixtures, analyzing two-step cascade starting with density matrix formulation 02 p0241 A66-11477  
 Symmetry of ground states of P, As and Sb donors in silicon determined optically 03 p0411 A66-13144  
 Atomic beam lasers, particularly for population inversion in levels of optical transition 03 p0380 A66-13311  
 Eigenvalues and eigenvectors calculated for several low-lying autoionizing levels in helium 04 p0546 A66-13365  
 Self-consistent field calculations of benzene molecule using Gaussian expansion functions, considering 42 electrons and finding interspersions of sigma and pi levels 04 p0473 A66-13648  
 Absolute band and oscillator strengths and absolute Einstein A coefficients for C-2 Swan system 04 p0549 A66-14313  
 Boron, nitrogen and gallium in photo- and electroluminescences of silicon carbide p-n junctions, noting radiative electron transitions 04 p0567 A66-14343  
 Absorption and emission spectra pertaining to electronic transitions of short-lived molecules C sub 2 and CH present in reaction zone of low-pressure oxyacetylene flames 06 p0969 A66-16126  
 Indirect and direct radiative recombination transitions in germanium and use in analysis of lifetime 07 p1094 A66-17314  
 Noncollisional damping modifies HF plasma resonance 08 p1261 A66-18644  
 Indirect transition and temperature dependence of absorption limit in single crystal cadmium sulfide 09 p1411 A66-19944  
 Numerical method of Schroedinger equation and WKB approximation compared in determination of transmission coefficients for thin insulating films 10 p1577 A66-21558  
 Spin wave sideband in absorption spectrum at low temperatures for transition of manganese ion in antiferromagnetic manganese fluoride 11 p1740 A66-22970  
 Dipole matrix elements for helium in first order shielding approximation as function of

breeding parameter 12 p1918 A66-24865  
Donor impurity effect on direct-indirect transition in gallium arsenic phosphide, particularly at low temperature 13 p2170 A66-26590  
Laser oscillator study of coherent stimulated emission of IR transitions in rare gases 14 p2308 A66-27336  
Energy level transitions in vacuum UV absorption spectrum of calcium 14 p2337 A66-27704  
Photoabsorption power due to sodium interband, using orthogonalized plane wave evaluation of matrix elements in oscillator strengths 14 p2365 A66-27753  
Oscillator strengths for electric dipole transitions in neutral helium 14 p2338 A66-28127  
Franck-Condon factors for permitted transitions in nitrogen 14 p2338 A66-28128  
Boron, nitrogen and gallium in photo- and electroluminescences of silicon carbide p-n junctions, noting radiative electron transitions 14 p2367 A66-28238  
Hall coefficient increase with temperature and electron transition to second conduction band in InSb 15 p2558 A66-28614  
Slow electron excitation cross section for solar molecule rotational and vibrational transitions based on Born approximation and point-dipole interaction 15 p2545 A66-29395  
Isotope shifts and Fermi resonance role in carbon dioxide IR laser 16 p2716 A66-30176  
Auroral excitation rates and molecular vibrational temperatures in nitrogen 2PG from Franck-Condon factors obtained from intensity measurements and high resolution absorption spectral data 16 p2692 A66-30328  
Partial differential equation solution, using small parameter method for electron hole transition 16 p2784 A66-31553  
Competition of transitions and emission in He-Ne laser, using resonator without dispersing prism 17 p2938 A66-33514  
Atomic Zeeman patterns using strong pulsed magnetic fields for electronic transitions for Si, Cu, C, O, Ca, Mg and B 18 p3137 A66-33990  
Laser action on several hyperfine transitions in Mn I 18 p3118 A66-34000  
Born cross sections for double-transition collisions of hydrogen atoms 18 p3138 A66-34150  
Derivative chronopotentiometry approach to measurement of transition times and study of electrode process 18 p3064 A66-34457  
Magnetopiezo-optical reflection in germanium observed by piezoreflection technique for direct transition 18 p3156 A66-34467  
Radiation from high-energy-level transitions excited in He-Ne laser during optical pumping with He lamp 18 p3120 A66-34697  
Iron and nickel lines in solar UV spectrum, abundance of various metallic elements in solar atmosphere, electron collision cross sections and oscillator f-values of electron transitions 18 p3237 A66-35050  
Transitions induced by electron impact between all ground-state terms of atomic systems with computed cross sections satisfying unitarity 19 p3463 A66-35990  
Lowest of UV absorption bands attributed to 4f-5d transition of trivalent rare earth ions in calcium fluoride 19 p3443 A66-36004  
Fermi surface interpretation of band structure, electron energy levels, optical properties and ferromagnetic structure of transition and noble metals 20 p3613 A66-37274  
Theoretical band structure, Fermi surface, electronic structure, magnetic and optical properties of rare earth metals 20 p3614 A66-37277  
Visible and UV transition radiation, bremsstrahlung and plasma due to electron bombardment of metal surfaces 20 p3604 A66-37280  
Direct phonon relaxation between two electronic levels in ruby and effect on temperature dependent R-line breadth 20 p3623 A66-38399  
Electron excitation of high eigenstates of hydrogen atom and convergence of total wave function expansion 21 p3774 A66-38532

Faraday and Voigt and dispersive magneto-optic effects in semiconductors in crossed field due to energy band transitions 21 p3800 A66-38995  
Cryogenic optically excited recombination emission in single crystal InSb semiconductor and transitions involving phonon creation, acceptor impurities and band-to-band emissions 21 p3800 A66-38996  
Atomic collisions, excitation transfer processes and energy level transition probabilities in plasma of gas lasers 21 p3748 A66-39305  
Gas laser frequency and emitted power dependence on resonator tuning 21 p3748 A66-39308  
Experimental excited state band locations and intensities in absorption spectrum of electron transitions in optically pumped ruby laser 21 p3749 A66-39569  
Theoretical excited state absorption spectrum of electron transitions in optically pumped ruby laser 21 p3749 A66-39570  
Degree of population inversion and inverse temperature measurement in medium 22 p3917 A66-39663  
Nonemissive multiphonon transitions and quantum yield for ruby R line 22 p3930 A66-39766  
3 cm hydrogen line from solar flares, estimating line-to-continuum ratio during flare 23 p4124 A66-41928  
Competition of transitions and emission in He-Ne laser, using resonator without dispersing prism 24 p4219 A66-42127  
Spectroscopy of IR emission and laser oscillation resulting from transient population inversions on electronic transitions in molecular nitrogen 24 p4221 A66-42550  
Electron transitions and sharp emission lines in XUV solar spectral regions with fractionally charged quarks bound to C, N and O nuclei 24 p4280 A66-43189

 Atomic origins of transient nuclear radiation effects in electronics such as neutron and gamma radiation 12 p1918 A66-24680  
 Electronic self-steering techniques applied to satellite communications systems with high gain antennas, noting transdirective array and self-phasing array [AIAA PAPER 66-326] 12 p1824 A66-24796  
 Yield and reliability of integrated electronic devices and electronic digital systems, using redundant components by triplicating voting 12 p1846 A66-24914  
 Reliability of nonelectronic components in

electronic system, noting failure modes, rates, mechanism, etc 13 p2085 A66-25655  
 Book on measurement of specific electronic parameters in circuit design 13 p2042 A66-26121  
 Reliability improvement in airborne electronic equipment 13 p2044 A66-26692  
 Electronic equipment for Iris telemetry and remote control stations for satellites 14 p2270 A66-27548  
 Air Force Avionics Laboratory and problem of transition from exploratory development to operational hardware 15 p2618 A66-28746  
 High performance contactor design and development 15 p2460 A66-28993  
 Design procedure for rotary solenoids having high unit density, low rotational inertia and inherent resistance to dynamic environments 15 p2460 A66-28994  
 Electromagnetic shielding for sensitive electronic components, noting Netic and Co-Netic magnetic alloys 15 p2465 A66-29670  
 Multichannel differential amplitude discriminator using diodes and transistors 15 p2503 A66-29694  
 Evolution and present status of electronic circuit components including manufacturing and component applications 15 p2468 A66-29890  
 Thermostability and control of airborne electronic equipment in closed-loop forced-air cooling systems 16 p2663 A66-31325  
 Basic techniques for producing thin-film electronic components 17 p2881 A66-32105  
 Mark II avionics system used in F-111A tactical fighter for navigation and weapons delivery performance 18 p3076 A66-33958  
 Electronic equipment for guided weapons design and quality evaluation 18 p3079 A66-34210  
 Industrial nuclear electronic supplies - Conference, French Atomic Energy Commission, December 1965 18 p3113 A66-34411  
 Chemical vapor deposition technique for materials for electron devices including preferred orientation, high purity material, special layer structures, etc 18 p3125 A66-34619  
 Reliability of complex electronic device incorporating great number of components 18 p3087 A66-34957  
 Apparatus for teaching and research in electron physics including emitters, cathode ray tubes, electron multipliers and mass spectrometer 18 p3088 A66-35033  
 Optical-electronic components for signal transmission, considering light emission diodes and silicon control switches 19 p3283 A66-36813  
 Fan selection for high-altitude cooling of electronic equipment 20 p3527 A66-37346  
 Forced-cooled electronic chassis development history 20 p3527 A66-37347  
 Integrated circuits economics, discussing design, construction and running costs 20 p3531 A66-37830  
 Managerial functions related to electronic component parts 20 p3683 A66-37881  
 Prediction of avionic equipment reliability in early design stage, noting equations for line replaceable unit /LRU/, classification, regression techniques, etc 20 p3573 A66-37953  
 Submillimeter wavelength electronic devices, examining development of lasers and reflected wave tubes with overlapping effective wave range 20 p3580 A66-38004  
 Geomagnetically trapped radiation effects on solid state electronic device aboard unmanned vehicles 20 p3534 A66-38349  
 Airborne electronic command device for measuring time intervals corresponding to cruising speed/ true flight altitude ratios up to 40 21 p3735 A66-38569  
 Flight electronics equipment and techniques, discussing communications devices, radio navigation apparatus, all-weather landing and onboard navigation aids 21 p3709 A66-38653  
 Electronic component, ferrite memory cores, filters and inductances adapted to integrated circuit utilization 21 p3716 A66-39622  
 Electronic navigation system for marine applications, using communications satellite

as data relay link 22 p3945 A66-40324  
 Specification and assessment of electronic equipment reliability, emphasizing statistical aspects of optimal cost/reliability estimation 22 p3883 A66-40961  
 Integrated circuit welding into electronic equipment via parallel gap method, noting military applications in forward area communications 23 p4044 A66-41198  
 Moleculechron, stable molecular beam generator using pairs of resonators coupled by molecular beam 23 p4078 A66-41464  
 Airborne digital computers role in electronic warfare, navigation and guidance, considering weight, power supply, costs, etc 24 p4177 A66-42245  
 Electronic system reliability prediction methods, comparing indices of new design with existing design 24 p4184 A66-42647  
**ELECTRONIC EQUIPMENT TESTING**  
 Air Force specification MIL-R-26667 for reliability testing of electronic equipment, commenting on MIL-STD-781 01 p0168 A66-10058  
 Military specifications MIL-HDBK-217 and MIL-R-22256, 22973 and 23094A with respect to reliability design of aircraft electronic equipment 01 p0034 A66-10059  
 Stress survival matrix test in evaluating reliability of monolithic silicon integrated circuit, measuring safety margin and performance parameter drift 01 p0035 A66-10082  
 Integrated circuit characterization by black-box analysis of interconnection parameters, noting transient response 02 p0204 A66-11937  
 Flight control by ground-based radio system discussing aerial navigation safety, operating principles, equipment for VOR and ILS and importance of calibration 03 p0390 A66-13011  
 DC testers for integrated circuits evaluated, emphasizing areas of application, testing methods and operating characteristics 03 p0345 A66-13274  
 Integrated circuit testing noting dynamic test system capabilities 04 p0491 A66-13385  
 Microelectronic amplifiers, emphasizing reliability improvement and decreased sensitivity to parameter changes 05 p0643 A66-14568  
 Accurate measurement of signal to noise ratio 05 p0634 A66-15497  
 Prediction and engineering assessment in early design, particularly mean time between failures of electronic equipment 06 p0839 A66-15948  
 Electronic component testing by methods of Advisory Group on Reliability of Electronic Equipment /AGREE/ 06 p0839 A66-15949  
 Preflight and operational status test set /PTS/ using radiating techniques for checking out aircraft electronic equipment without removal from aircraft 06 p0868 A66-15986  
 Principles and statistics behind life-test plans of MIL-STD-690 Life Test Sampling Procedures for Established Levels of Reliability and Confidence in Electronic Parts Specifications 06 p0886 A66-16332  
 Lifetime of semiconductor devices determined from noise levels 06 p0860 A66-17195  
 Reliability and accuracy testing of electronic equipment 07 p1005 A66-17357  
 Measured characteristic curves for evaluation of memory devices, specifically toroidal core 10 p1508 A66-21414  
 Continuous thermal cycling apparatus for small electronic component samples 10 p1511 A66-21751  
 Trigger functioning, failure due to grid voltage and transistor parameter changes, and reliability parameters of computer and control elements 11 p1677 A66-23032  
 SNAP-10A instrumentation and control subsystems and ground test program 12 p1911 A66-23676  
 Hybrid computer methodology and electronic data processing applied to quality evaluation of test operations 12 p1828 A66-23837  
 Forced reliability testing in electronic computers, switching circuits and digital communications systems by introducing noise or lowering input signal

level 12 p1833 A66-24077  
 Truncation method for determining life characteristics of electronic components such as transistors and vacuum tubes before testing to destruction 12 p1833 A66-24078  
 Component failure-rate testing by inspection or sampling, noting recommendations of advisory groups 12 p1833 A66-24081  
 Component reliability, especially in transistors, noting techniques, design, tests and mounting as monolithic circuits 12 p1833 A66-24082  
 Versatile avionics shop test /VAST/ system, computerized test system for carrier-based avionics 12 p1838 A66-24606  
 Fast scanning IR microscope for semiconductor evaluation used for engineering design analysis, reliability improvement, failure analysis, etc 12 p1843 A66-24676  
 Microwave component testing accuracy and analysis of error sources 12 p1883 A66-24725  
 Accelerated testing of transistors, resistors and capacitors to determine reason for certain types of component failure 12 p1844 A66-24728  
 Defect analysis by device sectioning, noting techniques, application in crystallography, electronics, etc 12 p1845 A66-24849  
 Reliability testing of electronic components at low stress levels, showing higher failure rates and different failure distributions than at maximum ratings 12 p1846 A66-24911  
 Optimum tests for check of working order of system with minimal material losses of safe or fault system 13 p2045 A66-25298  
 Secondary sensing technique for testing aerospace electronic systems by measuring side effects 13 p2079 A66-25692  
 Military and spacecraft electronic component testing, specifications and reliability programs 13 p2086 A66-25846  
 Extrapolating reliability ratings of electronic components and materials tested at high stress to low stress performance 13 p2043 A66-26220  
 Reduction of measurement error in devices for testing semiconductors, employing mechanical techniques 14 p2297 A66-28132  
 Electronic component reliability and control program 15 p2465 A66-29667  
 Silicon planar transistor design noting accelerated life test, failure data, etc 15 p2466 A66-29675  
 Test program for Gemini Attitude Control and Maneuver Electronics /ACME/ system, establishment and execution 16 p2676 A66-30438  
 Significant environmental criteria and realistic and standard test conditions for microelectronics testing 16 p2659 A66-30451  
 Monitoring device for detecting short-duration, vibration-induced electrical malfunctions, noting Gemini tests 16 p2677 A66-30454  
 Nondestructive attachment of small electronic components and integrated circuits for simulated mounting in vibration and shock testing 16 p2680 A66-30481  
 Operational test instrument for PCM bit synchronizers/signal conditioners, discussing importance of bit decision errors 16 p2659 A66-30541  
 Checkout of automatic meteorological measurement apparatus including thermograph, photoelectronic anemograph, etc, located on high tower of Institute of Applied Geophysics 16 p2704 A66-30775  
 Nomograms published in Electronic Design from 1963 to 1966 covering prototype, testing, costs, selection and avoidance of pitfalls 17 p2881 A66-32103  
 Step-stress technique to induce failures in integrated circuits to pinpoint source of reliability problems 17 p2882 A66-32114  
 Breadboard approach for integrated circuits with reduction of lost and development time, tabulating resistor and transistor parameters 17 p2884 A66-32128  
 Integrated circuit breadboarding time saving procedures 17 p2884 A66-32129  
 Integrated circuit testing by sequential, go-no-go and programming methods 17 p2884 A66-32131  
 Monogram on metrological foundations and test methods of aircraft instruments,

especially navigation instruments 18 p3111 A66-34011  
 Transistor testing and secondary breakdowns, featuring application of constant collector current and power with arbitrary waveform 18 p3078 A66-34087  
 Nondestructive testing of nonlinearities in passive electronic components, uncovering uneven film depositions, bad grindings, unreliable contacts, etc 18 p3088 A66-35020  
 Measurement of varactor diode characteristics for subsequent application in microwave low-noise parametric amplifiers 19 p3313 A66-35471  
 Built-in tests and periodic testing at field shop level applied to avionic systems operational readiness 19 p3339 A66-35504  
 Lifetime of semiconductor devices determined from noise levels 19 p3315 A66-35553  
 Electronic equipment to withstand cannon firing and extreme underwater depths 19 p3357 A66-35710  
 Indirect testing of dynamic systems involving maximum measure of parameter values from minimum test points, noting dependency of error propagation on system structure 20 p3521 A66-37210  
 Antennas for electronic navigation, discussing aircraft and ground based equipment, radiation patterns, restrictions, etc 20 p3597 A66-37719  
 Deterministic and quasi-deterministic class of electronic failure predictions as prevention strategy for use in aerospace system test or checkout program 20 p3566 A66-37887  
 Reliability testing programs applied to aircraft electronics equipment and description of development of MIL-STD-781A, exploring relation between reliability prediction and measurement techniques 20 p3570 A66-37936  
 Intermittent connection testing for digital logic module 20 p3523 A66-37949  
 Systems tests coverage for data processing system 20 p3523 A66-37950  
 Lunar Excursion Module /LEM/ reliability program, discussing engineering, manufacturing and techniques of design and qualification testing of electronic components 21 p3714 A66-39520  
 Automatic testing equipment, examining role of computer in reliability, quality of testing and time and cost savings 22 p3892 A66-40543  
 Electronic component reliability test program review including test planning, objectives and relation of types of review to projects 23 p4152 A66-41605  
 Mariner 1964 parts screening program including philosophy, program implementation, screening results and conclusions 24 p4178 A66-42089  
 Reliability prediction for electronic systems based on constant failure rate and MTBF /mean time between failures/ 24 p4185 A66-42866  
 Performance changes of various commercial types of vidicons tested in thermal chamber at practical extremes of temperature 24 p4185 A66-42959

# ELECTRONIC FILTER

## SA MICROWAVE FILTER

Constructing and evaluating electrostatic filter lenses with wide image angles for low voltage electron microscope 02 p0228 A66-11498  
 Electron microscope filter lenses with unconventionally shaped electrodes and large image angles 02 p0228 A66-11499  
 Undistorted reproduction of signal, using filter with transfer function having multiple zeros 04 p0503 A66-13706  
 Reflection and transmission coefficients of magnetically biased YIG ferrimagnetic resonator loaded in aperture of iris in coaxial transmission line 05 p0641 A66-14555  
 Frequency sensor and roving notch filter for control system, discussing parasitic signals with time-varying frequencies 05 p0645 A66-14603  
 Filtering techniques for estimating nonlinear discrete-time processes, including Bayesian estimation and weighted least squares approach 05 p0656 A66-14631  
 Band stop filters, determining advantages in high power transmission and rejection,

power capacity, Q-factor, etc 06 p0844 A66-16081  
 Symmetrical transverse electromagnetic-mode directional couplers, deriving formulas for functional parameters and insertion-loss function 06 p0844 A66-16083  
 TEM-mode coupled-transmission-line directional couplers, determining equal-ripple polynomials and tabulating parameters 06 p0844 A66-16084  
 Stable tunable RC filters with fixed capacitors, variable resistances and positive feedback 06 p0853 A66-16653  
 Dispersive network system for pulse duration modulation 06 p0866 A66-16957  
 Nonlinear characteristics of optimal inertialess filter for pulse noise to guarantee minimum rms error 07 p1014 A66-17436  
 Filtering properties of frequency-stability transport circuits of molecular beam generator, noting design considerations for high efficiency 09 p1353 A66-20442  
 Probability of signal acquisition by phase-locked oscillator system operating in frequency search mode, determining maximum admissible search rate without noise 09 p1354 A66-20443  
 Bridged-T three-terminal filter network modified to admit two same-frequency same-phase input signals of different amplitudes 09 p1361 A66-20609  
 Strip transmission line for microwave circuit design such as varactor multiplier frequency sources, filters, multiple pole diode switches, etc 09 p1356 A66-20672  
 Lumped-circuit LF general three-resonator filter in rectangular wave guide using inductive susceptances as coupling elements 10 p1514 A66-21911  
 Nonlinear filters, including system analysis optimization, realization via Volterra functionals, etc 11 p1675 A66-22630  
 Synthesizing group of parallel-input filters while minimizing insertion loss and reflection coefficient 11 p1656 A66-23065  
 Tapered distributed RC networks with similar immittances examined for poles and zeros of two-port short circuit admittance parameters 11 p1678 A66-23241  
 Digital and RF/linear circuits compared noting monolithic, hybrid and thin film circuit limitations, phase locked loop design, etc 12 p1830 A66-23756  
 Relating maximum Q-factor of second-order active filter section to Q-factor stability and to gain in active elements 13 p2030 A66-25209  
 Active transistor modulators for carrier frequency engineering, noting noise reduction, lower power requirements and modulation-filter matching 13 p2032 A66-25485  
 Radar range measurement accuracy shown to depend on receiver filter 13 p2023 A66-25666  
 Signal to noise ratio maximization using Pontryagin maximum principle, solving matched filter problem and designing signal with constrained energy and amplitude requirements 13 p2048 A66-25940  
 Electronic circuit design handbook covering control, detection, pulse and oscillator circuits, configurations, application, etc 13 p2042 A66-26056  
 Nomograph calculation for twin-T filter design 14 p2247 A66-26868  
 Redundant system reliability in aircraft design, noting amplifier and filter arrangements, diode and quadruplex circuits, etc 14 p2247 A66-27015  
 Undistorted reproduction of signal, using filter with transfer function having multiple zeros 15 p2469 A66-28549  
 Dishal method, logical means of tuning multiple-resonant-circuit filters and for adjusting coupling coefficients between adjacent resonators 15 p2463 A66-29036  
 Octave band all-pass filter with electronically tunable limiter ranges 15 p2463 A66-29037  
 Nonuniform transmission line generalization, noting application to proportional networks, exponential and Bessel lines 15 p2471 A66-29325  
 RC active filter synthesis using common-base and common-collector configurations 15 p2475 A66-29862

Transfer function characteristics of one input-two output complementary filters 17 p2880 A66-32059

Synthesis of control systems with minimum complexity, noting application to filter discrimination of nonstationary signals 17 p2901 A66-32568

Design of adaptive systems with forced oscillations, using correlation and filter methods 17 p2902 A66-32573

Design criteria for active filters using resistance and capacitance elements in feedback circuits 17 p2896 A66-33297

Half-wavelength resonators as capacitive-gap strip-line bandpass-type microwave filters, discussing parameter derivation for equivalent circuit and Cohn synthesis method 18 p3087 A66-34621

Quartz crystal active filters noting design and operation of multiresonator filters 19 p3312 A66-35337

Optimum digital filters combining position and velocity information under approximate distortionless constraint for LF navigation 20 p3596 A66-37224

Digital programming and topological optimal filter design incorporating nonideal lossy elements 20 p3533 A66-38281

Steady state and transient response characteristics of class of low pass filters noting transmission properties, frequency and time domain considerations, etc 21 p3713 A66-39271

Hybrid junction diplexer connecting transmitter and receiver to common antenna 22 p3873 A66-39784

Attenuation of single- and double-section bridge filters containing one two-winding magnetostrictive resonator and one two-winding coil 22 p3875 A66-40070

YIG resonators, oscillators and filters in microwave design 22 p3880 A66-40737

Dispersive network with attenuation equalizing network, weighting filter for control of output side lobe level with Gaussian shaped frequency response and matching system 23 p4034 A66-41016

Pulse compression filter synthesis using ultrasonic delay lines 23 p4034 A66-41019

Statistical correlation-Fourier frequency band analysis of coherent memory filter applied to pulse compression radar systems 23 p4035 A66-41023

S-band waveguide for pulse compression applications, providing cheap means of compressing wideband swept frequency pulses 23 p4035 A66-41024

Synthesis of prescribed frequency/group delay characteristics, using passive microwave components 23 p4035 A66-41027

Radar range accuracy, deriving expression for time domain calculation of accuracy degradation due to nonoptimum filtering 23 p4037 A66-41321

Optimum filtration of signals in presence of arbitrary interference, using orthogonal function series 23 p4037 A66-41514

Active and passive multiplication of RC time constants for subaudio frequency integrated filters 23 p4046 A66-41581

Horowitz minimum sensitivity decomposition does not lead to optimally sensitive networks for selected class of RC networks 24 p4181 A66-42372

Nonlinear behavior of second-order phase locked loop in presence of noise, discussing probability distribution of phase error, statistical properties of loop behavior, etc 24 p4172 A66-42618

RC filter with staggered notch frequencies for ease of adjustment and maintenance 24 p4183 A66-42628

**ELECTRONIC LEVEL**

**SA FORBIDDEN BAND**

Constants A and B of cesium superfine structure calculated from magnetic sublevel intersections 05 p0741 A66-15859

Fluctuations of electron numbers in general M-level system, using difference equation 08 p1279 A66-19837

Electron impact ionization cross section of H<sup>2</sup>s/ and H<sup>2</sup>p/ in Born A, Born B, Born-Ochkur and classical approximations 11 p1738 A66-22498

Interference of fine-structure levels in hydrogen ions passing through two successive carbon foils 11 p1740 A66-22968

Decay theory of closely coupled unstable

states based on Green function formulation for transition amplitude 11 p1741 A66-23189

Neon level broadening under effect of laser radiation studied by observing Hanle effect on fluorescent light 15 p2517 A66-29640

Electronic energy for ground state of one-electron diatomic molecule near united atom 18 p3140 A66-34512

Mean life of electronic level in O V measured by beam-foil technique 20 p3604 A66-37605

**ELECTRONIC MODULE**

Temperature cycling effect on welds of known strength which are encapsulated with several types of resins to determine internal stress in electronic modules 02 p0234 A66-11326

Producibility of electronic hardware for Pershing weapon system ground support program 02 p0198 A66-11463

Direct-immersion liquid cooling of modularized microelectronic systems on system-wide basis 06 p0841 A66-15973

Package densities and power dissipation requirements in hybrid integrated circuits solved by modular arrays 10 p1512 A66-21760

Stick module interconnection of flat packs into single-axis motherboard 11 p1665 A66-22678

Integrated modular digital computer system for ICETAN /ICES-FORTRAN/ programming of engineering problems 12 p1827 A66-23833

Solar cells for space travel, emphasizing fabrication into modules [AIAA PAPER 64-738] 13 p2007 A66-26644

Program-controlled module design using strips of nickel foil for welding of flatpack assemblies 17 p2930 A66-33121

Ground and airborne digital equipment for missile and space systems built with mass produced standardized modules interconnected by wrapped joint wiring 18 p3077 A66-34050

High-speed complementary MOS memories 19 p3314 A66-35527

Miniaturization of logic components for modular and monolithic integrated circuits in computer design 21 p3708 A66-39624

System maintainability in Back-Up Interceptor Control System /BUIC II/ using modular design of system, discussing software and failure 24 p4178 A66-42093

**ELECTRONIC PACKAGING**

Embedment stress effects on electrical characteristics of encapsulated components, presenting capacitor test results 02 p0247 A66-11287

Dielectric organic polymers in microcircuit communications modules 02 p0195 A66-11289

Electronic packaging - SAE Conference, Los Angeles, October 1965 02 p0233 A66-11320

Carrier-mother board rack approach to microcircuit interconnection and packaging 02 p0195 A66-11322

Automated flat pack welding design, discussing operational functions and major components 02 p0234 A66-11323

Reliability control in parallel gap welding used to join integrated circuit flat packs to printed circuit assemblies 02 p0234 A66-11324

Correlation of microstructure, microhardness and microchemistry in resistance welded electronic leads 02 p0234 A66-11327

Packaging tradeoffs for Pershing ground support equipment 02 p0197 A66-11459

Electronic packaging in Pershing weapon system ground support equipment 02 p0197 A66-11460

Epoxy transfer molding of high density modules for Pershing weapon system reliability and economy 02 p0234 A66-11462

Packaging techniques interrelated with design specification and manufacturing capabilities noting integrated circuit system, circuit reliability and thermal resistance 02 p0200 A66-11891

Packaging method for integrated circuits based on flow soldering components through printed wiring boards to be used in digital computer design 02 p0204 A66-11940

Practical component packaging system for compatible use of integrated and thin film circuits in spaceborne digital command and data handling equipment 04 p0492 A66-13465

Multilayer circuit boards for interconnecting integrated circuits in computer and other large systems 04 p0498 A66-14015

Thermionic converters, discussing resistant metal-bond use for collector-emitter insulation 05 p0622 A66-15590

Gas-cooled electronic equipment, discussing experimental heat transfer and pressure drop data, packaging and thermal effectiveness parameters [ASME PAPER 65-WA/HT-44] 05 p0650 A66-15665

Thermal-electrical systems for showing effect of variations in integrated circuit geometry and packaging on thermal response characteristics of simple structure 06 p0841 A66-15972

Microminiature element packaging and multilayer circuits, discussing design and production 07 p1010 A66-18247

Packageless diode fabricated by beam-lead process with no soldering or eutectic bonding 09 p1351 A66-20166

Digital systems research model design containing logic gates in integrated circuit packages 09 p1356 A66-20676

Design problems involved in transition from discrete-component circuits to integrated microelectronic circuits, noting conversion of analog and digital circuits and system packaging 10 p1512 A66-21758

Hybrid circuit rejects avoided by using ceramic channels and ultrasonic bonders during assembly of active semiconductor devices and integrated circuits to thin film network 10 p1512 A66-21759

Package densities and power dissipation requirements in hybrid integrated circuits solved by modular arrays 10 p1512 A66-21760

Electronic system packaging efficiency through reduction of passive volume of clearance, wiring and structure 11 p1665 A66-22677

Vibration and shock isolation of electronic equipment, examining isolation theory of periodic vibrations and random vibrations 11 p1667 A66-22764

Basic structure of cylindrical diode package mounted with axis normal to parallel metal surfaces extending beyond diode package 12 p1831 A66-23905

Laser welding for production microwelding, noting design, construction and application [ASTME PREPRINT MM66-707] 12 p1886 A66-24415

Parts, materials and packaging reliability and electric contacts - IEEE International Convention, New York, March 1966 12 p1842 A66-24663

Functional approach to electronic packaging of 60-mc intermediate frequency amplifier using thin film circuits 12 p1847 A66-24952

Design of electronics packaging for LEM, considering reliability, low-weight, integration, control, etc 12 p1847 A66-24956

Packaging design of electronics portion of missiles IR tracker system 13 p2040 A66-25841

Packaging VHF/UHF circuits involved in design of RF equipment used in air and spaceborne vehicles 13 p2041 A66-25844

Packaging quartz pressure transducers 13 p2084 A66-26565

Ministick packaging system for integrated circuits 14 p2249 A66-27109

Dynamic logic chassis analyzer /DLCA/, diagnostic tool for isolating faults to circuit card or component level in programmer test station /PTS/ and component test station /CTS/ ground support equipment 14 p2260 A66-28266

Thin film hybrid packaging method for series of computer logic circuits designed to operate at 100-mc clock rate 14 p2260 A66-28267

Packaging techniques for telemetry components and systems to withstand gun-launch accelerations up to 250,000 g 16 p2651 A66-30561

Electronic encapsulant thermal conductivities increased, noting dry filling potting technique, considering module reparability 16 p2664 A66-31378

Laser welding for advanced electronic packaging 16 p2715 A66-31593

Computer assemblies packaging analysis for

Optimum logic gates and inputs as function of leads 17 p2883 A66-32124  
 Printed circuit processing, state of the art 17 p2896 A66-33365  
 Embedding and encapsulating processes and design of embedding materials for electronic packaging 17 p2944 A66-33525  
 Ground and airborne digital equipment for missile and space systems built with mass produced standardized modules  
 Interconnected by wrapped joint 18 p3077 A66-34050  
 Thermoconductivity, mechanical stress, processing characteristics, etc., of various adhesives used in integrated circuits, noting neoprene cement 18 p3077 A66-34051  
 Integrated circuit connecting and packing, discussing cost flexibility and performance characteristics 18 p3086 A66-34399  
 Electronic packaging weight reduction by using magnesium-lithium 19 p3376 A66-35327  
 Packaging transistor and diode chip circuits 19 p3313 A66-35483  
 Airborne UHF telemetry receiver utilizing solid state components and high-density packaging technique 19 p3316 A66-35691  
 Microelectronics pulse code modulation PCM/multiplexer-encoder for Apollo spacecraft, emphasizing packaging techniques, discussing advance circuit design techniques 19 p3317 A66-35707  
 Integrated electronic arrays, examining fabrication, logical design, application and packaging 21 p3710 A66-38828  
 Assembly and packaging of microelectronic systems by integrated circuits, considering spatial configuration, maintainability, interconnection, thermal transfer and environmental resistance 21 p3710 A66-38830  
 Packaging technique for producing rendezvous radar and transponder noting structural design, reliability, cooling, outgassing, humidity, etc 21 p3715 A66-39527  
 Hybrid PCM telemetry system packaging for Nimbus B spacecraft 21 p3706 A66-39585  
 Packaging monolithic integrated circuits in ENVAC 1824 Aerospace Computer Central processor 22 p3878 A66-40714  
 Reliability prediction, failure rates, failure design and packaging of integrated circuit and MOS-FET microminiaturized electronic equipment 24 p4179 A66-42098  
 Systems design and packaging with integrated circuits, discussing proper circuit selection guidelines and parameters 24 p4182 A66-42499  
 Leak specifications for gas-filled electronic enclosures, discussing molecular, slow viscous, capillary and ordinary leak patterns 24 p4182 A66-42574  
 Flat-pack case for thermal resistance of integrated circuit to space environment 24 p4186 A66-43059  
**ELECTRONIC PHOTOGRAPHY**  
**SA ASTRONOMICAL PHOTOGRAPHY**  
 Image dissector for lunar observation in conjunction with Earth-based telescope, noting efficiency of resolution contrast sensitivity 12 p1883 A66-24678  
 Phase hologram generation by means of thermoplastic xerography 13 p2081 A66-26001  
 Electronic device for converting one-dimensional optical image into electronic image with subsequent conversion of electronic image into electrical image in time 16 p2709 A66-31609  
**ELECTRONIC RECORDING INSTRUMENT**  
 Performance testing, evaluation and system specification of broadband predetection recording instruments 14 p2298 A66-28430  
**ELECTRONIC SIGNAL MEASUREMENT**  
 Measuring instrument for time interval between two electrical impulses 05 p0682 A66-15311  
 Mode selective coaxial directional couplers for measurement of unwanted harmonics effect 13 p2044 A66-26745  
 Narrow band LF direct-reading random noise measurement and reduction of time requirements, using integrating RC network with time-variable components 14 p2295 A66-27716  
 Automatic recording, printing and punching of meteorological data from signals measured by automatic bridges and potentiometers on high tower of Institute of Applied Geophysics 16 p2704 A66-30776

Thermal noise in internal measuring instruments affecting limitations on spacecraft open-loop inertial autonomous control system precision 18 p3132 A66-33872  
 Operational circuits found in measuring devices and in regulation or control systems for low power signal transformation for space application 18 p3076 A66-33882  
 Possible measurement of current flow through electrode in plasma by inserting Rogowski coil in electrode 19 p3357 A66-35807  
**ELECTRONIC STRUCTURE**  
 Multiband model for monoclinic and orthorhombic rhenium dioxide exhibiting Pauli paramagnetism and metallic type conductivity 01 p0127 A66-11084  
 Electronic structure of molecules based on wave function called self-consistent field biorbital wave function 03 p0394 A66-12334  
 Plastic deformation splitting and evolution of spectral lines and excited level structure of europium ion in alkaline-earth fluoride crystals 03 p0409 A66-12717  
 Optical field effect in analyzing band structure and surface physics of silicon, noting reflectance 04 p0560 A66-13723  
 Effect of relativistic interaction terms, mass velocity, Darwin and spin-orbit coupling upon electronic levels of covalent-bond compound semiconductors BN, SiC, AlP and GaAs 04 p0561 A66-13725  
 Electronic states of single defects in diamond calculated by comparing electronic states of single vacancies and single interstitial carbon atoms 06 p0938 A66-17148  
 Low temperature alpha radiation and subsequent isothermal recovery effects on electron structure of gold, relating resulting failures to Frenkel defects 07 p1048 A66-17303  
 Quantum mechanical discussion of electron structure of crystal lattice of semiconductor as contributor to thermodynamic behavior of impurities 07 p1097 A66-17472  
 Band structure of germanium in vicinity of Brillouin zone center 07 p1097 A66-17533  
 Electronic structure of refractory compounds based on X-ray study of chromium spectra 09 p1391 A66-20871  
 Steady state structure and LF modes of infinitely long finite thickness cylindrical sheet of relativistic electrons in applied external field 12 p1873 A66-24576  
 Indium-cadmium alloy superconducting transition temperatures for varying compositions, noting electronic structure 13 p2169 A66-26278  
 Alloying real germanium surface with gold impurity and increase of fast surface states and rate of surface recombination 14 p2365 A66-27752  
 Thermionic emission from barium telluride measured by cathodes formed by direct reaction of elements and reduction of barium tellurate 19 p3436 A66-35426  
 Low temperature vibronic transitions between electronic states involving destruction of photon and creation of phonon via electric dipole term of Hamiltonian 19 p3446 A66-36394  
 Metal and alloy optical properties and electronic structure - International Colloquium, Paris, September 1965 20 p3612 A66-37271  
 Alfven wave propagation equations used to study electronic properties of semimetals 20 p3615 A66-37282  
 Electronic structures of transition metal alloys analyzed, comparing superconducting critical temperatures with H, N and O acting as electron donors 22 p3960 A66-39779  
 Indium and thallium first spectra sp<sup>2</sup> atom configurations and configuration mixing 22 p3960 A66-39801  
 Shock tube monitoring of electron-generation rate in argon-xenon ionization cross section implies that atom-atom processes in noble gases ionization cross section is independent of electronic structure 23 p4099 A66-42080  
**ELECTRONIC SWITCH**  
 Microelectronics and results achieved in relays, switches, variable capacitors and potentiometers 02 p0205 A66-11943  
 Learning matrices based on redundancy principle as nonadaptive self-correcting adjustment switches and error detectors in

electronic systems 04 p0489 A66-13510  
 Channel sample-and-hold PCM telemeter, system modules, multiplexer gate groups, analog-to-digital converter, etc 08 p1184 A66-19518  
 Electronically despun switched antenna using variable phase shifters to control phase of incident power to circular array of elements [AIAA PAPER 66-302] 12 p1844 A66-24769  
 Series power switch for orientation and position computer of small lunar-orbit spacecraft designed to reduce weight and cost 17 p2878 A66-33122  
 Textbook on transistor electronics of semiconductor switching devices in digital and some analog installations 17 p2876 A66-33190  
 Circuit functions, electrical parameters and fabrication of integrated analog switch in monolithic silicon block 19 p3320 A66-36322  
 Contactless telemetering element design, deriving equations for geometric dimensions of spring loaded oscillating system 23 p4045 A66-41398  
**ELECTRONIC TRANSDUCER**  
**SA ULTRASONIC WAVE TRANSDUCER**  
 Thin film strain gauge transducers noting temperature performance, power dissipation, metallic or ceramic construction and application to nuclear radiation testing, airborne equipment, etc 06 p0882 A66-16898  
 Transducers for exciting and detecting acoustic waves in discharge tube plasmas, discussing requirements, specifications and construction techniques 07 p1032 A66-17496  
 Groove guide, discussing development and performance of H sub 11 /low loss/ transducer 07 p1008 A66-17516  
 Ten-inch stroke electrodynamic thruster, noting modifications in armature guidance, base, rotation system, trunnion lifting mechanism, etc 16 p2678 A66-30464  
 Ferroelectric transducers, discussing feasibility of using ceramic transducers as pulsed power supplies 21 p3741 A66-39504  
 Current transducer for measuring current pulses in kiloampere range and suitable for laser research applications 24 p4213 A66-42820  
 Microwave transducers for measuring geometric dimensions and displacements in industrial process control 24 p4214 A66-43012  
**ELECTRONICS**  
**SA MEDICAL ELECTRONICS**  
**SA MICROELECTRONICS**  
**SA MOLECULAR ELECTRONICS**  
 Intermediate text on fields and waves in communication electronics covering basic equations, oscillating systems, transmission lines, waveguides, microwave circuits, etc 01 p0031 A66-10977  
 Western Electronic Show and Convention, San Francisco, August 1965, Part 5, Space electronics 01 p0072 A66-11109  
 Western Electronic Show and Convention, San Francisco, August 1965, Part 1, Military electronics 02 p0197 A66-11457  
 Pershing weapon system test stations and new microminiaturization packaging 02 p0197 A66-11458  
 Electronic systems in marine, air and space transportation noting radar, ultrasonic devices, computer techniques, etc 02 p0206 A66-12033  
 Space electronics - IEEE International Symposium, Miami Beach, November 1965 04 p0475 A66-13575  
 National Electronics Conference, Chicago, October 1965 05 p0639 A66-14553  
 Book on space communications techniques covering equipment design and components and communications subsystems, with two bibliographies 05 p0635 A66-15805  
 Military electronics - MILECON/9, Conference, Washington, D.C., September 1965 06 p0840 A66-15954  
 Aerospace electronics developments and trends toward more hybrid systems in guidance and control applications 11 p1667 A66-22954  
 Systems effectiveness - Conference, Electronic Industries Association, Washington, D.C., October 1965 11 p1788 A66-23434  
 Wire and data communication - IEEE International Convention, New York, March 1966 12 p1818 A66-24594

- Radio communication, broadcasting and audio - IEEE International Convention, New York, March 1966 12 p1838 A66-24597
- Circuit theory, information theory, basic sciences, electrostatic processes - IEEE International Convention, New York, March 1966 12 p1855 A66-24645
- Instruments, measurements, industrial electronics, nuclear science, ultrasonics - IEEE International Convention, New York, March 1966 12 p1842 A66-24672

- Electronic reliability - IEEE Conference, New York, May 1966 24 p4178 A66-42087
- ELECTROPHORESIS**
- SA COLLOID**
- Electrophoretic motion of dielectric particle determined from flow rate of liquid metals and semiconductors near infinite plane 05 p0733 A66-14688
- Electrophoretic determination on acrylamide gel of lactic dehydrogenase isozyme patterns in serum obtained from human subjects exposed to brief intense thermal impulses 06 p0814 A66-16831
- Solubility characteristics and electrophoretic and ultracentrifugal properties of human gamma globulins 09 p1334 A66-19900
- Chromatography on carboxymethyl cellulose to obtain fractions containing predominantly single bands of malate dehydrogenases 15 p2446 A66-28871
- ELECTROPHOTOMETRY**
- S PHOTOELECTRIC PHOTOMETRY**
- ELECTROPHYSIOLOGY**
- Electrophysiology of vision describing neural and photochemical processes and motor response 04 p0461 A66-13788
- Conduction velocity of single units, verified components of spinocervical tract and over-all conduction velocity determined in dorsal column of cat 06 p0810 A66-15941
- Electrophysiological study of responses of central nervous system on action of some factors of space flight 11 p1642 A66-22489
- Electrode implantation in dogs and detection of action currents in vegetative nerves after ten months 15 p2444 A66-29499
- Experimental research into olfactory code, noting psychological and physiological analysis, suggesting specific chemically sensitive molecules role 15 p2441 A66-29650
- Electrophysiological study of pituitary-adrenal axis activation during rapid eye movement /REMS/ in human urology patients 17 p2859 A66-32305
- ELECTROPLATING**
- Jet plating of gold to make ohmic contacts on silicon 14 p2361 A66-27277
- ELECTRORETINOGRAM**
- Electromagnetic shutter for electroretinography has opening and closing times of 0.50 and 0.70 msec and range of varying controlled durations 13 p2083 A66-26552
- Receptive field organization of rat retinal ganglion cells, examining maintained impulse activity with stationary spots of light 16 p2640 A66-31184
- Thresholds, b-wave latencies, stimulus intensity/b wave amplitude relationships and diffuse adaptation effects upon electroretinogram stimulation by light subtending 20 degree visual field 22 p3856 A66-40965
- ELECTROSTATIC CHARGING**
- Sources and effects of electrical charge accumulation and dissipation on spacecraft 11 p1778 A66-23485
- Electric field influence on thin metal film growth inducing coalescence of three-dimensional island-like structure 17 p2979 A66-32632
- ELECTROSTATIC DRAG**
- Electrohydrodynamic phenomena associated with motion of charged particle in plasma, showing that disturbance produced depends on particle speed 13 p2154 A66-26669
- ELECTROSTATIC FIELD**
- Mass spectrometry of positive ion beam produced by nonmagnetic emitter, using electron beam passing through electrostatic field for rare isotope analysis 03 p0397 A66-12391
- Relationship between field singularities of electrostatic theory and equations for fixed charge and dipole models, including geometrical distributions 03 p0391 A66-12404
- Electrostatic probe performance interpreted by taking into account MGD boundary layer 03 p0399 A66-12800
- Electrostatic field from E region and effect on motion of electrons trapped in magnetosphere 07 p1027 A66-17252
- Radiation induced during electron passage through magnetic field can be intensified and made nonrelativistic by superimposed electrostatic field 07 p1044 A66-18261
- Radiation induced during electron passage through magnetic field can be intensified and made nonrelativistic by superimposed electrostatic field 09 p1387 A66-20905
- Force field detection and control of objects in space, using gravitational, electrostatic or magnetostatic fields 12 p1820 A66-24677
- Mass spectrometry of positive ion beam produced by nonmagnetic emitter, using electron beam passing through electrostatic field for rare isotope analysis 13 p2139 A66-25397
- Motion equation of viscous oil flow under action of electric forces caused by surface charge 13 p2070 A66-26709
- Electrostatic interaction effect on EM wavescattering by atmospheric aerosol particles 14 p2284 A66-27539
- LF electrostatic field characteristics of clear air turbulence, noting theory and application of field sensing antennas, turbulence generated signals, etc 15 p2532 A66-28923
- MOS transistor characteristics based on model in which bulk charge due to ionized impurity in semiconductor and difference between electrostatic potential and voltage drop in channel are included 16 p2662 A66-31015
- Electrostatic field gradient effect in semiconductors with diffused impurities investigated, using basic diffusion theory 17 p2980 A66-32645
- Nonuniform motion of high field domains in Gunn effect including steady and nonsteady state properties of formation stage 18 p3077 A66-34076
- Electrostatic field influence on nucleate boiling of Freon 113, noting improvement of peak heat flux 19 p3477 A66-35407
- Surface patch electrostatic field effects on field emission single crystal plane work function determinations 21 p3770 A66-38656
- Electrostatic interaction effect on EM wavescattering by atmospheric aerosol particles 24 p4198 A66-42325
- Scattering of circularly polarized electromagnetic wave in Coulomb field, noting coalescence of two-wave quanta into one quantum of double frequency 24 p4220 A66-42529
- Scherzer theorem on aperture aberration extended to monochromatic nonrelativistic system with electrostatic or magnetic quadrupole fields with common planes of optical symmetry 24 p4239 A66-43215
- ELECTROSTATIC GENERATOR**
- Testing dielectrics by direct application of two high-voltage LF electrostatic generators with long-period sinusoidal waves 03 p0340 A66-12467
- Liquid filled electrostatic generation, noting charge transporting and insulating function of liquid helium 17 p2848 A66-31814
- ELECTROSTATIC GYROSCOPE**
- Unconventional attitude sensors required to make strapped-down gimballess inertial guidance system practical 01 p0139 A66-10004
- ELECTROSTATIC INSTRUMENT**
- Duoplasmatron with electrostatic lens decreasing ion energy while focusing ions for maximum density parallel beam 01 p0114 A66-10851
- Electrostatic spectrometers discussing deflection type, retarding-potential type and magnetic analyzers, advantages, uses, flux measurement techniques via energy selectors, etc 03 p0369 A66-12652
- Microwave amplifier, electrostatically focused klystron, for spaceborne equipment used in telecommunications of deep space 04 p0493 A66-13603
- Electrostatic fluxmeter measuring electrostatic field in atmosphere 04 p0523 A66-14307
- Low energy charged particle measurements, describing satellite mounted spherical electrostatic analyzer 05 p0751 A66-15373
- Water-cooled electrostatic probe capability of measuring local electron temperature, electron density, floating potential and saturation current ratio in dense plasmas [AIAA PAPER 66-73] 08 p1262 A66-18956
- Ion density profiles in boundary layers associated with supersonic flow of shock heated air over flat plate measured by cylindrical and flush-mounted electrostatic probes [AIAA PAPER 66-159] 10 p1565 A66-21686
- Low energy particle flux measuring circuits of spherical electrostatic analyzers aboard Elektron II and IV 11 p1704 A66-22431
- Generalized equation for steady state motion of electrons in cylindrical electrostatic system with arbitrary cross section, calculating critical focusing current 11 p1735 A66-22493
- Electrostatic double probe consisting of two parallel plates for plasma diagnostics [AIAA PAPER 65-542] 12 p1876 A66-23579
- Electrostatic fluxmeter measuring electrostatic field in atmosphere 14 p2297 A66-28220

- Electrostatic probe measurements of velocity displacement and electron density of plasma using laser compared with measurements using microwave interferometer 14 p2346 A66-28269
- Asymptotic theory of spherical electrostatic probe in collision-dominated partially ionized gas by quasi-linearization 18 p3146 A66-34583
- Electron beam rotation experiments on near spiratron with M-type electron gun 20 p3533 A66-38005
- Electron number densities measured behind shock wave in pressure driven shock tube by microwave resonant cavity technique and by electrostatic quasi-langmuir probe 24 p4191 A66-42197
- ELECTROSTATIC PLASMA**
- Ion escape from magnetic mirror trap due to nonlinear stage of plasma instability related to loss cone 01 p0109 A66-10261
- Ionic waves amplified by collective behavior in alkali plasma obtained by contact ionization of cesium or potassium vapors on surface of two coaxial tantalum cylinders 01 p0110 A66-10331
- Electrostatic ionic instability of cesium Q type machines for hot plasma-beam interactions in VLF range in sheath and plasma 03 p0404 A66-12984
- Thin electrostatic sheath near body immersed in weakly ionized flowing gas in mean free path regime for relatively small Debye length 06 p0921 A66-17102
- [AIAA PAPER 66-6] Quasi-linear theory of weakly turbulent plasma taking into account correlation of electric and magnetic microfields 09 p1407 A66-19966
- Electrostatic stability of cylindrical plasma beams composed of high velocity electrons rotating along magnetic lines of force in perpendicular direction and ions displaced along length of magnetic field 13 p2141 A66-25446
- Ion escape from magnetic mirror trap due to nonlinear stage of plasma instability related to loss cone 13 p2148 A66-25979
- Electrostatic instabilities in finite mirror-confined plasmas with loss-cone particle distributions, noting convective and nonconvective types 15 p2554 A66-29747
- Bounds on density fluctuations and electrostatic oscillation spectrum for homogeneous collisionless plasma according to Maxwell-Vlasov equation 15 p2554 A66-29749
- Magnetospheric suprathermal-electron scattering in oscillating electrostatic plasma and diffusion of subthermal electrons across magnetosphere, using ion-wave propagation theory for electroconductive plasmas 17 p2993 A66-32521
- Electrostatic stability of fully ionized non-Maxwellian electron-ion plasma 18 p3142 A66-33953
- Structure of hydromagnetic shockfront wherein electrostatic turbulence continuously develops, analyzed to aim at orders of magnitude for front width, electron and ion heating and magnitude of fluctuation excitation 19 p3408 A66-36278
- Plasma blob capture when injected perpendicular to magnetic force lines attributed to electrostatic repulsion of polarization space charge formed by interaction 20 p3610 A66-38057
- Explorer XX topside sounder observations of ionospheric irregularities in electron density and plasma wave electrostatic resonances 22 p3909 A66-39972
- Electrostatic oscillations in dielectric, semiconductor and plasma in presence and absence of external magnetic field 22 p3968 A66-40947
- Interaction models, negative energy waves and electrostatic instabilities 23 p4103 A66-41489
- Electrostatic probe in collisionless plasma wherein sheath joins region of ambipolar diffusion 23 p4104 A66-41494
- ELECTROSTATIC PRECIPITATOR**
- Gas adsorption on molecular sieves, discussing separation caused by electrostatic forces and electric fields 06 p0819 A66-18730
- ELECTROSTATIC WAVE**
- Electrostatic waves in uniform plasma without collisions in linear approximation, presenting normal oscillation mode as model for damped and unstable waves 11 p1744 A66-22447
- Cut-off wavelength of transverse electrostatic wave mode in ridged rectangular waveguide of arbitrary aspect ratio 14 p2257 A66-27951
- Unstable transverse potential oscillations in plasma with beam anisotropy and initial density modulation and analogy with known electrostatic oscillations 16 p2764 A66-31365
- Growth and propagation of electrostatic waves in medium with arbitrary mobility law, solving motion equations, emphasizing case pertinent to Gunn effect 19 p3447 A66-36399
- Electrostatic-wave propagation in collisionless plasma, noting Landau damping 19 p3432 A66-36760
- Electrostatic wave dispersion characteristics in one-dimensional plasma exhibiting Landau damping 19 p3432 A66-36761
- ELECTROSTATICS**
- SA STATIC ELECTRICITY**
- Electric resistivity of carbon resistor material determined as temperature function, calculating static response characteristics of carbon bolometer 02 p0228 A66-11445
- Electrohydrostatic boundary equations solving two-and three-dimensional axisymmetric situation and sessile drop problem 04 p0545 A66-13808
- Static characteristics of field triode with gate separated from semiconductor by thin dielectric layer, considering regimes of concentration, depletion, etc 04 p0499 A66-14054
- Static characteristics of gas laser internal modulation circuit, using electro-optical crystal inserted into gas laser resonator 04 p0531 A66-14059
- Complete resolution of concentrated load of limiting contour, determining spectrum of functional linear operator attached to interior region 06 p0967 A66-17061
- Text on electromagnetic force principles including Maxwell equations, electrostatics, electromagnetic waves, electron theory, relativity, etc 08 p1256 A66-19465
- Spherical electrostatic analyzers on Cosmos XII, Cosmos XV and Elektron II satellites 09 p1445 A66-21029
- Model technique calculation of electrostatic domains in two-valley /GaAs/ semiconductors 10 p1586 A66-22092
- Lightning and static electricity discharges effects on helicopter design and performance, noting blade and rotor hub protection, fuel ignition, etc 11 p1638 A66-23259
- Extended Dirichlet problem for cross section of cylindrical shell, showing asymptotic solution is valid, approximation to Dirichlet integral applied to electrostatic problem of condenser and closed tubes torsion 12 p1968 A66-24196
- Conformal transformation to determine electrical field of symmetrical air-filled strip line under static conditions 14 p2264 A66-27242
- Electrostatic theory of physical adsorption applied to gas-solid chromatography, discussing chromatographic inseparability of argon and oxygen at room temperature, prediction of elution order of many gases, etc 16 p2646 A66-30646
- Static characteristics of field triode with gate separated from semiconductor by thin dielectric layer, considering regimes of concentration, depletion, etc 17 p2884 A66-32220
- Static characteristics of gas laser internal modulation circuit, using electro-optical crystal inserted into gas laser resonator 17 p2933 A66-32225
- Electric field distribution in gas discharge counters at moment radiation recorded, allowing for space charge effect 17 p2928 A66-33490
- ELECTROSTRICTION**
- SA MAGNETOSTRICTION**
- Two-dimensional electrostriction to examine principal stress singularities in angular corners of plates 01 p0153 A66-10432
- Longitudinal acoustic wave generation by electrostrictive mixing of two light beams in single crystals of strontium titanate, rutile and z-cut quartz 19 p3400 A66-36073
- ELECTROTHERMAL ENGINE**
- Electrothermal propulsion system using heated gaseous nitrogen to provide Vela satellite with orbital velocity correction capability and weight savings [AIAA PAPER 66-213] 11 p1759 A66-22217
- ELEKTRON I SATELLITE**
- Difference in Doppler shifts of radio waves emitted at various frequencies by satellite Elektron I radio station, plotting electron concentration dependence on altitude 04 p0515 A66-13837
- Radiophysical investigations of outer ionosphere with aid of Cosmos II and Elektron I satellites and certain geophysical rockets 09 p1377 A66-21002
- Ionospheric parameter measurements based on ground reception of radio signals broadcast from Elektron I satellite 09 p1377 A66-21003
- Distribution and composition of particles in Earth radiation belts from data obtained by Elektron I and Elektron II satellites 09 p1445 A66-21030
- Distribution of trapped particles along orbit of Elektron I satellite 09 p1445 A66-21031
- Electron flux at upper boundary of outer radiation belt measured by Elektron I and II satellites 09 p1445 A66-21034
- Curves of difference in Doppler shift in observations of transmitter of Elektron I satellite, noting fluctuations in electron concentration 11 p1762 A66-22409
- ELEKTRON II SATELLITE**
- Neutron-group fluxes and variations with solar activity during IQYS observed by Elektron II 05 p0752 A66-15385
- Simultaneous measurements of magnetic field and positive ion fluxes in Earth magnetosphere from Elektron II satellite 09 p1444 A66-21025
- Earth magnetosphere measurements in radiation belt region from Elektron II satellite 09 p1444 A66-21026
- Distribution and composition of particles in Earth radiation belts from data obtained by Elektron I and Elektron II satellites 09 p1445 A66-21030
- Electron flux at upper boundary of outer radiation belt measured by Elektron I and II satellites 09 p1445 A66-21034
- Cerenkov counter measurement of nuclear component of cosmic rays onboard Elektron II satellite as function of solar activity during IQSY 10 p1595 A66-21043
- Solar X-radiation intensity measurement by Geiger end-window photon counters onboard Elektron II satellite 10 p1595 A66-21044
- Vertical electron density profiles determined at 725 and 1525 kc, using Elektron II satellite /1964 6B/ 10 p1600 A66-21050
- Matrix techniques for finding geomagnetic field strength in solar ecliptic coordinate system 11 p1699 A66-23052
- Metrological characteristics of three-component magnetometers with ferromagnetic probes installed in Elektron II space station 15 p2497 A66-28501
- Cerenkov counter measurements of primary cosmic ray heavy nuclei made by Elektron II satellite 18 p3199 A66-34886
- ELEKTRON IV SATELLITE**
- Primary cosmic radiation investigated by Elektron II and IV satellites 10 p1595 A66-21041
- ELEKTRON SATELLITE**
- Space studies of Cosmos and Elektron satellites including space radiation hazards, particle observation, ionosphere chemical composition, onboard equipment, etc 01 p0136 A66-10415
- RF mass spectrometer measuring ionic and neutral particle composition of outer ionosphere, mounted on Elektron satellites 02 p0229 A66-11662
- Primary cosmic radiation investigated by Elektron II and IV satellites 10 p1595 A66-21041
- Low energy particle flux measuring circuits of spherical electrostatic analyzers aboard Elektron II and IV 11 p1704 A66-22431
- Terrestrial radiation belt during solar minimum, noting results from measurement

with Elektron satellite series 18 p3175 A66-34745

**ELEMENT ABUNDANCE**

Elemental abundances in solar atmosphere determined from intensity of absorption lines in solar spectrum 02 p0285 A66-11297

Astrophysical observation and experimental results of organic synthesis bearing on abiogenic formation of biochemical compounds formed from simple precursor in aqueous or aqueous ammonia system 02 p0181 A66-11603

Redetermination of isotopic composition of atmospheric neon resulting from measurements of neon in meteorites 04 p0517 A66-14323

Abundance of molecules, ions and atoms in late-type dwarf, giant and supergiant atmospheres 08 p1288 A66-18781

Copper and zinc abundances in carbonaceous, enstatite and ordinary chondrite determined by neutron activation techniques 08 p1291 A66-19093

Abundance and stability of major sulfur compounds in lower atmosphere of Venus calculated, assuming equilibrium between atmospheric gases and mineral phases 08 p1293 A66-19262

Abundance distribution of nuclear species in universe, examining nuclear reactions in stellar interiors as possible source 09 p1447 A66-20091

Solar wind enhancement of heavy element content in composition of solar corona relative to value for photosphere 09 p1456 A66-20415

Solar abundance of rare earths analyzed, using spectroscopy of ionized lines 10 p1605 A66-21208

Relative isotopic abundance of potassium 40 in terrestrial and meteoritic samples 11 p1770 A66-22572

High precision photoelectric scan at 8667-8668 angstrom wavelengths in solar spectrum for identification and abundance of boron 11 p1771 A66-22773

Nickel abundance in solar spectrum determined, based on atmospheric model 11 p1772 A66-22774

Interstellar molecular hydrogen abundance and possible source from giant stars 13 p2182 A66-25579

Lithium/calcium ratio of five F giant and six G giant stars 13 p2183 A66-25611

Stark broadening effect on solar atmospheric abundance determinations, with results for sodium abundance 14 p2383 A66-27709

Aerobee-borne magnetic mass spectrometric measurements of neutral composition of lower thermosphere 15 p2490 A66-29946

Telescopic measurements of primary energy spectra and abundances of He 3 and He 4 in galactic cosmic radiation 16 p2793 A66-30198

Element creating processes in interior of stars discussing combustion of carbon hydrogen, neon, neutron absorption, etc 16 p2796 A66-30271

Atmospheric decay of rocket-released Li due to diffusion, wind and chemical reaction 16 p2697 A66-31008

Mass spectrum and abundances of trapped and spallation fission xenon in Pasamonte meteorite 18 p3225 A66-33624

Silicon, iron and nickel in solar corona determined by method of Pottasch 18 p3233 A66-34575

Spectral analysis methods used to calculate iron abundance in solar corona 18 p3233 A66-34577

Composition of cosmic rays of supernova origin, noting limited mixing and enrichment of elements of outer layer with thermonuclearly synthesized core substances due to shock acceleration 18 p3177 A66-34755

Chemical abundances and energy spectra of nuclei in galactic radiation measured in interplanetary space by OGO-I satellite 18 p3190 A66-34833

Activated emulsion camera detection of low energy very-heavy multiply-charged scarce cosmic ray nuclei 18 p3190 A66-34835

Balloon-borne nuclear emulsion detection of solar cosmic ray heavy nuclei during solar burst 18 p3190 A66-34836

Balloon-borne nuclear emulsion detection of finite fluxes of low energy cosmic ray heavy nuclei and interstellar cosmic radiation propagation 18 p3191 A66-34838

Relative abundance of carbon isotopes in primary cosmic radiation estimated by separation of isotopes method in nuclear emulsion 18 p3192 A66-34843

Principle source of radiative energy loss in intergalactic medium in spectral region from 2 to 18 angstroms is line emission from ions of elements oxygen, carbon, neon, magnesium and silicon 18 p3237 A66-35046

Iron and nickel lines in solar UV spectrum, abundance of various metallic elements in solar atmosphere, electron collision cross sections and oscillator f-values of electron transitions 18 p3237 A66-35050

Boron abundance in Sun from B I lines and solar spectra 19 p3458 A66-35490

Quantitative measurement of free metallic atoms abundance and height distribution from twilight, dayglow and aurora fluorescence 19 p3349 A66-36350

Equivalent widths of spectral lines in solar spectrum used to determine strontium abundance 19 p3465 A66-36612

Total intensities of continuum and of red, green and yellow coronal lines emitted by sporadic coronal condensation shown to yield lower limits to Fe and Ca abundances 20 p3649 A66-37332

Interstellar X-ray absorption edges due to K-shell photoionization of oxygen and neon, using element abundances and atomic photoelectric cross section data 21 p3809 A66-38658

Cl, Br and I contents in carbonaceous chondrites measured by activation analysis 21 p3814 A66-39260

Rare-earth element abundance patterns in Hawaiian basalts determined by neutron activation analysis 21 p3735 A66-39492

Spectroscopic evidence on helium abundance of stars in galactic halo 21 p3817 A66-39565

Chainpur and similar, apparently primitive, chondritic meteorites may be precursors of ordinary chondrites 22 p3981 A66-40485

Solar cosmic ray multiply charged nuclei and July 18, 1961 solar event, discussing relative abundances and heavy nuclei detection 22 p3973 A66-40548

Polar coronal temperature inferred from density gradients and based on solar wind and latitude dependence of coronal composition 22 p3983 A66-40698

Isotopic composition of Xe indicates that two Ca-rich achondrites comprise group of diopside-olivine achondritic meteorites containing fission-produced Xe 24 p4264 A66-42606

Solar abundances of seven rare earths deduced for center of solar disk with weighting function method 24 p4279 A66-42711

Elemental abundances of low energy cosmic rays in July 1964 observed by sounding rocket, noting components 24 p4264 A66-42715

Hydrogen abundance in universe using gravitational effect on physical constants 24 p4279 A66-43019

- Finite difference method solving Dirichlet problem for quasi-linear elliptic equation, with results applied to calculation of magnetic field in nonlinear media 01 p0091 A66-10165
- Straight lines method applied to Dirichlet and Neumann boundary value problem for certain nonself-adjoint two-dimensional second order elliptic equations 01 p0095 A66-11014
- Stability of net method for elliptical problems investigated, using low variability of network operator 01 p0096 A66-11184
- Theory of weight classes for differentiable functions of many variables, with application to boundary value problems for elliptic equations 02 p0250 A66-12099
- Fragmen-Lindelof type theorems for second-order linear elliptic equation, examining Dirichlet problem solution in infinite region 02 p0250 A66-12100
- Proof of boundary regularity connected with inhomogeneous systems of partial differential equations leading to elliptic boundary value problems 02 p0251 A66-12231
- Elliptic eigenvalue for reentrant region to determine vibration modes of membrane 03 p0387 A66-12620
- Asymptotic solution of Dirichlet problem for diffusion processes and small parameter in elliptic equations with discontinuous coefficients 03 p0388 A66-12925
- Existence and uniqueness of weak solution to Dirichlet problem for elliptic differential equations in Sobolev spaces with special occupancy function 05 p0708 A66-15154
- Asymptotic error estimates in solving elliptic equations of fourth order by method of finite differences 05 p0710 A66-15477
- Index problem for systems of singular integral equations 03 p0904 A66-17044
- A priori estimates for solutions to second order differential equation of elliptical type 06 p0904 A66-17045
- Property of solution of second-order elliptic equations 07 p1056 A66-17600
- Asymptotic behavior of solutions of boundary value problem for second-order elliptic equations 07 p1056 A66-17602
- Second order degenerate elliptic and parabolic equations, giving smoothness theorems of solutions 07 p1056 A66-17604
- Traces on coordinated hyperplanes of elements of functional space 07 p1057 A66-17844
- Indirect method of estimating Green kernels, eigenvalues and eigenfunctions of operators related to elliptic problems 07 p1059 A66-18031
- Certain inequalities for solutions of elliptic equations and derivatives near metric region 07 p1060 A66-18466
- Cauchy problem for elliptic system 09 p1396 A66-20632
- Tensor product analysis of alternating direction implicit iteration techniques for approximate solution of elliptic partial differential equations 09 p1396 A66-20637
- Series expansion solutions of Dirichlet and Poincare problems for systems of elliptical PDEs 09 p1397 A66-20934
- Nonlinear boundary value problem for elliptic PDE continuous over composite region 11 p1723 A66-23030
- Equilibrium equations of shallow cylindrical shell of arbitrary cross section subject to arbitrary loading 11 p1783 A66-23033
- Uniqueness theorems for second-order linear elliptic and parabolic equations with discontinuous boundary values 11 p1724 A66-23362
- Stability of net method for elliptical problems investigated, using low variability of network operator 12 p1903 A66-24017
- Majorants of solutions of first boundary problem for second order linear elliptic equations 12 p1904 A66-24238
- Maximized elliptic equations, Dirichlet problem, distance function solution, maximum principle, removable singularity, etc 12 p1905 A66-24401
- Analytic hyperfunction solution of elliptic equation 13 p2117 A66-25473
- Equation for elliptical system in plane singly connected region, satisfying specified boundary condition 13 p2119 A66-25903
- Boundary value problem for quasi-linear elliptic equations degenerating parabolically on boundary of region D lying in upper half-plane 13 p2119 A66-25904
- Dirichlet problem for degenerating elliptical equations with nonlinear lowest terms 13 p2120 A66-26007
- Dirichlet problem for elliptical system, showing solvability of inhomogeneous system with uniform boundary values for half-plane and circle cases 13 p2120 A66-26008
- Dirichlet problem deviation from Bitsadze system with Noetherian properties, giving Hausdorff normal solvability conditions for inhomogeneous problem 13 p2120 A66-26009
- General form of Rado-Cartan theorem for solution of second-order linear elliptic equations, using maximum principle 13 p2121 A66-26247
- Qualitative solution of even-order higher-order elliptic partial differential equations 15 p2528 A66-29335
- Finite difference method for elliptic systems of partial differential equations subjected to natural boundary conditions /generalized Neumann problems/ 16 p2731 A66-30234
- Riemann-Hilbert boundary value problem for elliptic systems of linear partial differential equations of first order 16 p2733 A66-30651
- Estimation of maximum rate of decrease in solutions to elliptic equation or system in cylinder 16 p2733 A66-30743
- Certain incorrect Dirichlet and Cauchy problems of potential theory for elliptic and parabolic equations 16 p2733 A66-30744
- Analytic construction of skew derivative Green matrix for system of second order elliptic PDEs in many variables 16 p2734 A66-30749
- Uniqueness of solution to second and third boundary value problems for second-order elliptic equation in presence of boundary singular points 16 p2734 A66-30783
- Normal solvability of Dirichlet problem for Bitsadze elliptic system, noting conditions under which homogeneous problem has nonzero regular solutions 16 p2734 A66-30784
- General boundary value problems for general elliptic systems with discontinuous coefficients 16 p2735 A66-30965
- Fractional powers of linear operators role in linear and nonlinear elliptic and parabolic equations, Fourier series in eigenfunctions of elliptic operators, etc 16 p2736 A66-30978
- First-order linear elliptic system with areolar derivatives involving n unknown complex functions 16 p2738 A66-31706
- Exactness of majorants of Dirichlet problem solution and uniqueness conditions for linear elliptic equations 17 p2947 A66-32581
- Integral representation providing one-to-one correspondence between functions of n complex variables and complex-valued harmonic functions of n plus 1 real variables 18 p3126 A66-33837
- General maximum principle and removable singularities, discussing case of arbitrary linear set of positive linear measure for which principle does not hold 18 p3128 A66-34661
- Mixed initial boundary value problem for wave equation in three space dimensions, proving existence of generalized solution 18 p3128 A66-34662
- Pointwise bounds for solutions to Cauchy problem for elliptic systems of partial differential equations, using extension of Payne and Trytten results 19 p3388 A66-35487
- Displacement boundary value problem in classical linear elastostatics, deriving ellipticity condition for uniqueness theorem 19 p3474 A66-35852
- Third boundary problem solution for two-dimensional equation of thermal conductivity in arbitrary region by locally one-dimensional method 19 p3478 A66-35934
- Difference analog construction for second-order elliptic differential equation in case of rectangular network 19 p3389 A66-35935
- General form of Rado-Cartan theorem for solution of second-order linear elliptic equations, using maximum principle 19 p3390 A66-36197
- Estimation of Poisson kernels of elliptic operator with variable coefficients by using maximum principle and Fatou theorem 19 p3390 A66-36248
- Character of continuity of solutions to second-order linear elliptic equations with many independent variables 20 p3592 A66-38421
- Linear elliptic partial differential systems, eigenvalue and boundary value problems - Johns Hopkins University, Lectures, March-May 1965 21 p3754 A66-38457
- Local existence theorems for elliptic systems with linear matrix differential operator 21 p3754 A66-38460
- Semiweak solutions of elliptic BVP, particularly generalized Dirichlet problem 21 p3754 A66-38461
- Existence and uniqueness theorems for Dirichlet problem of second-order linear elliptic equation, Neumann BVP, mixed BVP and oblique derivative problem 21 p3754 A66-38462
- Linear elastostatic BVPs for inhomogeneous anisotropic elastic body including existence-uniqueness theorem, based on Korn inequality 21 p3755 A66-38463
- Elliptic BVP in equilibrium theory of thin plates employing iterated Laplace operator 21 p3822 A66-38464
- Garding inequality and Green transformation applied to elliptic operators in eigenvalue problems 21 p3755 A66-38465
- Elliptic singular integro-differential operators on smooth compact manifold without and with boundary 21 p3756 A66-38626
- Self-induction of ellipsoidal plasmoid, deriving relevant equations 21 p3787 A66-39051
- Necessary and sufficient conditions for

matrix satisfying discrete maximum principle and difference methods for numerically solving second-order elliptic boundary value problem 21 p3757 A66-39258

Maximum modulus theorem extended to highly elliptic systems 21 p3758 A66-39369

Uniqueness of solution to second and third boundary value problems for second-order elliptic equation in presence of boundary singular points 22 p3940 A66-40445

Normal solvability of Dirichlet problem for Bitsadze elliptic system, noting conditions under which homogeneous problem has nonzero regular solutions 22 p3940 A66-40446

Dirichlet problem for elliptic system of differential equation which does not satisfy Lopatinski condition where characteristic equation of system has simple roots 22 p3940 A66-40449

Second-order quasi-linear elliptic equation with coefficients increasing over periods of time more slowly than any positive power of time 22 p3941 A66-40799

Projection method for obtaining upper and lower bound estimates of solutions to elliptic equations 22 p3942 A66-40914

Hilbert parametrix method of solving linear BVPs for second-order elliptic PDEs, using Green functions 24 p4232 A66-42740

Single second-order oblique derivative problem with elliptic operator 24 p4232 A66-42830

Linear second-order partial differential equations of elliptic type analyzed, using maximum principle and barrier functions 24 p4233 A66-43065

**ELLIPTIC FUNCTION**

Multidimensional homogeneous difference schemata solving eigenvalue problem with elliptic operator, noting differential equation coefficients and eigenfunction error estimate 01 p0092 A66-10166

Jacobi elliptic functions for designing low-pass filters whose attenuation is represented by universal normalized curve 12 p1829 A66-23661

Unsteady plane motion of pointed airfoil pair, obtaining resultant force and moment of biplane 13 p2062 A66-25400

MHD wave propagation along uniform magnetic field in cold plasma solved in terms of Jacobean elliptic functions 14 p2340 A66-27134

Regularity properties of functions from domains of definition of minimum and maximum operators for general elliptic problem with inhomogeneous boundary conditions 14 p2321 A66-27162

Topological classification of higher dimensional systems of ordinary differential equations by Liapunov functions 18 p3127 A66-33976

Elliptic boundary problem with small parameter, constructing boundary layer function 21 p3755 A66-38541

**ELLIPTIC INTEGRAL**

Staudte-Hoffmeister integral for abundance of sporadic meteoric bodies 03 p0427 A66-12921

Bounds for Dirichlet energy integral in terms of arbitrary vector field 04 p0539 A66-13949

Existence in small of fundamental solution matrices of uniformly Petrovskii-elliptic systems with coefficients having continuity modulus satisfying Dini conditions 14 p2321 A66-27159

Staudte-Hoffmeister integral for abundance of sporadic meteoric bodies 14 p2380 A66-27270

Reduction of large number of elliptic integrals, using relatively short list of formulas 14 p2322 A66-27777

Surface characteristics of semiconductors with intrinsic conductivity, determining potential distribution electric field, carrier concentrations, etc 17 p2984 A66-33146

**ELLIPTICAL CYLINDER**

Flow of non-Newtonian liquids in cylindrical pipes containing cylindrical parallel cores moving longitudinally at constant speed 03 p0358 A66-13090

Empirical expression for maximum stress and method of design for elliptic shell vessel 08 p1313 A66-19548

Elliptic cavity design for solid state lasers, discussing multiple reflections, absorption coefficient, refraction losses, etc

etc 13 p2092 A66-25998

Successive approximation method for compressibility in subsonic flow around elliptical cylinder 16 p2627 A66-30209

Electromagnetic scattering by perfectly conducting elliptical cylinder in uniaxially anisotropic medium, transforming boundary value to Helmholtz equation 16 p2654 A66-31442

Bending of plane electromagnetic waves around elliptically ideally conducting cylinder of infinite length and around parallel circular dielectric cylinder, with solution as Mathieu-type series 19 p3303 A66-36064

Functional equation applied to wave scattering by infinite grating of elliptic cylinders 19 p3304 A66-36409

Conformal mapping technique applied to boundary value problem of plane wave diffraction by perfectly conducting elliptic cylinder, noting integral equation 22 p3866 A66-40185

**ELLIPTICAL ORBIT**

**SA EULER-LAMBERT EQUATION**

Motion stability of dynamically symmetrical satellite rotating about normal to plane of elliptical orbit 02 p0295 A66-11650

Attitude stability of spinning satellite in elliptical orbit using Floquet theory [ASME PAPER 65-APMW-27] 04 p0586 A66-14227

Numerical determination of optimum two-impulse orbital transfers between inclined elliptical orbits 05 p0769 A66-15793

Molniva type communication satellite, discussing optimum orbital requirements for maximum coverage, phasing, etc 06 p0952 A66-15907

Closed-form coordinate perturbations of elliptic orbits due to Earth oblateness, discussing four methods of deriving expressions 06 p0956 A66-16910

Two-body problem applied to elliptic orbit, comparing three-impulse with single-impulse plane change applied at node 08 p1289 A66-18837

Optimum impulsive transfer between elliptic and noncoplanar circular orbits, noting paths with up to three apsidal impulses 09 p1459 A66-20884

Optimal rendezvous maneuver calculated between propelled spacecraft and unpropelled target moving in elliptical orbit of arbitrary eccentricity 11 p1768 A66-22457

Plane optimum transfer of point of variable mass between two elliptical orbits in centrally directed Newtonian force field 11 p1774 A66-23036

Linear differential system for rendezvous with target in elliptical orbit 14 p2391 A66-27471

Optimal transfer trajectories among coplanar elliptical orbits, noting application of one, two or three finite impulses 14 p2382 A66-27562

Analytical solution to linearized problem of power-off terminal rendezvous when target satellite is moving in elliptical orbit of arbitrary eccentricity 16 p2805 A66-31486

Time-dependent coverage area design parameter for Comsat systems in elliptical orbits, assuming spherical Earth and Keplerian orbits 17 p3002 A66-32472

Second-order optimal elliptical orbital transfer trajectory between two coplanar circular orbits in Newtonian force field 17 p3003 A66-32586

Attitude stability of spinning satellite in elliptical orbit, using Floquet theory [ASME PAPER 65-APMW-27] 18 p3239 A66-33590

Rendezvous between spacecraft and target flying in elliptic orbit of arbitrary eccentricity solved, using new approach [AIAA PAPER 66-537] 18 p3227 A66-33666

Minimum impulse orbital transfer between coplanar elliptical orbits with aligned axes, noting advantage of three- and two-impulse transfers 18 p3227 A66-33760

Single-impulse transition in Newtonian central force field from hyperbolic to elliptical orbit in case of radial impulse 19 p3455 A66-35276

Selection of elliptic orbit for solar probe craft without undue perihelion growth [AIAA PAPER 64-646] 19 p3459 A66-35601

Error equations of inertial navigation with special application to elliptical orbital determination and guidance [AIAA PAPER 65-691] 19 p3397 A66-35898

Simple approximations to elliptical orbits compared to predict location of planet or satellite, including linear perturbations in rectangular and curvilinear coordinates 19 p3463 A66-36246

Time of rendezvous of two satellites, one on circular and one on elliptical orbit 19 p3470 A66-36247

Minimum fuel transfer between neighboring elliptic orbits for low-thrust power-limited propulsion system, using Pontryagin maximum principle, vehicle motion and fuel consumption 20 p3645 A66-36875

Rendezvous-maneuver of thrusted space vehicle with unthrusted target flying in elliptical orbit, examining computation of rendezvous acceleration for orbital transfer 20 p3662 A66-37390

Equations describing motion of satellite in Paetzold-Zschoerner model of Earth atmosphere 20 p3654 A66-37848

Computation of impulsive and short-term perturbing forces effect on body in elliptical orbit, using Tschauner-Hempel equations 22 p3979 A66-40327

Optimum impulsive transfers between noncoplanar elliptic orbits having collinear major axes and common center of attraction, noting overlap configuration of initial and final elliptic orbits 23 p4129 A66-41686

Periodic oscillations of satellite in plane of elliptic orbit investigated to provide passive orbital stabilization of satellite 23 p4134 A66-41980

Dumbbell librations of satellites in elliptic orbits of small eccentricity determined via WKB approximation 24 p4272 A66-42158

**ELLIPTICITY**

Anisotropic transverse magnetoplasma effects in cubic semiconductors, examining reflectance and elliptic polarization 07 p1102 A66-18204

Solar eclipse coronal isotopes, noting spectrum in region of maximum visual sensitivity, ellipticity figures, Ludendorff coefficient, luminosity gradients, etc 15 p2593 A66-28867

Minimum drag bodies with elliptical cross section, using Newtonian flow theory and calculus of variations 17 p2838 A66-32346

**EMBRITTEMENT**

**SA BRITTLENESS**

Silicon and iron effects on embrittlement of cobalt-base alloy /L-605/ 01 p0085 A66-10357

Liquid metal embrittlement noting stress and intergranular corrosion, hydrogen embrittlement and behavior of silver chloride crystal 02 p0243 A66-11698

Constant load rupture test of susceptibility of Ni-Co-Mo maraging steel to delayed hydrogen cracking 03 p0381 A66-12541

Effects of nitrogen and carbon on low temperature embrittlement of vanadium, noting transition temperature increases 05 p0702 A66-15468

Hydrogen embrittlement or fatigue strength loss avoidance in overhauling and repairing of high strength aircraft steel component 13 p2087 A66-26284

Embrittlement of tantalum by room temperature deformation in presence of hydrogen 17 p2941 A66-33441

Hydrogen embrittlement reduction in springs by careful processing 19 p3362 A66-35326

Sea-water embrittlement of titanium alloy cantilever beam specimens as affected by aluminum content, aging, beta stabilizers and cooling 19 p3379 A66-35660

High temperature embrittlement of stainless steel irradiated in fast fluxes of Dounreay fast reactor at coolant temperatures of 250-350 degrees C 22 p3934 A66-40006

Laser oscillation in calcium tungstate crystals activated with trivalent praseodymium 05 p0694 A66-14898  
Photoelectric measurements of C sub 2, C sub 3, CH and CN band strengths in near nuclear region of Comet Ikeya 1964f 05 p0762 A66-15282  
Absorption and emission spectra pertaining to electronic transitions of short-lived molecules C sub 2 and CH present in reaction zone of low-pressure oxyacetylene flames 06 p0969 A66-16126  
Emission spectrum of ruby maser calculated, using dynamics of two-level systems 06 p0891 A66-16541  
Radiative recombination emission and photoconduction in lead sulphide, emphasizing chemical deposition or vacuum evaporated layers 07 p1094 A66-17311  
Injection luminescence in InAs diodes 07 p1094 A66-17315  
Temperature dependence of emission spectrum and threshold current in GaAs lasers 07 p1042 A66-17333  
Comparison of properties of mode and nonmode GaAs diodes, discussing emission spectra oscillations and absorption constant 07 p1042 A66-17334  
Emission and absorption lines with anomalous intensity distributions indicate hydroxyl molecule concentrations in Sagittarius A 07 p1133 A66-17462  
5-cm radio emission from excited hydrogen in Omega nebula studied with quantum parametric amplifier 07 p1134 A66-17624  
Isotope shift, linewidth and precise wavelength of laser emission in ionized Hg 07 p1044 A66-18035  
Manganese X-ray emission lines in compound-oxide 07 p1105 A66-18369  
semiconductor 07 p1105 A66-18369  
Premixed flames of trimethylaluminum vapors and oxygen stabilized at reduced pressure, analyzing stability region, burning velocity and emission spectrum 08 p1318 A66-19199  
Fluorescent K-absorption and emission spectra of phosphorus in III-V semiconductor compounds 09 p1426 A66-20192  
Solar corona emission line polarization resulting from anisotropic effect of photospheric radiation 09 p1442 A66-20463  
field 09 p1442 A66-20463  
Optical spectroscopic temperature measurements in shock tubes from relative emission intensities in two wavelength regions of molecular band 09 p1382 A66-20507  
system 09 p1382 A66-20507  
Photometric monitorings of 5577 and 6300 angstrom lines during undisturbed geophysical conditions in South Atlantic 10 p1530 A66-21164  
Short wavelength wing of pure rotation emission spectrum of water vapor measured at various temperatures and nearly constant optical depth, calculating mean spectral absorption coefficient 11 p1739 A66-22952  
Emission spectra of nitrogen excited by electron beam of 0.1 to 20 kev and oxygen and air bombarded by 13-kev electrons 11 p1740 A66-23040  
X-ray produced auroral light emission in air and excitation of second positive and first negative bands in nitrogen 11 p1765 A66-23152  
Metallic UV emitter producing continuous spectrum in 2000 to 500 angstrom band 11 p1709 A66-23297  
Classification of iron VIII to XII and XIV lines in solar extreme UV spectrum and isoelectronic sequences from Ar to Ni 12 p1947 A66-23730  
Continuous emission and absorption of plasmas by calculating radiation of hydrogen plasma, deriving temperature and pressure conditions under which plasma radiates as black body 12 p1919 A66-23750  
Meteors and meteorites, discussing swarms, velocities and spectra 12 p1948 A66-23909  
Statistical study of frequency spectrum of slowly varying component of solar radio emission related to sunspots and flocculi 12 p1950 A66-24248  
Electrical discharge theory of cosmic atmospheric phenomena, relating lightning, novae and quasars 12 p1950 A66-24394  
Radiative recombination in gallium arsenide p-n junctions for weak currents, obtaining relation between emission spectra and current-voltage characteristics of diodes 12 p1929 A66-24456  
Atomic oxygen night sky emission observations with pressure scanning Fabry-Perot interferometer 12 p1873 A66-24837  
K beta 5 emission band and fundamental K-edge absorption of vanadium analyzed and results compared with vanadium spectra from other series 12 p1898 A66-25024  
Width of spontaneous emission region in degenerate gallium arsenide p-n junction, noting spectral shifts, emission, interference, etc 13 p2159 A66-25064  
Electroluminescence and emission spectra of indium-alloyed diodes made from phosphorus doped p-type ZnTe biased in either forward or reverse direction at liquid nitrogen temperatures 13 p2029 A66-25184  
Gallium arsenide p-n junction laser diode, injection current distribution, density and emission spectra variation 13 p2092 A66-25934  
Optical emission from ruby induced by short pulses of relativistic electrons in which electron-hole recombination produces excitation of emission 13 p2098 A66-26173  
High resolution piezoelectrically scanned Fabry-Perot interferometer used to study gain profiles, mode structures and emission line widths of CW Ar, Kr and Xe ion lasers and Hg-He pulsed laser 13 p2102 A66-26208  
Optical transition of manganese fluoride as function of temperature and magnetic field in both emission and absorption 14 p2351 A66-26886  
Magnetic effect on emission spectrum of negative glow plasma in hollow-cathode discharge, noting pressure effect 14 p2340 A66-27024  
LF fluctuations in emission of He-Ne gas laser measured, using Fabry-Perot resonator and ring-type resonator 14 p2307 A66-27186  
Green emission lines from solution-grown p-n junctions in GaP diodes doped with shallow donors and acceptors 14 p2251 A66-27231  
Helium-neon laser afterglow and metastable helium atoms under long pulse excitation 14 p2307 A66-27335  
Emission and absorption bands in K spectral region of titanium, using single setup 14 p2314 A66-27371  
Contribution of nonlinear interaction of surface oscillations in plasma to emission of electromagnetic radiation from plasma 14 p2343 A66-27580  
Axial and transverse mode selection, emission spectrum and transient emission behavior of confocal ruby laser operated in ellipsoidal pumping system 14 p2308 A66-27606  
Emission from hot low-density plasma due to bremsstrahlung, radiative recombination and electron collision-induced line emission 14 p2345 A66-28120  
Emission bands in electroluminescence from gallium arsenide diodes, noting intensity at high and low voltages and radiation and doping effect 15 p2562 A66-28714  
Polarization and damping rate of emission lines of ruby single crystal in strong excitation 15 p2515 A66-29207  
Absorption, excitation, and emission spectra of Ti-activated NaI single crystals at liquid helium temperatures 15 p2566 A66-29347  
Ionized electron centers in irradiated lithium fluoride crystals investigated by observing emission and absorption spectra 15 p2568 A66-29641  
Spectral variation in light polarization of Martian atmosphere for all observable phase angles 15 p2599 A66-29643  
Emission spectrum of ruby maser calculated, using dynamics of two-level systems 15 p2519 A66-29988  
Space correlation of main emission lines for night sky emission spectra and altitude distribution of sodium luminescence 15 p2495 A66-30060  
Velocity distribution function of helium atom measured, using Doppler profile of helium line 16 p2701 A66-30377  
F-layer nightglow 6300 angstrom emission intensity and electron density data, noting variations in emissions 16 p2694 A66-30708  
Emission spectroscopy of halides of carbon, silicon and boron in plasma reactor 16 p2763 A66-31190  
Reproduction of experimental and calculation of theoretical H-beta emission profile of solar flare, considering macroscopic motions inside flare 16 p2795 A66-31391  
Emission spectrum of copper atom used to measure temperature and concentration of charged particles in DC-arc plasma burning under water 16 p2766 A66-31600  
Optical pumping mechanism for anomalous excitation of OH microwave emissions from H II regions 16 p2807 A66-31756  
Solar corona emission spectrum and narrow passband photography of solar disk, noting measurement of intensity variation and absorption coefficient 17 p2999 A66-32133  
Effect of anomalous dispersion on stimulated emission spectrum of doped cadmium fluoride crystals 17 p2977 A66-32317  
Electron scattering interpretation of ionization, emission and absorption line spectra of quasi-stellar object 17 p3004 A66-32928  
Polarization and damping rate of emission lines of ruby single crystal in strong excitation 17 p2936 A66-33056  
Collisions in inner region of cometary head, structure of emission bands and formation of free radicals 17 p3010 A66-33376  
Coherent and spontaneous emission from lead-tin telluride alloys upon excitation by GaAs diode laser, noting band structure of alloy system 18 p3119 A66-34159  
Principle source of radiative energy loss in intergalactic medium in spectral region from 2 to 18 angstroms is line emission from ions of elements oxygen, carbon, neon, magnesium and silicon 18 p3237 A66-35046  
Orientation effect in GaAs injection lasers, noting emission characteristics and structural spectra 19 p3373 A66-35404  
Suggested origin of low energy tails in radiative recombination spectra due to degenerate conduction band 19 p3437 A66-35475  
Continuous emission spectrum of

detonation wave in nitromethane between 3800 and 8000 angstroms 19 p3477 A66-35747

Gallium arsenide lasers operating at room temperature investigated, based on diffusion p-n junctions, discussing emission spectrum 19 p3375 A66-36070

Pulsed laser action in visible spectrum of singly ionized Ge, Sn, Pb, In, Cd and Zn, listing temperature and pressure ranges 19 p3444 A66-36076

Quantitative measurement of free metallic atoms abundance and height distribution from twilight, dayglow and aurora fluorescence 19 p3349 A66-36330

Aerobee rocket measurement of nitric oxide in upper atmosphere, noting fluorescence in airglow layer, emission rate factors and NO densities 19 p3349 A66-36351

Absorption, excitation, and emission spectra of Ti-activated NaI single crystals at liquid helium temperatures 20 p3615 A66-37352

Radiative recombination in gallium arsenide p-n junctions for weak currents, obtaining relation between emission spectra and current-voltage characteristics of diodes 20 p3619 A66-37688

Doppler effect on emission spectrum and energy of moving oscillator and intensity of surface wave excited by it 20 p3519 A66-37995

Stimulated emission spectrum in axial-mode model of plane resonator in stationary generation regime 20 p3580 A66-38127

Scintillation counter and proportional counter spectral measurements of solar flare X-ray emissions and analogies to hot plasma 20 p3633 A66-38191

Intensity measurements on molecular oxygen Herzberg I system emitting in afterglow of microwave discharge, noting dependence of transition moment on internuclear distance 20 p3555 A66-38208

Cryogenic optically excited recombination emission in single crystal InSb semiconductor and transitions involving phonon creation, acceptor impurities and band-to-band emissions 21 p3800 A66-38996

Spectroscopic and microwave analysis plasma emission spectrum, density, electron concentration and layer velocity in electrodeless induction discharge 21 p3790 A66-39069

Emission spectrum of plasma consisting of colliding blobs, noting photographic and photoelectric recording and ion temperature measurement 21 p3790 A66-39070

Emission and absorption capacity of /zero-zero/ band of CN violet system at high temperatures, determining parameters of oscillator system power 21 p3775 A66-39079

Emission spectra of ionized air and H in electromagnetic shock tube, giving frame scans of spectra 21 p3726 A66-39081

Diameters and positions of three sources of 18-cm OH emission determined, using 90-ft steerable paraboloids 21 p3814 A66-39269

Stokes parameters measurement as function of frequency for anomalous polarized OH emission originating near thermal radio source W3 22 p3978 A66-40015

IR absorption coefficients of water vapor as function of temperature obtained from absorption and emission spectra 22 p3950 A66-40114

Room temperature performance of GaAs laser diodes, using SCRs to achieve high pulse repetition rate 22 p3932 A66-40175

Coherent radiation generation in electron-hole indium antimonide plasma, discussing emission spectrum 22 p3965 A66-40319

Upper and lower limits to expected alpha and beta hydrogen and helium line emissions due to protons and alpha particles penetrating auroral atmosphere 22 p3913 A66-40554

Emission rim formation at filaments caused by chromospheric excitation by radiation reflected from filament 23 p4126 A66-41077

Frequency tuning of coherent emission over vibronic continuum of phonon-terminated optical masers by thermal tuning and wavelength-selective feedback 23 p4077 A66-41369

Altitude profiles for dayglow emissions excited by molecular ion dissociative recombination, solar radiation fluorescence, oxygen photodissociation, electron collisions

and chemical reactions 23 p4064 A66-41680

Radiative lifetime and emission intensity measurements, determining oscillator strength and electron transition moment of first positive band system of nitrogen 23 p4033 A66-42082

Time resolved emission measurements for Cr-Ar mixtures in three spectral regions and ionization occurrence in excited state inelastic collisions 23 p4033 A66-42083

Luminescence spectra of meteorites of different classes using proton excitation, giving estimates of radiation conversion efficiency 24 p4273 A66-42363

Microwave emission from stationary plasma column measured taking into account spatial distribution of plasma density, using spectrometer 24 p4242 A66-42398

LF fluctuations in emission of He-Ne gas laser measured, using Fabry-Perot resonator and ring-type resonator 24 p4226 A66-43084

**EMITTER**

Metallic UV emitter producing continuous spectrum in 2000 to 500 angstrom band 01 p0071 A66-11049

Design and fabrication methods of semiconductor optoelectronic devices, noting junction emitter outputs into visible spectrum 04 p0494 A66-13764

Heat pipe performance, emphasizing heat carrying and waste heat dissipation functions, construction and materials testing 05 p0616 A66-15543

Output characteristics of thermionic converter and improvement of performance by using emitter surfaces with particular crystallographic orientation 05 p0617 A66-15553

Performance of thermionic converters using clad and unclad UC-ZrC emitters operated at high temperatures, noting cesium pressure effect 05 p0619 A66-15566

Emitter materials for nuclear thermionic converters, discussing /UZr/C, fuel life and performance parameters, material compatibility, etc 05 p0713 A66-15584

Emitter of thermionic converter with cesium plasma heated by solar energy, determining electric power values 05 p0623 A66-15595

Input impedance of spherical emitter in infinite homogeneous isotropic conducting medium 11 p1656 A66-23031

Metallic UV emitter producing continuous spectrum in 2000 to 500 angstrom band 11 p1709 A66-23297

Extension of nonlinear distortion in common-emitter circuit to common-base circuit, cancelling emitter distortion and collector-loading distortion and presenting design chart independent of transistor type for CB circuit 13 p2030 A66-25217

Integrated circuits with propagation delays in nanosecond range, noting emitter coupled logic circuit 13 p2036 A66-25534

Quasi-stationary distributions of potential in one-dimensional ion-electron currents near emitting surface, noting unstable regimes regarding slow variations in boundary conditions 14 p2338 A66-26772

Apparatus for teaching and research in electron physics including emitters, cathode ray tubes, electron multipliers and mass spectrometer 18 p3088 A66-35033

Measuring device for common emitter current-gain/ bandwidth product of transistors at various frequencies, noting effect of parasitic elements, assessing accidental error 21 p3737 A66-38966

Woven and knitted electron emitters noting reliability, mechanical stability, transparency and efficiency 24 p4180 A66-42369

HF transistor stability in common emitter configuration, examining performance of input admittance in circuit design and analysis 24 p4181 A66-42377

Two-transistor circuit with output resistance of approximately 50 M ohms with improved temperature stability and high internal resistance 24 p4181 A66-42378

Matrix analysis of complementary pair emitter-follower, examining overall circuit parameters, noting good DC quiescent stability 24 p4184 A66-42645

**EMOTIONAL FACTOR**

Urinary excretion of steroids and catecholamines as measure of emotional

stress of man in 56-day exposure to oxygen-helium environment 18 p3057 A66-33773

**EMPIRE MANNED INTERPLANETARY EXPEDITION**

Navigation requirements for Empire manned interplanetary missions discussing orbit determination, path corrections, sensor selection, functional systems and man-machine roles 02 p0255 A66-11317

**EMULSION**

SA COLLOID

SA NUCLEAR EMULSION

SA PHOTOGRAPHIC EMULSION

Diffusion and propagation phenomena in air-water and water-steam emulsions in one-dimensional flow 12 p1973 A66-23524

Spark emulsion chamber for balloon-borne cosmic radiation measurements 15 p2503 A66-29569

**ENCAPSULATION**

Embedment stress effects on electrical characteristics of encapsulated components, presenting capacitor test results 02 p0247 A66-11287

Temperature cycling effect on welds of known strength which are encapsulated with several types of resins to determine internal stress in electronic modules 02 p0234 A66-11326

**ENCKE METHOD**

Orbit perturbation by Encke method, using nontwo-body reference orbit, considering oblateness effects, drag, etc 15 p2598 A66-29296

**ENCODER**

Five-channel FM/FM telemetry encoder using molecular electronics, noting oscillators, delay lines and linear amplification functional blocks 04 p0493 A66-13601

Magnetic amplifier telemetry encoder circuit, using silicon controlled rectifiers /SCR/, for application in satellites and rockets 14 p2263 A66-27062

Five-channel FM/FM telemetry encoder using molecular electronics, noting oscillators, delay lines and linear amplification functional blocks 14 p2243 A66-28350

Optimal scientific satellite PFM encoding system circuit design and digital data processing 14 p2244 A66-28429

Microelectronic encoder design problems, considering stability in high gain amplifiers, resistors, capacitors and voltage reference source and low resistance in multiplex switch 17 p2883 A66-32120

Microelectronics pulse code modulation /PCM/ multiplexer-encoder for Apollo spacecraft, emphasizing packaging techniques, discussing advance circuit design techniques 19 p3317 A66-35707

Miniature shaft-angle encoder with integrated-circuit encoding matrix and built-in memory potential using single static commutation ring 20 p3558 A66-37217

**ENCODING**

SA CODING

SA DECODING

SA REDUNDANCY ENCODING

SA SIGNAL ENCODING

Delta modulation pictorial encoding systems analyzed to determine parameters for image communication application 19 p3299 A66-35665

Existence of q-ary uniform convolutional codes where q is any prime-power, noting error-correcting ability comparable to familiar maximal-length block codes 21 p3704 A66-39138

Run-length encodings, determining explicit form of Huffman coding when applied to geometric distribution 21 p3758 A66-39643

**END PLATE**

Ion drift and diffusion of magnetically confined plasma due to inclination of conducting end-plate having electron sheath which reflects ions 18 p3149 A66-34912

Cesium plasma of Q device used in study of stability of plasma devices with slanted nonconducting end plates 21 p3792 A66-39187

**ENDOCRINE SYSTEM**

SA ADRENAL GLAND

SA HORMONE

SA PITUITARY GLAND

SA THYMUS

SA THYROID

Low-gravity vibration stress effects on

weight, growth, metabolism, white blood cells and endocrine system of albino Wistar rats 11 p1643 A66-22581

**ENDOCRINOLOGY**  
Random lighting exposure effects in rats and changes caused in adrenal cortical function, circadian rhythm, endocrine system, group running activity, etc 15 p2429 A66-28487  
Corticosteroid responses to limbic stimulation in man and localization of stimulus sites 22 p3855 A66-40487

**ENDORADIOSONDE**  
Telemetering information from within body of animals and man, using tiny transmitters called endoradiosondes 04 p0469 A66-13370  
FM/AM temperature telemetering system for unrestrained intact ruminants, discussing design, fabrication and application 06 p0820 A66-16853  
Low power radio transmitters implanted to telemeter physiological information, discussing drift caused by body fluid permeability 06 p0820 A66-16854  
Microcircuit internal medical sensors with high electronic gain and lower sensitivity transducers 11 p1647 A66-22298  
Miniature long-life telemetry system for implanting in animal to study deep body temperature 11 p1649 A66-23499  
Miniaturized implantable biotelemetering transducer for study of metabolic rhythms in extraterrestrial life 24 p4167 A66-42674

**ENDOSCOPE**  
Endoscopes in aviation noting role in inspection of wing interiors, power plants, etc 07 p1040 A66-18330

**ENDOTHERMIC FUEL**  
Catalytic dehydrogenation of hydrocarbons over chromia-alumina catalyst in absence of added hydrogen to determine heat sink capability 11 p1650 A66-23119  
Methylcyclohexane dehydrogenation over platinum-alumina in absence of excess hydrogen, yielding toluene and hydrogen 11 p1650 A66-23122  
Thermal stability of endothermic hydrocarbon heat-sink fuels, noting application flying in 10 Mach speed range 11 p1759 A66-23124  
Shock tube ignition delay study of aircraft engine cooling by hydrocarbon fuels in endothermic heat sinks [AIAA PAPER 65-594] 12 p1934 A66-23588  
Kinetics of highly endothermic carbon-silica reaction for silica-reinforced resin systems 17 p2943 A66-32453

**ENERGETIC PARTICLE EXPLORER**  
S EXPLORER SATELLITE  
ENERGETIC PARTICLE EXPLORER-A  
S EXPLORER XII SATELLITE  
ENERGETIC PARTICLE EXPLORER-B  
S EXPLORER XIV SATELLITE  
ENERGETIC PARTICLE EXPLORER-C  
S EXPLORER XV SATELLITE

**ENERGY**  
SA ACTIVATION ENERGY  
SA BINDING ENERGY  
SA CHEMICAL ENERGY  
SA ELECTRIC ENERGY  
SA ELECTRON ENERGY  
SA FORMATION ENERGY  
SA FREE ENERGY  
SA INTERNAL ENERGY  
SA KINETIC ENERGY  
SA MOLECULAR ENERGY  
SA MOMENTUM ENERGY  
SA NUCLEAR ENERGY  
SA POTENTIAL ENERGY  
SA PROTON ENERGY  
SA RADIANT ENERGY  
SA SEISMIC ENERGY  
SA SOLAR ENERGY  
SA STACKING FAULT ENERGY  
SA STRAIN ENERGY  
SA SURFACE ENERGY  
SA THERMAL ENERGY  
SA THERMONUCLEAR ENERGY  
Paradoxes in thermodynamics by using imprecise terminology, citing available energy, diffusion entropy, self-mixing of gas, etc 09 p1472 A66-20907

**ENERGY ABSORPTION**  
Plasma generation by focusing laser beam in air at atmospheric pressure and room temperature indicate connection with luminous energy absorption during breakdown 05 p0692 A66-14538

Energy losses in ruby laser due to heat evolution during optical pumping, noting relation between energy absorption and population inversion 05 p0698 A66-15858  
Aircraft braking system, determining energy absorbed during landing or interrupted takeoff 06 p0807 A66-16970  
Impact dynamics of landing systems using material crushing to absorb kinetic energy of body impacting at very high velocities 14 p2402 A66-27895  
Ferromagnetic microwave resonance isolators for use in waveguides 15 p2459 A66-28936  
Most probable energy loss in silicon for pions with energies from 365 to 50 mev, examining pion beam behavior through different absorption material thicknesses 16 p2755 A66-31390  
Transmittance of optical materials between 1050 and 3000 angstroms, noting effect of simulated high energy space environment 17 p2979 A66-32615  
Acoustic wave energy absorption by superconductors in intermediate state 18 p3158 A66-34692  
LF electromagnetic field behavior in cold magnetoactive plasma near resonance layer, noting condition for energy absorption increase 18 p3151 A66-35064  
Transmission of luminous flux due to ionization of gases by high power laser, measuring energy absorption in ionized zone 19 p3403 A66-36255  
Thermoelastic wave equations in continuum mechanics model of laser-induced fracture in transparent media in terms of laser beam energy absorption 22 p3931 A66-40089  
Absorption of solar energy by polar cap, noting electron concentration 24 p4204 A66-43153

**ENERGY BAND**  
SA EXCITON  
Nonmagnetic impurity effect on critical temperature of superconductor with two energy bands overlapping near Fermi energy level 01 p0123 A66-10719  
Interband Faraday rotation at liquid-nitrogen temperature in CdS-CdSe mixed crystals 02 p0274 A66-11722  
Electrical conductivity of narrow energy band semiconductors as function of electric field strength 02 p0274 A66-11732  
Quantum levels of electron moving in periodic field of semiconductor crystals in strong electric field 02 p0274 A66-11733  
Impurity bandwidth and separation from conduction band in n-type GaAs determined from electroconductivity and Hall effect data 02 p0276 A66-12077  
Helium 3-1-P state, discussing pressure dependence of lifetime between free escape and complete blocking 03 p0395 A66-13134  
Reflectivity of n-type lead sulfide measured as function of wavelength, temperature and carrier density 03 p0412 A66-13147  
Unified model of ferromagnetism, analyzing spin-wave motion of electrons in transition metals, using atomic and energy-band features 04 p0559 A66-13450  
Integrated intensity measurements on fundamental and first overtone band systems of carbon monoxide between 2500 and 5000 degrees K 04 p0596 A66-13647  
Cadmium sulfide and cadmium selenide, discussing optical absorption, energy band structure, effective band-masses and composition changes of crystals in polarized light 05 p0731 A66-14656  
Theoretical anisotropic energy gap of superconducting lead when photon density of states is principal source of gap anisotropy 05 p0741 A66-15866  
Exponential absorption edge of gallium arsenide 05 p0742 A66-15870  
Exponential band-edge tails observed experimentally in degenerate n-type germanium tunnel diode 06 p0925 A66-16654  
Effect of fast states with discrete energy levels and quasi-continuous spectrum on capacitance of silicon dielectric film-metal structure 08 p1274 A66-19308  
Band structures and pseudopotential form factors for 14 semiconductors of diamond and zincblende structures 08 p1276 A66-19369  
Tin telluride electric properties analysis for verifying semiconductor model with two

valence bands in connection with Hall effect dependence on temperature 09 p1412 A66-19993  
Parameters of complex energy bands in semiconductors determined by free carrier Faraday rotation, Voigt effect and transport properties 09 p1426 A66-20191  
Energy band structure of germanium and silicon throughout Brillouin zone by k-p Hamiltonian 10 p1581 A66-21738  
diagonalization  
Electron tunneling in semiconductors with degenerate band structure 10 p1581 A66-21739  
Energy band structure via reflection spectra of crystals of ternary zinc compound containing elements of Periodic Groups II, IV and V 11 p1750 A66-22342  
K beta 5 emission band and fundamental K-edge absorption of vanadium analyzed and results compared with vanadium spectra from other series 12 p1898 A66-25024  
Threshold energy for avalanche multiplication in semiconductors obtained from energy band structure and crystal momentum conservation in ionization process 13 p2157 A66-25035  
Electroreflectance effect on gallium arsenide surfaces, noting reflectance response upon electric field modulation 13 p2158 A66-25051  
Cadmium sulfide and cadmium selenide, discussing optical absorption, energy band structure, effective band-masses and composition changes of crystals in polarized light 13 p2167 A66-25931  
Electronic band structure of BiSb alloy tunnel junction for various Sb concentrations 16 p2770 A66-30178  
Fundamental optical spectra theory for high energy atoms interaction with solids 17 p2977 A66-32399  
Spectral and spatial distribution of origin of injection luminescence from epitaxial gallium arsenide transistors, noting correlation between energy peak and radiation recombination 17 p2986 A66-33295  
Energy band structure, carrier behavior and characteristic curve of p-n junction diode at high-current level, solving transport and Poisson equations 19 p3312 A66-35346  
Reflection spectra of polished polycrystalline samples of various rare earth chalcogenides 19 p3442 A66-35820  
Nonmagnetic impurity effect on critical temperature of superconductor with two energy bands overlapping near Fermi energy level 20 p3619 A66-37657  
Effects of nonmagnetic impurities upon anisotropy of superconducting energy gap 21 p3797 A66-38559  
Dynamic characteristic theory of long diode with base containing impurity atoms producing deep energy levels in forbidden zone 22 p3873 A66-39826  
Theoretical model for effect of mechanical stress on generation-recombination currents in p-n junctions 22 p3963 A66-40095  
Crystal potential and correlation for energy bands in valence semiconductors evaluated on basis of orthogonalized plane wave calculations starting with Hartree-Fock equation 24 p4249 A66-42227  
Multiple energy bands effects on stress dependence of breakdown and order of magnitude in breakdown voltage of Ge and Si junction diodes 24 p4251 A66-42306  
Radiative recombination within space-charge region in germanium exposed to increasing surface field 24 p4251 A66-42308  
Diffusion current in MOS transistors analyzed, using three-dimensional energy band diagrams 24 p4253 A66-42383  
Pressure deformation of band structure of HgTe-CdTe alloys determined from measurements of Hall effect and resistivity 24 p4258 A66-43009

**ENERGY BUDGET**  
Energy balance of cylindrically symmetric hydrogen arc immersed in axial magnetic field led to current-voltage characteristic and radial temperature distribution 04 p0554 A66-14298  
Kinetic energy generation and dissipation in large-scale atmospheric circulation, using six months aerological data from North American network 11 p1731 A66-23487  
Energy balance of stationary discharges in

quartz containers filled with gas at various pressures, determining relation of heat and light loss of discharge to gas pressure and discharge power 15 p2551 A66-29215

Energy reflected from subsolar point on Moon determined, noting energy balance and radiated energy 20 p3656 A66-38052

### ENERGY CONVERSION

#### SA HEAT GENERATION

P-n transitions in gallium arsenide investigated as factor in performance of such diodes as converters of ultrasonic into electrical oscillations 01 p0036 A66-10422

Spaceflight application of cryogenic techniques including cooling magnets, noise reduction in parametric amplifiers and quantum-electronic, superconductive and IR sensing devices 01 p0130 A66-10789

Design and fabrication techniques for high voltage impulse generation by conversion of mechanical to electrical energy, using piezoelectric ceramics 01 p0016 A66-10916

Pulsating combustion compared with steady combustion as means of increasing energy conversion 01 p0166 A66-11093

Energy conversion into electrical power considering solar cells, thermoelectrics and thermionics noting advantages over fuel cells, dynamic machines and MHD 03 p0324 A66-13272

Energy conversion from available potential to kinetic broken into spectral components permitting analysis in vicinity of extratropical cyclone 04 p0541 A66-13665

Palladium-hydrogen diffusion electrode noting current densities 04 p0460 A66-14034

Various types of periodically discontinuous combustion, showing improved thermal efficiency applicable to turbine combustion chambers 05 p0787 A66-14962

Drop-weight impact sensitivity testing of explosives [CI PAPER WSCI-65-27] 05 p0788 A66-15140

Magnetic storage, discussing mechanical and thermal energy conversion into magnetic field energy and electromagnetic energy transfer 05 p0717 A66-15335

Heat transfer measured at different conditions of diode operation, obtaining data on plasma properties and electrode sheaths 05 p0616 A66-15546

Book on theoretical and engineering problems arising in capacitor discharge technique of pulse generation 06 p0878 A66-16046

Rectangular waveguide filter with trapped mode resonators, describing operation, energy handling characteristics and application 06 p0845 A66-16086

Energy conversion and storage . Conference, Oklahoma State University, October 1965 06 p0808 A66-16390

Silicon photovoltaic cells applied to solar batteries, examining efficiency with which luminous energy is converted into electrical energy 06 p0810 A66-17160

Depletion layer 1000 mc transducers for producing or detecting hypersonic waves in solids, using  $\text{CaS}$  or  $\text{GaAs}$  for high acoustoelectrical conversion 07 p1009 A66-17827

Energetics /engineering developments in energy conversion/ - ASME International Conference, University of Rochester, August 1965 07 p0992 A66-18308

Data analysis of experiments with open-cycle supersonic EGD generator for application as power source and comparison with mathematical model 07 p0993 A66-18314

Electric power generation using monopolar charged particles in fluid flow 07 p0994 A66-18315

MHD squeeze film device as energy conversion 07 p0994 A66-18316

Gamma-electric cell, solid state device for direct conversion of gamma-ray energy into electrical energy 07 p1079 A66-18323

Power plants and direct energy conversion in space vehicles 08 p1168 A66-19018

P-n transitions in gallium arsenide investigated as factor in performance of such diodes as converters of ultrasonic into electrical oscillations 11 p1664 A66-22608

Efficient conversion of electrical energy into laser radiation, using coaxial optical pump 11 p1715 A66-23479

Boundary value problem of acoustic point source antenna within compressible plasma

region with assumed rigid boundary, noting acoustic power conversion into electromagnetic waves 12 p1920 A66-24116

Electrofluid dynamic power generation, high voltage generating device, direct energy conversion and supersonic electrogasdynamic generator 12 p1803 A66-24646

Materials for producing electric energy from heat by direct conversion 13 p1997 A66-25116

Energy conversion between four different forms of kinetic energy in atmosphere 15 p2489 A66-29662

Magnetic storage, discussing mechanical and thermal energy conversion into magnetic field energy and electromagnetic energy transfer 15 p2543 A66-29982

Simplified method of evaluating thermal and ionizing energies from fission of uranium atoms 16 p2744 A66-30436

Hard superconductors as generators of strong magnetic fields to accelerate plasma in energy converters and plasma propulsion systems of spacecraft 17 p2981 A66-32898

Plasma oscillation theory of nonlinear deceleration effect and thermal conversion of electron beams upon passage through plasma 17 p2974 A66-33284

Electrical energy by direct conversion, noting fuel cell, thermoelectric generator, solar cell, etc 18 p3053 A66-33722

Book on direct energy conversion covering thermoelectric, photovoltaic, thermionic and MHD generators and fuel cell 18 p3054 A66-34164

Quasi-static processes in energy conversion statics, deriving stability criteria 19 p3281 A66-36293

Nonlinear plasma wave interaction, discussing Langmuir wave scattering on particles and energy transformation 19 p3418 A66-36532

Spacecraft power source, discussing energy conversion, processes, solar cells, radio isotopes, thermionic power converters, turbogenerators, etc 19 p3282 A66-36797

Coupling between oppositely directed traveling waves in He-Ne ring laser in form of mutual backscattering of energy from each beam into direction of other 20 p3579 A66-37778

Pulsed-mode gain characteristics in neodymium-doped silicate glass laser experimentally related to giant-pulse laser energy output 20 p3582 A66-38396

Book on plasma diagnostics covering measuring devices and techniques, SHF antenna and waveguide system, emission measurements, etc 21 p3737 A66-38949

Polarization interaction of plasma fluxes moving in transverse magnetic field, using plasma diagnostic techniques including superhigh-speed photography and double electrostatic and magnetic probes 21 p3787 A66-39053

Photoelectric devices for converting luminous to electrical energy and vice versa, considering characteristics, performance and application 21 p3716 A66-39619

Charge transfer between water drops relevance to radiation problem and efficiency of conversion of electrostatic to electromagnetic energy 22 p3942 A66-39679

Lorentz transformation of thermodynamic quantities, noting application of formalism of statistical mechanics, validity of Planck-Einstein equations for total energy and momentum 22 p3997 A66-39806

Dynamic conversion of solar and chemical energy, discussing power conditioning, Brayton-cycle system with inert gas and spacecraft batteries 22 p3851 A66-40128

Solar cell as most reliable energy conversion device for near-Earth missions, noting semiconductor material and thermal stress 23 p4017 A66-41167

Magnetic pumping heating rate for plasma, using conversion of organized energy into random energy by charged particle collisions 23 p4100 A66-41250

Intersociety Energy Conversion Engineering Conference, Los Angeles, September 1966 23 p4018 A66-41744

Laval turbine type device for starting rotors of turbojet engines, noting jet energy conversion on wheel blades and geometrical structure 23 p4122 A66-41791

Ionic reactions of gaseous methane using tandem mass spectrometer, noting translational energy 24 p4170 A66-43035

### ENERGY CONVERSION EFFICIENCY

High pressure thermionic converter, discussing current-voltage characteristics at high collector temperatures 05 p0616 A66-15545

Spontaneous radiation and nonresonant losses as dominant effects in conversion of incoherent light into coherent induced radiation 06 p0889 A66-15891

Radioisotope-photovoltaic energy conversion system, discussing principal elements, radiative exchange and efficiency calculations 07 p0990 A66-17231

Extrinsic and intrinsic epitaxially deposited single crystal gallium phosphide solar cells, noting conversion efficiencies 07 p0990 A66-17232

Electrochemical energy conversion, discussing fuel selection, oxidants, fused salt electrolytes, liquid metal, etc 07 p0995 A66-18325

Silicon photovoltaic cells in economic solar energy conversion on Earth 08 p1174 A66-19665

Solar energy for power requirement aboard satellites and spacecraft, noting thermal conversion efficiency by various methods for capturing solar radiation 08 p1174 A66-19753

Power and efficiency analysis of molten salt thermocell as thermoelectrochemical energy converter 09 p1333 A66-20499

Energy efficiency trends in two-stage repetitively pulsed coaxial plasma accelerator 12 p1935 A66-23578

Maximum efficiency of power converters, using ferroelectric and nonferroelectric pyroelectrics 13 p1997 A66-25036

Multiplier with varactor diode circuit examined, noting maximum obtainable conversion output power and efficiency 13 p2041 A66-25879

Multiple-converter thermionic module for operation from common liquid-metal heat source [AIAA PAPER 64-761] 13 p2005 A66-26628

Radiant energy conversion using thin dielectric films in thermoelectrostatic cycle [AIAA PAPER 64-729] 13 p2006 A66-26639

Molten carbonate fuel cell system performance evaluated from engineering and economic aspects [AIAA PAPER 64-747] 13 p2007 A66-26648

Performance efficiency and weight considerations for liquid MHD power conversion [AIAA PAPER 64-760] 13 p2008 A66-26660

Design and laboratory tests of vapor-phase heat exchanger coupled to power generating bismuth telluride thermopile for waste heat dissipation 16 p2637 A66-31101

Circuit with single externally driven switch, operated at fundamental frequency gives efficient conversion of DC to AC at that frequency or any specified harmonic of it 17 p2848 A66-31818

Solar energy power converter based on illumination of battery of silicon photovoltaic cells with intense light fluxes 17 p2848 A66-32856

Operating characteristics equations of energy converters constructed of anisotropic materials and subjected to physically meaningful constraints 19 p3281 A66-36292

Chemical energy conversion to electromagnetic energy by flux compression, discussing process and obtained efficiency 21 p3698 A66-39502

Thermionic energy conversion phenomena and advances, detailing  $\text{Cs}$  diode and optimum ideal performance 23 p4021 A66-41756

Pulsed energy turboalternator power generation system, discussing operation principles and performance characteristics 23 p4022 A66-41761

Conversion efficiency of  $\text{GaAs}$  solar cell at various light intensities 24 p4161 A66-42391

### ENERGY CONVERTER

#### SA FUEL CELL

#### SA PHOTOELECTRIC CELL

#### SA TRANSDUCER

Fuel cells and potential as future chemical-electric energy converters 03 p0324 A66-13234

- Gaseous heat engine cycle with gas compression from molecular effusion through capillary material 11 p1639 A66-22244
- Hysteresis effects in one-dimensional conducting gas flow through rectangular MHD converter channel with constant magnetic gap and variable electron spacing 15 p2428 A66-29219
- Output power and thermal efficiency of molten salt thermocell, examining applicability as generator for direct conversion of heat into electric energy 16 p2636 A66-30673
- Effect of finite width on performance of polyphase rectangular MHD converter, showing that for isotropic fluid electric current extends in two dimensions 16 p2637 A66-31102
- Closed magnetic trap for transverse-to-longitudinal conversion of energy of particles moving in spatially periodic magnetic field 21 p3788 A66-39059
- Ferromagnetic transducer operation principles, noting dimension optimization, energy efficiency, etc 21 p3741 A66-39505
- Plasma thermocouple and MHD generator as energy conversion devices, with bibliography 24 p4162 A66-43119
- ENERGY DENSITY**
- Fluctuation problem in electromagnetic cascade theory analyzed, using invariant imbedding method 07 p1083 A66-17973
- Fuel cells using metallic barium as fuel electrode and oxygen or chlorine as cathode, noting net energy 08 p1172 A66-19656
- Energy-momentum density of gravitational field according to Ozsvath-Schuecking rigorous solution to Einstein field equations 12 p1915 A66-24994
- General relativistic dynamics for determining place of Mach principle in relativity theory, obtaining expression for energy-momentum density of gravitational field 12 p1916 A66-25019
- Energy gap and critical field rules for superconductors, discussing empirical and experimental values 23 p4113 A66-41375
- Frequency dependence of electrostatic energy density in undamped longitudinal plasma oscillation, noting contribution of kinetic and thermal energy 23 p4104 A66-41507
- High energy density Zn/O battery system, noting good low oxygen pressure and low temperature performance characteristics 23 p4022 A66-41759
- ENERGY DISTRIBUTION**
- Scintillation hypothesis giving physical characteristics of quasars, determining energy output by star accretion 01 p0138 A66-11034
- Energy and thermal considerations during resistance weld between round wire and ribbon 02 p0233 A66-11321
- Energy distribution near jet stream and associated wave amplitude relations 05 p0711 A66-14544
- Heating process in laser welding of metal sheets, taking into account energy distribution, heat transfer and flux densities 05 p0688 A66-15347
- Solar spectrum measurement, discussing equipment design, testing and application [ISA PREPRINT 1.11-2-65] 05 p0684 A66-15511
- Estimation in equilibrium state surface potential and distributions of electric potential field and electron density in vicinity of object moving in ionized medium 05 p0685 A66-15795
- Coupling coefficients in high energy region of Earth atmosphere, considering interactions between primary nucleons and nuclei of air atoms 06 p0950 A66-16594
- Physics of spark discharges igniting gaseous mixtures, noting increase in thermal power of discharge by gas preionization resulting from energy redistribution 06 p0919 A66-16877
- Energy distribution of particles produced in elementary interaction expressed in terms of shower characteristics derived from cascade theory 07 p1116 A66-17562
- Ionization bursts in shielded spherical chambers with burst data transformed to give integral energy distribution of muon intensity at sea level 07 p1116 A66-17563
- Model simulating energy distribution process /thermal stratification/ within liquid hydrogen stored aboard moving rocket to avoid pump cavitation [AIAA PAPER 64-426] 08 p1279 A66-18809
- Work function of metals and semiconductors measured, using retarding potential analyzer to determine field emission electron energy distribution 08 p1228 A66-19825
- Energy distribution of hydrogen plasma from coaxial gun 10 p1571 A66-22013
- Temperature jump in polyatomic gases, discussing nonequilibrium energy distribution on boundary conditions 11 p1687 A66-22334
- Internal gravity wave propagation in thermally stratified atmosphere 11 p1697 A66-22567
- Input impedance of spherical emitter in infinite homogeneous isotropic conducting medium 11 p1656 A66-23031
- Kinematic computer calculations of energy distribution among products of repulsive, mixed and attractive energy release exothermic reactions 11 p1787 A66-23213
- Triaxial electron spectrometer, mounted on OGO-E spacecraft, measures flux and energy distributions of electrons, noting electron multiplier 12 p1877 A66-23689
- Magnetic field effect on energy distribution and slowing-down times of nonequilibrium carriers in semiconductors when excitation source creates electron-hole pairs 12 p1929 A66-24451
- Bremsstrahlung of nonrelativistic plasma, treating nondegenerate electron component of plasma simultaneously with degenerate component by applying Fermi-Dirac distribution 12 p1925 A66-24996
- Einstein gravitational theory in terms of orthogonal reference points, describing energy and momentum distribution by generally covariant tensors 13 p2128 A66-25946
- Discrepancy between calculated and experimental values for Raman gain in pulsed laser suggests higher energy distribution due to light trapping or Brillouin scattering 13 p2096 A66-26157
- Spectral characteristics of gallium arsenide junction luminescence, noting radiative recombination mechanism, energy spread of impurity states and line shape temperature dependence 13 p2168 A66-26186
- Self-pumping chemical laser theory and operation, noting chemical pumping 13 p2104 A66-26382
- Plasmoid propagation in field-free space, discussing thermal expansion, velocity distribution, charged particle density distribution, energy distribution in absence of thermodynamic equilibrium, etc 13 p2154 A66-26528
- Multiple scattering of energy from inhomogeneous media, comparing discrete point scatterer behavior with bulk scatterer 14 p2240 A66-27915
- Black body radiation law deduced from stochastic electrodynamics 14 p2414 A66-28173
- Energy distribution of secondary particles emitted in proton stars for tev energy range proton interactions 15 p2583 A66-29542
- Meson emission asymmetry, inelastic particle collisions and multiplicity in ultrahigh energy interactions in nuclear emulsion 15 p2545 A66-29543
- Rotational energy distribution through shock waves in nitrogen measured, using electron beam fluorescence 15 p2481 A66-29738
- Heating process in laser welding of metal sheets, taking into account energy distribution, heat transfer and flux densities 15 p2511 A66-29989
- Lewis method for obtaining thermodynamic relation between energy gap of superconductor and critical field and temperature slope 16 p2768 A66-30141
- Electron component of plasma sheet of terrestrial magnetic trail, noting energy distribution and densities 16 p2792 A66-30142
- Subharmonic structure in superconductive Pb-Pb tunneling junctions, noting energy gap values and background current temperature dependence 16 p2769 A66-30160
- Energy distribution spectrum of tungsten single crystal field emitter and shapes of Fermi surfaces 16 p2769 A66-30162
- B-L flux plots and differential energy distributions for low energy protons in nine energy intervals from 0.17 to 3.4 mev measured with satellite-mounted proton spectrometer 16 p2794 A66-30702
- Differential electron spectra in radiation belt in ten energy intervals obtained by satellite spectrometer, noting soft and hard components 16 p2794 A66-30703
- Heat-conducting gas converging spherical shock wave analysis, emphasizing energy accumulation 16 p2689 A66-31514
- Unsteady expansion of plane layer of ideal gas into vacuum for various laws and durations of energy release described by equations of gas dynamics 16 p2690 A66-31617
- Production rates of muons in extensive air showers determined from spatial and energy distributions 16 p2795 A66-31694
- Surface IR photoconductivity spectra of chemically etched p and n silicon, noting energy distribution, activation energies of centers, etc 16 p2788 A66-31774
- Electric field dependence of piezoresistance in germanium, noting correlation with intervalley scattering in energy balance 16 p2788 A66-31778
- Mars disk intensity, noting spectrophotometric measurements in search for limonite near IR spectral features 17 p2997 A66-31923
- Dangling bonds and dislocations in semiconductors, noting existence of core charge dependent localized state in gap caused by local decrease in atom density 17 p2985 A66-33155
- Energy distribution of electrons emitted from alkali halide films on Mo substrates during positive helium and argon ion bombardment 17 p2988 A66-33459
- Coupling between free electron and molecular vibrational temperatures in plasma environments, noting energy distribution, application to MHD generation, etc 18 p3145 A66-34105
- Energy flow variation of high energy nuclear active particles in EAS measured by scintillation detectors in Bolivia 18 p3205 A66-35099
- Three-dimensional Monte Carlo simulation of nuclear cascade of extensive air showers, examining nuclear particle spatial and energy distribution 18 p3206 A66-35102
- Neon hodoscope study of energy and production heights of high energy EAS electron-photon cascades, comparing results to nuclear emulsion study findings 18 p3207 A66-35109
- Airborne scintillation counter-spark chamber observations of particle energy flow and incident zenith angle distribution of air showers 18 p3211 A66-35131
- Muon component of vertical and inclined extensive air showers, determining energy spectrum, lateral distribution at sea level and relation of mean height of origin and sea level energy 18 p3211 A66-35134
- Ionization chamber to investigate distribution of energy portion transferred to photons by nuclear active particles colliding with atomic nuclei of C, Fe and Pb 18 p3215 A66-35157
- Pumping energy distribution of ruby laser, discussing existence of trapped modes and effect of partially filled water jacket surrounding ruby rods 19 p3373 A66-35389
- Energy distribution of hydrogen plasma from coaxial gun 19 p3407 A66-36097
- Magnetic field effect on energy distribution and slowing-down times of nonequilibrium carriers in semiconductors when excitation source creates electron-hole pairs 20 p3619 A66-37683
- Energy distribution of trapped electrons producing solar microwave impulsive radio bursts and X-ray bursts from Sun 20 p3634 A66-38213
- Upper atmospheric phenomena and particle precipitations noting ionization cross section, energy and spatial distribution and auroral activities 20 p3642 A66-38334
- N-type Ge hot carrier Hall mobility, magnetoresistance, Maxwellian energy distribution, electron-electron and intervalley electron-phonon

collisions 21 p3801 A66-38997  
 Nonadiabatic magnetic trap energy  
 redistribution during charged particle  
 motion in spatially periodic magnetic  
 field 21 p3788 A66-39058  
 Spectral response curves of  
 superconducting point contacts, noting  
 existence of frequency dependent Josephson  
 current amplitudes peaking in vicinity of  
 energy gap 21 p3803 A66-39262  
 Cosmic-ray neutron production and flux  
 distribution on sea level and mountain  
 altitude measured with boron fluoride  
 counter for Maxwellian energy distribution  
 with shifted neutron  
 temperature 22 p3972 A66-39680  
 Upper ionospheric electron density,  
 electron gyrofrequency, ion density and ion  
 gyrofrequency deduced from whistler-mode  
 waves group index, energy distribution and  
 dispersion curves 22 p3911 A66-39989  
 Cosmic microwave background radiation,  
 considering statistically homogeneous and  
 isotropic but nonuniform distribution of  
 matter 22 p3978 A66-40009  
 Spectral energy distributions of various  
 quasi-stellar radio sources, using  
 photoelectric spectrum  
 scanner 23 p4129 A66-41806  
 Ratio of energy flux in nuclear active  
 component to energy flux in electron  
 photon component in extensive air showers  
 with given numbers of  
 particles 24 p4269 A66-42918  
 Angular and energy distributions of muons  
 produced by interaction of atmospheric  
 neutrinos with matter  
 underground 24 p4270 A66-42933

## ENERGY EQUATION

Reduction method for high order flutter  
 systems based on energy compatibility  
 equation for normalized  
 coordinates 05 p0606 A66-15060  
 Atmospheric energetics during January-  
 February 1963 stratospheric warming  
 investigated, using spectral energy equations  
 for zonal and eddy kinetic and potential  
 energies 07 p1027 A66-17360  
 Energy integral for holonomic system of  
 points of variable mass, transforming  
 Lagrangian form via Hamiltonian  
 function 08 p1256 A66-19583  
 Rayleigh-Ritz method, stationary  
 complementary and potential energy  
 principles and Lagrange undetermined  
 multipliers applied to free vibration of  
 elastic body 11 p1781 A66-22611  
 Heat transfer in steady flow of non-  
 Newtonian fluid characterized by Rivlin-  
 Ericksen constitutive equation inside wavy  
 cylindrical tube, with momentum and energy  
 equations solved by perturbation  
 technique 12 p1866 A66-24960  
 Goedel universe analyzed, noting  
 generalized Poisson equation, angular  
 velocity in perturbed metric, equations of  
 motion in inertial frame of reference,  
 etc 13 p2183 A66-25609  
 Metal behavior during hypervelocity  
 cratering, noting momentum and energy  
 equations for impulsive loading, including  
 anisotropic stress and strain rate tensors,  
 etc 17 p3022 A66-32013  
 Velocity distribution in laminar plasma jet  
 determined from energy equation and  
 spectroscopic measurement of temperature  
 distribution 17 p2967 A66-32459  
 Arc operation under nonsteady electrical  
 inputs, noting initial conditions, energy  
 equation solution, temperature profiles,  
 application of Green function for moving  
 boundary problem, etc  
 [AIAA PAPER 66-480] 17 p2970 A66-32769  
 Discontinuous one-dimensional dissipative  
 flow of perfect liquid and gas conductor in  
 magnetic field, emphasizing case where  
 magnetohydraulic jump may  
 occur 17 p2973 A66-33070  
 Fluid dynamics equations of state, motion,  
 continuity and energy stress-strain  
 relationship and shearing stress  
 deformations 18 p3098 A66-34120  
 Supersonic MHD flow around right angle  
 bend, constructing characteristic net by  
 applying energy  
 equations 18 p3147 A66-34625  
 Properties of anisotropic continuous media  
 with energy and stresses depending on

deformation-tensor gradients and other  
 tensor magnitudes 19 p3476 A66-36833  
 Energy balance equation obtained from  
 turbulent winds from chemical release  
 studies and turbulent diffusion analysis of  
 globule expansion 20 p3554 A66-38205  
 Turbulence energy balance equation used  
 in air mass transformation  
 problem 20 p3594 A66-38369  
 Constitutive equations for nonlinear elastic  
 solid-linear viscous fluid mixture and for  
 mixture of two nonlinear elastic  
 solids 22 p3898 A66-40140  
 Linear theory of micropolar elasticity,  
 noting all components of asymmetric stress  
 tensor are determined and motion of media  
 is fully described when deformation and  
 microrotation vectors are  
 known 22 p3995 A66-40566  
 Systematizing power compaction and  
 energy compaction equations for porous  
 materials, depending on functions and  
 independent variable 23 p4075 A66-41821  
 Inviscid flow model for stagnation region  
 behind strong shock, examining inviscid  
 energy for radiating gas including self-  
 absorption effects 23 p4150 A66-41906  
 Stress-strain temperature equations and  
 energy equation with heat conduction for  
 isotropic nonlinear viscoelastic materials,  
 using irreversible  
 thermodynamics 24 p4289 A66-42280  
 Thermal emission in subsonic and  
 supersonic nozzles based on energy equation  
 solution and laws of heat  
 transfer 24 p4295 A66-42878  
 Energy equation of boundary layer in heat-  
 insulating part of flat wall used to derive  
 equations for gas heat shield efficiency,  
 demonstrating effect of nonisothermicity  
 and compressibility 24 p4196 A66-42881

## ENERGY EXCHANGE

Energy accommodation coefficients  
 calculated for gas particles interacting with  
 cubic crystal lattice 04 p0548 A66-14142  
 Rate of intercarrier energy exchange in  
 semiconductor by intraband collisions within  
 Maxwellian distribution of  
 carriers 04 p0566 A66-14314  
 Direct measurement of energy relaxation  
 time between hot electrons and lattice in n-  
 type indium antimonide in hydrogen  
 temperature range 06 p0929 A66-17036  
 Exchange of energy between ionosphere  
 and protonosphere, noting nonlocal heating  
 by photoelectrons, thermal conductivity and  
 heat input by downward  
 flux 08 p1215 A66-19204  
 Wave propagation in magnetoplasmas  
 noting momentum transfer, dispersion  
 relations, temperature relaxation effects and  
 collisional energy  
 exchange 09 p1408 A66-20372  
 Born-exchange and Ochkur approximations  
 used to calculate electron impact ionization  
 cross sections for He, Li, Be, Na and Mg  
 atoms in ground states 11 p1737 A66-22497  
 Energy exchange between beam of charged  
 particles and small amplitude  
 electromagnetic perturbation in  
 magnetosphere 11 p1700 A66-23137  
 Circumventing turbine inlet temperature  
 limitation of gas turbines by direct fluid-to-  
 fluid energy exchanger, using isentropic  
 compression waves to avoid shock losses  
 [ASME PAPER 66-GT-117] 14 p2373 A66-27009  
 Acoustoelectric effects for various sound  
 waves, using rate of energy exchange  
 between two coupled systems in relative  
 motion 15 p2564 A66-28970  
 Interaction between gas particles and solid  
 surface examined, noting idealization of  
 Morse potential and use of analog  
 computer 16 p2655 A66-30390  
 Moderately long-range relativistic  
 intermolecular forces, obtaining interaction  
 energies 17 p2960 A66-32401  
 Retarded intermolecular forces, discussing  
 Casimir and Polder retarded dipole-dipole  
 energy of interaction between two ground  
 state atoms in terms of trigonometric  
 integrals 17 p2960 A66-32402  
 Reduction of Gilchrist two-equation set for  
 free oscillations in conservative quasi-linear  
 systems with two degrees of  
 freedom 18 p3134 A66-33602  
 Plasma-electromagnetic wave interactions

during hypersonic reentry of space vehicle  
 into lower layers of atmosphere  
 [ICAS PAPER 66-37] 22 p3957 A66-40666  
 Vibrational energy exchange between  
 molecules during collision behind direct  
 shock wave front examined as function of  
 wave velocity 23 p4010 A66-41732

## ENERGY LEVEL

## SA EXCITATION

Heat capacity related to quantizing of  
 energy levels of electron excitation of  
 superconductor in intermediate  
 state 02 p0278 A66-12278  
 Total complexions for isolated assembly of  
 N quasi-independent localized systems with  
 equally spaced energy  
 levels 03 p0444 A66-12610  
 Quantum scattering theory of hydrogen-like  
 ions in 1-S, 3-S, 1-P and 3-P  
 states 03 p0395 A66-13110  
 Electrical behavior of microplasmas for  
 determination of density and energy level of  
 capture sites induced by radiation in silicon  
 single crystals 04 p0566 A66-14320  
 Computer calculation of relative  
 populations of atomic energy levels not in  
 thermodynamic  
 equilibrium 05 p0718 A66-14871  
 Heat capacity related to quantization of  
 energy levels of electron excitation of  
 superconductor in intermediate  
 state 05 p0738 A66-15457  
 Lower bounds for energy levels of  
 anharmonic oscillators 06 p0911 A66-16167  
 Lower bounds to energy eigenvalues for  
 rigid rotator in electric field /Stark  
 effect/ 06 p0911 A66-16168  
 Positions of defect energy levels in n-type  
 germanium irradiated with fast neutrons  
 analyzed by optical methods, measuring  
 spectral distribution of photoconductivity  
 and quenching curve 06 p0934 A66-17127  
 Temperature and plasma-composition  
 determination for pure thermal carbon  
 plasma 07 p1086 A66-17734  
 Fluctuation of ratio of yearly average  
 amplitudes of meson-to-neutron diurnal  
 variation owing to variability of energy  
 dependence of cosmic ray  
 anisotropy 07 p1126 A66-18009  
 Electron distribution over energy level in  
 valence semiconductor in presence of  
 electric field 08 p1269 A66-18977  
 Anomalous densities of states in normal  
 tantalum and niobium 09 p1417 A66-20029  
 Thermodynamic behavior of strong  
 coupling superconductors, with complex  
 energy gap function and renormalization  
 parameter for lead and  
 mercury 09 p1423 A66-20072  
 Boundary condition constraint method for  
 generalizing R-matrix theory, permitting use  
 of shell model as basis for nuclear-reaction  
 calculations 09 p1405 A66-20322  
 Electron excitation cross section of  
 individual energy levels of inert gases  
 calculated, using Born-Oppenheimer  
 method 09 p1405 A66-20939  
 Pressure induced change in energy gap and  
 forbidden bandwidth of lead  
 telluride 10 p1587 A66-22152  
 Perturbation effects in differential elastic  
 ion-atom scattering generated by crossing of  
 molecular states from even  
 potentials 11 p1740 A66-22972  
 Cobalt doping effects on energy level and  
 negative photoconductivity in n-type  
 silicon 12 p1926 A66-23720  
 Differences between thermodynamic  
 equilibrium of hydrogen plasma, accounting  
 for increased atomic  
 energy  
 levels 13 p2141 A66-25459  
 Spectrum of electron excitations with  
 small energies compared to critical  
 temperature of superconducting transition in  
 absence of magnetic field 13 p2168 A66-25978  
 Optical absorption, energy level structure  
 and exchange interactions of cobalt and  
 sodium cobalt fluoride  
 ions 14 p2357 A66-27075  
 Spontaneous LF current oscillations in  
 germanium with copper, with compensated  
 energy levels under illumination, low  
 temperatures and electric fields, noting  
 formation of electric  
 domains 14 p2357 A66-27076  
 Superconductivity model with exact  
 solution, determining energy levels, ground

- state energy, excitation spectrum, density variations, etc 14 p2360 A66-27190
- Energy level transitions in vacuum UV absorption spectrum of calcium vapor 14 p2337 A66-27704
- Relative vibrational transition probabilities and r centroids for 36 bands of C-X system of singly ionized nitrogen molecule 14 p2337 A66-27705
- Minimizing maximum signal energy, when signals are represented as points in N-dimensional space, by choosing origin as center of smallest hypersphere enclosing all points 14 p2243 A66-28351
- Electron excitation cross section of individual energy levels of inert gases calculated, using Born-Oppenheimer method 15 p2543 A66-28528
- Normal scalar nonet, K1 meson-2 pion decay, K1-K2 mass difference and S-wave pion scattering 15 p2544 A66-28946
- Resonance transformation of light in molecule, using Schroedinger wave equation 15 p2544 A66-29197
- Resonant absorption of monochromatic light in system with intermediate energy level 15 p2516 A66-29355
- Quantum mechanical potential energy curve of lowest normal state of diatomic helium computed in valence bond scheme, using 17-term wave function of Slater orbitals 16 p2749 A66-30112
- Pressure dependent energy loss process determined in atomic light analysis of helium positive column, noting molecular-ion concentration relation to 3 D super 3 population 16 p2750 A66-30114
- Resistivity increase in Cadmium Telluride, attributed to conduction band separation due to deionization into impurity levels 16 p2768 A66-30131
- Prediction that above presently measured energy level cosmic ray spectrum will steepen abruptly and finally have cosmologically meaningful termination 16 p2793 A66-30194
- Evaluation of energy resolution of Li-drifted Ge detectors and preamplifiers using FETs in nuclear spectrometry 16 p2660 A66-30625
- Collision cross sections of ions in isoelectronic sequence of lithium, noting dipolar transitions of type 2s to np 16 p2754 A66-31261
- Pulse field effect technique investigation of electrical properties of surface states on practical Si surfaces with various surface 16 p2781 A66-31356
- Impurity energy levels in semiconductors described by equivalent Schroedinger equation containing short-range as well as conventional terms for long-range Coulomb potential 16 p2784 A66-31446
- Kinetics of semiconductor characteristics determined from impurity photoconductivity, using circuit measuring effective cross section of current carrier capture in impurity centers 16 p2709 A66-31667
- Distribution of recombination centers over energy levels of CdS-CdSe solid solutions 16 p2787 A66-31737
- Energy levels in forbidden band of gallium arsenide alloyed with silver or gold, determining impurity levels from temperature dependence of electric conductivity and Hall constant 16 p2789 A66-31791
- Planck entropy equation and irreversibility of radiation matter interaction for stationary isothermal gas emitting resonance lines of two-level atoms 17 p2957 A66-32044
- Physical process effect on structure of H II regions, noting ionization, Lyman continuum spectral distribution and radiative transfer frequency dependence on absorptive processes 17 p3003 A66-32655
- Resonance transformation of light in molecule, using Schroedinger wave equation 17 p2961 A66-33046
- Local pressure effect on changes of forward current and stored charge of germanium p-n and p-s-n structures explained by change of energy gap 18 p3153 A66-33759
- Energy gaps of Ag-Sn, Fe-Sn and Sn film studied by electron tunneling method for various temperatures 18 p3156 A66-34474
- Energy level and crystal-field splitting of neodymium ion in yttrium oxide 18 p3157 A66-34514
- Solar neutrino detection via neutrino-chlorine reaction, discussing energy level positions and probabilities of beta transition 18 p3223 A66-35219
- Lunar figure and orbit parameters measured by optical location method 19 p3455 A66-35285
- Pressure induced change in energy gap and forbidden bandwidth of lead telluride 19 p3440 A66-35766
- Gas laser with generalized polarization characteristics, noting role of degenerate atomic energy levels 19 p3374 A66-36005
- Energy levels and interband oscillator strengths of antimony calculated in Brillouin zone by pseudopotential method, predicting polarization effects and spin-orbit splittings 19 p3446 A66-36392
- Fermi surface interpretation of band structure, electron energy levels, optical properties and ferromagnetic structure of transition and noble metals 20 p3613 A66-37274
- Resonant absorption of monochromatic light in system with intermediate energy level 20 p3604 A66-37359
- Atomic energy levels in plasma, considering energy spectrum of hydrogen-like atom in plasma, based on cut-off Coulomb potential model 20 p3607 A66-37373
- Resistive effects in type II superconductors near upper critical field examined, using Ginzburg-Landau equations 20 p3616 A66-37374
- Stimulated two quantum radiation in optical range for transitions occurring between discrete levels of impurity crystals or free atoms 20 p3577 A66-37377
- Eigenvalues and eigenfunctions of spin Hamiltonian and matrix elements of spin operator of ruby 20 p3578 A66-37584
- Gas pressure effect on excitation of 4.38-eV level in Pb during hollow cathode discharge in magnetic field 20 p3579 A66-37780
- Photodissociation laser system, discussing output energy dependence on pressure, temperature and number of successive optical pumping flashes 20 p3579 A66-37781
- Chemical kinetics of electron plasma reactions, discussing energy states, ion-molecule reactions, charge transfer, transport properties, phase interactions, etc 21 p3702 A66-38448
- Photoionization efficiency curve for sulfur hexafluoride in wavelength region 1050 to 600 angstroms with Rydberg levels from electronically excited state 21 p3774 A66-38525
- Electrical properties of indium antimonide single crystals with noncompensated impurity concentration, determining position of deep-seated levels in forbidden band 21 p3799 A66-38929
- Degree of population inversion and inverse temperature measurement in medium 22 p3917 A66-39663
- Energy levels of rotationally hindered linear molecules calculated, using variational principle based on schroedinger-like integral equation 22 p3949 A66-39665
- Effective mass in nuclear deformational Hamiltonian calculated by asymptotic approximation method which is two orders of magnitude better than liquid drop model 22 p3951 A66-40422
- Spontaneous LF current oscillations in germanium with copper, with compensated energy levels under illumination, low temperatures and electric fields, noting formation of electric domains 22 p3966 A66-40833
- Counting rate statistics and energy levels of optical photons in electron photon cascade in cooled mercury atoms 22 p3951 A66-40893
- Free-atomic pseudopotentials, sizes, s-p splittings and pseudowave functions 22 p3951 A66-40910
- Hydrogen excitation mechanism in surge prominences determined, using stationary equations for energy levels of hydrogen 23 p4126 A66-41076
- BCS model extended to intermediate and strong-coupling superconductors effective interaction strength as function of absolute-zero energy gap, phonon-frequency cut-off and Fermi surface density of states 23 p4113 A66-41376
- Hartree-Fock parameters for intermediate coupling compared with those obtained from observed energy levels for C I sequence 23 p4130 A66-41814
- 3 cm hydrogen line from solar flares, estimating line-to-continuum ratio during flare 23 p4124 A66-41928
- Energy levels and wave function of hole in field of two acceptor ions and nearest ion donor for p-type Ge and Si 24 p4255 A66-42496
- Energy levels and wave function of hole in field of two acceptor ions and nearest ion donor for p-type Ge and Si, noting numerical results 24 p4255 A66-42498
- Parametric phenomena in ferromagnetics, noting parametric excitation of quasiparticles and stationary state of excited waves 24 p4256 A66-42522
- Superconductivity model with exact solution, determining energy levels, ground state energy, excitation spectrum, density variations, etc 24 p4259 A66-43088
- Anomalous circular polarization of hydroxyl radical 18-cm radiation from cosmic sources 24 p4272 A66-43188
- ### ENERGY LOSS
- Energy dissipation of acoustic waves propagating in liquid medium and producing cavitation 01 p0106 A66-10417
- Average energy loss per ion pair of low energy nitrogen and oxygen ions in nitrogen, argon and helium 01 p0107 A66-11096
- Dissipation and stability analysis effect on limitation of energy accumulation 02 p0261 A66-11809
- Electron energy and momentum dissipation in n-type InSb at low temperatures, discussing collision effects on hot electron escape 02 p0276 A66-12079
- Ideal energy dissipating mechanisms to synthesize weight or mass index in terms of pertinent design indices, structural efficiency and material efficiency parameters 03 p0436 A66-12753
- Drain currents from iron and copper ion accelerator electrodes of ion engine as functions of cesium flux, temperature, voltage difference and oxygen pressure [AIAA PAPER 64-686] 03 p0416 A66-12782
- Forced discontinuous oscillations of fluid in pipeline, discussing energy dissipation effects in LF range 04 p0509 A66-13556
- Small amplitude LF waves in ionosphere covering momentum and energy dissipation, zero temperature plasma and waves in nonuniform plane-stratified medium 04 p0516 A66-13961
- HF electrodeless discharge in argon and krypton at high pressure noting energy radiation losses, electron density and plasma temperature 06 p0919 A66-16873
- Accuracy of calculation of energy losses by fast muons, considering cases of bremsstrahlung, direct pair production and nuclear cascades 07 p1117 A66-17567
- Muon detection and energy determination in multilayer system of ionization chambers and probability of finding muon in n-electron shower at depth t 07 p1117 A66-17569
- Slow instability caused by dissipation of negative oscillation energy in mirror-type plasma-containment device 07 p1089 A66-17959
- Energy losses at input of superconducting coil in type of magnetic flux pump designed by H. L. Laquer 08 p1268 A66-18676
- Particle distribution and motion in field of force, discussing density profile, energy dissipation, Coulomb charge shielding for local thermodynamic equilibrium and free orbital motion 08 p1261 A66-18743
- Magnitude of Compton effect of nuclear reactor operation in space 08 p1254 A66-19593
- RF losses in lead and niobium investigated for possibility of constructing superconducting linear accelerator 09 p1416 A66-20026
- Formation and expansion of electromagnetic shock waves in communication lines, using ferroelectric crystals 09 p1344 A66-20346
- Plasma oscillation of valence electrons and

exciton in alkali halides, measuring differential cross section, dispersion relation and loss peak in 09 p1430 A66-20844

Biological changes due to microwave absorption, examining energy losses due to ion conductivity and dielectric losses due to polarization relaxation in water molecules 09 p1336 A66-20931

Fluctuations effect in energy dissipation on shape of turbulence characteristics in inertial interval, using successive division of cubes 10 p1522 A66-21237

Energy dissipation of acoustic waves propagating in liquid medium and producing cavitation 11 p1735 A66-22601

Losses and overheating temperature dependences in toroidal coils with various core configurations 11 p1667 A66-22792

Rate of effusion for gas flow through orifice and application to fluorine gas dissociation energy 11 p1688 A66-22880

Electron beam pumped lasers, discussing energy dissipation in fast electrons passing through crystal, laser semiconductor characteristics, etc 11 p1715 A66-23433

Thermionic energy converter energy loss through resonance emission and excited atom diffusion, accounting for de-excitation at electrodes 12 p1922 A66-24219

Absorption of longitudinal ultrasonic waves in superconductors containing impurity atoms, noting entrainment effect role in energy dissipation of waves 12 p1929 A66-24453

Structural constant of temperature fluctuations in atmosphere determined by methods involving turbulent energy dissipation velocity and velocity distribution probability 12 p1875 A66-24871

Cooling of stellar material by thermal conduction under solar atmospheric conditions in presence and absence of magnetic field 13 p2174 A66-25618

Radiative energy losses for charge moving in magnetoactive plasma with random electron density inhomogeneities 13 p2148 A66-26038

Laser oscillation and energy losses in medium containing active molecules 13 p2093 A66-26043

Rotational excitation of oxygen by slow electrons, calculating electron energies, quadrupole moments and energy loss rates 13 p2135 A66-26270

Field separation of ground transmitter into ordinary and extraordinary modes when traversing lower boundary of anisotropic ionosphere, noting effect of incidence angle, magnetic azimuth, etc, on energy dissipation of VLF ground wave 14 p2238 A66-27613

Estimate of energy dissipation in metals, using continuous distribution of oscillating dislocations joined with Zener thermoelastic effects 14 p2315 A66-27658

Laminar flow of incompressible fluid in rectangular channel, determining temperature distribution over channel cross section and thermal flux through wall for case of energy dissipation 14 p2415 A66-28317

Electron gas electroconductivity relaxation time and energy loss in n-type InSb at cryogenic temperatures 15 p2558 A66-28611

Energy dissipation channels of nuclear and electron components of cosmic rays in Galaxy and Metagalaxy 15 p2576 A66-29131

Dynamic dissipation of magnetic field, examining mechanism by which magnetic energy is converted directly into fast particle energy 15 p2576 A66-29132

High energy muon energy spectrum, energy loss rate, primary nucleon energy spectrum and inelasticity fluctuations 15 p2587 A66-29571

Spectral energy loss rate of cosmic ray muons measured in plastic scintillator 15 p2589 A66-29587

Power dissipation in input and output matching networks of varactor doubler for calculating true input and output powers from semiconductor bulk material, noting charge storage occurrence 15 p2466 A66-29674

Induction drag of long cylindrical satellites and Alfvén waves emitted from them determining potential and current distribution and effect on energy loss [AIAA PAPER 66-478] 16 p2799 A66-30523

Servomechanism design, noting optimum response parameters, physical characteristics as functions of inertia, external force, energy dissipation, kinetic energy for operation, etc 16 p2671 A66-31062

Energy dissipation due to deformation of magnetic field in compressible conducting medium near zero field lines 16 p2762 A66-31182

Structural resonant amplitude reduction for increased fatigue life and component malfunction reduction, noting application of internal damping, and use of viscoelastic materials 16 p2715 A66-31201

Thick lithium drifted semiconductor silicon detectors for investigation of fluctuations of energy loss by high and intermediate energy particles 16 p2755 A66-31389

Crash and ballistic protective flight helmets, noting use of improved energy dissipating materials 17 p2863 A66-32146

Amplitude dependence of energy dissipation due to internal friction in metals and alloys of various lattice types under near-resonance loading 17 p2940 A66-33228

Ionization potential, dissociation energy and electron affinity for molecular oxygen 18 p3137 A66-33989

Optical frequency breakdown threshold of inert gas mixtures, using focused beam radiation from Q-spoiled neodymium laser 18 p3138 A66-34236

Electron energy loss spectra of Ge and Si in amorphous, polycrystalline and monocrystalline form 18 p3159 A66-34710

Elastic dissipation of Earth torsional modes estimated by generalized elastodynamic equation 18 p3108 A66-34734

Cosmic ray modulation by solar wind fields noting transit time, energy loss and time variations 18 p3175 A66-34743

Unifield field theory equation for energy loss rate of charged particle moving in plasma, considering screened Coulomb potential and dielectric permeability 18 p3150 A66-34937

Extensive air showers /EAS/, discussing lateral distribution function variation with atmospheric density, primary energy dissipation, shower front radius of curvature, etc 18 p3211 A66-35133

Calculations of energy loss of relativistic charged particles in dielectric media compared with mass operator and perturbation theory calculations and with oxygen experiment 18 p3221 A66-35201

Relationship between depth intensity curve and energy spectrum of muons at sea level, considering fluctuations in energy losses 18 p3222 A66-35207

Energy losses of relativistic muons in electromagnetic interactions, noting influence of atomic electrons on bremsstrahlung 18 p3222 A66-35208

Total energy loss in weakly irregular multiwave waveguide accounted for by energy losses in weakly damped waves 19 p3311 A66-35308

Fluctuations effect in energy dissipation on shape of turbulence characteristics in inertial interval, using successive division of cubes 19 p3341 A66-35859

Role of particle channeling in affecting results from crystal-line detectors used for charged particle and nuclear scattering 19 p3359 A66-35912

Self-oscillations of pulse type extremum system with plant having extremal characteristics shaped by multiplication of two coordinates 19 p3325 A66-35985

Low temperature optical fluorescence of ruby and vanadium doped magnesium oxide in which vibronic sideband intensity near sharp R line is measured as function of energy separation from no-phonon R line 19 p3446 A66-36395

Collective interactions of charged particle beams with plasma produced by electron beam, noting power loss of electron beam coincides with power of HF oscillations caused by interaction 19 p3416 A66-36524

Plasma energy loss distribution over linear surface during discharge in Tokamak TM-2 toroidal chamber measured by germanium bolometric probe 19 p3428 A66-36576

Green formula and moment functions, predicting rate of radiative energy loss from

boundaries of absorbing-emitting slab or sphere 19 p3479 A66-36597

Absorption of longitudinal ultrasonic waves in superconductors containing impurity atoms, noting entrainment effect role in energy dissipation of waves 20 p3619 A66-37685

Weak shock wave structure in viscous heat-conducting fluid, accounting for dissipation of energy during one-dimensional flow 21 p3723 A66-38587

Energy dissipation effect on panel vibration damping due to structural joints 21 p3827 A66-38693

Attitude stability of satellite composed of two elastically connected rigid bodies with energy dissipation treated by Routhian array method 21 p3818 A66-38694

Rotating spacecraft attitude changes due to energy dissipation from angular deformation treated by modal method 21 p3819 A66-38844

Electric field distribution in plane-parallel layer of electron-ion plasma situated in external electric field normal to walls, deriving energy losses by kinetic theory 21 p3782 A66-39015

Electromagnetic wave excitation in magnetoplasma by external currents using kinetic theory, obtaining expression for energy losses, analyzing electron and ion cyclotron resonance 21 p3782 A66-39016

Energy loss of charged particles during passage through weakly turbulent plasma in magnetic field with HF oscillations 22 p3952 A66-39751

Structural constant of temperature fluctuations in atmosphere determined by methods involving turbulent energy dissipation velocity and velocity distribution probability 22 p3912 A66-40332

Penetration resistance of fiberglass-reinforced plastics against small-caliber projectiles noting relations between energy loss, stopping power and plate thickness 22 p3938 A66-40433

Thermionic energy converter energy loss through resonance emission and excited atom diffusion, accounting for de-excitation at electrodes 22 p3957 A66-40583

Quantum mechanical picture of additive interrelation between signal and thermal noise, noting energy loss 23 p4035 A66-41049

Angular variation of position of energy loss maxima in indium 23 p4110 A66-41180

Vertical wind gradient variation and energy variation at height ranging from 80 to 140 km and relation to gravity waves and upper atmosphere turbulence 23 p4066 A66-41849

Neutrino energy losses from vibrating neutron stars, noting density profiles 23 p4131 A66-41863

Injection electroluminescence in AlAs-GaAs as p-n junction diodes of graded energy gap 24 p4251 A66-42300

Rotating body in vacuum, examining motion dependency on body configuration and kinetic energy distribution, noting effect of change in energy on motion 24 p4281 A66-42337

Integral equation of flat-roof resonator solved by iteration method, deriving mode patterns, phase shifts and power losses 24 p4174 A66-42807

Vanishing of sliding in mechanical systems with dry friction 24 p4218 A66-42844

Ultrarelativistic muon electromagnetic interaction energy loss due to bremsstrahlung and pair production 24 p4271 A66-42936

Focusing molecules in states losing energy with applied field, using alternate gradient technique 24 p4239 A66-43037

Spin-spin interaction energy for large separations of two ground state hydrogen atoms 24 p4239 A66-43040

Magnetic losses in superconductors at radio frequencies analyzed in terms of energy dissipation model at local flux trapping centers 24 p4260 A66-43177

**ENERGY METHOD STRESS CALCULATION**

Fracture of metals at different loading conditions by energy analysis of plastic deformation and fracture 06 p0963 A66-16465

Energy method for analysis of lowest mode symmetrical buckling of thin shell shallow spherical caps and cylindrical arches under blast loading 15 p2610 A66-29291

Plastic deformation problems for metals

- solved by energy method 15 p2510 A66-29782
- Energy method application to buckling of axially compressed cylindrical shells with ring-stiffened edges, noting upper and lower bounds and critical rigidity ratio 23 p4140 A66-41912
- Energy method applied in determining upper bounds on displacements due to static and dynamic loading 24 p4288 A66-42273
- ENERGY REQUIREMENT**
- SA METABOLISM**
- Energy calculation as time function required to switch toroidal ferrimagnetic core from one remanent state to another, considering core type used in antenna phased arrays 05 p0642 A66-14564
- Cosmic ray particle interaction at hundred bev range, discussing parameters of inelasticity for collision with nucleus 07 p1113 A66-17538
- Variation of critical energy for direct initiation of cylindrical detonation waves as function mixture composition and initial pressure 10 p1622 A66-21830
- Locomotion energy requirements for lunar surface vehicles, noting parameters affecting requirements, resistance factors, etc [SAE PAPER 660149] 12 p1858 A66-24530
- Existence of inflection points in cost vs terminal time curve for linear minimum energy regulator 19 p3339 A66-36745
- ENERGY SOURCE**
- Gas clouds in dense star clusters compared with quasar properties, analyzing possible energy sources like supernova explosions, stellar collisions and star gas interaction 01 p0137 A66-10494
- Strongly nonlinear vibrating system interaction with energy source of limited capability 01 p0159 A66-11172
- Clear air turbulence, considering energy source by transfer from large to small flow in gravity wave spectra, noting shear role and motion equations 10 p1552 A66-21289
- Reliability, durability and reduction of failure probability in radioisotope energy source design 13 p2085 A66-25285
- Possible use of IR radiation to improve visibility through fog, including atmospheric attenuation effects and radiant energy source 16 p2740 A66-30088
- Sufficient condition for stability of linearly viscoelastic continuum subjected to surface tractions following partial deformation of solid are nonconservative and associated with energy source 19 p3401 A66-36302
- Solar neutrino detection, discussing energy generation processes in Sun 19 p3454 A66-36793
- Dynamic instability in linear vibrating system when linked to unlimited energy reservoir 21 p3825 A66-38577
- Shell immersion in moving fluid under vibrations which can be damped or amplified, analyzing instability due to fluid constituting energy reservoir 21 p3825 A66-38578
- Delayed energy produced by fission product decay when restart of nuclear rocket engine is considered, noting effects of cooldown requirements [AIAA PAPER 66-551] 22 p3946 A66-39676
- Nighttime electron temperatures in upper F region suggest corpuscular energy input 23 p4064 A66-41682
- Bipolar Ni-Cd cells for ruby lasers and power sources to yield high energy pulses for firing pyrotechnic devices 23 p4022 A66-41760
- Methanol-air fuel cells as long-life sources of energy for lighted buoys, TV stations, meteorological stations, etc 24 p4161 A66-42501
- ENERGY SPECTRUM**
- Intensity and energy spectra of low energy primary cosmic ray protons determined aboard Imp-I satellite 01 p0132 A66-10601
- Energy spectrum of cosmic ray muons measured for data on nuclear interactions and characteristics of primary cosmic radiation 03 p0417 A66-12319
- Energy gap and thermoconductivity of normal and superconducting fcc lanthanum 03 p0407 A66-12320
- Injun I and III particle observations discussing methods and results on fast electrons, particle counters, energy separation, spectra, flux variation, angular distributions, etc 03 p0363 A66-12647
- Charged particles in auroral zone, measuring energy and pitch angle distribution of electrons and protons with rocket mounted solid state detectors 03 p0417 A66-12653
- Analysis of 3587 tau-meson decays in emulsion stacks, comparing experimental pion energy spectra with theory 03 p0395 A66-12697
- Cosmic ray helium nuclei along with heavier nuclei, traverse interstellar and interplanetary matter propagation in space and slope of energy spectrum 03 p0423 A66-12927
- Data concerning energy spectra of protons, alpha particles and middleweight nuclei in solar flares indicating similarity of spectra 04 p0574 A66-13838
- Diatom molecules, discussing interrelation between vibrational relaxation and thermal dissociation 04 p0597 A66-13878
- Low energy spectrum of cosmic rays corrected for solar modulation and diffusive passage through interstellar matter 04 p0574 A66-14014
- Quantum effects in theory of space charge layer in semiconductors, noting electron and hole density 04 p0570 A66-14366
- Presence of suspended particles leads to more rapid attenuation of pulsations in final stage of degeneration of isotropic turbulence 04 p0512 A66-14436
- Isotropic photon gas interacting with electron plasma with Maxwellian distribution via Compton effect 05 p0722 A66-14721
- Rocket measurements of energetic particles discussing electron fluxes, energy spectra, angular distribution and data 05 p0745 A66-14777
- Rocket measurement of energetic particles discussing proton flux, energy spectra, pitch angular distribution and data 05 p0746 A66-14778
- Solar cosmic ray generation, discussing proton energy spectrum analysis and wave propagation in interplanetary space 05 p0751 A66-15374
- Spectrum of primary cosmic radiation determined for ultrahigh energies, based on international data on electron and meson air showers 05 p0753 A66-15390
- Primary cosmic rays of superhigh energy using extensive air shower data, noting Geiger-Muller counters, scintillation counters and muon detector 05 p0753 A66-15391
- Energy spectrum of variations in cosmic ray intensity and changes in spectrum with decreasing solar activity calculated for additional particle flux 05 p0754 A66-15399
- Flux and energy spectrum of primary electron component measured by balloon at period near solar activity minimum 06 p0944 A66-16075
- Primary cosmic radiation, discussing variations of time and space of intensity, energy spectrum and chemical composition 06 p0947 A66-16573
- Nuclear emulsions exposed for several days in recoverable satellite scanned for ending tracks of cosmic ray particles, obtaining energy spectra for various nuclei 07 p1111 A66-17464
- Nuclear interaction at high energies, discussing active component structure ionization calorimeter application, energy spectrum of particles, etc 07 p1113 A66-17536
- Pl-meson momentum spectra, discussing production frequency and mechanism in hundred bev range 07 p1113 A66-17537
- Energy spectrum shape and absolute abundance of nuclear active particles at low altitude determined, using ionization calorimeter, plotting angular distribution of particles 07 p1115 A66-17551
- Nuclear active particles analysis by observing integral spectrum of ionization bursts under thick layer of dense material at low altitudes 07 p1115 A66-17554
- Polarization of cosmic ray muons with various residual energies, using hodoscopes and Wilson chamber 07 p1117 A66-17565
- Compton scattering of laser photons, noting transformation into gamma radiation photons upon collision with high energy electrons 07 p1044 A66-17816
- Responses of cubical meson telescopes and neutron monitors, at equatorial and high latitude stations, to anisotropy with different assumed spectrum and latitude dependence 07 p1125 A66-18005
- Frequency distributions of characteristics of daily variation of cosmic ray intensity with solar activity from 1958 to 1962 07 p1125 A66-18006
- Galactic cosmic ray modulation by interplanetary plasma, deriving by method of best fit, direction and energy spectrum of anisotropy outside of geomagnetic field 07 p1128 A66-18020
- Rigidity and energy spectra of primary cosmic rays in nondisturbance and disturbance periods during past 12 years 07 p1128 A66-18021
- Temperature changes in entire atmosphere and effect on diurnal variation of meson component of cosmic rays 07 p1129 A66-18025
- Mariner II solar wind measurements including data on Venus electromagnetic radiation, space magnetic fields and charged particles, energy spectra, solar plasma, etc 07 p1130 A66-18077
- Day-to-day changes in energy spectrum of daily variation of cosmic ray intensity at middle latitude and equator for IGY 07 p1131 A66-18236
- Energy spectrum of current carriers in germanium telluride, investigating electrical properties of polycrystalline and single crystal samples 07 p1105 A66-18376
- Self-consistent-field type perturbation theory for stationary and homogeneous turbulence to determine energy spectrum and response frequencies 08 p1204 A66-18531
- Effect of fast states with discrete energy levels and quasi-continuous spectrum on capacitance of silicon dielectric film-metal structure 08 p1274 A66-19308
- X-ray spectral analysis of chemical bond structure in aluminum semiconductor compounds 08 p1274 A66-19311
- Momentum spectrum of cosmic ray muons determined as function of zenith angle 08 p1286 A66-19834
- Nuclear spin relaxation in superconducting gallium measured by nuclear quadrupole resonance in zero magnetic field, using pulsed nuclear induction spectrometer 09 p1420 A66-20047
- Theoretical energy spectrum for galactic cosmic radiation based on experimental solar cosmic ray data 09 p1437 A66-20204
- Ultrahigh energy primary cosmic ray energy spectrum calculated from EAS particle-number spectrum 09 p1437 A66-20206
- Energy dependence of transparency of walls of transition region shell obtained from Forbush effects, in connection with cosmic ray intensity 09 p1439 A66-20221
- Source energy spectrum of solar XUV produced photoelectrons in ionosphere 09 p1372 A66-20382
- Thermal emf quantum oscillation and quantization of electron energy spectrum of n-InAs 09 p1429 A66-20768
- Electron energy spectrum measurements by Cosmos V satellite, noting concentration and intensity at various geographic areas 09 p1378 A66-21010
- Soft electron fluxes in upper atmosphere measured, using open type secondary electron multiplier ejected in container from rocket 09 p1443 A66-21012
- Energy spectrum of auroral zone X-rays, noting electron precipitation and diurnal pattern for occurrence of bremsstrahlung 10 p1599 A66-21145
- Optical properties of indium oxide, noting direct and indirect transitions in thin films and crystal plates, absorption coefficient as function of photon energy, etc 10 p1577 A66-21560
- Plasma sheath properties near discharge tube anode, noting relation of electron current distribution along discharge radius and ion energy spectrum to pressure 10 p1558 A66-21999
- Energy spectrum of electrons recorded by fluorescent screen indicators onboard Cosmos satellites, noting ratio of electron intensities 11 p1763 A66-23042
- Flux and energy spectrum of low energy cosmic ray protons, noting rocket measurement results and analogy to solar flare spectrum 11 p1764 A66-23059
- Total counting rate and detected

multiplicity spectrum of standard IGY neutron monitor analyzed on basis of neutron production and cosmic radiation components 11 p1765 A66-23144

Primary cosmic ray energy spectrum, including primary flux of protons and heavier nuclei, and EM cascade pair production rates 11 p1765 A66-23192

First order wave function of helium due to one-and two-electron excitation determined by solving differential equations, noting contribution to second order energy 11 p1741 A66-23405

Measurement of differential energy spectra of protons, helium nuclei and heavy nuclei by cosmic radiation telescopes mounted on POGO and Pioneer satellites 12 p1877 A66-23684

Gamma ray spark chamber with photographic recording for manned satellites, determining energy spectrum 12 p1877 A66-23688

Lens technique for measuring yield and energy spectrum of secondary electrons generated by fission fragments through metal foil 12 p1916 A66-23704

Hot-wire anemometer measurement of turbulent velocity fluctuations in air flow and energy spectrum and correlation analyses 12 p1880 A66-23846

Interaction potential of inert gases defined in terms of transport properties, noting contribution of nonadditivity to static lattice energy 12 p1917 A66-23936

Solar wind and geomagnetic storm effects on galactic cosmic ray 11-year variations and energy spectrum, from neutron monitor data 12 p1940 A66-24160

Abrupt increase in cosmic ray intensity coinciding with presence of Forbush effects, noting dependence on geographic latitude and cut-off rigidity, obtaining energy spectra 12 p1941 A66-24168

Stratospheric recordings of solar cosmic rays from chromospheric flares, calculating and comparing diffusion coefficient of cosmic rays and energy spectrum of solar protons 12 p1943 A66-24281

Energy spectra of ions emitted by beryllium, carbon and molybdenum heated by laser 13 p2131 A66-25479

Ionization calorimeter for measuring primary cosmic ray components, discussing nuclear interactions, energy spectra, EM cascades, etc 13 p2175 A66-26011

Photoluminescence for p-and n-type gallium arsenide as function of exciting light intensity, noting minority carrier recombination mode, electron energy spectrum, etc 13 p2169 A66-26187

Electrons from linear accelerator directed in collimated beam at normal incidence upon thick targets of various materials, obtaining energy spectra of retrofugal electrons 13 p2136 A66-26280

Primary cosmic ray charge and energy spectra for helium through oxygen during 1965 minimum solar modulation effect 13 p2175 A66-26348

Electron acceleration near Earth bow shock measured, using Explorer XVIII satellite, noting solar wind effect, energy spectrum in radiation belt and magnetospheric boundary, etc 13 p2175 A66-26355

Modulation theory, discussing phase-envelope relation for band limited wave in terms of Fourier series 14 p2234 A66-27032

Energy spectrum of input and output of linear multichannel summing system of delayed stochastic signals 14 p2264 A66-27243

Thermal emf quantum oscillation and quantization of electron energy spectrum of n-InAs 14 p2361 A66-27303

Diurnal variation of average energy spectrum of auroral X-rays observed from balloon flights, assessing effect of atmospheric absorption 14 p2376 A66-27614

Quantum effects in theory of space charge layer in semiconductors, noting electron and hole density 14 p2369 A66-28265

Transmission energy spectra of 1-mev electrons with normal incidence on Al slabs measured in terms of transmission angle 15 p2543 A66-28715

Electron energy losses in diamond, noting correlation between plasma excitation energy and interband transition energies 15 p2564 A66-28876

CW IR laser oscillation in atomic Cl in HCl and HI gas discharges, noting use of two power supplies and energy level diagram 15 p2513 A66-28880

Energy spectrum of primary photoelectron, using data from atmospheric density distribution, fluxes of solar XUV radiations and absorption and ionization cross sections 15 p2574 A66-28906

Relation between frequency spectrum of pulsations in auroral luminosity and energy spectrum of auroral electrons, using photometer 15 p2489 A66-29235

Extensive air showers - International Conference on Cosmic Rays, Jaipur, India, December 1963 15 p2577 A66-29513

Energy spectrum of high energy cosmic rays from EAS observations 15 p2578 A66-29517

Energy spectrum and arrival directions of high energy primary cosmic rays 15 p2578 A66-29518

Extensive air showers at various atmospheric depths analyzed, using hodoscope counters and ionization chambers, noting differential spectra of densities 15 p2580 A66-29528

Collision cross sections of high energy nucleon-nucleon interactions in nuclear emulsion 15 p2583 A66-29545

U.S.S.R. accelerator experiments in high energy nuclear interaction cross section and inelasticity, primary and secondary cosmic ray particle energies, charged nuclear-active particle energy spectra, momenta measurements, etc 15 p2545 A66-29549

High energy primary cosmic radiation research at Bristol, England, including energy spectra for nuclear interactions, nuclear emulsion stack measurements, alpha production, etc 15 p2583 A66-29550

Energy spectra of atmospheric alpha rays at balloon altitude and of alpha rays from graphite nuclear interactions 15 p2583 A66-29551

Cosmic ray showers, discussing high energy interactions of nuclear active particles, intensity and energy spectra of gamma rays and muons, young air showers, ionization bursts, etc 15 p2584 A66-29555

Nuclear interaction characteristics in brass and carbon, noting production by neutral and charged cosmic ray particles, observation methods, energy spectrum, etc 15 p2585 A66-29560

High energy muon energy spectrum, energy loss rate, primary nucleon energy spectrum and inelasticity fluctuations 15 p2587 A66-29571

Cosmic ray intensities underground and energy spectrum of cosmic ray muons at sea level, tabulating depths, operation time, angular distribution, telescope aperture, etc 15 p2587 A66-29572

Cosmic ray measurements, muon production from decay of charged pions and kaons, muon polarization, momentum spectra, atmospheric gamma cascades and derivation of kaon/pion ratio 15 p2587 A66-29573

Particle number fluctuation in electron-photon shower, influence on spectrum of bursts produced by high energy mu mesons under thick filters 15 p2589 A66-29585

Variation of most probable muon energy loss with momentum, noting density effect and decrease in ionization loss 15 p2589 A66-29586

Sea-level spectra of nuclear interactions of muons over 1000 gev compared with observed underground range spectra 15 p2590 A66-29596

Energy spectra of muons and neutrino production from cosmic gamma rays 15 p2547 A66-29597

Energy spectra of neutrinos from secondary cosmic-ray decay in Earth atmosphere 15 p2590 A66-29646

Flux and energy spectra of primary cosmic X and gamma rays between 20 kev and 1 mev from balloon-rocket measurements 15 p2591 A66-30020

Role of corpuscular radiation in lower ionosphere formation, noting charged particle flux, energy spectra, etc 15 p2591 A66-30024

Polar glow aurora, discussing optical emissions generated by solar cosmic ray protons and alpha particles, energy spectrum, atmospheric and ionospheric absorption effect, etc 15 p2492 A66-30026

Solar flare analysis by examination of high energy gamma rays, noting solar proton and solar material interaction, energy spectrum, generation of fast protons and alpha particles, etc 15 p2592 A66-30076

Flux of low energy heavy primary nuclei obtained by slicing emulsion method, using recoverable satellite during minimum solar activity period 15 p2592 A66-30077

Diatom gas flow past blunt bodies, noting effect of oscillation and dissociation relaxation on mean energy 16 p2627 A66-30100

Three quantum decay of super 1S sub zero state positronium determined via measurement of three quantum coincidence events in Al and oxygen with energy sum of 1.02 Mev 16 p2750 A66-30132

Long-range interatomic forces from thermal energy spectra, elastic scattering cross sections for atomic beams and limiting curve of dissociation 16 p2751 A66-30161

Telescopic measurements of primary energy spectra and abundances of He 3 and He 4 in galactic cosmic radiation 16 p2793 A66-30198

Energy spectra of electrons and protons in islands at back of magnetosphere compared with electron fluxes observed by satellites, noting similarity between particles in islands and those in aurora 16 p2695 A66-30714

Adiabatic deceleration effect on cosmic ray spectrum, noting particle momentum and energy change, diffusion coefficient independent of energy, etc 16 p2795 A66-30924

Quasi-linear theory of plasma cyclotron instability for one-dimensional oscillation spectrum, noting energy of interaction with electromagnetic field, ion velocities, etc 16 p2762 A66-31172

Energy spectrum of neutral hydrogen atoms from coaxial plasma gun 17 p2962 A66-31823

Laboratory work on comets, discussing spectroscopic data, incompleteness of knowledge of dissociation energies and ionization potentials, etc 17 p3012 A66-33400

Differential rigidity spectra model of nuclear component of primary cosmic radiation under various environmental influences 17 p2994 A66-33431

Theta pinch discharge study of four times ionized nitrogen /N V/ spectrum 18 p3136 A66-33628

Explorer XVIII plasma flux measurement data analysis, plasma detector, map of transition zone between magnetosphere and solar wind and associated energy spectra 18 p3168 A66-34351

High energy X-ray spectrum from Crab Nebula at photon energies up to 90 kev 18 p3170 A66-34529

Balloon experiment for measurement of secondary gamma spectrum in 100-2000 mev range, using lead scintillator sandwich spectrometer 18 p3171 A66-34708

Charged Bose gas, discussing ground-state energy, excitation spectra and plasmon-particle interactions, using Bohm-Pines and Bogoliubov approximations 18 p3140 A66-34729

Primary cosmic ray energy spectrum measurements via Proton I satellite, noting inelastic interaction cross sections, chemical composition, etc 18 p3175 A66-34746

Electron-positron components of primary cosmic radiation, noting energy spectrum, flux, charge composition, origin, etc 18 p3176 A66-34748

X-ray and gamma ray astronomy, discussing observational methods, physical processes of generation, radiation intensity, etc 18 p3176 A66-34749

Energy characteristics of 11-year cosmic ray variations, evaluating electromagnetic conditions in interplanetary space for proton, alpha particle and electron variations in energy regions 18 p3176 A66-34752

Explorer XVIII satellite measurements of proton energy spectra in region corotating with Sun, noting modulation of galactic cosmic radiation and source of continuous particle accelerations 18 p3177 A66-34754

- Composition of cosmic rays of supernova origin, noting limited mixing and enrichment of elements of outer layer with thermodynamically synthesized core substances due to shock acceleration 18 p3177 A66-34755
- Galactic acceleration and solar modulation of cosmic rays examined via energy spectrum of galactic electrons, estimating Fermi acceleration, low energy electron flux, etc 18 p3177 A66-34756
- Galactic X-ray energy spectrum noting equipment used, shape of spectra in terms of thermal radiation intensity, etc 18 p3177 A66-34757
- Generically related cosmic ray spectrum explaining variations in abundance ratios of helium isotopes and light to medium elements in terms of solar and geomagnetic modulation 18 p3178 A66-34758
- Galactic evolution examined, using luminosity and volume emissivity diagrams 18 p3178 A66-34760
- Solar and sidereal daily variations of cosmic ray intensity at depth of 60 mwe underground in London 18 p3178 A66-34763
- First-order modulation effects of galactic cosmic radiation, considering hysteresis effect and variation of energy spectrum in 1-yr modulation 18 p3186 A66-34811
- Flux and energy spectrum of primary electron component measured by balloon at period near solar activity minimum 18 p3187 A66-34814
- Electron component of primary cosmic radiation at energies greater than or equal to 15 gev studied, using nuclear emulsion stack 18 p3187 A66-34818
- Electrons, hydrogen and helium nuclei of cosmic radiation as observed in 1964 at average residual pressure of 2.4 mb compared with 1.8 mb obtained in 1963 18 p3187 A66-34819
- Rocket and balloon measurements of fast neutron intensity at high altitude from detectors flown in 1964 and 1965 18 p3188 A66-34823
- Energy spectrum of primary helium nuclei at energies greater than 6 gev 18 p3189 A66-34826
- Differential rigidity spectrum of alpha particles for R less than 2.5 gv at solar minimum 18 p3189 A66-34827
- Low energy galactic cosmic radiation studies by high altitude balloon flights carrying nuclear emulsions, including solar activity, energy and intensity spectra, etc 18 p3189 A66-34829
- Solar modulation and time variation of differential energy spectrum and flux of primary helium nuclei in 30 to 90 mev/nucleon energy range 18 p3190 A66-34832
- Chemical abundances and energy spectra of nuclei in galactic radiation measured in interplanetary space by OGO-I satellite 18 p3190 A66-34833
- Nuclear emulsion stack investigation of composition and differential energy spectra of primary cosmic ray heavy nuclei fluxes 18 p3191 A66-34837
- Balloon-borne Cerenkov scintillation counter measurements of energy spectra of primary cosmic radiation heavy nuclei at various geomagnetic latitudes 18 p3191 A66-34840
- Landau-Symon theory extension, semiconductor telescopes in primary cosmic particle charge and energy spectrometry, and capabilities of Si as cosmic particle detector 18 p3114 A66-34844
- Skyhook balloon flight Geiger counter cosmic ray monitor measurements of energy and charge spectra of galactic rays at solar minimum 18 p3192 A66-34847
- Energy spectrum of cosmic ray diurnal variation determined from IGY neutron monitor data by introducing upper energy cut-off parameter 18 p3195 A66-34864
- Plasma sheath properties near discharge tube anode, noting relation of electron current distribution along discharge radius and ion energy spectrum to pressure 18 p3140 A66-34976
- Plasmoid structure produced by coaxial plasma gun with interchangeable polarity electrodes, noting experimental setup, particle velocity, density, energy, etc 18 p3151 A66-35071
- Electron-photon and nuclear active components energy of young air showers measured by ionization calorimeter, determining inelasticity coefficient 18 p3206 A66-35100
- Ionization calorimetry of energy spectrum of leading particles in cores of EAS compared with data from model 18 p3206 A66-35101
- Stationary aspects of cosmic ray propagation through atmosphere explained by model calculating high energy nuclear active and muonic components of extensive air showers, presenting energy spectra 18 p3206 A66-35103
- High energy nuclear active particles in EAS discussing lateral and zenith angle distribution energy spectrum, anisotropy, etc 18 p3207 A66-35111
- Photoproduction, lateral density distribution, energy spectrum and muon component fluctuations in electron photon cascades 18 p3208 A66-35114
- Heavy cosmic ray primary energy spectrum from BASJE measurements 18 p3209 A66-35122
- Altitude variation of EAS particle density and primary energy/nucleon spectra measured with proportional counters 18 p3210 A66-35125
- High primary energy EAS composition, energy spectrum of nuclear active particles and high energy collisions 18 p3210 A66-35128
- Energy spectra of muon, electron and N components of extensive air showers /EAS/ 18 p3210 A66-35129
- Muon component of vertical and inclined extensive air showers, determining energy spectrum, lateral distribution at sea level and relation of mean height of origin and sea level energy 18 p3211 A66-35134
- Numerical calculations of lateral distribution, energy spectrum and heights of origin of muons in extensive air showers 18 p3211 A66-35135
- Energy spectrum, possible chemical composition and anisotropy of ultrahigh energy primary cosmic radiation 18 p3213 A66-35147
- Energy spectra of electromagnetic cascades produced by cosmic rays observed at balloon altitudes, using composite detector 18 p3216 A66-35169
- Energy spectra of nucleons, muons and gamma rays for truncated power law primary energy spectra calculated, using model for nucleon and meson production 18 p3217 A66-35174
- Relations between primary spectrum, pion multiplicity and sea level muon spectra, using integral equations 18 p3219 A66-35190
- Angular distribution and energy spectrum of cosmic particle showers at large zenith angles analyzed, using ionization calorimeter 18 p3220 A66-35196
- Relationship between depth intensity curve and energy spectrum of muons at sea level, considering fluctuations in energy losses 18 p3222 A66-35207
- Stack of nuclear emulsion exposed underground to analyze fast neutrons, obtaining energy spectrum of neutrons from measurements on hydrogen recoils 18 p3222 A66-35211
- Interaction between ultrahigh energy cosmic rays and neutrinos in universe, noting distortion of energy spectrum 18 p3224 A66-35220
- Energy spectra of muons and neutrinos generated by cosmic rays in dense objects without atmosphere analyzed in connection with nebulae problems 18 p3224 A66-35221
- Quark detection in cosmic rays noting flux dependence on mass, energy loss through ionization, production spectrum threshold, etc 18 p3225 A66-35231
- Semiempirical law for spectrum of wind velocity fluctuations and energy in lower layer of atmosphere 19 p3393 A66-35332
- Suggested origin of low energy tails in radiative recombination spectra due to degenerate conduction band 19 p3437 A66-35475
- Energy spectrum of auroral X-rays in range from 20 to 150 kev according to balloon measurements show remarkable diurnal variation 19 p3452 A66-35563
- Secondary ions energy spectra dependent on incidence angle of primary ions for varying escape angles, using molybdenum targets 19 p3403 A66-36454
- Low energy cosmic ray modulation relationship to observed interplanetary magnetic field irregularities in terms of diffusion, using space probes 19 p3454 A66-36765
- Statistical energy-and power-spectral correlation analysis of signals with nonintegrable spectra 20 p3512 A66-37149
- Energy spectrum of primary auroral electrons determined from vertical luminosity profiles of 16 auroral arcs 20 p3550 A66-37297
- Atomic energy levels in plasma, considering energy spectrum of hydrogen-like atom in plasma, based on cut-off Coulomb potential model 20 p3607 A66-37373
- Relativity theory application to space probes, discussing experimental verification, relevance to cosmological problems and utilization to particles with large energy and momentum 20 p3650 A66-37389
- Galvanomagnetic effect of anisotropic electron energy spectrum on acoustical branch perturbation spectrum of system of electrons and ions in homogeneous magnetic field 20 p3618 A66-37559
- Electron energy spectrum for alloyed semiconductors, determining state densities via Thomas-Fermi statistical method 20 p3618 A66-37562
- Anomalous high count of gamma rays from direction of constellation Cygnus associated with energy spectrum differing from spectrum of secondary gamma rays generated by cosmic rays 20 p3631 A66-37600
- Ionization due to alpha, beta and gamma radiation from ground and atmosphere in ground proximity, noting ion pair production rate and energy spectra 20 p3552 A66-37759
- Rocket instrumentation for galactic X-ray observation, noting scintillation counter, proportional counter and GM counter 20 p3636 A66-38237
- Low altitude measurements of trapped electrons, noting energy spectrum and longitudinal variations of electrons, including instrumentation 20 p3638 A66-38307
- Distribution of energetic protons in Earth radiation belt between 1962 and 1964, noting secular temporal changes, effects of magnetic storm and aspects of energy spectrum 20 p3638 A66-38312
- Vela satellite measurements of particles in solar wind and distant geomagnetosphere, noting measurement of energy spectra, flux density and directional distribution of positive ions in solar wind 20 p3639 A66-38315
- Trapped electrons from Russian high altitude nuclear detonation examined, noting energy spectrum and mirror point density distribution 20 p3643 A66-38342
- Fast-neutron irradiation effects on photoconductivity spectra and induced crystal structure defects for n-and p-type gallium arsenide single crystals 20 p3624 A66-38415
- Energy spectrum of semiconductor compounds with chalcopyrite structure analyzed, using perturbation theory, noting changes resulting from crystalline and spin-orbital interactions 21 p3799 A66-38923
- Mass and energy spectra of ions in Bostik-type plasma source studied by time-of-flight mass spectrometer 21 p3784 A66-39033
- Energy spectra of plasmoids produced in conical organic-glass plasma source, establishing various ions 21 p3786 A66-39041
- Energy spectra of fast particles of moving plasmoids obtained in Bostick plasma source examined by mass spectrometer 21 p3786 A66-39042
- Electron energy spectrum of silicon, examining effect of screw dislocations parallel to crystallographic direction 21 p3803 A66-39296
- Angular wind wave spectrum of deep ocean and variations in coastal zone, noting data on energy distribution of spectrum 21 p3760 A66-39362
- Expanding universe theory of hot ionized intergalactic gas and blackbody radiation and X-ray emission energy spectra 21 p3817 A66-39561

Energy spectrum of levels appearing in silicon single crystals irradiated by integral fluxes of fast electrons, neutrons and gamma quanta 22 p3964 A66-40193

Energy spectral density of ideal sonic boom pressure signatures and equations for HF and LF asymptotic spectral behavior 22 p3848 A66-40301

Fluxes, intensities and energy distributions of magnetically trapped electrons and fluxes of magnetically trapped protons at lower edge of radiation belt 22 p3974 A66-40557

Phase shift from scattering by atoms with attractive potentials, predicting virtual energy states for incident energies in three-turning point range 22 p3951 A66-40906

Radiation noise effect on laser optical properties, noting density vs resonator characteristics, energy spectrum, etc 22 p3933 A66-40917

Galactic radio sources noting disk model brightness distribution, relativistic particle energies, continuous particle acceleration and ratio between proton and electrical component of cosmic radiation 22 p3985 A66-40952

Parallel and transverse magnetic field effects on electric field induced optical absorption at photon energies below direct gap in Ge 23 p4109 A66-41036

Autocorrelation function and energy spectrum of radiotelegraph signal, noting channel parameter dependency on transmission speed 23 p4036 A66-41050

Monograph on electronic theory of heavily doped semiconductors covering energy spectrum, perturbation theory, absorption of electromagnetic waves, density states, etc 23 p4109 A66-41119

High energy gamma rays energy spectrum of solar flares, elucidating proton interaction with solar material 23 p4123 A66-41276

Automatic radio atmospherics recorder for simultaneous observation of waveform and energy spectrum 23 p4069 A66-41663

Spectral characteristics of turbulence in presence of mean velocity and temperature gradients 23 p4087 A66-41801

Spectral energy distributions of various quasi-stellar radio sources, using photoelectric spectrum scanner 23 p4129 A66-41806

Electron effective mobility variation in AC for small signals as function of operating frequency of thin film transistors and dielectric diodes 24 p4181 A66-42392

Pictorial representation of pulse-height energy spectra with two independent variables originating from experimental analyzer 24 p4172 A66-42490

Cosmic ray nucleon interaction with high energies, estimating transition probability and interaction cross section of baryon in passive state 24 p4263 A66-42519

Low energy proton measurements in magnetosphere using Mariner IV spacecraft 24 p4263 A66-42602

Flux and energy spectrum of low energy heavy nuclei of primary cosmic radiation measured by balloon-mounted nuclear emulsion stacks 24 p4264 A66-42608

Errors effect in determining primary energy on measurement of characteristics of nuclear interactions in cosmic radiation, considering energy spectrum 24 p4267 A66-42906

Interaction of 1000 bev particles by ionization calorimeter technique suggests free path of nuclear active particles in atmosphere decreases as particle energy increases 24 p4267 A66-42908

Soviet ground station for observation of energy spectrum, composition and anisotropy in arrival directions of primary cosmic ray particles 24 p4269 A66-42917

Stability of solutions to inverse problems in cascade theory, analyzing case when equilibrium spectrum of particles is specified 24 p4269 A66-42922

Energy spectra of muonic and electronic neutrinos in atmosphere 24 p4270 A66-42930

True and measured energy values of cosmic ray spectra, discussing relations and application of results 24 p4271 A66-42934

RK-1-F radiosonde for stratosphere measurements of X-ray photon energy spectrum, charged particle density and X-ray photon density 24 p4213 A66-42941

Energy spectrum of cosmic rays near upper limit and effect of photon-gas temperature 24 p4272 A66-43056

Plasma potential and ion energy determination via ion extraction and energy analysis 24 p4247 A66-43209

**ENERGY STORAGE**

SA ELECTRIC ENERGY STORAGE

SA THERMAL ENERGY STORAGE

Energy conversion and storage - Conference, Oklahoma State University, October 1965 06 p0808 A66-16390

Single pulse operation of lasers, noting energy storage and amplification effect for four-and three-level active medium 12 p1889 A66-23667

Ruby laser amplifier dynamics, noting amplification in energy gain regimes and correlation to theoretical equations 13 p2089 A66-25049

Solar thermionic power conversion, discussing converters, flux and temperature controls, energy storage generators, support structures, etc [AIAA PAPER 64-734] 13 p2006 A66-26641

Coupling of resonators in electromechanical filter, noting application of energy trapping in piezoelectric resonators 18 p3078 A66-34090

Optimum parameters for low-thrust propulsion system with energy storage for specific maneuver 21 p3808 A66-38974

Single pulse operation of lasers, noting energy storage and amplification effect for four-and three-level active medium 22 p3929 A66-39711

**ENERGY STORAGE DEVICE**

Text on high speed optical pulse technology, lasers and measuring techniques, emphasizing capacitor discharge application 10 p1538 A66-22063

Switch and load inductances and relation to performance reduction in superconductor energy storage systems 12 p1928 A66-24303

Solar power conversion unit consisting of thermoelectric generator, thermal storage container and waste heat radiator [AIAA PAPER 64-728] 13 p2006 A66-26638

Linear electric shock tubes including segmented series-discharge driver, switchless shock tube, metal-walled driver for radiant energy conservation, etc 16 p2674 A66-30418

Energy storage and pulse power tools for space assembly, maintenance and repair operations 19 p3364 A66-35968

Energy storage film capacitors for pulsed plasma thrusters developed for coaxial plasma gun and pulsed arc gun [AIAA PAPER 65-337] 24 p4261 A66-42780

Rapid transfer of magnetic energy via exploding foils, noting inductive storage 24 p4239 A66-43217

**ENERGY TRANSFER**

SA ANTENNA COUPLER

SA HEAT TRANSFER

SA MASS TRANSFER

SA WAVE SUPERHEATER

Laser oscillation increase in efficiency in neodymium doped glass produced through energy transfer 01 p0081 A66-10352

Argon arc stabilized by cooled walls, considering radiation calculated with aid of dependences describing transport properties of argon plasma 02 p0265 A66-11390

Wave propagation in random plasma stressing energy transfer between wave modes 03 p0404 A66-12982

Perturbation calculation of average rate of energy transfer in random vibration of nonlinearly coupled modes 05 p0716 A66-15051

Simultaneous radiation, conduction and convection heat transfer for steady state conditions in one-dimensional spectrally selective, emitting and scattering porous bed [ASME PAPER 65-WA/HT-23] 05 p0789 A66-15642

Probe for measuring energy transfer between satellite and upper atmosphere 06 p0873 A66-15922

Relative rate constants for energy transfer from excited argon atoms to various organic molecules 06 p0910 A66-16158

Traveling magnetic wave plasma accelerator, discussing representative MHD equations, force and output power

parameters and energy relations [AIAA PAPER 66-72] 06 p0942 A66-16253

Optical design of elliptical cavities and comparison of energy transfers from light source to ruby laser with cylindrical cavities 06 p0891 A66-16647

Conductivity and transfer coefficients calculated from electron scattering in cesium plasma 06 p0918 A66-16836

Electromagnetic energy transport between coils or coils external to human body and coil implanted inside body is increased by using suitable ferrite core for receiving coil 06 p0820 A66-16852

Energy transfer to small disturbances in viscous compressible heat-conductive medium defined as quantity that is monotone nonincreasing function of time 06 p0874 A66-17005

Book on determining radiative contributions to energy and momentum transport in gas under almost any density and temperature conditions 06 p0913 A66-17157

Fraction of energy transferred to photon-electron component during interactions of particles with graphite nuclei at energies exceeding 100 bev 07 p1114 A66-17545

Motion of material in solar atmosphere, analyzing horizontal inhomogeneities necessary in understanding energy transfer from granulation layer into chromosphere 07 p1138 A66-18076

Energy transfer mechanism in solar corpuscular flux interaction with terrestrial magnetosphere 08 p1285 A66-19786

Probability of high-energy cosmic ray muon undergoing electromagnetic interaction in lead with energy transfer at various ranges 08 p1286 A66-19836

Ionization effect on plasma thermoconductivity, noting expressions for conductivity due to energy transfer or dissociation 09 p1407 A66-20136

Pulse heights produced when argon, nitrogen and argon-nitrogen mixtures completely stop alpha particles 09 p1405 A66-20680

One-, two-and three-circuit systems with periodically varying inductance, capacitance and resistance influencing energy transfer, noting application to amplifier design 09 p1363 A66-20782

Dynamic transient response of fluid surrounding hot wire studied by analysis of basic transport equations for momentum and energy 10 p1521 A66-21055

Optical excitation due to impact of very slow helium ions on Ar and Kr attributed to transfer of kinetic energy into internal electron energy 11 p1740 A66-22971

Optimum energy transfer from hyperbolic orbit in Newtonian central force field in absence of transfer time limitations 11 p1774 A66-23035

Sensitized and unsensitized phosphorescence and energy transfer properties of series of aliphatic alpha diketones in fluid solution 12 p1916 A66-23620

Fluorescence behavior of gadolinium and terbium, noting nonradiative energy transfer in borate glass 13 p2158 A66-25052

Energy transfer equations for fully ionized /deuterium/ plasma including dominant and nondominant terms 13 p2143 A66-25713

Northward momentum transfer across asymmetric jet in three-dimensional atmosphere analyzed, using initial value problem, noting energy transfer and transformation 13 p2064 A66-26128

Excitation radiation transfer from trivalent chromium to neodymium examined via fluorescence spectroscopy, noting energy transfer parameters and effect on laser output 13 p2098 A66-26175

Optical linewidth study of energy transfer between impurity ions and homogeneous broadening and lineshape changes in optical transitions 13 p2098 A66-26176

Laser action on vibrational-rotational transitions and vibration energy transfer 13 p2101 A66-26204

Ionic fluorescence of europium chelates, suitability as laser materials, noting energy transfer role in population inversion 14 p2315 A66-27463

Energy-rich plasmas produced by light

- pulses from Q-switched laser, noting energy transfer from electrons to ions during expansion process 14 p2308 A66-27607
- Coherent emission from trivalent holmium ions in rare earth substituted yttrium aluminum garnet, noting three energy transfer combinations in YAG 15 p2512 A66-28690
- IR quantum counter based on energy transfer between two rare-earth ions in tungstate mixture 15 p2568 A66-29642
- Deuterium plasma jet injection into simple biconical cusped magnetic field, noting ion energy transfer to electrons and plasma potential variations 15 p2554 A66-29748
- Laser lines due to energy transfer from color centers to erbium ions in calcium fluoride crystals irradiated by gamma ray 16 p2717 A66-30278
- Thermal energy exchange between gases and solid surfaces, using realistic interaction potentials of Morse type, Maxwellian velocity distribution 16 p2825 A66-30387
- Energy transfer measurements in gas-solid surface interactions initiated by electron beam-excited photoemission 16 p2701 A66-30397
- Simultaneous radiation, conduction and convection heat transfer for steady state conditions in one-dimensional spectrally selective, emitting and scattering porous bed [ASME PAPER 65-WA/HT-23] 16 p2828 A66-30990
- Transfer efficiency of theta pinch in converting capacitively stored electrical energy to plasma energy measured, using calorimeter technique 16 p2761 A66-31090
- Radiant energy transport within cryogenic condensates extended to case of explicitly varying condensate depths and wider substrate temperature range 16 p2830 A66-31712
- Spectral density and mean value of power flow between two stiffness coupled oscillators under white noise random excitation 18 p3251 A66-33675
- EAS front structure and normal energy transfer determined from pulse forms recorded by Cerenkov detectors 18 p3210 A66-35126
- Nucleon isobar production in photoemulsion giving rise to large energy transfer to several secondary charged particles 18 p3141 A66-35172
- Bursts produced by high energy muons undergoing large energy transfers analyzed for information on muon electromagnetic interactions over region where muon spectrum is known 18 p3220 A66-35195
- Energy transfer in low velocity inelastic atomic collisions 19 p3401 A66-35464
- Analytic models of stellar evolution, describing homogeneous and inhomogeneous stages, energy conservation and transport radiative and convective transfer mechanisms, etc 19 p3467 A66-36789
- Primary and afterglow emission decay time from low temperature gaseous nitrogen excited by fast electrons explained by possible energy transfer 19 p3404 A66-36799
- Initial rotation effect upon vibrational excitation of diatomic molecules studied in two-dimensional collisions shows that with higher rotational energies it is increasingly difficult to excite vibration 19 p3404 A66-36802
- Non-Newtonian viscoelastic fluids with similarity transformations for power law fluids, noting momentum, energy and heat transfer 20 p3545 A66-37510
- Thermoconductive energy transfer from cathode of low pressure gas discharge 20 p3679 A66-38010
- Classical cross section for producing specified energy transfer in collision of two particles in laboratory system applied to atomic collision cross sections 21 p3774 A66-38544
- Energy transfer mechanism in solar corpuscular flux interaction with terrestrial magnetosphere 21 p3809 A66-38782
- Energy transport by electromagnetic waves, using successive approximations 21 p3770 A66-38946
- Instability of wave of given frequency in plasma creates waves of different frequency, velocity and oscillations and leads to energy transfer between waves 21 p3784 A66-39027
- Atomic collisions, excitation transfer processes and energy level transition probabilities in plasma of gas lasers 21 p3748 A66-39305
- Ionization effect on plasma thermoconductivity, noting expressions for conductivity due to energy transfer or dissociation 21 p3793 A66-39408
- One-, two- and three-circuit systems with periodically varying inductance, capacitance and resistance influencing energy transfer, noting application to amplifier design 22 p3884 A66-39841
- Radiant energy transfer below cloud cover in Venus atmosphere, noting greenhouse effect caused by atmosphere containing components capable of IR absorption 22 p3980 A66-40469
- Sliding magnetic field effect on electric current in conducting annular channel flow, noting energy-transfer efficiency and acoustic resonance 23 p4107 A66-42030
- Turbulence in conducting medium treated by fluid mechanical approach and kinetic theory, noting energy transfers between eddies 23 p4108 A66-42033
- Wave propagation, dispersion and energy transfer in arterial blood flow considered as fluid dynamics, noting finite amplitude effects in circulatory system and flow control mechanism 23 p4062 A66-42058
- CW laser action in holmium-doped erbium trioxide with dominant pumping by energy transfer between ions 24 p4222 A66-42555
- Glass lasers, comparing glass with crystals as hosts for laser ions, considering neodymium laser properties 24 p4224 A66-42800
- ### ENGINE
- S AIR BREATHING ENGINE

- ### ENGINE CONTROL
- SA ROCKET ENGINE CONTROL
- Stabilization and control of Saturn S-II engine actuation system and application to other hydraulic positioning servos, reducing position errors 01 p0015 A66-10669
- XB-70A components and subsystem operation and design noting engine, electrical and cooling control systems [SAE PAPER 650841] 01 p0130 A66-10833
- Aircraft engine maintenance, discussing line, minor and major services, operating period parameters, overhaul facilities, etc 06 p0943 A66-17024
- Lucas fuel control system for Spey engine, using rotating metering valves and variable stroke fuel pump [SAE PAPER 660049] 08 p1282 A66-19389
- Isochronous and droop type governors controlling aircraft engines 08 p1282 A66-19765
- Microthruster power conditioning and control system design and ion propulsion [AIAA PAPER 66-215] 10 p1485 A66-21449
- Takeoff dynamics of VTOL aircraft, noting thrust-weight ratio, wing load, initial thrust angle, engine tilt, etc 11 p1733 A66-23339
- Control of large engine motion from soft mountings during starting and stopping [SAE PAPER 660222] 13 p2088 A66-26399
- Soviet book on automation and control of air breathing gas turbine and ramjet engines 13 p2173 A66-26463
- Dart engine controls and power monitoring instruments 14 p2225 A66-27121
- Analog computer simulation of gas turbine engines for control study, discussing steady state performance and transient response data, surge region, maximum acceleration, etc 15 p2570 A66-28852
- Electronic simulation for evaluation of control concepts and system behavior of regenerative gas turbines 15 p2571 A66-28853
- Literal acceleration limiting fuel control for gas turbine engines during speed transients 15 p2571 A66-28854
- Effect of recuperators on governing of single shaft gas turbine engines and methods used to provide satisfactory governing and overall characteristics 15 p2428 A66-28856
- Fuel flow reset and other methods of governing performance of gas turbines 15 p2571 A66-28857
- Digital approach to gas turbine engine control based on use of pulsewidth modulated information obtained with aid of simple circuits 15 p2571 A66-28858
- Lightweight universal fuel control for commercial aircraft, discussing engine requirements, design considerations, etc 15 p2571 A66-28860
- Small gas turbine engine controls, discussing design, development and cost factors 15 p2571 A66-28861
- Fluid devices for sensing, amplifying, controlling and logical functions in gas turbine control systems 15 p2572 A66-28862
- Synthesis method for automatic control systems, examining controller design for turboprop engine 17 p2901 A66-32311
- Variable geometry jet engine control using advanced hydromechanical, microelectronic and fluidic techniques 19 p3450 A66-36364
- Multiloop control interaction using linearized technique, noting variable geometry intake loop 20 p3627 A66-36881
- Attitude, translation and descent engine control for attitude and position control of LEM 21 p3308 A66-39518
- Mechanical and thermal requirements of attitude, translation and descent engine controls of Lunar Excursion Module /LEM/ 21 p3308 A66-39519
- Three-term governor for gas turbine engine system, examining effect of internally generated pressure noise on performance of different possible hydraulic systems 22 p3972 A66-40513
- ### ENGINE COOLANT
- Comparison of 14 basic methods for cooling rocket engines 07 p1110 A66-17617
- Shock tube ignition delay study of aircraft engine cooling by hydrocarbon fuels in endothermic heat sinks [AIAA PAPER 65-594] 12 p1934 A66-23588
- Specific impulse limitations of advanced nuclear rocket engines due to hydrogen transpiration coolant flows in exhaust nozzle 24 p4261 A66-42777
- ### ENGINE DESIGN
- SA ROCKET ENGINE DESIGN
- McCulloch Model 4318 Drone Target Aircraft Engine for maintainability, reliability, moderate cost and high power-to-weight ratio 01 p0129 A66-10091
- Kinematic systems and reduction gears used in turboprop engines, outlining design features 01 p0079 A66-11060
- Rolls-Royce RB 108 lift-jet engine design, characteristics and V/STOL research 05 p0745 A66-15298
- Aerodynamic analysis of cryogenic radial-inflow turbines, noting optimum velocity distribution [ASME PAPER 65-WA/PID-6] 05 p0608 A66-15604
- West Germany and international cooperation in aerospace engine development, noting VTOL aircraft and supersonic and hypersonic spacecraft 06 p0943 A66-16797
- Engine drive design for high speed VTOL aircraft, discussing thrust requirements, system type and leading area

parameters 06 p0943 A66-17018  
 V/STOL aircraft engine technology, discussing engine configuration, lift augmentation, thrust deflection, efficiency parameters, etc 06 p0943 A66-17023  
 Dimensional stability and structural integrity of labyrinth seals, considering various mechanical design criteria in application to aircraft gas turbines [SAE PAPER 660048] 09 p1383 A66-20150  
 Turbine blade and vane cooling in Rolls-Royce nonmilitary aircraft engines, noting side effects on design and development [SAE PAPER 660053] 09 p1433 A66-20151  
 High temperature turbine blade air cooling methods and cyclic and steady state endurance testing [SAE PAPER 660054] 09 p1434 A66-20152  
 Engines for supersonic and hypersonic aircraft to be used in next decade, noting suitability for cruise aircraft or boosters 09 p1435 A66-20668  
 Propulsion problems for engine of 5000 mph aircraft noting ramjet, cooling, intake, nozzle, etc 09 p1435 A66-20669  
 High temperature materials for hypersonic air-breathing engines, noting usefulness of coated refractory metals 09 p1435 A66-20670  
 Design, operating characteristics, advantages of two-cycle star configuration four-cylinder engine for general-purpose aircraft, noting crankshaft, fuel injection, cooling, etc 10 p1592 A66-21407  
 Resistojet design and fabrication, using hydrogen propellant and having 3-kw power input [AIAA PAPER 66-224] 10 p1592 A66-21451  
 Subliming materials chemistry determining parameters governing selection of subliming solids for microthrust engines [AIAA PAPER 65-595] 11 p1759 A66-22460  
 Text on fundamentals of aircraft gas turbine engine design, including component design and calculation 11 p1762 A66-23310  
 Engine reliability data for four Rolls-Royce civil aircraft engines 13 p2174 A66-26694  
 Sequential Noise Output Recording Equipment /SNORE/, aircraft engine noise test facility, for jet noise and compressor noise and acoustic absorption materials test facility [ASME PAPER 66-GT/N-41] 14 p2269 A66-26986  
 Heat transfer considerations in aircraft-engine design noting fuel, oil and icing problems 14 p2375 A66-28300  
 GE-4 turbojet engine for SST design and program development, maintenance, safety, economics, performance, noise, etc [SAE PAPER 660298] 15 p2572 A66-29833  
 Factors extending life of aircraft engine part beyond that available by in-service development of component replacement [SAE PAPER 660313] 15 p2573 A66-29838  
 Jet engine technology, including spinoff from lift jet, propulsion systems, cost estimates, etc 16 p2791 A66-31280  
 Operating stability of turbojet engines improved by use of double-rotor compressor 17 p2992 A66-33487  
 60-kw, 400-cps engine-generator system capable of providing reliable high-quality electric power at lower mission weight than presently available engine-generator sets 20 p3498 A66-37169  
 Book on aerodynamic experiment in machine building, noting self-simulation problems of machines using gas dynamics, analyzing wind tunnels 21 p3694 A66-38743  
 Factors involved in bringing propulsion system to operational status noting engine design, development, cost, testing, etc 24 p4296 A66-42243  
 Power plant development trends and effect on short and vertical takeoff aircraft design, noting improvement in thrust-weight ratio 24 p4262 A66-43051  
**ENGINE FAILURE**  
 Pratt and Whitney Aircraft system for achieving reliability assurance in gas turbine engines, discussing management, failure modes, product development and tests 01 p0128 A66-10062  
 Reliability prediction for rocket engines based on initial-failure-symptom and failure-cause estimates and uses experienced development efficiencies and effort 01 p0129 A66-10083

Machining processes effect on reliability of engine components and methods for detecting failure and failure susceptibility 01 p0077 A66-10104  
 Comparison of materials for thermal stress application based on engine operating conditions and considering metal strength 02 p0245 A66-11797  
 Creep fatigue, thermal cycling, vibration control, transient thermal response control, structural loads and hot part reliability relating to long-life jet engine failure [SAE PAPER 660311] 15 p2572 A66-29836  
 Jet engine reliability at various stages /planning, production, in-service, etc/ noting its economic aspects and global methods analyzed 16 p2790 A66-30316  
 Spectrometric oil analysis for assessing failure probability of turbojet-engine oil-wetted parts 19 p3355 A66-35524  
 Early detection of impending failure in aircraft turbines 20 p3629 A66-37828  
 Cost of turbojet engine development plans estimated in computer simulation and Monte Carlo techniques 20 p3523 A66-37935  
**ENGINE FAILURE INDICATOR**  
 Acoustic analyzer combined with modulation and pulse shape analysis for effective diagnosis of turbojet engine condition without electrical or mechanical connections 01 p0066 A66-10114  
**ENGINE MONITORING SYSTEM**  
 Dart engine controls and power monitoring instruments 14 p2225 A66-27121  
 Turbojet engine analyzer system theory and implementation for assessing current engine condition and malfunction and for predicting next mission confidence and time 19 p3355 A66-35523  
**ENGINE PART**  
 SA CLUTCH  
 SA COMBUSTION CHAMBER  
 SA FLYWHEEL  
 SA PISTON  
 SA VALVE  
 Capacitive torsional vibration transducer for measuring angular displacement of vibrations in engine shaft 12 p1880 A66-23845  
 Plasma sprayed and detonation-flame-plated protective wear-resistant coatings to extend life of aircraft jet engine parts [SAE PAPER 660310] 14 p2301 A66-27292  
**ENGINE STARTER**  
 Auxiliary power unit turbine-engine starting system analyzed to determine sufficiency of selected accumulator 16 p2637 A66-31224  
 Automatic starter for nuclear reactor rocket engine with automatic power control system 18 p3133 A66-33875  
 Aircraft gas turbine starting with automatically controlled electronic unit, noting system design, operation and performance 20 p3540 A66-38299  
 Delayed energy produced by fission product decay when restart of nuclear rocket engine is considered, noting effects of cooldown requirements [AIAA PAPER 66-551] 22 p3946 A66-39676

ENTHALPY

Plasma arc tunnel tests show  
 thermochemical heat of ablation of magnesia  
 strongly dependent on stagnation enthalpy  
 [AIAA PAPER 65-641] 01 p0089 A66-10225  
 Localized calorimetric enthalpy  
 measurements in high-energy-content gas  
 stream using evaporating liquid film to cool  
 gas sample 01 p0165 A66-10908  
 Energy balances for combustion chambers  
 of gas turbines by electronic  
 computer 03 p0416 A66-13202  
 Aluminum carbide thermodynamic  
 properties over large temperature interval  
 calculated from low-temperature heat  
 capacity and high-temperature relative  
 enthalpy 04 p0536 A66-13832  
 Equilibrium combustion products of  
 generalized hydrocarbons with oxygenated  
 air, with charts on enthalpy, entropy,  
 molecular weight, specific heat ratio, etc  
 [ASME PAPER 65-WA/ENER-2]  
 05 p0789 A66-15627  
 Effectiveness of charring ablators strongly  
 influenced by stream enthalpy level and  
 heating rate 08 p1316 A66-18812  
 Rotating bomb calorimetric technique,  
 determining accurate values of enthalpy of  
 combustion of boron and boron  
 compounds 08 p1178 A66-19068  
 Enthalpies determined from experimental  
 heat capacity and Joule-Thomson data to  
 prepare pressure-enthalpy diagrams for  
 helium-nitrogen system 08 p1320 A66-19683  
 Heat conductivity, enthalpy, entropy and  
 isobaric-isothermal potential of niobium  
 calculated from zero to 2740 degrees  
 K 09 p1388 A66-20138  
 True heat capacity of solid heat-resistant  
 dielectric or conducting materials at high  
 temperatures 09 p1470 A66-20141  
 Constant section mixture of flows with  
 different enthalpies, noting sonic blocking  
 for terminal temperature  
 differences 13 p1991 A66-25470  
 Second thermodynamic law analysis of  
 availability balance for conventional gas  
 turbine and free-piston gasifier  
 [ASME PAPER 66-GT-96] 14 p2372 A66-26999  
 Enthalpy of gas stream, calorimeter surface  
 treatment and heat transfer measurement  
 errors in arc-heated tests 14 p2411 A66-27425  
 Enthalpy and density fluctuations in high  
 speed wakes, noting typical reentry and  
 ballistic range cases 14 p2219 A66-27431  
 Elutriation diagrams in determination of  
 adsorption enthalpies from temperature  
 dependence of retention volume in band  
 maximum 14 p2232 A66-27604  
 Enthalpy and entropy of parahydrogen  
 from PVT data and from limited amount of  
 thermal data 16 p2790 A66-30907  
 Steady flow of conducting dissociating gas  
 in channel of constant cross section in  
 presence of magnetic  
 field 16 p2687 A66-31165  
 Performance calculations for propellants in  
 terms of composition and enthalpy and  
 principles of rocket  
 engines 19 p3449 A66-36287  
 Enthalpy of impure sample of niobium  
 calculated from simultaneous measurements  
 of magnetization and heat developed during  
 process of magnetizing type II  
 superconductor 20 p3616 A66-37445  
 Boundary layers with coupled heat and  
 mass transfer for large enthalpy per unit  
 mass of injected material, based on linearity  
 of perturbation equations 21 p3834 A66-38704  
 Heat conductivity, enthalpy, entropy and  
 isobaric-isothermal potential of niobium  
 calculated from zero to 2740 degrees  
 K 21 p3752 A66-39410  
 Probe design for mass flux, stagnation  
 point heat transfer and total enthalpy  
 measurements of high temperature  
 hypersonic gas flows  
 [AIAA PAPER 66-750] 22 p3919 A66-40635  
 Simulated meteor ablation tests using  
 artificial meteors of gabbro, basalt and steel  
 in ultrahigh enthalpy plasma jet  
 [ICAS PAPER 66-40] 23 p4147 A66-41009  
 Enthalpy and entropy of dissociating  
 nitrogen tetroxide, using thermodynamic  
 dependences 23 p4148 A66-41269

Gas heating in wall stabilized electric arcs  
 with axial flow applied to nitrogen arc,  
 obtaining highest enthalpy flux and  
 efficiency 24 p4295 A66-43060

ENTHALPY-ENTROPY DIAGRAM

Small charge asymmetry and entropy of  
 hot universe, finding rational solution for  
 almost-charge symmetrical  
 case 24 p4280 A66-43057

 Heat conductivity, enthalpy, entropy and  
 isobaric-isothermal potential of niobium  
 calculated from zero to 2740 degrees  
 K 09 p1388 A66-20138  
 Paradoxes in thermodynamics by using  
 imprecise terminology, citing available  
 energy, diffusion entropy, self-mixing of gas,  
 etc 09 p1472 A66-20907  
 Thermodynamic property calculations from  
 equations of state and ideal gas properties,  
 using entropy as illustrative  
 example 10 p1619 A66-21077  
 Nonequilibrium thermodynamics applied to  
 problem of solid carrying electric and heat  
 currents in presence of external magnetic  
 field  
 [ASME PAPER 65-HT-1] 11 p1785 A66-22186  
 Generalized theorem of minimum entropy  
 production in terms of fluctuation theory  
 and variational principle, noting application  
 to heat flow in rarefied  
 gases 12 p1974 A66-23541  
 Mechanical flow processes and variational  
 methods based on fluctuation theory, noting  
 relations on minimum entropy production,  
 two-dimensional laminar flow of  
 incompressible fluid, etc 12 p1975 A66-23543  
 Blast wave theory with and without  
 entropy layer effect, determining asymptotic  
 flow, far downstream of blunted nose, past  
 given body 12 p1861 A66-23808  
 Brillouin principle, formulated positively to  
 express information amount in terms of  
 physical entropy, applied to information  
 transmission by electromagnetic field using  
 thermodynamics, noting quantum mechanical  
 expressions 12 p1817 A66-24337  
 Second thermodynamic law analysis of  
 availability balance for conventional gas  
 turbine and free-piston gasifier  
 [ASME PAPER 66-GT-96] 14 p2372 A66-26999  
 Refutation of universe having infinitely  
 increasing entropy and thus having eternal  
 existence 14 p2333 A66-27223  
 Macroscopic equations for nonequilibrium  
 processes in rarefied gases by disrupting  
 moment equations infinite chain, using  
 function of maximum entropy  
 distribution 14 p2336 A66-28059  
 Entropy and heat of formation of lead  
 telluride determined by emf temperature  
 coefficient measurement 14 p2369 A66-28330  
 General cosmological problem /GCP/ based  
 on unified field theory involving  
 cosmological expansion, oscillation and  
 organic evolution, discussing quadrant  
 mechanics, entropy, ether, minimum time  
 problem, etc 14 p2389 A66-28408  
 Second law of thermodynamics, discussing  
 Clausius and Boltzmann mathematical  
 expressions of entropy, role of  
 irreversibility and relationship between  
 increase of entropy and increase of  
 disorder 15 p2616 A66-29062

Enthalpy and entropy of parahydrogen from PVT data and from limited amount of thermal data 16 p2790 A66-30907

Statistical entropy of nonequilibrium plasma, assuming binary correlations remain small and neglecting higher order correlations, analyzing irreversible evolution of simple density 16 p2763 A66-31210

Hypersonic flow past blunt body near stagnation point examined, noting surface layer, characterized by increased density and decreased entropy of

gas 16 p2630 A66-31305  
Planck entropy equation and irreversibility of radiation matter interaction for stationary isothermal gas emitting resonance lines of two-level atoms 17 p2957 A66-32044

Physicochemical quantitative analysis of cometary nucleus-coma buildup relationship, discussing gas liberation, entropy and enthalpy variation, change of state and gross energy balance 17 p3010 A66-33374

Wall term in Boltzmann H relationship leads to increase in entropy for solutions to Boltzmann equations 19 p3401 A66-35584

Operational reliability of finite automatic systems in terms of entropy in individual components 20 p3538 A66-37486

Maximum entropy in estimating damage distribution of single degree of freedom system subjected to random loading, noting reliability 20 p3571 A66-37942

Heat conductivity, enthalpy, entropy and isobaric-isothermal potential of niobium calculated from zero to 2740 degrees K 21 p3752 A66-39410

Enthalpy and entropy of dissociating nitrogen tetroxide, using thermodynamic dependences 23 p4148 A66-41269

Linear perturbation theory of flow due to convection of entropy and vorticity in nonuniform flow field, noting sound generation 23 p4062 A66-42051

Argon entropy diagram calculation from sound velocity data and P-V-T relation 24 p4238 A66-42887

Operational environment formulation for airborne navigation radar 19 p3397 A66-35521

## ENVIRONMENT SIMULATION

SA SPACE SIMULATION

Effectiveness of albedo and Earth radiation simulation, examining fixed chamber and fixed vehicle techniques 02 p0211 A66-11216

Albedo and planetary radiation simulation to provide field angle and uniformity of intensity for thermal testing 02 p0211 A66-11217

Design of radiation source system simulating albedo and planetary emission energy flux to space vehicle in any planetary orbit 02 p0212 A66-11218

Survival of Earth organisms under environment simulated low pressure, low oxygen, low temperature and low extraterrestrial conditions 02 p0181 A66-11605

Low friction environment effects on maintenance operations in simulator noting torquing-force capability, hand-eye coordination, etc 02 p0186 A66-11645

Artificial environment in manned spacecraft for preserving human life, comparing physical, chemical and biological processes 04 p0470 A66-14079

Animal exposure to low pressure-high oxygen environment noting pressure control, electronic watering device and constant environmental temperature 06 p0815 A66-15942

Three-axis acceleration control task designed to detect space flight-induced decrements in piloting skills 06 p0818 A66-16246

Scale model testing of lunar surface vehicles in simulated low gravity field [SAE PAPER 660148] 07 p1017 A66-17251

Mathematical model of thermal simulation of manned spacecraft in space chamber [AIAA PAPER 66-22] 07 p1140 A66-17887

Simulator design for inclusion of man/machine interactions and human behavioral and performance considerations in system design 08 p1203 A66-19534

Engineering problems in SNAP reactor component irradiation program, including material compatibility, vacuum equipment selection and operation and contaminants within chamber 12 p1857 A66-23674

Laboratory instrumentation for testing and calibration of in situ probes for lower ionosphere, mesosphere and stratosphere 13 p2059 A66-26549

Laboratory simulation of solar radiation under varying atmospheric conditions 14 p2327 A66-28135

Hypoxemia induced in man by sustained forward acceleration while breathing pure oxygen in five pounds per square inch absolute environment 15 p2430 A66-28659

Simulation of solar flare radiation effects on white mice in spacecraft along circumlunar trajectory 15 p2445 A66-29512

Unique free-floating externally ballasted system for obtaining static flotation characteristics 16 p2677 A66-30450

Environment simulation for space vehicle explosive separation system testing, noting equipment, performance, etc 16 p2679 A66-30470

Fast rise programmed centrifuge, noting acceleration testing capabilities, power speed control, etc 16 p2679 A66-30473

Simulation of aircraft crashes to evaluate seating and restraint systems 16 p2680 A66-30480

Blast environment simulation developing high pressures of relatively long duration, noting helical winding of cord explosive 16 p2681 A66-30501

Low atmospheric pressure and oxygen-rich environment effect on characteristics of uninterrupted long-term exposure to toxic gases of space cabin atmospheres, noting animal testing 16 p2642 A66-30623

Visual simulation device for aircraft pilot and astronaut 16 p2643 A66-30952

Human renal response to 56-day exposure to oxygen-helium atmosphere at 258 mm Hg total pressure 18 p3057 A66-33770

Human blood enzyme response to 56-day exposure to oxygen-helium atmosphere at 258 mm Hg total pressure 18 p3057 A66-33771

Bite-size foods included in feeding study of man exposed for 56 days to oxygen-helium atmosphere 18 p3061 A66-33775

Nutritional evaluation of feeding bite-size foods to man exposed for 56 days to oxygen-helium atmosphere 18 p3061 A66-33776

Space molecular sink design to create vacuum environment, emphasizing pumping and test chamber instrumentation 18 p3093 A66-33797

Low friction environment effects on maintenance operations in simulator noting torquing-force capability, hand-eye coordination, etc 18 p3061 A66-33821

Temperature, time and loading conditions for adhesion or cohesion of structural metals in vacuum 18 p3117 A66-34651

Total simulation system mass effect on certain human force outputs in tractionless environments 19 p3293 A66-36243

Laboratory environment simulation of multipath propagation interference effects on low channel capacity FM systems 22 p3865 A66-40066

Environmental simulation of aerospace missions including solar radiation, high vacuum, zero g, micrometeorites, etc 22 p3886 A66-40131

Interplanetary space environment effect on surface thermal radiative properties, noting results of exposure to simulated solar plasma, solar UV, solar wind, etc 22 p3889 A66-40218

McDonnell Martian Environmental Simulation Facility, analyzing sand and dust storm behavior at low pressures 22 p3891 A66-40227

Hypoxia of simulated high altitude exposure prolongs synaptic delay and conduction time in brain system of rats 22 p3855 A66-40403

Simulation role in automatic testing system for missiles and rocket stages 23 p4052 A66-41135

Micrometeoroid environment effect on metal surface thermal properties, using simulated space vehicle placed in solar space environment chamber [AIAA PAPER 65-138] 23 p4140 A66-41894

ENVIRONMENTAL CHAMBER

Correlating heat flux from quartz envelope tungsten filament lamps in Aerospace Research Chamber to simulate solar irradiated surfaces 02 p0302 A66-11214

Space environment simulation vacuum chamber design and operation in terms of manned testing 03 p0352 A66-12757

Vibration temperature chamber design considering access to top of shaker head, fast stabilization time and reduced downtime for maintenance and adaptability 04 p0508 A66-14449

Ultrahigh vacuum chamber with liquid-helium-cooled liner for space environment simulation 08 p1202 A66-18926

French CNES space simulation chamber for satellite testing 10 p1520 A66-21756

Simulated space vacuum environment by cryosorption pumping system 12 p1858 A66-24709

Fail-safe system used in temperature environment testing chambers functioning independently of control system and reacting to valve failure, power loss, etc 14 p2270 A66-27666

Space simulation facility, based on ion-getter pump system, using ion and titanium sublimation pumps and stainless steel shrouds for thermal conditioning 16 p2677 A66-30453

Oxygen compatibility environmental test chambers noting design, performance and results of operation 16 p2679 A66-30471

Test chamber to simulate vacuum and heat sink characteristics of space, measuring optical constants of coatings 16 p2680 A66-30491

ONERA space environment simulating chambers, giving function and characteristics of each apparatus 18 p3094 A66-34008

Factors in operation of manned space chambers - ASTM Symposium, Seattle, October-November 1965 19 p3288 A66-35837

Man-rating Douglas space simulator, 39-ft-diam sphere with pumping speed adequate for manned operation while maintaining simulated space vacuum 19 p3340 A66-35844

Rapid repressurization of space simulation chamber reliably affected by use of commercially available muffler 19 p3340 A66-35844

High vacuum pumping system techniques to meet requirements for space simulation chambers 19 p3371 A66-36649

Stability of precision gravity sensing tiltmeter determined, noting test facility used, results and performance characteristics 21 p3721 A66-38871

Ground tilt isolation platform construction and performance noting design features, performance characteristics and efficiency 21 p3722 A66-38872

Vibration measurement results on air supported isolation platforms, noting effects of heavy vehicle passing sound pressure 21 p3722 A66-38874

Rescue teams for manned testing in environmental chamber for Gemini spacecraft noting personnel, chamber and personal equipment, test operations and rescue function and drill 22 p3857 A66-40240

Apollo environmental control system simulation chamber for suit and manned system evaluation and operational verification 22 p3892 A66-40241

ENVIRONMENTAL CONTROL

SA CLEAN ROOM

Spacecraft Thermal environment control to insulate cryogenics in bulk for space use 01 p0161 A66-10290

Animal and human test of manned spacecraft life support system consisting of closed system with recirculating air loop, examining potassium superoxide-potassium hydroxide chemistry 02 p0183 A66-11492

Tests of advanced life support and

environmental control systems in manned space laboratory  
 02 p0186 A66-11646  
 Bioinstrumentation and monitoring device which relates complex environmental variables to development of psychophysiological stress evaluation for controlling environment of space capsules  
 06 p0878 A66-15963  
 Polyimide resins for extreme environments, discussing chemical structure, application, electrical, thermal and mechanical properties, radiation resistance, etc  
 06 p0899 A66-16292  
 Measuring temperature coefficient and drift for small capacitors, noting design and environmental control  
 09 p1359 A66-20921  
 Self-contained environmental control system for biosatellite study of prolonged effects of weightlessness and radiation [AICE PREPRINT 19D]  
 10 p1491 A66-21186  
 Personnel comfort and protection from thermal stress, discussing clothing, environmental temperature, metabolic heat production, solar radiation, etc  
 10 p1492 A66-22120  
 Equipment, techniques and principles of human survival in hostile environment  
 10 p1493 A66-22121  
 Long duration manned spacecraft material and structural requirements in radiation and meteoroid shielding, thermal control, cabin sealing, etc  
 11 p1778 A66-23074  
 Reliability of fatigue test results, noting calibration method and frequency, specimen preparation, alignment and environmental factors  
 12 p1958 A66-23656  
 Microbial accumulation on sterile steel, glass and Lucite strips in industrial clean rooms  
 13 p2013 A66-25286  
 Thermal and fluid mechanics problems in Gemini spacecraft environment control system development  
 14 p2226 A66-27813  
 Environmental parameters affecting spacecraft comfort during weightlessness and optimization of comfort  
 14 p2231 A66-28412  
 Environmental conditions in space station noting optimum pressure, gas concentrations and temperatures  
 16 p2641 A66-30346  
 Full pressure suit design for high altitude and space missions, discussing material selection, physiological requirements, etc  
 16 p2642 A66-30462  
 Centrifuge performance, noting angular velocity constancy vibration levels in terms of acceleration, temperature effects, etc  
 16 p2679 A66-30476  
 Centralization of environmental control equipment for cost reduction, improved tolerances and test  
 16 p2680 A66-30479  
 Particle and droplet contamination of spacecraft cabin atmosphere, examining exogenous and endogenous sources, medical aspects of inhalation and exhalation, effect of weightlessness, etc  
 17 p2866 A66-32207  
 Environmental control manufacture discussing cleaning, design and maintenance problems, historical background, etc  
 17 p2903 A66-32208  
 Contamination problems in space program, discussing clean room equipment, maintenance, cleaning problems, etc  
 17 p2866 A66-32210  
 Contamination control of manned spacecraft, noting problem of biological interactions and methods of monitoring  
 17 p2866 A66-32211  
 Bosch process closed cycle oxygen production unit for space application [AICE PREPRINT 47A]  
 17 p2867 A66-32670  
 Trace contaminant control in closed environments as requirement for safe air in habitable areas of manned spacecraft [AICE PREPRINT 26A]  
 17 p2867 A66-32676  
 Contamination control and space program, objectives, achievements, NASA courses, etc  
 17 p2868 A66-32894  
 Apollo LEM ECS and main subsystems design emphasizing maintenance of pressure, temperature, relative humidity and oxygen at safe levels  
 18 p3062 A66-33956  
 Instrument unit analysis for Saturn IB/V program, noting environmental, guidance and flight control, electrical systems and countdown procedure  
 19 p3354 A66-35469  
 Synthesis of minimum sensitive open loop

control system subjected to unpredictable environmental changes, discussing perturbation effects during and before process transient  
 19 p3329 A66-36029  
 Chemical methods for carbon dioxide conversion for oxygen recovery, including relationship to biological processes  
 19 p3293 A66-36235  
 Spacecraft trace contamination control requirements quantitatively defined, emphasizing physical and chemical sorbents and combustion catalysts  
 19 p3293 A66-36237  
 Integrated program approach for contamination control of space cabin atmospheres based on identification, estimation of concentration and system specifications  
 19 p3293 A66-36238  
 Carbon dioxide control by enzymatic reaction in spacecraft atmosphere by hydrolyase and multienzyme  
 19 p3293 A66-36240  
 Air ionization effect on vigilance task performance, noting smaller decrement for environment containing negative ions  
 20 p3504 A66-36933  
 Spacecraft maintainance and repair cost minimization and system effectiveness increase by controlling contamination due to personnel, static electrification and bacteria  
 20 p3567 A66-37899  
 Equipment design and weight estimates for lunar production of oxygen and water  
 22 p3977 A66-39896  
 Cleaning techniques for zip gun or hand-held maneuvering unit and environmental life support system or ventilation control module used for astronaut White walk in space  
 22 p3886 A66-40039  
 Life support systems for crew comfort and safety, considering thermal and radiation environmental control, carbon dioxide removal, cryogenic gas storage, etc  
 22 p3857 A66-40129  
 Tests of advanced life support and environmental control systems in manned space laboratory simulator  
 24 p4168 A66-42779  
**ENVIRONMENTAL LABORATORY**  
 Data collection system with small on-line computer that monitors stress, temperature, pressure and other physical parameters of environmental laboratory vacuum and temperature chambers  
 [ISA PREPRINT 1.12-1-65]  
 05 p0638 A66-15502  
 Chronic exposure of rats to gaseous environments of varied composition and pressure, noting exposure capsules, gas flow system, respiratory gas analyzer, etc  
 16 p2643 A66-30650  
**ENVIRONMENTAL SCIENCE**  
 Human factors engineering, discussing man-machine allocation of system functions, task equipment analysis, model and mock-up analysis and environmental analysis  
 11 p1647 A66-22301  
 Origin, setting and evolution of human factors engineering and man-made environment  
 11 p1648 A66-23100  
 Environment and man - IES Conference, San Diego, April 1966  
 16 p2674 A66-30434  
 Space medicine and biology studies of space flight environmental factors based on experiments with animals and manned spacecraft  
 18 p3056 A66-33699  
 Environmental effects on man, Volume 1 - Symposium on environmental engineering and society, London, April 1966  
 18 p3062 A66-34201  
 Shock and vibration - Underground, under water and in air - Volume 2, Symposium on environmental engineering and society, London, April 1966  
 18 p3095 A66-34205  
 Space technology, Volume 5 - Symposium on environmental engineering and society, London, April 1966  
 18 p3230 A66-34208  
 Space cabin atmosphere and closed environment - ACS Symposium, Atlantic City, September 1965  
 19 p3292 A66-36230  
 Book on physiological responses of healthy mammals to natural changes or extremes of physical environment, considering heat, cold, light, atmospheric pressure and water  
 20 p3505 A66-37253  
 Detection of extraterrestrial biological systems, noting criteria such as radiant energy requirements for life evolution, molecular characteristics,

etc  
 24 p4164 A66-42669  
 Experimental biology in space, discussing goals, contributions and future potentials  
 24 p4164 A66-42670  
**ENVIRONMENTAL SURVEY SATELLITE /ESSA/**  
**S ESSA SATELLITE**  
**ENVIRONMENTAL TEMPERATURE**  
 Thermological aspects of Martian surface environment based on radiometric temperature measurements  
 16 p2799 A66-30435  
**ENVIRONMENTAL TESTING**  
**SA ERIE PROJECT**  
**SA MATERIAL TESTING**  
 Protective coatings for extreme temperature environment discussing types, application, performance in oxidizing atmospheres, tests and industrial problems  
 01 p0084 A66-10090  
 Full scale ground inflation tests to evaluate structural and RF backscatter characteristics of Echo II prototype spheres as function of their internal pressures  
 01 p0055 A66-11123  
 Spectral match tolerance selection for solar simulator with respect to various test specimens  
 02 p0214 A66-11237  
 LF and infrasonic noise effects on mans cardiac rhythm, hearing, vision, motor control, spatial orientation, speech and subjective tolerance  
 07 p0999 A66-17656  
 Metabolic rates in pressurized pressure suit, affecting heat balance of subjects metabolic heat with heat removed by environmental control  
 07 p0997 A66-17657  
 Rats exposed to space cabin atmosphere for two weeks, noting mortality rate, organism functioning, growth rate, etc  
 07 p0998 A66-17663  
 Multistage cryogenic trapping system noting design, operation and application  
 07 p1032 A66-17665  
 Effect of environmental extremes on Miniature Inertial Navigation System, showing vibration and centrifuge testing data  
 08 p1251 A66-19491  
 Environmental testing, spacecraft configuration, data retrieval and flight simulation in OAO  
 08 p1203 A66-19517  
 SNAP-15A radioisotope thermoelectric generator with power output of about 1 mw, design, development and potential uses  
 12 p1911 A66-23680  
 Equipment and methods for simulating natural or induced environments for reliability testing  
 12 p1833 A66-24079  
 Test program evaluating protective clothing and safety equipment for personnel working in Saturn booster at minus 100 F in oxygen-rich or deficient environment, noting problems with communications, visibility, breathing, etc  
 12 p1810 A66-24958  
 Environment-simulation testing effectiveness for unmanned space systems  
 13 p2057 A66-25282  
 Time, pressure and temperature effects on adhesion of structural metals in vacuum and space environment  
 14 p2316 A66-28005  
 Graphite composites suitability for use on hypersonic entry vehicle components  
 14 p2319 A66-28014  
 Environmental test criteria for lunar and planetary soils, discussing particle size, clay, hydrothermal alteration, cohesion, adhesion, vacuum and temperature effects, etc  
 14 p2387 A66-28179  
 Ariel II /UK-2/ international satellite environmental test  
 14 p2394 A66-28426  
 Psychological and physiological reaction to Coriolis effect under artificial gravitational field simulated in rotating space station  
 15 p2443 A66-28682  
 Lubricant selection for lunar missions and manned spacecraft based on compatibility with oxygen-rich environment, propellant, anodic coatings and sliding friction behavior in vacuum  
 [ASLE PAPER 66AM 7A2]  
 16 p2712 A66-30415  
 Performance of SNAP-10A instrumentation during component qualification, ground system and flight system tests, noting environmental conditions  
 16 p2744 A66-30439  
 Factors to be considered in capital equipment and facilities for environmental

testing, including management planning, work load reorientation, etc 16 p2831 A66-30441

Test facility for combined sonic and mechanical excitation of flight-and surface-vehicle hardware, using electropneumatic transducers 16 p2676 A66-30444

Significant environmental criteria and realistic and standard test conditions for microelectronics testing 16 p2659 A66-30451

Monitoring device for detecting short-duration, vibration-induced electrical malfunctions, noting Gemini tests 16 p2677 A66-30454

Structural mounting of large diameter cylindrical missile section in centrifuge for high acceleration environmental testing 16 p2677 A66-30458

Design concepts and requirements for combined acceleration-vibration testing 16 p2678 A66-30459

Averaging systems for control of sinusoidal vibration tests noting methods, crosstalk effect etc 16 p2678 A66-30463

Long term solar simulation test, noting spacecraft performance, equipment design, instrumentation, etc 16 p2678 A66-30469

Hostile long term storage environments, discussing aircraft component condition following extensive exposure 16 p2635 A66-30472

Interaction effects of combined environment testing for aerospace systems 16 p2679 A66-30477

Portable shock and environmental recording system 16 p2703 A66-30482

Economical method of reduction of environmentally obtained shock data 16 p2703 A66-30483

Test program for thermal-vacuum testing of Centaur vehicle components 16 p2808 A66-30485

Errors inherent in specification of shock motions by shock spectra 16 p2813 A66-30488

Shock spectrum analyzer for space vehicle structures, etc, noting galvanometer selection 16 p2703 A66-30489

Environmental testing associated with sterilization of planetary capsule, discussing time vs temperature cycles and flight acceptance 16 p2642 A66-30493

Design of test facility capable of producing eight environments either singly or in combination 16 p2681 A66-30506

Feasibility of oxygen-helium atmosphere at 380 mm Hg total pressure proven by two-week exposure of four men 16 p2639 A66-31120

Pulmonary effects of two-week exposure of four men to helium-oxygen atmosphere at total pressure of 380 mm Hg 16 p2639 A66-31121

Thermal balance and heat exchange between four men exposed to helium-oxygen atmosphere at 380 mm Hg total pressure 16 p2639 A66-31122

Hamsters, mice and rats exposed to elevated oxygen tensions for 60-day periods with nitrogen at high or minimal levels 16 p2640 A66-31129

Thermal similarity study of models in space environmental chambers for deducing characteristics of typical space vehicle element [AIAA PAPER 66-460] 16 p2683 A66-31469

Electric conductivity of CdS single crystals in atmosphere, dry air, oxygen, water vapor, carbon dioxide and in transverse electric field 16 p2786 A66-31730

Regenerative life support system for four-man crew on long duration tests, noting biological constraint parameters 17 p2862 A66-32138

Gravitational environment, effect of change on frogs measured using gravitoceptors in vestibular apparatus 17 p2865 A66-32183

Tracer dilution technique for measuring quantity of urine voided by crew members in manned spacecraft environment 17 p2870 A66-32192

Thermal comfort zones for helium-oxygen and helium-nitrogen atmospheres at reduced pressures 17 p2865 A66-32193

Adaptive responses of adrenal cortex to some environmental stressors, exercise and acceleration 17 p2862 A66-33093

Vibration effects on chromosomes of *Tradescantia paludosa* and other microspores

subjected to Vostok satellite conditions 18 p3058 A66-33781

Environment influence on design and development of Black Knight rocket engine 18 p3163 A66-34211

Capacitance transducer for measuring capacitance ratios with minimum environmental problems, noting wide application range 19 p3355 A66-35470

Human performance in space simulation chambers and physiological limitations 19 p3288 A66-35838

Instrumentation for biophysical data acquisition for pressure-suited test subjects in space environment simulation testing 19 p3289 A66-35840

Physical and psychological aspects of man in space, examining oxygen supply, temperature extremes, meteorites, radiation and effects of confinement, isolation and sensory impoverishment 19 p3287 A66-36645

Nuclear radiation and liquid hydrogen effect on environmental mechanical properties of phenolic asbestos, glass and linen resins 20 p3587 A66-37097

Man rating requirements of space environment simulation laboratory, consisting of two large chambers with floors which can be cooled by liquid nitrogen down to 92 degrees K 22 p3892 A66-40239

Graphite, molybdenum and tungsten sulfides and calcium fluoride effective as solid lubricants in extreme environments 23 p4075 A66-41870

Polymeric materials, metals and lubricant compatibility with vacuum environment, considering radiation damage and thermal control effects 24 p4226 A66-42096

Book on project ERIE covering techniques for analytic evaluation of space equipment designs with respect to environments and missions required in 1975 24 p4217 A66-42572

Environment influence on design and development of Black Knight rocket engine 24 p4261 A66-42573

Bourdon-helix pressure-sensitive switch for air vehicle hydraulic system of XB-70A aircraft and other instruments operating in severe environment 24 p4213 A66-42824

Environmental testing and evaluation of useful life of insulation material for aircraft electrical equipment operating at 280 degrees C 24 p4229 A66-43083

ENZYME

SA AMIDASE

SA CARBONIC ANHYDRASE

Comparison methods for relationship among enzymes that are same but belong to different organisms 04 p0460 A66-13367

Substrate specificity of proteolytic enzyme thermolysin /Thermolase/ isolated from bacterial cultures 09 p1338 A66-20582

Purification of enzyme responsible for degradation of nicotine to 6-hydroxynicotine 09 p1339 A66-20877

Dipeptidyl-beta-naphthylamidase activated by chloride in extracts of rat and bovine anterior pituitary glands 13 p2010 A66-25900

Human blood enzyme response to 56-day exposure to oxygen-helium atmosphere at 258 mm Hg total pressure 18 p3057 A66-33771

Physical properties of DNA-dependent RNA polymerase from *Escherichia coli* 20 p3505 A66-37054

Metabolic correlates of glucocorticoid induction of enzymes in man studied in terms of ACTH induced changes in tryptophan turnover along inducible pathways 24 p4166 A66-43168

ENZYME ACTIVITY

Mechanism, prevention and treatment of oxygen toxicity in central nervous system, noting acetylcholinesterase activity 03 p0326 A66-13346

Mechanism of in vivo rbc damage by oxygen, noting effect on canine erythrocytes 03 p0326 A66-13348

Nature of particles involved in lipid synthesis in yeast 06 p0822 A66-16566

Participation of ferredoxin of clostridium nigrificans in sulfite reduction, describing transportation of electrons for sulfide formation 08 p1177 A66-18699

Crystalline lactic dehydrogenases in reaction with p-hydroxymercuribenzoate in urea 13 p2009 A66-25796

Molecular nitrogen photofixation relation to electron-donor respiratory system,

activity of hydrogenase and dehydrogenases and photosynthesis 13 p2010 A66-25893

Effects of alpha glycerophosphate and of palmityl-coenzyme A on lipid synthesis in yeast extracts 15 p2429 A66-28616

Structural and functional properties of heart and muscle type subunits of lactic dehydrogenases investigated, using comparative amino acid analysis 15 p2446 A66-28864

Stereospecific hydrolytic action of acylase studied by gas-liquid chromatography 17 p2869 A66-31871

Lysosomal enzymes in rats exposed to 100 percent oxygen to determine possibility of accelerated in vivo lipid peroxidation 17 p2857 A66-32169

Ribonucleoside triphosphatase in rabbit reticulocytes, discussing distribution in extracts, behavior in purification of amino acid and properties 17 p2859 A66-32553

Dipeptidyl arylamidase I of bovine pituitary tissue and chloride and sulphydryl activation of seryltyrosyl-beta-naphthylamide hydrolysis 17 p2861 A66-32899

Carbon dioxide control by enzymatic reaction in spacecraft atmosphere by hydrolyase and multienzyme system 19 p3293 A66-36240

Semiquantitative spot test detection of peroxide in low concentrations of hydrogen peroxide 20 p3510 A66-37056

Synthesis of peptides related to active site of esterase enzymes 20 p3510 A66-37633

Chloride requirement for cathepsin C 24 p4165 A66-43099

EOR

S EARTH ORBITAL RENDEZVOUS /EOR/

EPHEMERIS

Computation of approximate coordinates of Moon with estimation of accuracy over time interval of 50 years 02 p0292 A66-12235

Minor planets and ephemeris calculations with bibliography 02 p0292 A66-12262

System of astronomical constants adopted in 1965 by International Astronomical Union for introduction in 1968, discussing difficulties in consistency, compatibility and durability 03 p0429 A66-13195

Annual astronomical almanac compiled by Madrid Observatory 11 p1770 A66-22638

Minor planets, comets and satellites motions and positions in outline of present research 17 p2998 A66-32025

Two-star implementation by stellar inertial guidance system 18 p3133 A66-34047

Brown lunar theory interpretation of observed lunar motion and associated rectangular-to-polar lunar coordinate transformations 18 p3234 A66-34655

EPHEMERIS TIME

SA UNIVERSAL TIME

Lunar inequality on time of perihelion passages of Earth 04 p0576 A66-13461

Ephemeris time determined by photographic observation of Moon 10 p1606 A66-21261

Astronomical yearbook of Cracow Observatory covering ephemerides of 787 eclipsing binaries, Lagrangian points, precession coefficients, etc 11 p1768 A66-22333

Atomic standards of frequency and second of ephemeris time, discussing frequency of Cs 133 transition at zero field 14 p2296 A66-27899

EPILEPSY

Dissociation of rhinencephalic or thalamic self-stimulation and epileptiform activity in rats 20 p3506 A66-37602

EPINEPHRINE

Degree of mental stress correlated with excretion of catecholamine, free adrenaline and noradrenaline in urine 04 p0470 A66-14081

Protective effect of adrenaline, subgaleally injected, on survival time of rats subjected to acute hypoxia 06 p0811 A66-16064

EPITAXIAL DEPOSITION

Thin film epitaxial single crystal silicon on insulating substrate sapphire and advantages

of these microelectronic devices 01 p0048 A66-11145

Single crystal silicon films on sapphire in terms of materials properties and impact on thin film semiconductor microelectronics 01 p0048 A66-11146

Semiconductor diodes discussing germanium and silicon diode structures, ultrasonic chip bonding and epitaxial material effects on 03 p0348 A66-13344

Thin surface films covering structure, nucleation, growth and epitaxy observation techniques such as electron and X-ray diffraction field emission, field ion microscopy, etc 04 p0559 A66-13452

Relaxation oscillations in n-type epitaxial silicon with point contact, discussing generation via electrical excitation of impurity centers 05 p0731 A66-14655

Residual stress in epitaxial silicon film on sapphire measured by cantilever beam technique 05 p0733 A66-14673

Extrinsic and intrinsic epitaxially deposited single crystal gallium phosphide solar cells, noting conversion efficiencies 07 p0990 A66-17232

Potential distribution in epitaxial p-n semiconductor measured via moving light spot, determining deposition depth 07 p1106 A66-18382

Oxidation products of thin foils of titanium carbide, noting epitaxial growth relationship between titanium carbide, transient oxides and titanium oxide 07 p1052 A66-18512

Imperfection formation in epitaxial gold films, observing crystal-lattice dislocations due to rotation and displacement misfits between neighboring islands of deposit film 07 p1110 A66-18517

Kinetics of reactions in iodide method of growing epitaxial germanium layers 08 p1268 A66-18797

Heterojunction preparation by vacuum evaporation, describing epitaxial deposition of germanium on gallium arsenide substrate 08 p1270 A66-19058

Epitaxial silicon layer crystal growth at low temperatures by sublimation through thin alloy zones 08 p1271 A66-19224

Vapor etching of gallium arsenide crystals with hydrogen chloride, noting usefulness in pretreatment for epitaxial substrates 10 p1575 A66-21358

Microplasma breakdown in reverse biased p-n junctions in epitaxial gallium arsenide 10 p1577 A66-21571

Stacking-fault defects in epitaxial silicon layers grown on chemically polished substrates 10 p1578 A66-21576

Epitaxial, diffusion and photolithographic processes in manufacture of semiconductor component 10 p1514 A66-22056

Microwave oscillations in epitaxial layers of gallium arsenide 10 p1585 A66-22080

Electrophysical parameters of epitaxial p-n junction regions determined, using galvanomagnetic and photomagnetic measurements 11 p1751 A66-22734

Epitaxial growing of iron, nickel and cobalt single crystal films on sodium chloride crystals by spraying at 200 degrees C 11 p1753 A66-22805

Domain structure of single-crystal epitaxial iron films as function of perfection of crystalline structure, using Lorentzian electron microscopy, noting two-axis anisotropy 11 p1753 A66-22806

Anisotropy of films deposited on cylindrical substrate 11 p1754 A66-22812

Current dependence of resistivity and mobility measured in silicon epitaxial layers on control wafer 11 p1756 A66-23021

Electric current heating method to obtain high purity silicon epitaxial films 11 p1757 A66-23281

Sandwich method in closed system for growing semiconductor germanium epitaxial films 11 p1757 A66-23282

Low energy electron diffraction study of epitaxial deposition of copper on single crystal /110/ face of tungsten under ultrahigh vacuum 12 p1894 A66-23911

Low energy electron diffraction observation of calibrated epitaxial nickel film on /111/ copper 12 p1894 A66-23912

Doping techniques for epitaxial growth of silicon and germanium

layers 12 p1832 A66-23933

Growth and structure of evaporated silicon layers, noting defects due to stacking disorders 12 p1928 A66-23938

Polysilicon insulated gate field effect transistor having active element fabricated in epitaxially deposited film on oxidized single crystal silicon substrate 12 p1845 A66-24831

Epitaxial deposition of silicon by sublimation process at 750 degrees C, using ultrathin alloy zone crystallization 12 p1846 A66-24912

Single crystal silicon on spinel, achieving epitaxy on magnesia aluminate by Spilane pyrolysis and silicon chloride reduction in hydrogen atmosphere 13 p2158 A66-25053

Microstructure of epitaxial germanium films deposited on calcium fluoride substrates, noting parameters of deposition 13 p2158 A66-25063

Transport equation for germanium-gallium arsenide-iodine system and epitaxial vapor growth preparation of GaAs-Ge heterojunction by closed tube process 13 p2161 A66-25185

Epitaxial vapor growth of germanium from germanium iodide with hydrogen and argon atmosphere, examining various growth parameters 13 p2161 A66-25193

Moving deposition zone technique for controlling nucleation and growth of silicon films on hexagonal silicon carbide substrates 13 p2164 A66-25491

P-n-p and n-p-n silicon epitaxial power transistors, noting geometry vs output for interdigitated structures 13 p2037 A66-25542

Single crystal silicon epitaxy growth on foreign substrates by chemical vapor deposition techniques, noting epitaxial geometry 13 p2113 A66-25648

Relaxation oscillations in n-type epitaxial silicon with point contact, discussing generation via electrical excitation of impurity centers 13 p2167 A66-25930

Microscopic and electron diffraction structural analysis of epitaxial growth of PbTe by sublimation on split surface of NaCl at 150 degrees C in vacuum 13 p2170 A66-26757

Improved performance in microwave Read diode oscillator with epitaxial silicon material and coaxial cavity 14 p2248 A66-27049

Electron diffraction study of structural defects in cubic phases in epitaxial tantalum oxide thin films 15 p2557 A66-28560

Degree of perfection of Ge and GaAs single crystals and epitaxial films effect on integral intensity jump at K absorption edge seen in Bragg diffraction 15 p2557 A66-28561

Epitaxial growth of silicon on basal plane of hexagonal silicon carbide substrates analyzed, using silane pyrolysis in flow system, evaluating effects of deposition variables on grown film properties 15 p2561 A66-28703

Preparation, X-ray measurements and photovoltaic properties of Ge-epitaxial-PbS heterojunctions 15 p2562 A66-28710

Electric characteristics of epitaxial Ge films vacuum deposited on seminsulating GaAs substrates with thicknesses near one million angstroms 15 p2566 A66-29386

Pump modulation factor of various GaAs and Si varactor diodes under operating conditions, noting experimental bandwidth gain via increased shot noise 16 p2663 A66-31017

Epitaxial growth configurations of single-crystal potassium bromide on sodium chloride, using gold decoration method, showing effect of crystal orientation on growth rate 16 p2780 A66-31213

Germanium single crystal whisker formation by iodide method of selective epitaxial growth 16 p2781 A66-31405

Selective epitaxial deposition of seminsulating GaAs for p-n junction and integrated circuit application 16 p2665 A66-31418

Deposition of single-crystal silicon films on sapphire substrates by pyrolytic decomposition, noting properties 16 p2782 A66-31419

Epitaxial growth of low pressure sputtered-silver films, noting dependence of growth on kinetic energy distribution of

sputtered atoms 16 p2784 A66-31532

Epitaxial growth of single crystal, impurity free metal films using clean alkali halide surfaces in ultrahigh vacuum 16 p2784 A66-31534

Vapor growth of Ge on Ge, GaAs and Si substrates, noting preparation methods, characteristics, etc 16 p2786 A66-31686

Epitaxial growth techniques for silicon and germanium, discussing hydrogen reduction methods, doping and impurity control, etc 17 p2976 A66-32259

Surface state density of MOS structure, noting difference between gas deposited and thermally grown samples 17 p2978 A66-32405

Epitaxial growth of semiconductors in isothermal system approaching thermodynamic equilibrium, noting growth parameters, activation energy, etc 17 p2886 A66-32495

Structural defects in epitaxial films noting nucleation mechanism, stacking faults, growth defects, etc 17 p2985 A66-33157

Spectral and spatial distribution of origin of injection luminescence from epitaxial gallium arsenide transistors, noting correlation between energy peak and radiation recombination 17 p2986 A66-33295

Nickel, nickel-zinc and magnesium-zinc ferrite thin films, using chemical deposition on alumina substrates for millimeter wave application 18 p3153 A66-33732

Hydrogen reduction techniques and layer quality measurement methods for epitaxial growth of silicon and germanium crystals 19 p3437 A66-35473

Carrier mobility and concentration in epitaxial silicon layers obtained by vacuum sublimation 19 p3442 A66-35866

Measurements on physical and laser properties of vapor-grown ruby single crystals prepared by epitaxial growth 19 p3375 A66-36081

Isolated GaAs transistors on high resistivity GaAs substrate, noting production via epitaxial etch-refill technique, performance and isolation 20 p3616 A66-37405

Silicon variable capacitance diodes with high-voltage sensitivity produced by low-temperature epitaxial growth technique 20 p3528 A66-37494

Normal incidence reflectivity and transmissivity coefficient measurements in Ge thin epitaxial films 20 p3623 A66-38397

Model estimate of oxygen concentration captured from residual gases by epitaxial germanium and silicon films prepared by vacuum deposition 21 p3795 A66-38521

Transmission electron microscopic analysis of initial epitaxial growth stage of evaporated Au films on NaCl cleavage surfaces 21 p3798 A66-38758

Heteroepitaxial deposition of films of germanium in single-crystal form on sapphire by vapor growth techniques 21 p3802 A66-39163

Experimental molecular beam study of nucleation process in chemical-vapor growth of epitaxial silicon films 21 p3805 A66-39588

Transmission electron microscopic and molecular beam study of nucleation and growth in chemical vapor of epitaxial silicon films on carbon-contaminated silicon substrates 21 p3806 A66-39589

1.60 micron stimulated and spontaneous emissions from epitaxial single crystals in quasi-binary III-V compound semiconductor diodes of injection lasers at 77 degrees K 22 p3930 A66-39750

Change in temperature conditions during growth of epitaxial germanium films from molecular beam in vacuum 22 p3961 A66-39928

Effect of donor Zn and Cd additions and acceptor Se and Te additions on rate of growth and morphology of epitaxial GaAs films grown from gas phase by chemical reaction 22 p3961 A66-39929

Epitaxial germanium films on gallium arsenide substrate by vacuum evaporation, considering surface preparation 22 p3963 A66-40106

Four-point probe technique to measure conductivity of epitaxial layers on conducting substrates 23 p4110 A66-41157

Electron diffraction study of structural defects in cubic phases in epitaxial tantalum

- oxide thin films 23 p4112 A66-41281
- Degree of perfection of Ge and GaAs single crystals and epitaxial films effect on integral intensity jump at K absorption edge seen in Bragg diffraction 23 p4112 A66-41282
- Electrophysical parameters of epitaxial p-n junction regions determined, using galvanomagnetic and photomagnetic measurements 23 p4113 A66-41472
- Epitaxial growth techniques used to obtain graded layers for drift field structured solar cells on Si web 23 p4019 A66-41747
- Sputtering voltage and current effects on resistivity of films sputtered from pure tantalum appear to be traceable to pressure and growth rate 24 p4251 A66-42297
- Epitaxial growth of bulk quality GaAs on GaAs and Ge substrates, using hydrogen stream saturated at room temperature with arsenic chloride 24 p4251 A66-42307
- Tin and zinc diffusion from doped pyrolytic silicon oxide layers used to form base regions of planar n-p-n and p-n-p-GaAs transistors 24 p4254 A66-42384
- Contour epitaxial deposition for semiconductor devices and integrated circuits, producing regions with well defined doping and geometry in crystal with flat surface 24 p4181 A66-42386
- MOS transistor structures with enhancement mode of operation, discussing fabrication processes via V-C characteristics, temperature effects on performance, etc 24 p4181 A66-42389
- Temperature dependence of Hall coefficient and resistivity of n-type epitaxial gallium arsenide in 4.2 to 300 degree K temperature range 24 p4254 A66-42423
- Evaporation system for fabrication of multilayer dielectric films for mirrors or filters, obtaining thickness variation reduction and simultaneous deposition 24 p4218 A66-43163
- EPOXY RESIN**
- Use of monofilament composites of S-glass fibers and epoxy-resin in primary aircraft structure [AIAA PAPER 65-761] 05 p0772 A66-14729
- Griffith flaw theory in analyzing failures in epoxy castings [ASME PAPER 65-WA/RP-6] 05 p0779 A66-15631
- Aircraft fuel tank coating corrosion resistance, discussing polyurethane and epoxy material characteristics and application 07 p1053 A66-17491
- Printed circuit laminate measling, definition, origin, effects and control 11 p1664 A66-22673
- Multilayer circuit laminate fabrication and comparison of glass-base laminates with phenolic-paper-base and epoxy-paper-base grades 11 p1664 A66-22675
- Thermal properties, tensile strength and uses of combination of glass fiber and epoxy resin material, Fiberglass S/994/, in space vehicles 12 p1899 A66-23966
- Surface area, complexes and water effect on properties of carbon fiber resin composites 13 p2111 A66-25166
- 24-channel recorder for stress-strain states due to thermal effects of operating epoxy-resin machine components 13 p2080 A66-25914
- Embedding and encapsulating processes and design of embedding materials for electronic packaging 17 p2944 A66-33525
- Microwave energy attenuation by dissipative material consisting of epoxy resin loaded with fine powder of iron carbonyl 20 p3587 A66-37585
- Use of monofilament composites of S-glass fibers and epoxy-resin in primary aircraft structure [AIAA PAPER 65-761] 23 p4083 A66-40979
- Stress-strain determination in elastoplastic problems with aid of photoelastic epoxy resin coating 23 p4135 A66-40990

Satellite position prediction and display /SPAD/ naval equipment that will predict, display and determine selected satellites 02 p0215 A66-11699

Effect of thermal instability in shop areas, static and dynamic loading and floor movement on precision fabrication and assembly [SAE PAPER 650759] 05 p0688 A66-15274

Long-term storage effects on reliability of electronic equipment, covering testing results and available data on failure rates 12 p1830 A66-23755

Defense equipment reliability noting specifications, field data collection, control plan, etc 12 p1833 A66-24083

Book on project ERIE covering techniques for analytic evaluation of space equipment designs with respect to environments and missions required in 1975 24 p4217 A66-42572

**ERBIUM**

Laser characteristics of and coherent oscillations from trivalent Tm, Ho, Yb and Er ions in yttrium aluminum garnet 01 p0079 A66-10241

Laser lines due to energy transfer from color centers to erbium ions in calcium fluoride crystals irradiated by gamma ray 16 p2717 A66-30278

Electrical conductivity and thermoelectric measurements of intermediate phases in erbium tellurium system 17 p2979 A66-32631

Electron paramagnetic resonance and optical spectra of trivalent erbium in type II crystals of calcium fluoride disclose existence of cubic, tetragonal and trigonal sites 22 p3961 A66-39916

**ERBIUM ALLOY**

Electrical resistivities of gold-erbium alloys measured at low temperatures 12 p1933 A66-24919

**ERBIUM COMPOUND**

Electric conductivity and thermoelectric power measurements in Er-Se system indicates degenerate

semiconductors 04 p0562 A66-13736

CW laser action in holmium-doped erbium trioxide with dominant pumping by energy transfer between ions 24 p4222 A66-42555

**ERGODIC PROCESS**

Markov chains, skew products and ergodic theorems for general dynamic systems 01 p0095 A66-10731

Coding theorems for almost-periodic channels 05 p0638 A66-15362

Topological property of torus to study ergodicity of integrals of systems of periodic differential equation in absence of cyclic solutions 07 p1055 A66-17243

Markov chains with discrete accident intervention forming semi-Markov process, considering application to single-line mass servicing system with queue 12 p1902 A66-23766

Book on ergodic problems in comparison theory and theory of diophantine, discussing residue distribution of polynomial of nth order modulo p, fractional parts of polynomial and exponential function 15 p2529 A66-29767

Statistical structure of meteorological field, with attention to ergodic properties 18 p3129 A66-34100

Wiener filtering theory for stationary ergodic inputs with known spectral densities and optimal control transfer functions of random-input nonlinear saturating systems with random unwanted disturbances 20 p3536 A66-36859

Transition matrices of ergodic finite Markov chains and readiness models in cost effectiveness systems analysis 20 p3681 A66-37176

Ergodicity of trajectories in systems with two periodic differential equations and two sets of unknowns 20 p3591 A66-37815

Uniformly ergodic random processes with discrete parameters 20 p3592 A66-37816

Noncollision ergodic shock wave propagating in plasma situated in magnetic field and thermal oscillation effect on thermonuclear kinetics 21 p3787 A66-39052

Optimum pulse transfer functions for multivariable digital ergodic stochastic processes 23 p4051 A66-41853

Error estimates for some finite difference methods of solving ordinary linear differential equations 01 p0092 A66-10315

Covariance matrix approximation and conservative error volume estimate 02 p0249 A66-11568

Distance-and velocity-measurement errors in coherent-pulse systems with periodic modulation law 06 p0837 A66-17180

Errors in approximation equations for dynamic bending of cylindrical rod 08 p1308 A66-18889

Reabsorption of synchrotron radiation as error source in discrete radio emission source parameter determination 08 p1297 A66-19450

First order error analysis, radar antenna calibration technique and polarization scattering matrix 10 p1501 A66-21627

Computational data smoothing by minimum mean square error estimation 10 p1550 A66-21839

Incorrect input-induced errors in meteorological satellite photogrids 11 p1704 A66-22318

Component tolerance and measuring error effects on noise measurements 11 p1652 A66-22384

Systematic error in processing series of analog data 11 p1707 A66-23058

Error propagation at above information limits postulated by Shannon sampling theorem and Gabor expansion theorem 11 p1657 A66-23105

Differences in MHD emission occurrence times, considering ionospheric penetration propagation toward equator and error sources 11 p1701 A66-23150

Modified phase-plane delta method for nonlinear system phase portrait 11 p1679 A66-23270

Optimal control systems and numerical analysis of error effect on sensitivity 11 p1680 A66-23274

Stray radiation error reduction in spectral emittance measurements for diffusely reflecting materials 11 p1737 A66-23410

Error analysis for statorscope or radar altimeter phototriangulation readings and radio geodetic coordinate photography phototriangulation 12 p1867 A66-23517

Optimum design and error analysis of digital integrators for discrete system simulation via quasi-linearization 12 p1828 A66-23840

Time resolution error of measured correlation function, based on frequency response of hot-film and hot-wire anemometer 12 p1880 A66-23847

Dynamic range bounds of error detection circuits of tracking radars, minimizing probability of excluding Rayleigh distributed signal 12 p1817 A66-24302

Calibration problem of load-measuring instruments solved, using automatic digital voltmeter [ASTME PREPRINT IQ66-705] 12 p1882 A66-24412

Microwave component testing accuracy and analysis of error sources 12 p1883 A66-24725

Error bounds in phase-integral solution to differential equation with simple turning points 13 p2118 A66-25829

Error bounds of phase-integral methods applied to wave-penetration problems 13 p2118 A66-25830

Iterative approximation of rational transfer function in Laplace transform variable  $s$ , optimal with respect to given input and output time functions, and deviation from desired output-input-time functional relation 13 p2054 A66-26087

Residual error probability for cyclic binary code data transmission on symmetrically random noise channels 14 p2245 A66-26795

Enthalpy of gas stream, calorimeter surface treatment and heat transfer measurement errors in arc-heated tests 14 p2411 A66-27425

Error in tracking loops as satellite passes over tracking system 14 p2265 A66-27480

Theoretical and experimental study of accuracy of Diane interferometric tracking network 14 p2238 A66-27545

Averaging error of system of nonlinear differential equations with time periodic right-hand sides 14 p2322 A66-27674

Atmospheric noise FSK error probabilities for envelope detection

receiver 14 p2243 A66-28352

Error coefficients and astatism estimation for controllable system in normal operation 14 p2268 A66-28353

Critical Human Performance and Evaluation /CHPAE/ Program methods for evaluating and predicting human performance and potential error probabilities 14 p2231 A66-28422

Error bounds based on a priori inequalities for solutions of boundary value problems for linear elliptic partial differential equations 16 p2731 A66-30236

A posteriori error bounds in iterative matrix inversion 16 p2732 A66-30238

Error estimation in diode function generator design 16 p2659 A66-30518

Effect of modifying digital filter weights derived on least squares error basis through multiplication by certain weighting functions 16 p2659 A66-30535

Errors in state vector arising from impulse representation of finite pulse width sampled data system 16 p2672 A66-31338

Numerical differentiation by differential quotients, interpolations, Richardson-Romberg algorithm and other methods, including analysis of approximation errors 16 p2658 A66-31347

Finite difference estimation of boundary value problem errors 17 p2945 A66-31878

Zero-level drift errors in telemetry 17 p2873 A66-31965

Assessment of error of method of successive approximations in determination of circular plate deflections 17 p3026 A66-32598

Checkout procedure for automatic test systems, checkout error probability and relation to tolerance limits 17 p2888 A66-32777

Maximum error curves for Lanczos selected point method of polynomial solution to ordinary differential equations, using Chebyshev and Legendre functions 17 p2947 A66-32858

Error analysis of absorbed energy flux density and ignition exposure time data, accuracy, precision and confidence limit estimates for arc image furnace ignition experiments 18 p3261 A66-34224

[AIAA PAPER 66-669] Reabsorption of synchrotron radiation as error source in discrete radio emission source parameter determination 18 p3169 A66-34479

Inertial navigation technique based on least squares criteria of optimality with filter providing estimates of system errors 19 p3396 A66-35517

Distance-and velocity-measurement errors in coherent-pulse systems with periodic modulation law 19 p3297 A66-35538

Extreme value statistics estimation of low error probabilities in binary communication systems 19 p3301 A66-35688

Multifactor Max-Rankine optimization technique evaluated from point of system performance, minimum mean square error, intrasystem interactions, etc 19 p3325 A66-35878

Error estimates for difference methods in forced vibration problems 20 p3589 A66-36901

Low error probabilities in binary communication systems estimated by statistics of bivariate extreme-value theory 20 p3514 A66-37211

Critical Human Performance and Evaluation /CHPAE/ Program 20 p3509 A66-37893

Radar target tracking error induced by ground reflection of radar echo from static beam split autotracking radar 20 p3520 A66-38142

Integral criterion based on absolute value of error, integral-square-ideal error, used as measure of distortion of communication system 20 p3539 A66-38285

Distortions and errors in calculating structural and correlation functions from experimental results 20 p3594 A66-38377

Distortions and errors in calculating spectral densities from finite series of random function values 20 p3594 A66-38378

Error analysis for statorscope or radar altimeter phototriangulation readings and radio geodetic coordinate photography phototriangulation 21 p3732 A66-38661

Waveform analysis of electronic repetitive differential analyzer solutions of nonlinear and linear systems and describing functions evaluation using vectormeter 21 p3739 A66-39275

Sampling theorem for Fourier transform reconstruction of band-limited signals, applications to stationary stochastic processes and analysis of round-off, truncation and random errors 22 p3884 A66-40168

Chain code method of eliminating LF drift disturbance error in calculation of impulse-response function of time-invariant system 24 p4187 A66-42368

Errors effect in determining primary energy on measurement of characteristics of nuclear interactions in cosmic radiation, considering energy spectrum 24 p4267 A66-42906

Error free recovery of signals from irregularly spaced samples in terms of completeness of sets of nonharmonic exponentials 24 p4189 A66-43202

**ERROR BAND**

Improvement on Montgomery prediction of error probability in intermittent system operating during short intervals when SNR is above certain threshold level 12 p1816 A66-24138

Control of radio telescope, noting servosystem ability to keep tracking position errors and wind-caused error within certain limits 12 p1851 A66-24319

Radiolocation theory compared with communication theory, noting trading of frequency bandwidth of radar signal for error suppression 15 p2535 A66-29860

Inertial components and systems evaluation with figures of merit for requirements, noting accelerometer errors, limiting response, etc 16 p2707 A66-31148

Maximum permissible error in radiation patterns calculated by Fourier analysis of near field measurements of antennas 22 p3861 A66-39716

**ERROR CORRECTING DEVICE**

Recognition procedure identifying given star constellation despite erroneous scanning, for application in celestial navigation 01 p0102 A66-10619

Shock and vibration measurement system with error correcting techniques including dynamic calibration data, noise detection, etc [SAE PAPER 650820] 01 p0069 A66-10822

Reseau techniques application to cartographic photography to improve analytical procedures, reduce mensuration errors and aid in automating systematic corrections 02 p0228 A66-11382

Learning matrices based on redundancy principle as nonadaptive self-correcting adjustment switches and error detectors in electronic systems 04 p0489 A66-13510

Optimum signal shape for transmission of discrete information, discussing signal-noise characteristics 04 p0488 A66-14414

Error correcting learning machines application to unknown linear dynamic systems 05 p0653 A66-14602

Resampled data systems and error between output of second sampler and input signal to first sampler [ISA PREPRINT 1.12-3-65] 05 p0635 A66-15504

Phase-correcting circuit design methods for equalizing phase characteristics of high sensitivity communication channels 07 p1001 A66-17343

Compass performance improvement, discussing Sperry C-12 compass system accuracy, operational features, etc 07 p1033 A66-17721

Horizontal and vertical control system for determining three-dimensional coordinates in lunar charting by aeronautical chart and information center 08 p1293 A66-19263

Error damping procedures for gimballless inertial navigational systems 08 p1253 A66-19528

Feedback method for reducing errors of counter telescopes due to missed counts and accidental coincidences 09 p1379 A66-20235

Elimination of coupling error between gyroscope and platform, considering rate-integrating gyros with inertial platform 09 p1382 A66-20563

Halley comet motion during return of 1910, obtaining orbits via differential correction procedures, including perturbation by all planets but Pluto 11 p1769 A66-22531

Recognition procedure identifying given star constellation despite erroneous scanning, for application in celestial navigation 13 p2123 A66-25179

Combined automatic control systems with automatic adjustment of amplification coefficient of disturbance controller for error reduction 13 p2045 A66-25300

Accuracy of test device determining conductivity of semiconductor materials increased by using error calculation and design systematology 13 p2085 A66-26761

Reduction of measurement error in devices for testing semiconductors, employing mechanical techniques 14 p2297 A66-28132

Errors in wind speed measurements under conditions of turbulence, noting quantitative aspects of lateral, vertical and data processing errors 15 p2533 A66-28940

Aircraft navigational error parameters combined statistically and used to evaluate wander expected in transport aircraft operating in transoceanic environment 15 p2535 A66-29624

Binary block codes simultaneously correcting additive and synchronization errors in data transmission systems 15 p2452 A66-29660

Synthesis of correcting units for automatic control systems, using quasi-invariance condition 15 p2476 A66-29995

Minimum time control systems with servoloop relay for optimal error correction, employing matrix analysis 16 p2671 A66-31061

Communications system design consisting of sequential encoder-decoder in conjunction with modulation detection 18 p3067 A66-33903

Phase characteristics and amplitude of correcting device ensuring closed loop mechanical system stability at critical frequency 18 p3092 A66-34995

Automatic failure detection, location and correction system for failures in unmanned spacecraft using frequency-shift-keyed subcarrier 19 p3316 A66-35679

Feedback methods for conversion of electrical signals into frequencies, using oscillator with signal-current-controlled inductance 19 p3325 A66-35988

Flame temperature measurement using response time of Wolfram-rhenium thermocouples to correct radiation errors in optical pyrometer readings 19 p3360 A66-36160

Digital computers used in error calculation in calibration curves of turboengines and other pneumatic devices 20 p3555 A66-36923

Fourier transform used in correction of instrument contour error when observing solar spectral line profile 20 p3647 A66-37042

Existence of q-ary uniform convolutional codes where q is any prime-power, noting error-correcting ability comparable to familiar maximal-length block codes 21 p3704 A66-39138

Self-synchronizing codes derived from binary cyclic codes 21 p3720 A66-39635

Error correcting problem in space trajectory of continuous powered space vehicle, discussing optimal terminal guidance [AIAA PAPER 65-696] 22 p3945 A66-40367

Integral monitor development for ILS localizer, predicting changes in track position and width, noting principles of operation and performance 23 p4044 A66-41322

Automatic detection and correction of errors in digital computers by using residue arithmetic, whether caused by arithmetic operations or data transmission operations 23 p4042 A66-41602

**ERROR DETECTING CODE**

Parallel decoding for discrete channel with statistically independent noise 02 p0189 A66-11404

Optimum detection of diffusion process in white Gaussian noise, using continuous observation 02 p0190 A66-11405

Insertion of 2 bits of specific code into frame of digital data of burst-error-correcting code for synchronism recovery 02 p0190 A66-11524

Mathematical structure and characteristics

of codes used in transmission over nonsymmetric channels 02 p0209 A66-12020

Error control systems in digital communications accomplished by adding constraints to digital alphabet through coding 04 p0481 A66-13766

Error control over wide frequency range through adaptive dynamic channel equalization system 06 p0825 A66-15987

Extension, modification and analysis of Gorenstein-Zierler decoding algorithm for binary codes of Bose, Ray-Chaudhuri and Hocquenghem /BCH/ correcting erasures and errors 06 p0837 A66-16114

Codes with variable parameter based on use of properties of magic squares 06 p0837 A66-16510

Jittered sampling obtaining error bounds for sample independent and correlated jitter and bandpass sampling 06 p0865 A66-16742

Nonbinary codes used to improve noise rejection and reliability of telemechanical systems 09 p1361 A66-20315

Simultaneous error correction and burst error detection, using binary linear cyclic codes 09 p1347 A66-20643

Upper and lower estimates derived for Shannon reliability of information transfer in channel that is symmetrical with respect to input 09 p1397 A66-20648

Generation, selection and implementation of burst-error-detecting and -correcting Fire code, using computed tables 10 p1496 A66-21513

Telemetric technique based on data modulation and coding for satellite data transfer, stressing noise suppression, operation flexibility, error correction, etc 11 p1651 A66-22366

Influence coefficients for computation of atmospheric components of reentry vehicle circular error probable /CEP/, using Bliss adjoint method, noting effects of certain inadequacies on system performance [AIAA PAPER 66-358] 12 p1908 A66-24517

Errors by mutual interference in frequency-time coding in satellite communications systems, deriving expressions relating commissive and omissive error rates, simultaneous users per unit bandwidth, etc 12 p1821 A66-24752

Phase shift keying with transmitted reference, obtaining probability of error for m-phase receiver system in presence of additive Gaussian noise 13 p2019 A66-25147

Near minimal set of tests detecting all single faults in combinational logic net, using shortcut methods 13 p2040 A66-25804

Codes with variable parameter based on use of properties of magic squares 13 p2028 A66-25950

Mathematical structure and characteristics of codes used in transmission over nonsymmetric channels 14 p2266 A66-27571

Shortened cyclic codes for multiple burst error detection 14 p2245 A66-28041

Error detection techniques for maximizing average rate of information transmitted through burst error channel 14 p2243 A66-28346

FM error calculation via comparison of demodulated output with input 16 p2649 A66-30544

Visual and tactile display for compensatory tracking, noting conditions for minimum error, mean square error, etc 16 p2644 A66-31271

Accuracy problems in control systems, discussing error assessment and accuracy estimates of optimal control 17 p2902 A66-32576

Vibration analysis of CSIRO 210-ft radio telescope, discussing natural frequencies, structure resonance effects, error detection, etc 18 p3083 A66-34297

Cyclic product codes operating in variable redundancy modes used in communications systems, noting protection against errors 19 p3296 A66-35336

Auxiliary autonomous piggyback detector and recorder system for spacecraft failure detection following touchdown 19 p3315 A66-35676

Noise immunity of summation codes that enable all errors of one polarity to be detected in code 20 p3511 A66-37126

Zero defects program, discussing principles, operation and results [ASME PAPER 66-MD-26] 21 p3837 A66-38482

Generalized minimum distance decoding that permits likelihood information to be used, yielding same probability of error as maximum likelihood decoding 21 p3703 A66-39137

Coded and phase-modulated signals detected by receiver containing phase detector and decoder operating algebraically on quantized phase values, using polynomial representation 21 p3704 A66-39139

Upper and lower bounds on binary error probability as function of signal to noise ratio for digital data systems operating over complex Gaussian fading channel 21 p3720 A66-39638

Nonsupervised sequential pattern recognition and classification, analyzing Bayes solution 21 p3720 A66-39640

Error probabilities in binary transmission of signals over selectively fading diversity channels containing specular and scatter type components 22 p3864 A66-40058

Theoretical methods for reliable machine design, comparing redundant residue number system code with linear codes and majority voting techniques 23 p4042 A66-41603

**ERROR FUNCTION**

Asymptotically accurate estimates of Bubnov-Galerkin method error in eigenvalue problem as applied to boundary value problem 01 p0091 A66-10162

Multidimensional homogeneous difference schemata solving eigenvalue problem with elliptic operator, noting differential equation coefficients and eigenfunction error estimate 01 p0092 A66-10166

Rational approximations to generalized hypergeometric functions and error function proven to converge to desired limit 01 p0093 A66-10384

Statistical determination of error variance and application to variance analysis of electrical or mechanical components 01 p0095 A66-10872

Error estimate in obtaining eigenvalues of linear self-adjoint differential operator of elliptical type by finite difference method 01 p0095 A66-11008

Data analysis and estimation of probability of finding sought magnitude within experimental error limits 02 p0261 A66-11810

Function for which error functional attains its maximum value as sphere constitutes solution of polyharmonic equation 02 p0250 A66-12109

Prediction error of time series from finite past 03 p0387 A66-12619

Behavior store, memory store and experience store of learning automation 04 p0489 A66-13483

Radar localization deviations, examining infinitely-long conducting cylindrical obstacles 04 p0488 A66-14413

Optimum message decoding in communication systems with pulse code modulation, using minimum square-error criterion 04 p0489 A66-14415

Evaluation of methods for estimating circular error probable /CEP/ or system accuracy of ballistic missiles employing inertial navigation systems 04 p0544 A66-14444

Error effect in a priori information on sequential estimate variance of linear system states, noting optimal filter synthesis 05 p0653 A66-14601

Worst case error analysis for systems with bounds on forcing function and time derivatives, using Pontryagin maximum principle 05 p0636 A66-14612

Probability of error for quadratic digital detectors contaminated by Gaussian noise 05 p0649 A66-15184

Optimum reception of M-ary Gaussian signals in Gaussian noise in terms of waveform with minimum error probability 05 p0634 A66-15185

Theory of errors when principal stresses are separated in photoelasticity for higher accuracy 05 p0775 A66-15301

Atmospheric noise effect on performance of noncoherent frequency shift keying /NCSKF/ under fading conditions compared

with that obtained when noise is Gaussian 06 p0830 A66-16335

Communication through unknown or random channel, using part of transmission energy to identify channel parameters by receiver 06 p0830 A66-16337

Error probability limitations caused by multipath and Doppler smear in Kathryn modem 06 p0831 A66-16339

Classification of unknown observations into one of two categories when decision boundary is determined from independent samples in each category 06 p0833 A66-16660

Optimum distribution of correcting pulses in single parameter correction 06 p0957 A66-17168

Maximum accuracies of parameter estimates for complex signals reflected from several points 06 p0837 A66-17191

Fluctuation errors of analog correlation meters under time displacement of random signals 07 p1031 A66-17356

Calculation of integrals of infinitely differentiable functions, showing error estimate by network method for periodic functions 07 p1056 A66-17597

Doppler radar accuracy investigation, noting wide distribution of systematic error 07 p1064 A66-17668

Route structure and navigation system error over North Atlantic and advantages of SST inertial navigation system 07 p1068 A66-17701

Error effects in forecasting wind speed and direction on equivalent headwinds and flight times 07 p1063 A66-18338

Rounding off effects on mathematical expectation of random error in measurements involving n-dimensional quantity given in vector form 07 p1061 A66-18508

Error estimates in application of linear plate theory to deflection and stress determination as function of boundary conditions, correlation between geometric plate parameters and load distribution 08 p1305 A66-18599

Reliability of automatic control systems, considering properties of controlled plant, taking error probability in control as criterion 08 p1201 A66-19691

Accuracy of Iaryshev equation for determining errors in surface temperature measurements due to heat losses in sensor 09 p1380 A66-20314

Errors in measuring correlation function of two random processes represented in form of voltages 09 p1345 A66-20444

Summation of errors with variable distribution parameters in finishing and assembling of batches of parts 09 p1384 A66-20766

Error assessment in antenna radiation patterns at small distances by means of collimator which shapes plane wave region 09 p1358 A66-20807

Error bounds in best approximation of given function in Banach space constrained by inequality relationships 11 p1722 A66-22984

Tabulation of constants in two types of error estimates for Romberg quadrature formulas 11 p1722 A66-22985

Computer calculation of depletion layer properties of simultaneously-diffused, double-diffused and triple-diffused transistors 12 p1832 A66-23964

Atmospheric vertical temperature profile determined from outgoing radiation spectrum, evaluating error probability and accuracy 12 p1874 A66-24869

Optical system correction through coefficient selection of aspheric surface, computing vector sums of all aberration orders to give spot diagrams and light distribution in image 14 p2334 A66-27317

Solution of quasi-static problem in thermoelasticity for cylinder with time dependent boundary conditions obtained as series of Bessel functions and error functions 14 p2397 A66-27385

Stability analysis of symmetrically loaded thin walled spherical shell, noting construction of asymptotic expansion, error estimation and application of elasticity theory 15 p2608 A66-28955

Error estimates for approximation formulas for Bessel functions and Hankel functions

obtained, using Luke trapezoidal rule 16 p2736 A66-31021

Error determination in autonomous determination of coordinates, obtaining solution for kinematic equations of navigation in near-polar region 16 p2744 A66-31146

Absorbance and emittance of metal surfaces determined via cyclic incident radiation, noting error computation and method accuracy parameters 16 p2829 A66-31487

[AIAA PAPER 66-416] Integrating error equations of inertial navigation system for objects in Keplerian motion 16 p2744 A66-31507

Maximum increase in system error due to computer round-off errors for closed loop linear sampled data system 17 p2900 A66-32075

Reliability of automatic control systems, considering properties of controlled plant, taking error probability in control as criterion 18 p3091 A66-34676

Maximum accuracies of parameter estimates for complex signals reflected from several points 19 p3297 A66-35549

Error equations of inertial navigation with special application to elliptical orbital determination and guidance [AIAA PAPER 65-691] 19 p3397 A66-35898

Sensitivity analysis and Liapunov stability, discussing correctly set problem and parametric imbedding within theory of partial differential equations 19 p3326 A66-36010

Sensitivity theory of nonlinear sampled data control system, establishing conditions for stability of equilibrium positions 19 p3327 A66-36012

Optimal control system sensitivity to inaccuracies determined in error measurement of initial state 19 p3329 A66-36028

Vibrations of complex structure analyzed, using coordinate system relative to displacement modes, calculating errors due to natural vibration frequencies 21 p3826 A66-38584

Atmospheric vertical temperature profile determined from outgoing radiation spectrum, evaluating error probability and accuracy 22 p3912 A66-40330

Error correction in Vlasov equations of continuity of deformations in curvilinear coordinates 22 p3948 A66-40374

Prediction of rocket engine flight performance with less than 2 percent error in specific impulse data measured at sea level 23 p4120 A66-41111

Combination of probability density functions for system error analysis, using convolution or transformation methods 24 p4189 A66-42827

Optical measurements and navigation during midcourse and orbital phases of space mission, deriving linear equations for propagation of time dependent navigation errors [AGARDOGRAPH 105] 24 p4176 A66-43127

## ERROR SIGNAL

Proportional pneumatic actuation system reliability using variable hydraulic damping, noting role of error and error rate signal 03 p0324 A66-13219

Linear smoothing method minimizing mean-square error in time series where signal statistics are unknown and noise is additive, deriving filter 05 p0653 A66-14600

Transfer function identification of linear time-varying system with input and output signals available in sampled data form [ASME PAPER 65-WA/AUT-16] 05 p0659 A66-15620

Error probability computation for incoherent diversity reception in multichannel communications 06 p0828 A66-16111

Finite wide-sense stationary sequence followed by another sequence corresponding to linear filtering without delay, minimizing mean square error 06 p0828 A66-16116

Series analysis of closed-loop system containing loaded hydraulic valve, with equations of motion and response of system to ramp input and Coulomb load 06 p0810 A66-16915

Error in checkout systems for space or weapon systems 08 p1223 A66-18740

Optimum quantization step for given distribution law of quantized signal, using minimum error distortion criteria 11 p1674 A66-2220

Error analysis in dynamic measurement rotation rate when converting mechanical to electrical quantities 11 p1708 A66-2323

Hybrid PCM-FM communication system noting quantization error and threshold characteristics 13 p2020 A66-2521

Optimum systems with limited processing information, analyzing class of input signal and minimizing amplitude of error signals 13 p2048 A66-2588

Scintillating target intensity effect on performance of PPM optical tracker used as error sensor in various guidance systems 13 p2125 A66-2598

Effect of faulty compensation for accelerating force of Earth gravity on accuracy in determination by inertial navigation system of coordinate of object in flight 14 p2328 A66-2736

Filter design minimizing maximum value of estimation error over all admissible signal waveforms 15 p2474 A66-2938

LF drift reduction for integrators of repetitive signals 15 p2475 A66-2986

Variable-structure automatic control system with switchable phase-shifting filters for linear plants, converting error signal to control switching device 18 p3092 A66-3499

Frequency stabilization of gas laser to lock output to center of atomic resonance, using error signal 20 p3580 A66-3824

Statistical communication theory, examining problem of selecting set of multipowered finite duration waveforms to minimize error rate for coherent channel perturbed by white Gaussian noise 21 p3704 A66-3914

External lock NMR spectrometer conversion to field lock-frequency lock type by polarity inversion of error signal 21 p3740 A66-3939

Error probability in PCM/FM with phase lock loop discriminators, noting role of input SNR 23 p4037 A66-4132

Absolute stability of specific class of nonlinear pulsed automatic systems, noting error signal and amplitude modulation 24 p4189 A66-4294

## ERYTHROCYTE

Respiratory activity and hematological factors of avian blood cells, discussing oxygen consumption, thermal effects, tissue and erythrocyte metabolism 23 p4024 A66-4104

## ESCAPE CAPSULE

Nose-down pitching of capsule crew escape system observed during track test after separation from test vehicle and due to change in capsule pressure distribution 22 p3850 A66-4060

Emergency escape from multicrew orbital vehicles during launch, orbit, reentry and landing by lifting reentry module [ICAS PAPER 66-35] 22 p3988 A66-4066

## ESCAPE VELOCITY

Orbital transfer takeoff spirals with maximum momentum change 02 p0290 A66-1198

Earth departure plane change, interplanetary mission launches and launch windows 10 p1609 A66-2192

## ESCHERICHIA

Proton tunneling and mutation rate of Escherichia coli B To T1 and T2 phage resistance in water 13 p2008 A66-2578

Physical properties of DNA-dependent RNA polymerase from Escherichia coli 20 p3505 A66-3705

Space diet effect on aerobic and anaerobic microflora of human feces 22 p3854 A66-3979

## ESG

## S ELECTRICALLY SUSPENDED GYROSCOPE /ESG/

## ESRO I SATELLITE

Devices on ESRO satellite to be launched in 1967 by NASA rocket, noting photometers for auroral measurements, plasma probe for electron density, scintillation counter etc 03 p0430 A66-1248

ESRO-I satellite design and auroral activity study 16 p2810 A66-3100

European Space Research Organization origins, aims and present state of

- organization 17 p3040 A66-32371
- RO II SATELLITE**
- ESRO projects include sounding rocket experiments, small satellites launched by scout, small space probes and Astronomical satellite 04 p0599 A66-13500
- Experiments in measurement of solar, cosmic and geomagnetically trapped /Van Allen/ radiation to be undertaken by ESRO I satellite 06 p0879 A66-16507
- Space simulator design for testing of ESRO I satellite, noting three-level operating concept, independent control of main shroud sections, etc 18 p3096 A66-34620
- PCM telemetry system for satellites based on projected requirements and subsystems currently available, noting satellite ESRO II as example of digital telemetry application 20 p3519 A66-38062
- SSA SATELLITE**
- Digital computer processing of Tiros, Nimbus and Essa vidicon cloud pictures for machine nephalanyses, discussing rectification orbital mosaics and calibration effects for future Essa flights 22 p3943 A66-40055
- STER**
- SA NITRATE ESTER**
- SA POLYESTER**
- Gas chromatography for resolution and separation of racemic amino acids as TFA-sec-butanol ester derivatives applied to protein analysis 15 p2446 A66-28866
- Synthesis of alpha-amino acid l-menthyl esters under mild conditions, using alpha-amino acid N-carboxy anhydride /NCA/ and l-menthol 16 p2646 A66-31186
- Resolution method for DL-amino-acids via menthyl ester derivatives and gas-liquid chromatographic analysis of crystalline products 17 p2869 A66-31872
- Nucleosides and polynucleotides synthesis from sugars and heterocyclic bases by metaphosphate esters 17 p2852 A66-32095
- Synthesis of peptides related to active site of esteratic enzymes 20 p3510 A66-37633
- Stereoselective synthesis of optically active amino acids from menthyl esters and alpha-keto acids 23 p4032 A66-41378
- Synthetic fire-resistant hydraulic fluids based on phosphate esters must be provided with continuous removal of dissociation products for constant regeneration and protection of unaltered fluid from accelerated decomposition 24 p4229 A66-42509
- ETCHING**
- Vacuum thermal etching of nickel and etch figure development by boron addition 03 p0383 A66-13127
- Stain film of chemical species formed by gas phase reaction on silicon 05 p0736 A66-14978
- Dissolution kinetics of iron filamentary single crystals in dilute acidic environments shown to obey Frank topographical theorems describing etch-rate anisotropy 07 p1107 A66-18412
- High resolution molybdenum evaporation mask fabrication by scribing and etching for use in semiconductor devices 08 p1189 A66-18662
- Dimensional control of oxide films on n- and p-type silicon by thermal oxidation and chemical etching in HF 08 p1230 A66-18870
- Methods for producing microcircuits from vacuum deposited thin film elements, discussing layout, masking and etching 08 p1192 A66-18968
- Semiconductor microinhomogeneities detected by device using fluctuations of impurity concentrations during process of crystal growth 08 p1223 A66-19287
- Structure defects in silicon crystals which cause X-ray double images studied, using X-ray diffraction topography and etching technique 10 p1574 A66-21347
- Chemical etching revealing dislocations produced by indentation on single crystals of silicon, measuring edge dislocation velocities at various shear stresses and high temperatures, determining activation energy 11 p1750 A66-22492
- Epitaxial vapor growth of germanium from germanium iodide with hydrogen and argon atmosphere, examining various growth parameters 13 p2161 A66-25193
- Silver salts effect on etching of germanium single crystals, noting photomicrographs of structural changes 13 p2169 A66-26584
- Surface states on Si crystal as affected by chemical etching and thermal oxidation studied by pulsed field effect 15 p2567 A66-29403
- Dislocations and precipitates in GaAs injection lasers revealed by new A-B etchant 16 p2718 A66-31071
- Chemical etchants for In As noting functions, rate dependence on bromine in methanol, p-n junction delineation, etc 19 p3434 A66-35349
- Chemical blanking and vibratory radiusing of Mo alloys 19 p3370 A66-36134
- Fabrication methods for lithium drifted surface barrier silicon detectors, discussing lithium diffusion, stain etching, preparation for and final etch 20 p3535 A66-38417

- SA DIETHYL ETHER**
- SA POLYPHENYL ETHER**
- Sensitized photolytic decomposition of ethanol and diethyl ether glasses analyzed at low temperature, using electron paramagnetic resonance /EPR/ spectroscopy 06 p0820 A66-16124
- Temperature and oxygen effect on aromatic solute sensitized photo-decomposition of ethanol and ether glasses 06 p0821 A66-16125
- ETHYL ALCOHOL**
- Sensitized photolytic decomposition of ethanol and diethyl ether glasses analyzed at low temperature, using electron paramagnetic resonance /EPR/ spectroscopy 06 p0820 A66-16124
- Temperature and oxygen effect on aromatic solute sensitized photo-decomposition of ethanol and ether glasses 06 p0821 A66-16125
- Cavitation flow of water and ethyl alcohol in venturi tube, noting effect of varying vapor concentration and thermodynamic properties 20 p3544 A66-36924
- ETHYLENE**
- S POLYETHYLENE**
- S TRICHLOROETHYLENE**
- ETHYLENE COMPOUND**
- Carbon and ethylene tetrachloride ultrasonic modulators applied to IR laser heterodyne experiments on InAs photodiode 11 p1714 A66-23353
- Pipe flow turbulent temperature fluctuation measurements in mercury and ethylene glycol with fast response thermocouple 14 p2410 A66-26936
- Remission factor of nonradiating /ethylene polyterephthalate/ cellular structure and transparency to visible radiation 22 p3852 A66-40246
- Series of tricyanomethyl compounds prepared in refluxing acetonitrile by alkylating potassium tricyanomethanide with alkyl iodides, alkyl, propargyl and benzyl bromides 23 p4117 A66-41229
- ETHYLENEDIAMINE**
- Proton magnetic resonance studies of linewidth, second moment and spin-lattice relaxation time of solid triethylenediamine /TEDA/ 08 p1177 A66-18934
- ETTINGSHAUSEN EFFECT**
- Combined Peltier-Ettingshausen device evaluated for cryogenic refrigeration to 70 degrees K 02 p0272 A66-11490
- Thermoelectric and thermomagnetic properties of semiconductors applied to refrigeration, discussing Peltier and Ettingshausen effects 21 p3798 A66-38767
- ETTINGSHAUSEN-NERNST EFFECT**
- Cross-sectional geometry of Nernst-Ettingshausen devices optimized for rectangular geometry and for Norwood spiral screw thread configuration 02 p0270 A66-11430
- Specific conductivity, Hall, Nernst-Ettingshausen and other transfer effects in InAs-CdTe and InAs-ZnTe alloys 09 p1428 A66-20539
- Palladium-silver and palladium-rhodium alloys electrical resistance, Hall effect and Nernst effect as affected by temperature 09 p1389 A66-20805
- Direct measurement of Nernst-Ettingshausen dimensionless figure of merit as ratio of two voltages 10 p1576 A66-21542
- Ettingshausen-Nernst effects in InAs-InP solid solutions, discussing differential thermal emf, scattering at acoustical and thermal oscillations of lattice, ionic impurities, etc 12 p1930 A66-24685
- Electron-hole conductivity effect on temperature variations of Hall coefficient and Nernst-Ettingshausen effect in semiconductor 17 p2986 A66-33309
- Electron scattering mechanism in compensated gallium arsenide determined from Hall effect, Nernst-Ettingshausen effect and reluctance 21 p3798 A66-38914
- EUCLIDEAN SPACE**
- Reduction of nonlinear system of differential equations to integral equation of Hammerstein type 07 p1055 A66-17421
- Euclidean nature of relativistic rotating disk in conclusions of Eddington and Lorentz 08 p1255 A66-18857
- Global solutions of Navier-Stokes equations, analyzing solution vector for nonnegative time values in three-dimensional Euclidean space for continuous initial data 12 p1867 A66-24962
- Second-order elliptical operator for m-dimensional Euclidian space with open region bounded by closed surface 13 p2120 A66-26010
- Small parameter problem for parabolic differential equations examining motion of Markov-type random point in Euclidean space 16 p2733 A66-30737
- Partial differential solutions related to concave and quadratic nonlinear programming problems over Euclidean N-space 19 p3308 A66-35870
- EULER BUCKLING**
- Thermal deformation of flat plate considering temperature gradient effect through thickness, showing that plate is not exhibiting Euler buckling 03 p0442 A66-13301
- Shell stability in Euler formulation, taking into account actual redistribution of stresses that results from initial deflection and creep, noting buckling of closed cylindrical shell under axial compression 21 p3829 A66-38978
- EULER EQUATION**
- Linearized version for isotropic elastic plates and shells by series expansion method obtained as Euler equations 04 p0591 A66-14201
- Group of transforms derived for functional in which Euler equation coincides with Crocco equation describing plane vortex gas streams 04 p0512 A66-14437
- Uniform motion of vortex system in inviscid fluid, examining effect of compressibility on motion of vortex singularities 08 p1204 A66-18528
- Rotation effect on statically rotating string-mass system determined by Eulerian formulation and prediction of critical speeds 10 p1556 A66-21495
- Scalar formulation of ideal charged adiabatic gas flow in presence of gravitational and electromagnetic fields 10 p1524 A66-21814
- Bi-linear expansions treating Euler transform of special integrand, reviewing properties of Jacobi function for application in quantum mechanics or plasma physics 12 p1905 A66-24566
- Lagrange theorem extended for solution of three-body problem to regular configurations of more than three particles 16 p2804 A66-31393
- Stationary, two-dimensional solutions of Euler equation which contain closed regions of constant vorticity 17 p2907 A66-32414
- Phase-plane analysis of motion of self-excited asymmetric rigid body, examining periodic solutions of Euler equations 19 p3399 A66-35486
- Motion equations of rigid body, discussing transformation from Lagrange equation to Euler equation 19 p3400 A66-35831
- Steepest descent method extended to trajectory optimization problem for stochastically disturbed systems with application to Euler equation for white noise problem of reentering vehicle 19 p3388 A66-35879
- Eulerian finite difference method for solving time-dependent equations of motion for compressible fluid flow, noting shock wave diffraction, supersonic blunt body

interaction with shock wave, etc 21 p3730 A66-39472

Intermediate-thrust arcs in central force field satisfying optimality conditions, noting that motions are degenerate solutions of Euler equations 22 p3980 A66-40460

Navier-Stokes equations solutions for coefficient of viscosity tending to zero become solution to Euler equations in Cauchy problem for equations of hydrodynamics 24 p4193 A66-42232

**EULER-LAGRANGE EQUATION**

Characteristics of linear optimal systems whose performance criterion is defined by minimum of infinite integral of quadratic function of outputs and inputs of system 01 p0049 A66-10016

Successive approximation methods of solving optimal control problems, based on variational calculus and Euler-Lagrange equation 11 p1679 A66-23273

**EULER-LAMBERT EQUATION**

SA ELLIPTICAL ORBIT

Euler-Lambert equation for orbital transfer in Newtonian field solved by approximate method 22 p3981 A66-40475

Lambert theorem for orbital transfer in elliptic, parabolic and hyperbolic cases 23 p4127 A66-41117

Bracketing theorem applied in partitioning technique for solving Schroedinger equation to determine upper and lower bounds to energy eigenvalues, ground and excited states 06 p0911 A66-16166  
Bethe approximation of ionization cross sections of excited states of atomic hydrogen by high energy electrons 06 p0912 A66-17037  
Population inversions promoted between electronic-excited states by fluid-mechanical techniques 07 p1083 A66-17937  
Decay of F-center excitations in alkali halides induced by short intense pulse of Q-switched ruby laser 08 p1275 A66-19367  
Electron excitation cross section of individual energy levels of inert gases calculated, using Born-Oppenheimer method 09 p1405 A66-20939  
Excited state of cesium lifetime determined from double magnetic resonance experiments 09 p1406 A66-20944  
Departures from local thermal equilibrium in helium plasma produced by magnetically-driven shock wave in T-tube 10 p1566 A66-21811  
Kinetics and gas dynamics equations derived to determine state of gas behind strong shock waves, accounting for all excited states of neutral atoms 11 p1688 A66-22586  
Cascade theory of electron recombination into ionized donors in germanium analyzed, noting several models 12 p1928 A66-23940  
Electron-atom collision studied, using helium-neon laser to obtain energy transitions between excited states 13 p2137 A66-25106  
Excited-singlet even parity states of anthracene in near UV, noting role of absorption spectroscopy 13 p2132 A66-26143  
Absorption behavior of optically pumped ruby rod, noting amplification at room temperature and absorption at cryogenic temperature 13 p2098 A66-26174  
Steady state variation of light intensity with distance for monochromatic light, noting dependence of absorption coefficient on degree of excitation of electronic system 13 p2099 A66-26183  
Helium-neon gas laser used to study pressure effect on line shape of 2s-2p optical transitions of neon excited states 13 p2100 A66-26198  
Radiative recombination lifetimes in laser-

excited silicon, correlating emission with photoconductivity 13 p2105 A66-26597

Effective lifetime of excited state of gas laser, with account of near photon transfer 14 p2306 A66-27135

Electron excitation cross section of individual energy levels of inert gases calculated, using Born-Oppenheimer method 15 p2543 A66-28528

Excited state of cesium lifetime determined from double magnetic resonance experiments 15 p2543 A66-28532

Radiative cascade patterns in helium-neon gas system using idealized model, computing spontaneous decays which are compared with laser experiments 15 p2512 A66-28699

Resonance signal inversion in Rb optical pumping and relation of mixing of excited state sublevels 15 p2517 A66-29410

Electron-atom collision studied, using helium-neon laser to obtain energy transitions between excited states 16 p2758 A66-30285

Auroral excitation rates and molecular vibrational temperatures in nitrogen 2PG from Franck-Condon factors obtained from intensity measurements and high resolution absorption spectral data 16 p2692 A66-30328

Energy transfer measurements in gas-solid surface interactions initiated by electron beam-excited photoemission 16 p2701 A66-30397

Color centers in alkali metal azides, noting change of ion from linear to bent configuration 16 p2777 A66-31023

Dynamic Jahn-Teller effect in excited state vanadium doped aluminum oxide 17 p2981 A66-32717

Spectra and intensity vs excitation level and spatial distribution vs current density determined for optical radiation by electron excited cadmium sulfide 17 p2937 A66-33308

Excitation cross sections of cesium in collisions with slow electrons 17 p2989 A66-33507

Intermediate state peculiarities effect on Raman scattering spectra of excited gas molecules 17 p2960 A66-33508

Excitation of 3S sub 2 neon level by metastable helium atoms during He-Ne discharge 17 p2938 A66-33513

Long-lived impact excitation states of particles measured from cross section of nonelastic collision with second particle 18 p3137 A66-34025

Molecular orbital studies of ground and low lying excited states of HeH molecular ion 18 p3139 A66-34509

Charged Bose gas, discussing ground-state energy, excitation spectra and plasmon-particle interactions, using Bohm-Pines and Bogoliubov approximations 18 p3140 A66-34729

Excitation of ground state hydrogen atoms by fast protons, evaluating total Born cross section in limit of infinitely massive protons 19 p3403 A66-36333

Detection of three radio lines arising from transitions between highly excited states of neutral helium 20 p3652 A66-37615

Chemical kinetics of electron plasma reactions, discussing energy states, ion-molecule reactions, charge transfer, transport properties, phase interactions, etc 21 p3702 A66-38448

Photoionization efficiency curve for sulfur hexafluoride in wavelength region 1050 to 600 angstroms with Rydberg levels from electronically excited state 21 p3774 A66-38525

Photoionization cross sections for N and O atoms and ions in state of excitation, using quantum defect method 21 p3775 A66-39076

Atomic collisions, excitation transfer processes and energy level transition probabilities in plasma of gas lasers 21 p3748 A66-39305

Experimental excited state band locations and intensities in absorption spectrum of electron transitions in optically pumped ruby laser 21 p3749 A66-39569

Theoretical excited state absorption spectrum of electron transitions in optically pumped ruby laser 21 p3749 A66-39570

Dissociation energies of GaF, InF and TiF measured by high temperature mass-spectrometric techniques, noting possibility of potential maxima in excited

states 22 p3859 A66-39917

Precise measurement of excited-state lifetimes for radiative and collision-induced relaxation in fine structure levels of atomic neon, noting optical transitions 23 p4098 A66-41361

Time resolved emission measurements for Cr-Ar mixtures in three spectral regions and ionization occurrence in excited state inelastic collisions 23 p4033 A66-42083

Excitation cross sections of cesium in collisions with slow electrons 24 p4249 A66-42122

Excitation of 3S sub 2 neon level by metastable helium atoms during He-Ne discharge 24 p4219 A66-42126

**EXCITON**

SA ENERGY BAND

SA POSITRONIUM

Mean free path influence on transverse collective excitations in strong coupling superconducting alloys 02 p0271 A66-11481

Semiconductor excitation-level spitting for shallow impurity state due to spin orbital shifts 04 p0565 A66-14260

Possible processes of non-radiative decay of excitons on ionized donors and acceptors in semiconducting and dielectric crystals 05 p0737 A66-15160

Exciton absorption lines and long wave intrinsic edges of single-crystal CdSe and CdS at low temperatures 06 p0924 A66-16540

Measurement of exciton absorption of gallium selenide at low temperatures in presence of electric field, noting line broadening and no splitting 06 p0929 A66-16942

Neutron and proton bombardment effects on exciton spectrum of cuprous oxide 06 p0937 A66-17139

Group II-VI semiconductors, examining theory of bound exciton complexes, lattice vibrations, phonon-assisted edge emission and higher energy bands 08 p1271 A66-19239

Exciton absorption lines and long wave intrinsic edges of single-crystal CdSe and CdS at low temperatures 15 p2569 A66-29987

Free current carrier formation in molecular crystal, examining dependence of photoconductivity on magnetic field intensity 18 p3158 A66-34683

Optical spectrum of normal excitons in deformed and nondeformed n-type Ge single crystal layers for four orientations 22 p3964 A66-40306

**EXCRETION**

Light effect on rhythmic excretion of water and electrolytes in humans 09 p1335 A66-20534

Sodium excretion during extracellular volume expansion and associated changes in renal blood flow and intrarenal blood distribution during natriuresis accompanying saline loading in dogs 13 p2012 A66-26582

Indolyiacroyl glycine excretion in man 16 p2638 A66-30634

Combination of renal vasodilation and angiotensin infusion effect large changes in renal hemodynamics, excretion and reabsorption of sodium in anesthetized hydropenic dogs 20 p3507 A66-37607

PAH transport mechanism in dogs with hydrazine-depressed para-aminohippurate treated with acetate, 6,8-epidithioctanate and 6,8-epidithioctanoamide 22 p3854 A66-39795

**EXECUTIVE AIRCRAFT**

SA BEAGLE B-206 AIRCRAFT

Design and market research aspects of Hamburger HFB 320 jet executive aircraft 10 p1482 A66-21360

Oxygen storage and distributions systems development trends for business aircraft [SAE PAPER 660207] 13 p2002 A66-26387

Air conditioning development in Beech aircraft [SAE PAPER 660209] 13 p2002 A66-26388

Defining fatigue load environment for business aircraft [SAE PAPER 660215] 13 p2199 A66-26392

FAA research, development and airworthiness compliance for general aviation aircraft [SAE PAPER 660217] 13 p1996 A66-26394

Flying qualities of six late-model personal-owner aircraft in visual and instrument flight [SAE PAPER 660219] 13 p1996 A66-26396

High by-pass turbofan for business aircraft,

comparing jet propulsion system efficiency with fan engines, cost factors and market potentials [SAE PAPER 660221] 13 p2173 A66-264

British Executive and General Aviation/BEAGLE/ and development of Beagle B.2 S twin-engine executive aircraft 22 p3847 A66-398

**EXERCISE**

Maximum exercise tolerance in healthy aircrew members limited by cardiac output 24 p4163 A66-424

**EXHAUST**

S ROCKET EXHAUST

EXHAUST GAS

SA JET STREAM

Exhaust of pinched plasma from axial orifice involves electromagnetic current profile diffraction and thermal expansion of gas column [AIAA PAPER 65-92] 02 p0267 A66-115

Expression derived for vibrational relaxation in recombining expanding nozzle exhaust gas, assessing effect of chemical reactions on this mechanism 16 p2687 A66-311

Exhaust mixing process in Rolls-Royce bypass jet engines, noting stream mixing common duct with corrugated metal interface on inlet side 17 p2990 A66-320

Short duration technique providing simulation of thermodynamic properties and composition of exhaust products of liquid and solid propellant rocket engines [AIAA PAPER 66-760] 22 p3894 A66-406

**EXHAUST JET**

Exhaust beam from conoid thruster investigated, using quadrupole mass filter [AIAA PAPER 64-674] 02 p0278 A66-115

Response of Langmuir probes in rocket exhaust jets, noting sensitivity to chamber temperature and pressure and alkali metal concentration 14 p2294 A66-274

Accelerating particulate flow studied, using blowdown system for component velocities and friction 17 p2916 A66-334

Microwave attenuation magnitude associated with exhaust plasma of nonauminized and aluminized composite propellant 21 p3807 A66-386

**EXHAUST NOZZLE**

SA ROCKET NOZZLE

Form rolling used to form L-shaped struts from L605 alloy for economical fabrication of supports for jet engine exhaust nozzles 10 p1545 A66-212

Exhaust nozzle performance noting testing techniques, cruise engine installations, data accuracy, etc [AIAA PAPER 66-641] 18 p3048 A66-342

Heating from Saturn solid propellant S- and S-IVB stage motor exhausts and S-IVB Centaur retro motor exhaust theoretically and experimentally analyzed [AIAA PAPER 66-653] 19 p3479 A66-366

Statistically designed experiments in wind tunnel test programs dealing with exhaust nozzles, discussing data analysis techniques [AIAA PAPER 66-742] 23 p4052 A66-413

Specific impulse limitations of advanced nuclear rocket engines due to hydrodynamic transpiration coolant flows in exhaust nozzle 24 p4261 A66-427

**EXHAUST SIMULATOR**

Scaling of near field pressure correlation patterns around jet exhaust 01 p0010 A66-101

Highly underexpanded sonic jet in wind tunnel study of stagnation temperature pressure and shock profiles 08 p1164 A66-191

Wind tunnel test program for simulation of gas-particle rocket exhaust plume, separate flow around nozzle and base recirculation [AIAA PAPER 66-767] 22 p3895 A66-406

**EXHAUST VELOCITY**

Velocity and momentum of high current steady state coaxial plasma noting mass flow, exhaust velocity, thrust, arc voltage and power 02 p0267 A66-115

**EXISTENCE THEOREM**

Condition of existence of universal stabilizing control in second order control system 01 p0050 A66-103

Existence and formal uniqueness theorems of partial linear differential equations with Cauchy conditions on characteristic multiplicity hyperplane 01 p0095 A66-110

Existence theorem for trajectories of priorior field satisfying measurability condition 05 p0707 A66-15032

Cauchy problem for first-order nonlinear equation 05 p0709 A66-15360

Sufficient condition for existence of admissible control for optimization systems [ASME PAPER 65-WA/AUT-12] 05 p0710 A66-15607

Electromagnetic field in current-carrying region, discussing existence criteria of improper integrals 06 p0908 A66-16130

Controller analytical design for nonautonomous systems, deriving necessary and sufficient conditions for existence of optimum control 06 p0862 A66-16522

Existence in large of periodic solutions of hyperbolic partial differential equations 06 p0903 A66-16899

Existence and uniqueness of solutions of certain boundary value problems for degenerate elliptic equations of second kind 07 p1056 A66-17596

Cauchy and boundary value problem for second-order nonlinear ordinary differential equations 07 p1056 A66-17607

Regularization of ordinary differential operator trace in region of regular boundary conditions 07 p1057 A66-17855

Existence and uniqueness theorems for invariant-imbedding nonlinear ODE systems for absorption loss rate satisfying Lipschitz condition 07 p1059 A66-17972

Existence and uniqueness of piecewise-continuous solution to two-dimensional linear first order hyperbolic system with discontinuous coefficients 07 p1060 A66-18100

Convergent series representation of system of measurable functions that are complete and orthonormalized 07 p1060 A66-18251

Necessary conditions for existence of univalent integrals in equations of motion of heavy gyrost at fixed at one point 08 p1227 A66-19762

Invariant imbedding in transport process and theorems of uniqueness and existence for derived hyperbolic equation 09 p1393 A66-19906

Proof, by degenerate kernel method of existence and uniqueness of solution for one class of nonlinear integral equations 09 p1394 A66-20455

Existence of relationship between slope of servosystem functions with limited bandwidth and bandwidth magnitude 09 p1346 A66-20575

Stochastic linear programming as activity analysis model for determination of maximal profit operations for companies 09 p1349 A66-20635

Second-order linear equations with nonnegative characteristic form in analysis of first boundary value problem 09 p1397 A66-20734

Boundedness and uniform boundedness of nonhomogeneous systems, obtaining necessary and sufficient conditions for existence of solutions 10 p1551 A66-21920

Computational solution of functional differential equations, using successive approximations 10 p1551 A66-21922

Existence theorems for nonlinear equations having indefinite and potential operators 10 p1551 A66-21977

Existence and convergence theorems for minimizing sequences for extremum problems in presence of constraints 10 p1551 A66-21978

Existence of optimal stochastic controls 11 p1682 A66-23457

Existence theorems for optimal control solutions of Pontryagin and Lagrange problems 11 p1725 A66-23458

Boundary value problem solutions in meteorology 12 p1905 A66-23664

Quasi-linear boundary value problems solved with Galerkin convergence method 12 p1902 A66-23863

Existence of cycles as nonzero periodic solution to system of differential equations with one degree of freedom 13 p2117 A66-25415

Initial value problem for Navier-Stokes equation 14 p2273 A66-26939

Existence of periodic solutions of differential equations in nonlinear mechanics [PST PAPER NT-147] 14 p2323 A66-27792

Existence and stability theorems for almost

periodic solutions of nearly Liapunov systems 15 p2527 A66-29050

Uniqueness and existence theorems for parabolic partial differential equations for case of free boundary 15 p2528 A66-29334

Existence theorem for nonlinear ODE system with continuous monotonic differential operators over Hilbert space and application to nonlinear network analysis 15 p2528 A66-29370

Uniqueness and solution estimates to boundary value problems, noting solvability correlation with existence of Green function 16 p2733 A66-30739

Existence theorem of recurrent solutions to differential equations defined in Banach space for dynamic and nondynamic systems 16 p2735 A66-30785

Controller analytical design for nonautonomous systems, deriving necessary and sufficient conditions for existence of optimum control 16 p2670 A66-30832

Nonlinear parabolic equations, considering existence, uniqueness theorems, abstract Cauchy problem, etc 17 p2946 A66-32307

Textbook on differential equations with deviating arguments, covering existence theorems, linear equations, stability theory, boundary value problems, etc 17 p2947 A66-33188

Differential inequality theorem for boundary value problem involving second-order differential equation 18 p3126 A66-33975

Optimal control for stochastic differential equation system, noting existence and uniqueness of solution for coefficients satisfying Lipschitz condition 19 p3325 A66-35983

Existence theorems for nonlinear equations having indefinite and potential operators 19 p3390 A66-36187

Existence and convergence theorems for minimizing sequences for extremum problems in presence of constraints 19 p3390 A66-36188

Boundary value problem solutions in meteorology 19 p3394 A66-36194

Existence of inflection points in cost vs terminal time curve for linear minimum energy regulator 19 p3339 A66-36745

Absence conditions for periodical trajectories in regions of possible existence 19 p3401 A66-36844

Axisymmetric viscous flow with electric conductivity around barrier, deriving existence theorem for zero Reynolds number 20 p3609 A66-37568

Linear homogeneous third-order differential equations, examining existence, uniqueness and asymptotic behavior of nontrivial nonoscillatory solutions and existence criteria for oscillatory solutions 20 p3591 A66-37608

Existence of unique periodic solution to first-order differential equation and nonautonomous system of two first-order differential equations 20 p3591 A66-37752

Local existence theorems for elliptic systems with linear matrix differential operator 21 p3754 A66-38460

Existence and uniqueness theorems for Dirichlet problem of second-order linear elliptic equation, Neumann BVP, mixed BVP and oblique derivative problem 21 p3754 A66-38462

Linear elastostatic BVPs for inhomogeneous anisotropic elastic body including existence-uniqueness theorem, based on Korn inequality 21 p3755 A66-38463

Existence theorems of periodic solutions to integro-differential equation with delayed argument 21 p3756 A66-38742

Existence of angular boundary values of harmonic function in sphere 21 p3757 A66-38909

Existence conditions of solution to two-point boundary value problem for ordinary nonlinear any order differential equation 21 p3757 A66-39245

Existence of smooth solution for system of equations describing nonlinear oscillations of thin plate and shallow shell 22 p3989 A66-39905

Existence theorem of recurrent solutions to differential equations defined in Banach space for dynamic and nondynamic systems 22 p3940 A66-40447

Variational techniques in solving BVPs for nonlinear plastic, elastoplastic and viscous media and in predicting existence, uniqueness and equilibrium conditions 23 p4136 A66-40996

Existence theorem for stationary flow in magnetic field of incompressible viscous fluid electrically conductive around solid electrically conducting obstacle 23 p4100 A66-41173

Existence and uniqueness theorems in Poincare-Liapunov theory for multipoint control boundary value problems 23 p4085 A66-41539

Existence of solution of linear problems for ordinary differential equations 24 p4231 A66-42538

Weak and strict solution existence theorem for initial-boundary value problem for nonlinear hyperbolic equation in relativistic quantum mechanics 24 p4237 A66-42829

**EXO-ELECTRON EMISSION**

External electron emission measurement from polished n-germanium and n-silicon surfaces 17 p2986 A66-33310

**EXOBIOLOGY**

**S BIOASTRONAUTICS**

**S EXTRATERRESTRIAL LIFE**

**EXOSPHERE**

Density distribution in exosphere, particularly Maxwellian velocity distribution disturbed by light particle escape 14 p2284 A66-27620

Exospheric temperature, scale heights and mean molecular weight up to 3500 km derived from satellite accelerations in 1964 15 p2484 A66-28819

Day-to-night and semiannual variations in exospheric density during low solar activity from observations of Echo II orbital period changes 15 p2497 A66-30084

Diurnal variation of hydrogen atom concentration at base of exosphere, including effects of lateral flow of gas around Earth 17 p2919 A66-32996

Electron density profiles in ionosphere and exosphere - NATO Advanced Study Institute, Finse, Norway, April 1965 22 p3903 A66-39943

Antenna in interplanetary plasma, noting fluctuation noise in exosphere and radiation impedance when exposed to solar wind 22 p3877 A66-40466

Plasma concentration diagnostics in exosphere from delay time of forward frequency as function of parameter of whistler trajectory 22 p3915 A66-40774

Guiding of whistlers due to exospheric anisotropy, electron density and geomagnetic field effects 22 p3915 A66-40803

**EXOTHERMIC REACTION**

Pyrotechnics for efficient preheating of space power systems by simple lightweight chemical blends that produce heat pyrotechnically 04 p0460 A66-13926

Computed high temperature rate constants for hydrogen atom transfers involving light elements, noting activation energies for exothermic reactions [CI PAPER WSCI-65-24] 05 p0629 A66-15148

Kinematic computer calculations of energy distribution among products of repulsive, mixed and attractive energy release exothermic reactions 11 p1787 A66-23213

Phase determination by electron-probe X-ray microanalysis of nickel aluminide self-bonding coating produced by flame-spraying 12 p1892 A66-23560

Exothermal discontinuities propagation in conducting media without restricting magnetic field orientation, noting velocity and energy released, showing that existence of propagation velocities leads to two detonation modes 13 p2149 A66-26260

Polystyrene exposure to oxygen, causing ignition in shock tube but failing to ignite under surface exposure 14 p2370 A66-27476

Ignition model for condensed thermally unstable propellant by exothermal processes taking place in condensed phase 18 p3260 A66-33719

Small perturbation method applied to combustion stability of high explosives taking into account heat release in K phase 19 p3477 A66-35740

Exothermic brazing of refractory metals, tabulating braze filler metals that formed acceptable joints with molybdenum,

- tungsten and TZM alloy 19 p3367 A66-36117  
Curing problems of highly exothermic propellants investigated using mathematical models, detailing heat conduction and thermal properties 22 p3968 A66-39868

Explorer satellite XII, XIV and XV measurements, noting directional intensity energy flux, spatial distribution and spectra of low energy trapped protons and electrons 07 p1131 A66-18085  
Transition region magnetic field and polar magnetic disturbances, comparing Explorer XII data with ground measurements from Arctic observatories 08 p1218 A66-19399  
Bit-plane encoding technique used for reducing redundancy in data gathered in space probes 18 p3073 A66-34249  
Solar wind observations with Explorer XII and IMP, noting periodic fluctuations in solar proton flux and detection of 3 mev electrons of interplanetary origin 18 p3167 A66-34335  
Temporal variations of electron energy flux in outer radiation zone measured during geomagnetic activity with instrumentation on board Explorer XII satellite 24 p4263 A66-42601
- EXPLORER XIV SATELLITE**  
Data analysis from Explorer XIV satellite, noting magnetic field measurements in tail of geomagnetic cavity 07 p1029 A66-18086
- EXPLORER XV SATELLITE**  
Explorer XV and Telstar I satellite trapped radiation measurements, noting connection between magnetospheric trapped particles and natural plasmas in space 07 p1131 A66-18084
- EXPLORER XVII SATELLITE**  
Intensity and energy spectra of low energy primary cosmic ray protons determined aboard Imp-I satellite 01 p0132 A66-10601
- EXPLORER XVIII SATELLITE**  
Interplanetary magnetic effects of solar

- flares recorded by Explorer XVIII and Pioneer V 03 p0419 A66-12681  
Explorer XVIII continuous monitoring of vector field data deemed plausible correlation with noncontinuous data coverage of Pioneer V 03 p0419 A66-12681  
Quasi-stationary corotating structure in interplanetary magnetic field observed with Imp I satellite during three solar rotations noting data on solar wind 05 p0746 A66-1478  
Correlated magnetic tail and radiation belt observations from Explorer 18 /Imp I satellite and APL satellite 1963 38C in April 1964 08 p1284 A66-19413  
Imp-I observation of magnetic wake of Moon or Earth 11 p1697 A66-22424  
Imp-I observations of solar wind properties, including interaction with geomagnetic field and flow characteristics of positive ion component 11 p1775 A66-23131  
Electron acceleration near Earth bow shock measured, using Explorer XVIII satellite noting solar wind effect, energy spectrum of radiation belt and magnetospheric boundary etc 13 p2175 A66-26313  
Criticism of Ivanov assumption regarding IMP-I observation of lunar wake in solar wind by magnetic field and plasma measurements 15 p2575 A66-29103  
Measurements of geomagnetic field at various distances using IMP-I satellite noting magnetically neutral sheet in tail and observation of five magnetic storms 16 p2695 A66-30713  
Interplanetary magnetic-field measurements taken by Interplanetary Monitoring Platform /IMP-I/ 18 p3231 A66-34372  
Explorer XVIII plasma flux measurements data analysis, plasma detector, map of transition zone between magnetosphere and solar wind and associated energy spectra 18 p3168 A66-34331  
Magnetopause boundaries and geomagnetic field at magnetopause and interaction region by IMP I 18 p3106 A66-34331  
Explorer XVIII satellite measurements of proton energy spectra in region corotating with Sun, noting modulation of galactic cosmic radiation and source of continuous particle accelerations 18 p3177 A66-34717
- EXPLORER XX SATELLITE**  
Communications system of Explorer X ionospheric satellite 04 p0481 A66-13803  
Explorer XX satellite observations of plasma resonances at fixed frequencies in topside ionosphere, noting patterns, effects of geomagnetic field, electron concentration etc 13 p2074 A66-26313  
Topside ionosphere, emphasizing experiments with incoherent scatter radar and topside sounder 22 p3908 A66-39913  
Explorer XX topside sounder observation of ionospheric irregularities in electron density and plasma wave electrostatic resonances 22 p3909 A66-39913
- EXPLORER XXII SATELLITE**  
Ionosphere electron content near auroral zone obtained from differential Faraday observations of multifrequency beacon satellite Explorer XXII, noting corpuscular radiation role 02 p0223 A66-12033  
Electrostatic probe, discussing Explorer XXII measurements of electron concentration and temperature at 1000 km altitude 05 p0746 A66-14772  
F-layer structure at subauroral and auroral latitudes measured by multifrequency beacon satellite Explorer XXII 08 p1212 A66-18613  
Beacon observations of differential Doppler and Faraday effects from analysis of signals emitted by Explorer XXII satellite 15 p2453 A66-30003  
Ground-reflected wave effects and regular fading superposed on Faraday fading observed in signal strength recordings from Transit IVA and Explorer XXII 16 p2692 A66-30313
- EXPLORER XXX SATELLITE**  
**SA INTERNATIONAL QUIET SUN YEAR /IQSY/**  
Solrad VIII observation of May 20, 1964 solar eclipse penumbral zone in X-ray and UV bands 21 p3810 A66-38448
- EXPLORER XXXIII SATELLITE**  
AIMP-D spacecraft mission analysis determining launch conditions and trajectory

shaping for attaining lunar orbit, noting errors, flight path angle, etc  
[AIAA PAPER 66-535] 18 p3226 A66-33665

**EXPLODER SATELLITE**  
SA RADIO ASTRONOMY EXPLORER /RAE/ SATELLITE  
Attitude control system, using magnetic interaction with geomagnetic field to check spin rate and spin axis orientation of spin-stabilized Explorer A  
satellite 08 p1304 A66-19512

Accurate tracking of Beacon-Explorer orbiting optical reflectors, using pulsed ruby laser beams 09 p1341 A66-19902

Ruby laser energy reflected off Explorer XXII satellite 14 p2306 A66-27054

DME-A satellite attitude control, discussing performance of spin control system 21 p3821 A66-38879

Hydromagnetic wave propagation in magnetosphere, using Explorer satellite observations 24 p4198 A66-42434

**EXPLOSION**  
SA BLAST  
SA CHEMICAL EXPLOSION  
SA DETONATION  
SA DISCHARGE  
SA GAS EXPLOSION  
SA IMPLOSION  
SA LAMINAR FLAME  
SA METAL COMBUSTION  
SA NUCLEAR EXPLOSION  
SA THERMONUCLEAR EXPLOSION  
SA UNDERWATER EXPLOSION  
Theory of localized explosions in inhomogeneous atmosphere applied to initial phase of development of chromospheric flare 03 p0422 A66-12916

Test method evaluating explosive sensitivity, due to shock, of materials immersed in oxygen difluoride for application to rocket propulsion systems [CI PAPER WSCI-65-34] 05 p0743 A66-15150

Hypersonic perfect gas flow around slightly blunted plate, discussing analogy between asymptotic shock behavior and explosion theory 07 p0981 A66-18109

Effect on long shell of circumferential and uniformly distributed load /due to explosion/ at constant rate along shell 12 p1964 A66-24048

Theory of localized explosions in inhomogeneous atmosphere applied to initial phase of development of chromospheric flare 14 p2376 A66-27265

Elastoplastic properties of copper, aluminum alloys and brass under explosive load, noting increased temperature effect on elastoplastic wave parameters 14 p2314 A66-27370

Overpressure of liquid propellant explosion in vacuum and atmosphere 14 p2370 A66-27451

Internal fracture of spheroids caused by focusing explosive waves 17 p3027 A66-32636

Thermal self-ignition theory employing general functions of temperature characterizing reaction rate of explosive 19 p3477 A66-35741

Lead stearate effect on heat of explosion in nitro-cellulose propellant combustion at various pressure levels 20 p3626 A66-38041

Critical parameters in Poisson-Boltzmann equation of steady state thermal explosion theory, noting temperature gradient 20 p3680 A66-38047

Thermodynamic calculation of explosive properties of peracetic acid, using data from detonation wave to establish safe limits for use of acid 21 p3834 A66-38535

Explosive nature of chromospheric flares, effect of magnetic fields and thermoconductivity calculated, using mathematical model 22 p3975 A66-40852

Drop-weight tester/photographic apparatus for studying impact initiation-explosion process in nitroglycerin 23 p4119 A66-41243

Extended explosive charge giving rise to pressure waveform for analysis of sonic boom 24 p4159 A66-42417

**EXPLOSIVE**  
SA CHARGE  
SA HIGH EXPLOSIVE  
SA NITROCELLULOSE  
SA NITROGLYCERIN  
SA PENTOLITE  
SA PROPELLANT  
Drop-weight sensitivity of explosive liquids

tested with impact apparatus, showing increase with temperature  
[CI PAPER WSCI-65-28] 05 p0788 A66-15139

Drop-weight impact sensitivity testing of explosives  
[CI PAPER WSCI-65-27] 05 p0788 A66-15140

Gas compression-conduction mechanism contribution to shock initiation of granular explosives, analyzing surface temperature of interstitial gas and grain distribution  
[CI PAPER WSCI-65-30] 05 p0788 A66-15141

Combustion temperatures of explosives PETN, hexogyn and tetryl in constant pressure bomb in nitrogen atmosphere 08 p1316 A66-18795

Safety requirements for handling and testing unstable materials, particularly hydrazinium diperchlorate /HP sub 2/ solid propellant oxidizer 12 p1812 A66-24469

Explosive compaction of ceramic materials 12 p1900 A66-24720

Hugoniot equations of stage derived for several unreacted explosives and propellants from optical measurements of shock wave and particle velocities 13 p2171 A66-25377

Decomposition times of liquid nitromethane, liquid tetranitromethane and hexogen single crystals in shock waves 14 p2275 A66-27598

Blast environment simulation developing high pressures of relatively long duration, noting helical winding of cord explosive 16 p2681 A66-30501

Low velocity detonation in powder explosives 17 p3036 A66-32829

Approximate closed solutions for detonation velocity and pressure of condensed explosives 18 p3265 A66-34581

Explosive sensitivity of dust or sprays ignited behind reflected shock simulated by shock tube, measuring ignition delay dependence on shock temperature 20 p3680 A66-38039

Megagauss magnetic field generation by explosives and related experiments - Conference, Frascati, Italy, September 1965 21 p3773 A66-39501

**EXPLOSIVE DECOMPRESSION**  
Detonation and decompression research, comparing biological effects of explosive decompression and detonation 06 p0811 A66-16067

Biological effects of explosive decompression noting parameters such as altitude, pressure differential, compartment volume and rate of pressure loss 10 p1492 A66-22111

**EXPLOSIVE DEVICE**  
SA DETONATOR  
SA ELECTROEXPLOSIVE DEVICE  
Launching of beryllium, aluminum and steel projectiles up to 54,100 ft/sec 11 p1685 A66-22838

Behavior of pyrotechnic devices and explosives studied when heated to 145 degrees C for 36 hours /three separate times/ for development of dry-heat sterilizable equipment for space vehicles 13 p2014 A66-25288

Detonability of cryogenic oxidizers, discussing modified continuous wire technique analysis of detonation properties of trioxxygen difluoride 16 p2790 A66-31194

Explosive driven magnetic generator applied to investigate electric, optical and elastic properties of various substances, plasma physics and charged particle accelerator 16 p2637 A66-31585

Aerospace ordnance handbook intended as up-to-date reference on design and methodology of explosive systems used in space technology 18 p3159 A66-34184

Exploding bridgewire systems, discussing theory of wire explosion and various applications 18 p3135 A66-34191

Explosive separation systems for spacecraft compared with spring mechanism 20 p3665 A66-38264

Single explosive train for simpler safer shroud separation from spacecraft 20 p3665 A66-38265

Pulsed electrical power generation from detonation-driven linear MHD channels with magnetically located explosive 21 p3699 A66-39509

Behavior of pyrotechnic devices and explosives studied when heated to 145 degrees C for 36 hours /three separate

times/ for development of dry heat sterilizable equipment for space vehicles 24 p4260 A66-42784

**EXPLOSIVE FORMING**  
Explosion cladding for bonding similar and dissimilar metals without intermediate metal or externally applied heat 03 p0380 A66-12317

Safety measures in working with beryllium, discussing berylliosis prevention, dust reduction, protective suits, etc 05 p0687 A66-14862

Explosive welding of dissimilar alloy sheets 06 p0886 A66-16366

Critique of paper by Carter and Kennedy regarding origin of diamonds in Canyon Diablo and Novo Urei meteorite 09 p1447 A66-19881

Effect of water immersion on reduction of die stresses in explosive forming, investigating dynamic response of thin elastic spherical shell surrounded by large body of fluid, employing diagrams [ASME PAPER 65-PROD-6] 11 p1709 A66-22474

Aging behavior of explosively deformed 2219 Al investigated by transmission electron microscopy 13 p2086 A66-25775

Shock wave from explosion of laminar charges in air, water and vacuum 14 p2298 A66-26788

Explosive cladding for strong metal-metal bonds [ASTME PAPER AD66-112] 14 p2299 A66-26951

Metal hardening by explosive loading under near triaxial compression determined by charged power and independent of plastic deformation magnitude 15 p2523 A66-29599

Explosive technique for shaping low plasticity sheet metals by heating blanks with pyrotechnic agent in sand, with reference to Mo and Mg alloys 15 p2511 A66-29783

Underwater explosive stretch forming of clamped circular mild-steel blanks as affected by clamping ring and reflecting plate 16 p2709 A66-30268

Explosive forming process for deep aluminum shells, discussing limits and failure 17 p2930 A66-33091

Chemical energy conversion to electromagnet energy by flux compression, discussing process and obtained efficiency 21 p3698 A66-39502

**EXPLOSIVE GAS**  
SA GAS EXPLOSION  
Explosive hazard of gases generated by transformer potting materials of styrene-polyester copolymer, epoxy resin and polyimide resin when subjected to overloads 02 p0247 A66-11286

Asymptotic expansion applied to strong explosion in heat-conducting gas 07 p1025 A66-18181

Nonequilibrium chemical reaction effect on decay in spontaneous explosion for reactive expelled gas and inert expelling gas 08 p1179 A66-19482

Glass tube containing pressurized helium progressively imploded by coaxial explosive charge, considering application to hypervelocity guns 11 p1686 A66-22840

Explosive gas guns for hypervelocity acceleration 11 p1686 A66-22841

Detonation in gaseous mixtures and in condensed phase, reviewing aerodynamic theory 15 p2617 A66-29315

Exact analytic solution for propagation of spherical explosion waves in self-gravitating gas sphere 17 p3004 A66-32839

**EXPONENTIAL FUNCTION**  
Systematics of fission based on exponential mass formula, discussing neutron capture 02 p0263 A66-11835

Electric field effect on optical absorption edge, discussing exponential tail influence on magnitude of absorption coefficient 05 p0741 A66-15869

Noise rejection properties of time discrimination method of pulsed signals improved by using exponential rather than selecting function 08 p1182 A66-18916

Maximally reliable exponential prediction equations for data rate limited tracking servomechanisms 08 p1183 A66-18931

Large displacement bending of rods for

constant deformation cross section, negligible shearing forces and exponential stress-strain relation 08 p1314 A66-19580  
 Numerical integration of coupled first order ODE of greatly differing time constant 09 p1395 A66-20619  
 Convergence properties of exponential series expansions used as approximation in electrical network theory for real Schwartz distribution 11 p1724 A66-23423  
 Statistical distribution of first occurrence and recurrence of crossing of given level in continuous random process determined, using approximate forms and exponential distribution 13 p2116 A66-25141  
 Error bounds in phase-integral solution to differential equation with simple turning points 13 p2118 A66-25829  
 Functional integration analysis of exponential behavior of nonlinear feedback control systems 13 p2052 A66-26076  
 Calculus of functional differences particularly for case of exponential function 14 p2323 A66-27778  
 Thermal stratification and thermostability effects on turbulent diffusion approximated by Swinbank exponential wind profile 15 p2530 A66-28603  
 Reliability growth measurement via exponential smoothing, noting prediction of successive elements from given time series 15 p2508 A66-28805  
 Iterative derivation of approximation of real function by exponential series 15 p2527 A66-29056  
 Complex zeros of exponential polynomial in study of stability criteria for collisionless plane vacuum diode of infinitely heavy ions in interelectrode space 15 p2464 A66-29244  
 Book on ergodic problems in comparison theory and theory of diophantine, discussing residue distribution of polynomial of  $n$ th order modulo  $p$ , fractional parts of polynomial and exponential function 15 p2529 A66-29767  
 Necessary and sufficient condition for growth of solution to second order PDE with delayed arguments 16 p2733 A66-30742  
 Partial totals method of estimation for one parameter exponential model, comparing procedure with maximum likelihood, least squares and weighted least squares estimators 16 p2737 A66-31384  
 Integral representation providing one-to-one correspondence between functions of  $n$  complex variables and complex-valued harmonic functions of  $n$  plus 1 real variables 18 p3126 A66-33837  
 Real-order exponential function and application to describing creep process and to extrapolate 20 p3669 A66-37539  
 Unified approach to synthesis of orthonormal exponential functions with elements whose asymptotic order may be chosen arbitrarily and poles that may be real, complex or both 20 p3522 A66-37665  
 Methods for finding lower confidence bounds on reliability of item, noting reliabilities for items whose lifetimes follow Weibull distribution 20 p3574 A66-37966  
 Truncated sequential life acceptance tests of AGREE Task Group Three type, noting that such tests while useful are not optimum 20 p3574 A66-37968  
 Nonsteady helical flow of viscoelastic liquid contained in circular cylinder, noting occurrence of oscillations in fluid decaying exponentially with time 21 p3723 A66-38588  
 Heat transfer equation solution for ablating solid, assuming exponential temperature profile with numerical solution on digital computer by Runge-Kutta method 22 p3998 A66-40035  
 Airy and Weber equations solutions and relationships in terms of exponential function in connection with hydrodynamic stability and Orr-Sommerfeld equation 24 p4193 A66-42284

## EXPOSURE S RADIATION EXPOSURE EXPULSION

Computer-simulated mathematical model of thermal environmental effects on expulsion system design parameters for liquid-propellant gas-generator rocket engine [AIAA PAPER 66-686] 18 p3163 A66-34228

## EXTENSOMETER

Stress distribution measurement by vibration method, applying hand-held extensometer place by place on surface of structure subjected to dynamic load of finite amplitude [AIAA PAPER 65-785] 03 p0438 A66-13069  
 High temperature extensometer using linear variable differential transformer 07 p1030 A66-17230  
 Extensometer system and specimen alignment fixture for cylindrical or flat creep specimens 09 p1465 A66-19949  
 Longitudinal and transverse resistance-coefficients of thin film supporting materials, noting deformation resistance 13 p2107 A66-25460  
 Calibration method for tensile testing apparatus for testing elongated high modulus fibers and graphing of typical load elongation curves 17 p2943 A66-32400

## EXTERNAL STORE

### S NACELLE

## EXTINGUISHER

### S FIRE EXTINGUISHER

## EXTRACTION

S HYDROLYSIS  
 S ION EXTRACTION  
 S SEPARATION  
 S SOLVENT EXTRACTION

## EXTRAGALACTIC LIGHT

Radio and optical observations of discrete radio sources, evaluating flux density measurement, position, brightness distribution and polarization 20 p3645 A66-36959  
 Line-of-sight velocities in gas in peculiar extragalactic radio source NGC 4038-39 measured in orientations across object 23 p4129 A66-41805  
 Coordinates, flux densities and spectral indices of various radio sources believed to be extragalactic 24 p4273 A66-42416

## EXTRATERRESTRIAL ENVIRONMENT

### SA LUNAR ENVIRONMENT

### SA PLANETARY ENVIRONMENT

### SA SPACE ENVIRONMENT

Establishing absolute value for total wavelength integration of solar irradiance at Earth upper atmospheric limit and spectral distribution of this radiation 02 p0279 A66-11220  
 Survival of Earth organisms under environment simulated low pressure, low oxygen, low temperature and low extraterrestrial conditions 02 p0181 A66-11605  
 Physiological problems of weightlessness discussing motion sickness, fluid volume control and chronic effects on circulatory system 04 p0465 A66-14071  
 Dynamic environmental influences on man during space flight covering force fields, inertial forces due to acceleration and methods of protection 04 p0466 A66-14074  
 Solar spectrum measurement, discussing equipment design, testing and application [ISA PREPRINT 1.11-2-65] 05 p0684 A66-15511  
 Comet atmosphere analyzed for neutral particle distribution, acceleration and velocity variations relative to Sun, brightness, etc 10 p1605 A66-21207  
 Text on life into space covering space biology, extraterrestrial environment, temperature, pressure, acceleration, radiation effects, etc 10 p1492 A66-22062  
 Extraterrestrial environment and calculation of realistic metabolic requirements for astronauts 11 p1648 A66-23003  
 Space probe sterilization problems, noting methods employed, development requirements, monitoring of contamination, etc 13 p2012 A66-25266  
 Physiological study and instrumentation of pigtail Macaque under extended exposure to near-zero gravity environment 13 p2014 A66-25514  
 Meteoroid environment, meteoroid impact hazard on spacecraft structure and meteoroid shields 13 p2193 A66-25845  
 Penetration and absorption of solar optical, UV and EUV radiation in upper atmosphere /ionosphere, exosphere and ozone layer upper boundary/ 15 p2573 A66-28683  
 Microbiological and cytological experiments in Vostok spacecraft, noting behavior of

lysogenic E coli K-12 culture and normal and cancerous human cells 15 p2436 A66-294

Physiological reactions of Russian astronauts under prolonged weightlessness noting motor activity, heart and pulse breathing rates, arterial pressure, etc 15 p2436 A66-294

Immunological reactions of Russian spacemen before and after space flight 15 p2436 A66-294

Space flight effect on living cells examined by using higher plants as biological dosimeters 15 p2436 A66-294

Monograph on manned space flight discussing environment, crew, spacecraft navigation, guidance, control, communications, etc 16 p2809 A66-308

Oxygen reclamation for manned spacecraft considering stored, nonregenerative and molten carbonate systems 17 p2864 A66-321

Stress in spacecraft crew member measured using parotid fluid, noting relationship between biochemical variables under stress and nonstress conditions 17 p2866 A66-321

Attitude control system for OGC discussing design principles, space environment effects, reliability, etc 18 p3242 A66-338

Extravehicular maneuvering technique research, discussing manual locomotion methods, powered units, computer simulation, zero-g flight and space tests 19 p3291 A66-358

Automated biological laboratory with initial missions to Mars, noting functions operational and necessary instrumentation 24 p4167 A66-426

## EXTRATERRESTRIAL LIFE

### SA LIFE DETECTOR

Life on small extinct stars and large planets 01 p0133 A66-101

Possibility of life originating in different forms in various parts of universe response to changing environmental conditions 01 p0017 A66-103

Prevalence and diversity of life in Cosmos tracing divergent evolution in response variety of environment 01 p0017 A66-103

Extraterrestrial life or exobiology noting life possibility on Mars, Moon as possible information source, continuous generation matter in universe, etc 01 p0017 A66-104  
 Papers on experimental and theoretical aspects of exobiology 02 p0181 A66-116

Exobiology concepts suggest that apparent inherent limitations on temperature pressure or chemical environment for life matter are geocentric myths 02 p0181 A66-116

Astrophysical observation and experimental results of organic synthesis bearing abiogenic formation of biochemical compounds formed from simple precursor aqueous or aqueous ammonia system 02 p0181 A66-116

Lunar atmosphere and hydrosphere predicting dimensional correlation of craters and maria of primordial lunar life noting dark and smooth appearance 02 p0181 A66-116

Martian life possibilities discussing atmosphere, clouds, violet layer, temperature and biological interpretation dark areas 02 p0181 A66-116

Martian life-detection instruments and experiments, examining biological criteria and visual, organic, chemical and metabolic tests 02 p0183 A66-116

Radio search for intelligent extraterrestrial life, estimating civilization distribution frequency of best sensitivity and aggregate signal detection 02 p0191 A66-116

Exobiological trend and problems indicating types of organic matter on planet and origin and transfer of organisms in solar system 02 p0182 A66-116

Space travel and exploration covering biological and technical difficulties such as radiation, meteor impact, vehicle sterilization, etc 04 p0469 A66-138

Neurophysiological aspects of manned extraterrestrial space flights such as motor responses by sensory inputs, cortical responses, etc 04 p0464 A66-140

Biological characteristics and physical

conditions of space flights, such as low pressure, ionizing radiation, noise, acceleration, weightlessness, artificial atmosphere, feeding problems, etc 04 p0464 A66-14066

Future of environmental biology, discussing space research on living organisms in extraterrestrial environment 04 p0470 A66-14069

Heat loss in space, discussing temperature regulation during space walk via heat exchangers in air ventilated space suit 04 p0470 A66-14070

Telemetric Universal Sensor /TELUS/ describing measurement, processing and control of biological data from terrestrial and aerospace sources

ISA PREPRINT 1.2-2-65 05 p0683 A66-15506

Detection of microbial life on near planets by measuring physical parameters 06 p0810 A66-15909

Biosytlektes, device for collecting microorganisms in interplanetary space or upper atmospheric layers 06 p0814 A66-15914

Electrolysis-Hydrogenomonas bacterial bioregenerative life support system for manned space flight of long duration 06 p0815 A66-15929

Origination of organic matter and distribution of invisible bodies capable of supporting life 06 p0811 A66-16322

Extraterrestrial life detection and life support systems in manned space travel, noting electronic equipment necessary for it 08 p1175 A66-18727

Chemical composition of meteorites and micropaleontological evidence of existing meteoric biological carbonaceous chondrites 08 p1287 A66-18767

Spectral reflectance of selected vegetation, animal integuments and minerals for life detection on Mars 10 p1608 A66-21520

Martian life in light of Mariner IV data on adverse atmospheric composition, temperature and radiation 10 p1486 A66-21740

Mars environmental conditions, life organism detection, evaluation and limiting effects 11 p1771 A66-22715

Mineralogical, chemical and microscopic analyses of carbonaceous chondrites reveal presence of substances usually synthesized by living cells on Earth 11 p1771 A66-22744

Space travel and exploration and relationship to scientific research, with comments on exobiology 12 p1946 A66-23635

Space travel and exploration, biological and technical difficulties, radiation, meteor impact, vehicle sterilization, etc 12 p1807 A66-23640

Extraterrestrial life in solar system, discussing equipment for Mars exploration, noting Gulliver program, Multivator automatic biochemical testing apparatus and TV microscope 12 p1805 A66-23794

Extraterrestrial civilizations - All-Union Conference, Yerevan, Armenian SSR, May 1964 12 p1813 A66-23887

Communication with extraterrestrial civilizations 12 p1947 A66-23888

Detection of information transmitted by extraterrestrial civilizations 12 p1814 A66-23889

Information-bearing artificial signal from extraterrestrial civilizations is indistinguishable from natural noise 12 p1814 A66-23892

Possibility of detection of extraterrestrial civilizations by radio communications 12 p1814 A66-23893

Communication with extraterrestrial civilizations in radio wavelength range 12 p1814 A66-23895

Information theory techniques for search and analysis of radio signals from extraterrestrial civilizations 12 p1814 A66-23896

Approaches for analyzing possible life forms on other planets, noting detection of microorganisms or enzymes, radio contact and retracing life in laboratory 13 p2009 A66-25798

Nontechnical book on extraterrestrial life including origin of life, life signs in meteorites, Moon and Mars, man-machine combinations for space purposes, etc 13 p2011 A66-26317

Automatic chemical processing systems for

extraterrestrial biochemical investigations 14 p2233 A66-28414

Extraterrestrial life detection based on catalysis of oxygen exchange between labeled oxyanions and water, noting equipment 15 p2441 A66-29961

Pasteur Probe assay of asymmetry of D, L amino acids in detection of Martian life 15 p2447 A66-30025

Possible existence of plant life on Mars, judging from Mariner photograph data on Mars atmosphere and surface 16 p2798 A66-30356

Biogenesis, chemical evolution, detection of extraterrestrial life and future automated biological laboratory to explore Mars 16 p2798 A66-30361

Book on extraterrestrial biology covering origin processes of life, planets, life detection, etc 16 p2639 A66-30874

Engineering constraints involved in selection of Martian landing site for lander vehicles 18 p3232 A66-34367

Automated Biological Laboratory for Mars mission exobiological experiments controlled by computer routines 18 p3062 A66-34369

Processing of planetary soil samples for detection of extraterrestrial life 18 p3062 A66-34370

Mass spectrometry and gas chromatography in analysis of organic compounds present in extraterrestrial bodies to provide information on existence of life 18 p3059 A66-34373

Chemical composition of meteorites and micropaleontological evidence of existing meteoric biological carbonaceous chondrites 19 p3459 A66-35570

Mars probe instrument package design for biological exploration 19 p3287 A66-35572

Microorganism changes under extreme environmental factors, noting possible Martian life and meteoritic organic compounds 19 p3284 A66-35574

Possible adaptation of asteroids to support human life for indefinite periods of time 19 p3285 A66-36241

Book on possibility of extrasolar intelligence covering origin of planetary systems, development of life and terrestrial biological evolution 20 p3506 A66-37305

Book on natural evolution including origins of universe, stellar and planetary evolution, beginnings of life on Earth and development of intelligence and technical civilizations among galactic communities 24 p4163 A66-42347

Unmanned exploration of solar system - AAS Symposium, Denver, February 1965 24 p4274 A66-42653

Detection of extraterrestrial biological systems, noting criteria such as radiant energy requirements for life evolution, molecular characteristics, etc 24 p4164 A66-42669

Experimental biology in space, discussing goals, contributions and future potentials 24 p4164 A66-42670

Extraterrestrial life detection on Mars and limitations on terrestrial observations and flyby and landing missions 24 p4167 A66-42673

Wolf Trap Mars microorganism detection, assuming photosynthetic and respiration cycles in inorganic biochemical compounds 24 p4168 A66-42676

**EXTRATERRESTRIAL MATTER**

Terrestrial origin of pseudometeoritic Igast objects 08 p1298 A66-19596

Deposition of black magnetic spherules from atmosphere at two stations in New Mexico believed to be of extraterrestrial origin 09 p1370 A66-19879

Friedmann cosmological equation for noninteracting mixture of radiation and dustlike matter 14 p2380 A66-27275

Origin of tektites with Moon considered most likely extraterrestrial source 20 p3656 A66-38059

Sporadic E layer formation at night, noting ionization sources and intensity 23 p4064 A66-41645

**EXTRATERRESTRIAL RADIATION**

**S PLANETARY RADIATION**

**S SPACE RADIATION**

**EXTRAVEHICULAR OPERATION**

**SA ASTRONAUT LOCOMOTION**

DOD Gemini experiment D-12 astronaut

maneuvering unit /AMU/ design, detailing propulsion, flight control, oxygen and power supply, abort-alarm and communications 02 p0294 A66-11643

Extravehicular mobility unit /EMU/ to be worn by astronauts on Apollo lunar landing mission 08 p1176 A66-18584

Orbital flight of cosmonauts Beliaev and Leonov on March 18, 1965 includes description of spacecraft and extravehicular activity 09 p1464 A66-20460

Integrated space suit, suit loop and backpack system for intravehicular operation on interplanetary missions 13 p2013 A66-25277

Mathematical model study of three-mass retrieval technique using anchor mass in space for future Gemini extravehicular operation 16 p2812 A66-31538

Simulated orbital flights with extravehicular activities, determining incidence and severity of flyers bends due to decompression and exercise 17 p2856 A66-32148

Ideal operation of portable life support system /PLSS/ requires anticipatory response to astronauts changing heat dissipation needs 17 p2863 A66-32152

Space maintenance and extravehicular activities - National Conference, Orlando, Florida, March 1966 19 p3289 A66-35946

Extravehicular space activities related to assembly and maintenance of large space stations, antennas and solar collectors 19 p3290 A66-35947

Very rapid-curing capsular adhesive developed for use in astronaut-to-space vehicle attachment device 19 p3363 A66-35949

Applicability of electron beam welding techniques for in-space welding and maintenance, examining fabrication of typical aerospace joints 19 p3363 A66-35951

Tool fastener interface problems peculiar to extravehicular environment examined by measurement of torque and linear /or push-pull/ forces 19 p3363 A66-35952

Extravehicular astronaut maneuvering and retrieval using thrusting devices and tether lines 19 p3290 A66-35956

Low-thrust jet fitted shoe for zero-gravity movement 19 p3290 A66-35957

Astronaut maneuvering unit, discussing experiments, performance requirements, design concepts, system tradeoffs, packaging and configuration 19 p3290 A66-35958

Remote maneuvering unit, discussing principle, functions, feasibility, composition and application 19 p3469 A66-35959

Extravehicular maneuvering techniques research, discussing manual locomotion methods, powered units, computer simulation, zero-g flight and space tests 19 p3291 A66-35960

Modular maneuvering unit for crew members providing independent propulsion, life support, power supply and communication capability 19 p3450 A66-35961

Computer simulation and performance prediction of MMU astronaut maneuvering system, discussing acceleration, velocity, displacement, fuel consumption, propulsion efficiency 19 p3291 A66-35964

Gemini extravehicular spacecraft maintenance experiments under simulated conditions 19 p3364 A66-35965

T-27 Space Flight Simulator, for extravehicular activity training, utilizing closed-circuit TV system 19 p3291 A66-35966

Extravehicular activities interface with data recording system and economical recovery of optimum quantity of data 19 p3291 A66-35967

Extravehicular activity /EVA/ mission simulation, discussing design parameters effect on operating characteristics 19 p3469 A66-35969

Hard shell constant-volume pressure suit affords secure self-contained extravehicular environment capable of fulfilling variety of space maintenance roles 19 p3291 A66-35971

Extravehicular environment and mobility constraints affecting design of anthropomorphic space suit for working astronaut 19 p3291 A66-35972

Controller, employing voice recognition principle, for attitude control system of astronaut maneuvering unit in various space tasks 19 p3291 A66-35973

Spacecraft in-flight interior and exterior maintenance problems for long missions 19 p3469 A66-35975  
Extravehicular activity during Voskhod II flight, discussing motion and orientation of Soviet cosmonaut in space 21 p3701 A66-39337

## EXTREMUM VALUE

## SA GUMBEL THEORY

Search theory extremal problems, considering theorems in terms of maximum principle for finding optimal strategy 01 p0051 A66-10734  
Gravitational potential gradient for body consisting of positive or negative masses with known density extremum value and known or unknown volumes 04 p0514 A66-13449

Simplest system of auto-oscillatory extremal control, examining control plant output law 04 p0502 A66-13701

Theory of differential equations discussing extremal problems for generalization of optimal control problem 04 p0505 A66-13994

Extremal problems in aerodynamics, discussing mathematical and physical models for optimum aerodynamic shape 04 p0455 A66-13995

Extremum problem connected with simultaneous approximations of some functions analyzed by polynomials and derivatives 04 p0540 A66-14467

Extremum problems with asymmetrical supplementary conditions in certain classes of analytical functions 04 p0540 A66-14468

Solution of extremal problems of celestial mechanics 05 p0764 A66-15318

Extreme properties of operator which degenerates to trigonometric polynomials in case of periodic functions 05 p0709 A66-15358

Necessary conditions for extremum in problems of control with aftereffect 10 p1518 A66-21975

Existence and convergence theorems for minimizing sequences for extremum problems in presence of constraints 10 p1551 A66-21978

Asymptotic conditions of extremum as function of small parameter in calculus of variation 11 p1723 A66-23327

Gumbel theory of extreme values as statistical technique in reliability problems, with emphasis on double exponential distribution 12 p1833 A66-24084

Maximum information principle applied to search for minimum of function 13 p2028 A66-26475

Simplest system of auto-oscillatory extremal control, examining control plant output law 15 p2469 A66-28542

Variational problem in Banach space including optimal control problems, deriving conditions for extremality and Pontryagin maximum principle 15 p2473 A66-29378

Graphic analysis of behavior of stepwise extremal control system adapted to process showing inertia after static characteristic 16 p2668 A66-30585

Graphical analysis of extremal control system stepwise adapted to process with extremal characteristic located between two first-order linear operators 19 p3324 A66-35582

Extreme value statistics estimation of low error probabilities in binary communication systems 19 p3301 A66-35688

Self-oscillations of pulse type extremum system with plant having extremal characteristics shaped by multiplication of two coordinates 19 p3325 A66-35985

Invariance effect for finite number of coordinates in infinite dimensional automatic control system 19 p3325 A66-35986

Necessary conditions for extremum in problems of control with aftereffect 19 p3330 A66-36185

Existence and convergence theorems for minimizing sequences for extremum problems in presence of constraints 19 p3390 A66-36188

Existence and properties determined for most effective sequential method of seeking argument value at which continuous function of one variable assumes extremum value 19 p3391 A66-36659

Absolute extremum existence in boltz-mayer-type variational problem established by optimality principle 19 p3472 A66-36843

Low error probabilities in binary communication systems estimated by statistics of bivariate extreme-value theory 20 p3514 A66-37211

Dynamic programming for optimal algorithm for external control in presence of noise at system input and output 20 p3538 A66-37746

Relationship of earliest failures to fleet size and parent population 20 p3573 A66-37956

Extension of extremum principles concerned with velocity fields for boundary value problems of incompressible rigid viscoplastic /Bingham/ solid 21 p3832 A66-39440

Optimizer for shaping control signal of hunting-type system with plant in form of nonlinear inertialess element, examining inadequacy for system operation 22 p3883 A66-39659

Successive approximation method for optimization of nonlinear systems of ordinary differential equations with limitations on phase coordinates 23 p4084 A66-41352

Search theory extremal problems, considering theorems in terms of maximum principle for finding optimal strategy 24 p4232 A66-42750

## EXTRUSION

## SA COLD WORKING

Extrusion, reextrusion and drawing of tungsten and tungsten-rhenium alloy tubing 05 p0688 A66-15067

Extrusion process for complex beryllium structures, noting die-wear problem 08 p1230 A66-18843

Stress rupture of double extruded wrought alloy of cast nickel-base superalloys 12 p1895 A66-24373

Extrusion of refractory metal alloys at 5000 degrees F [ASTME PAPER MF66-108] 14 p2299 A66-26949

Extruded tungsten composites containing fibered or reacted additives examined, noting stress rupture life, temperature effect, creep properties, density, hardness, etc 16 p2723 A66-30639

Extrusion spinning method for fabricating refractory metals such as tungsten provides maximum material yield compared to normal tube extrusion processes 19 p3369 A66-36129

Extrusion of viscous incompressible substance through round hole in infinite wall, obtaining pressure and velocity fields 23 p4057 A66-41738

Extrusion of viscous incompressible substance through round hole in infinite wall, obtaining pressure and velocity fields 23 p4057 A66-41738

SA LENS  
SA OCULAR CIRCULATION  
SA RETINA  
SA VISION

Schoen hypothesis concerning image arrival time at cortex, depth values, retinal input, stereopsis, etc 17 p2862 A66-33089

Computer ray tracing study of image-forming in eyes as affected by pupil size, refractive indices and curvatures of cornea and lens 23 p4025 A66-41149

EYE DISEASE  
S GLAUCOMA  
EYE MOVEMENT

Basic physiological oculomotor mechanisms that make human image stabilization possible, examining flight disturbance effect on system stability 01 p0019 A66-10607

Oculomotor responses to vestibular and optokinetic stimuli during eight-turn spins in jet trainer aircraft 01 p0020 A66-10612

Visual acuity definition and clinical measurement of relevant factors 04 p0462 A66-13793

Influence of eye lid movement upon electro-oculographic recording of vertical saccadic eye movements 07 p0999 A66-17662

Contribution of accommodation and eye movements to effectiveness of visual observation and tracking of objects by aircraft personnel 10 p1490 A66-22133

Interaction between optokinetic and vestibulo-ocular responses during head rotation in various planes 11 p1643 A66-22583

Eye control in relation to visual process, showing derivation of position information from pointing of eyeball 12 p1807 A66-23645

Neuron network model of oculomotor system to understand human eye movement 13 p2008 A66-25336

Human eye, capabilities as optical instrument, particularly spatial filtering effects, visual acuity, eye movement and light receptors 14 p2228 A66-27650

Otolith organ activity within Earth standard, one-half standard and zero gravity environments and effect of extralabyrinthine factors effect upon counterrolling 15 p2431 A66-28664

Prolonged optokinetic stimulation effect on rabbits studied by corneoretinal potential changes during eyeball motion 15 p2437 A66-29471

Urinary excretion of 3-methoxy-4-hydroxymandelic acid during dreaming sleep in man 16 p2638 A66-30633

Pilot eye movement data by recording eye fixations on flight instruments 16 p2644 A66-31273

Biochemical experiments aimed at explaining rapid eye movement sleep /REMS/ 16 p2641 A66-31391

Gaze direction lead during slow patterns of head movement 17 p2865 A66-32179

Electrophysiological study of pituitary adrenal axis activation during rapid eye movement /REMS/ in human urology patients 17 p2859 A66-32303

Eye movement data used for studying nonvisual processes involved in oculomotor patterns 18 p3059 A66-34191

Pulse stimulated eye response cancellation due to information contained in subsequent pulse with longer duration 20 p3504 A66-36944

Illusion theory to explain differences between true motion of figure and apparent motion, emphasizing geometric effect in changes in retinal images 20 p3504 A66-36944

EYE PROTECTION  
Protection devices against vision impairment occurring during exposure of airmen and military personnel to intense visible radiation 01 p0019 A66-10482

Overall profile of ophthalmic injury associated with ionizing and nonionizing electromagnetic radiation fields based on human response to radiation exposure 01 p0018 A66-10793

Hazards, effect, safety and precaution for prevention of physical injuries from laser radiation 04 p0529 A66-13694

High altitude visual flight environment discussing sky brightness, instrument and runway lighting, visual fields, eye protection, etc 10 p1494 A66-22133

Protection and hazard to eyes of uninformed operators and bystanders from laser light 14 p2309 A66-27668

Eye patch and flashblindness protection 22 p3857 A66-39794

Explosive lens flash blindness protection system consisting of flight helmet to support goggle lens, sensing device and discriminator unit 24 p4168 A66-42853

## F

## F-1 LAYER

Improved F-1 layer prediction system that can be used to predict maximum usable frequency /MUF/ for northern latitudes 07 p1000 A66-17213

Longitudinal variations of various characteristics of F-1 layer compared for periods of high and low solar activity 12 p1869 A66-24271

Dependence of electron concentration in F-1 layer on zenith angle of Sun 15 p2486 A66-29092

Measures of electron production and loss and scale height of F-1 layer during summer solar minimum 22 p3916 A66-40806

F-1 layer formation as affected by solar activity, seasons and time of day 24 p4202 A66-42761

F-2 LAYER  
Electron concentration-distribution data for ten quiet days during spring 1958 in F-2 layer 01 p0063 A66-11027

Computer program for average values of critical frequency of F-2 layer and deviation 02 p0224 A66-12125

Magnetic activity effect on F-2 region drifts and variation with time at low

latitude station 03 p0361 A66-12633  
 Correlation dependence of F-2 layer on solar wave energy entering Earth atmosphere 04 p0515 A66-13850  
 Comparison of diurnal variations of ionization level in F region at geographically and geomagnetically conjugate stations in Arctic and Antarctic 04 p0516 A66-13851  
 Critical frequency of F-2 layer at Huancayo and variation with magnetic activity at different epochs of solar activity 04 p0517 A66-14378  
 Ambipolar diffusion in magnetic field showing plasma equations of momentum-transfer yield unambiguous steady state solutions 05 p0669 A66-14943  
 Variation in dispersion and asymmetry of F-2 layer critical frequencies, plotting particular secular variations 06 p0950 A66-16593  
 Geomagnetic sudden-commencement storms effect on electron concentration in F-2 layer above Europe 08 p1215 A66-19082  
 True height variations of F-2 layer for bay disturbances of geomagnetic field obtained from ionograms, assuming they are caused by horizontal electric field 08 p1216 A66-19213  
 Power series solution of F-2 layer diffusion equation, calculating equilibrium electron density from equatorial profile 08 p1216 A66-19215  
 Ionospheric F-2 region equatorial anomaly may not be caused by geomagnetic field 08 p1217 A66-19217  
 Improved HF prediction using ray tracing techniques to determine F-2 layer scale heights and scale height h for alpha-Chapman electron density distribution 08 p1217 A66-19218  
 Harmonic analysis of diurnal changes in critical frequencies of F-2 layer as function of season and solar activity 08 p1285 A66-19777  
 Dependence of variations in critical F-2 ionization on solar activity 08 p1220 A66-19791  
 Electron density distributions in daytime F-2 layer and dependence on neutral gas, ion and electron temperatures 11 p1699 A66-23135  
 Satellite data indicates correlations between cosmic ray variations and radiation intensity of radiation belts and related phenomena 12 p1941 A66-24170  
 Fluctuations in diurnal variations of ionization of F-2 layer interfering with radio wave propagation determined by series expansion 12 p1869 A66-24270  
 Relation between magnetic activity and ionospheric disturbances in F-2 layer studied on basis of 30-year data 12 p1870 A66-24285  
 Statistical distribution of monthly median noon critical frequency of F-2 layer from ionospheric stations at mid-latitudes, auroral regions and at polar cap 12 p1870 A66-24286  
 Effects of solar flare radiation on electron density of F-2 layer at maximum level in and near equatorial anomalous zone 12 p1944 A66-24834  
 Solution of continuity equation for electrons leads to high loss rate in prenoon maximum of electron density in F-2 layer 14 p2283 A66-27397  
 Lunar tidal variations in monthly median noon critical frequency in American zone during low solar activity 14 p2285 A66-27727  
 Computer program for average values of critical frequency of F-2 layer and deviation 14 p2287 A66-28083  
 Cyclic variations in maximum electron concentration of F-2 layer with solar activity explained by upper atmosphere temperature variations 15 p2486 A66-29093  
 Fast phase fluctuations of signal reflected from F-2 layer 15 p2451 A66-29094  
 Critical ionization frequencies in F-2 layer in near-polar region observed at Northern Hemisphere high latitude stations 15 p2487 A66-29107  
 Cyclic curves of F-2 layer critical frequencies based on seasonal phase variations in solar cycle 15 p2488 A66-29108  
 Spectrum analysis of critical frequency of F-2 layer 16 p2692 A66-30330  
 Day-to-day variations in F-2 critical frequency 16 p2693 A66-30339  
 Microbarographic analysis of troposphere-

ionospheric storm relationship, ground level pressure fluctuations and polar region traveling pressure waves 17 p2920 A66-33088  
 Initial disturbances in F-2 layer at middle latitudes during magnetic storms which begin with sudden commencement and relation to magnetic field changes 17 p2922 A66-33353  
 Contribution to dependence of variation of unperturbed ionospheric F-2 critical frequencies on season and solar activity 18 p3105 A66-34097  
 Nature of middle-latitude ionospheric perturbations 19 p3344 A66-35262  
 Anomalous enhancement of F-2 ionization in high latitude around geomagnetic noon due to formation of irregularity or new layer around locality 20 p3658 A66-38234  
 Harmonic analysis of diurnal changes in critical frequencies of F-2 layer as function of season and solar activity 21 p3809 A66-38773  
 Dependence of variations in critical F-2 ionization on solar activity 21 p3733 A66-38787  
 Mean variation of electron density profile of ionosphere above Lindau/Harz, noting semiannual variation of F-2 layer peak height related to solar activity 22 p3908 A66-39965  
 Seasonal anomaly of F-2 layer critical frequency partially explained by assumed electron-ion flux flowing between magnetically conjugate points from summer to winter hemisphere 22 p3908 A66-39966  
 Lunar tidal effects on noon real-height F-2 electron density profile data from two-year interval 22 p3908 A66-39967  
 Simultaneous long term ionospheric variation in midday averages of critical frequency E and F-2 at Washington, D.C. before and after increased geomagnetic activity 22 p3914 A66-40560  
 Anomalous enhancement of ionospheric F-2 region electron density at post-sunset time in low and equatorial latitudes 24 p4198 A66-42462  
 Optimum communications working frequencies for F-2 layer reflection selected with aid of communications reliability function 24 p4176 A66-43160

#### F-4 AIRCRAFT

General Electric self-adaptive control effect on airframe handling quality characteristics in F-4A aircraft 01 p0098 A66-10006  
 Automatic and semiautomatic vectoring and landing capability of U.S. Navy carrier-based aircraft F-4G Phantom II 01 p0099 A66-10009  
 Boundary layer control/BLC/ high lift system used as integral part in design of F-4 Mach 2 plus Navy interceptor [AIAA PAPER 65-714] 01 p0013 A66-10951  
 Boundary layer control/BLC/ high lift system used as integral part in design of F-4 Mach 2 plus Navy interceptor [AIAA PAPER 65-714] 12 p1801 A66-24095  
 Digital testing techniques for analog systems, describing bomb computer set for Phantom F-4D aircraft 20 p3522 A66-37246  
 General Electric self-adaptive control effect on airframe handling quality characteristics in F-4A aircraft 23 p4088 A66-40982

#### F-5 AIRCRAFT

F-5/T-38 design philosophy to meet rigorous operational and maintenance requirements 01 p0010 A66-10094  
 Northrop F-5 as supersonic tactical fighter [AIAA PAPER 65-778] 03 p0320 A66-12593

#### F-8 AIRCRAFT

Glide slope direct lift control of carrier landings, discussing trim change with actuation and longitudinal stability and control 07 p0986 A66-17272  
 Investment cast 17-4PH incorporated into actuating and supporting mechanism double droop leading edge of wing of F-8E/FN/ French Crusader 17 p2929 A66-32693

#### F-27 AIRCRAFT

S FOKKER F-27 AIRCRAFT

#### F-28 AIRCRAFT

S ENSTROM F-28 HELICOPTER  
 S FOKKER F-28 AIRCRAFT

#### F CENTER

Decay of F-center excitations in alkali halides induced by short intense pulse of Q-switched ruby laser 08 p1275 A66-19367

Strong electron-phonon interaction which couples electron to lattice motion in F center of alkali halide crystal by measuring temperature dependence of F center absorption and emission bands 15 p2559 A66-28629

#### F LAYER

Nondeviated absorption of radio waves in intermediate region between E and F layers 01 p0031 A66-11051  
 MHD absorption of internal gravitational waves in ionospheric F layer in terms of traveling disturbances 02 p0283 A66-12116  
 Equatorial F-region electron density distribution is natural steady state distribution for charged fluids as shown by momentum transport equation for charged gaseous fluids 03 p0364 A66-12678  
 Radar echoes explained in terms of backscatter from field-aligned irregularities in F region 03 p0334 A66-12679  
 Photoelectron energy distribution in F region 03 p0364 A66-12684  
 Magnetoionic splitting of radio signal in E and F layers, comparing calculated and theoretical gyrofrequency values 04 p0482 A66-13861  
 Dense sporadic E cloud effects on high latitude HF backscatter observation 05 p0667 A66-14792  
 Ionospheric F region electron density and electron and ion temperatures measured by ground-based radar backscatter 05 p0670 A66-14950  
 F-layer behavior over Genoa-Monte Capellino noting diurnal and seasonal variation, solar activity, nighttime concentration, spread-F, ionospheric and geomagnetic perturbations 05 p0671 A66-14982  
 Airborne ionospheric probes on both sides of magnetic equator at low African latitudes during equinoctial and solstice periods, obtaining daily behavior of F layer 05 p0674 A66-15113  
 F-layer structure at subauroral and auroral latitudes measured by multifrequency beacon satellite Explorer XXII 08 p1212 A66-18610  
 Electron concentration profiles above maximum of F layer calculated from measurements made on Earth surface 08 p1213 A66-19026  
 Ionograms showing satellite traces interpreted as inverted trough disturbance traveling in F region 08 p1216 A66-19212  
 Thermospheric heating effect on F-region ionization and electron density in daily basis study 08 p1218 A66-19404  
 Long-period acoustic-gravity waves launched into F region by Alaskan earthquake of March 28, 1964 08 p1219 A66-19418  
 Upper atmospheric parameters that control daytime electron density distributions in F-1 region determined with use of N/h/ profiles 09 p1372 A66-20369  
 Latitudinal dependence of sunrise effect in F region determined from Schermerling data for four ground stations 09 p1373 A66-20383  
 Effect of Soviet atmospheric nuclear explosions on D and F-2 ionospheric layers, particularly observing enhancement of atmospheric noise 10 p1600 A66-22058  
 Seasonal variation of F-region parameters at sunspot minimum, noting effects of ionospheric disturbances 11 p1695 A66-22368  
 Ground diffraction pattern caused by radio wave reflection from F region, using array of three aerias 11 p1651 A66-22374  
 Measurement of horizontal ionospheric drifts in E and F regions over magnetic equator 11 p1696 A66-22381  
 Effective electron collision frequency from electron temperature profile for ionospheric heating in F region 11 p1697 A66-22499  
 Midlatitude trough in F-region ionization of night ionosphere revealed by ion trap on polar-orbiting satellite 11 p1699 A66-23134  
 Diurnal and seasonable altitude variations of E and F layers analyzed for geomagnetic activity from rocket measurement of electron concentration 12 p1869 A66-24269  
 Ionograms made at Australian ionosonde stations during magnetically quiet world day interval, obtaining information on F region ionization, noting existence of universal time control of ionization 12 p1873 A66-24835

Unique ionospheric electron density distribution from ionograms from valley between E and F region 14 p2283 A66-27126

MHD absorption of internal gravitational waves in ionospheric F layer in terms of traveling disturbances 14 p2286 A66-28075

Electron concentration inhomogeneities during traveling gravity wave propagation through F layer 15 p2485 A66-29084

Electron-concentration distribution in ionospheric F-2 layer with vertical distribution of electron-ion gas 15 p2486 A66-29096

Relation between solar radiation and electron concentration up to F layer analyzed in winter and summer 15 p2487 A66-29106

Nightglow emission from atomic oxygen caused by dissociative recombination in F region 16 p2694 A66-30707

F-layer nightglow 6300 angstrom emission intensity and electron density data, noting variations in emissions 16 p2694 A66-30708

Maximum ionization in ionospheric F region around geomagnetic equator, noting instruments and observed variations 16 p2697 A66-30995

Equatorial ionospheric drifts observed at Ibadan, Nigeria, during solar activity minimum, and relation to diurnal variation of sunspot cycle and drift velocity variations in E and F region 16 p2700 A66-31759

Spread F and ionospheric F region irregularities relation to magnetic field alignment, discussing radio star scintillations 17 p2923 A66-33433

Temporal variations in temperature and drift velocity in ionosphere determined from nighttime variations of F-region electron density profiles at Puerto Rico 18 p3107 A66-34522

Magnitude of vertical drifts in F-region during high and low sunspot years, considering effect of ambipolar diffusion along geomagnetic lines of force 19 p3347 A66-35923

Separation of D-E and F-layer contribution to integral absorption of cosmic noise by means of combined pulse reflection and cosmic noise measurements 19 p3351 A66-36363

Pressure gradients in F region from model atmosphere, estimating from motion equations variation of magnitude and direction of wind with local time, season and epoch of solar cycle 19 p3352 A66-36626

Very steep latitudinal electron density gradients in topside F layer at high altitudes 20 p3554 A66-38197

Latitudinal variation of Pc-1 micropulsation propagation, examining attenuation by ionospheric F region duct that acts as waveguide for hydromagnetic waves 20 p3554 A66-38203

Successive hourly variations of equivalent current systems of magnetic bay disturbance patterns and F layer minimum frequency increases 20 p3658 A66-38232

Attachment coefficient and temperature dependence of ionic reactions in F layer for various activation energies 22 p3908 A66-39968

Electron density and electron and ion temperatures in F region studied by ground-based radar observations at Millstone Hill 22 p3909 A66-39976

Diurnal variation in electron densities and temperatures in F region above Puerto-Rico, using backscatter measurements 22 p3910 A66-39978

F layer electron temperature fluctuations and resultant electron density changes in daytime 22 p3910 A66-39980

Dependence of seasonal occurrence probability of F-zero layer on level of geomagnetic activity and ionospheric activity observed above Ashkhabad 22 p3914 A66-40760

Nighttime electron temperatures in upper F region suggest corpuscular energy input 23 p4064 A66-41682

Ionospheric electron content at temperature latitudes during declining phase of sunspot cycle determined by observation of Faraday effect 24 p4200 A66-42595

Decrease in electron density of ionospheric F region following passage of powered rocket 24 p4201 A66-42609

Magnetospheric phenomena related to geomagnetic tail noting F region, polar auroras and solar Lyman alpha radiation scattering in night sky 24 p4203 A66-43029

**F-104 AIRCRAFT**

F-104J production program from Japanese standpoint [AIAA PAPER 65-804] 03 p0446 A66-12600

Worldwide F-104 program, discussing licensing agreements and weapons system management [AIAA PAPER 65-776] 03 p0447 A66-13065

NASARR international program concerning F-15 fire-control systems for F-104 Starfighter [AIAA PAPER 65-777] 03 p0447 A66-13066

**F-110 AIRCRAFT**

**S F-4 AIRCRAFT**

**F-111 AIRCRAFT**

Flight development of F-111 swing wing fighter in A strike and B interceptor versions for Air Force and Navy 03 p0317 A66-12534

General Dynamics/Grumman multimission variable-sweep fighter for Navy and Air Force 04 p0458 A66-13930

Flight test report of F-111 aircraft, considering variable wing sweep, stability augmentation in automatic gains, high performance with slow speed takeoff and landing 07 p0986 A66-17273

F-111 swing-wing /variable-sweep/ aircraft program 11 p1637 A66-23101

Systems effectiveness and F-111, concept, cost, applicability, reliability, performance, etc, and use during F-111 aircraft development 11 p1789 A66-23440

Mark II avionics system used in F-111A tactical fighter for navigation and weapons delivery performance 18 p3076 A66-33958

Program management at subsystem subcontractor level for product reliability and maintainability in developing AN/APQ-110 terrain following radar for F-111A 20 p3685 A66-37914

Maintainability program of F-111B aircraft 20 p3574 A66-37961

**FABRIC**

**SA PARACHUTE FABRIC**

Glass, quartz, mineral and ceramic fibers woven into fabric provide thermal insulation, reinforced plastic, filtration, friction materials and electrical insulation 01 p0091 A66-10356

**FABRY-PEROT INTERFEROMETER**

Multichannel Fabry-Perot interferometer noting design, application, construction, calibration and measurements on plasma 02 p0232 A66-12201

Fabry-Perot interferometric modulator for laser beam, noting error of precise alignment of reflecting surfaces and Gaussian type of imperfections 02 p0232 A66-12202

Plasma electron concentration measured by Fabry-Perot interferometer partially filled with gas-discharge plasma and incorporating ruby laser 03 p0375 A66-12294

Optical interferometric, spectrographic and microwave techniques of electron-ion recombination in neon-spectral line 03 p0394 A66-12330

Fabry-Perot resonators compared with cavity resonators and microwave interferometers for plasma diagnostics, noting electron density application 03 p0398 A66-12525

Intensity distribution in Fabry-Perot interferometer producing resonant waves for large Fresnel number applied in model for filament-form laser mechanism 03 p0379 A66-13097

UHF Fabry-Perot interferometer for measuring low plasma electron density 04 p0518 A66-13475

Fabry-Perot interferometer and confocal and spherical resonator, calculating integral equations for eigenvalue and eigenfunction of lowest order TW eigenmode 04 p0523 A66-14277

Fabry-Perot fine etalon in astronomical use such as H-alpha emission line profile measurement 05 p0681 A66-15213

Fabry-Perot interferometer using wire grids instead of glass plates, covering operation, advantages and bandwidth characteristics 05 p0682 A66-15355

Mode losses of single iteration in confocal

beam waveguide resonator and transmission systems with circular lenses separated by twice focal length 06 p0848 A66-1610

Coherent amplification coefficients of neon lines in helium-neon 08 p1234 A66-1931

mixture Isotope shift measurement for 632 angstroms helium-neon laser transition 10 p1540 A66-2107

Estimation of incidence angles for which resolution limit of real Fabry-Perot etalon approaches value of ideal etalon 10 p1537 A66-2203

Fabry-Perot interferometer with mirrors in form of metallic strips to facilitate use in far IR and microwave spectral regions 11 p1704 A66-2234

Fabry-Perot interferometer with mirrors in form of backed metal grid, noting change in diffraction, reflection and transmission 11 p1704 A66-2234

Interferometer apparatus used in combination with Fabry-Perot etalon to study properties of low density atomic streams 11 p1709 A66-2329

Atomic oxygen night sky emission observations with pressure scanning Fabry-Perot interferometer 12 p1873 A66-2483

Fabry-Perot interferometer adjustment for reflectance of narrow-band dielectric reflection coating peaked in UV spectral region 13 p2081 A66-2600

Spectral energy distribution and Doppler broadening of Rayleigh light scattered from hydrogen and argon gas at low density using Fabry-Perot interferometer 13 p2133 A66-2610

High resolution piezoelectrically scanned Fabry-Perot interferometer used to study gain profiles, mode structures and emission line widths of CW Ar, Kr and Xe ion laser and Hg-He pulsed laser 13 p2102 A66-2620

Ruby laser monochromatic radiation separation by tapered multiplex interferometer with opposition dispersion 13 p2082 A66-2643

High Q Fabry-Perot interferometer for measurement of atmospheric gas losses, particularly water vapor absorption, using coherent light source in 100-300 frequency range 15 p2501 A66-2900

Laser oscillation with totally reflecting roof prism as cavity, noting output mirror alignment for two rotation axes 15 p2517 A66-2943

Estimation of incidence angles for which resolution limit of real Fabry-Perot etalon approaches value of ideal etalon 16 p2706 A66-3083

Multiple beam interferometer theory noting discrepancy between intensity distribution and Airy formula determination of theoretical resolving power 16 p2706 A66-3093

K-band Fabry-Perot resonator using planar and concave mirrors, determining overvoltage factors in interferometer, noting diffraction losses 16 p2707 A66-3123

Particle velocity in gas particle two-phase nozzle expansion using gas laser and Fabry-Perot interferometer for rocket engine propulsion [AIAA PAPER 66-522] 16 p2708 A66-3153

Electron density of plasma measured by multibeam Fabry-Perot radio interferometer 17 p2963 A66-3183

Transmission characteristics of Fabry-Perot aluminum-magnesium fluoride-aluminum interference filters in far UV region, noting preparation methods, optical properties etc 17 p2958 A66-3263

Fabry-Perot etalon use for interferometry and laser control, noting low angle scattering, laser oscillation, thermal tuning sensitivity, etc 17 p2925 A66-3263

Methane content of upper atmosphere determined by Fabry-Perot interferometer measurement of radiation transmission methane absorption band 17 p2926 A66-3293

Solar radiation and lunar observations at submillimeter wavelengths using Fabry-Perot interferometer 17 p3005 A66-3303

Stability of Fabry-Perot etalons with larboss areas 18 p3111 A66-3393

Automatic control of spacing of Fabry-Perot interferometers to transmit at given wavelength 20 p3558 A66-3723

Tunable birefringent Fabry-Perot

- interferometer used in study of solar magnetic fields, using Zeeman effect 20 p3558 A66-37289
- Laser emission interferograms obtained with Fabry-Perot cross-grating interferometer in submillimeter wavelength range 20 p3559 A66-37546
- Optical spectra of ultrashort optical pulses generated by mode-locked glass-doped neodymium lasers, considering saturable absorber cell placed parallel to Fabry-Perot reflector 21 p3747 A66-39115
- Laser amplifier theory using Fabry-Perot interferometer and Laplace transform for obtaining transient solutions in addition to steady state solutions 21 p3748 A66-39224
- Fabry-Perot interferometer in spectroscopy using satellites and 22 p3920 A66-40793
- rockets
- Interference filter of Fabry-Perot interferometer-type for studying millimeter and submillimeter plasma radiation 22 p3958 A66-40936
- Ruby laser giant pulse off-axial modes detected with high resolution spherical Fabry-Perot interferometer 23 p4079 A66-41627
- Edser-Butler band amplitude dependence on modulating effect of interference grating 24 p4212 A66-42819
- Tunable coupling of open waveguide type for semiconfocal Fabry-Perot cavity gives high transmission and high Q 24 p4216 A66-43221
- FABRY-PEROT LASER**
- Multireflector Fabry-Perot laser resonators, discussing suppression effect against unwanted modes 03 p0380 A66-13325
- Microwave models used to measure frequency and quality factors of Fabry-Perot resonator with plane square mirrors operating in X-band 05 p0695 A66-14909
- Modulation of laser light with composite Fabry-Perot resonator, using more than three multiple reflecting plates 05 p0698 A66-15836
- Threshold pumping energies compared to determine losses in Fabry-Perot resonators due to mirror misalignment 05 p0685 A66-15856
- Multiple internal-reflection folded-path rectangular laser configuration for obtaining length of active media between Fabry-Perot reflectors 06 p0891 A66-16652
- Reflection gratings as end plates in Fabry-Perot cavity, with characteristics of low absorption output coupling and wavelength-dependent alignment of end plates 09 p1385 A66-19930
- Solid state laser output exhibiting regular and irregular spikes analyzed through relaxation oscillations and classical physics 09 p1387 A66-20568
- Laser induced gas breakdown at high pressures, noting effect of plasma density on index of refraction via optical frequency resonance measurement 10 p1542 A66-21564
- Pressure effects in Fabry-Perot lossy-cavity gas laser output 13 p2101 A66-26199
- Mode theory of spherical mirror resonators, discussing diffraction losses, resonant conditions, mode patterns, internal focusing elements, mode selection, etc 20 p3599 A66-36972
- Spectral and time-dependent characteristics of stimulated radiation from ruby pulse laser, using Fabry-Perot etalon in fine-structure observation 22 p3931 A66-39823
- Recombination radiation from GaAs p-n junctions with and without Fabry-Perot resonator, noting parameter dependence on current density 22 p3932 A66-40314
- Theory of steady multimode oscillation of solid state laser extended to cavities with inefficient end mirrors or losses dependent on frequency 23 p4077 A66-41274
- FABRY-PEROT SPECTROMETER**
- Plasma electron density and formation determined, using Fabry-Perot resonator 16 p2756 A66-30104
- Grille spectrometer, noting greater signal to noise ratio than that of scanning Fabry-Perot spectrometer for airglow observations 19 p3353 A66-35378
- FACE CENTERED CUBIC /FCC/ CRYSTAL**
- Crystalline structure on fatigue noting changes of body-centred metals and face-centred and hexagonal metals 02 p0245 A66-11948
- Energy gap and thermoconductivity of normal and superconducting fcc lanthanum 03 p0407 A66-12320
- Hydrogen effect on strength, plasticity and brittleness of metals with fcc lattice at various temperatures and hydrogen concentrations 12 p1894 A66-23763
- Martensitic transformation of Ni-Fe alloy from fcc to bcc lattice, noting stress produced by chemical free energy difference between austenite and martensite structure 15 p2520 A66-28649
- Momentum and energy accommodation for hypervelocity gas particles on crystal surface, using Lennard Jones potential and approximating lattice by system of independent forced harmonic oscillators 16 p2752 A66-30388
- Upper and lower bounds on partition functions for finite systems of rigid disks and spheres for high density limit 18 p3139 A66-34503
- Propagation of stacking faults in fcc metals, noting effect of frictional force in cutting through attractive tree and subsequent dipole formation 18 p3258 A66-34631
- Enumerating neighbors of atom in diamond-like lattices 21 p3805 A66-39584
- FACILITY**
- S DEEP SPACE INSTRUMENTATION FACILITY /DSIF/
- S GROUND HANDLING FACILITY
- S HIGH FIELD MAGNET FACILITY
- S LAUNCHING FACILITY
- S RESEARCH FACILITY
- S TEST FACILITY
- FACSIMILE TRANSMISSION**
- Panoramic facsimile camera providing IR and visible spectrum imagery designed for unmanned space operation, noting construction, weight, etc 13 p2077 A66-25236
- FACTOR**
- S AGE FACTOR
- S AMPLIFICATION FACTOR
- S EMOTIONAL FACTOR
- S FORM FACTOR
- S FRANCK-CONDON FACTOR
- S GEOMETRIC FACTOR
- S HUMAN FACTOR
- S LOAD FACTOR
- S MASS FLOW FACTOR
- S PH FACTOR
- S PHYSICAL FACTOR
- S PHYSIOLOGICAL FACTOR
- S PSYCHOLOGICAL FACTOR
- S Q-FACTOR
- S SAFETY FACTOR
- S SEX FACTOR
- S SOCIAL FACTOR
- S TIME FACTOR
- S WEIGHT FACTOR
- FACTOR ANALYSIS**
- Matrix algebra, discussing factorization, determinants, eigenvalues, polynomials, inequalities, etc 17 p2945 A66-31869
- Symbolic factoring of multivariate polynomial with integer coefficients, noting application of Kronecker method and techniques of implementation 21 p3708 A66-38681
- Synthesis of linear multivariable control systems in statistical dynamics, using method of factorization of spectral matrices 23 p4048 A66-41394
- Textbook reissue on diffraction of electromagnetic and acoustic waves at open end of waveguide studied, using Wiener-Hopf-Fock factorization method 24 p4177 A66-43225
- FADING**
- SA RAYLEIGH FADING
- SA SELECTIVE FADING
- SA SIGNAL FADING
- Fading and multipath propagation mechanism for communication links involving satellites and aircraft with antenna beams, assuming fading models and estimating marging required for FSK teletype transmission [AIAA PAPER 66-294] 12 p1822 A66-24763
- FAI**
- S FIELD-ALIGNED IRREGULARITY /FAI/
- FAIL-SAFE SYSTEM**
- Fail-safe system used in temperature environment testing chambers functioning independently of control system and reacting to valve failure, power loss, etc 14 p2270 A66-27666
- Numerical analysis of safety level of fail-safe structure with method applicable to multiloop path structures with discrete elements 20 p3666 A66-37001
- FAILURE**
- SA ABORT
- SA CRACK
- SA ENGINE FAILURE
- SA FATIGUE
- SA FRACTURE
- SA SHORT CIRCUIT
- SA STRAIN
- SA STRESS
- SA STRUCTURAL FAILURE
- SA SYSTEM FAILURE
- Linear estimation for log Weibull distribution from random sample of ordered failure time 01 p0091 A66-10120
- Reliability in optimal control problems in terms of probability of faultless operation 13 p2047 A66-25626
- Frequency of maintenance evaluation in maintainability analysis by substituting failure rate for frequency of corrective maintenance or frequency of interruption 20 p3569 A66-37923
- FAILURE MODE**
- Pratt and Whitney Aircraft system for achieving reliability assurance in gas turbine engines, discussing management, failure modes, product development and tests 01 p0128 A66-10062
- Spaceborne digital computers in reliability program, using failure data in design and evaluation 01 p0033 A66-10064
- DC-9 reliability program emphasizing simplicity improved proven components rather than completely new equipment 01 p0010 A66-10088
- Parameter dependent approach mechanization for in-flight testing of aircraft system, considering electronic subsystems 01 p0010 A66-10096
- Relationships of hazard rate distributions to reliability growth and confidence computations 01 p0077 A66-10109
- Statistical engineering aspects of probe testing for achieving mature designs earlier in product life cycle 01 p0077 A66-10115
- Metallographic polishing procedures used to reveal failure modes in gold-aluminum thermocompression bonds 01 p0049 A66-11153
- Reliability and design factors for space power conditioning equipment examining peak power, component part specifications, integrated circuits and failure analysis 02 p0180 A66-11283
- Reliability of photogrammetric equipment discussing formulation of criteria, contractor requirements and testing 02 p0227 A66-11377
- Instantaneous strength determinations for exponential failure distribution are ineffective in assessing underlying failure rate 03 p0342 A66-12899
- Mathematical model that takes into account factors involved in detecting faults as well as MTBF and MTTR for prediction of equipment availability 04 p0494 A66-13682
- Assured performance calibration discussing statistical quality control, instrument variability, vacuum tube and digital voltmeter histories, calibration costs, etc 04 p0520 A66-13941
- Strength of fiber reinforced metals, examining fracture mode 05 p0700 A66-14813
- Fatigue test of 1000 aluminum specimens in order to assess accuracy with which lower tail of probability distribution of failure curve fits experimental results 05 p0774 A66-15056
- Reliability of integrated circuits noting stress test schedules, failure rates and sources 05 p0650 A66-15369
- Modes of contact fatigue failure classified after appearance and factors promoting initiation and propagation, noting fatigue life of roller bearings subjected to cyclic contact stress [ASME PAPER 65-WA/CF-2]
- 05 p0690 A66-15621
- Spacecraft microelectronic device failure modes and mechanisms 05 p0650 A66-15830
- Capacitor reliability as function of voltage and temperature of dielectric and environmental conditions 06 p0839 A66-15951

Beach and ratchet marks plus component geometry information and stresses to pinpoint fatigue failure in service 08 p1306 A66-18634

Compression instability of unidirectional composites consisting of regularly spaced arrays of axially loaded columns supported by elastic filler [AIAA PAPER 66-143] 08 p1309 A66-19005

Reliability and failure mechanisms of integrated circuits 11 p1669 A66-23158

Accelerated testing of transistors, resistors and capacitors to determine reason for certain types of component failure 12 p1844 A66-24728

Defect analysis by device sectioning, noting techniques, application in crystallography, electronics, etc 12 p1845 A66-24849

Failure mode effect, block redundancy, functional redundancy and cooperative multichannel design for system reliability in Mariner spacecraft 13 p2191 A66-25284

Naval Ordnance Laboratory /NOL/ multiaxial fatigue test for failure mechanisms in fiber-reinforced composite materials involving cyclic stress under controlled environmental conditions 13 p2113 A66-25312

Space digital computer reliability laboratory testing by failure data collection from prototype equipment 13 p2027 A66-25507

Reliability of nonelectronic components in electronic system, noting failure modes, rates, mechanism, etc 13 p2085 A66-25655

Component failure examples of Gemini rendezvous radar, emphasizing need for closed loop reliability program 13 p2039 A66-25786

Causes of failure and guidelines for design of solid state lasers 14 p2309 A66-27669

Probability of survival of system consisting of one active and m redundant elements 15 p2454 A66-28546

Statistical failure detection, employing distribution analysis of parameter changes which removes artificial constraints imposed by arbitrary specification limits 15 p2507 A66-28799

Mean time to failure within given time boundaries and for continuous failure density evaluated via Weibull density function 15 p2526 A66-28806

Application of escape probability concept to systems development for quality control, noting minimization of system failure 15 p2508 A66-28812

Failure effect on phased array radar systems, noting treatment of outage threshold on probabilistic ground and interdependence of system parts 16 p2652 A66-30663

Step-stress technique to induce failures in integrated circuits to pinpoint source of reliability problems 17 p2882 A66-32114

Allotment of probability shares method applied to improving safety in design by diagnosing failure and probability of accident 20 p3494 A66-36999

Failure mode and effect analysis /FMEA/ application to each stage of system design and development oriented reliability program 20 p3568 A66-37915

Identifying critical elements /parts and components/ as criteria for system design tradeoff at system and circuit levels 20 p3568 A66-37916

System effectiveness through reliability prediction, reviewing fundamentals of prediction techniques including time-to-failure, variables data and physics of failure 20 p3572 A66-37952

Apollo spacecraft parts screening program, showing dependence on reliability for mission success 24 p4216 A66-42090

Failure mechanisms of CdS and CdSe thin film FETs noting volt-ampere characteristics, temperature, electrical stress and humidity effects 24 p4181 A66-42381

Reliability estimate methods for equipment using data independent of time to failure factor contrasted with one-or two-sided assigned specification limits 24 p4218 A66-42713

**FAIRING**

**SA LANDING GEAR**

Requirements, materials, fabrication and testing of exit nose fairing for A3 Polaris

missile, noting use of laminated wood as optimum material 06 p0885 A66-16300

**FALKNER-SKAN EQUATION**

Falkner-Skan similar solutions for effects of longitudinal surface curvature on incompressible laminar boundary layer flows 03 p0355 A66-12786

Approximate solution of second-order incompressible boundary layer equations, using mathematical model reformulated for application in vicinity of separation point 23 p4058 A66-41924

**FALLOUT**

**SA RADIOACTIVE FALLOUT**

Formula for average rate of atmospheric particle fallout in terms of height-averaged values of density and viscosity of atmosphere 01 p0097 A66-10760

Formula for average rate of atmospheric particle fallout in terms of height-averaged values of density and viscosity of atmosphere 14 p2327 A66-27859

**FAN**

**SA COMPRESSOR**

**SA DUCTED FAN**

**SA LIFT FAN**

**SA VENTILATOR**

Noise measurement in axial flow fans for military vehicle cooling installations 14 p2220 A66-27567

Fan selection for high-altitude cooling of electronic equipment 20 p3527 A66-37346

**FAN-IN-WING AIRCRAFT**

Fan-wing combinations for three-dimensional flow solutions investigated to determine V/STOL aerodynamic characteristics [AIAA PAPER 65-85] 05 p0606 A66-15076

Fan-wing combinations for three-dimensional flow solutions investigated to determine V/STOL aerodynamic characteristics [AIAA PAPER 65-85] 14 p2274 A66-27415

V/STOL aircraft for commercial short-haul transports, considering turboprops, fan-in-wing and propulsion wings 24 p4159 A66-42891

Aerodynamic coefficients of large-aspect-ratio fan-in-wing airfoil, noting that velocity field consists of inflow to fan, parallel flow and circulation flow 24 p4158 A66-43050

**FAP**

**S FORTRAN II ASSEMBLY PROGRAM**

/FAP/

**FAR FIELD**

Far field simulation of antennas with complex aperture distribution functions 12 p1840 A66-24624

Beam divergence and far field patterns in ruby lasers 16 p2719 A66-31098

Radiation fields of center-fed cylindrical antenna surrounded by plasma sheath, graphically presenting far-field patterns and surface wave fields 18 p3141 A66-33538

Composition in far field of rocket jet mixing with air 18 p3260 A66-33808

Confocal resonator theory instead of diffraction as explanation of 90 degree rotation between near and far fields of ruby lasers 20 p3581 A66-38243

Cialdea-Bagolini optometer investigation of far point in scotopic vision and nocturnal myopia 22 p3856 A66-40501

**FAR INFRARED**

IR spectroscopic instrument modifications and innovations, noting filter grating permitting measurement in far IR 02 p0230 A66-11794

High detectivity gallium doped germanium detector for far IR radiation 02 p0231 A66-12062

Far IR observation of plasma emitted radiation and observation of plasma effect on propagation of externally generated radiation 04 p0522 A66-14196

Modes of tilt-mirror optical resonator, using spillover radiation to extract coherent far IR 16 p2747 A66-31134

Lunar mapping in far IR, including hot spots during total eclipse of December 19, 1964 16 p2698 A66-31225

Multiple cyclotron resonance absorption lines in degenerate valence bands of Ge semiconductor studied with far IR laser spectrometer 24 p4257 A66-42545

**FAR ULTRAVIOLET**

Manned Orbiting Laboratory experiments

such as airglow, solar corona, cosmic ray plasma, far UV image orthicon, etc 04 p0585 A66-136

Optical absorption and reflectivity of single crystals of strontium fluoride and cadmium fluoride in far UV 17 p2974 A66-318

Solar XUV spectrum, discussing spectral lines, variations, structure of chromosphere and corona 18 p3229 A66-341

Optical constants in far UV, using reflectometer permitting measurement of various incidence angles 19 p3361 A66-366

X-ray absorption edge observation of transmittance measurements through thin unbacked metal films in XUV as function of wavelength 20 p3613 A66-372

Aerobee rocket instrumentation and rocket sounding techniques for investigating far UV auroral emission 20 p3552 A66-375

Absorption spectrum of sulfur hexafluoride in far UV due to electron impact at inelastic scattering and oscillator strength for three absorption bands 21 p3774 A66-385

XUV C, Ti, Mn, Fe, Ni, Cu, Zn and Ar L<sub>II</sub> spectra and continuum radiation spectra of plasmas produced by focused ruby laser beam 22 p3954 A66-395

Fabry-Perot interferometer in spectroscopy using satellites and rockets 22 p3920 A66-402

Electron transitions and sharp emission lines in XUV solar spectral regions with fractionally charged quarks bound to C, N and O nuclei 24 p4280 A66-431

**FARADAY DARK SPACE**

Formulas relating detector current to average UHF power obtained for position plasma column and dark Faraday region glow discharge 02 p0269 A66-111

Approximate equality of drift and random currents at boundary between Faraday dark space and head of striated positive column in discharges through neon 12 p1920 A66-234

**FARADAY-DOPPLER TECHNIQUE**

Combined Faraday polarization and Doppler frequency measurements of lunar radio echoes of Earth magnetospheric wake 08 p1296 A66-194

**FARADAY EFFECT**

Theory of interband magnetodispersion effects in crossed field semiconductor obtaining expressions for Faraday and Voigt effects 02 p0272 A66-111

Interband Faraday rotation at liquid nitrogen temperature in CdS-CdSe mixed crystals 02 p0274 A66-111

Transmission and attenuation of elastic and magnetoelastic waves in yttrium iron garnet 03 p0408 A66-121

Faraday type MHD accelerator with series connected electrodes investigated by employing external jumpers 03 p0399 A66-121

Measuring rapidly changing microwave phase and attenuation, using switch frequency bridge circuit 05 p0644 A66-141

Electric conductivity, electrode temperature and potential distribution across channel in potassium seeded argon atmospheric-pressure Faraday accelerator [AIAA PAPER 66-75] 05 p0723 A66-151

Faraday effect in anisotropic plasma treated as fluid with collisions, deriving relations for rotation of polarization plane and electromagnetic wave ellipticity 05 p0727 A66-151

Orientation of satellite-borne dipole emitter and influence on ground-based recording of Faraday effect 07 p1028 A66-171

Faraday effect on hot electrons in germanium and silicon 07 p1105 A66-181

Faraday rotation analysis of simple frequency radio transmission from satellite to determine local electron density 08 p1181 A66-181

Faraday polarization rotation of linearly polarized lunar-reflected radio waves used to measure ionospheric electron content during July 20, 1963 solar eclipse 08 p1284 A66-191

Interband Faraday effect in semiconductors in strong crossed electric and magnetic fields 08 p1277 A66-191

Simultaneous observations of Jupiter at three frequencies, noting phase consistency

- of flux variations, Faraday rotation and flux density 09 p1450 A66-20108
- Parameters of complex energy bands in semiconductors determined by free carrier Faraday rotation, Voigt effect and transport properties 09 p1426 A66-20191
- Depolarization of cosmic radio emission due to dispersion of Faraday rotation of plane of polarization of radio waves 09 p1441 A66-20334
- Diurnal changes in total ionospheric electron content measured, using Randle Cliff antenna 10 p1530 A66-21162
- Radar polarization scattering matrix invariance properties of elliptic and circular polarized antenna 10 p1500 A66-21619
- Central Italy ionospheric electron density, examining Faraday rotation of 54 mc signals from Transit IVA 11 p1695 A66-22377
- Coupling of ordinary and extraordinary electromagnetic waves in CdS induced by external magnetic field or stress 12 p1926 A66-23719
- Longitudinal magnetic field effect upon gas discharge, Zeeman effect and Faraday effect in He-Ne gas laser 12 p1890 A66-24224
- Magnetization induced by circularly polarized laser light incident on nonabsorbing material, in absence of external magnetic field, in doped calcium fluoride proportional to light intensity and Verdet constant 13 p2131 A66-26142
- Resonator cavity measurement of microwave Faraday effect in low resistivity semiconductors 14 p2349 A66-26799
- Faraday effect method for measuring magnetic fields of extremely short duration and device for observing slightly luminous phenomena 14 p2290 A66-26824
- Microwave Faraday effect in n-type germanium, discussing Faraday rotation, ellipticity, magnetoabsorption, complex conductivity tensor elements and measurement of microwave polarization anisotropy 14 p2349 A66-26826
- IR and visible helium-neon laser modulation using Faraday rotation in YIG 14 p2305 A66-26881
- Faraday effect in rare earth garnet ferrites and metallic ion g values in IR spectrum 14 p2364 A66-27703
- Total ionospheric electron content measurements at Delhi using Faraday fading of satellite beacon transmissions during solar minimum 15 p2495 A66-30067
- Beacon observations of differential Doppler and Faraday effects from analysis of signals emitted by Explorer XXII satellite 15 p2453 A66-30069
- Electron content for ionospheric station located 47 degrees N determined from observation of Faraday polarization rotation 15 p2496 A66-30073
- Interplanetary plasma stream analysis using bistatic radar transmissions, considering wave propagation in presence of uniform magnetic field, stream velocity, Faraday rotation, etc 16 p2801 A66-30716
- Multiple reflection effects in Faraday rotation in thin film semiconductors 16 p2778 A66-31073
- Origin and propagation of cosmic radiation, discussing interplanetary magnetic fields, plasmas, Faraday rotation of polarized radiation, Zeeman splitting of hydrogen line, etc 17 p2964 A66-32029
- Complex refractive index of Earth surface and ionospheric Faraday effect measurements 17 p2873 A66-32200
- Longitudinal Faraday emf, thermoelectric and Hall effects on channel flow of ionized gas 17 p2972 A66-32868
- Ionospheric electron content determined from satellite measurements, noting seasonal and diurnal variation of content and utilization of Faraday fading for measurements 17 p2920 A66-33069
- Interband Faraday effect in semiconductors in strong crossed electric and magnetic fields 17 p2983 A66-33133
- Ionospheric electron content determined by closely spaced frequency and rotation rate methods, using satellite transmission 18 p3104 A66-33547
- Faraday rotation from 24-hr satellite at high frequencies provides means of studying electron content of ionosphere and fluctuations 18 p3106 A66-34200
- Galactic magnetic field strength and distribution determined from synchrotron emission of relativistic electrons, noting Faraday rotation of polarized radiation from distant radio sources 18 p3235 A66-34744
- Ionospheric Faraday effect and determination of total electron content in ionosphere 18 p3109 A66-35042
- Faraday rotation variation with galactic coordinates studied for emission from 86 linearly polarized radio sources 18 p3238 A66-35236
- Faraday rotation obtained with pulsed high-field magnets for controlling laser cavities 19 p3372 A66-35380
- Operation of Q-switching device based on Faraday effect and used with ruby laser for application to plasma diagnostics 19 p3375 A66-36079
- Depolarization of Crab Nebula produced by Faraday rotation in filamentary shell that surrounds nebula 20 p3648 A66-37261
- Ionospheric electron content variation with solar radio flux from Faraday rotation data at magnetic equator 20 p3633 A66-38198
- Faraday and Voigt and dispersive magneto-optic effects in semiconductors in crossed field due to energy band transitions 21 p3800 A66-38995
- Ionospheric electron content over Ahmedabad and Bombay from differential Faraday rotations of plane polarized radio waves from Beacon satellite 21 p3734 A66-39229
- Faraday rotation experiment for determination of electron density and collision frequency observations in arctic D region 22 p3905 A66-39946
- Latitudinal and diurnal variations of ionospheric electron content near auroral zone in winter from Faraday rotation data 22 p3911 A66-39985
- Faraday rotation measurements of decameter wavelength radiation from Jupiter, calculating ionospheric electron content 22 p3977 A66-39987
- Polarized EM wave propagation and microwave Faraday rotation in solid state plasma in circular waveguide under strong magnetic field 22 p3964 A66-40170
- Quasi-optical measurement of Faraday rotation in oversize waveguide at 2-and 1-mm wavelengths 22 p3876 A66-40172
- Observed Faraday polarization variation of satellite transmission radio signals due to ionospheric irregularities, latitudinal electron density variations and antenna geometry readout error 22 p3867 A66-40556
- Longitudinal magnetic field effect upon gas discharge, Zeeman effect and Faraday effect in He-Ne gas laser 22 p3933 A66-40586
- Faraday unipolar induction in solid cylinder of nonideal type II superconductor, noting contributions to observed emf 23 p4114 A66-41629
- Saturation induced optical nonreciprocity in He-Ne ring laser plasma, eliminating frequency locking by using Faraday effect 24 p4221 A66-42552
- Current measuring device for EHV transmission line, obtaining instantaneous magnetic field by gauging Faraday rotation angle of laser beam in flint glass rod 24 p4222 A66-42556
- Ionospheric electron content at temperature latitudes during declining phase of sunspot cycle determined by observation of Faraday effect 24 p4200 A66-42595
- Differential absorption and Faraday rotation in D region, using closed loop feedback system and two signals of different frequencies 24 p4205 A66-43218
- FAST ELECTRON**
- Injun I and III particle observations discussing methods and results on fast electrons, particle counters, energy separation, spectra, flux variation, angular distributions, etc 03 p0363 A66-12647
- Semiconducting properties of electron irradiated silicon carbide 06 p0936 A66-17138
- Kinetic equation for fast electrons in plasma in stationary electric field, taking into account electron interaction 09 p1407 A66-19963
- Plasma oscillations in metallic single crystal films induced by fast electrons 13 p2139 A66-25330
- Photoconductivity spectra and kinetics of p-and n-type germanium crystals bombarded by fast electrons at 5.2 and 100 degrees K 16 p2788 A66-31776
- Laser based on excitation of gallium phosphorus arsenide solid solution by beam of fast electrons 17 p2937 A66-33304
- Spectra and intensity vs excitation level and spatial distribution vs current density determined for optical radiation by electron excited cadmium sulfide 17 p2937 A66-33308
- Primary and afterglow emission decay time from low temperature gaseous nitrogen excited by fast electrons explained by possible energy transfer 19 p3404 A66-36799
- Instabilities resulting in loss of energetic electrons and fast electrons analyzed in electron cyclotron plasma confined by magnetic mirrors 23 p4103 A66-41490
- FAST NEUTRON**

Modes of contact fatigue failure classified after appearance and factors promoting initiation and propagation, noting fatigue life of roller bearings subjected to cyclic contact stress [ASME PAPER 65-WA/CF-2] 05 p0690 A66-15621  
Lubricant effect on fatigue life of stationary ball on flat contact subjected to oscillatory normal load [ASME PAPER 65-WA/CF-3] 05 p0690 A66-15622  
Correlation equation estimating pitting fatigue life of bearings from minimal rolling contact rig data [ASME PAPER 65-WA/CF-5] 05 p0690 A66-15624  
Compressive residual stress effects on surface layers of through-hardened bearing steels produced by prenitriding before hardening [ASME PAPER 65-WA/CF-7] 05 p0690 A66-15625  
Mean strain cumulative damage and effect in low cycle fatigue of 2024-T351 aluminum alloy, covering strain cycling, fatigue life, residual ductility, etc [ASME PAPER 65-WA/MET-5] 05 p0703 A66-15690  
Principles and statistics behind life-test plans of MIL-STD-690 Life Test Sampling Procedures for Established Levels of Reliability and Confidence in Electronic Parts Specifications 06 p0886 A66-16332  
Dimensioning and strength calculations - Conference, Budapest, October 1965 06 p0963 A66-16472  
Rubber-compound fatigue resistance, examining effects of preliminary prolonged heating and cooling 06 p0901 A66-16482  
Service life of antifriction bearings represented by Weibull distribution law,

with computer method for parameters at density function 06 p0886 A66-16472  
Stress cycle shape effect on fatigue strength of metals, noting graphical method for predicting fatigue life 06 p0965 A66-16472  
Resonance-type fatigue testing machine for variable stress ranges and frequencies from 100 to 400 cps 07 p1147 A66-18332  
Effect of residual stresses /tensional pressure/ on fatigue limit of welded parts and structures 08 p1310 A66-19147  
Effect of plastic coatings on fatigue strength of steel and welded steel samples subjected to concentrated stress 08 p1231 A66-19147  
S/N fatigue life gauge for direct measurement of cumulative fatigue damage to predict structural failure 08 p1316 A66-19816  
Life testing of electron-bombarded cesium ion engine designed for power-thrust ratio of 160 kw/lb [AIAA PAPER 66-233] 10 p1594 A66-21706  
Fatigue life of aircraft gas turbine compressor disks subjected to cyclic loading 11 p1710 A66-22615  
Vacuum effect on fatigue life of aluminum under constant stress cyclic bending deformation 11 p1717 A66-22998  
Truncation method for determining characteristics of electronic components such as transistors and vacuum tubes before testing to destruction 12 p1833 A66-24088  
Tabulated reliability data on communications systems components for possible application to other fields 12 p1833 A66-24088  
Statistical interpretation of fatigue fracture phenomena in metals, relating development of successive damage to external loading processes 12 p1968 A66-24398  
Prediction of fatigue failure of structures subjected to sinusoidal stress cycles of different amplitude and mean value [ASME PAPER 65-MET-3] 12 p1970 A66-24598  
Cumulative damage and fatigue applicability to solid propellant-liner bond failure, noting useful life and stress-time relationship [AIAA PAPER 65-191] 12 p1937 A66-24706  
Properly controlled high-stress life testing used to evaluate failure rate of high reliability solid state components integrated circuits 12 p1846 A66-24938  
Thermoplastics behavior under cyclic stress, noting failure under cyclic propagation or temperature due to damping capacity 13 p2112 A66-25338  
Production techniques for fissures in welds deposited and wrought Ni-Cr-Fe alloy fatigue specimens and fissure effect on fatigue strength 13 p2110 A66-26010  
Hydrogen embrittlement or fatigue strength loss avoidance in overhauling and repairing of high strength aircraft steel component 13 p2087 A66-26228  
SNAP-8 turboelectric nuclear space power system including component tests, corrosion program and status of systems [AIAA PAPER 64-758] 13 p2126 A66-26666  
Low cycle fatigue crack propagation characteristics of high strength steels noting technique for life estimation of structure by numerical integration [ASME PAPER 66-MET-3] 14 p2312 A66-26998  
Plastic strain effect on fatigue strength of aircraft skin sheets with hole subjected to constant loading, noting stress concentration at hole 16 p2815 A66-30606  
Transverse cut-out effect on fatigue strength of rotating shaft under constant bending load, noting fatigue stress concentration factor 16 p2815 A66-30606  
Structural resonant amplitude reduction for increased fatigue life and component malfunction reduction, noting application of internal damping, and use of viscoelastic materials 16 p2715 A66-31206  
Fatigue damage accumulation in materials at high temperatures under variable load noting calculation of fatigue life 18 p3254 A66-34226  
Streak test excellent acceptance technique for assurance of reproducibility of service life for ablative thrust chamber of M150A variable thrust rocket engine [AIAA PAPER 65-608] 19 p3449 A66-35606

Optimum number of test aircraft in test program to predetermine endurance and service life of same aircraft in serial production 20 p3493 A66-36921

Cobalt addition to titanium alloy, discussing effect on tensile strength, thermal stability fatigue strength, ductility and notch sensitivity 20 p3582 A66-37049

Crack propagation, damage and fatigue fracture in plane rods with transverse cut under single step and multistep axial load 20 p3666 A66-37307

Lifting aircraft structures subjected to acoustic pressures, noting estimation of panel joint rms stress 20 p3666 A66-37422

Fatiguing at room temperature resulting in observable diffusion of silver into copper, using precipitation reaction to analyze influence of large number of vacancies 20 p3584 A66-37618

Water and mercury cavitation damage on solids in cavitating venturi tunnels consisting of single event symmetrical craters and irregular fatigue-type failures 20 p3586 A66-37813

System effectiveness through reliability prediction, reviewing fundamentals of prediction techniques including time-to-failure, variables data and physics of failure 20 p3572 A66-37952

Crack initiation and propagation formula through fatigue process applied to interface problems, noting creep 20 p3671 A66-38105

Maraging steel properties, discussing composition, strengthening mechanism, tensile and impact toughness, mechanical and fatigue properties, etc 20 p3587 A66-38431

Fatigue endurance limits for sintered alloys in various density ranges [ASME PAPER 66-MD-77] 21 p3822 A66-38502

Rolling-element bearing material technology, examining fatigue effect of material properties and processing variables 21 p3750 A66-38624

Reliability handbook covering system effectiveness, fatigue life patterns, reliability testing, malfunction and failure analysis, etc 21 p3744 A66-39215

Fatigue fracture and crack propagation in ordered alloys due to plastic flow 22 p3989 A66-39891

Measuring wear life and friction coefficient of dry film and solid film lubricants and plastic materials in ultrahigh vacuum 22 p3923 A66-40216

Corrosion fatigue strength of duralumin in presence of stress concentrators, noting parameters of resistance and alloy properties 22 p3935 A66-40679

High cycle fatigue strength of titanium, Cb and Al alloys correlated with constants of logarithmic true stress-strain curve 24 p4229 A66-43080

Environmental testing and evaluation of useful life of insulation material for aircraft electrical equipment operating at 280 degrees C 24 p4229 A66-43083

### FATIGUE TEST

Fatigue tests of optimized structural configurations consisting of sandwich panels containing core layers 01 p0150 A66-10152

Acoustic fatigue testing of 20 fuselage panels of XC-142A VTOL/STOL transport aircraft, using simulated propeller noise 01 p0151 A66-10158

Size effect of bending and twisting fatigue strength by calculating probability of flaws on surface 02 p0243 A66-11581

Component hardness differences of SAE 52100 steel effect on bearing fatigue, using five-ball fatigue tester and rolling element bearings 03 p0372 A66-12349

Fatigue strength of heat-treatable alloyed steels 03 p0384 A66-13168

Mechanical testing methods, discussing quasi-static and fatigue fracture due to tensile compressive load and cyclic deformation characteristics of materials 04 p0537 A66-14399

Fatigue test of 1000 aluminum specimens in order to assess accuracy with which lower tail of probability distribution of failure curve fits experimental results 05 p0774 A66-15056

Nonhazardous and nondestructive method for testing pressure regulating valves, using

simulated gas flow and pressure [ASME PAPER 65-WA/AUT-7] 05 p0661 A66-15707

Roller-bearing design noting reliability requirements via Palmgren-Lundberg formula 06 p0886 A66-16481

Two-parametric classification of load cycles on construction elements connected with fatigue limit tests and service life 06 p0964 A66-16483

Four conditions permitting fatigue limit obtained by Wohler curve to render consistent distribution function to mean value and deviation 06 p0965 A66-16485

Effect of structure and volume cold-working related to structural factors on notched samples of steels subjected to cyclic stresses 07 p1048 A66-17441

Fatigue stress analysis, using graphical technique for complex problem of bending and torsional out-of-phase variable frequency vibrations 07 p1147 A66-18342

Loading frequency effects on fatigue strength of 45 and E1612 steel specimens at room temperature 07 p1147 A66-18385

Similarity criteria, showing that scale effect in fatigue fracture is caused by distortion of similarity 07 p1147 A66-18386

Beach and ratchet marks plus component geometry information and stresses to pinpoint fatigue failure in service 08 p1306 A66-18634

Nickel alloy testing for thermal fatigue and bow evaluation, using miniature airfoil specimens, in aircraft gas turbine application [SAE PAPER 660056] 09 p1388 A66-20154

Oxygen and water vapor effects on propagation of fatigue cracks in aluminum alloy sheets 10 p1614 A66-21338

Reliability of fatigue test results, noting calibration method and frequency, specimen preparation, alignment and environmental factors 12 p1958 A66-23656

Rest period effect on fatigue testing of polyester fiberglass and polymethylmethacrylate plastics under static and intermittent tensile loads 12 p1899 A66-24039

Evaluation of model of strain hardening in fatigue with crack propagation occurring by plastic flow away from crack tip during tensile part of cycle 12 p1898 A66-24971

Results of crack propagation tests on polymethylmethacrylate flexed at various frequencies under cyclic loading 13 p2112 A66-25308

Naval Ordnance Laboratory /NOL/ multiaxial fatigue test for failure mechanisms in fiber-reinforced composite materials involving cyclic stress under controlled environmental conditions 13 p2113 A66-25312

Cyclic residual plastic deformation method for determining metal fatigue which is independent of stress 13 p2195 A66-25442

YS-11 transport aircraft fatigue testing, noting wing fatigue damage and equipment used 13 p2197 A66-26099

Cyclic strain fatigue tests and fatigue failure curve for age-hardened nickel based alloy K-Monel [ASME PAPER 66-MET-9] 14 p2312 A66-26977

Strength of adhesive-bonded lap joints as affected by changes in temperature and fatigue 14 p2401 A66-27772

Full-scale and model test for dynamic effects of LEM landing 14 p2393 A66-28019

Precleaning treatment and coating effect on fatigue strengths of aluminum alloys 15 p2521 A66-29071

Fatigue crack initiation and propagation, using ultrasonic test instruments 15 p2610 A66-29316

Low endurance fatigue properties of steel plate 15 p2615 A66-29805

Fatigue tests at high stress levels under rotating bending of carbon steel and roll material, analyzing stress-strain behavior in plastic fatigue process 16 p2815 A66-30809

Standard prolonged work test using treadmill for evaluation of fatigue and stress in man 17 p2863 A66-32150

Fatigue concept application to rotorcraft noting fatigue requirements, accident prevention methods, etc 17 p2843 A66-32721

Hughes OH-6A helicopter fail-safe structural composition noting design, fatigue testing, application of redundant design features, etc 17 p2845 A66-32736

Stress corrosion, delayed failures, fatigue corrosion and relation between these phenomena - Commissariat on Atomic Energy, Metallurgical Colloquium, Cadarache, Rhone, France, June 1964 17 p2941 A66-33440

Air and aqueous environments effect on mode of fracture in titanium alloys during low cycle fatigue 18 p3122 A66-33749

Fatigue curve for one type of loading determined from stress variation during cyclic deformation and fatigue curve from other type of load application 18 p3254 A66-34231

Algorithm used in circuit design, evaluating equivalent strain at critical point of airframe structure, verifying it during fatigue tests 20 p3665 A66-36880

Aircraft structures strength and longevity obtained by applying standards and criteria to design and manufacture including static, fatigue and fail-safe tests 20 p3666 A66-37000

Maraging steels for landing gear forgings, noting fabrication, distortion and fatigue tests 21 p3751 A66-39237

SH-3A airframe fatigue test facility for automatic simulation of helicopter flight and landing loads 22 p3992 A66-40251

Brittle-fracture propagation tests, obtaining relations among crack propagation speed, dynamic-stress distribution, test temperature and applied stress 22 p3994 A66-40435

Grain boundary self-diffusion coefficient variation with applied stress and production of lattice vacancies applied to cavity growth in high temperature fatigue of Mg 23 p4081 A66-41714

K values for crack propagation rates obtained from fatigue experiments on metals, noting correlation with tensile properties of metals 23 p4082 A66-41865

Full-scale and model test for dynamic effects of LEM landing 24 p4283 A66-42771

### FATIGUE TESTING MACHINE

Constrained stress-strain test of Ni-Cr-Mo steel carried out on plane bending plastic fatigue testing machine 02 p0243 A66-11580

Fatigue testing machine for loads in rotating beam 03 p0440 A66-13167

Fatigue testing of structure, using machines producing loads by centrifugal forces 06 p0965 A66-16488

Microscopic fatigue crack production in compressor blades, describing methods and application to ultrasonic nondestructive testing 06 p0966 A66-16799

Fatigue testing machine with two shaft-rotation speeds for HF and LF testing 07 p1147 A66-18388

Device for taking long time corrosion fatigue curves on small cross section specimens at high temperatures and pressures 09 p1388 A66-20433

Heating unit of device for testing small samples of sintered materials for thermal fatigue 11 p1709 A66-23475

Trapezoidal stress waveforms effect on low cycle corrosion fatigue strength, clarifying mechanism of corrosion fatigue 12 p1959 A66-23849

Fatigue testing metal rods in rotating beam machines without machining as-produced specimen surface 14 p2318 A66-28481

Helicopter airframe fatigue testing noting fail-safe design, crack detection, loads applied, test facilities and techniques, etc 17 p3027 A66-32737

Variable stress measurement using wire type resistance strain gauges in measuring bridge circuit 18 p3112 A66-34232

Block program testing on fatigue testing machines, noting modifications introduced and operational results 18 p3259 A66-34893

High temperature fatigue in pure lead and aluminum observed continuously by microscopic cinecamera combined with fatigue machine 19 p3386 A66-36366

Fatigue testing machine shear strain measurements near cracks on Al flat plate surfaces by observing birefringence 23 p4147 A66-41997

### FATTY ACID

Nature of particles involved in lipid synthesis in yeast 06 p0822 A66-16566

Effects of alpha glycerophosphate and of palmitoyl-coenzyme A on lipid synthesis in yeast extracts 15 p2429 A66-28616  
Acceleration stress-induced changes in fat metabolism, level of circulating glucose and corticosterone level in rats 15 p2431 A66-28868  
Sympathetic nervous system integrity following water immersion evaluated by measuring plasma-free fatty acid responses to passive tilting 16 p2639 A66-30649  
Serum glucose and free fatty acids in man during prolonged exercise 17 p2859 A66-32366  
Amino-acid-sequence determination in peptides using N-fatty acids, mass spectra of peptide derivatives and computer techniques 20 p3510 A66-37057  
Fatty acid synthesis by *Saccharomyces cerevisiae* crude particles 23 p4029 A66-41377

**FAULT MECHANICS**  
**SA STACKING FAULT**  
Weapon subsystem safety estimation by fault-tree method alone or in combination with Karnaugh maps 01 p0168 A66-10069  
Fault location in modern airborne radar, discussing maintenance reduction techniques and reliability improvement 07 p1006 A66-17495  
Optimization of quality control procedures in searching for faults, using mathematical models 08 p1232 A66-19767  
Scanning electron microscope observation of electrical leakage paths due to crystal defects in silicon diodes 11 p1668 A66-23028  
Unattended weapons systems operation from rural power systems, emphasizing sensing to determine transfer from primary commercial to alternate source and fault patterns 20 p3542 A66-37242  
Alternate mode of operation for minimizing occurrence of delays caused by launch support equipment failures for Saturn manned missions 20 p3542 A66-37243  
Minuteman weapon system maintainability, discussing fault detection and isolation, ground system, standardization, tools and system requirements analysis 24 p4281 A66-42092

**FBFM**  
**S FEEDBACK FREQUENCY MODULATION /FBFM/**

**FCC**  
**S FACE CENTERED CUBIC /FCC/ CRYSTAL**

**FECES**  
Enteric microbial flora changes in man exposed 56 days to oxygen-helium atmosphere 18 p3058 A66-33777

**FEED SYSTEM**  
Multipurpose feed system for 60-ft paraboloid antennas 04 p0493 A66-13616  
Linking monopulse radar antennas in aircraft tracking system 04 p0497 A66-13965  
Coma-corrected, mono-and multifrequency diffraction reflector antennas, examining feed system, electronic scanner and aberrations 05 p0648 A66-14911  
Multiple-feed system for microwave focusing objective, discussing array factors 06 p0827 A66-16042  
Helix frequency-scanning delay line design and characteristics 06 p0849 A66-16396  
Circularly polarized monopulse feed system for use with parabolic reflectors generates response independent of return-signal polarization 06 p0851 A66-16448  
Ion thruster, including mercury feed system and shielded neutralizer, designed and tested for spacecraft station keeping and attitude control [AIAA PAPER 66-247] 10 p1593 A66-21456  
Device for automatically feeding experimental curve coordinates in large quantities into digital computer for high noise level photographic image 11 p1659 A66-22432  
Feed polarization incident upon conic reflector in antenna system specified in terms of crossed electric and magnetic dipoles 11 p1663 A66-22544  
Zero-g vapor feed system with no moving parts, noting ion engine testing, propellant use efficiency and surface tension storage [AIAA PAPER 66-249] 11 p1761 A66-23083  
Design of gravity-independent force-fed liquid-metal cathode providing unlimited cathode life in gas discharge devices and

mercury electron-bombardment thrusters [AIAA PAPER 66-245] 13 p2106 A66-25175  
Zero-gravity mercury feed system for mercury-electron bombardment spacecraft engines [AIAA PAPER 66-250] 13 p2172 A66-25176  
Circularly polarized tracking feed in Haystack antenna 13 p2035 A66-25504  
Multimode antenna feed in radar design requiring only two hybrids for azimuth and elevation measurements 14 p2255 A66-27806  
Dielectric guide structures /Dieguides/ used for increased gain/noise ratio in low noise antennas 15 p2456 A66-28588  
Monopulse channel phase measurement by composite radiation pattern of feed 15 p2456 A66-28589  
Dual polarized high-power synthetic conical scan tracking system at various frequency ranges for parabolic reflector used in communication link 16 p2650 A66-30552  
Design and testing of cross polarized feed for 10 ft diameter parabolic dish, noting coincidence of focal and aperture plane 16 p2666 A66-31565  
Rear feeds for paraboloidal reflectors 18 p3075 A66-33618  
Improved feed synthesis using multimodes for large circular paraboloids at Parkes 18 p3084 A66-34310  
Reflector surface and feed-support structure for center-fed paraboloidal aerial system for satellite communication 18 p3085 A66-34315  
High-power feed for satellite tracking radar using four-way static split system with Cassegrain antenna and four symmetrical horns, noting phase shift errors 18 p3086 A66-34324  
Surface tension propellant storage and feed systems for zero-g ion engines 19 p3450 A66-35615  
Multipurpose feed system for large paraboloid antennas operable in S band 19 p3316 A66-35685  
Ultralow-noise planetary radar receiving system with high-performance feed and maser preamplifiers, noting aperture utilization 19 p3301 A66-35690  
Japanese ground antennas for use with communications satellites Teistar, Relay and Syncom 20 p3530 A66-37718  
Effect of random fluctuations of voltage and frequency of gyrorotor feed current on change in rotor angular velocity, noting gyro drift 21 p3738 A66-38970  
Generalized method of calculating multielement antenna and feeder system 21 p3712 A66-39250

**FEEDBACK**  
**SA DEGENERATION**  
**SA NONLINEAR FEEDBACK**  
**SA REGENERATION**  
**SA SENSORY FEEDBACK**  
Sweep indicator as radar feedback filter, noting double delay 04 p0501 A66-14126  
Operation of FM microwave generator with external feedback connected to mismatched long line 06 p0852 A66-16512  
Phase correcting circuit construction using delay line cut into adder feedback circuit 09 p1360 A66-20295  
Natural frequency and self-excitation of transistor-operated autogenerator with open-loop feedback 09 p1354 A66-20453  
Digital counter synthesis for fixed base and periodic sequence-variable base counters with various feedback loops 09 p1361 A66-20606  
Comparison of sequential and nonsequential detection systems with uncertainty feedback, showing performance as function of peak-to-average power ratio 10 p1518 A66-21838  
Adaptation theory concepts, examining threshold learning process, Markov chain, learning wave, feedback adaptivity, etc 11 p1647 A66-22299  
Feedback to quadrupole that incorporates device for converting voltage into time parameter of periodic sequence of pulses and vice versa 11 p1671 A66-23334  
Frequency characteristics of bending vibrations of bounded rods with electromechanical feedback, possibility of artificially attenuating resonance vibrations

and conditions for self-excitation 13 p2194 A66-25088  
Operation of FM microwave generator with external feedback connected to mismatched long line 13 p2041 A66-25952  
Monotone feedback shift register /MFSR/, enumerating closed cycles and stable MFSRs 13 p2050 A66-26063  
State-variable feedback decoupling of multivariable linear plants with cross coupling between various input-output pairs 13 p2053 A66-26083  
Frequency oscillations in oscillator with double-loop delayed feedback 14 p2259 A66-28165  
Feedback effect on current voltage characteristic of device with negative feedback and reactivity of device in negative resistance 15 p2464 A66-29121  
Laser action with nonresonant feedback using high gain ruby crystals 16 p2717 A66-30297  
Design criteria for active filters using resistance and capacitance elements in feedback circuits 17 p2896 A66-33297  
Minimum feedback loop realizations of synchronous sequential switching circuits 18 p3090 A66-34072  
Information feedback and psychophysical variables in two-alternative temporal forced-choice auditory-signal-detection task 18 p3063 A66-35023  
Lightweight power-conditioning system for ion engines using energy-storage transformers for conversion, nondissipative regulation and protection 20 p3628 A66-37172  
LF combustion oscillation analyzed by theory of dynamical stability of closed feedback loop 20 p3681 A66-38103  
Frequency characteristics of bending vibrations of bounded rods with electromechanical feedback, possibility of artificially attenuating resonance vibrations and conditions for self-excitation 21 p3822 A66-38513  
Feedback to quadrupole that incorporates device for converting voltage into time parameter of periodic sequence of pulses and vice versa 22 p3877 A66-40414  
Signal and receiver-parameter optimization for additive noise channels with feedback link 22 p3868 A66-40719

**FEEDBACK AMPLIFIER**  
Magnetic semiconductor amplifier behavior with internal feedback and negative control currents 01 p0045 A66-11023  
Operation mode instability of transistorized amplifier with constant current feedback treated as autonomous quadrupole 02 p0198 A66-11750  
Comparison of feedback arrangements using pneumatic amplifiers for static accuracy and dynamic performance improvements of control systems 03 p0323 A66-12374  
Fast analog comparator for hybrid computation using wideband DC amplifier with regenerative feedback circuit providing digital output 03 p0337 A66-12573  
Loop gain and return difference defined in the theoretical study of transistor feedback amplifiers 03 p0349 A66-13012  
Operational amplifier design using normal feedback equations with grounded output voltage for input, discussing frequency response and determination of open-loop gain magnitude 03 p0351 A66-13276  
Automatic gain control circuits, discussing performance and comparing theoretical and experimental results 04 p0501 A66-14409  
Cascode configuration using two interconnected field effect transistors to reduce reverse feedback capacitance for better suitability for VHF communications circuits 05 p0645 A66-14585  
Amplitude response curves for HF circuits in transistorized feedback amplifier determined, using polar-diagram method 05 p0647 A66-14680  
Active RC filters employing operational amplifier to obtain biquadratic rational functions 05 p0658 A66-15125  
Synthesis of RC active filters with prescribed pole sensitivity, noting shunt feedback solution of complex conjugate phantom zeros 05 p0658 A66-15126

Aerial radiation patterns, discussing determination through near field pattern processing 06 p0858 A66-16994

Closed loop gain of multiple feedback circuit determined, using return-difference matrix analysis 07 p1015 A66-17754

High gain HF transistor amplifier design, considering deviations of device parameters and variations with temperature and bias 08 p1197 A66-19561

Schuessler-elliptic low pass filters, discussing solution of approximation problem for low pass filters with good transient response 08 p1198 A66-19748

Feedback used in increasing passband and gain of tuned amplifier, achieving compensation for input reactance when deviating from resonant frequency 09 p1353 A66-20439

Sensitivity of transistor multiple loop feedback amplifier to parameter variations evaluated via replacement with equivalent circuit systems 09 p1355 A66-20603

Feedback amplifier noise characteristics based on noisy quadrupole theory 11 p1664 A66-22650

Onset of unstable modes in paramagnetic quantum amplifier in which feedback is due to energy of active particles in resonator or by external pumping 11 p1712 A66-22729

Seven-stage RL feedback amplifier with 500-mc low-pass bandwidth and 52 db gain, employing frequency compensation technique 11 p1671 A66-23244

Matrix algebra applications to circuit analysis, deriving transistor matrix for use in feedback amplifier 12 p1847 A66-23758

Linearity of phase vs input signal characteristics of phase modulators improved through feedback 13 p2036 A66-25524

Redundant system reliability in aircraft design, noting amplifier and filter arrangements, diode and quadruplex circuits, etc. 14 p2247 A66-27015

Spectral features of stable generation of oscillation in delayed-feedback microwave oscillator consisting of TW amplifier and waveguide delay line 14 p2267 A66-27738

Input and output impedances and gain of hybrid-coil feedback amplifier 14 p2268 A66-28038

Solid state communications devices, discussing HF small signal amplifiers, transistor circuits, varactor diodes for frequency multiplier chains, etc. 14 p2261 A66-28368

Closed loop active networks with distributed RC elements, noting circuit composition, parameters and application 15 p2471 A66-29327

RC active filter synthesis using common-base and common-collector configurations 15 p2475 A66-29862

Step response of saturating feedback amplifier with single time constant, noting design graph for amplifier 16 p2660 A66-30580

Feasibility of solid state negative feedback amplifiers based on use of RC networks meeting requirements of frequency stability, high tolerance and long shelf life 17 p2880 A66-31955

Oscillation conditions for feedback lasers, superradiant directionally coherent emission lasers and coherence brightened emission lasers 17 p2934 A66-32628

Noise figure and optimum source impedance single and double stage transistor amplifiers with negative feedback 17 p2897 A66-33452

Optimum complementary feedback amplifier design having high input and low output impedances, low noise and stable gain over wide frequency range 18 p3074 A66-33556

Relative circuit gain of common-emitter antisaturation feedback circuit configurations as function of circuit parameters 18 p3090 A66-34088

Flueric feedback integration and computation with design by root locus method 19 p3282 A66-36675

Multiloop flight control system root sensitivity to open loop parameter variation, describing method of analysis 19 p3335 A66-36690

Book on feedback circuit analysis covering circuit stability, closed loop transient response, frequency response, compensating networks, etc. 20 p3537 A66-37047

Multiloop flight control system root sensitivity to open-loop parameter variation, describing method of analysis 22 p3884 A66-40360

Onset of unstable modes in paramagnetic quantum amplifier in which feedback is due to energy of active particles in resonator or by external pumping 23 p4078 A66-41467

Three amplifier and oscillator configurations analyzed for controlling location of dominant poles of feedback circuit within possible realizable region 23 p4050 A66-41612

## FEEDBACK CONTROL SYSTEM

### SA SCHULER TUNING

### SA SERVOMECHANISM

Evolution of Honeywell first generation adaptive autopilot inner loop and application to F-94, F-101, X-15 and X-20 vehicles 01 p0099 A66-10008

Optimum guidance in two dimensions of constant acceleration low-thrust vehicle spiraling away from and in toward planet 01 p0100 A66-10026

Stability of control systems with tachometric feedback 01 p0067 A66-10455

Effect of delayed feedback in respiratory disease analyzed for behavioral cybernetic theory, using computer-controlled delay 02 p0186 A66-11648

Generalizing Tsytkin stability criterion for class of time-varying nonlinear sampled data feedback systems 03 p0348 A66-12668

Optimal control approach and uncertainties to feedback control problems 03 p0349 A66-12995

Graphical method for determining closed-loop frequency response of nonlinear feedback control systems 03 p0349 A66-13021

Optimal control process with stochastic feedback for automatic control system 04 p0502 A66-13699

Systems malfunction emphasizing parameter choice for automatic detection 04 p0503 A66-13705

Sampled-data control system introduction, discussing representation of real continuous time functions by impulse trains via transform methods 04 p0506 A66-14184

Feedback control system in design of delta-modulation data transmission system 05 p0654 A66-14610

Optimization theory and converse of circle criterion for simple time-varying feedback system 05 p0655 A66-14620

Relative stability of linear feedback systems noting Hurwitz, Nyquist and Mikhailov stability criteria 05 p0707 A66-14623

Graphical display of transfer function of loaded and null-adjusted symmetrical parallel-tee network 05 p0656 A66-14628

Design of optimal servocontrol system with feedback, using variational calculus method 05 p0657 A66-15099

Boundedness of solutions of nonlinear functional equations for stability of feedback and electrical systems 05 p0658 A66-15182

Transient behavior of feedback stabilized phase-angle-pickup system 06 p0861 A66-16358

Nonsymmetric self-oscillations in relay system, discussing sliding mode of operation of controller with feedback 06 p0863 A66-16529

Optimal control system terminal condition sensitivity, examining parameter variation effects on open loop, feedback and optimal open loop adjacent to closed loop control 06 p0864 A66-16738

Liapunov function construction, using stochastic analog of deterministic method of partial integration 06 p0865 A66-16745

Feedback shift register connection using chain, discussing pseudorandom noise generator 06 p0867 A66-16987

Popov-related stability results for feedback systems proved via bounded solutions for functional equations 07 p1015 A66-17756

Fluidic closed-loop digital position-speed servocontrol system without moving parts, using pulsed air 07 p0991 A66-17878

Feedback method for reducing errors of

counter telescopes due to missed counts and accidental coincidences 09 p1379 A66-20235

Low operating speed of pure fluid digital operating elements is chief limiting factor to application of pure fluid amplifier to feedback control system 09 p1361 A66-20325

Automatic control systems commutable rigid feedback to create astaticism in variable structured systems 09 p1364 A66-20912

Feedback control design analysis using circuit determinants for active and passive elements 10 p1516 A66-21233

Matrix form of Routh algorithm and invariance principle used in digital computer construction of root locus of system 11 p1679 A66-23268

Stability inequality for class of nonlinear feedback systems partially answered by taking into account slope of nonlinear function 12 p1849 A66-24252

Nonlinear control systems consisting of single-loop negative feedback circuit with one isolated instantaneous type nonlinear element 12 p1850 A66-24258

Stable self-adjusting system with single adjustable parameter designed, using inverse model of desired transfer function of closed-loop system in feedback control circuit with large amplification factor 12 p1851 A66-24315

Algebraic conditions of controllability and observability and relation between two Riccati-type matrix equations, deriving one from optimal regulation and second from optimal linear filtering 12 p1854 A66-24339

Dynamic system stability, developments, application and literature 12 p1854 A66-24636

Generalization of parameter plane method for case when characteristic equation coefficients are nonlinear functions of system of adjustable parameters 12 p1855 A66-24642

Pseudorandom binary sequential digital simulation of feedback control systems subjected to random input signals 13 p2030 A66-25211

Antenna drive with feedback control system for radio telescope, noting design, construction and operation 13 p2038 A66-25640

Equalization systems for stochastic processes, discussing automatic adaptive servocontrol, feedback control and vibration simulation equipment 13 p2048 A66-25848

Control system design, analyzing sensitivity of system performance to parameter variations by obtaining time domain measure of sensitivity 13 p2050 A66-26062

Synthesis problem solution for performance criteria defined by time domain sensitivity function, noting controller structure, parametric minimization and operative adjustment of parameters 13 p2051 A66-26071

Sufficient conditions of stability of single-loop nonlinear feedback systems 13 p2052 A66-26074

Functional integration analysis of exponential behavior of nonlinear feedback control systems 13 p2052 A66-26076

Multiparameter sensitivity matrix analysis of linear feedback multiloop systems 13 p2053 A66-26082

Nonlinear time varying open-loop feedback system design and infinitely integrable function space boundedness condition 13 p2053 A66-26085

Nonlinear signal comparators in feedback structures used for input-output invariance of single piecewise constant parameter 13 p2054 A66-26090

Sensitivity comparison of closed-loop and open-loop systems 13 p2054 A66-26092

Optimum guidance in two dimensions of constant acceleration low-thrust vehicle spiraling away from and in toward planet 14 p2328 A66-27419

Dual input describing function /DIDF/ of two-state relay with hysteresis 14 p2265 A66-27481

Adaptive servocontrol equalization system using true integrator instead of RC averager in feedback loop and memory circuit 14 p2267 A66-27664

Automatic control of wideband vibration testing of nonrigid structure with wide range of acceleration levels requiring

computation of feedback signal 14 p2267 A66-27665

Solid propellant rocket engine omnialaxis liquid injection thrust vector control system, using function generator in signal-summing feedback loop to control flow in servovalves and increase motor reliability 14 p2226 A66-27700

Diode bridge variable attenuator used to overcome error signals and harmonic distortion in wide range AGC 14 p2267 A66-27805

Dynamic programming design of invariant multiloop feedback autostabilizers and matrix-Ricatti equation 14 p2268 A66-28184

Optimal control process with stochastic feedback for automatic control system 15 p2469 A66-28540

Systems malfunction emphasizing parameter choice for automatic detection 15 p2469 A66-28547

Conceptual model for industrial quality control problem, noting adequacy in satisfying management goals and customer requirements 15 p2506 A66-28793

Stochastic extensions of techniques for using Liapunov second method in design and analysis of feedback controls, using differential equations 15 p2473 A66-29376

Comparison of nonoptimum and optimum strategies in dual control of inertialess plants in presence of noise in feedback loop 16 p2669 A66-30757

Energy feedback adaptive control system for elimination of effects of load inertia variations in servomechanisms 16 p2670 A66-30812

Model reference adaptive techniques applied to feedback attitude control system to minimize instrumentation 16 p2809 A66-30830

Nonlinear feedback composed of combination of nonlinear functions of state variables separately to stabilize amplitude response and provide time optimal control 16 p2670 A66-30831

Analytical design method for synthesis of feedback controller for multivariable linear control systems, considering transfer function 16 p2671 A66-31111

Parameterized feedback control of nonlinear dynamic system 16 p2672 A66-31337

Gas tungsten arc welding process automation based on feedback control concept 16 p2715 A66-31435

Modern control theory applied to system design for reduction of sensitivity of system to plant-parameter variation by use of feedback 17 p2901 A66-32290

Maximum principle application to optimal control procedure, minimizing transient response and decreasing effect of random changes in system parameters 17 p2902 A66-32577

Feedback control system digital computer design and analysis, including frequency-domain analysis, time-domain analysis, state-space simulation program, etc 17 p2877 A66-32778

Exact evaluation of responses of feedback control system with time delay to deterministic input 18 p3090 A66-34081

Dynamic characteristics of unsteady feedback control system during normal operation, ascertaining signal correlation and cross correlation functions 18 p3091 A66-34987

Feedback methods for conversion of electrical signals into frequencies, using oscillator with signal-current-controlled inductance 19 p3325 A66-35988

Sensitivity theory of nonlinear sampled data control system, establishing conditions for stability of equilibrium positions 19 p3327 A66-36012

Sensitivity analysis of time varying systems, comparing vector output errors of feedback and open loop system with same nominal transfer characteristics 19 p3327 A66-36013

Laser output energy controller having eight-to-one improvement in pulse repeatability in solid state lasers 19 p3374 A66-36034

Evolution of Honeywell first generations adaptive autopilot inner loop and application to F-94, F-101, X-15 and X-20 vehicles 19 p3397 A66-36483

Estimation method of learning time of time-varying threshold learning processes /TLP/ 19 p3333 A66-36664

Stability and sensitivity of terminal linear feedback control systems 19 p3334 A66-36668

Linear optimal control techniques for design of control system for short-range stationkeeping of large assault helicopter 19 p3280 A66-36688

Linear optimal control in systems with uncertain parameters, noting application to design of compensating network for flexible booster for uncertain value of first bending mode 19 p3471 A66-36696

Describing function for analysis of feedback control systems with time-invariant nonlinear elements, simplifying derivation by taking derivative of output of nonlinear element with respect to input 19 p3336 A66-36705

Optimum design of piecewise-linear switching functions for linear, constant, lumped systems with single ideal relay controller 19 p3336 A66-36708

Optimization criterion capable of simultaneously considering different performance aspects applied to linear second-order control system with acceleration, velocity and displacement feedback loops 19 p3337 A66-36714

Explicit method for calculating closed-loop gains defining stability boundary and subsequent phase margin boundaries of two-loop linear feedback system 19 p3337 A66-36716

Input-output stability conditions of time-varying nonlinear feedback systems obtained, using concepts of loop gain, concity and positivity 19 p3338 A66-36739

Parameter-plane method analysis of nonlinear equations of asymmetric oscillations in adaptive feedback control systems 19 p3338 A66-36740

Horowitz root-locus compensation method extended to analysis and design of high-gain linear control systems with variable coefficients 19 p3338 A66-36741

Generalized Lur coordinates used in canonical forms for controllable systems, with applications to optimal nonlinear feedback 20 p3535 A66-36848

Suboptimal adjoint-vector control theory for linearization of feedback control systems independent of nominal trajectory 20 p3535 A66-36849

Optimum control laws for bilinear system, using distributed parameter model with optimizing procedures including bang-bang control and optimum feedback control 20 p3598 A66-36856

Synthesis parametry of ensemble-averaged second-order polynomial approximation to performance index of optimal guidance linear feedback control system 20 p3589 A66-36858

Synthesis of constant or time-varying linear feedback control laws for application in multiple input systems with frequency symmetry 20 p3645 A66-36864

Automatic tracking radar control via nonstationary filter, noting design principle and operation 20 p3536 A66-36866

General adaptive approach based upon minimizing moments of power density spectrum of system error in feedback control system 20 p3536 A66-36877

Block diagram of closed loop automatic control system and conditional feedback control system, both with passive adaptation 20 p3536 A66-36883

Continuous time multivariate optimal filter for feedback realization applied to augmentation and rapid alignment of inertial systems 20 p3596 A66-37231

Monograph on approximate analysis of randomly excited nonlinear controls, discussing feedback system performance, functional and quasi-functional representation, zero mean systems, etc 20 p3538 A66-37577

Noise effect on synthesis of discrete systems with and without feedback channel for transmitting continuous messages, using binary signal and criterion of minimum rms error 20 p3538 A66-37745

Design of integrating and position servomechanisms having tachometer-generator feedback, noting role of inertia

moments effect 20 p3540 A66-38444

Sufficient conditions for equilibrium stability of mixed distributed and lumped parameter feedback control system in parabolic PDE form 21 p3718 A66-38666

Popov criterion application in determining stability of linear time-invariant systems with nonlinear feedback, using root locus 21 p3718 A66-38667

Feedback control system behavior, examining influence of values of structural parameters and variations in domain of complex variable 21 p3718 A66-38806

Feedback control system performance indexes used to characterize response precision, analyzing parameter dependence of integral square error /ISE/, integral time square error /ITSE/ and Feldbaum index 21 p3718 A66-38807

Parameter change effect on feedback control system magnitudes directly measurable on step and frequency response diagram, including delay time, overshoot and passband 21 p3718 A66-38808

Pneumatic servomotor synthesis by root loci technique providing direct insight into effects of parameter changes on system response 21 p3697 A66-39216

Liapunov function and Meyer-Kaiman-Yakubovich lemma used to obtain frequency domain stability criteria for linear plant with both monotone increasing and odd monotone increasing nonlinear feedback functions 22 p3940 A66-40529

Linear dynamic analysis of angular motion of spinning axisymmetrical rocket or spacecraft, emphasizing rigid body with thrust misalignment and another motion caused by deflection of control surfaces or jets 22 p3988 A66-40618

Optimal feedback control of random discrete-time system using Pontryagin maximum principle 23 p4049 A66-41543

IEEE Region Six Conference, Tucson, April 1966, Volume 2 23 p4049 A66-41600

Feedback compensated third-order control systems analysis, using coefficient plane reference system 23 p4051 A66-41703

**FEEDBACK FREQUENCY MODULATION**

**/FBFM/**

Threshold performance of frequency demodulator using feedback compared to phase locked loop 04 p0492 A66-13587

Optimized hybrid unidigit pulse code modulation system, noting use of secondary feedback loop and equalization of gain/frequency characteristic of coder 08 p1186 A66-19740

Rheostat-capacitance generators of FM oscillators with multiobe feedback 09 p1354 A66-20452

**FEEDING DEVICE**

Feeding paraboloidal reflectors by stacked horns, using 45 degree polarization and double stacking of horns 18 p3081 A66-34270

Diffraction pattern analysis of fields generated by hoghorn-fed Cassegrain antenna operating in Fresnel zone 18 p3083 A66-34289

Four-and five-horn tracking feeds for large antennas, emphasizing sum channel gain in five-horn feed 18 p3083 A66-34292

Optimum shape of feed patterns for paraboloidal antennas 18 p3083 A66-34293

Feed horn for large parabolic reflectors has low spillover, nearly uniform aperture illumination, equal F and H plane patterns and wide frequency bandwidth 18 p3084 A66-34302

Millimeter wavelength parabolic reflector with Cassegrain feed system 18 p3095 A66-34325

**FELLOWSHIP AIRCRAFT**

**S FOKKER F-28 AIRCRAFT**

**FERMAT PRINCIPLE**

Radar beam trajectory as function of refractive index lapse rate on basis of Fermat principle, assuming isotropic atmosphere with homogeneous stratification 18 p3130 A66-34719

**FERMI-DIRAC STATISTICS**

Semiconductor surface plasma density and conductivity, calculating distribution and variation via energy band curvature 06 p0929 A66-16981

Bremsstrahlung of nonrelativistic plasma, treating nondegenerate electron component of plasma simultaneously with degenerate

component by applying Fermi-Dirac distribution 12 p1925 A66-24996

**FERRI STATISTICS**

Properties of dense matter in nuclear statistical equilibrium analyzed at high densities and temperatures in connection with stellar evolution 04 p0549 A66-14372

Photoluminescence for p-and n-type gallium arsenide as function of exciting light intensity, noting minority carrier recombination mode, electron energy spectrum, etc 13 p2169 A66-26187

Static equations for characteristic parameter in superfluid Fermi gas 18 p3147 A66-34688

Statistical thermodynamics of Fermi and Bose gases 20 p3674 A66-36905

Gamma irradiation from Co 60 effect on indium antimonide, determining defect formation on dose and limiting position of Fermi level for n-and p-type material 20 p3617 A66-37552

Pitch-angle dependence of first-order Fermi acceleration of particles trapped between shock front and moving magnetic mirror 21 p3776 A66-39564

Acceleration of high energy electrons by means of Parker-Wentzel version of Fermi mechanism due to geometry and distorted structure of interplanetary magnetic field near magnetopause in transition region 22 p3972 A66-40003

**FERRI SURFACE**

Mean free path influence on transverse collective excitations in strong coupling superconducting alloys 02 p0271 A66-11481

Matrix elements of electron-phonon interaction and electric resistance in nickel, using electronic structure of Fermi surfaces and phonon spectrum 06 p0894 A66-16175

Angular correlation of photons measured for positrons annihilating in normal and superconducting lead without observing any effect on Fermi surface 07 p1109 A66-18440

Superconductivity inhibition by normal polarization, noting mechanism of second order suppressive effect 08 p1255 A66-18631

Change in Fermi surface topology, induced in superconductor by external pressure, leads to nonlinear variation of transition temperature with pressure 08 p1269 A66-18978

Anomalies in low temperature properties of noble metal alloys such as thermoelectric power and nonmonotonic behavior of resistivity with temperature 08 p1274 A66-19362

Photoadsorption effect on semiconductor surfaces determined as function of various parameters, noting role of external electric field 08 p1276 A66-19378

Positron annihilation of single oriented crystals of vanadium silicide, measuring angular correlation between gamma rays for calculation of Fermi surface 09 p1419 A66-20046

Surface potential in high and low resistivity semiconductors determined by comparing surface and contact potentials and Fermi levels 09 p1427 A66-20537

Diamagnetic impurity effect on temperature of superconducting transition for Fermi surface topology sensitive to impurity additions 09 p1428 A66-20594

Twelve distinct mass series identified and mass values determined as function of orientation of magnetic field in Fermi surface of zinc at cyclotron resonance 10 p1581 A66-21735

Identification of mass series and mass values in Fermi surface of cadmium at cyclotron resonance compared with results for zinc 10 p1581 A66-21736

Metal structure analysis in terms of elementary electron and ion particles 10 p1547 A66-22054

Effective resistivity of metal-plate conductor with single ellipsoidal Fermi surface and specularly reflecting boundaries is independent of thickness 14 p2364 A66-27706

Fermi surface of metals and semimetals and quantum oscillations in ultrasonic attenuation and magnetic susceptibility of InBi 14 p2366 A66-27763

Ultrasonic-electromagnetic wave interaction in metals including resonance effects from waves arising in external magnetic field,

determining Fermi levels 15 p2559 A66-28621

Pressure effect on transition point of superconductors from Bardeen-Cooper-Schrieffer theory, perturbation theory and electron scattering near Fermi surface 15 p2568 A66-29714

Energy distribution spectrum of tungsten single crystal field emitter and shapes of Fermi surfaces 16 p2769 A66-30162

Valence-band bending to Fermi level and radiative recombination in zinc sulfide with liquid electrodes 16 p2771 A66-30201

RF size effect on ineffective electrons in magnetic field parallel to surface of cadmium plates studied by observing harmonic oscillations of impedance 16 p2772 A66-30289

Dependence of magnetostriction coefficient for diamagnetic materials on change of Fermi surface with momentum and deformation parameter 16 p2777 A66-31035

State density for highly doped semiconductor in magnetic field, obtaining results at near Fermi level energies and at bottom of conduction band 16 p2788 A66-31779

Fermi surface of indium investigated by means of RF size effect at 3 Mc 17 p2977 A66-32316

Ultrasonic attenuation in superconductors, extending BCS theory to include electron scattering effects, effect of anisotropy of Fermi surface, etc 17 p2981 A66-32960

Fermi surface shape and size determination and thermoconductivity and conduction electron properties in metals 18 p3155 A66-34135

Localized magnetic states and Fermi surface anomalies in tunneling 18 p3159 A66-35036

Fermi surface interpretation of band structure, electron energy levels, optical properties and ferromagnetic structure of transition and noble metals 20 p3613 A66-37274

Theoretical band structure, Fermi surface, electronic structure, magnetic and optical properties of rare earth metals 20 p3614 A66-37277

Diamagnetic impurity effect on temperature of superconducting transition for Fermi surface topology sensitive to impurity additions 20 p3622 A66-38128

Kjeldaa absorption edge in cryogenic potassium for shear magnetoacoustic wave propagation in spherical metallic Fermi surface with spin density wave ground state 21 p3800 A66-38991

Electron attenuation of ultrasonic waves of arbitrary polarization and propagation direction for superconductors computed on BCS model, noting role of Fermi surface 22 p3960 A66-39802

BCS model extended to intermediate and strong-coupling superconductors effective interaction strength as function of absolute-zero energy gap, phonon-frequency cut-off and Fermi surface density of states 23 p4113 A66-41376

Thermoelectric power and electric resistivity of copper-gold alloy doped with 3d transition metals as function of temperature and atomic number of impurity 23 p4114 A66-41712

Magnetic breakdown on usual effective Hamiltonian theory for Bloch electrons in magnetic field, using simple two-dimensional rectangular model 24 p4249 A66-42223

Electron self-energies in Fermi gas arising from coupling to optical and acoustic phonons 24 p4250 A66-42231

**FERRIION**

Gorkov Ansatz in superconductivity theory exactly satisfied by system of definite number of fermions 06 p0923 A66-16273

Simple alternative derivation of conventional cluster expansion formula for matrix elements of identity and Hamiltonian for expectation value of energy of many-Fermion system 08 p1259 A66-19445

First-order density matrix corresponding to nondegenerate eigenstate be N-representable for time-reversal invariant Hamiltonian and quantum-mechanical system of N identical fermions 20 p3606 A66-38290

**FERRIC ION**

Properties of ferrous ion in iron germanium oxide studied in terms of

Mossbauer effect and susceptibility measurements 20 p3621 A66-37823

Solid state maser oscillator operating in zero field configuration, using ferric ion substituted as impurity in aluminum nitrate host crystal 24 p4221 A66-42551

**FERRIMAGNET**

Energy calculation as time function required to switch toroidal ferrimagnetic core from one remanent state to another, considering core type used in antenna phased arrays 05 p0642 A66-14564

Approximate molecular-field and quantum mechanical methods used to describe temperature dependence of saturation magnetization in ferrites and ferrimagnets 19 p3445 A66-36317

Resonance curve analysis from microwave absorption measurements on polycrystalline ferrimagnetic doped and undoped garnets at room and low temperatures, with application to low noise receivers 24 p4260 A66-43172

Geometry and magnetic parameters effect on magnetically tunable filters consisting of rectangular waveguide and containing thin magnetized ferrite slab against one wall 24 p4186 A66-43173

**FERRIMAGNETISM**

Microwave behavior of ferrimagnetics and plasmas - IEE Conference, London, September 1965 01 p0022 A66-10507

Energy considerations for transverse electric modes in ferrite loaded rectangular waveguides and associated thermodynamic paradox 01 p0037 A66-10510

Electric field and wave impedance in spin wave propagation in ferrimagnetic materials 06 p0847 A66-16101

YIG resonator tuning for low noise parametric amplifier 07 p1006 A66-17504

High power phase shifter for phased array systems, using temperature compensated garnet along with dielectric liquid cooling technique 07 p1007 A66-17507

Fine-grain structure effect on microwave power absorption thresholds of ferrimagnetic garnets and spinels 14 p2350 A66-26880

High speed ferrimagnetic microtransducer capable of embedding in wide variety of materials and sensors to explore stress characteristics and pressure profiles 20 p3555 A66-36851

Nonlinear inductance effect on leading edge of high voltage nanosecond pulses during passage through ferrite magnetic field 21 p3801 A66-39156

Magnetics - International Conference, Stuttgart, April 1966, Volume 2, covering ferrite and semiconductor devices, superconductivity and magnetic logic 24 p4260 A66-43170

**FERRITE**

**SA BARIUM FERRITE**

- Developmental memory using monolithic ferrite integrated arrays of magnetic storage elements provides cost and power savings 17 p2886 A66-32511
- Nickel, nickel-zinc and magnesium-zinc ferrite thin films, using chemical deposition on alumina substrates for millimeter wave application 18 p3153 A66-33737
- High-speed memory units for digital computer, discussing ferrite, semiconductor and thin magnetic or ducting film memories 19 p3322 A66-36817
- Phase angles of reflection and transmission coefficients for microwave energy of rectangular waveguide whose electromagnetic field interacts with ferrite spheroid 20 p3532 A66-37864
- Electronic component, ferrite memory cores, filters and inductances adapted to integrated circuit utilization 21 p3716 A66-39627
- Doubling frequency in ferrites in presence of constant magnetic field not equal to resonance field at frequency being doubled 22 p3874 A66-39817
- Ultraminiature ferrite device design parameters for application in microwave receiver systems 22 p3880 A66-40778
- HF magnetic susceptibility of ferrites with two magnetic sublattices 23 p4110 A66-41119
- Production of thin copper and nickel ferrite films in inert gas plasma reveal spinel structure in electron diffraction patterns 23 p4112 A66-41228
- Induced uniaxial anisotropy energy of manganese-bearing ferrites, noting effect of metal additives 24 p4253 A66-42364
- Material selection for linear ferrite device including determination of internal biasing field, estimate of required saturation magnetization, etc 24 p4280 A66-43177
- Latching phase modulator in standard rectangular waveguide, using square loop magnetic properties of toroidal ferrite

materials to obtain digital increments of reciprocal phase shift 24 p4186 A66-43174

Ferrite core memory system organization for lower cost and higher performance, noting diode decoded drive system 24 p4177 A66-43182

## FERROELECTRICS

### SA ANTIFERROELECTRICITY

Optical phase modulator using ferroelectric barium titanate crystal plate 01 p0117 A66-10240

Nuclear magnetic resonance study of ferroelectric phase transition in  $\text{NaNO}_2$  02 p0276 A66-12027

Electrostatic hysteresis synchronous motor discussing development, operation characteristics, test results, advantages and limitations 04 p0459 A66-13681

Ferroelectricity - All-Soviet Conference, Rostov, U.S.S.R., September 1964 06 p0925 A66-16712

UHF dispersion in barium titanate ferroelectric crystals explained as microwave scattering 06 p0926 A66-16717

Ferroelectric properties and morphotropic phase boundary in phase diagram of ternary system of compounds of lead, titanium and nickel 06 p0927 A66-16720

Electric properties of thin ferroelectric films of barium titanate compound 06 p0927 A66-16724

Polarization and volt-ampere characteristics of ferroelectrics simultaneously under static and alternating fields 06 p0854 A66-16726

Phase transitions in lithium niobate and tantalate, discussing ferroelectricity 07 p1092 A66-17221

Polycrystalline barium titanate ceramic with nonlinear resistance-temperature characteristic that rises steeply at ferroelectric Curie point 07 p1100 A66-18156

Ferroelectric properties of trisarcosine calcium chloride including dielectric measurement, Curie temperature region, etc 08 p1270 A66-19009

Current pulse measurement of thin polarized ferroelectric ceramic disks connected by short circuit under stress wave 10 p1576 A66-21546

Barium titanate transition front structure, noting similarity to ferroelectric and nonferroelectric crystal structure 10 p1582 A66-21881

Gadolinium molybdenate as ferroelectric host in pulsed laser, noting light modulation and crystal domain 11 p1713 A66-23207

Ultrasonic piezoelectric investigation of asymmetric polarizability of barium titanate crystal 11 p1757 A66-23252

Maximum efficiency of power converters, using ferroelectric and nonferroelectric pyroelectrics 13 p1997 A66-25036

Piezoelectric constants of polycrystalline ferroelectrics of barium titanate type, noting dependence on ceramic sintering temperature and applied constant voltage 13 p2160 A66-25099

Temperature dependent soft-mode lattice vibration in perovskite-type ferroelectric crystal single-oscillator 15 p2567 A66-29394

Phase transitions in lithium niobate and tantalate, discussing ferroelectricity 17 p2976 A66-31992

Temperature autostabilizing nonlinear dielectric element /TANDEL/ to obtain desirable and optimal working temperatures of ferroelectric crystal and electro-optical devices 17 p2896 A66-33298

Effect of ferroelectric polarization interacting with space charge on insulated-gate thin-film transistor parameters 17 p2896 A66-33299

Electromechanical effects of ferroelectric crystals based on thermodynamic theory 18 p3153 A66-33630

Proper mechanical vibrations effect on some properties of triglycine sulfate TANDEL /temperature autostabilizing nonlinear dielectric element/ 18 p3075 A66-33632

Electron scattering in ABO-type semiconductors by long-wave transverse-optical ferroelectric lattice mode evidenced by hydrostatic pressure measurements 19 p3444 A66-36176

Diffuse boundary scattering as possible explanation for enhanced field effect in thin metallic films through polarization reversal

of ferroelectric substrates 21 p3800 A66-38990

Applications for ferroelectric cold conductors and GaAs light-sensitive diodes, examining supersonic amplification in CdS 21 p3716 A66-39620

## FERROMAGNETIC FILM

Pulse transmission through cavity, observing if instability or bistable response is present, in connection with behavior of ferromagnetic thin films of permalloy 01 p0120 A66-10529

Thin ferromagnetic Fe-Ni films, discussing elastic tensile stresses on structure of interdomain boundaries and distribution of magnetization vectors 04 p0563 A66-13876

Electron microscopic estimation of perpendicular anisotropy of magnetic thin film originating from nonmagnetic grain boundaries 08 p1270 A66-19012

Magnetic measurements and exchange interactions in thin anisotropic ferromagnetic films 09 p1410 A66-19905

Hysteresis properties of thin ferromagnetic films of nickel-iron and of nickel-iron-molybdenum compositions, noting anisotropic dispersion 09 p1431 A66-20868

Ferromagnetic film behavior near hard direction of magnetization 09 p1431 A66-20869

Elastic tensile stress effect on domain structure of thin ferromagnetic films composed of iron and nickel 09 p1431 A66-20870

Thin ferromagnetic film physics - All-Union Symposium, Irkutsk, U.S.S.R., July 1964 11 p1751 A66-22796

Nucleation during pulse remagnetization of thin films, showing domain structure of formation, growth of nuclei, etc 11 p1752 A66-22797

Quasi-equilibrium states during pulse remagnetization of thin ferromagnetic films, discussing domain structure 11 p1752 A66-22798

Motion of magnetic moment of thin ferromagnetic films in rotating magnetic field, determining signals of first and second harmonics as function of field intensity 11 p1752 A66-22800

Transverse galvanomagnetic effect in single-domain ferromagnetic film, noting role of Hall effect 11 p1752 A66-22801

SHF susceptibility of ferromagnetic thin films for constant magnetic fields far from electromagnet resonance 11 p1753 A66-22809

Multifilm absorption spectrum dependence on magnetic interaction, deposition, thickness and quality of ferromagnetic and insulating films 11 p1753 A66-22810

Ferromagnetic multifilm systems effect on SHF power transmission and variation of resonator parameter 11 p1754 A66-22811

Reverse magnetization and energy of anisotropy of single crystal ferromagnetic films 11 p1754 A66-22815

Induced anisotropy of ferromagnetic atom pairs and magnetostriction stresses in Fe-Ni thin films subject to annealing 11 p1755 A66-22818

Quasi-static reverse magnetization of thin ferromagnetic films under action of SHF field 11 p1755 A66-22823

Incoherent rotation of reverse magnetization in thin ferromagnetic films, allowing for internal magnetostriction and exchange interaction 11 p1755 A66-22824

Interaction between layers of ferromagnetic films of different composition and coercivity separated by insulating quartz layer, obtaining films by vacuum deposition 12 p1933 A66-25028

Nonuniform rotation of local magnetization vectors in thin nickel-iron films, measuring contribution of time-dependent variations in torque during magnetic field reversal 12 p1934 A66-25031

Magnetostatic model for perpendicular anisotropy in polycrystalline nickel-iron thin films 14 p2352 A66-26893

Thin ferromagnetic Fe-Ni films, discussing elastic tensile stresses on structure of interdomain boundaries and distribution of magnetization vectors 14 p2363 A66-27581

Physics of thin ferromagnetic films - All-

Union Conference, Irkutsk, U.S.S.R., July 1964 16 p2772 A66-30680

Pulse switching of thin ferromagnetic films in nanosecond range and operation characteristics of measuring circuit 16 p2773 A66-30681

Planar Hall /galvanomagnetic/ effect in thin iron or nickel ferromagnetic films 16 p2773 A66-30684

Planar Hall effect used to determine magnetic properties of ferromagnetic films such as anisotropy field and coercive force 16 p2773 A66-30685

Static properties of vacuum deposited thin permalloy films 16 p2773 A66-30687

Technology, preparation and properties of multilayer ferromagnetic films, including influence of composition and deposition conditions on coercive force values, shape of hysteresis loops, etc 16 p2773 A66-30688

Magnetic interaction between layers of two-layer ferromagnetic film, discussing inhomogeneity effects, Barkhausen jumps, reverse magnetization nuclei, etc 16 p2774 A66-30689

Magnetic and structural properties of monoferrite films prepared by cathode sputtering, noting electron diffraction and micrograph patterns of films, crystal structure, etc 16 p2774 A66-30690

Effect of annealing in magnetic field on structural and magnetic properties of thin films prepared from nickel alloy 16 p2774 A66-30695

Temperature dependence of domain structure of thin ferromagnetic films prepared by thermal evaporation in vacuum 16 p2774 A66-30696

Apparatus for analysis and preparation of magnetic properties of thin ferromagnetic films in vacuo, noting hysteresis loop, thermal evaporation, etc 16 p2661 A66-30697

Magnetic properties and structure of ferromagnetic films obtained on single-crystal sodium chloride substrates heated to various temperatures during spray coating 19 p3438 A66-35497

Associated nonuniform electron-nucleus oscillations in ferromagnetic substances studied to determine feasibility of maser, using magnetic-reversal nuclear magnetic resonance 20 p3577 A66-37477

## FERROMAGNETIC RESONANCE

Saturation characteristics of ferromagnetic amplifiers 01 p0041 A66-10567

Rectangular waveguide with diaphragm method for ferrimagnetic resonance measurements in ferrites 01 p0041 A66-10573

Surface impedance of ferromagnetic metals at frequencies approaching ferromagnetic resonance, considering spatial dispersion of magnetic permeability 01 p0123 A66-10721

Nuclear magnetic resonance - Preliminary Report of International Symposium, Tokyo, September 1965 02 p0276 A66-12024

Nuclear magnetic resonance measured and tabulated for many impurity nuclei in ferromagnetic alloys Fe, Co and Ni 02 p0276 A66-12025

Microwave acoustic waves generated by ferromagnetic resonance and spin-wave resonance modes in magnetic film 03 p0331 A66-12409

Measurement of components of permeability and permittivity tensors of magnetized ferrites by cavity method 07 p1009 A66-17928

Narrow voltage pulse open core ferromagnetic oscillator generation with high off-duty factor 11 p1667 A66-22791

Multifilm absorption spectrum dependence on magnetic interaction, deposition, thickness and quality of ferromagnetic and insulating films 11 p1753 A66-22810

Electron and nuclear magnetic system interaction in ferromagnetic crystals, effect on basic characteristics of nuclear magnetic resonance in ferromagnetics 11 p1754 A66-22813

Ferromagnetic resonance in thin magnetic permalloy films, examining laws governing spin-wave spectrum for parallel orientation of magnetic field 11 p1755 A66-22822

Forced oscillations of ferrite core circuit, showing phase characteristics and parameters of inductance and amplitude 12 p1958 A66-23725

Nonlinear losses in ferrite phase inverter

in relation to natural ferromagnetic resonance 15 p2560 A66-28677  
 Ferromagnetic microwave resonance isolators for use in waveguides 15 p2459 A66-28936  
 Temperature dependence of line width and anisotropy field in Mn substituted ZnY 15 p2565 A66-29028  
 HF oscillations in single-crystal magnesium manganese ferrite 16 p2772 A66-30294  
 Electron flux induced excitation of magnetostatic oscillations of magnetized ferrite 16 p2784 A66-31549  
 Surface impedance of ferromagnetic metals at frequencies approaching ferromagnetic resonance, considering spatial dispersion of magnetic permeability 20 p3619 A66-37659  
 Spin wave excitation by ferromagnetic resonance, measuring coercive field as function of temperature by Kerr effect method and determining magnetic properties of thin films 20 p3621 A66-38085  
 Ferromagnetic spin correlations from strong Coulomb interactions between valence electrons resulting in enhanced singlet-state repulsion 21 p3803 A66-39263  
 Simultaneous existence /triple resonance/ of spin, helical and acoustic waves in ferromagnetic conductor in strong magnetic field 22 p3964 A66-40310

## FERROMAGNETISM

## SA ANTIFERROMAGNETISM

## SA BARKHAUSEN EFFECT

## SA BLOCH WALL

Mechanical energy dispersion by internal friction mechanism of ferromagnetic metals in alternating magnetic field 01 p0116 A66-10193  
 Anomalous Barkhausen effect in ferromagnetic alloys 01 p0117 A66-10239  
 Uniform compression effect on Curie temperature of ferromagnetic compound EuO 01 p0118 A66-10254  
 Loaded linewidth measured for given value of circuit coupling, determining unloaded linewidth, noting ferromagnetic parametric amplification and harmonic generation 01 p0039 A66-10528  
 Conventional periodically loaded waveguides with ferrimagnetic materials used in devices involving traveling wave interaction with electron beam 01 p0025 A66-10533  
 RF magnetic field effect, applied parallel to external DC field, on Heisenberg ferromagnet with dipolar coupling, using Green function 01 p0122 A66-10579  
 Unified model of ferromagnetism, analyzing spin-wave motion of electrons in transition metals, using atomic and energy-band features 04 p0559 A66-13450  
 Behavior of Ising model of ferromagnet in nonzero magnetic field, using high temperature series 04 p0563 A66-13815  
 Complex susceptibility measured, using voltage induced in loop around ferromagnetic core situated at short-circuit end of coaxial line 05 p0716 A66-15028  
 Low temperature excitation spectrum for ferro- and antiferromagnets with large crystalline field splittings 05 p0741 A66-15867  
 Superconductors with ferromagnetically aligned impurities, assuming electron mean free path due to spin-orbit interaction is small compared to coherence distance 07 p1108 A66-18431  
 Magnetocrystal anisotropy of hexagonal ferromagnetic substances in neighborhood of Curie point 08 p1273 A66-19249  
 Electrical and magnetic properties of ten synthesized perovskite compounds of complex composition 08 p1273 A66-19268  
 Phase transitions theory analyzed by simple self-consistent equations including ferromagnetism, antiferromagnetism, liquid-gas condensations and melting and freezing 09 p1424 A66-20076  
 Thermoelectric power of actual ferromagnetic metals over wide temperature range, examining effect of alloying and solute magnetic ions 09 p1425 A66-20080  
 So-called thermodynamic paradox associated with magnetized ferrite-loaded rectangular waveguide 09 p1347 A66-20608  
 Conduction electron interaction with spin wave in ferromagnetic superconductor, noting decay and

damping 09 p1430 A66-20867  
 Stability theory of magnetic phases for simplified quasi-particle band model of transition metals and alloys 10 p1580 A66-21734  
 UHF ferrites as magnetically anisotropic media in which electromagnetic wave propagation rate assumes two values and magnetic permeability is of tensor nature 11 p1658 A66-23233  
 Green function random phase decoupling scheme investigation of magnetic impurities effect on thermal properties of cubic spin-1/2 Heisenberg ferromagnet 11 p1758 A66-23394  
 Compensation and decompensation in ferromagnetic alloys viewed as electric interaction of spins 12 p1930 A66-24684  
 Existence of superconductivity along domain boundaries in ferromagnetic materials having domain structure when induced by nonmagnetic s-electrons or when only magnetic electrons are present 13 p2166 A66-25919  
 Uniform compression effect on Curie temperature of ferromagnetic compound EuO 13 p2168 A66-25971  
 Coexistence of superconductivity and ferromagnetism in alloy containing paramagnetic impurities explained by spin-orbit interaction of conduction electrons 13 p2169 A66-26566  
 Plasma-spin wave interaction in ferromagnetic semiconductors and metals with easy-plane and easy-axis magnetic anisotropy 14 p2360 A66-27188  
 Superconductivity and origin of magnetic field at nucleus and ferromagnetism problems analyzed in rare earth metals and alloys 14 p2362 A66-27461  
 Metrological characteristics of three-component magnetometers with ferromagnetic probes installed in Elektron II space station 15 p2497 A66-28501  
 Pressure effect on magnetic moment of solids, noting magnetic transition point, ferromagnetic anomalies, etc 15 p2565 A66-29067  
 Magnetic effects on diffusion of ferromagnetic colloidal particles dispersed in current-carrying fluid medium, noting force effects on relaxation process 15 p2556 A66-29809  
 Electronic density of states of superconducting ferromagnetic alloys determined by static electron-impurity exchange interaction 16 p2768 A66-30148  
 Heat magnetization in simple model applied to thulium intermetallic compounds 16 p2745 A66-30177  
 Ferromagnetic semiconductors with exchange interaction due to conduction electrons 17 p2986 A66-33306  
 Galvanomagnetic effect in ferromagnetic metals, developing theory of planar Hall effect in terms of spin-orbit interaction of electrons 18 p3158 A66-34682  
 German papers on metal physics, chemical bonds in crystals and ferromagnetism 19 p3439 A66-35712  
 Quantum theoretical ferromagnetic behavior of chemical bonds in transition metals and Hartree-Fock calculation of atomic orbitals 19 p3439 A66-35713  
 Micromagnetic theory of ferromagnetics, discussing magnetization curve, saturation and hysteresis effects 19 p3439 A66-35714  
 Magnetization curve and magnetic hysteresis of ferromagnetic single crystals 19 p3439 A66-35715  
 Effect of electric and magnetic properties of titanium oxide explained through Matsubara and Yokota theory extended to finite temperatures 19 p3444 A66-36175  
 Ferromagnetic fluid developing body force under magnetic field influence, noting changes in internal pressure, velocity, etc, applied to attitude control devices, accelerometers, etc 19 p3445 A66-36178  
 Fermi surface interpretation of band structure, electron energy levels, optical properties and ferromagnetic structure of transition and noble metals 20 p3613 A66-37274  
 Physics of ferro- and antiferromagnetism - All-Union Conference, Sverdlovsk, U.S.S.R., July 1965 20 p3616 A66-37475  
 Contrast formation of coupled walls

studied by electron microscope with variable defocusing 20 p3620 A66-37321  
 Magnetic properties of ferromagnetic zinc-zirconium alloy between 120 degrees and 0.1 degrees K, suggesting possible indication of superconductivity 21 p3801 A66-39000  
 Fluidmagnetic buoyancy effects in ferrohydrodynamic /FHD/ flows and implications of Earnshaw levitation theorem 23 p4057 A66-41885  
 Parametric phenomena in ferromagnetics, noting parametric excitation of quasi-particles and stationary state of excited waves 24 p4256 A66-42522  
 Plasma-spin wave interaction in ferromagnetic semiconductors and metals with easy plane and easy axis magnetic anisotropy 24 p4259 A66-43086

## FERRY SPACECRAFT

Relative advantages of ballistic missiles and orbital ferries for placing payloads in orbit 02 p0306 A66-11862  
 Orbital space station development based on multimission space station module for six persons and multipurpose logistics vehicles for ferry resupply 03 p0432 A66-12904  
 Titan III as ferry-resupply system with analysis of performance as affected by orbit altitude and inclination parameters [SAE PAPER 660446] 18 p3245 A66-33892

## FET

## S FIELD EFFECT TRANSISTOR /FET/

## FETUS

Biosatellite for TV monitoring of development of opossum embryonic fetus in space environment 08 p1174 A66-18583

## FEYNMAN DIAGRAM

Interaction characteristics calculated for Feynman diagram of nucleon-nucleon scattering at 300 bev 07 p1115 A66-17556  
 Electromagnetic form factors of electron and muon neutrinos evaluated, using intermediate vector-boson theory, noting renormalization induced by electromagnetic interactions 15 p2544 A66-28944  
 Semiempirical theory based on virial and Feynman theorems relating physical parameters and mechanical behavior of metals with structural characteristics 22 p3937 A66-40927  
 Gauge transformations of third kind and operator gauge transformations of first and second kinds, relating electron and photon propagators to quantum electrodynamical vertex function 23 p4098 A66-41392

## FIAT G-222 AIRCRAFT

Controls, systems and equipment of five different configurations of FIAT G 222 V/STOL transport aircraft for Italian Air Force 02 p0177 A66-11868

## FIBER

## SA GLASS FIBER

## SA REINFORCING FIBER

## SA SYNTHETIC FIBER

Ceramic and graphite fibers and whiskers, Air Force sponsored monograph 09 p1392 A66-20475  
 Fiber orientation effect on ultimate tensile strength of aluminum-steel-silica fiber-reinforced metals 12 p1896 A66-24533  
 Fibrous continuum media theory, discussing geometrical properties, stress state, motion equations, boundary value problems, etc 14 p2397 A66-27383  
 Heat transfer, thermal conductivity and thermal diffusivity of loose fibrous materials under vacuum 20 p3587 A66-36978  
 Macroscopic viscoelastic properties of fiber reinforced materials analyzed on basis of composite cylinder assemblage model and correspondence principle 21 p3827 A66-38697

## FIBER OPTICS

## SA VIDICON

Light interaction effects potentially useful in optical logic functions, emphasizing fiber lasers 05 p0693 A66-14825  
 Waveguide coupling between adjacent parallel fibers as means of transferring radiation from one element to another 05 p0693 A66-14827  
 Fraunhofer pattern of laser light transmitted through optical fiber, noting spatial frequency of interference fringes between light waves 05 p0696 A66-14972  
 Fiber optics assemblies for high resolution photographic application 14 p2292 A66-27321  
 Transient fiber optics probe for space resolved diagnostics of dense plasmas,

noting adaptation to temperature measurements by line intensity and line ratio method 23 p4107 A66-41887  
Fiber optics application to wave guidance of X-rays 24 p4236 A66-42252

**FIBER STRENGTH**  
Glass, quartz, mineral and ceramic fibers woven into fabric provide thermal insulation, reinforced plastic, filtration, friction materials and electrical insulation 01 p0091 A66-10356  
Origin and properties of fiber composite materials 05 p0705 A66-14808  
Strength of whiskers in fiber composite materials 05 p0705 A66-14809  
Influence of fiber and matrix characteristics on mechanics of deformation and fracture of fibrous composite 05 p0773 A66-14810  
Structural mechanics and critical conditions of fiber composite materials 05 p0773 A66-14907  
Compressive strength and instability failure mechanism in uniaxial boron fiber-metal matrix composite 08 p1240 A66-19139  
Elastomechanical properties of glass fibers and resins in order to determine optimum materials for reinforced glass fiber structures  
[ONERA TP 322] 11 p1721 A66-23200  
Two-dimensional fibrous media theory, noting stress-strain states, bodies with microstructures, fibrous representation of bar structures, etc 15 p2614 A66-29719  
Calibration method for tensile testing apparatus for testing elongated high modulus fibers and graphing of typical load elongation curves 17 p2943 A66-32400  
Mechanical properties of metallic and ceramic fibers in metallic matrices and refractory fibers in ceramic matrices 21 p3751 A66-39231  
Fatigue behavior of aluminum reinforced with stainless steel wires, considering effects of fiber volume fraction and interfacial bond 23 p4081 A66-41661  
Fiber geometry effect on shear stress distribution in composite materials 24 p4292 A66-42861

**FIBERGLASS**  
S GLASS FIBER  
**FIELD**  
S ANTENNA FIELD  
S BOSON FIELD  
S CROSSED FIELD  
S ELECTRIC FIELD  
S ELECTROMAGNETIC FIELD  
S ELECTROSTATIC FIELD  
S FAR FIELD  
S FLOW FIELD  
S FORCE FIELD  
S GEOMAGNETIC FIELD  
S GRAVITATIONAL FIELD  
S INTERSTELLAR MAGNETIC FIELD  
S MAGNETIC FIELD  
S MAGNETOSTATIC FIELD  
S MULTIPOLAR FIELD  
S POTENTIAL FIELD  
S PRESSURE FIELD  
S RADIATION FIELD  
S SELF-CONSISTENT FIELD /SCF/  
S SOUND FIELD  
S STAR FIELD  
S STELLAR FIELD  
S STRAIN FIELD  
S TEMPERATURE FIELD  
S TENSOR FIELD  
S VISUAL FIELD  
Space-time correlation function of response of finite cylindrical shell to purely random pressure field and to subsonic boundary layer pressure fluctuations 01 p0147 A66-10131

**FIELD-ALIGNED IRREGULARITY /FAI/**  
Achromatic electromagnetic quadrupole lens functioning for case of slight misalignment of fields 02 p0199 A66-11783  
Radar echoes explained in terms of backscatter from field-aligned irregularities in F region 03 p0334 A66-12679  
Correlation of peak occurrence of HF radar echoes and high-latitude spread-F measurements near time of local sunset 18 p3107 A66-34525

**FIELD EFFECT TRANSISTOR /FET/**  
**SA METAL OXIDE SEMICONDUCTOR /MOS/**  
Surface conductivity of germanium gold alloyed at liquid nitrogen temperature, considering field effect 01 p0127 A66-11059  
Transient gamma radiation pulse effects on MOS field effect transistors 01 p0049 A66-11151  
Integrated current limiter design using transistor circuits, pn-pn switches or field effect transistors 02 p0204 A66-11935  
Transmission-line model of insulated-gate field effect transistor /MOS transistor/ in pre-pinchoff mode, determining small signal response 02 p0205 A66-11980  
Curve tracer adapter for junction field effect transistors and manufacturing operations system, discussing basic circuitry and uses 03 p0348 A66-13345  
Integrated circuit for time division multiplexers having flexible integrated gate driver circuit for field effect transistor analog gates 04 p0492 A66-13598  
Simple derivation of small-signal equivalent circuit for arbitrarily doped 4-terminal field effect transistors 04 p0500 A66-14098  
Relationship between three symbolic circuit representations of charge-capacitance effects in 4-terminal field effect transistors 04 p0500 A66-14099  
Comparing VHF cascade circuits with double diffusion silicon planar transistors and metal oxide field effect planar transistors 04 p0501 A66-14133  
Metal oxide semiconductor structures in integrated circuits as high and low resistances, inverters and AC amplifiers 05 p0643 A66-14569  
Noise in metal oxide semiconductor field effect transistors, using thermal noise activity in conducting channel 05 p0644 A66-14580  
Cascode configuration using two interconnected field effect transistors to reduce reverse feedback capacitance for better suitability for VHF communications circuits 05 p0645 A66-14585  
Conditioning and isolation of Apollo stabilization and control system signals, using field effect transistors 05 p0646 A66-14638  
Current flow, charge distribution and transient response equations derived for insulated-gate field effect transistors 05 p0647 A66-14666  
Neutron radiation effects on silicon field effect transistors 05 p0739 A66-15489  
Instability of metal oxide silicon field effect transistors found due to sodium-ion migration 06 p0842 A66-16010  
Width of depletion region of reverse-biased silicon p-n junction 06 p0923 A66-16382  
Thermal noise effects in field effect transistors at LF 06 p0850 A66-16440  
Lead telluride single crystal grown on cleaved rock-salt substrates for thin-film field effect transistors 06 p0854 A66-16679  
Improved resolution of scanning electron microscope used to define geometry of electrode areas during fabrication of solid state devices 06 p0855 A66-16769  
Field effect transistor circuits used to replace bipolar transistors or thermionic devices and action as variable ohmic resistor 06 p0856 A66-16867  
Field effect transistors applied in circuit design including triggers, gates, impedance adapters, etc 06 p0856 A66-16919  
Field effect transistors and unijunction transistors in sawtooth generator, cascade amplifier, voltage regulator, etc 06 p0856 A66-16920  
Epitaxial metal-oxide-semiconductor transistor with tunable high-pass filter-type response characteristics with insertion gain in passband 06 p0857 A66-16959  
Radiation-induced leakage current across gate-to-substrate and drain-to-substrate semiconductor junction dominates behavior of MOS field effect transistors for small gate impedances 07 p1009 A66-18146  
Jump-conductivity surface dependence on surface potential in semiconductor, based on field effect basic geometry 07 p1105 A66-18374  
Equivalent circuit and DC characteristics

derivation for MOS transistor in common-gate electrode arrangement 08 p1188 A66-18656  
Equivalent circuit and gain in single lumped approximation for MOS field effect transistor 08 p1189 A66-18660  
Equivalent circuit obtained from device charge equations for analysis of HF properties of four-terminal field effect transistors 08 p1189 A66-18669  
Fabrication of active thin film elements, considering bipolar and unipolar transistor, hot electron devices, field effect transistors and single crystal semiconductor films 08 p1192 A66-18964  
Unitron, junction-type unipolar field transistor, design, operation, parameter, production technology and uses in electronic circuitry 08 p1193 A66-19277  
Small signal properties of field effect devices, junction and MOS 08 p1195 A66-19356  
Transient response of MOS-FET transistor investigated by exposing p-and n-channel devices to 600 kev flash X-ray machine 08 p1196 A66-19498  
Saturation currents of silicon multichannel field effect transistors 09 p1350 A66-19914  
Refined field effect transistors noting current, gate voltage and transconductance of proposed structures 09 p1350 A66-19918  
Thin film transistors using evaporated silicon films on sapphire 09 p1351 A66-19939  
Galvanomagnetic and field effect measurements on Ge double crystals 09 p1427 A66-20419  
Field effect transistor used in analog switching circuits 09 p1355 A66-20571  
Static characteristics of insulated gate field effect transistor with gate electrodes at both sides of semiconducting channel, including space charge limited currents analysis 09 p1359 A66-20974  
Metal oxide semiconductor /MOS/ transistors constructed on single crystal cadmium sulfide, noting transconductance, gate source, gate drain capacitance, etc 09 p1360 A66-20980  
Inversion layers of MOS field effect transistors observed by scanning-electron microscope and current measured 10 p1574 A66-21355  
Field effect transistor input capacitance in pinch-off region derived by using two parallel coupled condensers as equivalent 10 p1510 A66-21657  
Gridistor, semiconductor device with form of field-effect triode and application as amplifier or oscillator for wide range of frequencies and powers 10 p1511 A66-21714  
Advances in discrete semiconductor devices, parametrically evaluating device performance 10 p1513 A66-21901  
Operating principles and application of field effect transistor 11 p1665 A66-22686  
Monographs on field effect transistors 11 p1671 A66-23460  
Field effect transistors, principles, design and application 11 p1672 A66-23461  
Semiconductor surface physics, with emphasis on FET electrical surface phenomena 11 p1759 A66-23462  
Conduction through insulating layers in insulated-gate FET, noting tunneling and breakdown 11 p1672 A66-23463  
Thin silicon-dioxide film properties and growth for insulating gate electrode and semiconductor of MOS field effect device 11 p1759 A66-23464  
Carrier drift mobility and characteristics of field effect transistor, noting drain saturation resistance and surface scattering 11 p1672 A66-23465  
Thermal noise, shot noise and 1/f noise in field effect transistors 11 p1672 A66-23466  
Radiation damage in bipolar, insulated gate, field effect, gallium arsenide and thin film transistors 11 p1672 A66-23467  
Fabrication, ladder geometry, diffusion depth, oxide thickness, etc, of MOS FETs 11 p1672 A66-23468  
Thin film FETs including structural analysis, operating parameters, MOS transistors, carrier mobility in polycrystalline films, etc 11 p1672 A66-23469  
Field effect transistor application to linear amplifier and attenuator

circuits 11 p1673 A66-23470  
 Insulated gate field effect transistors in HF-UHF linear amplifiers 11 p1673 A66-23471  
 Field effect transistors in digital circuits, FET transient behavior, transistor logic and switching circuitry 11 p1673 A66-23472  
 Existence of limitation on properties and diffusion mode in junction and insulated gate field effect transistors 12 p1837 A66-24306  
 Planar silicon insulated-gate field-effect transistor using silicon nitride as diffusion mask, passivating layer and gate insulator 12 p1837 A66-24310  
 Polysilicon insulated gate field effect transistor having active element fabricated in epitaxially deposited film on oxidized single crystal silicon 12 p1845 A66-24847  
 MOS FETs in microelectronics, including digital arrays and logic gates 12 p1845 A66-24847  
 FET amplifier driving common-emitter bipolar-transistor second stage operated with channel not pinched off 13 p2029 A66-25206  
 Surface photovoltage measured in vapor-deposited cadmium sulfide using metal-insulator-semiconductor-structures, noting surface potential analysis as applied to thin film field effect transistor 13 p2164 A66-25487  
 Effect of magnetic field on field effect at germanium surface, determining rate of surface recombination 13 p2166 A66-25697  
 High gain low-noise electronic amplifier with field effect transistor at UHF range, noting design parameters and performance 13 p2040 A66-25832  
 AC, DC and pulse amplifiers including FET amplifiers, using semiconductor components and employed in measuring devices 13 p2079 A66-25895  
 Properties of second-gate electrode of MOS-FET and application as voltage-controlled integrator 14 p2248 A66-27052  
 Low noise preamplifier with field effect transistors for use with IR detectors 14 p2249 A66-27116  
 Junction field effect transistor used for switching 14 p2252 A66-27459  
 FET in biased p-n junction controlled electric field applied to low level circuit design 14 p2261 A66-28374  
 Temperature dependence of FET drain characteristics, square wave behavior, carrier mobility transfer characteristics and contact potential 14 p2261 A66-28375  
 High impedances obtained over wide frequency range with bipolar or unipolar transistors, noting current multiplication, bootstrapping, etc., and FET 14 p2262 A66-28377  
 Causes of noise in semiconductor amplifiers, noting FET, tunnel diode and varactor 14 p2268 A66-28383  
 Thermal noise of input conductance and gate-drain conductance in junction-gate FET 15 p2458 A66-28892  
 Unipolar FET converter, based on dependence of transconductance and drain current on gate bias voltage 15 p2464 A66-29124  
 Annealing effects of gamma ray irradiation on MOS FET increase donor surface state density 15 p2567 A66-29413  
 Graph-analytical method of calculating channel transistors of arbitrary geometrical shape 15 p2469 A66-29928  
 Frequency dependence of transconductance of unistrons 15 p2469 A66-29929  
 Evaluation of energy resolution of Li-drifted Ge detectors and preamplifiers using FETs in nuclear spectrometry 16 p2660 A66-30625  
 Semiconductor device development with emphasis on field transistors, transistor with metallic base and controlled diode 16 p2660 A66-30631  
 Thermal noise theory extended for insulated gate /MOS/ FET with gate voltage induced channel structure by including bulk charge from ionized impurities in semiconductor substrate 16 p2663 A66-31016  
 Thin film transistors and use in integrated circuits 16 p2664 A66-31416  
 Physical properties of thin films of CdS and CdSe formed by vacuum deposition analyzed as function of deposition and

processing conditions 16 p2782 A66-31422  
 Magnetic field influence on AC surface field effect in germanium resulting from change in sample conductance and not from change in surface barrier height 16 p2784 A66-31450  
 Metal oxide semiconductor transistors use in integrated circuits, discussing field effect devices, analog circuits configurations and applications 17 p2882 A66-32108  
 MOS transistors in integrated switching circuits to obtain desirable characteristics of pentode vacuum tubes and bipolar transistors 17 p2882 A66-32109  
 Thin film transistor design and performance 17 p2885 A66-32380  
 Very high input impedance buffer circuit using field effect transistors for voltage sensing in high impedance analog simulator 17 p2886 A66-32381  
 Junction field-effect transistor parameters and application guidelines compared to metal oxide semiconductor 17 p2888 A66-32779  
 Ionizing radiation effect on FET with silicon nitride as insulating layer, noting reduction of shift in gate turn-on voltage 17 p2983 A66-33105  
 FET structures with linearly graded junctions noting maximum gain configuration, transconductance expression, etc 17 p2895 A66-33116  
 Enhancement mode MOS-FET HF thermal noise in drain and gate analyzed, using channel transmission line model 17 p2897 A66-33462  
 Direct current volt-ampere characteristics of junction gate germanium alloy FET, including field-dependent mobility effect and channel-height distribution 17 p2897 A66-33463  
 Time and space dependent voltage variations in differential channel zone of field effect transistor with insulated gate 18 p3088 A66-35039  
 Book on analysis and design of transistor circuits including transistor parameters, emitter diode equivalent circuits, FET, amplifiers, noise, etc 18 p3089 A66-35238  
 Silicon field effect device with AC/DC fields superimposed on gate terminals analyzed for determination of distribution of defect introduction rate with depth, especially near threshold energies 19 p3435 A66-35413  
 Two-stage field effect transistor amplifier with high input resistance and modification of circuit enabling input resistance to be adjusted to infinity 19 p3315 A66-35560  
 Ultrahigh speed PCM telemetry systems using high-speed FET circuits 19 p3302 A66-35701  
 Differential low level junction field effect transistor commutators performance and characteristics for design 19 p3317 A66-35702  
 Wideband low-noise charge-sensitive preamplifier with n-channel field-effect-transistor input, giving experimental characteristics 19 p3318 A66-35916  
 Low-noise charge sensitive preamplifier for semiconductor detectors using paralleled field effect transistors 19 p3318 A66-35917  
 Miniature shaft-angle encoder with integrated-circuit encoding matrix and built-in memory potential using single static commutation ring 20 p3558 A66-37217  
 High input impedance fluid amplifier noting electric and fluid analogs, fluid triode and mathematical model of fluid FET 21 p3697 A66-38595  
 Silicon nitride as possible replacement for silicon dioxide in highly stable and reliable semiconductor devices, especially insulated-gate field effect transistor circuits 21 p3710 A66-38827  
 Barrier height determination in thin film sandwich tunnel diodes, using value of internal electric field and electric tunnel method 22 p3959 A66-39720  
 Equations derived for thermal drift of MOS-FET operated at drain voltages beyond pinchoff voltage 22 p3872 A66-39722  
 Large-signal AC field effect experiments with A and B real surfaces of indium antimonide exposed to various chemical reactions and high electric field described by tunnel equation 23 p4111 A66-41185

Reliability prediction, failure rates, fail-safe design and packaging of integrated circuit and MOS-FET microminiaturized electronic equipment 24 p4179 A66-42098  
 Field effect transistors in shock tunnel instrumentation circuitry associated with piezoelectric transducers operating in environment of widely ranging pressures, temperatures and testing times 24 p4207 A66-42170  
 Small and low cost voltage-tunable audio filter using field effect transistors as tuning element in place of inductors for space communications 24 p4180 A66-42331  
 Failure mechanisms of CdS and CdSe thin film FETs noting volt-ampere characteristics, temperature, electrical stress, and humidity effects 24 p4181 A66-42388  
 Electron effective mobility variation in AC for small signals as function of operating frequency of thin film transistors and dielectric diodes 24 p4181 A66-42392  
 FET characteristics in chopping and analog switching applications 24 p4182 A66-42504  
 MOS equivalent circuit for small signal HF operation of insulated gate field effect transistor in pinch-off mode, using differential equation 24 p4183 A66-42638  
 Small signal forward and reverse transfer parameters derived for metal oxide semiconductor and junction-gate field effect transistors from simple unified charge control analysis 24 p4185 A66-43037  
 Amplifiers using field effect device in first stage and bipolar transistor in second with limited drain-source voltage 24 p4185 A66-43037

## FIELD EMISSION

Prebreakdown current in high vacuum noting field strength and field emission hypothesis 01 p0106 A66-10641  
 Field-emission current voltage behavior of p-type germanium crystals whose surfaces were prepared by high field evaporation 02 p0271 A66-11432  
 Nonequilibrium field effect on silicon in region of high majority carrier depletion and nonequilibrium between energy bands 03 p0410 A66-12941  
 Propagation between Earth and ionosphere up to 100 km of VLF radio waves sent by ground transmitter, calculating field pattern 05 p0672 A66-15042  
 Harmonic microwave generation by field emission cathode in superconducting cavity 06 p0854 A66-16752  
 Improved stability of field emission current at microwave frequencies in weak vacuum 06 p0854 A66-16752  
 Work function of metals and semiconductors measured, using retarding potential analyzer to determine field emission electron energy distribution 08 p1228 A66-19824  
 Field effect and surface states at interface between germanium and electrolytes 10 p1586 A66-22141  
 Differences in MHD emission occurrence times, considering ionospheric penetration propagation toward equator and error sources 11 p1701 A66-23158  
 Field emission of germanium alloyed with silver and irradiated with IR 13 p2160 A66-25103  
 Dielectric field cathode model of field and photofield emission from high resistivity Si and Ge at low temperatures 15 p2558 A66-28602  
 Semiconductor properties measurement using resonator with slit 15 p2580 A66-28663  
 Energy distribution spectrum of tungsten single crystal field emitter and shapes of Fermi surfaces 16 p2769 A66-30162  
 Field emission of germanium alloyed with silver and irradiated with IR 16 p2771 A66-30287  
 Field emission in thin semiconductor layers upon metallic substrate, noting V-I characteristics dependence on Si layer thickness, tunnel effects, etc 17 p2977 A66-32261  
 Zr-coated tungsten cathode in reducing divergence of electron beam emission 18 p3088 A66-35074  
 Field and thermionic field emission responsible for excess currents in Schottky barriers formed on doped semiconductors 19 p3434 A66-35341

Field effect and surface states at interface between germanium and electrolytes 19 p3440 A66-35759  
 Adsorption of lithium on /110/, /111/ and /112/ planes of single-crystal tungsten in field-emission projector, measuring work function dependence on concentration 20 p3618 A66-37558  
 GaAs field emission cathode microscopy patterns prepared by chemical etching and low temperature field desorption 20 p3623 A66-38393  
 Surface patch electrostatic field effects on field emission single crystal plane work function determinations 21 p3770 A66-38656  
 Noise measurement in field emission vacuum diodes, interpreting excess and shot noise spectrum in terms of work function 22 p3878 A66-40696  
 Field emission diode and triode with narrowly spaced electrodes, noting voltage and current characteristics 22 p3882 A66-40894  
 Surface scattering of electrons on metallic field effect in thin layers -in theory of mean-free-path influences on conductance change 23 p4110 A66-41184

**FIELD INTENSITY METER**  
 Anechoic chamber facility for surface field measurement in scattering studies using probes 10 p1520 A66-21638  
 Uniform electric field meters for measurement at Earth surface and on aircraft and satellites 12 p1915 A66-24647  
 Ultrasonic field intensity in liquid measured with microradiometer, discussing instrument design concepts, advantages and operation 21 p3735 A66-38518  
 Field intensities and electron distribution functions in hollow cathode, graphs show potential distribution along cathode axis 22 p3953 A66-39758

**FIELD MODE THEORY**  
 Space-charge-limited current in solid for field depletion of filled traps, noting current voltage characteristics 11 p1751 A66-22733  
 Gravitational theory developed by generalizing Newtonian and special relativistic concepts 13 p2129 A66-26332  
 Field separation of ground transmitter into ordinary and extraordinary modes when traversing lower boundary of anisotropic ionosphere, noting effect of incidence angle, magnetic azimuth, etc, on energy dissipation of VLF ground wave 14 p2238 A66-27613  
 Gas laser with generalized polarization characteristics, noting role of degenerate atomic energy levels 19 p3374 A66-36005  
 Space-charge-limited current in solid for field depletion of filled traps, noting current voltage characteristics 23 p4113 A66-41471

**FIELD STRENGTH**  
**SA ELECTRIC FIELD STRENGTH**  
**SA MAGNETIC FIELD INTENSITY**  
 Prebreakdown current in high vacuum noting field strength and field emission hypothesis 01 p0106 A66-10641  
 Total vector modulus measurements from absolute field element observations and proton magnetometer 04 p0516 A66-13866  
 Simultaneous long distance tropospheric propagation measurements at 560 and 774 mc/s over North Sea 04 p0483 A66-14045  
 Semiconductor cathode thermionic emission by solving simultaneously Boltzmann and Poisson equations relating field intensity with electron concentration 06 p0838 A66-15892  
 Received field strength dependence on maximum and minimum usable carrier frequency range for ionospheric scattering 06 p0836 A66-17034  
 Gravitational irregularities in Santa Barbara channel, California 09 p1369 A66-19873  
 Long-term geomagnetic influence on medium frequency nighttime sky wave field strength 09 p1341 A66-19916  
 Electrical conductivity and field strength in symmetrically contacted rectangular samples as effected by geometrical factors 09 p1425 A66-20187  
 VLF electromagnetic propagation parameter determination by field strength measurements over medium distances in ionosphere 14 p2235 A66-27130

Causes giving rise to or influencing change of integral field strength of atmospherics during solar flare in VLF region brought to quantitative stage 14 p2237 A66-27400  
 Satellite-emitted short radio wave field intensity and ionospheric parameters 15 p2447 A66-28493  
 Ionospheric absorption measurement by A3 method in which field strength of distant CW transmitter is continuously recorded 19 p3351 A66-36359  
 Electric component of radiation field from same flashes recorded with histograms of product of field strength and distance, showing concentration around mean values 20 p3553 A66-38076  
 Tropospheric radio wave propagation field strength measurements and attenuation differences among various mixed land and sea transmission paths 20 p3520 A66-38144  
 Layer-like field inhomogeneities in homogeneous semiconductors occurring when conductivity decreases analyzed using Poisson and transport equations, obtaining stationary solutions for differential negative conductivity 24 p4254 A66-42424

**FIELD THEORY**  
**SA FUNCTION SPACE**  
**SA QUANTUM ELECTRODYNAMICS**  
**SA QUANTUM THEORY**  
**SA RELATIVITY THEORY**  
**SA UNIFIED FIELD THEORY**  
 General theory for construction of constitutive equations describing purely mechanical properties of continuous media with tensor and group theoretic concepts 01 p0106 A66-10717  
 Microwave propagation through metallic waveguides filled with dielectrics, using field theory, network theory, Rayleigh-Ritz procedure, reaction concept, etc 02 p0206 A66-12009  
 Particle-field interaction in magnetosphere discussing categories, properties, scale model experiments, etc 03 p0363 A66-12646  
 Local gravity anomalies for circular cylinder with vertical axis, discussing solution to direct and inverse problems of quantitative interpretation of fields 04 p0516 A66-13960  
 Exact solutions to Einstein field equations 05 p0715 A66-14532  
 Nonradiative and stationary electromagnetic and gravitational fields 06 p0909 A66-16330  
 Resolving matrix of normal system of ordinary linear differential equations in complex independent variable for multiply connected fields 07 p1057 A66-17835  
 Temperature dependence of Ginzburg-Landau coefficient in type I superconductors 09 p1420 A66-20048  
 Field penetration in superconductors with surface layers, describing LF low field AC susceptibility measurements in swept DC fields 09 p1420 A66-20049  
 Nonconservation of baryon and cosmological theory, discussing creation of matter in discrete manner around isolated pockets with strong gravitational fields 11 p1774 A66-23067  
 Operational calculus for finite rings employing Galois fields for periodic sequences via transfer function application 11 p1678 A66-23242  
 One-boson Lee model of solvable field theory with nontrivial charge and mass renormalization as example of Lehmann-Symanzik-Zimmermann formalism 12 p1917 A66-24098  
 Relativistic electrodynamics of moving medium, discussing Maxwell-Minkowski equations, Born equations, field vector transformations, etc 12 p1915 A66-24650  
 Nonrelativistic force in simple magnetizable fluid derived from thermodynamic information about energy and power 12 p1915 A66-24651  
 Models of matter-electromagnetic field interaction for gas lasers, using perturbation theory 13 p2103 A66-26216  
 Coherence properties of quantized electromagnetic field and hierarchy of correlation functions for complex field operators 13 p2128 A66-26218  
 Partial-wave dispersion in N/D form used to analyze superconductivity 13 p2136 A66-26331

Spatially homogeneous anisotropic irrotational solutions of Einstein field equations for cosmological dust source 14 p2330 A66-27019  
 Variational calculus formulation of classical electromagnetic field theory 14 p2330 A66-27022  
 Text on traveling wave antenna design and field equations in terms of TW sources 14 p2254 A66-27720  
 Field theory, variational calculus, dynamic programming and Pontryagin maximum principle approaches to plasma optimal controllability 15 p2548 A66-28520  
 Space-time correlation tensor of turbulent fields by phase space functional Lebesgue-Stieltjes integration, statistical hydromechanics and probability measure theory 15 p2479 A66-29398  
 Lorentz invariant space-time gravitational field theory, Maxwellian gravitokinetic field of potential and kinetic components and precession of orbit of Mercury analyzed by Einstein restricted theory of relativity 16 p2802 A66-31011  
 Angular dependence of spin-lattice relaxation times in ruby evaluated, using second order perturbation wave function and field coupling representation 16 p2781 A66-31220  
 Einstein field equations for perfect fluid, coupled to frozen-in magnetic field, in high-density limit of gravitational collapse 17 p2997 A66-31973  
 Stationary dust-filled cosmological solution of Einstein field equations with zero lambda and without closed timelike lines 19 p3463 A66-36169  
 General relativistic field equations of compressible fluid sphere with variable polytropic index 20 p3545 A66-37465  
 Covariant gravitational field equations in de Sitter space and quantum mechanical equations of motion associated with particles of given spin, employing gauge principle 21 p3769 A66-38645  
 Flux flow in type II superconductors, measuring critical current, longitudinal and transverse voltages for varied orientation of magnetic field 21 p3802 A66-39201  
 Time-mass dependent events during motion of material particle, using Hamilton-Jacobi equation of relativistic mechanics in Minkowski continuum 21 p3772 A66-39276  
 Augmented special relativity theory to account for Einstein effects, with extension to general scalar field theory and notes on corpuscular light and galactic-centered reference frame 23 p4090 A66-41273

**FIGHTER AIRCRAFT**  
 Optimization of terrain following performance for supersonic fighter aircraft, developing usable command signal 01 p0102 A66-10045  
 Lift fans for advanced V/STOL aircraft, describing performance improvement parameters 06 p0807 A66-17020  
 Man-machine conflict in high performance tactical fighter 07 p0998 A66-17282  
 Cost-effectiveness guidelines for designing tactical system in absence of firm specifications, noting avionics system 19 p3480 A66-35529  
 Optimization of terrain following performance for supersonic fighter aircraft, developing usable command signal 19 p3397 A66-36484  
 Dive flight behavior of propeller-driven and jet fighters 21 p3696 A66-38652

**FIGURE OF MERIT**  
 Universal definition of figure of merit associated with variable parameter one-port for RF switching and modulation 02 p0201 A66-11903  
 Figure of merit and methods of finding optimal filters for pulse-forming networks, taking into account frequency response as well as time response 02 p0208 A66-11910  
 Direct measurement of Nernst-Ettingshausen dimensionless figure of merit as ratio of two voltages 10 p1576 A66-21542  
 Correction to theory of Harman method of determining thermoelectric figure of merit 12 p1928 A66-23963  
 Zinc-antimonide with high and constant thermoelectric figure of merit obtained by solid phase diffusion 13 p2163 A66-25453  
 Figure of merit for reflection type

varactor phase shifter 13 p2037 A66-25545  
 Photometric figures of merit for various shaped semiconductor luminescent sources operating in spontaneous mode 14 p2362 A66-27495  
 Intermodulation elimination in transistors, determining figure of merit and sensitivity as function of operating current 17 p2895 A66-33115  
 L-band traveling wave maser using chromium doped rutile, discussing inverted susceptibility as figure of merit 20 p3580 A66-38239  
 Maximum figure of merit for broadband semiconductors, using theory of mobility due to acoustic mode and optical mode scattering 24 p4248 A66-42114

**FILAMENT**  
 SA HEATING EQUIPMENT  
 Boron filament tensile and flexural strength affected by surface and internal flaws with chemical polishing 10 p1548 A66-21728  
 Flame initiated filament oscillations, noting photographic measurement of oscillation frequencies 15 p2573 A66-28646  
 Continuous silicon carbide filaments prepared using chemical vapor-deposition techniques, analyzing cross sections, x-ray diffraction and tensile strength 20 p3588 A66-37772  
 Radiation characteristics of filament with triangular current distribution situated along axis of magnetized plasma column, noting guided and space waves excited by filament 24 p4240 A66-42291

**FILAMENT WINDING**  
 Continuous bias tape wrapping of ablative components 06 p0885 A66-16288  
 Large diameter filament-wound structure fabrication and testing for deep submersibles 06 p0886 A66-16304  
 Stiffness properties of filament wound structures derived from idealization based on structural and geometric properties [AIAA PAPER 66-144] 06 p0962 A66-16409  
 Composite materials manufacture and application to high temperatures, with evaluation of various binders and filaments 06 p0898 A66-17110  
 Glass-resin interaction of filament-wound composites, determining material properties and application to high performance pressure vessels 11 p1783 A66-23121  
 Composite materials, noting fibrous composites using whiskers, fabrication including spray-up, filament winding, etc, mechanical properties, application for rocket nozzles, heat shields, etc 14 p2318 A66-27228  
 Stresses and strains in anisotropic multilayered thick walled circular cylinder subjected to radial pressure [AIAA PAPER 65-174] 14 p2402 A66-27869  
 Filament overwrapped metallic cylindrical pressure vessels show greater efficiency ratio and buckling strength 14 p2405 A66-27992  
 Tension string structure of high strength filaments for ultralightweight planetary entry vehicle 14 p2407 A66-28028  
 Stressed state of cylindrical shell made of coiled glass fibers 16 p2822 A66-31625  
 Change in tensile strength during winding of prestressed oriented glass fiber filaments 17 p2942 A66-32047  
 Wound fiber structures with reference to solid propellant motors, discussing optimum angle of winding 18 p3254 A66-34005  
 Theoretical determination of elastic constants, Youngs moduli and Poisson ratios of filament-wound cylinders, using strain measurements in longitudinal uniaxial loading and internal pressure loading 19 p3472 A66-35355  
 Burst hoop test and new ISAS ring test methods for rapid evaluation of hoop strength of filament-wound fiberglass reinforced plastic cylindrical specimens 19 p3472 A66-35356  
 In-plane stiffness matrices for composite cylinders of filament winding determined by internal pressure, axial tension and torsion tests 20 p3666 A66-37440  
 Radiographic examination of large filament-wound solid propellant motor cases 21 p3744 A66-39152  
 Equations for analysis of prestressed cylindrical shells made of fiberglass

reinforced plastics with hollow fibers, longitudinally and transversely wound 22 p3990 A66-40143  
 Wound glass-fiber material used in reinforced plastic construction for production of solid fuel heavy missiles 23 p4074 A66-41653

**FILIER**

 SA THIN FILM  
 Volt-ampere characteristics of variable Josephson current interaction with resonance oscillations in superconducting film tunnel structure 03 p0413 A66-13312  
 Mirrors composed of multilayer stacks of dielectric films and attaining high reflectance over extended spectral range 07 p1079 A66-17290  
 Simplified formulas relating parameters and geometry of film-type two-terminal RC networks with distributed parameters 12 p1830 A66-23736  
 Taylor stability of liquid film on body surface and flow stabilization relative to two-dimensional perturbations 12 p1863 A66-24434  
 Reflection measurements of RbI film in UV to observe optical property differences between films and single crystals 12 p1931 A66-24813  
 Design, performance and application of multicell luminous-symbol screen with optically coupled photosemiconductive and electroluminescent films 14 p2297 A66-28112  
 Determination of refractive index of polyethylene terephthalate film necessary in calculations of surface shape of film concentrators 20 p3603 A66-37738  
 Dynamic behavior of soap film stretched between two coaxial rings, assuming potential energy of this surface to be proportional to surface area 21 p3772 A66-39353

**FILM BOILING**  
 Disruption of thin liquid film flowing over heating surface, investigating boiling, evaporation and thermocapillary effects 01 p0165 A66-10906  
 Heat transfer to two-phase film-boiling nitrogen, discussing straight and swirl flow experimental apparatus [ASME PAPER 65-HT-37] 05 p0773 A66-14751  
 Transient quenching method of determining critical heat flux and transfer coefficients in film and nucleate boiling liquid metals, specifically magnesium [ASME PAPER 65-HT-49] 05 p0785 A66-14757  
 Slug flow and film boiling of hydrogen, deriving formula for forced convective film boiling heat flux [ASME PAPER 65-WA/HT-32] 05 p0793 A66-15673  
 Film boiling of saturated nitrogen flowing upward in vertical heated tube, noting annular-flow regime change to vapor matrix [ASME PAPER 65-WA/HT-26] 05 p0793 A66-15677  
 Thermal conditions in boiling liquids including container wall damage-flux density relationship, stable and unstable boiling in bubble evaporation region and film vaporization 07 p1154 A66-18066  
 Annular flow and two-dimensional forced convective boiling heat transfer to hydrogen in nucleate and film boiling regimes 08 p1316 A66-18832  
 Saturated film-boiling heat transfer coefficient measurements of ethanol, pentane and Freon 113 at atmospheric pressure [ASME PAPER 65-AV-37] 11 p1788 A66-22468  
 Thermionic energy-conversion diode using liquid metal as electron

oscillator 11 p1640 A66-23404  
 Free convection film boiling heat transfer from isothermal vertical plate to subcooled stagnant liquid, using two-phase boundary layer theory 12 p1980 A66-24907  
 Saturated and surface film boiling from horizontal isothermal plate in longitudinal flow field analysis, based on two-phase boundary layer theory, correlating heat transfer and skin friction characteristics 12 p1980 A66-24908  
 Mass evaporation rate and heat transfer coefficients for water drops supported by own superheated vapor over flat plate 16 p2830 A66-31680  
 Mass evaporation rate and heat transfer coefficients for water drops supported by own superheated vapor over flat plate 18 p3262 A66-34376  
 Data correlations on forced-convective heat transfer to cryogenic fluids by nucleate film and transition region boiling 20 p3677 A66-37098  
 Convective heat transfer to cryogenic nitrogen and methane from cylindrical surface by nucleate-and film-boiling at high pressures and large temperature differences 20 p3677 A66-37099  
 Heat transfer in liquid-film boiling on vertical surfaces analogous to free convection of gases in narrow vertical ducts 22 p4000 A66-408130

**FILM CONDENSATION**  
 Physical mechanisms of instabilities altering two-phase flow pattern of liquid film 01 p0165 A66-10906  
 Stoichiometric thin films of Al<sub>2</sub>S<sub>3</sub> prepared by coevaporation of elements onto glass substrates held at 550 degrees C 02 p0270 A66-11436  
 Condensation in variable acceleration fields especially linear variation occurring in constant cross section rotating thermosyphon [ASME PAPER 64-WA/GTP-2] 02 p0304 A66-11764  
 Heat transfer during film condensation of liquid metal vapor, discussing thermal resistance effect of condensation coefficient [ASME PAPER 65-HT-29] 05 p0784 A66-14748  
 RF sputtering for deposition of wide variety of thin films, discussing basic theory and apparatus 06 p0924 A66-16431  
 Active thin-film elements /diodes and transistors/, properties and deposition techniques 07 p1006 A66-17418  
 Monitoring techniques for thin film deposition in passive microcircuit networks 08 p1192 A66-18967  
 Heat transfer during film condensation of liquid metal vapor, discussing thermal resistance effect of condensation coefficient [ASME PAPER 65-HT-29] 11 p1784 A66-22182  
 Asymptotic series solution to problem of laminar film condensation on nonisothermal vertical plate, considering inertia and convection effects 12 p1978 A66-23998  
 Passive thin-film component materials vacuum evaporation and sputtering processes 13 p2039 A66-25645  
 Vacuum deposited films of titanium dioxide examined, using electron microscopy and diffraction methods, noting crystal dislocation due to electron beam irradiation 14 p2359 A66-27135  
 Metal film preparation by electron-beam melting of metal in water-cooled crucibles 16 p2661 A66-30698  
 Boron film characteristics and preparation by direct resistance heating of elemental boron filaments 16 p2778 A66-31074  
 Epitaxial growth techniques for silicon and germanium, discussing hydrogen reduction methods, doping and impurity control, etc 17 p2976 A66-32259  
 Laminar film condensation of vapor flow along flat plate and cylindrical surface 18 p3261 A66-34362  
 Integral solution of laminar film condensation with combined gravitational-type body force and forced convection concurrent and parallel to surface 20 p3678 A66-37118  
 Effect of donor Zn and Cd additions and acceptor Se and Te additions on rate of growth and morphology of epitaxial GaAs films grown from gas phase by chemical reaction 22 p3961 A66-39929

Microwave discharge technique for depositing noncrystalline oxide films of silicon, germanium, boron, titanium and selenium on substrates by decomposing compounds by oxygen 23 p4109 A66-41129  
 Electric resistance of amorphous iron films, noting film structure dependence on evaporation parameters 23 p4110 A66-41138  
 Recrystallization of evaporated CdS layers in environment containing various elements, obtaining oxygen enhanced crystal growth 24 p4253 A66-42356  
 Mechanical system for monitored deposition of sequential thin films on any one of five substrates from any of five independent sources and through any of five masks 24 p4218 A66-43216

# FILM COOLING

Localized calorimetric enthalpy measurements in high-energy-content gas stream using evaporating liquid film to cool gas sample 01 p0165 A66-10908  
 Effect of various factors in film-cooling phenomena obtained by vertically injecting air into turbulent boundary layer on flat plate 02 p0303 A66-11586  
 Crystallites of CdS in obliquely evaporated film on relative intensity of X-ray diffraction peaks 05 p0736 A66-14975  
 High strain sensitivity in CdS evaporated films, noting effects of tension and/or compression on film resistance 05 p0736 A66-14977  
 Cooling effect of secondary fluid injection on heat transfer between shrouded rotating disk and radially inward main flow stream [ASME PAPER 65-WA/HT-20] 05 p0789 A66-15644  
 Cooling effect of secondary fluid injection on heat transfer between shrouded rotating disk and radially inward main flow stream [ASME PAPER 65-WA/HT-20] 11 p1785 A66-22194  
 Reverse-flow film cooling of small rocket engine chamber 12 p1937 A66-24718  
 Electric machines employing evaporative and universal cooling systems for aircraft use 13 p2041 A66-25902  
 Gas film for protective cooling of surface having regular macroroughness 14 p2410 A66-26783  
 Film cooling in supersonic free stream flowing along flat plate in Mach 3 wind tunnel, using air as secondary fluid 17 p2839 A66-32441  
 Gas-film-cooled nozzle extension application to large rocket engines, discussing operational parameters, advantages, etc [SAE PAPER 660455] 17 p2991 A66-33163  
 Mach 16 hot shot wind tunnel testing of film cooling techniques 17 p3039 A66-33482  
 Liquid film cooling of small diameter throat tubes 18 p3263 A66-34385  
 Liquid film cooling by dual slot injection, determining film coolant injection rate and effects of two different mainstream Reynolds numbers 24 p4295 A66-42787

FILM THICKNESS  
 Thin metal film growth under applied electric field 01 p0118 A66-10246  
 Zero-bias capacitance of thin intrinsic semiconductor film sandwiched between identical electron-injecting contacts compared with value for noninjecting contacts 02 p0270 A66-11437  
 Transition temperature dependence on thickness of superimposed films of iron and tin 03 p0407 A66-12323  
 Boundary layer thickness responsible for anomalous lattice distortions of colloidal barium titanate 04 p0571 A66-14492  
 Monolithic silicon integrated circuit technology noting thin film, insulating and conducting layers, microelectronics, MOS systems, etc 05 p0642 A66-14559  
 Helium II film free-convection heat transfer, discussing mathematical analysis for vertical flat plate and horizontal circular cylinder [ASME PAPER 65-WA/HT-10] 05 p0791 A66-15652  
 Film thickness measurements on printed circuit-board material plated with gold over copper, using X-ray emission and absorption and beta ray backscatter test methods 06 p0886 A66-16429  
 Distribution function of semiconductor

minority current carriers in presence of pronounced spatial inhomogeneity occurring in intensively absorbing films with intensive surface recombination 07 p1099 A66-17873  
 Thermal elastohydrodynamic lubrication of rolling and sliding cylinders, noting correlation with film thickness and friction experimental data [ASLE PREPRINT 65AM 4A2] 07 p1040 A66-18291  
 Lubricant film thickness in elastohydrodynamic range measured as function of speed in rolling configuration for mineral oils and esters 07 p1040 A66-18292  
 Imperfection formation in epitaxial gold films, observing crystal-lattice dislocations due to rotation and displacement misfits between neighboring islands of deposit film 07 p1110 A66-18517  
 Effect of voltage and film thickness on sputtered tantalum film resistivity when used as microcircuits 09 p1411 A66-19941  
 Tunnel effect measurements of superimposed aluminum and lead films used to determine effect of normal metal on superconductor 10 p1573 A66-21179  
 Variation in coercivity of magnetization loops of multilayer films of nickel as function of rate of rise in applied magnetic field 10 p1575 A66-21412  
 Superconducting continuous film store evaluated, noting switching thresholds and functional dependence of disturb pulse sequences on film parameters 10 p1509 A66-21416  
 Strength and structure of thin films of Al, Ag, Ge and Ni studied with electron microscope and electron diffraction technique 10 p1578 A66-21663  
 Thickness of laminar liquid film draining from vertical surface analytically determined by assuming evaporation rate is known constant [ASME PAPER 65-HT-39] 11 p1785 A66-22189  
 Domain structure of single-crystal epitaxial iron films as function of perfection of crystalline structure, using Lorentzian electron microscopy, noting two-axis anisotropy 11 p1753 A66-22806  
 Multifilm absorption spectrum dependence on magnetic interaction, deposition, thickness and quality of ferromagnetic and insulating films 11 p1753 A66-22810  
 Ferromagnetic multifilm systems effect on SHF power transmission and variation of resonator parameter 11 p1754 A66-22811  
 Anisotropy of films deposited on cylindrical substrate 11 p1754 A66-22812  
 Ferromagnetic resonance in thin magnetic permalloy films, examining laws governing spin-wave spectrum for parallel orientation of magnetic field 11 p1755 A66-22822  
 Formation of oxide films on metals using polarized light to measure film thickness and vibrating capacitor measurements of changes in Volta potential, noting extension of Mott theory 11 p1718 A66-23211  
 Parabolic growth deviations in thermal oxidation of silicon 11 p1758 A66-23351  
 Microstructure of epitaxial germanium films deposited on calcium fluoride substrates, noting parameters of deposition 13 p2158 A66-25063  
 Magnetoresistance effect applied to Rotatable Initial Susceptibility II films, explaining resulting hysteresis loops and torque curves 13 p2161 A66-25183  
 Approximate solution of micromagnetic equations for Neel-type domain wall in multiple films 14 p2351 A66-26887  
 Magnetic properties of vacuum deposited iron nickel films 14 p2354 A66-26908  
 Hall coefficient and mobility in thin evaporated gold films on glass substrates 15 p2563 A66-28733  
 Spherical substrate converted to parabolic mirror by selective evaporation of aluminum, using silver as nonuniform thickness layer 15 p2499 A66-28841  
 Electric characteristics of epitaxial Ge films vacuum deposited on seminsulating GaAs substrates with thicknesses near one million angstroms 15 p2566 A66-29386  
 Effects of angular dispersion of anisotropy and film thickness on thin permalloy ferromagnetic film pulse switching 16 p2773 A66-30682

Technology, preparation and properties of multilayer ferromagnetic films, including influence of composition and deposition conditions on coercive force values, shape of hysteresis loops, etc 16 p2773 A66-30688  
 Domain structure and hysteresis loops of thin iron-gadolinium films of different thicknesses 16 p2775 A66-30699  
 Thickness of gold, silver and copper thin films determined, using measurements of resistance and Hall voltage 16 p2780 A66-31096  
 Variation in photoelectric output of thin metal layers calculated as function of thickness, determining output for two light polarizations 16 p2780 A66-31211  
 Temperature effect on color of thin layers of gold of various thicknesses connected with anomalous absorption phenomenon in gold layers 16 p2780 A66-31212  
 Device for controlling thickness of thin films prepared by sputtering in vacuum 16 p2708 A66-31362  
 Oxide film thickness effect on field effect silicon, noting concentration of surface electron states 16 p2787 A66-31735  
 Superconductivity of nondegenerate semiconductor thin films, dependence on current carrier concentration, impurity level positions and film thickness 16 p2787 A66-31762  
 Mechanical properties of Ag, Al, Ge, Cu, Ni and Fe thin films, showing elastic deformation and strength greater in thinner films 17 p2939 A66-31971  
 Thick film techniques, discussing applications, limitations, passive elements and design characteristics of cermet element 17 p2882 A66-32107  
 Recrystallization of Ge and Si thin films and structural changes due to electron bombardment and thermal annealing 17 p2988 A66-33456  
 LF common-base current transfer ratio for hot electron transport in semiconductor-metal-semiconductor point-contact-transistor structures measured as function of metal film thickness and temperature 19 p3435 A66-35410  
 Optical absorption of island films of gold as function of island density obtained from electron micrographs and film thickness 19 p3435 A66-35416  
 Oxide films grown on GaAs in oxygen plasma 19 p3437 A66-35435  
 Critical temperatures and critical magnetic fields determined for superposed normal and superconducting films, noting dependence on metal thickness 19 p3443 A66-36003  
 Integrated circuits, examining thin film evolution, noting advantages of size reduction, reliability and functional value 19 p3322 A66-36817  
 Normal incidence reflectivity and transmissivity coefficient measurements in Ge thin epitaxial films 20 p3623 A66-38397  
 Resistance decrease in vacuum-evaporated gold films from 150 to 250 degrees C when environment is cycled from inert to oxidizing 21 p3802 A66-39161  
 Change in temperature conditions during growth of epitaxial germanium films from molecular beam in vacuum 22 p3961 A66-39928  
 Elastoresistance effects in evaporated bismuth films, deposited on glass and epoxy resin substrates, used as strain gauges and transducers 22 p3962 A66-40046  
 Optical thickness measurement of nonabsorbing dielectric film when it is inconvenient to apply overlay film to measure thickness by Fizeau fringe shift 22 p3968 A66-40889  
 Cs-Sb film thickness measurement method in various compositions and relation between thickness and composition 24 p4251 A66-42301  
 Optical constants of triple, symmetrical and absorbing thin film used with layer thickness to determine complex transmission factor 24 p4258 A66-42994  
 Transition temperature for superconductivity in superimposed films of silver and tin in which alloying between two metals is minimized 24 p4259 A66-43068  
 Evaporation system for fabrication of multilayer dielectric films for mirrors or

filters, obtaining thickness variation reduction and simultaneous deposition 24 p4218 A66-43163

Rain effect on satellite communications Earth terminal rigid radomes, determining transmission loss and water film thickness 24 p4192 A66-43195

RC circuit filter properties during operation under complex load in form of parallel connection of resistance and capacitance 01 p0036 A66-10224

Exhaust beam from colloid thruster investigated, using quadrupole mass filter [AIAA PAPER 64-674] 02 p0278 A66-11549

Load resistance effect on selectivity of notch filters using hyperbolically shaped RC lines 02 p0200 A66-11876

Nomograph filter networks for control of electromagnetic interference, noting loss characteristics of element filters 03 p0341 A66-12571

RC circuit resistance effect on characteristics of selective filters consisting of semiconductor or thin film RC circuit with range multiplier and distributed parameters 04 p0496 A66-13908

Two sufficient conditions for monotonic variation of signal to noise ratio of optimal filter during storage of video pulse 04 p0484 A66-14058

Design of microwave filters 06 p0844 A66-16079

Degradation of matched filter receiver operating in non-Gaussian noise, considering performance in presence of ideal impulse noise 06 p0856 A66-16864

Optimum filters for signal detection in clutter 08 p1190 A66-18716

Optimization of transmitted signal and receiving filter for data transmission system with fixed channel and detection process 08 p1183 A66-18932

Acquisition behavior of phase-locked loops analyzed by treating loop as first-order loop with slowly varying dependent bias 12 p1856 A66-24648

Torsional-coupler mechanical filters, particularly types with higher harmonic suppression and piezoelectric material, utilized with simple structure 12 p1845 A66-24852

Pulse forming networks whose step responses have ripples of equal height 13 p2029 A66-25205

Book on electric network theory, functions and filters 14 p2263 A66-26960

Characteristic admittances of comb-type and undulating waveguide filters, considering diaphragm thickness and TE propagation mode 14 p2250 A66-27147

Pulse shape formed during discharge of chain-type artificial line 14 p2251 A66-27171

Two active parallel-T circuit variations of RC networks in filter design 14 p2264 A66-27458

Waveguide system using Chebyshev filters for channel separation in wide frequency ranges, applied for sounding plasmas with various electron concentrations 14 p2298 A66-28473

Filter design minimizing maximum value of estimation error over all admissible signal waveforms 15 p2474 A66-29380

Bit error rate improvement without source coding, using matched filters 16 p2659 A66-30548

Tolerance limits for structural components in power-filter circuit design, calculating fluctuations of damping property and phase fluctuations in multiply divided circuits 16 p2663 A66-31031

RC circuit filter properties during operation under complex load in form of parallel connection of resistance and capacitance 17 p2880 A66-31908

Two sufficient conditions for monotonic variation of signal to noise ratio of optimal filter during storage of video pulse 17 p2873 A66-32224

Quality of digital smoothing filters with finite transient time improved by rational choice of delay 17 p2878 A66-33491

Modulators with constant input resistance applied to FDM communications systems for simplification or elimination of filters 18 p3066 A66-33565

Use of balanced filter pairs for nondispersive analysis of aluminum and silicon in aluminum-silicon mixtures 18 p3063 A66-33693

Coupling of resonators in electromechanical filter, noting application of energy trapping in piezoelectric resonators 18 p3078 A66-34090

Inductorless filters, noting increased sensitivity of RC active networks to component tolerances 18 p3078 A66-34092

Inertial navigation technique based on least squares criteria of optimality with filter providing estimates of system errors 19 p3396 A66-35517

Nonlinear filtering theory based on invariant imbedding for orbit determination and adaptive control problems 19 p3303 A66-36244

RC circuit resistance effect on characteristics of selective filters consisting of semiconductor or thin film RC circuit with range multiplier and distributed parameters 20 p3532 A66-37866

Flight tests on aircraft and analysis by automatic filter, noting structural and aerodynamic problems resulting from use of transient method 21 p3824 A66-38574

Optimum filtering when signals and noises are incoming on different channels, defining filtering by rectangular matrix of filters 21 p3711 A66-39149

Mechanical-type filters used in electronic circuits including quartz filters, piezoelectric materials, metallic resonators, ceramic converters, torsion resonators and miniaturized filters 21 p3717 A66-39628

Digital filtering system comprising only few integrated circuits and using addressshift register combination, compared with analog devices 23 p4067 A66-41168

HF transmitter multicoupler for connecting several transmitters to single antenna 23 p4046 A66-41548

Signal and filter waveshape deviations for binary correlator receivers, noting degradation in performance of matched filter systems 23 p4040 A66-41592

Integral equations for weight function of optimum filter and correlation function of random absolute error 24 p4188 A66-42475

**FILTRATION**

Statistical description of signal filtration 13 p2045 A66-25295

Solution of optimum filtering problems when input signals of automatic control system are described by different differential equations at successive time intervals 14 p2265 A66-27523

Filter cake growth and filtration rate on circular leaf in three dimensions, noting Lucite-sugar water runs 15 p2480 A66-29671

**FIN**

SA COOLING FIN

Temperature distribution along thin fins with temperature-dependent thermal properties and internal heat generation [ASME PAPER 65-WA/HT-50] 05 p0791 A66-15657

Dimensioning heat transfer in compact plate fin heat exchangers under nonuniform temperature variation and heat conductance 12 p1978 A66-24034

Heat dissipated inside compartments by internal structural members on high speed aircraft 14 p2414 A66-28188

**FINE STRUCTURE**

Semiconductor excitation-level splitting for

shallow impurity state due to spin orbital shifts 04 p0565 A66-14260

Interpretation of Evershed effect by material streaming in penumbral fine structure 05 p0758 A66-14774

Fine structure of cut-off characteristic, particularly influence of emission current density in crossed-field thermionic converter 05 p0616 A66-15541

Fine structure of vibrational-rotational spectrum of difluoroborane and difluoroborane-d 08 p1178 A66-18932

Interference of fine-structure levels in hydrogen ions passing through two successive carbon foils 11 p1740 A66-22961

Pressure effects of argon on fine structure components of first two members of cesium principal series 13 p2135 A66-26263

Pressure effects of helium on fine structure components of first two members of cesium principal series, noting changes in shift curves 13 p2135 A66-26263

Angular distribution of outgoing gamma radiation associated with giant dipole resonance in Si super 28 nucleus 16 p2750 A66-30149

EAS core fine structure observations using spark chamber compared with response of plastic scintillation counter 18 p3207 A66-35102

Fine and hyperfine structure of term in 3p level of lithium studied by level-crossing spectroscopy technique, determining fine structure separation value 19 p3443 A66-35981

Fine structure in direct absorption edge of cleaved type IIA diamond determined from reflectance data obtained from 5.5 to 11.5 eV at room and liquid-nitrogen temperatures 20 p3622 A66-38246

Precise measurement of excited-state lifetimes for radiative and collision-induced relaxation in fine structure levels of atomic neon, noting optical transitions 23 p4098 A66-41361

Stark splitting effect on fine structure level probabilities for hydrogen lines, taking account of spontaneous transition probabilities and Lamb shift 23 p4098 A66-41361

**FINISH**

SA COATING

SA MACHINING

SA PAINT

SA PLATING

SA SURFACE FINISH

Precleaning treatment and coating effect on fatigue strengths of aluminum alloys 15 p2521 A66-29079

Chemical blanking and vibratory tumbling of Mo alloys 19 p3370 A66-36134

**FINITE DIFFERENCE METHOD**

Finite difference method solving Dirichlet problem for quasi-linear elliptic equation with results applied to calculation of magnetic field in nonlinear media 01 p0091 A66-10164

Error estimates for some finite difference methods of solving ordinary linear differential equations 01 p0092 A66-10311

Random error in finite difference approximation of stochastic nonlinear equations in theory of random signals and noise 01 p0093 A66-10384

Error in finite difference solution of diffusion equation with impulsive end condition 01 p0093 A66-10384

Simplified leading-edge flow boundary value problem of Bhatnager-Gross-Krook equation solved by finite difference method 01 p0058 A66-10634

Error estimate in obtaining eigenvalues of linear self-adjoint differential operator of elliptical type by finite difference method 01 p0095 A66-11009

Economical difference scheme of continuous computation for numerical solution to Stefan problem having multiple spatial dimensional variables and phases 01 p0166 A66-11004

Difference method with smoothing of coefficients for numerical solution of Stefan problem with multidimensional phase fronts and any number of independent variables 01 p0166 A66-11011

Nonlinear difference schemes for hyperbolic equation applied to solution of one-and multidimensional transport and

quasi-linear equations 01 p0095 A66-11013  
 Temperature difference method of  
 computing convective heat transfer, using  
 flat plate laminar boundary layer  
 equations 02 p0303 A66-11569  
 Transient analysis of matrix equations of  
 complex structural system, using finite  
 difference method 03 p0437 A66-12815  
 Nonlinear inverse heat conduction problem  
 solved by finite difference method, using  
 least squares and future temperatures  
 [ASME PAPER 65-HT-40] 05 p0784 A66-14753  
 Finite-difference equations derived and  
 applied at or near flexural discontinuities in  
 plates subjected to bending 05 p0774 A66-15063  
 Asymptotic error estimates in solving  
 elliptic equations of fourth order by method  
 of finite differences 05 p0710 A66-15477  
 Conversion of gravity reduction problem  
 into internal boundary value problem which  
 is solved by finite difference  
 methods 06 p0876 A66-16416  
 Numerical attempts to estimate  
 determination accuracy of finite difference  
 method for geopotential field 06 p0905 A66-16551  
 Digital and numerical method solution of  
 transient heat flow problems 07 p1150 A66-17577  
 Exact numerical solution of time-dependent  
 compressible Navier-Stokes equations  
 describing transient compressible viscous  
 heat-conducting flow [AIAA PAPER 66-30] 08 p1207 A66-18986  
 Exact frequency solution for steady state  
 wave propagation for plane strain vibrations  
 of composite hollow cylinders 08 p1310 A66-19162  
 Natural frequencies and node patterns for  
 clamped and simply supported square plates  
 of linearly variable thickness solved by  
 finite-difference approximation, using  
 pulsed-air vibrator 11 p1780 A66-22329  
 Modified Elliassen finite difference grid  
 solution of primitive hydrostatic equations  
 system for barotropic and baroclinic model  
 of atmosphere 11 p1730 A66-22946  
 Convergence of solutions of finite-  
 difference analogs of equation satisfied by  
 generalized axially symmetric  
 potential 11 p1723 A66-22986  
 Numerical dynamic predictor for control  
 systems disturbed by random noise,  
 discussing Fokker-Planck equation, Crank-  
 Nicolson difference model, etc 11 p1680 A66-23279  
 Finite-difference scheme for short-term  
 operational weather forecasts from two-level  
 model atmosphere equations 12 p1909 A66-24870  
 Equations describing motion of barotropic  
 fluid with free surface solved, using finite  
 difference methods based on two-step Lax-  
 Wendroff scheme 13 p2121 A66-25814  
 Finite difference equations for two-  
 dimensional rod-lattice structures 13 p2199 A66-26379  
 Net-point method determination of two  
 finite-difference systems for systems of  
 Navier-Stokes equations 13 p2066 A66-26504  
 Finite-difference method for computing  
 transient velocity profiles in laminar  
 boundary layer around two-dimensional  
 cylinder, noting Blasius flow oscillations 14 p2274 A66-27434  
 State-space analysis of discretely controlled  
 systems with finite delays 14 p2266 A66-27589  
 Finite difference solution of nonlinear  
 boundary value problem of Landau-Vlasov  
 equation for charged particle for Maxwellian  
 distribution function 14 p2344 A66-27625  
 Calculus of functional differences  
 particularly for case of exponential  
 function 14 p2323 A66-27778  
 Finite difference method solution of  
 parabolic and hyperbolic partial differential  
 equations in one space variable 14 p2324 A66-28146  
 Numerical attempts to estimate  
 determination accuracy of finite difference  
 method for geopotential field 14 p2327 A66-28223  
 Ideal gas flow past infinite circular cone at  
 angle of attack, noting finite-difference  
 method for self-similar solution of Prandtl  
 boundary layer equation 14 p2222 A66-28283

Solution of plane problem of physically  
 nonlinear bodies by method of finite  
 differences 15 p2608 A66-28772  
 Finite difference method for elliptic  
 systems of partial differential equations  
 subjected to natural boundary conditions  
 /generalized Neumann problems/ 16 p2731 A66-30234  
 Convergence of discrete analogs of  
 Dirichlet problems for Poisson equation in  
 two dimensions, describing finite difference  
 method for producing algorithms 16 p2731 A66-30235  
 Multidimensional generalized transport  
 equations solutions and calculation by  
 difference methods 16 p2732 A66-30240  
 Laminar viscous wake interaction with  
 supersonic external inviscid flow  
 downstream treated by implicit finite  
 difference method [AIAA PAPER 66-454] 16 p2689 A66-31468  
 General numerical method of  
 characteristics for three-dimensional  
 unsteady magnetofluid dynamics of multi-  
 component medium 16 p2690 A66-31653  
 Unified treatment of nonlinear partial  
 differential equations, considering solution  
 technique in engineering application 16 p2739 A66-31740  
 Finite difference estimation of boundary  
 value problem errors 17 p2945 A66-31878  
 Acoustic problems formulated and solved  
 by finite element method of variational  
 calculus, using both force and displacement  
 procedures 17 p2957 A66-31945  
 Vibration analysis of static plates and  
 shells by finite element method 17 p3019 A66-31950  
 Finite element method using stability  
 coefficient matrices in conjunction with  
 stiffness matrices for problem of stability of  
 plates 17 p3024 A66-32360  
 Longitudinal and circumferential inertial  
 effects on dynamic response of cylindrical  
 shell to time-varying loads 17 p3025 A66-32470  
 Finite-difference calculation of MHD flow  
 of conducting fluid past circular cylinder in  
 transverse magnetic field based on Navier-  
 Stokes equation 17 p2971 A66-32862  
 Finite difference method for uniform  
 nonpermanent laminar flow of non-  
 Newtonian fluids between plane, parallel  
 fixed walls, for case of variable pressure  
 gradients 17 p2911 A66-32951  
 Implicit finite difference method applied  
 to plane hypersonic flow over blunt circular  
 cylinder 17 p2842 A66-33170  
 Noniterative finite-difference method for  
 solution of Poisson and Laplace equations  
 for linear boundary conditions, discussing  
 slow viscous flow results [ASME PAPER 66-FE-1] 17 p2914 A66-33258  
 Finite difference method for shock wave  
 propagation into supersonic crossflow 17 p2916 A66-33479  
 Conservation equations for two-dimensional  
 axisymmetric simultaneous turbulent mixing  
 and supersonic combustion of hydrogen-  
 oxygen-nitrogen-water streams solved by  
 finite difference methods [AIAA PAPER 66-617] 18 p3099 A66-34219  
 Multiple rocket engine exhaust plumes  
 calculated by method of characteristics and  
 finite difference and compared with  
 schlieren data [AIAA PAPER 66-651] 18 p3264 A66-34448  
 Numerical integration of primitive  
 equations by simulated backward difference  
 method, using two-step iteration for  
 divergent barotropic model of  
 atmosphere 19 p3393 A66-36057  
 Numerical integration scheme for  
 oscillatory equations with second-order  
 accuracy and sharp cut-off for high  
 frequencies 19 p3389 A66-36058  
 Finite difference method approach to  
 discontinuity in parabolic equations for  
 shear laminar boundary layer flow of  
 injected gas past wall 19 p3342 A66-36477  
 Functional polynomial fitting of continuous  
 functional, using Laplace transforms to  
 reduce number of measured records for  
 identifying kernels of second-degree  
 approximation 19 p3391 A66-36703  
 Error estimates for difference methods in  
 forced vibration problems 20 p3589 A66-36901  
 Modified Elliassen finite difference grid

solution of primitive hydrostatic equations  
 system for barotropic and baroclinic model  
 of atmosphere 20 p3593 A66-37859  
 Optimization of efficiency of gas turbine  
 cycles with heat recovery by finite  
 difference method using digital  
 computer 21 p3807 A66-38805  
 RC network model applied to study of  
 transient response of semiconductor diode,  
 obtaining accuracy estimates for finite-  
 difference representation of one-dimensional  
 diffusion equation 21 p3713 A66-39298  
 Finite difference analysis of viscous  
 laminar converging flow in conical tubes,  
 assuming parabolic inlet velocity profile and  
 simplified motion equation 21 p3729 A66-39450  
 Relativistic electron layer formation by  
 injecting electrons into cylindrical region of  
 Astron, using difference methods in  
 integrating Vlasov-Maxwell  
 equations 21 p3793 A66-39470  
 Eulerian finite difference method for  
 solving time-dependent equations of motion  
 for compressible fluid flow, noting shock  
 wave diffraction, supersonic blunt body  
 interaction with shock wave, etc 21 p3730 A66-39472  
 Communication network response to  
 arbitrary transients calculated by digital  
 computer, permitting replacement of  
 analytic-function wave forms by lists of  
 equi-interval sample values 22 p3883 A66-39724  
 Eigenvalue problem for Laplace operator  
 for two-dimensional region with boundary  
 composed of piecewise-analytical simple  
 closed curves solved by finite difference  
 method 22 p3938 A66-39901  
 Heat equation solution by use of Crandall  
 optimum finite difference method with  
 boundary discontinuity 22 p3997 A66-40029  
 Finite-difference scheme for short-term  
 operational weather forecasts from two-level  
 model atmosphere equations 22 p3943 A66-40331  
 Compressible turbulent boundary layer on  
 flat plate, noting correspondence between  
 compressible and incompressible flow,  
 numerical results on skin friction and heat  
 transfer, etc 22 p3899 A66-40344  
 Pseudoviscosity method using finite  
 difference equations for calculating two-  
 dimensional flow fields for supersonic  
 motion of inviscid gas 22 p3901 A66-40494  
 Finite difference method solution of  
 Navier-Stokes equations and applicability to  
 cylindrical-channel viscous flow at small  
 Reynolds numbers 23 p4062 A66-42061  
 Net point method determination of two  
 finite difference systems for systems of  
 Navier-Stokes equations 24 p4195 A66-42724  
**FINITE-STATE MACHINE**  
 Moore and Mealy diagrams in analysis and  
 synthesis of finite automations 03 p0337 A66-12376  
 Algorithm used for synthesis of regular  
 events in asynchronous automatic  
 machines 07 p1014 A66-17437  
 Automata theory and control theory  
 analytically compared for general and linear  
 systems and tolerance automata 11 p1680 A66-23275  
 Probabilistic automata as generalization of  
 deterministic and nondeterministic finite  
 model, theorems and concept of  
 definiteness 12 p1853 A66-24338  
 Reliability of finite automata determined  
 from analysis of elements capable of  
 misalignment, input errors and structural  
 design 16 p2669 A66-30761  
**FINLAND**  
 Finnish space research program in 1965,  
 outlining optical satellite tracking  
 experiments by various  
 observatories 15 p2600 A66-29906  
**FINNED BODY**  
 Optimization of fin geometry to maximize  
 free-convection heat transfer in air at  
 atmospheric pressure [ASME PAPER 65-HT-12] 05 p0783 A66-14738  
 Deformation of finned conical shell under  
 axial load 15 p2608 A66-28781  
 Effect of compression of outer layers of  
 plate by longitudinal forces on reduced  
 shear moduli of finned  
 filler 16 p2816 A66-31046

## FIRE

Determining whether aircraft was on fire before crash by examination of wreckage fragments 09 p1329 A66-20241

## FIRE CONTROL

NASARR international program concerning F-15 fire-control systems for F-104 Starfighter [AIAA PAPER 65-777] 03 p0447 A66-13066  
Physiological stress and fatigue in aerial missions for forest fire control, noting in-flight and postflight exercise heart rate 12 p1810 A66-25009

## FIRE EXTINGUISHER

Chemical inhibition of pentaborane-oxygen reaction in development of improved fire protection systems 03 p0413 A66-12487  
Productivity and cost comparison of water-bomb forest fire fighting aircraft 07 p0989 A66-18051

## FIRE PREVENTION

Comparison of rheological properties and fire resistance of hydraulic fluids for aerospace vehicles [ASLE PREPRINT 65-LC-6] 02 p0249 A66-12257  
Fire resistant hydraulic fluids for commercial and military application including siloxanes, silicones, esters and superrefined mineral oil [ASME PAPER 64-WA/LUB-14] 10 p1547 A66-21171

Comparison of rheological properties and fire resistance of hydraulic fluids for aerospace vehicles [ASLE PREPRINT 65-LC-6] 12 p1901 A66-24991

Electronic hydrogen leak and fire detector systems installed on Saturn S-IVB static test firing stands, discussing installation and operational problems 20 p3557 A66-37216  
Prevention and control of Ti machining fires 21 p3744 A66-39198  
Synthetic fire-resistant hydraulic fluids based on phosphate esters must be provided with continuous removal of dissociation products for constant regeneration and protection of unaltered fluid from accelerated decomposition 24 p4229 A66-42509

## FIREBRIGADE PROCEDURE

Semiautomatic digital data processing system used in ground control of interceptor aircraft, noting track marking on PPI display, control of height radar, radio message transmission, etc 14 p2271 A66-28299

## FIRING

SA DETONATION  
SA ROCKET FIRING  
SA STATIC FIRING  
SA TEST FIRING  
Varying deposition and firing conditions effect on range of detection of chemically deposited lead sulfide IR detector cells 03 p0407 A66-12332  
Doping and firing atmosphere effects on electric resistivity of polycrystalline barium titanate, noting oxidation of small grain and positive temperature coefficient effect on large grain 17 p2978 A66-32404

## FIRST ORDER EQUATION

SA REYNOLDS EQUATION  
Global solutions of Cauchy problem for quasi-linear first-order differential equations in several space variables 11 p1722 A66-22895  
Cauchy problem of first-order nonlinear partial differential equations 13 p2121 A66-26503  
Canonical form for two-terminal nonlinear RLC network first-order ordinary differential equations 15 p2472 A66-29371  
Graphical analysis of extremal control system stepwise adapted to process with extremal characteristic located between two first-order linear operators 19 p3324 A66-35582  
Optimum Runge-Kutta methods of orders 2, 3 and 4 for first-order differential equation with constrained minimum truncation error bounds 19 p3392 A66-36781  
Runge-Kutta fourth-order method for solution of N simultaneous first-order differential equations economically evaluated 19 p3392 A66-36782  
Existence of unique periodic solution to first-order differential equation and nonautonomous system of two first-order differential equations 20 p3591 A66-37752

Comparison variables transformation of linearized perturbation initial value problems for nonlinear ordinary first-order differential equation 21 p3756 A66-38817  
Cauchy problem of first-order nonlinear partial differential equations 22 p3939 A66-40439  
Stability of solution obtained in first approximation, introducing concept of quantity gamma for n-dimensional systems 24 p4230 A66-42216  
Numerical solution of linear boundary value problems 24 p4233 A66-43201

## FISH

Relative specific energy capabilities of fish and birds and body structure relative to environment 01 p0017 A66-10200  
Simulated fish propulsion analysis of boundary layer transition and vortex chain shedding 13 p2071 A66-26725  
Biological effects of confining fish in sealed aquarium with and without Chlorella 15 p2440 A66-29504

## FISSION

Systematics of fission based on exponential mass formula, discussing neutron capture 02 p0263 A66-11835  
Fission method to study uranium distribution in natural minerals 09 p1460 A66-20963  
Liquid water and nitrogen drops vibrating in natural frequencies above hot plate on vapor cushion analyzed by photographic techniques and used to simulate atomic nuclei fission 18 p3262 A66-34377

## FISSION PRODUCT

In-pile pumping system tested on thermionic converter SIRENE 56 for gaseous fission products 05 p0619 A66-15565  
Plasma generation by fission fragment ionization of noble gases, discussing theory, ionization tube and data 10 p1564 A66-21545  
Lens technique for measuring yield and energy spectrum of secondary electrons generated by fission fragments through metal foil 12 p1916 A66-23704  
Pressure wave generation in fissioning gas, examining amplification of pressure pulse with helium 3 as driver 15 p2555 A66-29756  
Delayed energy produced by fission product decay when restart of nuclear rocket engine is required, noting effects of cooldown requirements [AIAA PAPER 66-551] 22 p3946 A66-39676

## FITNESS

S FLIGHT FITNESS  
S PHYSICAL FITNESS

## FITTING

SA FASTENER  
DATAN, curve fitting process to approximate data and elimination of problems for programming engineer by data analysis 13 p2028 A66-26325

## FIXED FREQUENCY TOPSIDE SOUNDER

## S TOPSIDE PROGRAM

## FIXED POINT

Book on motion theory of several coupled rigid bodies about fixed point, particularly gyroscope and gyrost at Cardan suspension 06 p0910 A66-17067  
Uniform structure for Lipschitz condition on functions between sets, extensions to nonmetric spaces and fixed point theorem for uniform spaces 07 p1059 A66-17969  
Proof of theorem, let  $X$ ,  $T$ ,  $\pi$  be transformation group, where  $X$  is Peano continuum with end point fixed under  $T$  10 p1551 A66-21927

## FIXED-WING AIRCRAFT

Propeller control at low airspeed on turboprop engines in any fixed-wing aircraft, with special reference to thrust or drag in approach and landing [AIAA PAPER 65-709] 01 p0013 A66-10946  
British and French VTOL landing gear design, describing unique Scone fixed-wing VTOL aircraft 08 p1167 A66-18627  
Propeller control at low airspeed on turboprop engines in any fixed-wing aircraft, with special reference to thrust or drag in approach and landing [AIAA PAPER 65-709] 09 p1329 A66-20242

## FLAME

SA CHAPMAN-JOUGET FLAME  
SA COMBUSTION  
SA DIFFUSION FLAME  
SA FLARE

## SA JET FLAME

## SA LAMINAR FLAME

## SA PREMIXED FLAME

Weightlessness effect on flame ignition, burning rate, self-extinguishment, etc 16 p2825 A66-30487  
Emission of Auer-Weisbach mixture in flames 16 p2827 A66-30852  
Heat transfer rates and two-color temperature measurements for propane-oxygen flame seeded with aluminum powder [WSCI 66-2] 18 p3264 A66-34422  
Hydroxyl radical concentration in rarefied CO flame by EPR method 18 p3265 A66-34551

## FLAME FRONT

Droplet combustion fronts in hydrazine-nitrogen tetroxide system determined from kinetics of vapor decomposition, noting two-flame front model [CI PAPER WSCI-65-21] 05 p0743 A66-15146  
Flame generation of pressure waves and wave-combustion front interactions in detonation processes treated by nonsteady gas dynamics 07 p1155 A66-18118  
Longitudinal electric field effect on redistribution of emitting particles in combustion front of plane methane-air flame 17 p2870 A66-32828  
Transfer process effect on stability of plane flame front, deriving revised, approximate solution for large finite Reynolds numbers 19 p3479 A66-36828  
Gas flow formation ahead of flame front in circular and rectangular shock tubes analyzed, based on high speed photographs and method of characteristics 21 p3836 A66-39097

## FLAME INTERACTION

Rarefied hydrogen flame interaction between hydrogen atoms and molecules of certain organic, aliphatic and cyclic compounds 01 p0161 A66-10414  
Shock wave/flame front interaction in cylindrical chamber 14 p2412 A66-27438  
Mean probability of coupling between electrons of flame on electronegative gas and radioactive bromium tracer injected into flame, calculating electrons coupling cross section on bromium atoms 16 p2763 A66-31208

## FLAME IONIZATION

Microwave molecular resonance and bremsstrahlung continuum from flames measured with maser radiometer at various pressures [AIAA PAPER 65-106] 05 p0793 A66-15780  
Flame as source of emission of visible UV and IR radiation and ionization source for certain combinations of fuels and oxidants 08 p1317 A66-18856  
Quantitative determination of impurities in organic compounds using flame ionization detector 14 p2232 A66-27610  
Laminar and turbulent diffusion flame combustion mechanisms, stabilization, flame ionization, Bunsen burner, fuel gas jet eddy diffusion, etc 15 p2616 A66-29068  
Dissociation layer heights on Venus, Mars and Jupiter, noting CO flame airglow intensities 15 p2604 A66-30050  
Profile of ionized calcium resonance lines radiated from arc plasma jet observed by Fabry-Perot etalon 17 p2970 A66-32714  
Longitudinal electric field effect on redistribution of emitting particles in combustion front of plane methane-air flame 17 p2870 A66-32828  
Ionization processes in hot products of combustion processes /flame gases/ as weak plasma media, noting flame properties, mass spectroscopy, electron concentration, etc 18 p3260 A66-34106  
Hot flame gases ionization by electron reactions at atmospheric pressure 18 p3137 A66-34116  
Hydrogen-air flame with sodium traces studied by quadrupole mass spectrometric analyzer 19 p3476 A66-35323  
Solid-vapor equilibrium in helium-methane system from triple point equilibrium temperature of methane down to low temperature within limits of flame ionization technique 20 p3676 A66-37086  
Correlation between chemi-ionization in flames containing organic fuels and heat of oxidation of carbon in fuel molecule 23 p4147 A66-41154

# FLAME PLATING

S ACETYLENE  
S ALUMINUM OXIDE  
S TUNGSTEN CARBIDE  
S WELDING

## FLAME PROBE

Methane-rich premixed flames of perchloric acid analysis noting burning velocities, temperatures and burnt gas composition required for stoichiometric mixtures 02 p0304 A66-12018

Absorption and emission spectra pertaining to electronic transitions of short-lived molecules C sub 2 and CH present in reaction zone of low-pressure oxyacetylene flames 06 p0969 A66-16126

Book on foundation of analytical flame spectroscopy technique, emphasizing excitation sources and radiation processes 06 p0822 A66-16521  
Vanadium oxide single crystal growth by flame solution and fusion, noting burner construction, crystal structure and techniques 12 p1899 A66-23565

Spectral analysis of organic flames, noting band intensity variation of different radicals with air-fuel composition and influence of diluents 14 p2413 A66-27722

FORTTRAN program for calculation of approximate total half-intensity line widths of several spectral lines for atoms in common analytical flames 20 p3605 A66-37758

## FLAME PROPAGATION

### SA BURNING RATE

Equation solution for flame propagation in gas mixture with first-order exothermic chemical reaction 02 p0302 A66-11392

Steady state flame propagation regimes, taking into account effect of heat losses through pipe walls on fuel mixture combustion 02 p0302 A66-11401

Laminar flame speeds predicted by Spalding formulation in stoichiometric mixtures with nonnormal diffusion 03 p0443 A66-12490

Algorithm determining end product concentration of mixture for chain isothermal propagation of plane flame 06 p0971 A66-16710

Flow field of two-dimensional Bunsen flame according to source sheet approximation 07 p1154 A66-17940

Linear pyrolysis velocity measuring device for ammonium perchlorate in one-dimensional flow 08 p1279 A66-18723

Flame spreading velocity over surface of igniting solid rocket propellants as function of atmospheric pressure and chemistry and specimen surface condition

[AIAA PAPER 66-68] 08 p1317 A66-18949  
Transmission of IR radiation from flames through various carbon dioxide

pathlengths 09 p1471 A66-20509  
Mathematical model of flame propagation in laminar and turbulent

flow 10 p1619 A66-21072  
Propagation stability of spherical flame in gas dynamic configuration of Landau and Markstein, showing that flame is stable relative to first spherical

harmonics 14 p2410 A66-26779  
Flame wavelength during vibrational combustion of gas mixtures in

tubes 14 p2415 A66-28327  
Complex variable theory of flame surface interaction and flow field of two-dimensional V-shaped flame simulated by source and sink sheets 15 p2617 A66-29605

Flame propagation theory using one-dimensional model and radial temperature variation to obtain dependence of propagation velocity on thermal-diffusivity coefficient 16 p2830 A66-31515

Five halogenated hydrocarbons and effect on flame speed of 17 p3032 A66-31881

methane 17 p3032 A66-31881  
Chlorine-fluorine mixture combustion, examining flame speeds, temperatures and burned gas composition

[WSCI 66-31] 18 p3263 A66-34415  
Overall structure of combustion process in jet flow of hydrocarbon-air mixtures

stressing conditions for ramjet engines, noting flame propagation angles, flow computation, etc 18 p3264 A66-34444

[AIAA PAPER 66-573] 18 p3264 A66-34444  
Ignition pressure transient of rocket motor, discussing initial ignition event,

flame spreading and final chamber filling, convective heating effect on burning rate, etc

[AIAA PAPER 66-666] 18 p3165 A66-34449

Stability analysis of one-dimensional steady laminar flame propagation with conductive heat loss 20 p3680 A66-38045

Chemical-ionization in reaction zones of hydrocarbon-oxygen or hydrocarbon air flames, noting association with abnormal excitation of hydroxyl

radical 20 p3626 A66-38046  
Boundary conditions of downstream singularity in nonadiabatic

flames 20 p3680 A66-38048  
Methane flames formed in long, horizontal column of methane-air mixture caused by interdiffusion, using wind

tunnel 20 p3681 A66-38246  
Unstable combustion products, of glow discharge, discussing effect of propagation rate of hydrogen-oxygen

flame 21 p3834 A66-38473  
Explosion of gas mixtures noting preparation, ignition sources, equipment, detonation waves of spherical volumes, etc 21 p3834 A66-38534

Dirac delta function representation of spark ignition, considering heat transfer from reaction zone to fresh gas and flame propagation 23 p4148 A66-41413

Flame propagation velocity parameters in turbulent flow as function of flow pulsation velocity, normal burning velocity and relative heating 23 p4149 A66-41792

Detonation wave formation in flowing hydrogen-oxygen and methane-oxygen mixtures, noting induction distances and turbulence levels 23 p4057 A66-41888

Flame of homogeneous gas mixture in terms of similarity criteria applied to combustion process 24 p4295 A66-42883

measurements of gas flow velocity, turbulence and gas

composition 15 p2479 A66-29608

Opposed jet diffusion flames subjected to electrostatic fields, estimating volumetric heat release rate and mass flow behavior [ASME PAPER 65-WA/ENER-3]

16 p2825 A66-30341  
Discontinuity characteristics of trough-shaped flame stabilizers for combustion in wake of poorly streamlined body during period of ignition arrest 20 p3674 A66-36915

FLAME TEMPERATURE 20 p3674 A66-36915

Temperature inhomogeneities in flame jet in condensed system as affected by flow agitation, carbon particles and metal particles 04 p0597 A66-13697

Calculation of mean temperature of mixture burning in flame tube of annular combustion chamber 04 p0597 A66-13760

Thermionic converter transforming calorific energy of flame into electric energy having protective coating of enamel-covered alumina 05 p0623 A66-15594

Axial temperature variation in turbulent buoyancy-controlled diffusion flame 08 p1319 A66-19202

Flame expansion rate in turbulent flow of homogeneous inflammable mixture at ignition temperatures from 423 to 823 degrees K 14 p2374 A66-27691

Organic flame temperatures and burning velocities at various fuel-air ratios measured, noting band intensity, effect of diluents, etc 14 p2413 A66-27723

Liquid hydrazine decomposition process to determine what chemical or physical changes may be occurring that cause breaks in burning rate/ pressure curves, measuring flame temperature and light emission 15 p2570 A66-29610

Factors determining line reversal temperature of flame with realistic temperature cross section explained by calculation of sodium D-line contours 17 p3038 A66-33324

Direct measuring radiation calorimeter developed for determining radiant heat flux of solid propellant gas flame in rocket combustion chambers

[AIAA PAPER 65-358] 18 p3159 A66-33814  
Flame temperature measurement using response time of Wolfram-rhenium thermocouples to correct radiation errors in optical pyrometer

readings 19 p3360 A66-36160  
Hydrogen/oxygen and hydrogen/air flame temperature experiments on porous flat flame burner 20 p3680 A66-38042

Initial broadening of diffusion flame sheet caused by nonvanishing equilibrium constant determined, using method of inner and outer expansions 23 p4148 A66-41500

Flame temperature measurements by thermal neutron probe providing data on measured and computed transmission vs Cd foil thickness 23 p4148 A66-41501

Temperature of fluorine-hydrogen flame from 1/3, 0/ band of FH vibration-rotation experimentally determined to be in agreement with theoretical figure of 3994 degrees K for stoichiometric mixture 24 p4295 A66-42992

FLANGE 24 p4295 A66-42992

SA METAL PLATE 24 p4295 A66-42992

Critical bending angles of rollers used in shaping profiled rings and casings with titanium alloy flanges 23 p4075 A66-41794

FLANGE WRINKLING 23 p4075 A66-41794

Design and construction of 10 ft diameter bakeable UHV all metal seal, taking into account thermal stresses and effect on flanges 16 p2712 A66-30455

Deformation modes and wrinkling of flange on shear spinning to determine optimum working conditions or spinnability of sheet metal 20 p3575 A66-38104

FLAP 20 p3575 A66-38104

S JET FLAP 20 p3575 A66-38104

S SPLIT FLAP 20 p3575 A66-38104

S STABILIZATION 20 p3575 A66-38104

S WING FLAP 20 p3575 A66-38104

FLAP CONTROL 20 p3575 A66-38104

Change rate of pitching moment coefficient upon aerofoil correlated to deflection of flap control for application to wing reversal analysis 06 p0801 A66-16001

Short-periodic motion of tailless glider

analyzed to determine degree of overcompensation of flap required for good stability 23 p4016 A66-41784

#### FLARE SA ILLUMINATION SA PYROTECHNICS SA SOLAR FLARE

Square flare for stabilizing upper stages of multistage ballistic missiles, discussing test results and aerodynamic advantages over conical flare 03 p0432 A66-12770  
Comet flares and cometary nuclear structure, specifically considering Schwassman-Wachmann I 17 p3009 A66-33371  
IR emitting flares, examining major parameters governing methods of analysis and performance 18 p3135 A66-34192

#### FLARED BODY

Static and dynamic stability and drag of blunt-nosed flare-stabilized bodies at velocities up to 8.2 km per second [AIAA PAPER 65-44] 12 p1799 A66-24699  
Laminar, transitional and turbulent boundary layer flows with adverse pressure gradient on axisymmetric blunted conical flared body at Mach 10 [AIAA PAPER 66-493] 18 p3047 A66-33658  
Light variations of flare and T Tauri stars due to surface electromagnetic activity connected with turbulence in convective zone and rotation, using Hertzprung-Russell diagram 20 p3652 A66-37610  
Corpuscular radiation from UV Ceti stars assumed to be mainly protons, noting role of interstellar matter 20 p3652 A66-37611  
Flare stars as sources of cosmic X-rays, spectra contain 4686-angstrom line of doubly ionized helium indicating that atmospheres contain either ionizing radiation or electrons 22 p3972 A66-39707

#### FLASH BLINDNESS

SA VISION  
Protection devices against vision impairment occurring during exposure of airmen and military personnel to intense visible radiation 01 p0019 A66-10481  
Decay time of positive afterimage following high intensity flashes measured by monocular and binocular brightness matching 18 p3062 A66-33993  
Eye patch and flashblindness protection 22 p3857 A66-39794  
Explosive lens flash blindness protection system consisting of flight helmet to support goggle lens, sensing device and discriminator unit 24 p4168 A66-42853

#### FLASH TUBE

Excitation of ruby lasers using double-pumped high-intensity helical flash tubes, obtaining time-resolved spectra of electrical discharges and plasma temperatures 02 p0240 A66-11446  
Xenon flashtube design and operating capabilities 10 p1537 A66-21870  
Dismountable flash lamp for laser, including cross sectional scale drawing and wiring diagram 11 p1714 A66-23296  
Efficient conversion of electrical energy into laser radiation, using coaxial optical pump 11 p1715 A66-23479  
Simultaneous measurement of voltage, current, current derivative and X-ray output as function of time in low inductance flash X-ray discharge tube 16 p2706 A66-30935  
Ruby laser pumping system and low cost mercury flash tube with high repetition rates used for micromachining process 22 p3933 A66-40336

#### FLAT LAYER

Radiative heat transfer in flat layer of absorbing, reradiating and nonscattering gray medium with optical properties independent of temperature 04 p0598 A66-14425  
Photoelastic determination of stress concentration factor for flat strips notched on both sides under tension 23 p4140 A66-41852

#### FLAT PLATE

Two-phase flow over flat plate analyzing velocity profile, shear coefficient and heat transfer of laminar boundary layer formed over plate 01 p0006 A66-10423  
Free convection boundary layers on horizontal flat plate 01 p0161 A66-10434  
Square plate vibration patterns determined, using stereophotogrammetry 01 p0157 A66-10921

High subsonic flow passing choked flat plate cascade with comparatively small pitch chord ratio 02 p0175 A66-11305

Effect of various factors in film-cooling phenomena obtained by vertically injecting air into turbulent boundary layer on flat plate 02 p0303 A66-11586

Vortex streets behind circular cylinders and flat plates analyzed, using photography and hot wire techniques, noting role of walls and wakes 03 p0354 A66-12321

Hypersonic flow separation over simple geometries and aerodynamic controls, noting pressure gradients and heating-rate distributions

[AIAA PAPER 65-753] 03 p0314 A66-12587  
Thermal deformation of flat plate considering temperature gradient effect through thickness, showing that plate is not exhibiting Euler buckling 03 p0442 A66-13301

Boundary layer control by blowing, analyzing turbulent boundary layer for flow about flat plate of incompressible fluid with intense cross flows 04 p0509 A66-13573

Monograph on Levy method for deflection of loaded simply-supported infinite plate strip, introducing class of real functions 04 p0589 A66-14011

Aerodynamic characteristics of flat rectangular plate placed normal to flow of highly rarefied gas 04 p0456 A66-14141

Interaction of radiation and convection in laminar boundary layer of perfect gas on flat black plate

[ASME PAPER 65-HT-54] 05 p0785 A66-14760  
Heat transfer and equilibrium temperature on flat plate in region of strong interaction in hypersonic flow 05 p0607 A66-15465

Heat and mass transfer from vertical plates boundary layer in convection at low Reynolds number by interferometry [ASME PAPER 65-WA/HT-39] 05 p0664 A66-15669

Turbulent velocity profile produced by controlling boundary layer thickness, using wires placed parallel to plate and normal to flow direction [ASME PAPER 65-WA/FE-29] 05 p0664 A66-15711

Influence of suction or injection in boundary layer flow past vertical flat porous plate in presence of uniform magnetic field 06 p0969 A66-16181

Thermal stress concentration factors for rectangular flat plates penetrated by holes [AIAA PAPER 66-120] 06 p0962 A66-16262

Temperature distribution of fluid in laminar boundary layer of flat plate and heat flow from fluid to plate wall 06 p0872 A66-16467

Four-point loading bend test on specimen of full plate thickness with sharp notch to 20 percent depth, with ductility criterion as fully plastic angle of bend before fracture 06 p0965 A66-16492

Flow field study of shock wave and boundary layer development at leading edge of sharp flat plate in rarefied hypersonic flow

[AIAA PAPER 66-31] 06 p0803 A66-17082  
Nonsimilar solution of incompressible boundary layer over flat plate in presence of shear flow, using approximate method 08 p1204 A66-18529

Shock wave shapes on cold flat plate in rarefied hypersonic flow tunnel measured by optical-flow techniques 08 p1165 A66-19165

Increased mass transfer from flat plate caused by wake from cylinders located near boundary layer edge 08 p1211 A66-19682

Small transverse flow effect on spanwise perturbation of two-dimensional boundary layer of flat plate 08 p1166 A66-19820

Ion density profiles in boundary layers associated with supersonic flow of shock heated air over flat plate measured by cylindrical and flush-mounted electrostatic probes

[AIAA PAPER 66-159] 10 p1565 A66-21686  
Compressibility effect on flow in MHD boundary layer of semiinfinite thermally insulated flat plate 10 p1525 A66-21847

Combined loads minimum weight analysis of stiffened truss-core sandwich flat plate and cylinder 10 p1618 A66-21940

Transition from near free molecular flow at leading edge of flat plate in rarefied hypersonic flow to continuum boundary

layer flow downstream 11 p1633 A66-2292

Flow over sharp and blunt flat plates at zero angle of attack in hypersonic shock tunnel, measuring surface skin friction, heat transfer, static pressure and shock layer pitot pressure 11 p1633 A66-2292

Pressure distribution and low density effects on sharp flat plates and sharp and blunt cones measured in hypersonic wind tunnel 11 p1634 A66-2293

Flat plate in hypersonic flow analysis in shock tunnel, obtaining surface pressure using electron beam densitometer 11 p1634 A66-2293

Thick laminar boundary layer influence a supersonic speeds and low Reynolds numbers 11 p1634 A66-2293

Flow field near leading edge of heated flat plate in Mach 0.5 airflow 11 p1634 A66-2293

Equation for laminar boundary layer of flat plate in viscous compressible gas flow under chemical relaxation, solved by approximate method in series form 12 p1863 A66-2424

Nonlinear two-dimensional cavity theory for choked unsymmetric flow over flat plate at arbitrary attack angle, noting variation of lift and drag coefficients [ASME PAPER 65-FE-13] 12 p1864 A66-2454

Free convection film boiling heat transfer from isothermal vertical plate to subcooled stagnant liquid, using two-phase boundary layer theory 12 p1980 A66-2490

Heat-transfer coefficients calculated for forced convection from heated flat plate at zero incidence to stream of viscous fluid noting role of Reynolds number 12 p1981 A66-2494

Numerical analysis of steady two-dimensional motion of viscous fluid past flat plate at zero incidence to uniform stream with solutions for Navier-Stokes equations 12 p1866 A66-2494

Rarefied flow transition at leading edge of flat plate examined, using Navier-Stokes equation, noting new low density jump conditions, viscous layer characteristics effect of normal pressure gradient etc 13 p2061 A66-2516

Turbulent flow intensity measured in turbulent wake of small fence along flat plate covered with flabby skin, for analysis of drag reduction in aerodynamics 13 p2063 A66-2559

Hot-wire analysis of permanent sound fields during varied flow velocity around flat plate boundary layer, noting resonance effect of sound amplitude 13 p2063 A66-2590

Stress concentration for cylindrical bending of plates with holes, deriving equations and evaluating errors in classical theory 13 p2203 A66-2642

Approximate methods of computing heat transfer through laminar boundary layer considering boundary layer along flat plate and second order effects 13 p1993 A66-2671

Convective heat transfer to flat plate at stagnation point in partially ionized equilibrium air boundary layer, noting heating rates 13 p2210 A66-2672

First-collision process at sharp leading edge of flat plate aligned with hypersonic free stream 13 p1993 A66-2672

Analytical methods for studying turbulent boundary layers at high Mach numbers, comparing theory and experiments for flat plate flow, predicting boundary layer properties around hypersonic configurations 14 p2217 A66-2709

Coupled parametric and self-excited vibration of plate with supersonic flow past one side, assuming periodically varying forces act in plane of plate, noting degeneration of parametric resonance main region 14 p2398 A66-2745

Periodically excited boundary layer disturbances above flat plate in water flow scanned by hot-wire anemometer under various conditions 14 p2275 A66-2747

Central deflection of simply supported centrally loaded rhombic plate with formula depending on first coefficient obtained in mapping of rhombus 14 p2409 A66-28397

Effect of unsteady longitudinal vortices on Blasius profile in traditional boundary layer of flat plate 14 p2279 A66-28461

Rarefied supersonic flow condensation on cold flat plate, noting capture coefficients

## FLEXIBLE BODY

Flexible satellite attitude control, analyzing satellite as thin circular plate with application to radio telescopes, noting vibration modes and nonlinear gyroscopic coupling terms 01 p0142 A66-10674

Characteristics of flexible circular plate, considering stress and strain in friction zone at clamped section 01 p0160 A66-11181

Nonlinear dynamics of free rotating flexibly connected double-mass space station 03 p0431 A66-12744

Generalized method for predicting pressure loss of straight and bent flexible sections of metal hose 04 p0459 A66-13640

Karman equation for bending of flexible plate solved by Kantorovich method, taking into account geometrical nonlinear deformations 07 p1143 A66-17860

Pressure wave propagation velocity in horizontal liquid-filled flexible tubes 07 p1146 A66-18277

AMRA high speed tensile testing analysis of dynamic stress-strain behavior in beryllium oxide in flexure and in compression 13 p2115 A66-26114

Flexible baffle effect on nature and magnitude of damping and sloshing motions of liquid propellants over wide range of conditions 16 p2685 A66-30915

## FLEXIBLE WING

Paraglider wing analysis based on assumption that flexibility allows it to take shape that aerodynamic pressure and internal stresses dictate [ASME PAPER 64-WA-AV-4] 10 p1483 A66-21472

Recoverable and reusable radio controlled sounding rocket equipped with deployable flexible wings attached to paraglider beams 24 p4284 A66-43071

## FLEXOWRITER

User-oriented computer programming system using Flexowriter modified to construct new two-dimensional programming language 12 p1826 A66-23828

## FLICKER FUSION FREQUENCY

Review of data on visual flicker fusion and intermittent stimulation 04 p0462 A66-13792

Effect of extremes in magnetic environment on physiological behavior 08 p1174 A66-18585

## FLIGHT

S BALLOON FLIGHT

S BUFFETING

S FREE FLIGHT

S HYPERSONIC FLIGHT

S INTERPLANETARY FLIGHT

S JET FLIGHT

S LUNAR FLIGHT

S MAN POWERED FLIGHT

S METEOROLOGICAL FLIGHT

S OVER-WATER FLIGHT

S PARABOLIC FLIGHT

S PREFLIGHT ANALYSIS

S PREFLIGHT OPERATION

S ROCKET FLIGHT

S SPACE FLIGHT

S SUPERSONIC FLIGHT

S VERTICAL FLIGHT

S VISUAL FLIGHT

## FLIGHT ALTITUDE

Altitude measurement requirements for supersonic transport including flight profile, air traffic control, climb, etc 09 p1400 A66-20426

Airborne electronic command device for measuring time intervals corresponding to cruising speed/ true flight altitude ratios up to 40 21 p3735 A66-38569

## FLIGHT CHARACTERISTICS

SA AIR SPEED

Measuring Meteor 1 rocket flight parameters from ground using phototeodolites and astronomical and optical-acoustic methods 01 p0031 A66-11067

Tape recorders of flight parameters, tabulating characteristics of ten instruments 01 p0071 A66-11072

Effect of canard foreplane on longitudinal long-period perturbed motion of aircraft depends on change in hinge moments with Mach number change 04 p0458 A66-14152

Flight characteristics and test program of CL-84 light tilt-wing V/STOL Army support vehicle 07 p0986 A66-17271

Book on aircraft testing techniques for aeronautical technical school

students 08 p1167 A66-18590

Dragon rocket probe, launch history and flight modifications 10 p1611 A66-21397

Aircraft vibration in transonic region caused by aileron oscillations, eliminated by friction dampers 12 p1801 A66-24035

Annual report, 1964-65 /Aeronautical Research Laboratories, Australian Defence Scientific Service/ on aerodynamics, guided weapons and systems and flight research 13 p2056 A66-25120

Flight characteristics of compound helicopter with fixed rotor and jet engine 13 p1995 A66-25761

Scramjet aircraft performance capabilities, noting operating parameters such as thrust coefficient, flight velocity, acceleration, fuel consumption, etc 13 p2173 A66-26032

Wind tunnels to predict flight characteristics based on models and test probes 14 p2270 A66-27564

Data processing techniques for analyzing turbulence records and for estimating response of aircraft to atmospheric turbulence 17 p2843 A66-32329

Approximate atmospheric entry trajectories on cylindrical planet, noting minor circle turn maneuver and bank angle schedule 21 p3811 A66-38705

Prediction of rocket engine flight performance with less than 2 percent error in specific impulse data measured at sea level 23 p4120 A66-41111

## FLIGHT CLOTHING

SA PRESSURIZED SUIT

SA PROTECTIVE CLOTHING

Sport-type knit suit indicated as most suitable astronaut clothing in small-volume cabin during comfortable microclimatic conditions 15 p2443 A66-29458

Comparative insulative properties of wet and dry type immersion protection flight clothing 16 p2643 A66-31127

## FLIGHT CONDITION

Atmospheric temperature changes as factor in detection of clear air turbulence, especially above 25,000 ft, noting aircraft instrumentation used 15 p2532 A66-28918

Takeoff and landings by periscope under various flight conditions, noting effect of variations in image magnification 22 p3946 A66-40859

## FLIGHT CONTROL

SA ATTITUDE CONTROL

SA IN-FLIGHT MONITORING

Adaptive flight control system, using sampled data to identify aircraft parameter, for high performance aircraft 01 p0009 A66-10005

Automatic flight control system for A-7A featuring high fixed gain dual channels, series servos and control augmentation in addition to normal attitude and path control functions 01 p0098 A66-10007

Automatic and semiautomatic vectoring and landing capability of U.S. Navy carrier-based aircraft F-4G Phantom II 01 p0099 A66-10009

Research and development progress toward synthesis of pure fluid flight control system 01 p0140 A66-10021

Aerospace vehicle flight control - SAE and NASA Conference, Los Angeles, July 1965 01 p0102 A66-10661

Outer loop control mechanization for automatic landing systems associated with flight control, noting series servo concept as compared to parallel servo mechanization 01 p0014 A66-10664

Triple redundancy with majority logic voting in application for increased safety and reliability of aircraft stability augmentation and/or automatic flight control 01 p0103 A66-10665

Redundancy techniques for flight control systems applied to tactical military aircraft, noting monitorless channel output selection, failures, etc 01 p0103 A66-10666

Hydrologic redundant systems for overall flight control systems 01 p0015 A66-10667

Balanced power concept for weight savings in aircraft actuation system consisting of mechanically actuated flight control surface, mechanical servo, flywheel and motor 01 p0015 A66-10670

Mechanical servoactuator for all-mechanical flight control system for aerospace vehicles, noting traction transmission effect on toroidal actuator, cascading for power

amplification, etc 01 p0015 A66-10677

Difficulties in control system synthesis for launch vehicles exhibiting severe mode interaction 01 p0104 A66-10677

Future sensing and information requirements and system ideas applicable to flight control 01 p0104 A66-10677

Drift of coordinate transformation matrix of quantized attitude reference system of aerospace vehicle undergoing coning motions 01 p0142 A66-10677

Float-cocking phenomenon in single-axis floated gyroscopes caused by impressed angular velocity on sensible radial compliance 01 p0068 A66-10677

Gemini flight control system performance during second unmanned flight 01 p0104 A66-10677

Digital computation desirability for flight control system 01 p0104 A66-10677

Fluid control and guidance systems summary of available hardware 01 p0015 A66-10677

Microelectronic digital system for spacecraft stabilization and control 01 p0105 A66-10677

Reliability factors in flight control, particularly automatic landing systems and controls for VTOL aircraft in transition regime 02 p0231 A66-11867

Human pilot behavior compared with automatic pilots in terms of adaptability response time and reliability 02 p0187 A66-11867

Optimum control synthesis review theory and practice, especially for flight mechanics and control 03 p0349 A66-12777

Mathematical model based on control and queueing theory for human controller for turn-round operations on airport apron 03 p0329 A66-12877

In-flight monitoring of advanced aircraft discussing system requirements and constraints [ISA PREPRINT 1.3-2-65] 05 p0684 A66-15517

Airborne navigation and flight-control equipment for reducing weather minimum to lowest possible level 06 p0907 A66-16427

XB-70 hydraulic system, describing characteristics, operation-mechanism of fluid power system, power generation, utilization and distribution 06 p0809 A66-16777

Probability state variable device /neutronron/, operation, functions and application 06 p0819 A66-16867

Control power composition and usage characterized for VTOL aircraft flight control system design 06 p0806 A66-16877

Flight controls of tilt wing X-142 aircraft, noting mechanization and operation of wing and flap control system 06 p0809 A66-16877

X-15 flight problems not encountered during simulation, particularly differences in aerodynamics, control systems, cockpit equipment, etc 07 p1017 A66-17277

XB-70A, high Mach number handling qualities and suggested improvements through addition of better instruments presentation, automatic flight control etc 07 p0986 A66-17277

Visual aid in detection, recognition and acquisition of targets at different altitudes and speeds 07 p0998 A66-17277

Functional requirements for computer navigational system for Concorde aircraft 07 p1065 A66-17677

Navigation and flight instrument, discussing deficiencies of panel-mounted navigational command system 07 p1033 A66-17677

Location of flight control system for simplifying crew procedure and reducing navigation error in areas of high traffic density 07 p1068 A66-17677

DECTRA long range navigational aircraft DECTRA airborne receiver and Omnitron computer 07 p1068 A66-17777

Building blocks of pictorial navigational display for projection of servo-driven microfilm map onto rear projection screen 07 p1069 A66-17777

Flight testing of Philips vertical reference inertial navigator on DC-8 aircraft 07 p1069 A66-17777

Advanced airborne computer double system applied to fault detection, location flight management and

navigation 07 p1003 A66-17715  
 Position-attitude-true-heading-steering  
 navigation system noting accuracy,  
 reliability, maintenance, operational  
 requirements and functional  
 features 07 p1070 A66-17720  
 Two automatic astronomical navigation and  
 tracking systems compared for accuracy and  
 performance in civil  
 aircraft 07 p1070 A66-17722  
 Schuler tuned inertial system as flight  
 sensor and control of VTOL aircraft  
 translational velocity during hover phase  
 and landing 07 p1070 A66-17724  
 MOA/BOAC Doppler/Loran A trials 1963-64,  
 discussing navigational accuracy during  
 transatlantic flights 07 p1072 A66-17759  
 Operational factors in automated  
 navigational computations, with  
 consideration of self-contained aids, ground-  
 based systems and astrosatellite  
 navigation 07 p1075 A66-17780  
 FAA regulation of civilian use of U.S.  
 airspace 08 p1321 A66-18548  
 Manual guidance and control simulation for  
 reentry vehicle flight and  
 landing 08 p1203 A66-19533  
 Visual display system providing instrument  
 data in one-to-one correspondence with real  
 world, using cathode ray tube images of  
 horizon and runway projected on aircraft  
 windshield 08 p1203 A66-19764  
 Aerospace technology including past  
 progress, predictions, minimum and  
 maximum speeds for safe flight control,  
 economics, propulsion,  
 etc 09 p1472 A66-20164  
 Thermal management /heat-sink and  
 pressurization and cooling systems/, fuel,  
 flying control and hydraulic and electrical  
 systems of Lockheed L-2000 SST  
 project 09 p1329 A66-20391  
 Book on flight dynamics, covering optimum  
 control, multistage rocket trajectory  
 optimization, VTOL aircraft dynamics,  
 autopilot design, etc 11 p1732 A66-23335  
 Automatic pilot consisting of guidance  
 system for flight trajectory control and  
 stabilization system for angular acceleration  
 control 12 p1909 A66-23815  
 Integrated stability augmentation circuits  
 in AN/ASW-16 automatic flight control  
 system 12 p1837 A66-24381  
 Aeronautical stability problems, discussing  
 background, rigid and elastic stability and  
 adaptive control 13 p1994 A66-25582  
 Book on unmanned aircraft and rocket  
 control systems, flight dynamics in  
 conjunction with control processes, design  
 of stabilization and guidance  
 systems 13 p2055 A66-26462  
 Fixed shaft turboprop flight control system  
 for business and utility aircraft  
 [SAE PAPER 660218] 14 p2225 A66-27119  
 Effect of faulty compensation for  
 accelerating force of Earth gravity on  
 accuracy in determination by inertial  
 navigation system of coordinate of object in  
 flight 14 p2328 A66-27361  
 Duplex pitch channel in Hawker Siddeley  
 Trident autopilot for glide path extension  
 and flareout control 14 p2328 A66-28229  
 Saturn launch vehicle flight control system  
 model based on rigid-body control  
 law 15 p2605 A66-28747  
 Flight control systems, automatic landing  
 devices and inertial navigation with  
 gyros 15 p2534 A66-29365  
 Sensor threshold definitions applied to rate  
 gyros, comparing old and new AIAA  
 specifications, noting threshold definitions  
 relation to flight control system  
 malfunctions 16 p2708 A66-31439  
 Low-altitude control of U.S. Army rotary  
 wing aircraft 17 p2950 A66-32722  
 USAF CH-3C helicopter V/STOL in flight  
 refueling, discussing requirements, system  
 characteristics and flight  
 tests 17 p2844 A66-32724  
 Integrated Helicopter Avionics System  
 flight control, noting stability augmentation,  
 long-term motion control, outer and inner  
 loop function separation and fail-safe  
 capability 17 p2951 A66-32730  
 Lift engine technology, noting effect on  
 operational transport aircraft design, VTOL  
 capabilities, low speed control,  
 etc 17 p2844 A66-32732

Flight control design parameters and  
 performance effects on VTOL aircraft  
 handling qualities, noting manufacture and  
 flight test results 17 p2845 A66-32733  
 Centrifugal pump for liquid metal power-  
 transmission in flight control systems  
 [ASME PAPER 66-FE-20] 17 p2932 A66-33273  
 Vertical-track free-fall rocket sled system,  
 discussing design principles, operation and  
 performance  
 characteristics 18 p3093 A66-33796  
 Optimized spacecraft control process  
 eliminates gravitational field-caused  
 nonlinearities by taking as control  
 parameters osculating characteristics of  
 planetocentric motion 18 p3242 A66-33851  
 Position and flight-path control techniques  
 for satellites and space  
 probes 18 p3246 A66-34677  
 Instrument unit analysis for Saturn IB/V  
 program, noting environmental, guidance and  
 flight control, electrical systems and  
 countdown procedure 19 p3354 A66-35469  
 Flight control for low altitude high-speed  
 mission, discussing applicable requirements,  
 analysis and design  
 techniques 19 p3396 A66-35506  
 Flight control system design for high  
 performance aircraft, particularly longitudinal  
 transient response handling  
 qualities 19 p3278 A66-35509  
 Short period longitudinal aerodynamics of  
 reentry vehicle flight control system, using  
 sensitivity techniques 19 p3396 A66-35510  
 Multiloop flight control system root  
 sensitivity to open loop parameter variation,  
 describing method of  
 analysis 19 p3335 A66-36690  
 Visual displays to aid pilot to fly, monitor  
 and control power plant, navigational and  
 other equipment and communicate with ATC  
 ground stations 20 p3508 A66-36996  
 Dive flight behavior of propeller-driven  
 and jet fighters 21 p3696 A66-38652  
 Flight control system for low weather  
 minima for use in small business craft and  
 large air transports 21 p3761 A66-38655  
 Flight control system providing control  
 augmentation, self-adaptive control and self-  
 organizing control 22 p3848 A66-40125  
 Multiloop flight control system root  
 sensitivity to open-loop parameter variation,  
 describing method of  
 analysis 22 p3884 A66-40360  
 NaK-77 suitability for 1000-F liquid-metal  
 hydraulic flight control  
 systems 22 p3852 A66-40498  
 Wind tunnel flight data correlation  
 program, considering tunnel wall effects,  
 measurement and control of thrust and  
 propeller blade angle  
 [AIAA PAPER 66-737] 22 p3893 A66-40627  
 Automatic flight control system for A-7A  
 featuring high fixed gain dual channels,  
 series servos and control augmentation in  
 addition to normal attitude and path control  
 functions 23 p4088 A66-40983  
 Duplicate monitored system for automatic  
 landing control of VC10 and  
 Concorde 23 p4088 A66-41163  
 Simulator study of computing and  
 displaying velocity in head-up display for  
 low speed flight path control by pole track  
 or velocity vector  
 [ICAS PAPER 66-16] 23 p4089 A66-41257  
 Automatic flight control for VJ 101C VTOL  
 aircraft, noting autopilot  
 function 23 p4016 A66-41931  
 Skin temperature rate reentry guidance  
 and control system using thermocouple  
 sensors and operating in manual or  
 automatic mode  
 [AIAA PAPER 65-47] 24 p4235 A66-42765  
**FLIGHT FATIGUE**  
 Flight fatigue studies, discussing  
 parametric evaluation of crew performance  
 on overseas flights 06 p0816 A66-16057  
 Aircraft crew fatigue on long distance jet  
 flights, measuring flight safety parameters  
 such as heartbeat, pulse rate and  
 temperature 12 p1808 A66-23753  
 Flight fatigue treatment by acetyl-aspartic  
 acid and citrulline, noting improved reaction  
 to acoustic and visual  
 stimuli 17 p2859 A66-32232  
 Aviation fatigue noting flight-time  
 limitations, indicators of excessive fatigue,  
 new developments related to international

flights and Forest Service  
 flights 19 p3294 A66-36383  
**FLIGHT FITNESS**  
 Profile of pattern of airsickness obtained  
 for 1067 naval aviators in pre-solo and basic  
 acrobatic phase of primary flight  
 training 06 p0814 A66-16833  
 Otitic barotrauma caused by difference  
 between atmospheric pressure and middle  
 ear cavity pressure arising during flight,  
 compression chamber tests, etc, and leading  
 to deafness 10 p1488 A66-22107  
 Effects and causes of sinus barotrauma  
 /pressure differential between sinuses and  
 outside atmosphere/ noting prevention,  
 treatment and  
 aftereffects 10 p1488 A66-22108  
**FLIGHT HAZARD**  
 Task interruption and performance  
 decrement of active pilots and flight crew  
 personnel following rapid  
 decompression 18 p3061 A66-33782  
 Promotion of aviation safety, discussing  
 adoption of new accident statistics,  
 elimination of catastrophes and STOL  
 design extension to medium and long-range  
 aircraft 23 p4152 A66-41305  
**FLIGHT INSTRUMENT**  
**SA HORIZON SCANNER**  
**SA POSITION INDICATOR**  
 Manned aircraft self-contained checkout  
 and fault isolation systems, discussing  
 characteristics and operational concepts  
 [ISA PREPRINT 1.3-3-65] 05 p0684 A66-15513  
 SST instrumentation problems, discussing  
 reappraisal of flight deck display  
 requirements 07 p1033 A66-17784  
 Flight deck display for future aircraft  
 projects, emphasizing vertical scale director  
 instruments for cockpit  
 display 11 p1649 A66-23250  
 In-flight pilot responses to new  
 nongyroscopic blind flight Kenyon  
 instrument 15 p2442 A66-28662  
**FLIGHT LOAD RECORDER**  
 Flight Load Survey program, written in  
 Fortran IV, for accurate and rapid sounding  
 of wind-induced loads on aerospace launch  
 vehicle  
 [AIAA PAPER 66-470] 16 p2811 A66-31473  
**FLIGHT MECHANICS**  
 Successive linearization for variational  
 problems of flight  
 mechanics 04 p0458 A66-13698  
 Aerodynamic penetration and radius in  
 drag and lift during atmospheric entry  
 process  
 [AIAA PAPER 66-16] 07 p0983 A66-18447  
 Optimum sliding regimes in variational  
 problems of atmospheric flight dynamics  
 with smooth trajectory and continuous  
 controls 11 p1733 A66-23343  
 Direct and orbit flight modes considered  
 for unmanned lander on Mars, noting  
 ballistic coefficients, flight path angles,  
 targeting capability, etc 13 p2180 A66-25243  
 Successive linearization for variational  
 problems of flight  
 mechanics 15 p2425 A66-28539  
 Control-engineering and flight-mechanics  
 problem of rendezvous guidance, considering  
 target body without guidance and second  
 body in gravitational field without  
 atmosphere 20 p3595 A66-36874  
 Unmanned spacecraft trajectories,  
 discussing flight mechanics of solar system  
 exploration 22 p3983 A66-40700  
**FLIGHT OPTIMIZATION**  
**SA OPTIMUM THRUST PROGRAMMING**  
 Shortest time air routes determined by  
 method based on law of refraction, assuming  
 quasi-continuous wind  
 field 02 p0260 A66-12055  
 Dynamic programming applied to numerical  
 solution of optimization problems of flight  
 mechanics 04 p0584 A66-13523  
 Computer method calculation of minimum  
 time track, using quasi-optical law of  
 refraction 07 p1066 A66-17681  
 Grid navigation method, employing  
 Mercator chart, is suitable for high latitudes  
 and supersonic aircraft 07 p1066 A66-17683  
 Economy of body traveling over given  
 distance at certain velocity and constant air  
 density 07 p0983 A66-18161  
 Optimum gliding regime using Krotov  
 generalized theory and linear partial  
 differential equations 11 p1732 A66-22354

Multistage rocket acceleration by explosive separation of individual stages, solving optimization problems connected with problem 11 p1777 A66-22456

Dynamic programming method for approximate solution of gliding flight and minimum time to climb problems in boundary value theory 11 p1778 A66-23349

Aerospacecraft performance optimization and design evaluation for airbreathing-rocket propulsive systems by variational calculus [AIAA PAPER 65-18] 12 p1954 A66-24694

Flight path optimization methods for given aircraft performance objectives 13 p1995 A66-25764

Circular runway flight operations and increased directional stability [SAE PAPER 660283] 15 p2476 A66-29827

## FLIGHT PATH

Shortest time air routes determined by method based on law of refraction, assuming quasi-continuous wind field 02 p0260 A66-12055

Mathematical formulation of lateral and longitudinal separation standards for subsonic and supersonic aircraft operation 07 p1066 A66-17680

Aircraft separation criteria applied to supersonic transport, describing standards and parameters of air traffic safety 07 p1066 A66-17682

Vertime, navigation system for vertical plane control 07 p1069 A66-17716

Approximate reentry velocity and heating equations applied to any atmosphere satisfying hydrostatic equilibrium, noting motion equations for flight path 08 p1303 A66-18836

Vertical separation effect on safety of civil jet aircraft with type II or III altimeter over North Atlantic 10 p1553 A66-21334

Frequency distribution of route temperature at supersonic flight levels, noting effect on payload during extended trips [AIAA PAPER 66-371] 12 p1802 A66-24499

Digital airborne computer for navigation problem solutions including inertial navigation, flight path, time-to-go and arrival time, etc 13 p2124 A66-25839

Vertime, navigation system for vertical plane control 13 p2125 A66-25863

Minimum time-of-flight aircraft trajectory between two points with account of Earth sphericity 13 p2125 A66-26481

CAT detection by photometric star tracking system from moving aircraft 15 p2500 A66-28931

Schiphol Airport /Amsterdam/ analog computer installation for air traffic control and flight path calculations, with results displayed on automatic flight progress boards 15 p2534 A66-29311

Optimum model route structure for North Atlantic subsonic jet traffic 15 p2535 A66-29713

Optimal control theory in design of aerodynamic shapes, flight paths, guidance and control logic, data processing logic, etc 17 p2950 A66-32682

Atmospheric turbulence determined from velocity fluctuations in flight path direction measured by wing-tip mounted hot-wire anemometer 20 p3593 A66-37470

Simulator study of computing and displaying velocity in head-up display for low speed flight path control by pole track or velocity vector 23 p4089 A66-41257

Cross wind effect on special small rocket during powered flight, calculating flight path angle at burnout for launching angle determination 23 p4133 A66-41442

Flight path dispersion of special small rocket /SSR/ due to thrust misalignment, stabilizing effects of spin during powered flight by canting control vane in nozzle 23 p4133 A66-41443

Single air flow acceleration and deviation for propulsion and lift of high speed aircraft, analyzing long-range flight paths [ICAS PAPER 66-41] 23 p4122 A66-42070

## FLIGHT PLAN

Flight management by digital computers, discussing central computer, system configurations, reliability, memory, input/output, computation rates 09 p1349 A66-20683

Text on theory of automated air navigation, examining methods of flight preparation and precision 22 p3946 A66-40855

**FLIGHT RECORDER**

Automatic handling of information by analog recording on magnetic tape for control, monitoring and maintenance of aircraft 12 p1880 A66-23817

Flight recorder utilization in British civilian jet and turboprop aircraft 21 p3696 A66-38603

Digital filtering system comprising only few integrated circuits and using addershift register combination, compared with analog devices 23 p4067 A66-41168

## FLIGHT SAFETY

Plane crash as result of pilots coronary disease, discussing prevention and rehabilitation 04 p0469 A66-14387

Problems in pilot fitness evaluation, especially physical and emotional capability assessment for flight safety 09 p1335 A66-20533

Protection standards for population around missile launching sites, noting missile malfunctions, particularly breakdowns of guidance and control systems 09 p1457 A66-20554

Airmen exposure and safety at high altitude with reference to SST 13 p2015 A66-25762

Economic effects of turbulence on airline operations, considering costs on temporary grounding for repairs, passenger injuries, information dissemination on turbulence, etc 15 p2618 A66-28916

Automation in flight safety, noting role of radar, flight control system reliability, data processing system used, etc 17 p2848 A66-33485

Coronary diseases and flight safety 19 p3295 A66-36445

Flight safety and experiences with pilots treated in West Germany military hospital 19 p3295 A66-36446

Civil aviation safety - International Symposium, Stockholm, April 1966 20 p3493 A66-36990

Flight safety in Soviet civil aviation including takeoff and landing, cruising in airport vicinity, meteorology and medicine 20 p3494 A66-36991

Aviation safety research in Europe, considering military and civil sectors 20 p3540 A66-36993

Human errors in flight safety and need for automation 20 p3508 A66-36994

Allotment of probability shares /APS/, statistical approach for guiding safety measures to improve aviation 20 p3494 A66-36998

National and international trends in ATC from standpoint of pilot and operator safety 20 p3595 A66-37004

Missile and space system accident potential evaluated numerically 20 p3685 A66-37931

## FLIGHT SIMULATION

Simulation testing of modular maneuvering unit for stabilized and untethered maneuvers in free space 02 p0215 A66-11625

Task loading effect on pilot performance in computer simulated low altitude high speed flight 02 p0187 A66-11829

Simulation techniques in aeronautics and astronautics, discussing role in development of desirable control and flight characteristics 02 p0215 A66-11892

Space travel projects noting ion propulsion, electromagnetic drive and tests of flight simulation 03 p0415 A66-12483

T tail aircraft in deep stall conditions in fixed-base cockpit simulation at large angle of attack [AIAA PAPER 65-781] 03 p0322 A66-13068

Carrier landing improvements in Fresnel lens optical landing system, emphasizing compensated-meatball stabilization [AIAA PAPER 65-791] 03 p0322 A66-13228

Royal Aircraft Establishment facilities in England for aircraft structure testing under supersonic conditions, simulating aircraft takeoff, flight and landing 04 p0508 A66-14021

Monitoring human performance during manned orbital flight for assessment of central nervous system function, noting animal studies during simulated stresses of space flight 04 p0468 A66-14088

Role of ground and flight simulation test facility on past, current and future developments in aerospace propulsion 06 p0867 A66-15932

V/STOL Aircraft Symposium, Wright-Patterson AFB, Ohio, November 1965 06 p0805 A66-16808

Flight simulation developments for V/STOL visual device requirements including mirrors focusing images at infinity, transparency image storage techniques, optical probes, etc 06 p0869 A66-16814

Control and lift-propulsion systems and model testing of Canadair CL-84 V/STOL tilt-wing aircraft 06 p0806 A66-16811

Simulated flights evaluating verbal communication intelligibility in oxygen breathing mixtures at low atmospheric pressures compared with results obtained in room air at ground level 06 p0813 A66-16822

X-15 flight problems not encountered during simulation, particularly differences in aerodynamics, control systems, cockpit equipment, etc 07 p1017 A66-17272

NAE helium hypersonic wind tunnel for hypersonic flight simulation and boundary layer studies 07 p1018 A66-18051

Environmental testing, spacecraft configuration, data retrieval and flight simulation in OAO experiments 08 p1203 A66-19511

Manual guidance and control simulation for reentry vehicle flight and landing 08 p1203 A66-19533

Vestibular system response of pilot and nonpilot to banking and turning in USAFSAM biaxial simulator 09 p1335 A66-20533

Thrust stand simulation for determining space vehicle rocket motor attach-point motion 10 p1520 A66-21933

DC-9 flight simulator using monolithic integrated-circuit GP-4 computer 11 p1683 A66-22683

Rocket equipment simulation on rocket engine test facilities, describing fuel tank design for experiment with suitable flow characteristics and parameters 12 p1829 A66-24311

Aerospace and space simulation including rendezvous and docking, lunar landing and operation of supersonic transports 12 p1858 A66-24603

Flight simulation of SST transport using hybrid computer 13 p2028 A66-26333

Simulated Martian entry conditions in Earth test program showing requirements for launch vehicle, tracking, cost and schedule [AIAA PAPER 65-219] 14 p2392 A66-27873

SST air traffic control and arrival and departure simulation 15 p2425 A66-28743

Mechanism having six degrees of freedom for flight simulation in pilot training 15 p2476 A66-29633

Ionospheric flight simulation in which ion distribution of neutral gas expanding into rarefied ionized gas under magnetic field is measured 16 p2759 A66-30373

Simulation testing pilot performance in orbiting Gemini spacecraft based on tracking rate errors and fuel consumption 17 p2872 A66-31963

Myocardiograph study of dogs leading to development of flight-rated vibrophonocardiographic system for monitoring cardiac dynamics in flight environment 17 p2924 A66-32153

Flight simulator techniques applied to all weather landing problems 17 p2869 A66-33203

Low altitude-high speed flight simulation experiment in air-to-ground target recognition via closed-circuit TV, determining effects of camera view field and target size 17 p2927 A66-33483

High speed hybrid computer simulation of aerospace vehicle motion 18 p3094 A66-34063

Aircraft and spacecraft digital systems including computers for production engineering, ground telemetry and communication with aerospace vehicle and onboard equipment for tracking, guidance and simulation of inflight conditions 21 p3709 A66-39623

SH-3A airframe fatigue test facility for automatic simulation of helicopter flight and landing loads 22 p3992 A66-40213

CL-84 V/STOL flight simulation at Canadair through design, development and flight testing of flapped tilt-wing prototype [ICAS PAPER 66-18] 24 p4159 A66-42493

**LIGHT SIMULATOR**

Research, development, test and operation simulating devices used in aircraft construction supply real time data, considering human factor, costs, etc 01 p0054 A66-10871

Airborne V/STOL simulators used for handling qualities research at National Aeronautical Establishment, Ottawa, Canada [AIAA PAPER 65-705] 01 p0054 A66-10943

Computer flight simulators at Langley discussing Boeing 707 jet, helicopter, air traffic control, orbital rendezvous and docking, lunar navigation and landing 01 p0055 A66-10957

Carrier landing characteristics of vectored-thrust aircraft obtained in piloted fixed-base flight simulator studies [AIAA PAPER 65-792] 03 p0390 A66-12560

Experimental fixed and moving-base flight simulator investigation of generalized aircraft longitudinal pilot induced oscillations [AIAA PAPER 65-793] 03 p0352 A66-12596

Marine pilot training to develop visual habit patterns as aid in reducing mid-air collision hazards 07 p0999 A66-17712

Climb profiles by SST pilot evaluated by simulator study using instrument, Mach altitude display and flight director 07 p0988 A66-17783

Apollo and LEM mission simulators, noting computer complex providing real time simulation, mathematical models, telemetry, display equipment, aural effects, etc 07 p1018 A66-18331

Flight simulator for telescopic observation of Earth from orbit, discussing configuration of optical system 10 p1518 A66-21230

Operational space flight simulator using closed-circuit TV with pinhole optics 10 p1518 A66-21231

Flight environmental simulation of control loading, fuselage movement and visual systems 10 p1520 A66-21855

Flight simulators in reducing cost of flight training 11 p1687 A66-23169

Supersonic transport operations, particularly analog computer facility at Langley Research Center and ATC simulator at National Aviation Facilities Experimental Center 15 p2443 A66-28744

Flight tests limitations, hi-fi simulation and other navigation display evaluation, detailing discontinuous simulator 16 p2743 A66-30668

T-27 space flight simulator design, system performance and use for training and research at USAF Aerospace Research Pilot School [AIAA PAPER 65-265] 18 p3093 A66-33789

T-27 Space Flight Simulator, for extravehicular activity training, utilizing closed-circuit TV system 19 p3291 A66-35966

Space flight simulator including performance requirements, facility design, applications, etc 21 p3721 A66-38856

Azimuth reference system design and stability, noting flight simulator installation 21 p3723 A66-38888

Flight simulation laboratory layout and construction using hybrid computer systems, noting cost estimation 23 p4052 A66-41136

Simulator study of computing and displaying velocity in head-up display for low speed flight path control by pole track or velocity vector 23 p4089 A66-41257

**FLIGHT STABILITY TEST**

Sounding rocket instability, covering exact and approximate solution and Magnus moment coefficient for hypersonic rolling vehicle /Sandia Nitehawk rocket system/ [AIAA PAPER 66-62] 06 p0958 A66-16252

Flight test report of F-111 aircraft, considering variable wing sweep, stability augmentation in automatic gains, high performance with slow speed takeoff and landing 07 p0986 A66-17273

Flight stability, discussing quasi-critical case in neighborhood of asymptotic stability boundary of autonomous systems and that of variable system 21 p3696 A66-39594

FLIGHT STRESS

SA SPACE FLIGHT STRESS

Closed loop hydraulic servo system simulating flight stresses on motor case of solid propellant rocket motor in static firing test stand for calibrating 03 p0353 A66-13218

Effects on man of direct /escape/ and indirect /aircraft flight/ movement through atmosphere, considering moderate and high-speed aerodynamic forces 10 p1488 A66-22106

Aircraft crew fatigue on long distance jet flights, measuring flight safety parameters such as heartbeat, pulse rate and temperature 12 p1808 A66-23753

Physiological stress and fatigue in aerial missions for forest fire control, noting in-flight and postflight exercise heart rate 12 p1810 A66-25009

Stress in spacecraft crew members measured using parotid fluid, noting relationship between biochemical variables under stress and nonstress conditions 17 p2866 A66-32196

Primary shift of phase of circadian periodicity effected by time displacement for physiological functions 19 p3285 A66-36374

Labyrinthine nystagmus and sensation of turning evoked by impulsive stimuli in yaw, pitch and roll compared for subjects in plane of rotation and in tilted position 24 p4163 A66-42448

FLIGHT TEST

Central Inertial Guidance Test Facility /CIGTF/ at Holloman AFB, outlining tradeoff between operational and analytical considerations 01 p0102 A66-10047

Parameter dependent approach mechanization for in-flight testing of aircraft system, considering electronic subsystems 01 p0010 A66-10096

Flight testing of Litton LN-12 inertial navigation system consisting of four-gimbal two-gyro platform and analog computer 02 p0259 A66-12049

Flight development of F-111 swing wing fighter in A strike and B interceptor versions for Air Force and Navy 03 p0317 A66-12534

Design considerations in Lockheed rigid rotor application to compound helicopter, noting wind tunnel and flight test with XH-51A helicopter [AIAA PAPER 65-757] 03 p0318 A66-12552

Autoland, stalling and jet V/STOL systems for flight testing of aircraft [AIAA PAPER 65-783] 03 p0318 A66-12557

Analytical tool for computer flight testing of VTOL designs, evaluating effects of steady state flight, maneuvers, gust response and weapon recoil 04 p0490 A66-14137

F5D-1 aircraft delta wing modification, describing wind tunnel and flight test results with ogee wing 06 p0802 A66-16805

XC-142A Flight Test Program, program statistics, aircraft instrumentation and flying qualities in hover and transition flight regimes 06 p0807 A66-16820

Aerospace - Society of Experimental Test Pilots Symposium, Beverly Hills, September 1965 07 p0985 A66-17267

Aircraft erect and inverted spinning characteristics, discussing Hawker-Siddeley Hunter T.Mk. 7 spin properties and application of controls for recovery 07 p0987 A66-17489

Flight test determination of parasite drag area and required power of Kawasaki Bell KH-4 single-rotor helicopter 07 p0988 A66-17525

Flight testing of distance measuring equipment for instrument landing system with results shown in histograms 07 p1067 A66-17691

Flight testing of Phillips vertical reference inertial navigator on DC-8 aircraft 07 p1069 A66-17708

Flight tests of navigation systems including hyperbolic system, Doppler system, radio altimeter testing, deviation in gyromagnetic compasses, etc 07 p1073 A66-17770

Book on aircraft testing techniques for aeronautical technical school students 08 p1167 A66-18590

Stagnation point velocity and pressure distribution over heat-sink shielded reentry

vehicle to test boundary layer heat transfer theories 08 p1161 A66-18811

Military aircraft from design stage through service life, emphasizing flight testing 08 p1322 A66-19017

Aircraft, missile and space systems flight test programs using statistical experimental design techniques [AIAA PAPER 65-221] 09 p1330 A66-20745

Reliability engineering concepts for manned spacecraft development and test program to achieve operational readiness with minimum flight tests 12 p1884 A66-23742

Text on longitudinal static stability of low-speed aircraft including effect on pilot, flight test, pitch maneuverability, etc 14 p2222 A66-26792

Handling and operation of XB-70 aircraft, noting flight testing, folding wing tips, weight, speed, etc 14 p2222 A66-27284

[SAE PAPER 660273] 14 p2222 A66-27284

Structural design load prediction and data collected verification of methods and magnitude by Minuteman flight testing 14 p2392 A66-28000

Structure and thermal protection system of start program including load paths, heat shield, materials, etc 14 p2407 A66-28024

Hydraulic system supporting Apollo/Saturn V space vehicle tested to determine bending and flexuring in flight 14 p2226 A66-28031

Flight tests limitations, hi-fi simulation and other navigation display evaluation, detailing discontinuous simulator 16 p2743 A66-30668

High speed computer technique for simulating test design parameters for evaluation of ballistic-weapon system accuracy [AIAA PAPER 65-222] 16 p2809 A66-30888

Thermal model for performance of cork insulation on Minuteman missile in launch environment 16 p2827 A66-30893

Test program philosophy of electric propulsion and power for planetary mission application [AIAA PAPER 65-67] 16 p2791 A66-30901

Flight tests on various agricultural aircraft noting safety record data 16 p2634 A66-31284

S-61F helicopter flight test program, noting design modifications for high speed performance 17 p2844 A66-32726

Helicopter rotor blade applied as scanning radar antenna, noting performance during flight tests, feasibility, etc 17 p2875 A66-32727

XV-5A V/STOL aircraft flight testing, noting handling qualities and sequential diversion capability 17 p2844 A66-32731

Problems when using RF diagnostic systems in flight test evaluation of ICBM systems, specifically when using EM systems during reentry [AIAA PAPER 66-406] 18 p3239 A66-33634

Flight performance of small diameter folding fin aircraft rocket using particle trajectory shows large dispersion magnitudes 18 p3240 A66-33819

Test pilot training, discussing syllabus, instrumentation, schools, etc 18 p3062 A66-33948

XB-70A research aircraft and flight tests to aid SST 18 p3051 A66-33957

XB-70A flight testing, examining effect of aerodynamic lift, gross weight, altitude, temperature and similar parameters on sonic boom signatures 18 p3052 A66-33959

Staff flight test design velocity comparison technique for estimating in-flight inertial platform attitude 18 p3132 A66-34044

Special missile flight test equipment, detailing velocity accumulator, elevation programmer, telemetry system, junction box and illumination measurement 18 p3111 A66-34049

VTOL aircraft performance characteristics noting flying qualities, hover dynamics, transition flight and variable stability system 18 p3052 A66-34623

Flight data recording and processing system using magnetic tape for digitally computing airborne data on flight testing of VTOL aircraft 18 p3073 A66-34679

Flight testing of laminar flow control on X-21 aircraft, noting degradation of laminar performance in proximity of clouds or atmospheric turbulence, feasibility, handling,

- etc 18 p3050 A66-34949  
 Temperature rate measurement for design of control and guidance system in reentry vehicles, using Temperature Rate Flight Control System /TRFCS/ 19 p3396 A66-35511  
 Navigation satellite system providing precise position information of aircraft, noting flight tests 19 p3396 A66-35516  
 Experimental maneuver demand aircraft control system, noting design considerations, operation and performance characteristics 20 p3493 A66-36887  
 XB-70 aircraft safety program developed during flight tests applied to future SST civil aircraft 20 p3494 A66-37006  
 Predelivery reflight policies role in airplane system reliability, noting failures during various test and retest flights 20 p3495 A66-37178  
 Real-time data gathering and flight-test technique for aircraft-carried weapons system development testing 20 p3495 A66-37207  
 Nitrogen powered hydraulic attitude control system of Little Joe II solid propellant launch vehicle for flight testing escape mechanism used on Apollo 20 p3499 A66-37314  
 Lifing aircraft structures subjected to acoustic pressures, noting estimation of panel joint rms stress 20 p3666 A66-37422  
 XB-70A reliability program applied to initial system design stage from inception to present flight test program 20 p3568 A66-37917  
 Naval weapons A-7A maintainability requirement effect on management and design and analysis of early flight test data 20 p3496 A66-37920  
 Flight tests on aircraft and analysis by automatic filter, noting structural and aerodynamic problems resulting from use of transient method 21 p3824 A66-38574  
 Multiplexer coder unit for AC carrier transducers and DC signals used in PCM flight trials system 21 p3709 A66-38605  
 No-gimbal system mechanizations evaluated by flight test and compared for advantages, noting system error 21 p3764 A66-38851  
 Langley Lunar Landing Research Facility for flight tests of landing vehicle and simulation of lunar gravity field 21 p3821 A66-38900  
 Flight testing of Beagle B.206 S aircraft revealed need for forward shift of CG in series II model due to more powerful engines 22 p3848 A66-39690  
 Coordinated laboratory and flight test program, determining stability of solar concentrator reflective surfaces in orbital environment 22 p3889 A66-40220  
 Flight testing of laminar flow control on full-scale swept wings, examining total pressure probes, wing wake drag and boundary layer stability utilizing pressure transducer [AIAA PAPER 66-734] 22 p3846 A66-40625  
 Lift fan propulsion system using 62.5-inch lift fans flight tested in XV-5A aircraft from hover to subsonic flight regions [AIAA PAPER 66-739] 22 p3972 A66-40628  
 Pulse and harmonic techniques used in flight flutter testing, emphasizing natural turbulent excitation and limitations [ICAS PAPER 66-10] 23 p4015 A66-41256  
 Steady and dynamic loads on tandem rotor, controls and airframe flight tested with Army helicopter, using automatic data processing [AIAA PAPER 66-735] 23 p4008 A66-41324  
 Flight performances of special small rockets with no cross wind conditions, noting drag coefficient effect 23 p4133 A66-41441  
 Preflight consideration of astronaut performance testing program for Gemini XI flight, noting manual operations and devices used 24 p4168 A66-42742
- FLIGHT TEST INSTRUMENT**  
 Microwave phase-measuring distance-determining system /SHIRAN/ enabling evaluation of slant ranges from airplane to four transponders located at ground control 02 p0227 A66-11378  
 Flight testing instruments used in control programs, treating airborne installations and ground stations 09 p1380 A66-20330  
 Radiation dosimeters for SNAP-10A flight test to measure reactor leakage radiations throughout SNAPSHOT Agena orbital vehicle 12 p1876 A66-23675
- FLIGHT TEST VEHICLE**  
 Man-rated booster design provides alternate manual propulsion and guidance control enabling astronaut participation in mission success [AIAA PAPER 65-251] 10 p1612 A66-21949
- FLIGHT TIME**  
 Evaluation of minimum-time courses for aircraft and inherent error 02 p0257 A66-12035  
 Air traffic control system capacity and navigational requirements for North Atlantic and continental transition areas, discussing relationship to accuracy and flight time economy 07 p1069 A66-17713  
 Error effects in forecasting wind speed and direction on equivalent headwinds and flight times 07 p1063 A66-18338  
 Minimum time-of-flight aircraft trajectory between two points with account of Earth sphericity 13 p2125 A66-26481  
 Results of approximate computation of rocket apogee from data on flight duration between different trajectory points 14 p2383 A66-27815
- FLIGHT TRAINING**  
**SA EJECTION TRAINING**  
**SA PILOT TRAINING**  
 Criteria for aircrew selection, describing aptitude and performance tests used by RAF 10 p1494 A66-22137  
 Procurement source and military rank as predictors of success in flight training 15 p2442 A66-28660  
 Preflight planning and training stages for Gemini V, considering spacecraft test, mission simulators, planetarium, survival and parachute training, etc 17 p2868 A66-32686  
 Voluntary withdrawal from primary flight training as function of individual flight instructor 22 p3856 A66-39793  
 Helicopter trainee performance following synthetic flight training, noting flyable aircraft attached to ground effects machine 22 p3857 A66-40250  
 Functional subsystem analysis in Instructional System Approach to transition training of flight crews 23 p4030 A66-41579
- FLIGHT VEHICLE**  
 Optimal control of elastic flight vehicles, describing axis oscillations by equations of beam with variable cross section 21 p3768 A66-39279  
 Book on aeromechanics of flight vehicles including structure and physical properties of atmosphere, wing characteristics, research methods, aerodynamic characteristics of principal units of aircraft and rockets, etc 21 p3695 A66-39288  
 Vibration test specifications for flight vehicle components developed from broad engineering viewpoint 21 p3822 A66-39609  
 Angular stabilization of flight vehicle by introduction of cubic terms of variable parameters into control law 23 p4088 A66-40968  
 Movable platform and differential throttle control configurations for lunar manned flying vehicle 24 p4284 A66-42954
- FLIP-FLOP**  
 Low power consumption, high reliability and fully integrated silicon monolithic complementary flip-flop circuit 01 p0047 A66-11139  
 Tunnel diode and transistor circuit controlled by trigger pulses operating as oscillator, univibrator and flip-flop 02 p0199 A66-11819  
 Solid state flip-flop store element arranged on multilayer printed circuit board 02 p0193 A66-11929  
 Fluidic devices, discussing design, equivalence to logic circuits, fluid amplifier application to build flip-flops, etc 06 p0809 A66-16794  
 Transistor-tunnel diode flip-flop with built-in gating 11 p1669 A66-23159  
 Integrated circuit gate ring counters, noting flip-flop variety comparison 11 p1677 A66-23178  
 Realization of numerical counters with micrological elements, discussing flip-flop and memory elements 16 p2656 A66-30964  
 Electric parameters of components and resultant properties of transistorized flip-flop circuits 16 p2663 A66-3102
- Electrical control of boundary layer flip-flop fluidistor by disruptive discharge between electrodes producing pneumatic pressure shocks that switch output flow 20 p3501 A66-3764  
 Operation principles of turbulence amplifiers, considering application to low cost automation, using conventional pneumatic valves and cylinders 20 p3502 A66-3765  
 Frequency meter for measuring center frequency of random pulses distributed according to Poisson law, consisting of integrating circuit with high time constant 22 p3918 A66-4040  
 Complementary symmetry flip-flop an similar transistor micropower digital logic circuit design 23 p4048 A66-4114
- FLOTATION SYSTEM**  
 Floated inertial platform, gimballess attitude device utilizing floated sphere to isolate inertial components from acceleration and vibration environments 01 p0099 A66-1001  
 Unique free-floating externally ballasted system for obtaining static flotation characteristics 16 p2677 A66-3045  
 Apparent additive mass coefficient for three-dimensional hydrodynamic impacts problem of floating sphere in incompressible fluid 20 p3548 A66-38118  
 Floating vibratory gyroscope having enhanced sensitivity to angular velocity 21 p3739 A66-3932  
 Tests for obtaining water trajectory data and underwater flow field photographs used in determining deployment sequence of water recovery system flotation bag for reentry vehicle 22 p3987 A66-40600

**FLOW CHAMBER**  
 Low speed flow visualization technique using light-pulse illuminated plastic particles suspended in revolving bowl of brine 09 p1364 A66-20399

**FLOW CHARACTERISTICS**  
 Approximate determination of flow characteristics around multistage nonstationary blade configuration, using singularity method 01 p0006 A66-10442  
 Tangential velocity profile and flow temperature in vortex chamber of vortex tube and dimensions of tube, nozzle and cold-end orifice 02 p0217 A66-11589  
 Discrete gas-into-liquid flow process, compensating absence of mass forces and unfavorable load directions with motion of liquid 02 p0218 A66-11657  
 Pohlhausen method applied to shock wave/boundary layer interaction, calculating flow characteristics of laminar separation region 04 p0455 A66-14138  
 Heat transfer and flow friction characteristics of matrices of high porosity with radiation heat source [ASME PAPER 65-HT-6] 05 p0782 A66-14734  
 Flow properties in turbulent near wake of circular and elliptic cones at zero angle of attack in Mach 6 flow [AIAA PAPER 66-54] 07 p0980 A66-17897  
 Restatement of physical definition of Reynolds number, making it valid for all types of flow 08 p1206 A66-18855  
 Heat transfer and flow friction characteristics of matrices of high porosity with radiation heat source [ASME PAPER 65-HT-6] 11 p1785 A66-22188  
 Imp-I observations of solar wind properties, including interaction with geomagnetic field and flow characteristics of positive ion component 11 p1775 A66-23132  
 Rocket equipment simulation on rocket engine test facilities, describing fuel tank design for experiment with suitable flow characteristics and parameters 12 p1829 A66-24317  
 Flow past elliptic cones in wind tunnels at varying Mach and Reynolds numbers, noting surface pressure distribution, shock wave shapes and flow parameters at supersonic speeds 12 p1798 A66-24439  
 Prediction of local flow conditions at crest of aerofoil section in sonic stream 13 p1992 A66-26697  
 Quasi-linearization applied in boundary layer calculations, noting simple flow over solid surface 15 p2479 A66-29299  
 Two-dimensional flow of incompressible conducting viscous liquid in inlet region of

straight channel under magnetic field, obtaining flow characteristics 15 p2553 A66-29742  
 Flow characteristics of pneumatic resistors determined by three-point method 16 p2636 A66-30633  
 Nonstationary flow past spheres and cylinders in electromagnetic shock tube, determining time required for flow to become stationary 16 p2682 A66-31295  
 Effect of oscillatory relaxation of air boundary layer on flow characteristics around wedge 16 p2632 A66-31629  
 Approximation for moment equations of kinetic theory which describe source flow expansion with application to free jet 17 p2907 A66-32412  
 Primary and secondary flow interaction in plug nozzle, obtaining solutions by iteration and isentropic relation 17 p2839 A66-32476  
 Flow characteristics, design and performance data for subsonic two-dimensional straight centerline diffusers [ASME PAPER 66-FE-10] 17 p2915 A66-33264  
 Beam deflection type proportional fluid amplifier, noting pressure and flow gain parameters, transfer characteristics, etc 18 p3054 A66-34129  
 Critical parameters and flow characteristics of swept wings with full-chord laminar flow, noting boundary layer disturbance effects 18 p3050 A66-34950  
 High temperature flow characteristics in free piston shock tube measured by means of pulsed light of He-Ne gas laser 19 p3339 A66-35353  
 Ferromagnetic fluid developing body force under magnetic field influence, noting changes in internal pressure, velocity, etc, applied to attitude control devices, accelerometers, etc 19 p3445 A66-36178  
 Degree of similarity of turbulent flow characteristics in geometrically similar flows 24 p4197 A66-42949

**FLOW COEFFICIENT**  
 Flow coefficient through nozzle with circular cross section and elliptical cylindrical profile supplied from container with static pressure equal to stagnation pressure 03 p0314 A66-12695  
 Losses when compressible and constant density fluids flow across abrupt enlargements and contractions [ASME PAPER 65-WA/PTC-1] 05 p0663 A66-15603  
 Thrust measurement for calibrating nozzle flow coefficients by direct primary method [ASME PAPER 64-WA/FM-3] 06 p0871 A66-16220  
 Flow loss in conical diffusers with boundary layer suction through single slit 16 p2629 A66-30813  
 Flow coefficient of nozzle calculated by thickness of quantity of motion of laminar boundary layer at nozzle exit 20 p3545 A66-37412  
 Unsteady air flow discharge coefficients compared for sharp-edged orifices with steady flow values 23 p4009 A66-41700  
 Flow coefficient of elliptical cylindrical pipe, analyzing boundary layer at exit for various Reynolds numbers, noting velocity profile 23 p4014 A66-42057

**FLOW DEFLECTION**  
 Axial deviation of gas flow resulting from mixing turbulent gas jets 07 p1019 A66-17395  
 Rotation vector increase derived for secondary incompressible fluid flow in curved channels 07 p1023 A66-18134  
 Flow induction by rotary jets, involving isentropic flow deflection followed by constant-area mixing 09 p1327 A66-20737  
 Crosswind effect on turbulent jet parameters for submerged jet propagation at angle to unrestricted flow 12 p1864 A66-24445  
 Displacement and heat transfer effects of laminar and turbulent boundary layers far downstream in slowly expanding hypersonic nozzle, determining inviscid core flow 15 p2424 A66-29273  
 Nonisothermal axisymmetrical turbulent jet curved by gravity and inertial forces 19 p3342 A66-36465  
 Rotary jet flow induction studied with analytical flow model, noting mutual deflection of primary and secondary flow and jet dissipation 19 p3277 A66-36488

Plasma jet deflection in magnetic field set up by current flowing through four bars so that directions of flow were opposite in adjacent bars 19 p3426 A66-36569  
 Low thrust divergent flow cesium-on-tungsten contact ionization electrostatic thruster for satellite attitude control and stationkeeping missions [AIAA PAPER 66-569] 20 p3628 A66-37051  
 Incompressible flow in two-dimensional bends treated by Rayleigh-Ritz method in Kamiyama modification of conformal mapping 24 p4157 A66-42264  
 Maximum wave drag in supersonic flow deflection 24 p4158 A66-42852  
 Inhomogeneity of axial velocity component in or near blades forming impeller intake of radial compressor attributed to flow deflection 24 p4158 A66-43067

**FLOW DIRECTION INDICATOR**  
 Special cases of conical flow permitting two flows to join and predicting flow limited by conic wall 05 p0605 A66-14536

**FLOW DISTORTION**  
 Velocity and pressure fields caused by slow rotation of sphere in slightly viscoelastic fluid contained in infinite cylinder 01 p0057 A66-10428  
 Transonic test section of S-2 wind tunnel and qualification test to prove good quality of flow 02 p0210 A66-11205  
 Hypersonic wakes, effects of turbulent fluctuations on air ionization reaction rates measured by averaging and regrouping perturbed source terms of chemical rate equations [AIAA PAPER 65-819] 03 p0359 A66-13230  
 Asymptotic solution of disturbance at large distance from source placed in flow of conducting compressible fluid in applied magnetic field 05 p0723 A66-15052  
 Pressure coefficient criterion for transition between two- and three-dimensional turbulent cavity flow 10 p1523 A66-21791  
 Shape of plane and circular jet deformed by gas flow impinging at angle of incidence determined from head drag of jet relative to flow 13 p2062 A66-25320  
 Cold forming of metals, noting thin tube flow boundary variation with permanent deformation due to torsion and tension 13 p2195 A66-25455  
 Perturbation spectra and decrements of plane parallel flows at small Reynolds numbers with even and odd velocity profiles 14 p2278 A66-28055  
 Aerodynamic interference between helicopter rotor blade and fuselage and wing in hovering and forward flight, describing method of converting two-dimensional analysis to three-dimensional case 18 p3047 A66-33681  
 Distortion of laminar circular Couette flow measured by end effects, noting two-dimensional tangential motion near axial plane of symmetry 20 p3547 A66-37980

**FLOW DISTRIBUTION**  
**SA CHAPMAN-ENSKOG METHOD**  
 Flow rate distribution and mixing ratio of two impinging jets in simulation of bipropellant liquid rocket system, using hypergolic propellants 02 p0278 A66-11590  
 Extremal concentrations in laminar flow of incompressible viscous liquid along tube of constant cross section, noting recombination reactions 04 p0597 A66-13695  
 Negative correlation coefficient between Izsak satellite geoid and Lee and MacDonald heat flow distribution, suggesting correlation between geoidal undulations and heat flow highs and lows 04 p0518 A66-14454  
 Arbitrary quasi-orthogonals for calculating flow distribution in turbomachine, noting digital computer calculations 05 p0662 A66-14989  
 Molten carbonate fuel cell module featuring flexibility of construction, electrical simplicity and effective gas distribution characteristics [AICE PREPRINT 20D] 10 p1484 A66-21187  
 Free-molecule flow through conical tubes noting mass transport, axial momentum, energy, flow distribution and speed ratio 11 p1635 A66-22938  
 Arbitrary quasi-orthogonals for calculating flow distribution in turbomachine, noting digital computer calculations [ASME PAPER 65-WA/GTP-2]

Concentration profile of heavy species for binary fluid mixture under body force from uniformly mixed upstream condition, considering inviscid hydrodynamical model 18 p3103 A66-34925  
 Atmospheric turbulence coefficient determination from flow fluctuations, measuring error as function of observation duration 20 p3594 A66-38379

## FLOW EQUATION

Plane adiabatic motion of ideal gas determined by separating variables of motion equations in curvilinear coordinates 01 p0006 A66-10471  
 Exaction solution of conical flow equation with zero velocity and pressure 01 p0008 A66-11082  
 Existence and uniqueness of Cauchy problem for Boltzmann equation describing flow past convex body of rarefied gas of structureless particles 02 p0261 A66-12022  
 Hydromagnetic flow against rotating disk noting magnetic field effect on torque, boundary layer thickness and velocity profile, applying motion equation 03 p0399 A66-12689  
 Turbulence and pressure verification of equations for particular class of non-Newtonian fluids 03 p0359 A66-13245  
 Statistical derivation of equations for fully ionized plasma 05 p0725 A66-15239  
 Equations of motion of turbulent gas and formulation of simple model of turbulence from classical Liouville equation and aerodynamics of rarefied gas 06 p0802 A66-16537  
 Self-similarity of solutions to motion equations for relativistic gas possessing point symmetry and nonexistence of isentropic flow 06 p0954 A66-16538  
 Rotationally symmetric flow of non-Newtonian fluid in presence of infinite rotating disk, solving Navier-stokes equation and determining velocity profiles 07 p1019 A66-17258  
 Flow function equations for transonic flow past closed profile 07 p0982 A66-18121  
 Analogy between gas flow through convergent/divergent nozzles and open side-contracted channel 08 p1205 A66-18628  
 Numerical method applied to inviscid compressible two-dimensional or axisymmetrical fluid flows for problems involving subsonic, transonic and supersonic flow regions 08 p1207 A66-19127  
 Newtonian flow over fixed two-dimensional body in unsteady flow, emphasizing shock layer 08 p1164 A66-19129  
 Acceleration of two-dimensional MGD source flow through sonic velocity, simplifying flow equations 08 p1263 A66-19151  
 Equations of inviscid flow of perfect gas over cusped concave bodies, noting dependency of shock wave slope on infinite Mach number 08 p1166 A66-19818  
 Radiation effect on hydrodynamic shock wave parameter distribution for bodies entering dense atmospheric layers at supersonic velocities 11 p1635 A66-23051  
 Convection and stability criteria for nonlinear steady solutions with homogeneous vertical magnetic field acting on fluid 11 p1787 A66-23420  
 Stability of steady finite amplitude convection determined by method of successive approximations 11 p1787 A66-23421  
 Flow parameters of incompressible ideal fluid in axisymmetric curvilinear channel, obtaining and solving nonlinear differential equation 12 p1863 A66-24243  
 Viscosity and thermoconductivity effects on asymptotic sonic flow structure near profiles and bodies of revolution 12 p1863 A66-24342  
 Initial flow in entrance of straight circular pipe computed as refinement of Atkinson and Goldstein solution 12 p1867 A66-24980  
 Two-dimensional analysis of flow in electrofluid dynamic generator showing effect of radial fields and viscous forces on performance, stressing effect on electrical breakdown of gas, noting basic equations 13 p2001 A66-26257  
 Zhukovskii and Lagally theorems for arbitrary fluid motion derivable from

momentum equations of continuous medium 13 p2067 A66-26533  
 MHD theory and experiment 13 p2156 A66-26706  
 Motion equation of viscous oil flow under action of electric forces caused by surface charge 13 p2070 A66-26709  
 Solutions of nonstationary equations of plane laminar MHD boundary layer, using transformation to specialized form of curvilinear coordinates 14 p2338 A66-26773  
 Invariant rheological equation for flow of fluid whose viscosity varies independent of time 14 p2272 A66-26776  
 Existence and uniqueness of Cauchy problem for Boltzmann equation describing flow past convex body of rarefied gas of structureless particles 14 p2334 A66-27573  
 Modified MGD equations describing plane nonstationary flow in magnetic field perpendicular to flow 14 p2345 A66-28067  
 Points in interior and boundary of three-dimensional supersonic gas flow determined, using characteristic method, deriving difference equations 14 p2278 A66-28284  
 Integration of third-order differential equation of laminar boundary layer on porous surface 15 p2477 A66-28777  
 Mathematical model for heterogeneous continua, discussing kinematical definitions, conservation principles, thermodynamics 15 p2478 A66-29250  
 Double unsteady laminar boundary layers on solid bodies in presence of oscillating external flow of small amplitude 15 p2480 A66-29686  
 Equations of motion of turbulent gas and formulation of simple model of turbulence from classical Liouville equation and aerodynamics of rarefied gas 15 p2482 A66-29973  
 Self-similarity of solutions to motion equations for relativistic gas possessing point symmetry and nonexistence of isentropic flow 15 p2603 A66-29978  
 Flow in viscous incompressible conducting fluid subjected to magnetic field in concentric cylinders rotating at different angular velocities, assuming planar motion, using differential equations 16 p2757 A66-30214  
 Hydrodynamical modification of Heller treatment of mixing and unmixing of viscous fluid between two rotating cylinders 16 p2685 A66-30940  
 Approximation of Chaplygin plane motion equations of gas flow at high supersonic velocities 16 p2688 A66-31304  
 MHD first-order partial differential equations used to investigate wave front between perturbed and unperturbed flow regions in magnetosonic propagation through homogeneous medium 16 p2764 A66-31363  
 Optimum operation modes of MHD converter 16 p2637 A66-31368  
 Three-dimensional MHD flow near forward stagnation point magnetic fields with large induction values described by differential equations, showing tendency towards two-dimensional flow 16 p2765 A66-31373  
 Self-similarity criteria in radiative flow for unsteady one-dimensional inviscid flow of perfect gas 17 p3034 A66-32471  
 Self-similar solutions of two-dimensional laminar flow of incompressible electroconductive fluid in channel in crossed electric and magnetic fields, using Jacobi elliptic integrals 17 p2971 A66-32866  
 Prediction of hydrostatic gas journal bearing performance by solving simultaneous flow equations with Fortran II computer program [ASME PAPER 66-LUBS-16] 17 p2932 A66-33187  
 Channel flow general equations including nonviscous uniform flow, steady flow, stagnation state and speed of sound in ideal gas 18 p3098 A66-34121  
 Vorticity and vortex flows, discussing free and forced vortices, circular vortex, spiral vortex, compressible fluids and incompressible flows 18 p3099 A66-34126  
 Boundary layer equations for nonstationary plane flow of viscous incompressible fluid 18 p3100 A66-34545  
 Two physical-space and two spectral solutions of Burger equation which are

exact, viscous and nonsteady 18 p3103 A66-3493  
 Classical/quantum views of nonequilibrium gas flow equations with arbitrary number of relaxation times 19 p3340 A66-3573  
 One-dimensional heat flow equation for liquid nitrogen end-cooled ruby laser rod 20 p3581 A66-3838  
 Transonic flow in axisymmetric nozzle with nearly sharp wall curvatures, extending Friedrich equations 21 p3693 A66-3868  
 Modified Poiseuille equation for gas flow through capillaries, applicable to flow regimes extending from molecular to viscous flow 21 p3725 A66-3894  
 Periodic flows of orientable anisotropic fluids tending to be unoriented at resonance considered through linear equations which predict resonance phenomenon 21 p3727 A66-3917  
 Vector equations of steady incompressible viscous flow in absence of extraneous forces, discussing Beltrami flow, double laminar flow and plane flow 21 p3728 A66-3943  
 Vector equations of steady inviscid thermally nonconducting gas flows from geometric theory of triply orthogonal spatial curves 21 p3729 A66-3944  
 Linear flow equation motion of fluid with suspended impurities, noting that under certain assumptions velocity fields can be described by family of potential functions 21 p3729 A66-3944  
 Nonlinear computational instability in long-term numerical integration of two-dimensional incompressible flow equation 21 p3730 A66-3947  
 Gas flow equations for multilayer insulation systems for both continuum and free molecular flow regimes of interest in cryogenic space vehicle design [AICE PREPRINT 22A] 22 p3897 A66-3988  
 Longitudinal viscosity effect in equations for plane transonic flow for initial stages of shock formation downstream in nozzle 22 p3844 A66-4036  
 Variational principles for viscous, incompressible hydromagnetic equations of flow including continuity equation, motion equations, etc 23 p4099 A66-4112  
 Surface mass transfer effect for supersonic flow over cone, examining solution of equations of motion for inviscid compressible gas with velocity field normal to surface of inner cone 23 p4011 A66-4181  
 Constitutive equations of plastic and elastoviscoplastic flow theory for nonstationary yield conditions and strain hardening 23 p4146 A66-4199  
 Existence of similar solutions for given differential transonic equations for free stream Mach number of unity 23 p4014 A66-4204  
 Radiation fronts in gas dynamics examining flow through or behind aerodynamic shock 23 p4062 A66-4205  
 Motion equations, shear stress and skin friction for three-dimensional flow in conical pipes 23 p4014 A66-4206  
 Similarity solutions of boundary layer equations for blowing through porous surface, obtaining skin friction 24 p4194 A66-4254  
 Velocity gradient on blunt axisymmetric bodies in stagnation region if pressure distribution is known, using isentropic flow equations 24 p4158 A66-4277  
 Invariant solution classification for equations of two-dimensional steady stagnation motion of gas 24 p4196 A66-4286  
 Laminar flow of fluid with varying viscosity in tube with walls at constant temperature, analyzing equations of motion and equations for conservation of energy 24 p4197 A66-4299

**FLOW FIELD**  
 Steady nonviscous flow in field with sources of energy, force and mass investigated under assumption of small perturbations 01 p0057 A66-1043  
 Hypersonic flow field about slender cone derived from heat-pressure-wake survey 01 p0007 A66-1067  
 Flow field about subsonic jet exhausting into quiescent and low velocity air stream [AIAA PAPER 65-704] 01 p0008 A66-1099  
 Pressure distribution measurement systems

for flow field of main turbojet intake of one-eighth scale model of Mirage III V aircraft 02 p0210 A66-11206

Turbulent mixing of axisymmetric jet of partially dissociated nitrogen with ambient air, establishing mixing and decay characteristics [AIAA PAPER 65-823] 03 p0359 A66-13231

Supersonic and hypersonic flow fields around plane and axisymmetric bodies and inlets obtained by nonlinear characteristics method 04 p0454 A66-13519

Flow field in centrifugal compressor impeller [ASME PAPER 65-WA/GTP-7] 05 p0608 A66-15722

Closed form solution of axisymmetric transonic flow about obstacle 05 p0665 A66-15796

Oscillating disk induced flow, discussing mathematical formulation of flow field produced by finite-amplitude rotational oscillations 06 p0872 A66-16354

Flow field of two-dimensional Bunsen flame according to source sheet approximation 07 p1154 A66-17940

Flow field in rectangular cavities at low Reynolds number 07 p1020 A66-17941

Asymmetric hypersonic blunt body problem of determining two-dimensional steady rotational flow field between profile and detached shock 07 p0982 A66-18132

Spatial distributions of free electrons in near wakes of spheres in hypersonic flight [AIAA PAPER 66-55] 07 p0983 A66-18449

Two-dimensional probability distribution for simultaneous turbulent velocities at two points in plane perpendicular to mean velocity of wind tunnel 08 p1205 A66-18542

Thrust-vector control and flow field produced by secondary gas injection into supersonic stream 08 p1162 A66-18831

Predicting wake-induced nonuniform flow field in plane of rotor disk [AIAA PAPER 66-17] 08 p1162 A66-18951

Inviscid supersonic flow fields of reacting gas mixture around pointed bodies calculated, using characteristics method 08 p1164 A66-19128

Nonstationary supersonic flow in near sonic range, calculating pressure distribution in oscillating profile 09 p1328 A66-20875

Entry flight, relation between laboratory flows, in-flight conditions and MGD effects on flow field, drag and heat transfer [AIAA PAPER 66-161] 10 p1611 A66-21682

Approximate method for analyzing chemically reacting turbulent flow fields having initial homogeneities [AIAA PAPER 65-37] 10 p1523 A66-21770

Flow field around minimal-drag slender body examined by Newton-Busemann theory and gas dynamic theory 11 p1632 A66-22524

Expansion tube for interferometric observation of hypersonic flow fields 11 p1684 A66-22830

Flow field near leading edge of heated flat plate in Mach 0.5 airflow 11 p1634 A66-22934

Hypersonic flow field about slender cone derived from heat-pressure-wake survey 13 p1990 A66-25182

Nonequilibrium inviscid flow about arbitrarily shaped body with detached shock waves, using method with time derivative and bypassing boundary conditions [AIAA PAPER 65-24] 14 p2218 A66-27404

Longitudinal wave histories in liquid rocket motor 14 p2374 A66-27450

Stream function coordinates for flow in shock layer around axisymmetric blunt-nosed body in hypersonic stream 14 p2221 A66-28145

Complex variable theory of flame surface interaction and flow field of two-dimensional V-shaped flame simulated by source and sink sheets 15 p2617 A66-29605

Linearized unsteady nonequilibrium flows produced by unsteady motion of thin foil or circular cylindrical shell in incompressible gas 16 p2687 A66-31288

Behavior of inviscid supersonic conical flow fields near crossflow stagnation points studied by constructing coordinate expansions of exact conical flow equations [AIAA PAPER 66-491] 16 p2631 A66-31494

Relation between shock expansion method and Whitham rule to examine shock wave motion in nonuniform

region 16 p2691 A66-31661

Source type hypersonic free stream effects on flow field about axisymmetric cone, obtaining properties in shock layer, boundary layer, pressure gradient, etc 17 p2837 A66-32080

Stationary or slowly moving nonconducting sphere in current carrying incompressible fluid 17 p2908 A66-32421

Effect of sudden enlargements and contractions in flow area on single pressure waves in gases in pipes, covering incident waves of various pressure amplitudes 17 p2841 A66-32890

Turbulent swirling jets issuing from round orifice studied experimentally and theoretically, based on continuity equations and Reynolds equations of motion 17 p2913 A66-33067

Loading of thin ring airfoil in unbounded spherical source flow field, calculating vortex distribution, strength, etc [ASME PAPER 66-FE-3] 17 p2914 A66-33259

Short duration simulation of rocket exhaust products, flow duration through nozzle and effect on recirculation flow fields 17 p2904 A66-33475

Finite difference method for shock wave propagation into supersonic crossflow 17 p2916 A66-33479

Aerodynamic stability of slender cone under ablation effect including pressure distribution measurement, ablation-flow field interaction, flow analysis during oscillation, etc [AIAA PAPER 66-410] 18 p3045 A66-33635

Method of characteristics computer code applied to partial differential equations of inviscid fluid, calculating flow fields [AIAA PAPER 66-412] 18 p3097 A66-33637

Partial differential equations for three-dimensional inviscid flow solved for flow field over blunt body shapes at various angles of attack, for application to Apollo spacecraft [AIAA PAPER 66-413] 18 p3045 A66-33638

Surface friction induced vertical motions for nonaccelerated flow calculated from surface pressure pattern 18 p3129 A66-33963

Static enthalpy and velocity profile within viscous wake of circular cylinder at Mach 20 18 p3049 A66-34582

Flow field of highly underexpanded axisymmetric jet impinging on flat convex or concave surface calculated by modified inverse method 18 p3100 A66-34600

Two-dimensional solution of Laplace equation for vortex formations in incompressible fluid 18 p3100 A66-34634

Approximation theory for calculating linearized subsonic and supersonic flow over pulsating bodies with low aspect ratio, noting structure of flow field 19 p3277 A66-36641

Interferometric measurement of density distributions in shock layer of nonequilibrium flow field around cone 21 p3694 A66-39168

Hypersonic flow, discussing heat effect on flow parameters, shock and motion equations, drag increase, etc 22 p3897 A66-39699

Generation of pressure wave by explosion of condensed phase fuel particles dispersed in gaseous oxidizer [AIAA PAPER 65-357] 22 p3999 A66-40357

Pseudoviscosity method using finite difference equations for calculating two-dimensional flow fields for supersonic motion of inviscid gas 22 p3901 A66-40494

Aerodynamic problem of steady potential flow and added mass in unsteady motion of idealized hemispherical parachute 22 p3845 A66-40591

Tests for obtaining water trajectory data and underwater flow field photographs used in determining deployment sequence of water recovery system flotation bag for reentry vehicle 22 p3987 A66-40601

Bluntness and boundary layer displacement effects on air breathing engine hypersonic inlet flow fields [AIAA PAPER 65-617] 23 p4007 A66-41109

Electrostatic probe in collisionless plasma wherein sheath joins region of ambipolar diffusion 23 p4104 A66-41494

Liquid drop flow in twisted fan-shaped nonisothermal jet allowing change in

viscosity coefficient in flow field, using boundary layer equations 23 p4055 A66-41567

Extrusion of viscous incompressible substance through round hole in infinite wall, obtaining pressure and velocity fields 23 p4057 A66-41738

Mass transfer into aerodynamic body flow fields, examining model shear flow in Rayleigh problem for blowing current across gas-solid interface 23 p4058 A66-41900

Hydrodynamic phenomena in rotating fluid systems, characterizing flow of fluid whose viscosities, thermal conductivity and specific heats are constant 23 p4058 A66-41940

Radiometer system with photomultiplier tube for measuring absolute radiation from hypervelocity projectile flow fields 24 p4208 A66-42181

## FLOW GEOMETRY

Cross-sectional geometry of Nernst-Ettingshausen devices optimized for rectangular geometry and for Norwood spiral screw thread configuration 02 p0270 A66-11430

Ringleb theory on snow cornice-like flows analyzed, including arguments on representation of real fluid flows and model of step-sink flow [ASME PAPER 65-WA/FE-11] 05 p0664 A66-15678

Geometrical theory governing flow over surface of convergent spillway 14 p2277 A66-27936

Linearized problem of oblique incidence of weightless flow of ideal gas on surface of heavy liquid, using eigenvalues and eigenfunctions of integral equation 19 p3342 A66-36470

Multistep axisymmetrical supersonic exit cones optimum geometry design diagram based on external oblique and normal compression shock 20 p3628 A66-36927

Rotor downwash angle and tunnel geometry effect on maximum size rotor that can be tested in closed throat wind tunnel [AIAA PAPER 66-736] 22 p3893 A66-40626

## FLOW GRAPH

SA SIGNAL FLOW GRAPH

Plotting and analysis of oriented graphs of electrical circuits of any complexity by considering them as N poles 19 p0050 A66-10218

Digital computer determination of coefficients of transfer function from impulse response in time domain 07 p1060 A66-18334

Columbium and tantalum alloy tubing production for space power systems including extruding, rocking, annealing, flow diagram, etc 12 p1893 A66-23627

Flow graph in model of jet curtain in ideal incompressible weightless fluid with isolated vortex 12 p1798 A66-24433

Flow diagram for dimensioning of jet compressors to plot irreversible mixing, noting shape of mixing channel, design guidelines, etc 16 p2632 A66-31645

Plotting and analysis of oriented graphs of electrical circuits of any complexity by considering them as N poles 17 p2898 A66-31901

Flowgraph techniques for closed systems, discussing properties, approximation method, topology equation, frequency response, constraints, oscillatory and stochastic processes, etc 17 p2898 A66-31954

Flow graph analysis of lossless nonideal 3- and 4-port junction circulators for visualizing scattering matrices and calculating coefficients of combined networks 17 p2896 A66-33277

Piecewise linear system modeling via topological techniques, using flowgraph method for network synthesis 18 p3090 A66-34247

Approximation technique for flow graph that eliminates nonessential equivalent circuit elements, providing for derivation of most concise model with preassigned accuracy 18 p3092 A66-35040

## FLOW MEASUREMENT

Density distribution before sphere in low density hypersonic gas flow measured with electron beam densitometer 01 p0059 A66-10635

Rotating arm apparatus at National Aerospace Laboratory in Japan for pressure-distribution and heat-transfer flow

measurement 01 p0053 A66-10636  
 Relationship of laminar wake width to wake transition distance for cones 02 p0175 A66-11561  
 Rheology of liquids discussing viscometers, models for prediction and industrial and biological application 03 p0355 A66-12601  
 Book on vacuum science and engineering covering properties of gases at low pressure, vacuum measurements and vacuum pump and system design 04 p0545 A66-13934  
 SNAP-8 instrumentation, emphasizing selection and installation of aerospace type transducers for liquid metal service [ISA PREPRINT 1.11-4-65] 05 p0683 A66-15510

Coupled flow problem, comparing flow induced by steady rotation of permeable and impermeable disks 06 p0871 A66-16353  
 Compressible subsonic flow with symmetric Zhukovskii profile calculated by correspondence principle 07 p1023 A66-18112  
 Book on flow measurement through pipes by square-edge orifice plate using corner tappings, including pipe layout, fluid density, temperature, pressure, orifice design, tables, graphs, etc 08 p1221 A66-18679  
 Relative effect of restrictive orifices, venturis or nozzles on measurement accuracy of fluid flow rates in pipes 11 p1703 A66-22207

Mean and dynamic skin friction, separation and transition in low-speed laminar and turbulent flow measured by thin-film heated element 11 p1693 A66-23013

Fluid dynamic behavior of system predicted by performing measurements on model of system 11 p1693 A66-23173

Liquid hydrogen flow system performance during startup transient of nuclear rocket measured in full-scale simulated engine system, approximating in-flight exhaust conditions 12 p1911 A66-23699

Cavitation delay time variation with velocity, size, dissolved air content, liquid tension, flow history and surface characteristics [ASME PAPER 65-FE-9] 12 p1864 A66-24552

Blood flow measurement by indicators by taking samples in situ-dyes, thermomodulation, krypton 85 14 p2230 A66-27552

Electromagnetic and ultrasonic flow measurement of blood flow rate for cardiocirculatory physiology, discussing future application of nuclear resonance and laser 14 p2230 A66-27553

Dynamic and steady state flow disturbances encountered by aircraft during carrier landing approach in water tunnel simulation study [AIAA PAPER 65-332] 16 p2634 A66-31319

Cavitation effect on discharge coefficient of standard flow nozzles [ASME PAPER 66-FE-12] 17 p2915 A66-33266

Dynamic pressure and flow measurements on small integrated high speed systems, using high speed pressure transducing equipment in integrated circuits and hot-wire anemometry 20 p3560 A66-37652

Hot-wire anemometer design with linear characteristics for measurement of velocity fluctuations of flow 20 p3560 A66-37760

Carbon dioxide flow density in wake of shock wave front 21 p3726 A66-39091

## FLOW METER

Transverse-field induction flowmeter to monitor shock tube gas velocity 03 p0353 A66-13250

Thermal flow meter incorporating effect of axial conduction [ASME PAPER 65-HT-19] 05 p0676 A66-14741

Discharge coefficient of quadrant-edge orifice and performance at very high Reynolds number [ASME PAPER 65-WA/FM-2] 05 p0663 A66-15517

Pressure index for predicting upstream nonnormal velocity distributions on orifice meters [ASME PAPER 65-WA/FM-3] 05 p0684 A66-15518

Nonstandard approach section effects on flow coefficients for venturi and orifice meters [ASME PAPER 65-WA/FM-5] 05 p0684 A66-15519

Density and Reynolds number effects on turbine meter performance in gas flow

## measurement

[ASME PAPER 64-WA/FM-1] 06 p0879 A66-16219

Experimental assembly using liquid gallium cycle for testing electromagnetic pumps and flow meters 06 p0918 A66-16847

Piston-type flowmeter for automatic recording fuel consumption 09 p1380 A66-20310

Thermal flow meter incorporating effect of axial conduction [ASME PAPER 65-HT-19] 11 p1703 A66-22187

Laser Doppler velocimeter for measuring localized flow velocities in liquids 14 p2306 A66-27053

Maintaining of flow similarity in calibration of nozzle type water meters for study of working processes of pumps 14 p2225 A66-27698

Time constant of turbine-flow meter sensor 14 p2295 A66-27712

Fringing effect on sensitivity of magnetic flow meter 17 p2926 A66-32874

Quadrant edge orifice meter performance under cavitating conditions, noting discharge coefficient curves [ASME PAPER 66-FE-9] 17 p2915 A66-33263

Viscosity effect on performance of turbine type flow meters calculated to meet accuracy requirement for complete use of propellants in rocket propelled vehicles 19 p3361 A66-36646

Calibration of turbine flow meter on air against pitot tube traverse, considering random scatter 19 p3362 A66-36750

Leak-rate transducers capable of aerospace flight detection of small gas flow rates in critical joints of Saturn engine systems 20 p3557 A66-37215

Calibration device for flow and volume meters for liquid rocket engine propellant 20 p3561 A66-38066

True-mass cryogenic flowmeter for liquid oxygen, hydrogen and nitrogen with liquid-helium compatibility 21 p3740 A66-39426

## FLOW PATTERN

Physical mechanisms of instabilities altering two-phase flow pattern of liquid film 01 p0165 A66-10907

Convection pattern changes in Earth mantle and continental drift as evidence of cold origin of Earth 03 p0361 A66-12379

Flow past fluid film-covered sphere and cylinder of given radius in different fluid, discussing external and film flow conditions 04 p0509 A66-13555

Dimensionless flow parameter for free convection, equivalent to Reynolds number for forced convection, used for correlating through single curve free and forced convective heat and mass transfer from single bodies 07 p1149 A66-17517

Critical condition for aerosol deposition from symmetrical flow past solid body, considering case of circular cylinder 08 p1247 A66-19304

MHD flow patterns 12 p1920 A66-23955

Mixing of laminar viscous incompressible jets expelled from equally spaced holes in vertical wall, obtaining solution by using Navier-Stokes equation 12 p1864 A66-24444

Constant section mixture of flows with different enthalpies, noting sonic blocking for terminal temperature differences 13 p1991 A66-25470

Potential double waves at interface between two-dimensional nonsteady barotropic gas flow and region of undisturbed gas 13 p2063 A66-25633

Simultaneous diffusion of momentum and energy in turbulent mixing, noting static and stagnation properties, density and temperature variations, flow pattern, etc 13 p2070 A66-26721

Pressure drop as function of flow rate for helical flow of non-Newtonian polyisobutylene solution 15 p2477 A66-28615

Flow pattern and heat transfer distribution in regions of adverse pressure gradient and separated flow over two-dimensional models in Mach 10 airflow 15 p2424 A66-29271

Performance of short supersonic nozzles producing expansion and density jumps in flow, noting efficiency in obtaining maximum driving effect 16 p2630 A66-31303

Bergman integral operator to generate families of transonic flow patterns which yield Ringleb pattern as special

## case

Geometrically different volutes effect on impeller of centrifugal pump performance, discussing radial thrust, head and runout capacity [ASME PAPER 66-FE-14] 17 p2932 A66-33268

Critical condition for aerosol depositor from symmetrical flow past solid body, considering case of circular cylinder 19 p3393 A66-36043

Asymmetric shear flow of viscous fluid past flat plate, justifying constant pressure assumption and examining flow patterns at lower surface in plate proximity 20 p3547 A66-37979

Flow transition from propeller in free stream to axial pump in cylindrical shroud for impeller clearance between zero and infinity 21 p3695 A66-39499

Aerodynamic breakup of liquid drops in flow behind plane shock wave analyzed via high speed photography, noting experimental setup, parameter variation, etc 22 p3899 A66-40199

Flow pattern of three-dimensional interaction of oblique shock with boundary layer obtained when shock generated by wedge spanning supersonic wind tunnel interacts with side wall 22 p3901 A66-40499

Annular nozzle shapes established via method of straight line characteristics, noting flow patterns at various regions 23 p4009 A66-4173

Analytical method for studying pattern of flow from nozzle into vacuum used to calculate plume shape for rocket exhausting into hypersonic stream 24 p4158 A66-42799

Low level atmospheric flow structure resolution, noting equipment and results of wind speed variations 24 p4235 A66-43079

## FLOW REGULATOR

Regenerative heat exchangers, covering heat transfer and pressure loss characteristics of glass ceramic matrix materials [ASME PAPER 65-HT-35] 05 p0784 A66-14759

Supersonic retardation cascades for losses, reduction of supersonic flow to subsonic in turbines and compressors 10 p1591 A66-21389

Gas flow regulator system conforming to prescribed time-dependent program, based on mass flow limitation properties of sonic orifices and polynomial approximation to exponential 12 p1859 A66-24719

Flexible baffle effect on nature and magnitude of damping and sloshing motion of liquid propellants over wide range of conditions 16 p2685 A66-30919

## FLOW RESISTANCE

Calculation of rotationally symmetric turbulent boundary layer flow through straight diffusers 01 p0006 A66-10219

Drag reduction for sailplanes, investigating adoption of laminar foil section 01 p0008 A66-11099

Sphere drag measurements at low Reynolds number 02 p0219 A66-11959

Drag of sphere moving along axis of rotating viscous fluid 02 p0219 A66-11959

Flow resistance of partially permeable wedge to incompressible fluid incident on base or vertex 03 p0359 A66-13189

Peripheral friction stresses and friction resistance moments in flow around rotating disk in closed housing 04 p0508 A66-13449

Air flow resistance and effective porosity of round wire parachute fabrics with varying wire thickness and mesh width 04 p0538 A66-13539

Solid bodies in plane parallel flow of ideal fluid, discussing one-parameter family of ablation bodies with steady shape 04 p0596 A66-13559

Quasi-steady flow relations to study wave action in duct with gauze 06 p0873 A66-16939

Apparatus for measurement of flow resistance of gas diffusion electrodes 07 p0990 A66-17239

Quantitative estimation of effect of hydrodynamic resistance of adding surface active additives to turbulent fluid flow 07 p1023 A66-18159

Aerodynamic pressure and resistance calculated from gas flow past circular cylinders with piecewise constant diameters 08 p1232 A66-19339

Pressure distribution on star-shaped bodies in wind tunnel at Mach 4 and Reynolds

number .000006 08 p1165 A66-19480  
 Fluid resistance of rough disk rotating in closed vessel, noting dependence on flow Reynolds number of plate moment coefficient, axial clearance, etc 08 p1210 A66-19554  
 Resistance due to viscous shear on circular cylinder in oscillating stream calculated by boundary layer equations formulated in polar coordinates 09 p1367 A66-20262  
 One-dimensional adiabatic compressible gas flow in cylindrical tube taking into account Reynolds number variations along tube and compressibility effect on friction factor 09 p1368 A66-20827  
 Hydraulic resistance coefficient dependence on Reynolds and Hartmann numbers in turbulent flow of conducting fluid through tube in magnetic field 11 p1743 A66-22337  
 Friction resistance of compressible turbulent gas flow through initial section of cooled pipe with large gas-wall temperature gradients 11 p1688 A66-22597  
 Variable mass plasma blob acceleration due to eroding electrodes, taking into account motion resistance of unperturbed gas 11 p1745 A66-22850  
 Clamping conditions effect on critical flow rate of fluid moving through pipe, taking into account direction and friction forces on stability 11 p1782 A66-22853  
 Fluid flow impedance parameters and properties, discussing nonlinear orifice resistors in fluidic circuitry, tube resistance and fluid capacity 12 p1803 A66-24384  
 Hydraulic resistance of air flow through porous steel plate 13 p2065 A66-26483  
 Hydraulic resistance and heat transfer in laminar-turbulent transition region in tube with heating and cooling of water 14 p2414 A66-27830  
 Liquid flow with viscosity changing under effect of nonisothermicity 15 p2478 A66-29222  
 Hydraulic resistance, heat and mass transfer in vortical flow, noting power optimal conditions of operation 16 p2825 A66-30323  
 Orifice increases resistance coefficient when edge of wedge is facing incident flow and decreases it when wedge is turned around 16 p2689 A66-31518  
 Critical flow rate, critical pressure ratio and critical mass flow of dissipative adiabatic nozzle and pipeflow of ideal gas 16 p2690 A66-31635  
 Dolphin body design for integrating resistance and propulsion mechanisms 19 p3279 A66-36050  
 Brake force acting on piston of constant-speed controller with fluid friction 21 p3698 A66-39330  
 Nearly free molecular flow in rarefied gas dynamics in comparison of theoretical and experimental results with reference to drag 23 p4060 A66-42025  
 Pressure losses in vanned elbows of circular cross section and possibility of gain in efficiency by splitting vanes 24 p4195 A66-42582

**FLOW SEPARATION**  
 Edge suction effect occurring in steady subsonic flow along one of legs of convex corner directed toward edge 02 p0175 A66-11558  
 Hypersonic flow separation over simple geometries and aerodynamic controls, noting pressure gradients and heating-rate distributions [AIAA PAPER 65-753] 03 p0314 A66-12587  
 Centripetal gas turbine interblade channel without diffuser regions in rotor eliminates pressure gradient buildup in flow core 03 p0315 A66-12698  
 Jet deflection by curvilinear walls in VTOL takeoff, examining parameters affecting flow separation 04 p0572 A66-13512  
 Flow separation effect on heat transfer characteristics of turbulent pipe flow [ASME PAPER 65-WA/HT-12] 05 p0790 A66-15651  
 Outlet angle in axial compressor cascades, accounting for effect of shear flows, Bernoulli surface rotation and flow separation [ASME PAPER 65-WA/FE-2] 05 p0608 A66-15714

Separation of gases from isotopes in compression shock produced in expanding gas flow past obstruction, dependent on gas density and hydrokinetic properties of components 06 p0875 A66-17052  
 Modified Karman-Pohlhausen pulse integral equation for calculating boundary layers is more accurate when seeking flow separation point 07 p1019 A66-17391  
 Effect of wake of flow past body on pressure distribution over body 07 p0979 A66-17477  
 Clearance loss in rectilinear cascade, emphasizing flow separation and vortices shed at blade tips 07 p0880 A66-17483  
 Ablation effects on static and dynamic stability of reentry vehicle [AIAA PAPER 66-51] 07 p1141 A66-17896  
 Lip shock strength in flow behind backward facing step 08 p1207 A66-19155  
 Friction of rotating disk in revolving housing, noting parameters of dimensionless momentum coefficient, separation of fluid flow into core and secondary flow 09 p1384 A66-20486  
 Laplace transform and analog computation applied to simulation of heat transfer between wall separated fluids, determining transfer functions and frequency responses 09 p1472 A66-20908  
 Flow separation, wake configuration and droplet motion in purified systems shadowgraphically analyzed 10 p1524 A66-21808  
 Flow separation effect on heat transfer characteristics of turbulent pipe flow [ASME PAPER 65-WA/HT-12] 11 p1785 A66-22192  
 Mean and dynamic skin friction, separation and transition in low-speed laminar and turbulent flow measured by thin-film heated element 11 p1693 A66-23013  
 Supersonic gas flow past cylindrical obstacle on plate in wind tunnel at Mach number 2.5, noting separation line, pressure distribution and flow orientation 12 p1798 A66-24437  
 Pressure effect on cone caused by spike protruding at angles of attack may provide aerodynamic directional control at supersonic speed 16 p2629 A66-31117  
 Three-dimensional flow separation of plane boundary layer caused by half delta wing on flat plate using Cooke small cross-flow method and Maskell separation criterion [AIAA PAPER 66-428] 16 p2631 A66-31465  
 Position and dimension of separation zone and bottom pressure calculation for supersonic gas flow around body 16 p2632 A66-31619  
 Turbulent gas flow in wake of flow separation from solid surface 17 p2909 A66-32563  
 Laminar separation in supersonic and hypersonic flow analyzed in gun tunnel, noting concept of incipient separation and free interaction principle [AIAA PAPER 66-455] 17 p2910 A66-32761  
 Terminal shock-boundary layer interaction on slender cone-cylinder payloads at supersonic speeds and resulting flow separation [AIAA PAPER 66-471] 18 p3250 A66-33653  
 Three-dimensional flow separation about immersed surfaces 18 p3098 A66-34019  
 Shock wave boundary layer interactions and shear flow regimes in hypersonic inlet flows [AIAA PAPER 66-606] 18 p3049 A66-34447  
 Boundary and shock layer separation visualization, using nitric oxide in flows with massive blowing 18 p3100 A66-34602  
 Fluidic electro-fluid converter development from study of jet separation from curved surface as affected by geometry, Reynolds number and wall temperature 19 p3282 A66-36673  
 Probabilistic model equations relating column height, feed location, degree of separation and flow rates for continuous chromatographic column 20 p3510 A66-37363  
 Strouhal number effect on sound-excited laminar-turbulent transition in separated boundary layers formed by round or plane nozzle 22 p3899 A66-40382  
 Pressure gradient elution technique for rapid and quantitative chromatographic separation of purine and pyrimidine

bases 22 p3860 A66-40402  
 Lifting wings in supersonic regime, analyzing flow separation at leading edges [ICAS PAPER 66-20] 22 p3847 A66-40670  
 Wind tunnel tests determining plume induced flow separation pattern on missile configurations as ratio of nozzle to ambient pressure 23 p4012 A66-41914  
 Ablation effects on static and dynamic stability of reentry vehicle [AIAA PAPER 66-51] 24 p4283 A66-42770

**FLOW STABILITY**  
 Nonuniqueness and low stability of solutions to hydromechanical problems demonstrated by steady motion of viscous fluid 01 p0055 A66-10168  
 Flow stability theorem for viscous homogeneous and incompressible fluid through infinitely long cylindrical pipe of arbitrary cross section 01 p0058 A66-10504  
 Inviscid stability of laminar mixing of two parallel streams of compressible fluid with respect to three-dimensional wavy disturbances 02 p0218 A66-11955  
 Orr-Sommerfeld equation of shear layer between parallel uniform streams in Hermite function series, noting wave number 02 p0219 A66-12074  
 Steady flow possessing extremal kinetic energy compared to equivortex flow for stability analysis 02 p0219 A66-12169  
 Stability analysis of adiabatic flow of incompressible fluid without equation linearization and by constructing functional from hydrodynamic fields 02 p0220 A66-12170  
 Stabilization of inviscid pure-vortex flow with finite conductivity, using axially applied magnetic field [AIAA PAPER 64-435] 03 p0399 A66-12787  
 Hypersonic wake transition map noting far wake, near wake and interpolation phenomena 03 p0356 A66-12814  
 Stabilization of laminar conducting fluid flowing down inclined plane in transverse magnetic field 03 p0356 A66-12946  
 Stability of parallel flows with frequency-dependent viscosity 03 p0357 A66-12960  
 Laminar stability of incompressible and stationary flows with curved streamlines, applying integral method and noting time dependence of flow 03 p0357 A66-13089  
 Flow of non-Newtonian liquids in cylindrical pipes containing cylindrical parallel cores moving longitudinally at constant speed 03 p0358 A66-13090  
 Plasma flow discussing flow mode stabilization in channel formed by two electrodes, flow parameters and plasma conductivity 04 p0529 A66-13553  
 Non-Newtonian media, parallel flow, discussing effects of two- and three-dimensional perturbations on flow stability 04 p0510 A66-13872  
 Entrance region Newtonian flow analysis in tube of circular cross section for possible use in viscometry and flow stability studies [AICE PREPRINT 19D] 04 p0511 A66-13935  
 Laminar flow stability of layer of viscoelastic fluid flowing down infinite inclined plane under action of gravity 04 p0512 A66-14428  
 Hydrodynamic stability of parallel dusty gas flows, discussing energy balance and viscous sublayer structure 05 p0662 A66-14703  
 Flow stability in multitube forced convection vaporizers, using Freon 113 in closed test loop with five-tube boiler [ASME PAPER 65-HT-61] 05 p0786 A66-14762  
 Nonlinear stability of zonal flows in two-dimensional quasi-solenoidal model when absolute eddy is monotonic function of width 06 p0905 A66-16549  
 Flow induced structural vibrations, noting interdependence between deformation and fluid dynamic loading 06 p0872 A66-16615  
 Similarity solutions of boundary layer equations with algebraic decay for viscous incompressible fluid inside infinite circular cone 06 p0873 A66-16996  
 Pressure gradient effect on stability of laminar boundary layer when skin friction at wall vanishes, noting Reynolds number of flow 06 p0874 A66-16999  
 Delta wing vortex breakdown in terms of theory of stability of spiraling flows 07 p0979 A66-17478  
 Stability criterion for flow in interspace

between two parallel arbitrarily curved walls 07 p0980 A66-17482

Stability of piecewise linear velocity profile of shear flow in convectively unstable layer 07 p0980 A66-17942

Electron diffusion in mutually perpendicular static electric and magnetic fields based on stability of laminar flow 07 p1081 A66-17953

Exact solution of hydromagnetic stability of nondissipative conducting Couette flow between two coaxial cylinders in axial magnetic field 07 p1021 A66-18048

Heat transfer and stability of laminar hypersonic separated flow around annular cavity conical model 07 p0981 A66-18117

Stability of plane Poiseuille flow between elastic boundaries 07 p1026 A66-18194

Stability of frictionally heated Couette and Poiseuille flows, specifically Couette flow in inviscid limit 08 p1204 A66-18527

Equilibrium stability of horizontal layer of fluid in field of modulated temperature gradient when layer thickness is greater than penetration depth of heat waves 08 p1320 A66-19471

Viscosity and density variations due to imposed radial temperature gradient effects on Couette flow stability between rotating cylinders 08 p1211 A66-19681

Analogy between eigenvalues for fluid convection and flow stability extended to rotating cylinders with corresponding temperature distribution for given angular velocities 08 p1212 A66-19821

Stability of set of Jeffery-Hamel profiles, approximating profiles in two-dimensional divergent channels, investigated by numerical solution of Orr-Sommerfeld problem 08 p1212 A66-19823

Stability of plane motion of fluid subject to continuous perturbations distributed over volume and boundary of flow 09 p1368 A66-20755

Instability of hypersonic shock layer flow over blunt bodies with surface cavities coupled to dynamic stability of body 10 p1619 A66-21156

Hydromagnetic stability of current-carrying fluid between two coaxial cylinders with radii ratio 0.05 to 0.9 10 p1568 A66-21829

Clamping conditions effect on critical flow rate of fluid moving through pipe, taking into account direction and friction forces on stability 11 p1782 A66-22853

Overstability in elastico-viscous flow between rotating cylinders 11 p1693 A66-23010

Stability of forward and rearward slug flows due to motion of body through perfectly conducting liquid with embedded magnetic field 11 p1746 A66-23011

MGD stability treated by transfer function method for lumped-parameter dynamic systems 11 p1677 A66-23114

Stability of vortex-free incompressible fluid flow 11 p1694 A66-23331

Plasma burner in which heating of gas is effected in jet discharge stabilized by vortex or flow methods 11 p1748 A66-23417

Stability of steady finite amplitude convection determined by method of successive approximations 11 p1787 A66-23421

Nonlinear Benard convection 12 p1976 A66-23549

Stability of two-dimensional parallel flows, using Orr-Sommerfeld equation and adjoint equation with asymptotic solution 12 p1861 A66-23809

Liquid film flow stability, considering two-dimensional perturbations, hydrodynamic friction with allowance for finite curvature radius of bounding surface 12 p1864 A66-24435

Stability of plane inviscid jet and wake studied for possible growth in downstream spatial direction 12 p1865 A66-24582

Instability criterion in air, argon and carbon dioxide at various pressures and layer depths, detecting convection and determining Rayleigh number for application in transport properties of gases 12 p1980 A66-24942

Orr-Sommerfeld equation regarding stability of parallel flows solved for large Reynolds number, using inner and outer expansion theory 12 p1866 A66-24944

Small gap equations for Couette flow

stability considering nonaxisymmetric disturbances, solving eigenvalue problem and noting role in instability of Taylor vortices 12 p1866 A66-24946

Steady finite-amplitude motions existing for range of Taylor number, with values of Rayleigh number smaller than critical value required for overstability 12 p1866 A66-24948

Stability of two-dimensional Couette-Poiseuille flow 12 p1866 A66-24951

Potential stabilized two-component supersonic flow of thin body and surface form for given pressure distribution and component separation 13 p1994 A66-26765

Stability of cylindrical sheet of fluid during motion through motionless gas ambient 14 p2273 A66-26778

Non-Newtonian media, parallel flow, discussing effects of two- and three-dimensional perturbations on flow stability 14 p2275 A66-27572

Perturbation equations solved for viscous flow stability over concave cylindrical surface 14 p2276 A66-27729

Nonlinear stability of zonal flows in two-dimensional quasi-solenoidal model when absolute eddy is monotonic function of width 14 p2327 A66-28221

Range of gas dynamic stability of arc-type electric heaters, characteristics for design and calculation of electrode diameter ensuring vortex stabilization 14 p2348 A66-28314

Temperature effect on motion stability of fluid between rotating cylinders 14 p2415 A66-28323

Variational problem solved, giving lower stability bounds for finite disturbances of viscous incompressible flow 15 p2478 A66-29245

Stability to infinitesimal disturbances of plane Couette flow in presence of negative vertical temperature gradient, noting instability at critical Rayleigh number for convection without shear 15 p2481 A66-29741

Natural frequency of fluid oscillations in complex pipelines 16 p2687 A66-31296

Flow instability of incompressible nonconducting fluid in thin cylindrical conducting elastic pipe in constant uniform magnetic field 16 p2764 A66-31367

Laminar-turbulent transition conditions in MHD channel flow 16 p2764 A66-31370

Effect of radiative and photochemical processes on stability of two level baroclinic flow, noting low and high shear instability, wavelength, phase speed, etc 16 p2700 A66-31644

Structure of axisymmetric core of spiraling fluid with high vorticity 17 p2907 A66-32277

Absolute stability of some plane parallel flows at high Reynolds number 17 p2907 A66-32322

Numerical solution of time dependent equations of one-dimensional reactive flow for idealized one-reaction detonation 17 p2908 A66-32418

Jet disintegration into large drops in Vivdenko and Shabalin paper 17 p2909 A66-32566

Three-dimensional boundary layer for accelerating flow over semiinfinite flat plate with or without suction 17 p2911 A66-32838

Variational principle for steady flows of ideal liquid and sufficient conditions for nonlinear stability under finite perturbations 17 p2913 A66-33168

Spiral flow stability of idealized viscoelastic liquid between two rotating concentric cylinders with axial pressure gradient 17 p2914 A66-33171

Gravitational stability of laminar liquid layer flowing down inclined plane and heated from below 17 p2914 A66-33172

Critical Reynolds number for pulsating Poiseuille flow determined by studying stability under harmonically and nonharmonically varying pressure gradient [ASME PAPER 66-FE-5] 17 p2914 A66-33260

Boundary value problem of Stokes equations proving branching for flow between two rotating concentric cylinders and nonexistence of singular flow 18 p3101 A66-34659

Instability of free laminar boundary layer between parallel streams analyzed for incompressible fluid, noting values of

Reynolds number 18 p3102 A66-34949

Stability of swirling flow of viscous conducting fluid in presence of circular magnetic field 18 p3150 A66-34949

Energy method applied to stability of flow governed by nonlinear Boussinesq equation establishing universal stability region Reynolds-Rayleigh number plane 19 p3478 A66-361

Space charge wave equation and impedance and stability of electron diodes, using Nyquist analysis and transit time and beam current 20 p3528 A66-374

Sufficient conditions for instability against small oscillations of symmetric laminar flow of inviscid incompressible perfect magnetofluid 21 p3791 A66-391

Stability of viscoelastic liquid in Couette flow compared with non-Newtonian liquid same limiting viscosity 21 p3729 A66-394

Laminar mixing of two parallel streams of compressible fluid stability with respect to supersonic disturbances 22 p3900 A66-403

Rayleigh turning-point criterion in velocity profile extended to spatially increasing flow disturbance 22 p3900 A66-403

Oscillation of tubular cantilevers conveying fluid, discussing theoretical conditions of stability 22 p3994 A66-404

Oscillation of tubular cantilevers conveying fluid, checking stability aspects of theory and accounting for internal and viscous damping 22 p3994 A66-404

Aerodynamic problem of steady potential flow and added mass in unsteady motion idealized hemispherical parachute 22 p3845 A66-405

Stability analysis of discontinuous solutions of gas dynamics PDEs for ideal fluid 23 p4055 A66-415

Hydraulic loss decrease in complex pipeline owing to wire grating 23 p4024 A66-417

Nonstationary flows around vibrational obstacles with application to wing flutter and to interactions of various aircraft components 23 p4012 A66-419

Shear flow transition to turbulence and instability phenomena, discussing parallel and laminar flows 23 p4060 A66-422

Taylor vortices growth and instability using mathematical model 23 p4062 A66-422

Experimental verification of stability criteria for incompressible inviscid flow with helical streamlines, using rotating cylinders 23 p4062 A66-422

Thermal convection in horizontally infinite layer of fluid confined between rigid heat conducting plates driven by temperature difference 23 p4151 A66-426

Critical Reynolds number for pulsating Poiseuille flow determined by studying stability under harmonically and nonharmonically varying pressure gradient [ASME PAPER 66-FE-5] 24 p4195 A66-428

Secondary steady or periodic flow generation from stability loss by laminar flow of viscous incompressible fluid, noting nonuniqueness of solution 24 p4195 A66-428

- Low operating speed of pure fluid digital operating elements is chief limiting factor to application of pure fluid amplifier to feedback control system
- 09 p1361 A66-20325
- Carrier circuit techniques applied to fluid amplifier control systems
- 09 p1332 A66-20326
- Fluid amplifier analysis predictions for prime-element conceptual models and jet amplifier dynamic effects
- 09 p1333 A66-20327
- Fluid control system design and principles
- 10 p1485 A66-21511
- Fluid devices as affected by delay for signal transmission in lines, jet behavior and Coanda effect
- 13 p2062 A66-25366
- Fluid control devices
- 14 p2226 A66-27816
- Fluid devices for sensing, amplifying, controlling and logical functions in gas turbine control systems
- 15 p2572 A66-28862
- Pneumatic control systems, discussing turbulence amplification method and system with miniaturized elements with moving parts
- 16 p2636 A66-31063
- Pressure vs flow plots of orifice, tube, porous-metal and variable resistors used in fluid amplifier and logic circuit design
- 17 p2849 A66-33524
- Stream-interaction amplifiers and uses in fluidic circuits, discussing momentum exchange, pressure differential and Coanda effect
- 18 p3053 A66-33898
- Papers on fluid interaction devices
- 18 p3098 A66-34117
- Physical phenomena occurring within fluid devices, particularly pneumatic devices, considering Maxwellian distribution of velocities, ideal gas law and mean free path
- 18 p3098 A66-34118
- Fluid circuit theory, discussing setting up of electrical analogs, transfer functions, transmission line equations, wave propagation speed, etc
- 18 p3099 A66-34127
- Fluid amplifier operation characteristics, noting gain, switching circuits, power jet pressure effects, etc
- 18 p3054 A66-34128
- Beam deflection type proportional fluid amplifier, noting pressure and flow gain parameters, transfer characteristics, etc
- 18 p3054 A66-34129
- Vortex devices, describing Hillsch tube, vortex diode, triode, oscillator, pressure ratio sensor, etc
- 18 p3054 A66-34130
- Fluid interaction devices, noting induction and turbulence amplifiers, impact modulators, logic gates, inverters, etc
- 18 p3054 A66-34131
- Acoustic output, turbulence in jets and noise sources in fluid amplifiers noting design, noise reduction by jet edge, input nozzle design, forced secondary flow, etc
- 18 p3054 A66-34132
- Load characteristics and characteristic curves for proportional and bistable fluid amplifier noting output, input and dynamic effects
- 18 p3054 A66-34133
- Acoustic sensitivity and logic circuitry of fluidic turbulence amplifiers for application to laminar jet streams
- 18 p3056 A66-35012
- Variable geometry jet engine control using advanced hydromechanical, microelectronic and fluidic techniques
- 19 p3450 A66-36364
- Amplifiers using properties of vortex flow confined within flattened cylindrical chamber, considering velocity distribution
- 19 p3281 A66-36634
- Temperature sensing and control by fluidic devices, using FM and phase discrimination for gas turbine engine application
- 19 p3361 A66-36672
- Fluidic electro-fluid converter development from study of jet separation from curved surface as affected by geometry, Reynolds number and wall temperature
- 19 p3282 A66-36673
- Miniaturized no-moving-parts fluid pulse counter development for ordnance application
- 19 p3282 A66-36674
- Fluieric feedback integration and computation with design by root locus method
- 19 p3282 A66-36675
- Wall interaction digital stream amplifier with increased flow gain, impedance matching, outputs decoupled and noise reduction
- 19 p3283 A66-36812
- Steady state characteristics and transient behavior of vortex valve, examining effect of wall friction and shearing stresses due to radial velocity gradients
- 20 p3501 A66-37649
- Turbulence amplifier developed as pure fluid amplifier and logic element in which laminar jet is directed at mouth of collector tube and pressure at any input causes turbulence, reducing output to zero
- 20 p3501 A66-37653
- Operation principles of turbulence amplifiers, considering application to low cost automation, using conventional pneumatic valves and cylinders
- 20 p3502 A66-37655
- All-fluid control systems, noting achievements in vector control navigation aids and vehicle flight stabilization
- 20 p3503 A66-38263
- Fluid amplifier application to process control including turbulence amplifiers, logic function performance, etc
- 21 p3697 A66-38477
- [ASME PAPER 66-MD-8]
- High-pressure supersonic fluid amplifier design and performance, noting effect of nozzle expansion ratio on design operating pressures
- 21 p3697 A66-38485
- [ASME PAPER 66-MD-29]
- High input impedance fluid amplifier noting electric and fluid analogs, fluid triode and mathematical model of fluid FET
- 21 p3697 A66-38595
- Attitude control system/engine control system for hover control of turbojet VTOL aircraft
- 21 p3697 A66-38902
- Impact modulators using two impacting fluid jets for fluidic system design
- 21 p3698 A66-39463
- Fluidic system design of single and double airfoil amplifiers based on airfoil surface characteristics
- 21 p3698 A66-39464
- Mathematical and control operations, utilizing fluieric components such as jet deflection type proportional fluid amplifiers, capillary-tube resistors and tank capacitors [ASME PAPER 65-WA/PID-2]
- 21 p3699 A66-39529
- Main parameters of two-stage hydraulic amplifier-actuator system determined with aid of pressure and flow-rate amplification factors
- 23 p4017 A66-40970
- FLUID BOUNDARY**
- Flow of orientable fluid between coaxial cones, discussing fluid behavior for low and moderate velocity gradients
- 04 p0512 A66-14473
- Temperature distribution in fluid spherical layer enveloping gravitating sphere
- 08 p1320 A66-19485
- Free convection thermal transfer in narrow horizontal channels and infinitely wide channels
- 09 p1471 A66-20704
- Torsional oscillations of fluid sphere with rigid boundary in uniform magnetic field
- 11 p1745 A66-23007
- Behavior of system of infinite compressible fluids under gravity and magnetic field action, with MGD equations showing instability at plasma boundaries
- 11 p1748 A66-23418
- Nonsteady motion of slender body near interface between fluids of different densities
- 13 p2067 A66-26536
- Cavity depth for waterdrop impacts against water, discussing apparatus, equation for cavity depth, effect of gravitational potential energy, liquid surface behavior, etc
- 15 p2477 A66-28716
- Fluid loading effect on acoustic radiation from point-driven infinite orthotropic plate
- 18 p3251 A66-33677
- Two-dimensional non-Newtonian nonisothermal viscous liquid boundary layer flow in stagnation point proximity and flow deviations due to pressure gradient and shearing stress
- 18 p3266 A66-34637
- FLUID FLOW**
- S GAS FLOW**
- S INDUCED FLUID FLOW**
- S LIQUID FLOW**
- S RECIRCULATIVE FLUID FLOW**
- FLUID INJECTION**
- SA GAS INJECTION**
- SA LIQUID INJECTION**
- Laminar flow in two-dimensional channel with uniformly porous walls through which fluid is uniformly injected
- 05 p0662 A66-15057
- Shielding of surface from parallel thermal radiation beams by distributed injection of fluid containing absorbing particles into boundary layer flow over surface near stagnation point
- [ASME PAPER 65-WA/HT-21]
- 05 p0789 A66-15643
- Influence of suction or injection in boundary layer flow past vertical flat porous plate in presence of uniform magnetic field
- 06 p0969 A66-16181
- Surface pressure distribution on high-velocity body with large injection rate or ablation rate
- [AIAA PAPER 66-89]
- 07 p0984 A66-18455
- Axisymmetric stagnation-point boundary layer with constant shear inner layer solution
- 08 p1207 A66-19150
- Coolant injection in turbulent boundary layer for protection of surfaces from effects of high temperature and high energy gas flows
- 08 p1320 A66-19429
- Split-stream chromatographic injection parameters including optimum component velocity, column flow, mixing tube cross section, etc
- 10 p1534 A66-21294
- Thermal insulation of hypersonic blunt body by central coolant injection formation of insulating layer between body and high temperature freestream
- 10 p1481 A66-21797
- Turbulent flow process in transpiration cooling through study of uniform fluid injection along porous tube
- [ASME PAPER 65-APM-29]
- 12 p1862 A66-23969
- Velocity defect law for turbulent incompressible boundary layer with wall injection or suction
- 13 p2063 A66-25430
- Critical injection parameter on porous plate with turbulent boundary layer, noting conditions of neutralization reaction
- 16 p2684 A66-30324
- Separation streamline for massive blowing in free stream for model injected into arc tunnel flow
- [AIAA PAPER 66-457]
- 18 p3046 A66-33650
- Increasing mass flow through gas turbine without additional work from compressor and consequently increasing thermal efficiency, noting combustion problem [WSCI 66-17]
- 18 p3164 A66-34424

Tangential fluid injection for control of shock-boundary layer interaction [AIAA PAPER 66-656] 18 p3048 A66-34439

Thrust magnitude control for solid rocket by fluid injection just upstream of throat 21 p3818 A66-38699

Effect of mass injection into cavity on hypersonic boundary layer transition and on heating downstream 21 p3835 A66-38734

Shielding of surface from parallel thermal radiation beams by distributed injection of fluid containing absorbing particles into boundary layer flow over surface near stagnation point [ASME PAPER 65-WA/HT-21] 22 p3997 A66-40026

Surface pressure distribution on high velocity body with large injection rate or ablation rate [AIAA PAPER 66-89] 22 p3844 A66-40348

Secondary injection induced shock shape and vertex location solved by equivalent blunt body in supersonic flow 23 p4058 A66-41899

**FLUID JET**

SA AIR JET

SA GAS JET

SA VAPOR JET

SA WATER JET

Expansion parameters of liquids expelled into vacuum as related to orbital perturbations arising from liquid venting and impingement on adjacent hardware 10 p1481 A66-21947

Collision of opposed supersonic jets in pulse discharges, noting formation of shock-constricted plasma regions between electrodes 15 p2551 A66-29216

Convergence of axes of plane-parallel jets due to reciprocal ejection effect, analyzing deformation of jet, rarefaction coefficient for air between jets, etc 20 p3544 A66-36918

Stability of liquid Newtonian jets ejected from circular capillary tubing into stagnant air, noting influencing factors such as nozzle turbulence, velocity profile development and ambient medium properties 20 p3545 A66-37509

Munroe jet formation when small cavity or bubble in liquid is subjected to impact or shock 20 p3546 A66-37804

Hydrodynamic implosion mechanism and impact of liquid jets formed by collapsing cavitation bubbles, examining damage to solid boundaries 20 p3547 A66-37811

Impact modulators using two impacting fluid jets for fluidic system design 21 p3698 A66-39463

Lateral fluid jet visualization for spanwise launching on wing model with low aspect ratio in subsonic flow 21 p3731 A66-39593

**FLUID LOGIC**

Fluid logic elements and amplifiers for data processing, signal amplification and guidance and control 08 p1199 A66-18698

**FLUID MECHANICS**

SA AERODYNAMICS

SA CONTINUUM MECHANICS

SA GAS DYNAMICS

SA HYDRAULICS

SA HYDRODYNAMICS

SA HYDROSTATICS

SA MAGNETOHYDROSTATICS

SA THERMODYNAMICS

Collected works of Liapunov on equilibrium configurations of fluids 01 p0056 A66-10304

Fluid control and guidance systems summary of available hardwares 01 p0015 A66-10688

Book on fluid flow and heat transfer for designing, selecting, testing and installing various heat exchangers 02 p0305 A66-12240

Definition, equations, static and dynamic problems and normal and shear stress functions of subfluids 03 p0354 A66-12531

Surface instabilities discussing stability of movement of nonrigorous planar surface of liquid layer when subjected to motion in direction perpendicular to its face 03 p0354 A66-12537

Flow past fluid film-covered sphere and cylinder of given radius in different fluid, discussing external and film flow conditions 04 p0509 A66-13555

German book on theoretical fluid dynamics covering potential flow of ideal fluids and gases, viscous fluids, boundary layer theory,

hydrodynamic stability and turbulent flow 05 p0662 A66-15085

Compressibility charts for nonpolar and slightly polar substances in gaseous and liquid states and in two-phase region, using four independent parameters [ASME PAPER 65-WA/PID-1] 05 p0793 A66-15680

Physical properties of dense supercritical fluids composed of spherical molecules, noting spatial correlation 06 p0909 A66-16700

Population inversions promoted between electronic-excited states by fluid-mechanical techniques 07 p1083 A66-17937

Fluid dynamics - Symposium, Zakopane, Poland, September 1963 07 p1021 A66-18101

Class of uniform motions of continuous media and rarefied gases 08 p1210 A66-19575

Asymptotic solutions of Grad system of kinetic moments in Maxwell gas and gas consisting of molecules repelling mutually to inverse of distance 08 p1210 A66-19576

Generalized theory of physical quantities in scalar and vector form in moving reference regions 08 p1211 A66-19730

Fluid mechanics, fluidic devices and systems, noting design, manufacturing techniques and application 09 p1332 A66-20317

Flow properties of fluid through slots of micron dimension 09 p1384 A66-20752

Initial velocity and density conditions for three-dimensional boundary layer equations, noting wakes and jets 10 p1522 A66-21303

Moment stress tensor and elastic constants in statistical fluid mechanics 10 p1523 A66-21801

Turbulent vortices in quantum and classical fluid and time dependent meniscus depth of water, He I and He II 10 p1525 A66-21965

Structure of conducting and insulating liquids as affected by interatomic forces 11 p1693 A66-22979

Fluid dynamic behavior of system predicted by performing measurements on model of system 11 p1693 A66-23173

Book on basic developments in fluid dynamics including numerical solution of problems in gas dynamics, stability of parallel flows, blast wave theory, etc 12 p1861 A66-23806

Fluid flow impedance parameters and properties, discussing nonlinear orifice resistors in fluidic circuitry, tube resistance and fluid capacity 12 p1803 A66-24384

Unsteady plane motion of pointed airfoil pair, obtaining resultant force and moment of biplane 13 p2062 A66-25400

Soviet papers on fluid and gas flows 13 p2065 A66-26482

Laminar boundary layer characteristics determined by Howarth and Kochin-Loitianskii methods, using simple quadratures 13 p2066 A66-26487

Velocity profile within boundary layer region for flow of second-order fluid past symmetrical cylinder determined for nondimensional parameter formed by velocity and material constants 13 p2068 A66-26666

Fluid mechanics - Midwestern Mechanics Conference, Case Institute of Technology, Cleveland, April 1963 13 p2068 A66-26701

Forces on hovering slender body of revolution submerged under waves of moderate wavelength, considering beam seas and head seas 13 p2071 A66-26724

Constant vorticity of fluid in discontinuity region checked by method based on temperature analog 14 p2273 A66-26784

Integral equations for radial distribution functions in classical fluid 14 p2273 A66-26828

Mechanics of contained fluids in subgravity 14 p2275 A66-27558

Equiaffine geometry of double field and application to steady fluid flow theory 14 p2275 A66-27592

Integral equations derived from correlation functions, determining transport coefficients in classical fluid, formally valid to general order in density 14 p2276 A66-27635

Chemical potential and integral equation for correlation functions of classical fluids, using Percus method when functions exhibit cluster properties 14 p2276 A66-27637

Ideal conducting fluid in electromagnetic

and gravitational fields treated relativistic mechanics, using variational principles 14 p2277 A66-28101

Oscillations, gyroscopes, theory of mechanisms, fluid and gas mechanics - Union Conference, Moscow, January-February 1964 15 p2540 A66-28101

Turbulent fluid flow with consideration of structure and statistical and functional formulations 15 p2478 A66-28101

Emerson and impulse ring wave examining rigorous solution of Cauchy-Poisson problem with finite energy 15 p2480 A66-28101

Theory of transversely isotropic fluids, fluid having rigid microstructure 15 p2480 A66-28101

Asymmetrical hydromechanical fluid motion equation solutions including capillary discharge, sphere in fluid motion and suspension viscosity 16 p2689 A66-31011

Dynamic influence of orography on atmospheric motion examined, using fluid mechanics analogy with periodicity boundary condition 16 p2699 A66-31011

Progress in aeronautical sciences, noting delta wing vortex sheets, rotating flow boundary layer flows, etc 17 p2906 A66-33011

Method and equipment effects on stability measurements of hydraulic using mechanical and sonic methods 17 p2943 A66-33011

Book on theory of steady viscometric flow of non-Newtonian fluids, discussing deformation and interpretation of experiments 17 p2912 A66-33011

Discontinuous one-dimensional dissipation of perfect liquid and gas conduction magnetic field, emphasizing case where magnetohydraulic jump may occur 17 p2973 A66-33011

Fluid mechanics and heat transfer Conference, Santa Clara, June 1966 17 p3038 A66-33011

Fluid mechanical analysis of tektite origin based on hypothesis of material ejection from Earth surface in liquid jet form under meteoritic impact 18 p3227 A66-33011

Differential equation system describing nonsteady state motion of liquid in channel 18 p3097 A66-33011

Fluid dynamic field determined for growth effect machines 18 p3098 A66-33011

Fluid dynamics equations of state, motion continuity and energy stress-strain relationship and shearing stress deformations 18 p3098 A66-33011

MHD and fluid dynamics interpretation of solar wind-comet interaction 18 p3169 A66-33011

Fluid dynamic characteristics of propeller pumps in presence of oscillatory cavitation noting performance of J-2 rocket engine system [AIAA PAPER 66-559] 18 p3246 A66-33011

Book on mechanics of liquids and gases 18 p3102 A66-33011

Arbitrary motion of circular cylinders in ideal fluid near wall, using Fourier series 19 p3342 A66-33011

Fluid equations used in describing electric and ion motion perpendicular to field in slab of plasma supported against gravitational field by sheared magnetic field 19 p3417 A66-33011

Singular integral equations with constant coefficients solved by Jacobi polynomial and applied to problems in fluid dynamics crack propagation, plane elastic theory etc 19 p3393 A66-33011

Ordinary nonlinear differential equations arising in theory of both axisymmetric two-dimensional viscous jets falling under gravity 20 p3591 A66-33011

Basic properties of pure fluid development including operating pressure, operational power and response time 20 p3500 A66-33011

Kapitza papers, Volume 2, 1938-1964 20 p3603 A66-33011

Fluid mechanics model representation of solar wind and geomagnetic field interaction, noting flow parameters in shock layer and application of MHD equations 20 p3642 A66-33011

Shell immersion in moving fluid under vibrations which can be damped or amplified, analyzing instability due to constituting energy

reservoir 21 p3825 A66-38578  
 Difference approximations to PDEs of fluid dynamics used to determine necessary condition for stability, examining advective, diffusive and inertial terms 21 p3730 A66-39471  
 Flow mechanics and flow 21 p3730 A66-39498  
 Machinery 21 p3730 A66-39498  
 Turbulent vortices in quantum and classical fluid and time dependent meniscus depth of water, He I and He II 21 p3731 A66-39544  
 Equiaffine geometry of double field and application to steady fluid flow theory 22 p3900 A66-40441  
 Spontaneous ignition of inflammable fluids by hot surfaces, discussing static hot plate and wind tunnel rigs 23 p4083 A66-41278  
 Fluidmagnetic buoyancy effects in ferrohydrodynamic /FHD/ flows and implications of Ernschaw levitation theorem 23 p4057 A66-41885  
 Drop bursting by surface forces such as electric fields and fluid environments with larger viscosity 23 p4060 A66-42018  
 Turbulence in conducting medium treated by fluid mechanical approach and kinetic theory, noting energy transfers between eddies 23 p4108 A66-42033  
 Numerical solution of Bhatnagar-Gross-Krook model for shock wave structure problem, noting Chapman-Enskog approximation 23 p4061 A66-42037  
 Wave propagation, dispersion and energy transfer in arterial blood flow considered as fluid dynamics, noting finite amplitude effects in circulatory system and flow control mechanism 23 p4062 A66-42058  
 Navier-Stokes equations solutions for coefficient of viscosity tending to zero become solution to Euler equations in Cauchy problem for equations of hydrodynamics 24 p4193 A66-42232  
 Nonlinearity of governing equations of fluid mechanics, assuming fluid fluctuations are nearly normally distributed 24 p4193 A66-42283  
 Micropolar fluid theory with derivation of motion equation, constitutive equations and boundary conditions, noting channel flow 24 p4195 A66-42288  
**FLUID POWER**  
 Forced discontinuous oscillations of fluid in pipeline, discussing energy dissipation effects in LF range 04 p0509 A66-13556  
 Fluid squeeze-film damping, presenting linear analysis and approximate design equations for several damper configurations [ASME PAPER 65-WA/AUT-6] 05 p0664 A66-15706  
 XB-70 hydraulic system, describing characteristics, operation-mechanism of fluid power system, power generation, utilization and distribution 06 p0809 A66-16790  
 Fluid power, Reference 23 p4018 A66-41715  
**FLUID ROTOR GYROSCOPE**  
 Fluid stratification in floated gyroscope, estimating drift rate as function of time, geometry and flotation 23 p4066 A66-41102  
**FLUID SWITCHING ELEMENT**  
 Effectiveness of split cross-flow heat exchangers, emphasizing uniform exit temperature distribution for unmixed fluids [ASME PAPER 65-HT-24] 05 p0783 A66-14745  
 Leakage detection system for monitoring component test stand hydraulic circuit 06 p0869 A66-16792  
 Fluidic devices, discussing design, equivalence to logic circuits, fluid amplifier application to build flip-flops, etc 06 p0809 A66-16794  
 Pressure vs flow plots of orifice, tube, porous-metal and variable resistors used in fluid amplifier and logic circuit design 17 p2849 A66-33524  
 Problems of miniaturization of fluid mechanic components 19 p3343 A66-36807  
 Bistable fluid elements without moving parts for switching fluid currents show stability against load and supply pressure fluctuation 19 p3283 A66-36810  
 Binary adder and other pneumatic logic elements producing any two-valued function of three two-valued input parameter by proper arrangement of input jet nozzles 20 p3496 A66-36862

Cascade free jet logical element interactions and application to multiple-parameter logical function 20 p3496 A66-36863  
 Electrical control of boundary layer flip-flop fluidistor by disruptive discharges between electrodes producing pneumatic pressure shocks that switch output flow 20 p3501 A66-37648  
 Operation principles of fluid switches and oscillators, examining possible practical application to temperature measurement 20 p3560 A66-37651  
 AEI Airlog system for exploiting pneumatic techniques for sequential control and interlock protection of process plant and machinery 20 p3502 A66-37654  
 Operating characteristics of pneumatic bistable element using Coanda effect, examining correlation between outlet flow and pressure and feed 21 p3697 A66-38802  
 Fluidics problems involved in design and manufacturing individual elements and power consumption 21 p3697 A66-38967  
 Electric-to-fluidic and mechanical-to-fluidic transducers and sensors in fluidic system design 22 p3852 A66-40423  
**FLUID TRANSMISSION LINE**  
 Turbulent heat transport coefficient of various fluids in pipes measured, obtaining formula from experimental data 09 p1367 A66-20702  
 Turbulent heat transport coefficient of various fluids in pipes measured, obtaining formula from experimental data 11 p1688 A66-22592  
 Natural frequency of fluid oscillations in complex pipelines 16 p2687 A66-31296  
 Amplitude frequency response of blocked pneumatic lines used in fluidic systems, noting correlation to electric-pneumatic analogy prediction 19 p3372 A66-36684  
 Fluid circuit theory, discussing transmission lines, matching, pulse forming and definitions of current and voltage analogies 20 p3500 A66-37643  
 Oscillation of tubular cantilevers conveying fluid, discussing theoretical conditions of stability 22 p3994 A66-40408  
 Oscillation of tubular cantilevers conveying fluid, checking stability aspects of theory and accounting for internal and viscous damping 22 p3994 A66-40409  
**FLUID TRANSPIRATION**  
 Fluid-transpiration plasma source and liquid-cooled mechanically sealed short arc source for solar simulation 02 p0213 A66-11229  
**FLUIDIZED BED**  
 Heat transfer between fluidized bed and submerged cylinder 18 p3267 A66-35056  
 Mean absolute particle velocity in fluidized bed calculated by radioactive isotope method 18 p3267 A66-35058  
**FLUORESCENCE**  
**SA PHOSPHOR**  
**SA PHOTOLUMINESCENCE**  
 Ruby laser radiation effect on fluorescence and laser action in dysprosium doped calcium fluoride crystals 01 p0082 A66-10718  
 Optical whispering mode of polished cylinders and implication in laser technology, noting trapped fluorescent light 02 p0262 A66-12203  
 Zeeman effects in fluorescent edge emission and absorption spectra of zinc oxide platelets, noting magnetic splitting 04 p0561 A66-13724  
 Mid-day daylight intensities arising from solar ionizing radiation 05 p0748 A66-14942  
 Electron spin resonance center in ZnSe after electron bombardment measured with low temperature microwave 06 p0934 A66-17124  
 Affinity and stoichiometry of binding of 1-anilino-8-naphthalene sulfonate /ANS/ to apomyoglobin and 08 p1177 A66-18701  
 Fluorescent K-absorption and emission spectra of phosphorus in III-V semiconductor compounds 09 p1426 A66-20192  
 Fluorescence behavior of gadolinium and terbium, noting nonradiative energy transfer in borate glass 13 p2158 A66-25052  
 Spectroscopy of lithium fluoride crystals

activated with uranium trioxide for laser action, showing anomalous fluorescent decay under high intensity 13 p2092 A66-25997  
 Ionic fluorescence of europium chelates, suitability as laser materials, noting energy transfer role in population inversion 14 p2315 A66-27463  
 Fluorescence lifetime measuring technique employing pulsed or modulated RF discharges applied to emission of second positive and first negative systems of nitrogen 14 p2337 A66-27974  
 Fluorescent lifetimes of neodymium, ytterbium and samarium incorporated in ordered perovskite-type compounds determined, noting crystal structure potential for laser 14 p2367 A66-27976  
 Fluorescence of NO during photodissociation of nitrous oxide due to vacuum UV radiation 15 p2542 A66-29351  
 Absorption, photoionization and fluorescence of carbon dioxide measured in regions of strong band and continuous absorption in various spectral ranges 16 p2749 A66-30111  
 Visible spectrum of radiation release from type I supernova 16 p2796 A66-30163  
 Fluorescence bands produced by electron bombardment of ZnSe show threshold of annealing stages of radiation damage 17 p2985 A66-33154  
 Fluorescent-solid lasers design and performance noting materials 17 p2937 A66-33250  
 Two-step excitation quantum counter fluorescence in trivalent thulium ion at room temperature 18 p3152 A66-33607  
 Quantitative measurement of free metallic atoms abundance and height distribution from twilight, dayglow and aurora fluorescence 19 p3349 A66-36350  
 Low temperature optical fluorescence of ruby and vanadium doped magnesium oxide in which vibronic sideband intensity near sharp R line is measured as function of energy separation from no-phonon R line 19 p3446 A66-36395  
 Fluorescence of rare earth, actinide and transition metal ions in insulating crystals as result of optical excitation, discussing spectroscopic properties and operating characteristics 20 p3575 A66-36969  
 Fluorescence of NO during photodissociation of nitrous oxide due to vacuum UV radiation 20 p3602 A66-37356  
 Vibrational relaxation measurements in carbon dioxide, using induced-fluorescence technique 20 p3578 A66-37595  
 Ruby laser radiation effect on fluorescence and laser action in dysprosium doped calcium fluoride crystals 20 p3579 A66-37656  
 Optical properties of cryptocyanine noting transient decay of fluorescence, using ruby laser and transmission of methanol solution 22 p3932 A66-40103

 Recombination effects in nozzle flows of hydrogen/ fluorine rocket engines 08 p1279 A66-19152  
 Sublimation rate of iron fluoride and identification of vapor species by Knudsen technique, using mass spectrometer 11 p1651 A66-23413  
 Increasing solubility of hydrocarbons in cesium-salt fuel cell electrolyte by replacing some of carbonate anion by fluoride 14 p2226 A66-27898  
 Growth of single crystals of rare-earth fluorides for laser application, using

hydrogen fluoride atmosphere, noting ion exchange purification 16 p2779 A66-31082

FLUORINATION

Apparatus for fluoridation of hydroxyl and oxygen contaminated fluoride compounds, obtaining optically clear crystals with no Tyndall scattering for laser application 07 p1047 A66-18488

High temperature equilibria among vapor species produced by fluorination of beryllium in Knudsen effusion cell, using mass spectrometer, deriving dissociation energy 12 p1811 A66-23621

FLUORINE

Upper ignition limit for reaction of fluorine with hydrogen 09 p1338 A66-20394  
Rate of effusion for gas flow through orifice and application to fluorine gas dissociation energy 11 p1688 A66-22880

Nuclear magnetic resonance classification of alcohols and hydroxyl groups from FL-19 spectra of trifluoroacetates 15 p2447 A66-29238

Spin-rotation interaction and relaxation time of fluorine nuclei in benzotrifluoride calculated, using time-dependent perturbation theory 16 p2645 A66-30110  
Dissociation rate of diatomic molecular fluorine 16 p2646 A66-30863

Spectrum of singly ionized fluorine, tabulating forbidden transitions 18 p3064 A66-33994  
Chlorine-fluorine mixture combustion, examining flame speeds, temperatures and burned gas composition [WSCI 66-31] 18 p3263 A66-34415

Thermal dissociation of molecular fluorine in inert gas from 1650 to 2700 degrees K in shock tube coupled to time-of-flight mass spectrometer 18 p3139 A66-34501

Fluorine concentration in oxygen monitored by instrument with nickel thermoconductivity cell 20 p3511 A66-38173  
RL10 pump-fed rocket engine modified for fluorine-hydrogen application [ASME PAPER 66-MD-74] 21 p3806 A66-38501

Nonequilibrium dissociation losses in hydrogen-fluorine propellant system, indicating rate control of recombination steps [AICE PREPRINT 28A] 22 p3969 A66-39882

Radioanalysis applied to effects of ionizing radiation on volatile inorganic compounds of fluorine, oxygen and nitrogen, noting mass spectrometric peaks 23 p4032 A66-41235

Heat of formation of oxygen difluoride for reaction with hydrogen, using Parr fluorine combustion bomb containing metal ampoule employing burst diaphragm 23 p4118 A66-41238

Density, viscosity, surface tension, vapor pressure and vapor liquid equilibria data of liquid ozone-fluorine mixtures considered as Newtonian fluids 23 p4119 A66-41244

Fluorine, chlorine and other trace elements determined through differentiated photoelectric detection from Tasmania using statistical techniques, showing hydroxyl lattice sites by chlorine and fluorine 24 p4198 A66-42364

Temperature of fluorine-hydrogen flame from  $\gamma$ ,  $\theta$  band of FH vibration-rotation experimentally determined to be in agreement with theoretical figure of 3994 degrees K for stoichiometric mixture 24 p4295 A66-42992

FLUORINE COMPOUND

FLUTTER ANALYSIS

Nonmathematical notes on propeller whirl flutter 02 p0300 A66-11993  
Aerodynamic damping effect on cascading double circular arc blades vibrating in transitory mode 03 p0313 A66-12397

subsonic flow at Mach numbers up to 0.7 [AIAA PAPER 65-772] 03 p0434 A66-12

Reduced stiffness responses of airplane longitudinal control, noting elevator flutter and stick-fixed dynamic longitudinal stability [AIAA PAPER 65-784] 03 p0320 A66-12

Two- and three-dimensional plates undergoing limit cycle oscillations supersonic flow treated by Von Karman large deflection theory and quasi-steady aerodynamic theory [AIAA PAPER 66-79] 05 p0774 A66-15

Reduction method for high order flutter systems based on energy compatibility equation for normalized coordinates 05 p0606 A66-15

Supersonic panel flutter using small deflection plate theory and three dimensional unsteady aerodynamic theory [AIAA PAPER 64-491] 05 p0609 A66-15

Improved numerical procedure for harmonically deforming lifting surfaces for supersonic kernel function method [AIAA PAPER 66-78] 08 p1163 A66-18

Self-excited vibrations of damped systems with traveling waves, using oscillation moving along beam resting on elastic foundation, noting flutter of plates and shells 08 p1309 A66-18

Liapunov stability criterion for panel flutter in supersonic flow derived from second method of Liapunov 08 p1310 A66-18

Stability of three-layer cylindrical shell gas stream, analyzing oscillation mode critical flutter dependence on flow resistance to transverse shear 08 p1314 A66-18

Modified strip analysis method predicting finite-span, swept or unswept wing flutter at subsonic to hypersonic speeds 09 p1328 A66-20

Stability in elastic and aeroelastic systems analyzed by Liapunov direct method 09 p1468 A66-20

Forced vibrations of two-degree-of-freedom system with combined Coulomb and viscous damping 09 p1469 A66-20

Mistuning effect on vibration of turbomachine blades induced by wakes 12 p1959 A66-23

Rate of change of eigenvalues of laminated matrix and use in flutter investigation 12 p1972 A66-24

Turbine blade vibration damping, expressing mechanical forces via method of concentrated masses 12 p1938 A66-24

Taper ratio effects on transonic flutter characteristics of series of thin cantilever wings with 45 degree sweepback and aspect ratio 4 13 p2199 A66-26

Reduction of order of aeroelastic flutter motion equations while retaining purely elastic contribution of elimination coordinates, using quasi-static assumption and matrix algebra 14 p2405 A66-27

Flutter of circular cylindrical isotropic shells 14 p2408 A66-28

Flutter conditions for finite-span hydrofoil under partial cavitation or supercavitation 16 p2688 A66-31

Flow instability of incompressible nonconducting fluid in thin cylindrical conducting elastic pipe in constant uniform magnetic field 16 p2764 A66-31

Aeroelastic stability of light aircraft examining appearance of structural nonlinearities in global vibration test determining critical flutter speed 17 p3023 A66-32

Longitudinal acceleration and angular velocity of rotation effect on flexural vibration of elongated body of revolution supersonic flow applied to critical flutter calculation 17 p3027 A66-32

Flexible and rigid hinged hydrofoils not behavior of configurations lift, drag, power input coefficients, etc 17 p2910 A66-32

Flutter of simply supported thin isotropic parallelogrammatic flat panels in supersonic flow [AIAA PAPER 66-474] 17 p3028 A66-32

Bending-torsional flutter of uniform swept wing with velocity component aerodynamic strip theory [AIAA PAPER 66-475] 17 p3028 A66-32

Supersonic flutter from vibration characteristics of trapezoidal wing with

- aspect ratio 17 p3031 A66-33073
- Flutter of rectangular orthotropic panel supported by defelectional spring along two edges in supersonic 18 p3257 A66-34590
- airflow 18 p3257 A66-34590
- Two- and three-dimensional plates in high supersonic flow undergoing limit cycle oscillations analyzed, using aerodynamic theory and von Karman large deflection plate theory 18 p3257 A66-34593
- Binary flutter of wedges in hypersonic flow according to piston theory and McIntosh derivatives 19 p3473 A66-35625
- Reduced stiffness responses of airplane to longitudinal control, noting elevator flutter and stick-fixed dynamic longitudinal stability [AIAA PAPER 65-784] 19 p3279 A66-36485
- Linearized equilibrium conditions for force densities of aircraft oscillating in flight, determining Rayleigh-Ritz equations, measuring elastomechanical parameters by vibration tests 21 p3825 A66-38579
- Common electronic techniques for studying aeroelasticity in high performance aircraft 21 p3827 A66-38654
- Flutter of infinitely long panel of finite width with upper surface exposed to inviscid flow, noting critical wavelength and flutter velocity 21 p3827 A66-38691
- Aeroelastic stability of infinite long cylinder with outer surface exposed to inviscid flow 22 p3992 A66-40338
- Characteristic equation for linear flutter problem of elastic cylindrical shell immersed in gas flow, discussing energy radiation, traveling wave propagation and discontinuity problem 22 p3995 A66-40510
- Flutter of variable geometry aircraft models as affected by airfoil sweep, pivot and wing-empennage coupling [ICAS PAPER 66-12] 22 p3996 A66-40674
- Airfoil pitching motion and flap rotational motion in two-dimensional low supersonic flow in wind tunnels 23 p4053 A66-40975
- Pulse and harmonic techniques used in flight flutter testing, emphasizing natural turbulent excitation and limitations [ICAS PAPER 66-10] 23 p4015 A66-41256
- Nonstationary flows around vibrating obstacles with application to wing flutter and to interactions of various aircraft components 23 p4012 A66-41937

Self-focusing of light from Kerr effect and  
changes in density of  
matter 13 p2167 A66-25109

Optical ray tracing to predict focusing  
characteristics of laser light in refractive  
targets, calculating heating effects in target,  
noting target geometry, refractive index,  
thickness of skin layers,  
etc 13 p2090 A66-25531

Coherent light recording/reproducing  
techniques based on Debye theory of  
coherent light source  
focusing 13 p2091 A66-25541

Fringe field double focusing magnetic  
spectrograph, noting resolution, solid angle,  
energy range, astigmatic lens,  
etc 13 p2083 A66-26551

Vector synchronism and second-harmonic  
light generation in focused  
beams 14 p2307 A66-27191

Accelerator with nonlinear spiral focusing,  
approximating size of stability region,  
adiabatic damping, transverse phase stability  
and perturbations effect 14 p2347 A66-28309

Focusing of long cylindrical electron beam  
by means of short-period permanent magnet  
or long-period reversed field  
magnet 15 p2467 A66-29709

Self-focusing of light from Kerr effect and  
changes in density of  
matter 16 p2745 A66-30288

Ideal and perturbed focusing conditions  
effect on spread of immersed flow  
beam 17 p2971 A66-32821

Focusing molecules in states losing energy  
with applied field, using alternate gradient  
technique 24 p4239 A66-43037

Vector synchronism and second-harmonic  
light generation in focused  
beams 24 p4226 A66-43089

Refraction due to acoustic focusing of  
sound waves in lower troposphere, noting  
effect of wind profile 24 p4203 A66-43108

## FOG

Visible and IR radiation attenuation by  
artificial fogs found to depend on droplet  
size and distribution 01 p0097 A66-10860

Effectiveness of meteorological radar in  
determination of range of meteorological  
visibility in fog 02 p0252 A66-11272

Angular volume-scattering functions  
measured as function of scattering angle for  
natural fogs in atmosphere, using coherent  
and incoherent radiation 02 p0262 A66-12211

Atmospheric model applied to fogs forming  
in valley bottoms and data acquisition in  
connection with this  
phenomenon 03 p0389 A66-12705

Kennington method tested for forecasting  
time of clearance of radiation  
fog 03 p0389 A66-12890

Occurrence of supernumerary fogbows at  
subfreezing temperatures, noting interval of  
appearance and possible formation  
mechanism 09 p1400 A66-20733

Fog and low stratus clouds studied, using  
Tiroso VII photographs of North Pacific  
fog 11 p1728 A66-22323

Possible use of IR radiation to improve  
visibility through fog, including atmospheric  
attenuation effects and radiant energy  
source 16 p2740 A66-30088

Readout technique for laser fog  
disdrometer 17 p2927 A66-33346

Cloud and fog droplet spectra  
rearrangement due to external conditions  
calculated from distribution function of  
water content 20 p3594 A66-38374

Blowing system effect on fog dispersion  
over limited area 20 p3595 A66-38380

Fog transmittance attenuation factor,  
comparing photometric values and values  
calculated from microstructural observations,  
using flow trap 21 p3759 A66-38917

Dispersion of supercooled fogs over airports  
by seeding with dry ice  
[ICAS PAPER 66-7] 23 p4086 A66-41255

## FOIL

## SA METAL FOIL

Diffusion creep rate of thin foil of pure  
polycrystalline material 12 p1971 A66-24925

## FOIL BEARING

Externally pressurized foil gas bearings,  
employing successive approximations method  
to solve Reynolds equation for fluid and  
equilibrium equation for foil  
[ASME PAPER 65-LUB-1]

04 p0526 A66-142

## FOKKER F-27 AIRCRAFT

Netherlands Nationaal Lucht-en  
Ruimtevaartlaboratorium /NLR/ activities  
discussing production of Fokker F-27 and  
28 aircraft and other  
projects 07 p1017 A66-17

## FOKKER F-28 AIRCRAFT

Fokker F-28 Fellowship shorthaul  
passenger aircraft 06 p0807 A66-17

Netherlands Nationaal Lucht-en  
Ruimtevaartlaboratorium /NLR/ activities  
discussing production of Fokker F-27 and  
28 aircraft and other  
projects 07 p1017 A66-17

## FOKKER-PLANCK EQUATION

General 13-moment approximation  
Fokker-Planck equation for  
plasma 04 p0558 A66-14

Scattering of test particle by enhanced  
electric field fluctuations in plasma  
containing nonthermal  
electrons 05 p0721 A66-14

Coulomb collision effect on transverse  
electron oscillations in fully ionized  
plasma determined by Fokker-Planck  
equation 05 p0721 A66-14

Transient processes in vacuum tube  
oscillator synchronized by small harmonic  
signal with random initial phase in presence  
of noise 09 p1357 A66-20

Weak collisions effect on ion wave  
instability in cesium plasma solved by  
linearized Fokker-Planck  
equation 10 p1568 A66-21

Linear and nonlinear oscillators randomly  
perturbed, using Fokker-Planck equation  
with application to nuclear  
reactors 11 p1721 A66-22

Nonlinear servomechanism analyzed, using  
Fokker-Planck equation, discussing tracking  
failure 11 p1670 A66-23

Numerical dynamic predictor for complex  
systems disturbed by random noise  
discussing Fokker-Planck equation, Crank-  
Nicolson difference model,  
etc 11 p1680 A66-23

Relaxation of isotropic distribution of  
particles in homogeneous background  
including nonzero temperature  
effects 11 p1741 A66-23

Correlation functions of amplitude and  
intensity fluctuation for laser model near  
threshold obtained by using distribution  
functions evaluated by Fokker-Planck  
equation, treating amplitude as random  
variable 12 p1892 A66-24

Stability of phase-locked loops using  
Fokker-Planck equation and under additive  
stationary white Gaussian noise linearized  
about some equilibrium  
point 13 p2025 A66-24

Tracking interruption probability in second-  
order astatic system, obtaining solution from  
Fokker-Planck equation and computer  
simulation 14 p2265 A66-25

Solution of stochastic differential equation  
with Markov coefficients by reduction to  
nonrandom PDE of Fokker-Planck  
type 14 p2324 A66-25

Fokker-Planck equation of wave  
propagation in medium with regular  
random inhomogeneities, determining spatial  
angular distribution function of  
ray 14 p2245 A66-25

High energy solar proton propagation in  
interplanetary magnetic field by Fokker-  
Planck equation 15 p2575 A66-26

Hydromagnetic, resistive and  
microinstabilities in plasmas, noting parametric  
collisions and effect and validity of Maxwell  
Vlasov equations with Fokker-Planck  
collision term 19 p3417 A66-30

Diffusion of protons in outer radiation belt  
due to violation of third adiabatic invariant  
for trapped particles 20 p3640 A66-31

Pitch angle diffusion perturbing relativistic  
electrons in Van Allen zones and violating  
adiabatic invariants of electron motion  
using Fokker-Planck  
equation 20 p3641 A66-31

Fokker-Planck equation applied to electron  
under influence of quantum fluctuations  
connected with dissipation, pumping in  
cavity thermal noise, noting distribution  
correlation function 21 p3746 A66-31

Langevin treatment for linear, nonlinear  
stationary and nonstationary random noise

processes compared with Markov methods 21 p3771 A66-39107

Transient processes in vacuum tube oscillator synchronized by small harmonic signal with random initial phase in presence of noise 22 p3873 A66-39834

**FOLDING STRUCTURE**

SA BALLOON

SA PARACHUTE

SA PARAGLIDER

Advances attributable to XB-70 program including aerodynamic concepts, structural material, design, systems and equipment development [SAE PAPER 650798] 01 p0012 A66-10844

Folded antennas, discussing Franklin array and current distribution via equivalent circuit analysis and application for TV transmission and reception 20 p3530 A66-37712

**FOOD**

**S NUTRITION**

**S SPACE FOOD**

**FOOD INTAKE**

Bite-size foods included in feeding study of man exposed for 56 days to oxygen-helium atmosphere 18 p3061 A66-33775

Nutritional evaluation of feeding bite-size foods to man exposed for 56 days to oxygen-helium atmosphere 18 p3061 A66-33776

**FORBIDDEN BAND**

Thermoelectricity decrease of bismuth-telluride based solid solutions due to forbidden bandwidth and majority and minority carrier mobility 01 p0127 A66-11029

Temperature dependence of effective mass and influence of two-phonon processes on mobility in semiconductors with narrow forbidden bands 04 p0565 A66-14263

Radiative recombination in silicon containing structural defects in lattice 04 p0569 A66-14353

Quantum effects in theory of space charge layer in semiconductors, noting electron and hole density 04 p0570 A66-14366

Electron spectrum in highly alloyed gallium arsenide 05 p0730 A66-14650

Gallium arsenide recombination-radiation spectrum discussing effects of impurities on short wave radiation band energy 05 p0731 A66-14657

Enhanced intensity of forbidden lines of neutral oxygen in 28 planetary nebula spectra linked to lower ionization levels 05 p0759 A66-14874

High resolution absorption spectrum of nitrogen in fourth and fifth orders from 1060 to 1520 angstroms 05 p0763 A66-15284

Mechanism for indirect phototransition in semiconductors near natural absorption edge when interacting with current carriers 07 p1105 A66-18373

Calculation of intensity and polarization of forbidden lines of Fe XIII ion in solar corona in presence of nonradial magnetic field 08 p1287 A66-18640

Efficiency of drift-type semiconductor photocell 09 p1358 A66-20816

Bipolar excitation of photoconductivity in silicon due to structural disarrangement caused by IR radiation 10 p1583 A66-22019

Indium antimonide optical absorption shift, forbidden band narrowing and tin alloying induced by neutron bombardment 10 p1587 A66-22150

Pressure induced change in energy gap and forbidden bandwidth of lead telluride 10 p1587 A66-22152

Width variation of forbidden band of Si in electric field of p-n junction 10 p1588 A66-22160

Transition of group IV elements to metallic state confirmed as equivalent to generation of intrinsic current carriers 11 p1759 A66-23447

Electron spectrum in highly alloyed gallium arsenide 13 p2167 A66-25925

Gallium arsenide recombination-radiation spectrum, discussing effects of impurities on short wave radiation band energy 13 p2167 A66-25932

Electric fields in hydrogen plasma leading to forbidden free-bound transitions, considering photodetachment of electrons and radiative capture cross sections 13 p2135 A66-26265

Recombination radiation of strongly

arsenic-doped germanium, noting narrowing of forbidden band 14 p2358 A66-27080

Radiative recombination in silicon containing structural defects in lattice 14 p2368 A66-28251

Quantum effects in theory of space charge layer in semiconductors, noting electron and hole density 14 p2369 A66-28265

Temperature dependence of mean ionization energy changes in germanium and silicon samples exposed to X-rays caused by changes in forbidden bandwidth 16 p2788 A66-31782

Energy levels in forbidden band of gallium arsenide alloyed with silver or gold, determining impurity levels from temperature dependence of electric conductivity and Hall constant 16 p2789 A66-31791

Spectroscopic measurements of cold plasma charged particle concentrations, specifically spectral broadening due to Stark effect, forbidden-line intensities affected by internal electric fields and autoionization line intensities 18 p3143 A66-34032

Theoretical transition probabilities of forbidden lines and unobserved lines of ions in solar corona 18 p3230 A66-34151

Iron and nickel lines in solar UV spectrum, abundance of various metallic elements in solar atmosphere, electron collision cross sections and oscillator f-values of electron transitions 18 p3237 A66-35050

Twin boundary effect on measurements of phonon momentum propagating through Ge bicrystal p-layers at liquid nitrogen temperatures 19 p3438 A66-35482

Indium antimonide optical absorption shift, forbidden band narrowing and tin alloying induced by neutron bombardment 19 p3440 A66-35764

Pressure induced change in energy gap and forbidden bandwidth of lead telluride 19 p3440 A66-35766

Width variation of forbidden band of Si in electric field of p-n junction 19 p3440 A66-35774

Monograph on synthesis and properties of refractory semiconducting materials having large forbidden bandwidth and prepared from element of groups III and V 19 p3448 A66-36731

Electrical properties of indium antimonide single crystals with noncompensated impurity concentration, determining position of deep-seated levels in forbidden band 21 p3799 A66-38929

Dynamic characteristic theory of long diode with base containing impurity atoms producing deep energy levels in forbidden zone 22 p3961 A66-39827

Recombination radiation of strongly arsenic-doped germanium, noting narrowing of forbidden band 22 p3967 A66-40836

Behavior of lambda 6300 angstrom Fraunhofer absorption line in solar spectrum 22 p3984 A66-40850

Hartree-Fock parameters for intermediate coupling compared with those obtained from observed energy levels for C I sequence 23 p4130 A66-41814

**FORBIDDEN TRANSITION**

Forbidden absorption spectrum of ionized iron in solar absorption ascertained with high resolution direct intensity recordings 02 p0286 A66-11353

Forbidden regions produced by two spatially separate point dipoles with parallel axes 14 p2361 A66-27412

Forbidden transitions in atomic systems induced by uniform and nonuniform intermolecular electrical fields in plasma 16 p2786 A66-31562

Spectrum of singly ionized fluorine, tabulating forbidden transitions 18 p3064 A66-33994

Electric quadrupole transition in fourth positive system of CO observed in bands of electric dipole allowed transition 19 p3404 A66-36800

Capture effect on I-V characteristics of junction diodes and injection coefficients in forbidden transition zone 23 p4045 A66-41444

**FORBUSH DECREASE**

Intercalibration of cosmic ray neutron monitors at nine European sea level stations and deduction of daily latitude effect in 1963 01 p0132 A66-10321

Fine structure of energy spectra of Forbush decrease and dependence on solar cycle 01 p0132 A66-10336

Primary Forbush effect dependence on latitude and time from worldwide data on neutron component of cosmic rays 02 p0281 A66-11331

Magnetic storm accompanied by Forbush decreases taking into account atmospheric temperature, noting cyclonic storm origin 02 p0282 A66-11338

Forbush decrease in cosmic radiation spectra as function of solar activity 02 p0283 A66-12113

Increase of cosmic ray intensity during Forbush decrease 06 p0948 A66-16582

Primary cosmic ray variations and Forbush decrease in solar-cycle change 07 p1122 A66-17988

Secular trend of cosmic ray intensity in stratosphere and primary cosmic ray energy spectrum based on 3000 radiosonde measurements 07 p1123 A66-17993

Intensity variation of heavy nuclei in primary cosmic radiation during times of solar disturbances 07 p1123 A66-17996

Changes in rigidity spectra of primary cosmic radiation during Forbush decreases and 27-day variations 07 p1125 A66-18003

Hysteresis effect in long term variation in cosmic radiation, investigating whether such effect appears during short term /Forbush/ decreases 07 p1125 A66-18004

Variation spectrum stability of Forbush decrease and small cosmic ray flare during intensity recovery, noting electric field effect, calculation methods, etc 07 p1129 A66-18023

Forbush decreases in intensity of cosmic rays analyzed from data obtained from stratospheric radiosondes at geomagnetic latitudes 51 and 41 degrees N 09 p1437 A66-20209

Anomalies in cosmic ray intensity increase during period of Forbush decrease 09 p1438 A66-20214

Solar diurnal and semidiurnal variations during Forbush decreases based on neutron recordings, noting near and distant source 11 p1762 A66-22427

Cosmic ray variations and solar corpuscular stream in interplanetary space during March 1958 magnetic storm 12 p1940 A66-24164

Relation between Forbush decreases and magnetic storms, examining spatial distribution of predecrease moments relative to sudden commencements 12 p1941 A66-24171

Forbush decrease in cosmic radiation spectra as function of solar activity 14 p2377 A66-28072

Astronomical model study of physics of penetration of interstellar cosmic rays into solar system 18 p3168 A66-34342

Spherical harmonic analysis to obtain latitude dependence of diurnal variations and changes with time during Forbush decrease 18 p3183 A66-34792

Twenty Forbush decreases with amplitude greater than 4 percent in neutron intensity 18 p3184 A66-34796

Rigidity dependence of Forbush decreases, using underground meson intensity measurement 18 p3184 A66-34797

Solar cosmic ray disturbances in stratosphere measured by balloon-borne radiosondes 18 p3185 A66-34800

First-order cosmic ray modulation, namely production by Sun, diurnal anisotropy, 11-yr cycle and Forbush decrease 18 p3186 A66-34810

Modulation data for primary cosmic ray spectrum at low rigidities determined from daily latitude curves of cosmic ray nucleonic component obtained from IGY neutron monitors 18 p3194 A66-34860

Forbush decreases using meson and nucleon component records in study of sudden commencements during periods between cosmic ray storms 20 p3632 A66-38070

Forbush decreases associated with magnetic events not definitely accepted as

storm sudden  
 commencements 20 p3632 A66-38071  
 Cosmic ray storms, difference in Forbush decrease recovery in nucleon and meson component 20 p3632 A66-38072  
 Cosmic ray meson component distribution with time plots of particle flux revealed characteristic disturbances accompanying sudden commencements of geomagnetic storms associated with Forbush decreases 20 p3632 A66-38074  
 Uppsala IGY-neutron monitor multiplicity measurements indicate increase of attenuation coefficient with increasing multiplicity 20 p3632 A66-38079  
 Transient anisotropic cosmic ray increase during recovery phase of Forbush decrease due to reflection from receding blast wave and co-rotating shock wave formed during explosive heating of solar corona 23 p4123 A66-41687

**FORBUSH EFFECT**  
 Book on geo- and heliophysical effects in cosmic rays and auroras 02 p0280 A66-11329  
 Forbush decrease characteristics in cosmic ray intensity 02 p0280 A66-11330  
 Excessive cosmic radiation absorption in lower nocturnal ionosphere at middle geomagnetic latitudes during Forbush effects 04 p0514 A66-13443  
 Cosmic radiation studies in U.S.S.R during IGY noting 11-year variations, Forbush effect, solar particle propagation, etc 05 p0749 A66-15232  
 Relation between Forbush decreases and chromospheric flares, obtaining longitudinal distributions before and after onset, using statistics 05 p0753 A66-15394  
 Changes in solar cosmic ray and geomagnetic field intensities during magnetic storms accompanied by decrease in galactic cosmic ray intensity, using moving averages method 05 p0753 A66-15395  
 Increase with latitude of Forbush effects and secular variations in cosmic ray intensity explained by worldwide data obtained with meson detectors 05 p0754 A66-15398  
 Magnetic storm accompanied by cosmic ray intensity increase analyzed, considering Forbush effect and determining all peaks 05 p0755 A66-15403  
 Cosmic radiation measured by neutron monitor in Antarctic during enhanced solar activity in September 1963, determining flares connected with particles producing Forbush effects 07 p1118 A66-17642  
 Solar corpuscular stream effect on magnetic storms and Forbush effect 07 p1121 A66-17985  
 Cosmic ray intensity measured during geomagnetically quiet and active days from 1959 to 1963 by using balloon flights, noting role of ionization, Forbush effect, etc 07 p1124 A66-18000  
 Forbush effect and region of decreased cosmic ray intensity extending from Earth to Sun 07 p1129 A66-18024  
 Expected rigidity spectrum of variations in framework of dynamic piston model of Forbush effect 09 p1438 A66-20213  
 Energy dependence of transparency of walls of transition region shell obtained from Forbush effects, in connection with cosmic ray intensity 09 p1439 A66-20221  
 Cosmic ray variations analysis based on IGY and IGC data, discussing diurnal variations, cosmic ray burst, Forbush effect and existence of interplanetary magnetic field and of solar magnetic traps 12 p1940 A66-24161  
 Forbush, geomagnetic interaction, cosmic ray variation and solar corpuscular flux effects during magnetic storms in period of maximum solar activity 12 p1940 A66-24165  
 Abrupt increase in cosmic ray intensity coinciding with presence of Forbush effects, noting dependence on geographic latitude and cut-off rigidity, obtaining energy spectra 12 p1941 A66-24168  
 Forbush effect and solar cosmic ray manifestation of effect of compression of Earth magnetosphere 12 p1941 A66-24174  
 Cosmic radiation, interplanetary magnetic field, solar proton propagation long-term /solar cycle/ modulation of intensity, Forbush effect and daily intensity variation 18 p3175 A66-34741

Solar particles generated during small chromospheric flares 18 p3184 A66-34799  
 Anisotropy of Forbush effect in ascertaining structure and intensity of interplanetary magnetic field 24 p4272 A66-43159

**FORCE**  
 SA AERODYNAMIC FORCE  
 SA CENTRIFUGAL FORCE  
 SA CENTRIPETAL FORCE  
 SA ELECTROMOTIVE FORCE  
 SA G FORCE  
 SA INERTIAL FORCE  
 SA LIFT FORCE  
 SA LORENTZ FORCE  
 SA MEMBRANE FORCE  
 SA PONDEROMOTIVE FORCE  
 SA STRAIN  
 SA STRESS  
 SA TORQUE  
 SA TORSION  
 SA VAN DER WAALS FORCE  
 Matrix force analysis for calculating stresses and deflections in partitioned complex structures 16 p2820 A66-31324  
 Closed loop control system combined with air beating technology for measurement of multicomponent microforces 20 p3555 A66-36870

**FORCE DISPLACEMENT INDICATOR**  
 Calibration problem of load-measuring instruments solved, using automatic digital voltmeter [ASTME PREPRINT IQ66-705] 12 p1882 A66-24412  
 Design and function of air bearings, measuring displacement force of system checking by autocollimation method 13 p2085 A66-25074

**FORCE DISTRIBUTION**  
 SA NORMAL FORCE DISTRIBUTION  
 Simplified method for verifying previously calculated bar forces in plane trusses extended to three-dimensional structures 10 p1616 A66-21492  
 Lifting body with controllable radial force, examining acceleration and deceleration, equation of motion, target hitting accuracy improvement via force variation, etc 11 p1733 A66-23338  
 Three-dimensional statically indeterminate frame with rigid modes, noting effect of bending moments for shifting forces 13 p2207 A66-26498  
 Tangential electrode forces on cathode and anode electrode for arc moving in magnetic field are not negligible in plasma driving 15 p2428 A66-28687  
 Concentrated forces on shells, discussing load distributions and pressure variations 23 p4142 A66-41957  
 Series solution to problem of spherically isotropic elastic medium bounded by concentric spherical surfaces, noting force and stress concentration 24 p4285 A66-42141

**FORCE FIELD**  
 Finite collision time for artificial celestial body moving under influence of Newtonian force from attractive center 01 p0137 A66-10794  
 Terrestrial gravitational potential determined by observation of satellite motion, assuming trajectory is determined solely by force field 03 p0428 A66-13027  
 Motion stability of linear continuous systems noting influence of various forces 03 p0438 A66-13094  
 Experimental viscosity of dissociating system nitrogen tetroxide and nitrogen dioxide, obtaining force constants for Lennard-Jones potential having no effect on viscosity of gas mixture 06 p0823 A66-16635  
 Particle distribution and motion in field of force, discussing density profile, energy dissipation, Coulomb charge shielding for local thermodynamic equilibrium and free orbital motion 08 p1261 A66-18743  
 Satellite orbit evolution under effect of small perturbing force with constant magnitude and direction 08 p1298 A66-19570  
 Motion stability of gyroscope in universal suspension with spring restraints and damper in gravitational field extended to include Newtonian central force field 08 p1226 A66-19582  
 Vehicle motion parameters in Newtonian central force field determined, using geometrical structures devised from

properties of velocity  
 hodograph 08 p1226 A66-19584  
 Equations of motion of gyrost at having fixed point and gyrost at rotating about fixed point in Newtonian force field 08 p1227 A66-19761  
 Plane optimum transfer of point of variable mass between two elliptical orbits in centrally directed Newtonian force field 11 p1774 A66-23036  
 Turbulent heat transfer effect on gas stratification in field of Archimedes forces 12 p1979 A66-24429  
 Nonrelativistic force in simple magnetizable fluid derived from thermodynamic information about energy and power 12 p1915 A66-24655  
 Force field detection and control of objects in space, using gravitational electrostatic or magnetostatic fields 12 p1820 A66-24677  
 Relations among vibrational frequencies of isotopically substituted molecules when only one Cartesian coordinate of any atom is involved in motion, obtaining general valence-force-constant matrix 14 p2336 A66-27377  
 Motion of material point in central force field, reducing problem to solution of boundary value problem based on Pontryagin maximum principle, using analog computers 14 p2245 A66-28282  
 Differential equation of motion of two variable-mass points in central force field 15 p2538 A66-29042  
 Motion of constant relative kinetic motion gyrost at through force field 15 p2502 A66-29333  
 Integrability of motion equations for rigid body motion about fixed point in Newtonian force field 15 p2542 A66-29333  
 Servomechanism design, noting optimum response parameters, physical characteristics as functions of inertia, external force, energy dissipation, kinetic energy, operation, etc 16 p2671 A66-31061  
 Shape and stability of liquid-gas interface in annular tank in force field determined by numerical integration of boundary value problem and eigenvalue [AIAA PAPER 66-425] 16 p2689 A66-31481  
 Second-order optimal elliptical orbital transfer trajectory between two coplanar circular orbits in Newtonian force field 17 p3003 A66-32583  
 Inertial navigation system theory that uses increased numbers of newtonometers/force measuring devices/ in place of gyroscopic sensitive elements 17 p2926 A66-32803  
 Single-impulse transition in Newtonian central force field from hyperbolic to elliptical orbit in case of radial impulse 19 p3455 A66-35277  
 Stability of bending-torsional equilibrium of cantilevered bar subjected at end to follower force, as in case of wing under jet determining critical thrust 19 p3475 A66-36433  
 Motion of arbitrary gyrostabilizer in central Newtonian force field, applying Liapunov stability conditions for regular precession 19 p3362 A66-36843  
 Rarefied gas motion instability, constructing general solution for effect of various force fields 19 p3343 A66-36843  
 Nonlinear ODE of radial motion of body in nonlinear central force fields, considering drag effects 21 p3773 A66-39433  
 Intermediate-thrust arcs in central force field satisfying optimality conditions, noting that motions are degenerate solutions of Euler equations 22 p3980 A66-40466  
 Optimum trajectory of pulsed coplanar orbital transfer in central Newtonian force field with restrictions placed on distance to attracting center 22 p3980 A66-40466

**FORCE-FREE MAGNETIC FIELD**  
 Force-free paramagnetic model and force-free Bessel function model of stability of feeble pinch, presenting numerical calculations using Newcomb criterion 13 p2144 A66-25722  
 Force-free magnetic fields generated by orthogonal current systems in unbounded conducting fluid 18 p3151 A66-35033  
 Motion of isolated energetic charge particle in simple force-free magnetic field with rectilinear lines of

- Force 19 p3400 A66-35925
- FORCE LINE**
- Reconnection of magnetic lines of force to form closed loops during transient phase of rotation of spheres and cylinders from rest 12 p1868 A66-23857
- FORCED CONVECTION**
- Forced convection vaporization of Freon 113 flowing in horizontal Pyrex tube examined, using motion pictures 01 p0165 A66-10910
- Liquid cooling on semiconductor devices noting natural convection, nucleated boiling, forced convection and forced convection with boiling 02 p0203 A66-11922
- Forced motion of viscous liquid heated nonuniformly from below and subject to nonlinear basic temperature profile 02 p0219 A66-11958
- Forced convective heat transfer from isothermal and nonisothermal uniformly spinning bodies of revolution obtained by similar flow analysis [ASME PAPER 64-WA/HT-15] 04 p0595 A66-13387
- Free convection on laminar forced flow heat transfer in horizontal circular tube [ASME PAPER 65-HT-23] 05 p0783 A66-14744
- Flow stability in multitube forced convection vaporizers, using Freon 113 in closed test loop with five-tube boiler [ASME PAPER 65-HT-61] 05 p0786 A66-14762
- Combined free and forced convection flows with heat and mass transfer in laminar boundary layers on vertical surfaces 07 p1150 A66-17579
- Unsteady, combined free and forced convective MHD channel flow of conducting fluid through transverse magnetic field 07 p1085 A66-17580
- Annular flow and two-dimensional forced convective boiling heat transfer to hydrogen in nucleate and film boiling regimes 08 p1316 A66-18832
- Increased mass transfer from flat plate caused by wake from cylinders located near boundary layer edge 08 p1211 A66-19682
- Forced convection problem for steady fully-developed laminar flow in straight channel when fluid properties are functions of temperature 09 p1366 A66-20175
- Saturated and surface film boiling from horizontal isothermal plate in longitudinal flow field analysis, based on two-phase boundary layer theory, correlating heat transfer and skin friction characteristics 12 p1980 A66-24908
- Heat-transfer coefficients calculated for forced convection from heated flat plate at zero incidence to stream of viscous fluid, noting role of Reynolds number 12 p1981 A66-24945
- Unsteady laminar forced and free convection in coaxial sector tubes in presence of constant axial temperature gradient, accounting for oscillation and resonance 13 p2210 A66-26719
- Forced convection heat transfer in symmetrical ducts when fluid is liquid metal, examining new prediction methods for engineering analysis and design 16 p2824 A66-30304
- Pressure and temperature measurements obtained from closed loop, forced convection boiling and condensing processes under zero gravity 16 p2826 A66-30490
- Free convection on laminar forced flow heat transfer in horizontal circular tube [ASME PAPER 65-HT-23] 16 p2828 A66-30983
- Heat transfer of forced laminar convection in multiply connected regions 16 p2830 A66-31708
- Forced convection heat transfer for liquid metal flow in rectangular channels with prescribed wall heat fluxes and heat sources in fluid stream 17 p3038 A66-33468
- Forced convection heat transfer coefficient of single pin fixed on plate, deriving expression for case corresponding to infinite circular cylinder 18 p3266 A66-34647
- Forced convection caused by normal and longitudinal components of flow around hot wire, noting effect of wire length 20 p3544 A66-36928
- Data correlations on forced-convective heat transfer to cryogenic fluids by nucleate, film and transition region boiling 20 p3677 A66-37098
- Integral solution of laminar film condensation with combined gravitational-type body force and forced convection concurrent and parallel to surface 20 p3678 A66-37118
- Laminar forced convection heat transfer to gas from circular tube, achieving boundary condition of uniform heat flux 20 p3679 A66-37508
- Laminar forced-convective heat transfer for dissipative fluid in tube bounded by concentric circles 21 p3837 A66-39610
- Similar solutions for laminar boundary layer under forced convection of mixture of fluids with constant mass density and temperature and composition dependent parameters for flat plate analysis 23 p4059 A66-42007
- FORCED OSCILLATION**
- Laboratory vibratory stand for calibrating sensors of oscillatory motion 01 p0070 A66-11020
- Graphical method for investigating forced oscillations in nonlinear systems with piecewise linear characteristics 01 p0159 A66-11175
- Forced discontinuous oscillations of fluid in pipeline, discussing energy dissipation effects in LF range 04 p0509 A66-13556
- Steady states of mechanical system using perturbation method, assuming primary and secondary oscillators are tuned to single pulse, each involving Duffing type nonlinearity 04 p0545 A66-14169
- Pressure response to forced oscillation of shallow cylindrical porous chamber [ASME PAPER 65-WA/FE-9] 05 p0780 A66-15730
- Pressure phase angle and frequency for forced oscillations of small porous chamber [ASME PAPER 65-WA/FE-8] 05 p0685 A66-15731
- Nonlinear forced oscillations in phase automatic frequency control system, accounting for nonlinearity of system 07 p1001 A66-17353
- Forced oscillations of elastohydrodynamic systems, using Rabotnov functions as kernels of integral operators, permitting description of creep curves for materials 08 p1307 A66-18884
- Steady state sound disturbances induced in monatomic gas by oscillating plane boundary 11 p1737 A66-22904
- Forced oscillations of ferrite core circuit, showing phase characteristics and parameters of inductance and amplitude 12 p1958 A66-23725
- Forced oscillations of coaxial multidisk rotors, allowing for gyroscopic effect and rotating at different angular velocities determined by replacing differential equations with integral equations 12 p1964 A66-24050
- Transition probabilities of nitrogen-nitrogen collision obtained with time-dependent wave functions of forced harmonic oscillator and by numerical methods 13 p2131 A66-25384
- Secondary motion generation in vortex field, noting vortex core deformation by oscillation, radial perturbation effect on vorticity distribution, etc 13 p2070 A66-26715
- Forced oscillations of three-layer plate used as vibration dampers for engine components 14 p2400 A66-27696
- Optimum parametric damping of forced oscillations when random external force operates on circuit 15 p2469 A66-28674
- Numerical problems in application of Urabe results in considering periodic nonlinear differential systems, obtaining Galerkin approximations 16 p2737 A66-31231
- Design of adaptive systems with forced oscillations, using correlation and filter methods 17 p2902 A66-32573
- Distribution function, harmonic and statistical linearization methods applied to study forced oscillations in nonlinear oscillatory system 17 p2959 A66-32801
- Force resonance oscillations of one degree of freedom system with randomly time varying natural frequency 17 p2959 A66-32802
- Forced oscillations of gyroscopic tachometer with dry friction analyzed by Zhelyazkov theorems 17 p2928 A66-33496
- Gyrochamber radial rigidity effect on amplitudes of forced oscillations of gyroscope with dynamically unbalanced rotor 17 p2928 A66-33497
- Traveling waves interaction in gas laser, explaining forcing-of-oscillations and traveling wave suppression effect 18 p3119 A66-34685
- Parameter-plane method analysis of nonlinear equations of asymmetric oscillations in adaptive feedback control systems 19 p3338 A66-36740
- Electromagnetic wave absorption in nonuniform plasma cylinder in presence of forced oscillations 21 p3781 A66-39009
- Necessary conditions for subharmonic and superharmonic synchronization in weakly nonlinear systems that permit energy exchange between response at excitation frequency and close to resonance frequency 21 p3772 A66-39355
- Haag general synchronization theory for oscillating systems with one degree of freedom applied to boundary value problems for multivibrating systems 21 p3774 A66-39607
- Approximate solution of forced oscillation PDEs of rectangular orthotropic plate on elastic base with two characteristics 23 p4139 A66-41557
- Nearly-periodic oscillations in nonlinear systems having periodic coefficients and subject to external periodic force 23 p4141 A66-41947
- Oscillations of nonlinear system with one degree of freedom caused by periodic force and with random variation in natural frequency 24 p4237 A66-42446
- FORCED VIBRATION**
- Beam forced vibration with harmonically time-variant motion produced by uniformly distributed load, assuming one boundary condition is nonlinear 01 p0157 A66-10926
- Transverse vibrations of viscoelastic shaft fixed at one end and supporting mass subjected to sinusoidal force at other 01 p0158 A66-11080
- Forced vibration of system with polygonal hysteresis loops in presence of constant force 01 p0159 A66-11174
- Forced vibration in nonlinear system with Coulomb and combination friction 01 p0159 A66-11176
- Parameter and matrix solution techniques for analyzing forced vibrations response of damped multidegree of freedom systems [AIAA PAPER 65-786] 03 p0438 A66-13070
- Steady state response of damped cylindrical sandwich shell under radially symmetric time harmonic pressure [ASME PAPER 65-WA/UNT-1] 05 p0779 A66-15601
- Forced vibrations of two-degree-of-freedom system with combined Coulomb and viscous damping 09 p1469 A66-20950
- Forced vibration function for stresses and displacements in viscoelastic thick-walled cylinder case-bonded to thin shell, noting pressure and strain effect [AIAA PAPER 65-173] 10 p1617 A66-21784
- Mechanical forced vibrations encountered in aviation, assessing physiological and neurophysiological effects including visual acuity 10 p1493 A66-22128
- Exact solution of wave field of point vibrator operator on free plate in form of elastic strip, comparing theory and measurement 11 p1780 A66-22605
- Mistuning effect on vibration of turbomachine blades induced by wakes 12 p1959 A66-23796
- Transient motion of simple mechanical systems using vectors as alternative to finding equivalent control system and solution by root locus method 12 p1971 A66-24975
- Multiple force generator for vibration testing large packages which minimizes problems of mobility, isolation and alignment 16 p2677 A66-30457
- Forced aperiodic vibrations in idealized viscously damped system, subjected to parametric excitation by forcing function with uniformly accelerating frequency and constant displacement amplitude 16 p2678 A66-30460
- Small transverse vibrations of linearly viscoelastic Timoshenko beam of incompressible material, detailing free and forced vibration 17 p3024 A66-32361

Forced motions of hollow cylinder encased in thin elastic shell and subjected to time-harmonic pressure at inner surface of cylinder 18 p3259 A66-35026

Error estimates for difference methods in forced vibration problems 20 p3589 A66-36901

Characteristic phase-lag method for analyzing forced response of damped systems used in optimal multipoint excitation 21 p3824 A66-38568

Steady state response of damped cylindrical sandwich shell under radially symmetric time harmonic pressure [ASME PAPER 65-WA/UNT-1] 21 p3832 A66-39530

Linearized potential theory for forced vibration of continuous self-exciting plate on hinged support in supersonic flow, investigating parametric resonance frequencies relation to coupling of eigenfunctions 22 p3995 A66-40508

Panel flutter analysis via forced vibration technique noting frequency coalescence, flutter boundary and experimental technique [AIAA PAPER 66-769] 22 p3895 A66-40650

Transient response of lightly coupled nonlinear two degree of freedom systems subject to forcing 23 p4091 A66-41696

Steady state free and forced vibration response of beams supported on nonlinear springs of Duffing type 23 p4140 A66-41913

Free and forced vibration effect on drift of gyroscope supported in gimbals 23 p4071 A66-41981

Input signal level for stability loss or self-oscillations in automatic control system, using analysis for nonlinear systems with forced vibrations 24 p4188 A66-42476

**FORCED VIBRATORY MOTION EQUATION**

Forced oscillations in nonlinear relay type control system predicted via periodic solutions to nonlinear difference equation 05 p0654 A66-14606

Forcing function acting upon rigid body rotating about fixed point replaced by motion of axis of rotation and another forcing function 08 p1310 A66-19158

Amplitude calculation of forced mass vibrations in damped linear mechanical system from column matrices of oscillation modes of eigenfrequencies 11 p1783 A66-23018

Forced solutions for Van der Pol-Duffing equation in first harmonic approximation 13 p2129 A66-26337

Amplitude ratio of two forced vibrations for asymmetric shaft rotor excited by periodic external force 16 p2714 A66-30811

**FORECASTING**

**S PREDICTION THEORY**

**S STATISTICAL FORECASTING PROJECT**

**S WEATHER FORECASTING**

**FORGING**

Estimation of die loads in impact forging of axially symmetric disks and flat slabs [ASME PAPER 65-WA/PROD-1] 05 p0691 A66-15636

Forging techniques for vacuum hot-pressed unclad beryllium metal billets, noting temperature effect 08 p1230 A66-18845

Ausforging, process of plastically deforming austenitic steel at high temperatures, without recrystallization and prior to transformation 13 p2107 A66-25639

Newer titanium alloys compared with present production alloys from closed die forgings in typical airframe and engine configuration 14 p2317 A66-28011

Forging methods for reliably producing unalloyed molybdenum forgings with high impact strength for rocket nozzle application 19 p3366 A66-36107

Evolution of tungsten forging processes, discussing warm-forming, ring-rolling and combination forging methods 19 p3366 A66-36108

Fabrication process for turning cast Cb-10W-10Ta alloy ingots into large-diameter rings by forging and ring rolling 19 p3366 A66-36111

**FORM FACTOR**

Electromagnetic form factors of electron and muon neutrinos evaluated, using intermediate vector-boson theory, noting renormalization induced by electromagnetic interactions 15 p2544 A66-28944

**FORM PERCEPTION**

**SA PERSPECTIVE**

Visual perception of forms and relevant factors 04 p0462 A66-13796

**FORMALDEHYDE**

**SA PHENOL FORMALDEHYDE**

Molecule reorientation and transition probability in molecular beam maser using formaldehyde 22 p3929 A66-39662

**FORMAMIDE**

**S AMIDE**

**FORMATION**

**S CRACK FORMATION**

**FORMATION ENERGY**

Concentration dependence of thermodynamical functions of interstitial solid solutions, calculating energy of formation 08 p1258 A66-18897

Devitrification of glass around collapsed bubbles in tektites, noting formation mechanism 11 p1773 A66-22962

Thermodynamic and physical properties of beryllium hydroxide at four temperatures in 1567-1808 degrees K range, with computation of free energy of formation 14 p2370 A66-27372

**FORMATION HEAT**

Alloy junction formation, discussing spectral characteristics of electroluminescence from forward-biased 4H SiC p-p alloy junctions as function of formation temperature 04 p0497 A66-13982

Composition and combustion products of boron at 300 to 3200 degrees K and heat of formation of boron oxide 16 p2830 A66-31604

Nitrate heat of formation value revised by re-evaluating lattice energy of cesium nitrate, considering charge distribution in anion 23 p4031 A66-41221

Heat of formation of perfluoroammonium ion estimated from thermochemical correlations and compared with estimates by means of Kapustinskii approximation for lattice energies 23 p4031 A66-41222

Heat of formation of oxygen difluoride for reaction with hydrogen, using Parr fluorine combustion bomb containing metal ampoule employing burst diaphragm 23 p4118 A66-41238

Heat of pyrolysis of resin in silica-phenolic ablator determined from combustion calorimetry measurements of heats of formation 23 p4150 A66-41892

**FORMING**

**SA COLD FORMING**

**SA ELECTROFORMING**

**SA ELECTROHYDRAULIC FORMING**

**SA EXPLOSIVE FORMING**

**SA HOT FORMING**

**SA MAGNETIC FORMING**

**SA METAL FORMING**

**SA MOLECULAR FORMING**

**SA ROLL FORMING**

**SA STRETCH FORMING**

Silicone alumina low temperature low-pressure plastic molding technique for precision forming of ceramic materials for aerospace structural application 10 p1538 A66-21130

Chemical and electrical energies in manufacturing noting role of numerical control, hydrostatic processes, forming, electrochemical machining, etc 24 p4217 A66-42336

**FORMULA**

**S BETHE-HEITLER FORMULA**

**S RECURSION FORMULA**

**FORSTERITE**

**S SILICATE**

**FORTRAN**

Integrated modular digital computer system for ICETRAN/ICES-FORTRAN/programming of engineering problems 12 p1827 A66-23833

Subroutines and functions of BE VISION, package of FORTRAN programs for drawing orthographic views of combinations of plane and quadric surfaces 15 p2510 A66-29770

Flight Load Survey program, written in Fortran IV, for accurate and rapid sounding of wind-induced loads on aerospace launch vehicle [AIAA PAPER 66-470] 16 p2811 A66-31473

Fortran program for finding minimum value of monotonic function defined on ordered sets of positive integers 19 p3309 A66-36044

**FORTRAN II ASSEMBLY PROGRAM /FAP**

Optimizing procedures using Fortran FAP programming on IBM 709/70 computers, comparing eight known techniques 19 p3308 A66-3580

**FORWARD SCATTER**

Plasma ion and electron temperature measurement via forward scattering spectrum of deuterium plasma 18 p3146 A66-3420

Tropopause detection by radar, examining detection of high altitude clear-air turbulence by radar and forward-scatter techniques 22 p3912 A66-4030

**FOSTER THEORY**

Coordinate transformation for synthesis network functions, considering matrix equation used in Foster form realization RC driving point impedance 02 p0207 A66-1140

Distributed RC network synthesis determining necessary and sufficient conditions for driving point impedance frequency response of transfer function and Foster type realizations 11 p1678 A66-2370

**FOUNDATION**

**S STRUCTURAL FOUNDATION**

**FOUR-BODY METHOD**

Solar influence on libration point satellite motion for 2500 days in vicinity of Earth-Moon system [AIAA PAPER 65-88] 02 p0288 A66-1140

Intermolecular forces for two-, three- and four-bodies and those in liquid or condensed medium 06 p0911 A66-1610

Stability of spacecraft motion in Earth-Moon system near equatorial libration point 16 p2810 A66-3150

Libration point motion in restricted four-body problem and stable trajectories determination for Earth-Moon-Sun system noting effect of initial configurations system [AIAA PAPER 65-684] 19 p3461 A66-3580

**FOURIER ANALYSIS**

Invalidity of Walkinshaw method for calculating periodically loaded waveguide under certain conditions 04 p0496 A66-13982

Sufficient conditions for containing modulus of Fourier indices of almost periodic solution of nonlinear almost periodic system 05 p0709 A66-1500

Jittered sampling obtaining error bounds for sample independent and correlated jitter and bandpass sampling 06 p0865 A66-1610

Harmonic analysis of periodic sequence of pulses, using Fourier analysis 07 p1001 A66-1700

Fourier analysis, used to determine particle size, strains and faulting, applied to silver films evaporated onto glass substrates at different residual gas pressures 09 p1383 A66-2020

Transient behavior of varactor bridge doubler examined, using direct digital integration of circuit equations 10 p1513 A66-2140

Kinetic approximation of electromagnetic surface wave propagation in infinite plasma sheath solved by Fourier method, noting resulting dispersion equation 11 p1743 A66-2240

Conditions on Fourier coefficients of function  $f(x)$  sufficient to be of bounded variation 11 p1723 A66-2300

Necessary and insufficient conditions for well-posed Cauchy problems verified by Fourier analysis 13 p2118 A66-2500

Sufficient conditions for containing modulus of Fourier indices of almost periodic solution of nonlinear almost periodic system 16 p2735 A66-3000

Plasma wave quasi-linear theory, noting nonlinear effect treatment via distribution function, electric field, Fourier components, decay, etc 17 p2966 A66-3200

Fourier analysis determination of optimum efficiency of cavity-controlled Gunn-effect oscillator when bias voltage is almost constant times voltage 20 p3527 A66-3700

Sidereal diurnal variation of high-energy cosmic radiation, noting parameters of anisotropy coefficient, cosmic ray source distribution and air shower measurements 20 p3631 A66-3700

Invalidity of Walkinshaw method for calculating periodically loaded waveguide

- under certain conditions 20 p3532 A66-37869  
 Modulation and demodulation for probabilistic coding, noting error chances and interrelations affecting performance of communications system 21 p3707 A66-39636  
 Dimensional filtering in IR technology for background noise elimination, discussing Fourier analysis treatment of system 21 p3768 A66-39646  
 Maximum permissible error in radiation patterns calculated by Fourier analysis of near field measurements of antennas 22 p3861 A66-39716  
 Semiconductor conductivity in strong SHF electric fields, measuring dielectric constant and Fourier component 23 p4068 A66-41620  
 Line shape of RF dimensional effect in metals showing correlation with electromagnetic wave attenuation in skin layer 24 p4172 A66-42528
- FOURIER-BESSEL SERIES**  
 Concentric ring antenna arrays with low sidelobes, estimating currents from Fourier-Bessel series 06 p0825 A66-16017
- FOURIER LAW**  
 Revised equation for thermokinetic phenomena under Fourier relationship, considering certain finite time is required for development, noting role of flux density 12 p1973 A66-23526  
 Electrical analogy for turbulent liquid metal heat transfer in noncircular duct entrance region, solving Fourier equation, determining fluid boundary conditions, temperature distribution, etc 13 p2210 A66-26717
- FOURIER SERIES**  
**SA GIBBS PHENOMENON**  
 Kinetic theory of Lorentz plasma in rotating magnetic fields and electromagnetic fields based on Boltzmann equation 01 p0113 A66-10640  
 Estimates in Stepanov metric of deviation of uniform almost periodic function with bounded spectra from S-almost periodic functions 01 p0094 A66-10649  
 Sufficient conditions for transformation sequence exhibiting Gibbs phenomenon when using triangular methods of Fourier series summability 02 p0250 A66-12106  
 Class of periodic functions for which given method of summation gives trigonometric approximation of optimal order 03 p0388 A66-12713  
 Generalized convolution theorems of periodic functions based on Fourier series formalism used to study processes in linear systems 04 p0506 A66-14402  
 Synthesis method for linear time-varying systems, discussing integral formulation and approximation functions 05 p0654 A66-14609  
 Approximation of continuous function by typical mean of Fourier series 05 p0709 A66-15357  
 Extreme properties of operator which degenerates to trigonometric polynomials in case of periodic functions 05 p0709 A66-15358  
 Sampling representations of band limited deterministic signals obtained, using nonharmonic Fourier series 06 p0861 A66-16194  
 Linear methods of summation of Fourier-Laplace series 06 p0902 A66-16229  
 Coefficient properties and absolute convergence of Fourier series of periodic function 06 p0902 A66-16230  
 Proof of two theorems concerning convergence of Fourier-Lebesgue series 06 p0903 A66-16902  
 Approximation theorem and uniqueness theorem for abstract equations with almost periodic coefficients 07 p1056 A66-17603  
 Convergent series representation of system of measurable functions that are complete and orthonormalized 07 p1060 A66-18251  
 Von Karman-Donnell large-displacement equations for thin circular cylindrical shells extended by considering larger term numbers in Fourier series representing radial displacements after buckling 08 p1309 A66-19143  
 Fourier analysis of modulation products in nonlinear device output and optimum frequency conversion for n-frequency input 09 p1396 A66-20639  
 Necessary and sufficient condition for matrix distribution to have positive-real Laplace transform 09 p1396 A66-20641
- Floquet form of solution to system of linear differential equations with periodic parameters 09 p1363 A66-20798  
 Text for senior undergraduates, using Fourier series and integral transforms to discuss standard differential equations of mathematical physics 09 p1397 A66-20917  
 Short-pulse scattering by simple geometric shapes useful for heuristic models of electromagnetic scattering, illustrating creeping-wave return 10 p1500 A66-21618  
 Secondary flows in turbine cascades, obtaining correlations between velocity distributions and circulations along span by expanding Fourier series 11 p1632 A66-22664  
 Linear system dynamics, discussing time function vector space, spectral coefficients, orthonormal and transfer functions, parameter variation, Fourier approximation, etc 11 p1679 A66-23269  
 Spherical summability of Fourier series of function integrable on unitary group 11 p1723 A66-23360  
 Self-equilibrating bending of complete circular cylindrical shells described by first harmonic terms of Fourier series for displacement components 12 p1962 A66-24004  
 Estimates in Stepanov metric of deviation of uniform almost periodic function with bounded spectra from S-almost periodic functions 12 p1903 A66-24020  
 Inverse Laplace transformations in terms of Laguerre functions 12 p1905 A66-24654  
 Fourier representation for Markov chains and strong ratio theorem 12 p1905 A66-24820  
 Digital calculation of transient one-dimensional heat flow confirms accuracy of small and large Fourier number approximations 12 p1981 A66-24998  
 Electromagnetic scattering by circular wire loops loaded with lumped impedances, obtaining solution to integral equation by Fourier series 14 p2247 A66-26863  
 Radiation impedance of infinite planar dipole array, phased for any angle of radiation, calculated by Fourier series expansion of field in plane waves 14 p2247 A66-26865  
 Modulation theory, discussing phase-envelope relation for band limited wave in terms of Fourier series 14 p2234 A66-27032  
 Thermal stresses in finite cylinder with prescribed temperature distribution on curved lateral surface and with ends in contact with smooth insulating plates 14 p2400 A66-27725  
 Radiation characteristics of vertical dipole in warm plasma, expressing vector potential functions in Fourier integrals 14 p2240 A66-27916  
 Summation of Fourier series associated with integrable function  $f(x)$ , using weighted averages of partial sums 15 p2529 A66-29848  
 Integral expression for coefficients of Fourier series attached to nonintegrable function 15 p2529 A66-29853  
 Closed-loop automatic control system with unvalued substantially nonlinear element, using approximation of characteristics by Fourier series 16 p2669 A66-30754  
 Fractional powers of linear operators role in linear and nonlinear elliptic and parabolic equations, Fourier series in eigenfunctions of elliptic operators, etc 16 p2736 A66-30978  
 Book on bending theories of sandwich plates including use of Fourier series, stress-strain state, trigonometry, deflection theory, etc 16 p2818 A66-31100  
 Polynomials orthogonal with respect to contours, examining analytic function representation via Fourier series expansion of such polynomials 16 p2738 A66-31409  
 Continuous functions with given differential properties on perfect measure set and application to Fourier series 16 p2740 A66-31799  
 Fourier series convergence domain of perturbation function in restricted three-body problem representing planetary configuration 17 p2995 A66-31845  
 Uniform harmonic summability of Fourier series and conjugate series 17 p2947 A66-32840  
 Fourier series of Gegenbauer function, examining convergence characteristics 18 p3126 A66-33696  
 Asymptotic expression for difference between continuous periodic function and typical mean of Fourier series 18 p3128 A66-35013  
 Arbitrary motion of circular cylinder in ideal fluid near wall, using Fourier series 19 p3342 A66-36468  
 Photometry of flux from surface and representation as Fourier series of time dependence of received reflected flux for torse of convex curvature 20 p3556 A66-36937  
 Fourier series solution to electromagnetic wave diffraction on metallic gratings with anisotropic dielectric 20 p3512 A66-37148  
 Exact solution of thermoelastic problems in two dimensions, using doubly infinite Fourier series 20 p3673 A66-38276  
 Thermal stresses in flat rectangular isotropic plate of constant thickness under arbitrary and no temperature variation in terms of Fourier series and integrals 21 p3832 A66-39443  
 Local approximation of continuous periodic function by Fourier series 24 p4231 A66-42513  
 Fourier analysis of Riemann-Hilbert problem of diffraction of normally incident plane electromagnetic wave by plane metallic grid above dielectric sheet and semiminfinite plasma 24 p4175 A66-42978
- FOURIER TRANSFORM**  
 Elements of eclipsing binary spherical stars determined from Fourier transforms of their light curves by defining characteristic functions of system 02 p0285 A66-11298  
 Steady state problems in orthotropic slabs subjected to forces and temperature distribution on faces solved by Fourier transform [ASME PAPER 65-APMW-33] 04 p0593 A66-14233  
 Representation of analytical periodic Fourier transforms of difference operators by sum of squares 05 p0708 A66-15328  
 Effect produced on pulse by manipulating transform zeros 06 p0861 A66-16191  
 Book on Fourier transform spectrometry detailing interferometers and programming procedures 06 p0908 A66-16225  
 Length of compact function estimated from noisy measurement of modulus of Fourier transform 06 p0867 A66-16977  
 Linear time-invariant systems, noting relation between transient response duration and differential equation coefficients 06 p0867 A66-16990  
 Time-normalized Fourier transform of sampling function of stationary random process as bounded nonstationary random function of frequency 08 p1200 A66-18908  
 Statistics of product of Gaussian noise process and pseudorandom binary code 09 p1342 A66-19919  
 Geomagnetic micropulsations, noting diurnal patterns of phase difference, propagation medium dispersive characteristics, signal velocities, etc 10 p1529 A66-21151  
 Harmonic suppression ratios in RF amplifiers calculated, using circuit parameters and applying Fourier transformations 10 p1508 A66-21299  
 Landau damping and velocity Fourier transform of initial perturbation in longitudinal plasma oscillations 10 p1567 A66-21817  
 Elastic strip and elastic annulus differential-difference equations, using Fourier transforms and analytic continuation 11 p1780 A66-22439  
 Resolution and noise in Fourier transform spectrometer, considering mechanical limitations and diffraction effects 11 p1705 A66-22869  
 Steady state problems in orthotropic slabs subjected to forces and temperature distribution on faces, solved by Fourier transform [ASME PAPER 65-APMW-33] 12 p1960 A66-23973  
 Fourier transform of time-dependent density-density correlation function calculated from linearized Boltzmann equation for Maxwell molecules 12 p1917 A66-24584  
 Pattern synthesis method for linear array using integral mean of Fourier approximation 12 p1841 A66-24628  
 Cesaro summability and Fourier transform

for evaluating divergent series and integrals occurring in circuit design and analysis 12 p1856 A66-24730

Bandlimited and approximately bandlimited signals by Fourier transforms of sampling function and prolate spheroidal wave function representing solutions of second order self-adjoint differential equations 13 p2120 A66-26077

Differential equilibrium equations for shallow shells of constant curvature under effect of concentrated load, using Fourier transform 13 p2205 A66-26440

Temperature field of infinite plate with variable temperature at one edge determined, using double Fourier integral transform 14 p2411 A66-27166

Response of thin cylindrical monopole antenna to DC pulse excitation computed, using Fourier transforms, noting correlation between empirical and theoretical values 14 p2255 A66-27906

Equilibrium binary correlations in classical relativistic homogeneous electron gas 14 p2336 A66-28275

Fourier transform spectroscopy, history and current status 15 p2498 A66-28838

Time jitter due to inherent noise when sampling intervals in Fourier transform spectroscopy by interferometer, examining effects and elimination methods 15 p2499 A66-28849

Representation of analytical periodic Fourier transform of difference operators by sum of squares 16 p2735 A66-30966

Two-dimensional correlation time relation to spectral bandwidth and corresponding one-dimensional quantities of Lampard 16 p2671 A66-31336

Anisotropic nonhomogeneous linear viscoelasticity analogy with thermal stresses in terms of Fourier transform 17 p3020 A66-31998

Infinite helical sheath antenna driven by ring delta-function generator analyzed, using Fourier transform, noting decomposition of current distribution 17 p2886 A66-32388

Hertzian contact of anisotropic bodies, reducing problem to one of evaluating contour integrals by Fourier transform method 17 p3029 A66-32792

Maxwell equation solution for source currents in unbounded magnetoionic medium with uniaxial dielectric tensor, using Fourier transform technique 17 p2959 A66-32962

Admittance problem of cylindrical antenna in homogeneous anisotropic medium formulated and analyzed, using Fourier transforms and Wiener-Hopf technique 17 p2897 A66-33428

Source distribution determination from radiation pattern and field amplitudes expressed as Fourier transform pair 18 p3066 A66-33545

Numerical inversion of Laplace transform 18 p3127 A66-34082

Solar cycle period determined by Fourier transform as applied to truncated sinusoids 18 p3232 A66-34535

Holography principles, discussing basic equation, Fourier transform holograms and hologram interferometry 20 p3556 A66-36929

Near IR two-beam interferometer built for astronomical observations by Fourier transform spectroscopy, noting resolution of spectra of Venus and Mars 20 p3556 A66-36939

Fourier transform used in correction of instrument contour error when observing solar spectral line profile 20 p3647 A66-37042

Filter theory method applied in solving analytical construction problems for optimal controllers, noting existence of Fourier transform and Pally-Wiener condition 21 p3719 A66-39282

Sampling theorem for Fourier transform reconstruction of band-limited signals, applications to stationary stochastic processes and analysis of round-off, truncation and random errors 22 p3884 A66-40168

Finite Fourier sine transform method of obtaining closed-form solution, calculating eigenfrequencies for free vibrations of partially fixed beam carrying concentrated masses 22 p3992 A66-40296

Ionospheric drift and radio wave dispersion determined from selective fading records

and symmetry of cross correlation functions, using Fourier transforms 22 p3916 A66-40807

Correction method for instrumental astigmatism to determine center-to-limb variation of solar UV continuum 22 p3984 A66-40891

Photon time-of-arrival distribution measured in highly monochromatic and spatially coherent light beam from low pressure Hg discharge lamp 23 p4076 A66-41265

LF pulse propagation, describing measurement technique and Fourier transform of signal 23 p4039 A66-41588

Combination of probability density functions for system error analysis, using convolution or transformation methods 24 p4189 A66-42827

Visual perception threshold based on Wiener or power spectrum of noise in relation to Fourier transform of relevant image detail 24 p4165 A66-43025

#### FOURTH STAGE

##### S SATURN S-IV STAGE

##### FR-1 SATELLITE

French FR-1 satellite for observation of ionized layers of atmosphere by propagation of VLF waves in ionosphere 04 p0586 A66-14385

FR-1 French satellite, functions, structure and performance 13 p2192 A66-25493

Scientific satellite FR-1 and VLF radio transmission 13 p2193 A66-26232

Design, objectives and equipment of French FR-1 satellite 14 p2390 A66-26800

French space program including FR-1 satellite and research in meteorology, space biology, rocket probes, electromagnetic propagation, etc 15 p2601 A66-29938

FR-1 and D-1 satellites, discussing construction principles, development, tests and supervision of CNES 18 p3094 A66-33979

Mobile control of FR-1 and D-1 satellites and application to integration, tests and checkout at launching ramp 18 p3094 A66-33981

Automatic control equipment for FR-1 and D-1 satellites 18 p3246 A66-33985

FR-1 satellite components and antennas for VLF signals 22 p3986 A66-40158

FR-1 satellite component reliability program 22 p3876 A66-40159

Aerobee rocket preliminary tests and FR-1 project 22 p3986 A66-40160

FR-1 satellite receiving antennas and adaptation for measuring circuits 22 p3876 A66-40161

Electron collection from VLF receiving antennas and plasma-density probe on board FR-1 satellite, using cathode-grid device 22 p3876 A66-40162

FR-1 satellite contact with surrounding plasma ensured by cathode device tested on Aerobee rocket 22 p3876 A66-40163

Automatic processing of VLF data from FR-1 satellite 22 p3870 A66-40164

VLF signal phase and amplitude from FR-1 satellite measured by phase-locked filter 22 p3866 A66-40165

D-1, D-2 and FR-1 satellites in French space program 24 p4296 A66-42697

##### FRACTIONATION

Complete fractionation of bacteriochlorophyll and degradation products by two rapid methods, using small amount of Rhodospirillum rubrum 17 p2859 A66-32308

##### FRACTOGRAPHY

Quantitative analysis of stress level, material characteristics or temperature level at which fracture occurs, using electron microscope 01 p0088 A66-10962

Plastic deformation preceding fracture in tungsten carbide-cobalt alloys 11 p1717 A66-22994

Ductility enhancement of tungsten by rhenium addition due to modification of grain boundary precipitate morphology 16 p2722 A66-30222

Air and aqueous environments effect on mode of fracture in titanium alloys during low cycle fatigue 18 p3122 A66-33749

##### FRACTURE

Mechanical and micromechanical behavior of bulk polycrystalline boron, emphasizing fracture stress and microstrain behavior relation to materials response 10 p1548 A66-21727

Diffraction of scalar surface waves impinging at arbitrary angle on fracture impedance plane 13 p2024 A66-2599

Internal fracture of spheroids caused by focusing explosive waves 17 p3027 A66-3286

##### FRACTURE MECHANICS

SA GRIFFITH FRACTURE THEORY

Statistical aspects of height of rise and fall in continuous random loading relevant to fatigue failure 01 p0147 A66-1016

Slip-induced fracture of polycrystalline Cu, Mo and W and bcc transition metals V, H, Nb and Ta 01 p0085 A66-1032

Fractography and optical metallography analysis of fracture mode of thorium tungsten-rhenium alloy showing ductility 01 p0085 A66-1032

Hypervelocity impact force per crack surface area correlated to stress-to-fracture of target, experimenting with aluminum and copper as targets and projectiles 01 p0154 A66-1032

Fracture micromechanisms of materials having regular crystalline structure, considering mechanical strength, atomic imperfections, dislocation interactions at crack growth 03 p0382 A66-1306

Fracture propagation in steels discussing macrostructure analysis, differences in intercrystalline and transcrystalline mechanism, plastic surface stresses and strains, etc 03 p0384 A66-1306

Rigid body mechanics noting elastoplastic and ductile formation, deformation, ductility appearance, etc 03 p0439 A66-1306

Fractures in neodymium-doped alkali silicates and borosilicates produced by laser beam 04 p0532 A66-1434

Mechanical testing methods, discussing quasi-static and fatigue fracture due to tensile compressive load and cyclic deformation characteristics of materials 04 p0537 A66-1434

Influence of fiber and matrix characteristics on mechanics of deformation and fracture of fibrous composite 05 p0773 A66-1434

Griffith flaw theory in analyzing failures of epoxy castings [ASME PAPER 65-WA/RP-6] 05 p0779 A66-1506

Plastic deformations for cyclically alternating loads, determining cycle number at which fracture occurs 06 p0965 A66-1606

Initiation and propagation of fatigue crack with reference to fish-eye pattern in bearing steel 06 p0965 A66-1606

Delayed fracture in high strength steel due to hydrogen penetration 06 p0895 A66-1606

Crack propagation in quasi-brittle solid deformed by external load, using thermodynamic laws 06 p0965 A66-1606

Four-point loading bend test on specimens of full plate thickness with sharp notch 20 percent depth, with ductility criterions fully plastic angle of bend before fracture 06 p0965 A66-1606

Brittle fracture in ceramic materials noting Griffith theory on crack propagation plastic deformation occurrence, stress distribution effect, etc 07 p1054 A66-1806

Fracture mechanics and amount of deformation metals can withstand subjected to forming procedures 08 p1235 A66-1806

Front and zone of fractures originating in brittle elastic body under influence of high pressure arising on wall of cavity with body 08 p1313 A66-1906

Gaudin-Meloy distribution parameter estimation from fracture data, based on moments about origin [AICE PREPRINT 17E] 10 p1613 A66-2106

Crack opening displacement approach to fracture mechanics in yielding materials 11 p1782 A66-2206

Statistical interpretation of fatigue fracture phenomena in metals, relating development of successive damage to external load processes 12 p1968 A66-2406

Plastic deformation of Charpy specimen under plane stress-strain conditions, noting low temperature brittle fracture behavior effects of notch geometry and loading etc 12 p1969 A66-2406

Flows and fractures as types of deformation occurring on Earth under high loads of ice suggested by isostatic compensation of Antarctica, Arctic basin etc

- glaciated region in North America 12 p1875 A66-24894
- Fracture surfaces of metals and alloys examined, using optical and electron microscopy, noting fracture mechanisms during crack initiation and propagation 13 p2108 A66-25768
- Fracture and mechanical failure of polymeric solids at high strain rates 13 p2198 A66-26120
- Monte Carlo model of elementary fracture process, noting role of energy in comminution, uneven distribution of energy vs frequency, etc 13 p2207 A66-26600
- Self-sustained fracture of stressed brittle body with assessment of fragment mean dimension 14 p2399 A66-27594
- Fracture mechanics, discussing crystal structure defects, particular dislocation, hardening, lattice vacancies, interstitials, etc 14 p2316 A66-27770
- Stability of two coplanar wedge-shaped cracks, showing under what conditions interaction effects are important 16 p2814 A66-30533
- Rupture strength increase in tungsten and molybdenum chopped wires silicide coated by pack diffusion and incorporated in mullite matrix by vacuum hot pressing [ACS PAPER 7-C-65F] 16 p2723 A66-30949
- Intercrystalline and transcrystalline fracture in molybdenum 16 p2727 A66-31527
- Physical and mathematical point of view on flow and fracture 17 p3021 A66-32004
- Theoretical attempt to bridge gap between micro and macro crack formation, estimating plane strain transition and nominal stress for fracture 17 p2939 A66-32303
- Fracture initiation and growth in linearly viscoelastic materials using energy formulation, establishing extension of Griffith initiation criterion 17 p2939 A66-32304
- Multiple fracturing caused by putting intense radiation into solid in time short compared with elastic relaxation time 17 p2979 A66-32637
- Stress calculation for infinite strip containing straight semiinfinite crack when clamped boundaries are displaced normal to crack 18 p3248 A66-33583
- Elastic-plastic antiplane problems for bonded dissimilar media containing cracks and cavities on interface and subjected to longitudinal shear loads 19 p3475 A66-36430
- Stress wave, deformation and fracture caused by liquid impact, noting analogy with solid and explosive impact and loading fracture formation, propagation, etc 20 p3588 A66-37803
- Crack initiation and propagation formula through fatigue process applied to interface problems, noting creep 20 p3671 A66-38105
- Strength of ceramic specimens with parallel cylindrical holes, noting strength/weight characteristics during compression loading 21 p3753 A66-38677
- Fractures in high strength low-alloy steels, discussing formation of flat and slant regions, effect of rolling direction crack reinitiation, shearing forces, etc 21 p3751 A66-39191
- Stainless steel and aluminum alloy fracture behavior under static load and low temperatures, noting crack propagation, stress and crack-length relation, etc 21 p3830 A66-39195
- Thermoelastic wave equations in continuum mechanics model of laser-induced fracture in transparent media in terms of laser beam energy absorption 22 p3931 A66-40089
- Brittle-fracture propagation tests, obtaining relations among crack propagation speed, dynamic-stress distribution, test temperature and applied stress 22 p3994 A66-40435
- Fracture mechanism of traumatic lesion caused by seat-ejection or bail-out from F-104 G aircraft and worsened by ground impact 22 p3858 A66-40503
- Stress distribution analysis on contracted section of cylindrical tensile test pieces based on Stassi plasticity condition 23 p4142 A66-41950
- Three-dimensional stresses near border of discontinuity plane under arbitrary loading, obtaining solution for uniform shear applied to surface of crack 24 p4285 A66-42148
- Griffith and bond fracture with singular stresses near crack point examined via numerical analysis 24 p4288 A66-42276
- Self-sustained fracture of stressed brittle body with assessment of fragment mean dimension 24 p4291 A66-42734
- Vacuum furnace for studying high temperature fracture of ceramic materials, noting tests on polycrystalline aluminum oxide 24 p4192 A66-43220
- FRACTURE RESISTANCE**
- SA SHOT PEENING**
- Crack initiation and propagation in aluminum sheets, noting ductile fracture and load limit for design purposes 01 p0156 A66-10920
- Mechanical proof test used to reduce variability and screen out weaker elements of brittle materials with widely scattered strength values 03 p0436 A66-12754
- Fracture of brittle bodies with cracks subjected to tension and compression 03 p0441 A66-13291
- Breaking strength of plastic metals under impulse loading by measuring axial tensile stresses 05 p0699 A66-14685
- Fracture of metals at different loading conditions by energy analysis of plastic deformation and fracture 06 p0963 A66-16465
- Synthesis and fabrication methods for intermetallic carbides, borides, beryllides, nitrides and silicides, decreasing susceptibility to brittle fracture 07 p1051 A66-18298
- Brittle fracture characteristics and fine structure parameters in steel 09 p1391 A66-20864
- Grain boundary role in high temperature fracture behavior of magnesium, noting temperature and orientation dependence of shear strength 12 p1897 A66-24920
- Specimen anisotropy during tensile elongation to rupture of composite solid propellants, based on analysis of dilatational behavior 17 p2989 A66-32451
- Residual stress, crack propagation and fatigue fracture mechanisms in Al alloy sheets with fatigue cracks, for use in wing panels [ICAS PAPER 66-34] 23 p4137 A66-41007
- FRACTURE TOUGHNESS**
- Fracture strength of two rocket-nozzle-grade graphites under ten biaxial stress states at room temperature 03 p0435 A66-12637
- Fracture toughness of X7000-series aluminum alloy plate weldments 05 p0686 A66-14695
- Alloy steel fracture resistance, describing creep strain effect on gas turbine engine alloys [ASME PAPER 65-WA/MET-13] 05 p0703 A66-15685
- Plastic deformation effect on strain energy release rate, examining axial rigidity of plate with central propagating crack under uniaxial tension [ASME PAPER 65-WA/MET-9] 05 p0780 A66-15687
- Plane strain fracture toughness of high strength aluminum alloys measuring techniques and relevant metallurgical factors [ASME PAPER 64-WA/MET-11] 06 p0895 A66-16209
- Fracture toughness and stress corrosion resistance of several heats of maraging steel compared with results for low-alloy and hot-work die steel 06 p0897 A66-16801
- Low-temperature mechanical properties and fracture toughness of commercial and extra-low-interstitial grade Ti-6Al-6V-2Sn 08 p1242 A66-19719
- Alloy steel fracture resistance, describing creep strain effect on gas turbine engine alloys [ASME PAPER 65-WA/MET-13] 12 p1896 A66-24535
- Plastic deformation effect on strain energy release rate, examining axial rigidity of plate with central propagating crack under uniaxial tension [ASME PAPER 65-WA/MET-9] 12 p1970 A66-24539
- Fracture characteristics of welds in aluminum alloys evaluated by tear and notch tensile tests 13 p2197 A66-25776
- Fracture toughness of notched A-302B and Ni-Mo-V steels with various size specimens [ASME PAPER 66-MET-1] 14 p2311 A66-26969
- Stress-corrosion susceptibility of high-strength steel at various levels of tensile yield strength and fracture toughness [ASME PAPER 66-MET-5] 14 p2300 A66-26973
- Biaxial fracture strength of textured titanium alloy for design of liquid fuel tankage 14 p2405 A66-27994
- Chemical composition effect on fracture properties of Al-Zn-Mg-Cu alloys 14 p2317 A66-28009
- Neutron irradiation effect on fracture toughness of several structural and pressure vessel steels studied by Charpy V-notch impact test and tensile test 15 p2521 A66-29074
- Interfaces between fatigue, creep and fracture, discussing separation of fatigue process into crack initiation and crack propagation 16 p2823 A66-31711
- Impact fracture toughness of brazed laminates of maraging steels and titanium alloys found to be 2 to 7.8 times greater than homogeneous specimens of like size [AIAA PAPER 65-566] 19 p3377 A66-35620
- Hot salt cracking of titanium alloys noting stress corrosion, fracture toughness and crack propagation mechanism 19 p3378 A66-35653
- Design and testing of crack-notched specimens for determination of resistance of materials to unstable opening-mode crack extension under plane strain conditions 19 p3473 A66-35805
- Factors affecting fracture characteristics of metals at cryogenic temperatures and fracture mechanics for predicting performance of defect-containing structures 19 p3380 A66-35847
- Quenching, annealing and high temperature treatment effect on transverse rupture strength of sintered tungsten carbide [ASME PAPER 66-MD-17] 21 p3750 A66-38478
- FRAGMENTATION**
- Mass spectrometric fragmentation behavior of N-n-propyl and N-n-butyl pyrrolidone and N-alkyl succinimides subsequent to electron impact 11 p1651 A66-23412
- Fragmentation probabilities, charge spectrum and interaction mean free paths of relativistic heavy nuclei in primary cosmic radiation investigated in stack of nuclear emulsions 16 p2795 A66-31010
- FRAME**
- SA AIRFRAME**
- SA GRID**
- Calculating spatial frames by procedures derived from displacement method 14 p2409 A66-28458
- Pseudorandom scanning of uniformly dense rectangular frame 18 p3078 A66-34080
- Iterative linear-elastic analysis of plane pin-jointed frames and space ball-jointed frames, accounting for temperature and geometrical changes 21 p3833 A66-39537
- Surface contour and structural requirements of reflecting panels of multiplate antenna, examining manufacturing, installation and cost advantages 23 p4138 A66-41259
- Micell structure design of lightest framework to equilibrate system of given forces 23 p4147 A66-41998
- FRAME PHOTOGRAPHY**
- Multistrip transformation of aerial photographs using rigid special masking frames in accordance with contour line 02 p0231 A66-11971
- FRAMING CAMERA**
- Automatic frame photometer with modified circuit 02 p0227 A66-11349
- Device for marking and standardizing askafilms 02 p0227 A66-11351
- Image motion and corresponding loss of resolution from rotational motions of airborne vehicle and camera parameters 02 p0228 A66-11381
- Data analysis from film of framing camera with rotating mirrors, using frame edges as reference lines, calculating necessary corrections 05 p0677 A66-14863
- FRANCE**
- French space program and projects under development 01 p0170 A66-10359
- CNES D-1 satellite using Diamant launcher for study of launch systems and space

environment 01 p0142 A66-10360  
 French aerospace industry, relationship to French economy, annual expenditures 1958 to 1964 and aircraft  
 exports 05 p0794 A66-15189  
 French National Center of Space Studies, facilities and functions 06 p0973 A66-16934  
 French space program since creation of CNES in 1961 09 p1472 A66-19862  
 French space program, flight tests of Diamant class rockets and A-1 satellite 12 p1981 A66-23804  
 French commercial aircraft accident investigation 13 p1994 A66-25232  
 Automatic air traffic control development in France 15 p2534 A66-29126  
 French space program including FR-1 satellite and research in meteorology, space biology, rocket probes, electromagnetic propagation, etc 15 p2601 A66-29938  
 French booster projects for orbiting stationary communication satellites, noting SEREB /solid propellant/ and LRBA /liquid propellant/ 19 p3469 A66-36047  
 French A1 satellite design and development, examining telecommunications equipment and monitoring diamant launcher performance 19 p3470 A66-36270

**FRANCK-CONDON FACTOR**  
 Franck-Condon factors to high quantum numbers covering methods, results and tabulation 04 p0548 A66-13830  
 Wave functions and Franck-Condon factors for transitions in molecular nitrogen obtained by Numerov integration of Schroedinger equation 09 p1404 A66-20411  
 Relative intensity measurements of 50 major bands of Lyman-Birge-Hopfield /LBH/ system of nitrogen 12 p1869 A66-23919  
 Franck-Condon factors for ionization of hydrogen and deuterium, noting vibrational eigenenergies of D sub 2 14 p2337 A66-27972  
 Franck-Condon factors for permitted transitions in nitrogen 14 p2338 A66-28128  
 Auroral excitation rates and molecular vibrational temperatures in nitrogen 2PG from Franck-Condon factors obtained from intensity measurements and high resolution absorption spectral data 16 p2692 A66-30328  
 Vibration-rotation interaction effect on Franck-Condon factors for band system of RbH molecule 18 p3137 A66-33923  
 Radiative lifetime and emission intensity measurements, determining oscillator strength and electron transition moment of first positive band system of nitrogen 23 p4033 A66-42082

**FRAUNHOFER LINE**  
**SA PHOTOSPHERE**  
 Profiles of intense resonance lines and variation from center of limb of solar disk 03 p0427 A66-12917  
 Radiation characteristics of isolated circular optical waveguides supporting low-order dielectric waveguide modes for combinations of modes, wavelength, diameter and aperture 05 p0648 A66-14910  
 Fraunhofer pattern of laser light transmitted through optical fiber, noting spatial frequency of interference fringes between light waves 05 p0696 A66-14972  
 Electron density and pressure in solar atmosphere from growth curve with Stark effect of Fraunhofer lines 05 p0765 A66-15420  
 Granularity and radial structure in circular Fraunhofer diffraction fringes produced by lycopodium powder scattering of monochromatic coherent light 06 p0891 A66-16443  
 Fresnel and Fraunhofer patterns of overmoded feeds and reflector antennas 12 p1841 A66-24632  
 Profiles of intense resonance lines and variation from center of limb of solar disk 14 p2380 A66-27266  
 Broadening of Fraunhofer hydrogen lines in solar spectrum, noting Stark effect 14 p2380 A66-27274  
 Image reconstruction with Fraunhofer holograms formed from opaque or transparent diffracting objects in aperture with coherent illumination 15 p2500 A66-28973  
 Absence of temperature difference between solar equatorial and polar limb near minimum, employing photoelectric comparison of Fraunhofer line

strengths 16 p2800 A66-30643  
 Magnesium I lines in solar spectrum searched on basis of multiplet table of wavelengths, intensities, excitation potentials of magnesium spectrum 16 p2802 A66-30939  
 Spatial cross-correlation analyses between radial velocity and continuum brightness fluctuations of solar disk center spectrograms 17 p2996 A66-31919  
 Intensity distribution in Fraunhofer diffraction patterns of slit and apertures illuminated by partially coherent light 18 p3118 A66-33986  
 Fraunhofer spectrum of singly ionized yttrium extended in IR solar spectrum 18 p3236 A66-34892  
 LASL lens design program for Doublet Achromat, from existing Fraunhofer design, used in solar corona monochromatic photography 19 p3354 A66-35383  
 Macroscopic velocity field in solar atmosphere and physical nature of motion, analyzing radiative transfer in spectral lines 19 p3465 A66-36604  
 Ultrasonic light diffraction, deriving line intensity in form of quadratures with parametric dependence 20 p3601 A66-37147  
 Total intensities of continuum and of red, green and yellow coronal lines emitted by sporadic coronal condensation shown to yield lower limits to Fe and Ca abundances 20 p3649 A66-37332  
 Power transmission, gain, directivity pattern and reception between large aperture antennas in near-field region 20 p3529 A66-37709  
 Behavior of lambda 6300 angstrom Fraunhofer absorption line in solar spectrum 22 p3984 A66-40850

**FREDHOLM INTEGRAL EQUATION**  
 Exactness of mechanical quadrature approximation of eigenvalues and eigenfunctions of Fredholm integral equation 01 p0092 A66-10316  
 Dirichlet problem solved by probability density for Brownian particle, using Fredholm integral equation 01 p0094 A66-10730  
 Modes in optical resonator formed by two reflectors of dissimilar spherical curvature and circular shape 03 p0391 A66-12305  
 Couette flow, Neumann-Liouville series expansion convergence for various flow regimes and related Fredholm integral equation solutions 07 p1020 A66-17964  
 Stress-strain state of elastic space, examining circular crack for axial tensile load effects 08 p1305 A66-18597  
 Fredholm integral equation system for magnetic currents induced on wedge under impedance boundary condition 09 p1344 A66-20441  
 Numerical solution of Fredholm integral equation with singularities and application to annular airfoil theory 09 p1396 A66-20626  
 Formalism of regular perturbation theory similar to Fredholm resolvent and having infinite radius of convergence 11 p1740 A66-23184  
 Axisymmetric problems of heat conductivity theory for layer with one constant boundary and one circular boundary solved by paired integral equations method 12 p1978 A66-24207  
 Plane stationary problem of heat conduction for mixed boundary conditions solved, using Fredholm integral equation with symmetrical kernel 12 p1979 A66-24372  
 Lifting systems and motion of slender profile at arbitrary distance from liquid or solid boundary, using kernel degeneration method to reduce singular equation to Fredholm equation 13 p2067 A66-26531  
 Numerical analysis of infinite phased array of open rectangular waveguides, noting use of Fredholm integral equation, effects of wall thickness and reflection coefficient 14 p2255 A66-27909  
 Radiative energy transfer between concentric spheres separated by absorbing and emitting gas, noting analogy to atmosphere with spherical symmetry 15 p2615 A66-28620  
 Dual integral equation and dual series analysis and application to mixed boundary value problems in elasticity, hydrodynamics and electrostatics 15 p2526 A66-28953

Dual integral equations in elasticity theory noting Mehler-Fok transformation of spherical functions, Fredholm equation and application to mixed boundary value problems 15 p2526 A66-28953  
 Axisymmetric problem in elasticity theory for infinite body weakened by system of periodically distributed coaxial slots of equal radius 17 p3026 A66-32599  
 Two Fredholm integral equations encountered in elasticity theory solved by Wiener-Hopf method 17 p2947 A66-32788  
 Axisymmetric problems of heat conductivity theory for layer with one constant boundary and one circular boundary solved by paired integral equations method 22 p4000 A66-40571  
 Two-dimensional problem for layer with mixed boundary conditions, obtaining solutions for Fredholm integral equations and relations for temperature distribution 22 p4001 A66-40930  
 Fredholm integral equations obtained in study of boundary value problem occurring in thin shallow shell theory 23 p4140 A66-41830  
 Dirichlet problem solved by probability density for Brownian particle, using Fredholm integral equation 24 p4232 A66-42747

**FREE ATMOSPHERE**  
 Equations for reflecting effect of underlying surfaces on long wave radiation fluxes in free atmosphere 01 p0062 A66-10767  
 Equations for reflecting effect of underlying surfaces on long wave radiation fluxes in free atmosphere 14 p2285 A66-27867  
 Aircraft bumpiness conditions in free atmosphere relation to turbulence and other aerological data 18 p3049 A66-34619  
 Long-wave radiative heat transfer between clouds and free atmosphere as basic factor in weather forecasting 20 p3594 A66-38373

**FREE BOUNDARY**  
 Homogeneous turbulent flow merging with turbulent or laminar flow of equal velocity 01 p0058 A66-10470  
 Free-boundary nonlinear problem of smooth curve drawn in single circle so that doubly connected region formed by curve and circle satisfies specific existence conditions 02 p0250 A66-12107  
 Two-dimensional problems of gas dynamics with free boundaries, discussing existence and uniqueness of subsonic potential gas flow 04 p0510 A66-13877  
 Hydrodynamic instability of shear layers using inviscid linearized stability theory of spatially growing disturbances 04 p0513 A66-14477  
 Approximate solution of magnetospheric free boundary for steady state interaction between field-free streaming plasma and magnetic dipole 07 p1088 A66-17955  
 Free boundary problem for heat equation with heat input at melting interface 09 p1470 A66-20267  
 Two-dimensional problems of gas dynamics with free boundaries, discussing existence and uniqueness of subsonic potential gas flow 12 p1863 A66-24027  
 Uniqueness and existence theorems for parabolic partial differential equations for case of free boundary 15 p2528 A66-29333  
 Linearized three-dimensional potential flow equations for response of liquids in cylindrical containers to slightly off-axis acceleration 17 p2916 A66-33477

**FREE CONVECTION**  
 Free convection boundary layers on horizontal flat plate 01 p0161 A66-10433  
 Natural convection at thermal leading edge on vertical wall matched with known solution immediately above this region 02 p0304 A66-12119  
 Nonisothermal wall problem for vertical right circular cone in laminar free convection for fluids with low Prandtl numbers 02 p0305 A66-12207  
 Free convection heat transfer in partially enclosed channel flow, noting effect of vertical fin geometry and temperature [ASME PAPER 64-WA/HT-33] 04 p0595 A66-13338  
 Laminar to turbulent transition along aluminum plate in free convection measured, using hot-wire probes 04 p0596 A66-13511

Porous blowing and suction for laminar boundary layer during free convection at vertical surface 04 p0597 A66-13820

Optimization of fin geometry to maximize free-convection heat transfer in air at atmospheric pressure [ASME PAPER 65-HT-12] 05 p0783 A66-14738

Free convection on laminar forced flow heat transfer in horizontal circular tube [ASME PAPER 65-HT-23] 05 p0783 A66-14744

Reversed heat conduction in natural convection at thermal leading edge on vertical wall [ASME PAPER 65-WA/HT-34] 05 p0792 A66-15672

Unsteady, combined free and forced convective MHD channel flow of conducting fluid through transverse magnetic field 07 p1085 A66-17580

Particle velocity distribution in free convection in air for flat velocity field 08 p1321 A66-19733

First-order perturbation analysis of free convection of liquid metal from isothermal vertical finite plate extended to uniform heat flux 10 p1619 A66-21054

Free convection heat transfer to carbon dioxide near critical point, noting free, turbulent and oscillating flow 10 p1619 A66-21271

Laminar free convection flow and velocity and temperature distributions in air above thin horizontal electrically heated wire 12 p1980 A66-24906

Free convection film boiling heat transfer from isothermal vertical plate to subcooled stagnant liquid, using two-phase boundary layer theory 12 p1980 A66-24907

Interferometric determination of temperature field compared with exact analytical solutions for laminar boundary layer in case of free convection 13 p2208 A66-25314

Interferometric determination of temperature field in two-dimensional finite space in conditions of free convection with internal heat sources 13 p2209 A66-25317

Vertical displacement rate of air particles in finite volume under effect of internal heat sources in free convection 13 p2209 A66-25318

Porous blowing and suction for laminar boundary layer during free convection at vertical surface 13 p2209 A66-25319

Solution for free nonstationary convection in bounded region of Landau-Lifshits mechanics of continuous media 14 p2414 A66-28282

Boussinesq approximation for hydrodynamic stability of natural thermal convection of fluid between two parallel vertical planes and calculation of critical Reynolds number 15 p2617 A66-29399

Steady free convection in vertical slot, noting growth of boundary layers and temperature gradient 15 p2618 A66-29693

Free convection on laminar forced flow heat transfer in horizontal circular tube [ASME PAPER 65-HT-23] 16 p2828 A66-30983

Approximate calculation of free convective heat transfer in rectangular region 17 p3034 A66-32562

Sound field parameter dependence of coefficient of heat transfer from horizontal cylinder at near zero Grashof numbers 19 p3478 A66-35751

Boundary layer equations of MHD free convection from heated horizontal plate in vertical uniform magnetic field 21 p3776 A66-38707

Free convection boundary layer along isothermal plate, using equation of laminar compressible flow and heat transfer, noting profile dependency upon wall coordinate 21 p3835 A66-38945

Free convective heat transfer in thermal boundary layer of rarefied gas 22 p3902 A66-40922

**FREE ELECTRON**

Ray dispersion of electromagnetic waves by free electrons produced in cone-shaped ionized wake 04 p0481 A66-13843

Plasma oscillation of conduction electrons in sodium 09 p1430 A66-20845

Van Hove diagonal singularity condition for free electrons in periodic lattice impurity field 17 p2959 A66-33291

Layer of CdS crystals photoconduction

measurements suggesting change in space charge under illumination due to increase of free electron concentration in volume 19 p3438 A66-35478

Time dependent Schrodinger equation for Bloch electron in presence of laser field, using WKB approximation method, compared with perturbation theory 23 p4077 A66-41266

**FREE ENERGY**

Diagrammatic method to obtain Helmholtz free energy of classical electron gas used to derive pair distribution function beyond Debye-Huckel result 02 p0266 A66-11478

Evaluation of absolute free energy of rigid-disk system at very high compression 05 p0740 A66-15772

Extension, for heterogeneous sphere, of previous work which gave expressions for mean strain and rupture as functions of hydrostatic and nonhydrostatic components of free energy 08 p1212 A66-18638

Equation for entropy of formation of interstitial solid solution with two interstitial sublattices, using phase diagram for constants in free energy and activity equations 08 p1258 A66-18903

Vortex lines in superconductors, noting free energy of pure superconducting metal in presence of currents and fields for slowly varying drift velocities 09 p1415 A66-20007

Free energy calculations and crystallographic properties of vortex line lattices in type II semiconductor for square and triangular lattices in given magnetic field 09 p1421 A66-20058

Complete behavior of mixed state type II semiconductor in sufficiently large magnetic field 09 p1421 A66-20059

Linear free energy relationship between benzoyl and acetyl ion intensities in mass spectra of benzo- and acetophenones explained by kinetic argument 10 p1495 A66-21165

Free energy functional of superconducting alloys based on Green function decomposition 10 p1573 A66-21241

Free energy of pure fluids as function of thermodynamic temperature determined from measurements of internal energy, noting case of carbon dioxide 12 p1981 A66-24997

Single sample chamber determining magnetothermodynamic characteristics including magnetic moment, heat capacity in magnetic fields, entropy change, free energy, etc 13 p2083 A66-26558

Stability limits and Gibbs free energy for type II superconductor in magnetic field as functional of ordering parameter, using Bardeen-Cooper-Schrieffer theory 14 p2360 A66-27193

Thermodynamic and physical properties of beryllium hydroxide at four temperatures in 1587-1808 degrees K range, with computation of free energy of formation 14 p2370 A66-27372

Free energy of single and multicomponent plasmas in particle number density determined, using quantum mechanical perturbation expansion of partition function 15 p2552 A66-29617

Free energy of aluminum alloy containing two-dimensional Guinier-Preston zones of copper atoms 16 p2722 A66-30307

Generalized model of ideal compressible anisotropic fluid, determining dependence of free energy on density 16 p2689 A66-31517

Gradient 16 p2689 A66-31517

Virial expansions for plasma free energy in method of collective variables 16 p2767 A66-31728

Text on thermodynamics of refractory compounds covering thermodynamic properties of borides, carbides, nitrides and oxides of 31 elements 16 p2728 A66-31748

Radial plasma transport in magnetic wells, emphasizing LF instabilities not stabilized by positive gradient and employing free energy arguments 19 p3415 A66-36516

Partition function for tunnel model of rigid disks evaluated in asymptotic limit of reduced volume, including close-packed value of closed systems 22 p3949 A66-40913

Stability limits and Gibbs free energy for type II superconductor in magnetic field as functional of ordering parameter, using Bardeen-Cooper-Schrieffer

theory 24 p4259 A66-43091

**FREE FALL**

**SA WEIGHTLESSNESS**

Interaction of two identical spheres falling freely in viscous fluid under laminar flow conditions 01 p0058 A66-10487

Interaction of two identical spheres falling freely in viscous fluid under laminar flow conditions 09 p1367 A66-20701

Effects on man of direct /escape/ and indirect /aircraft flight/ movement through atmosphere, considering moderate and high-speed aerodynamic forces 10 p1488 A66-22106

Freely falling point mass problem solutions for Einsteinian free space equations that also satisfy Newtonian equations in suitable coordinate system 12 p1915 A66-24889

Vertical-track free-fall rocket sled system, discussing design principles, operation and performance characteristics 18 p3093 A66-33796

Transfer paths to Mars via Venus compared with direct flight, discussing direct free fall transfer, flyby and free fall transfer 20 p3651 A66-37392

Freely falling point mass problem solutions for Einsteinian free space equations that also satisfy Newtonian equations in suitable coordinate system 23 p4090 A66-41096

Free fall test of Surveyor test vehicle unaided by recovery parachutes to radar-controlled soft landing on ground 24 p4284 A66-42896

**FREE FLIGHT**

Psychophysical orientation mechanisms of man under weightlessness simulation, gravity conditions encountered on Earth, in orbital flight and during free floating in space 06 p0814 A66-17177

Book on dynamics of elastic structures in free flight 16 p2815 A66-30612

Separated shock wave distance from free flying blunt body influence by real gas oscillation excitation 19 p3341 A66-35746

Onboard miniaturized telemetry system for stagnation point temperature measurements on free-flight models in ballistic ranges 24 p4209 A66-42189

Simultaneous FM telemetry measurement of four aerodynamic forces acting on free flying models in wind tunnel 24 p4209 A66-42190

Interplanetary trajectories, considering gravity effect, free flight trajectory and forces acting on space vehicle 24 p4280 A66-43132

**FREE FLIGHT TEST APPARATUS**

Free flight dynamic stability measurements indicate that boundary layer transition has no perceptible effect [AIAA PAPER 64-427] 08 p1161 A66-18810

Refinements of hypersonic testing techniques in 100-inch tunnel F of von Karman gas dynamics facility 11 p1686 A66-22842

Free flight model technique in hypervelocity shock tunnel for aerodynamic force and moment measurement by optical instrumentation [AIAA PAPER 66-771] 22 p3847 A66-40652

Free flight multibody test techniques, discussing drogue body testing, mechanized free flight models and salvo launches [AIAA PAPER 66-772] 22 p3895 A66-40653

Wind tunnel free-flight testing of reentry vehicle dynamics, noting capability for simultaneous two-dimensional viewing of model trajectories [AIAA PAPER 66-774] 22 p3895 A66-40654

Total aerodynamic forces and moments of free flying body in wind tunnel determined from accelerations measured and telemetered by onboard instruments [AIAA PAPER 66-775] 22 p3896 A66-40655

Launch and recovery system for large instrumented free flight models in high speed wind tunnel, using miniaturized telemetry and recording equipment [AIAA PAPER 66-776] 22 p3896 A66-40656

Launching device for free flying models in conventional wind tunnels consisting of split hollow shell enclosing model [AIAA PAPER 66-773] 23 p4052 A66-41332

Rapid opening mechanical gate valve consisting of blade assembly, blade catcher and primer holder used in conjunction with hypervelocity free flight range experiments 24 p4162 A66-43219

## FREE FLOW

Free convection thermal transfer in narrow horizontal channels and infinitely wide channels 09 p1471 A66-20704

Molecular collision effect on transitional drag on cylinder traversing rarefied gas at hypersonic Mach numbers, discussing departure from free flow 11 p1632 A66-22920

Free laminar boundary layer flow between parallel streams of different magnetic fields and temperatures for incompressible viscous fluid 21 p3776 A66-38682

Laminar incompressible axisymmetric free jet with swirl, examining perturbation scheme for stream function and asymptotic series 21 p3729 A66-39453

**FREE JET**

Turbulent mixing of axisymmetric jet of partially dissociated nitrogen with ambient air, establishing mixing and decay characteristics [AIAA PAPER 65-823] 03 p0359 A66-13231

Two sets of Tollmein and Goertler equations derived for two-dimensional compressible free jet mixing layer, using similarity assumption [AIAA PAPER 65-821] 04 p0510 A66-13692

Velocity distributions in molecular beams of argon produced by supersonic nozzle sources, using time of flight method 04 p0548 A66-14012

Free steady state jet subject to axial tension applied to Newtonian liquids, noting effect of flow variables on dimensionless criterion 04 p0512 A66-14209

Qualitative and quantitative solution of linearized approximations to boundary layer equations, noting free jet and wall-slot injection into moving stream [ASME PAPER 65-APMW-6] 04 p0512 A66-14212

Laminar and turbulent MHD free jet, using Peskin analysis 05 p0721 A66-14719

Inner and outer expansions method applied to source flow model involving viscous effects in hypersonic axisymmetric free jets at large Reynolds numbers 07 p0982 A66-18122

Qualitative and quantitative solution of linearized approximations to boundary layer equations, noting free jet and wall-slot injection into moving stream [ASME PAPER 65-APMW-6] 10 p1523 A66-21470

Performance of simple diffusers of fixed geometry in flow regimes with viscous and compressibility influence involving free-jet test sections, conical and contoured nozzles and gas flows at high Mach numbers 11 p1686 A66-22844

Three-dimensional viscous free mixing, describing numerical and experimental solutions for wake and jet flows [AIAA PAPER 65-49] 15 p2424 A66-29272

Spread and decay of turbulent free jets and shear-stress analysis of turbulent mixing zones 15 p2424 A66-29295

Laminar to turbulent transition in free jets 15 p2424 A66-29303

Inviscid and viscous flow in central core of supersonic free jet in wind tunnel, noting shock wave location at high Reynolds number 16 p2628 A66-30375

Structure and properties of free supersonic jets including impact pressure and velocity distribution measurements, condensation, etc 16 p2628 A66-30376

Mixing of free jet boundary which includes laminar and turbulent flow region in tandem 16 p2685 A66-30805

Approximation for moment equations of kinetic theory which describe source flow expansion with application to free jet 17 p2907 A66-32412

Hypersonic self-similarity of barrel shock in source-type free jets at high pressure ratio 17 p2839 A66-32468

Acoustic output, turbulence in jets and noise sources in fluid amplifiers noting design, noise reduction by jet edge, input nozzle design, forced secondary flow, etc 18 p3054 A66-34132

Similarity solutions of heated two-dimensional laminar free jets with arbitrary Prandtl number and nonlinear viscosity-temperature energy dissipation relationships 18 p3103 A66-34932

Cascade free jet logical element

interactions and application to multiple-parameter logical function 20 p3496 A66-36863

Electron beam flow visualization study of density field about skimmer entry in small free jet 21 p3727 A66-39186

Free jet MHD accelerator for determining minimum length of crossed field accelerators, noting operation and solution in closed form 21 p3699 A66-39645

Model tests on free jet scramjet facility configurations at high Mach numbers, obtaining data on bypass flow pressure recovery and diffusion process [AIAA PAPER 66-745] 22 p3846 A66-40632

Free and confined turbulent and free laminar plane jets in highly diffused magnetic fluid 23 p4107 A66-42005

**FREE MOLECULAR FLOW**

Simplified leading-edge flow boundary value problem of Bhatnager-Gross-Krook equation solved by finite difference method 01 p0058 A66-10633

Rotating arm apparatus at National Aerospace Laboratory in Japan for pressure-distribution and heat-transfer flow measurement 01 p0053 A66-10636

Solid surface interaction of atoms and molecules of wedge cavity in rarefied free molecular gas stream 04 p0456 A66-14143

Shrello approximation used to derive formulas for moment characteristics of axisymmetric bodies rotating in hypersonic free molecular flow 04 p0456 A66-14155

Satellite drag coefficient reevaluated in consideration of recent data on gas-surface interaction and atmospheric composition 05 p0760 A66-14941

Theory of highly rarefied cascade flow and proposal for new axial flow molecular pump in free molecule range 06 p0803 A66-16945

Aerodynamic and heat transfer characteristics of cross-stream wedge in low density aerodynamics, investigating transition from continuum to free molecular flow 07 p0982 A66-18126

Heat transfer and mass flux expressions for recombination interactions at solid-gas interface due to transport of atomic and ionized particles to spacecraft in ionosphere 08 p1161 A66-18747

Shock tunnel heat transfer measurement and hypersonic viscous flow over pointed cones, particularly viscous-layer regime at low Reynolds numbers [AIAA PAPER 66-34] 08 p1163 A66-18957

Transition regime mass flow rate and longitudinal pressure distribution along short tube with bellmouth entry 08 p1207 A66-19131

Heat transfer to wedge in nearly free-molecular hypersonic flow of strongly rarefied gas 08 p1165 A66-19484

Gas flow in free-molecular regime with negligible collision approached by diffuse reflection model 11 p1688 A66-22525

Optimum minimal-drag shape of slender axisymmetric body in free molecular flow 11 p1632 A66-22526

Minimal-drag shape of nonslender body of revolution in diffuse free molecular flow 11 p1632 A66-22527

Boltzmann equation behavior, at large Knudsen numbers, for free molecular interactions with infinite collision cross section 11 p1691 A66-22918

Asymptotic solution of rarefied gas flow, using free molecular approximations 11 p1692 A66-22919

Transition from near free molecular flow at leading edge of flat plate in rarefied hypersonic flow to continuum boundary layer flow downstream 11 p1633 A66-22925

Comparison of theoretical and experimental results for cylinder and flat strip models in near free molecular flow 11 p1692 A66-22926

Heat transfer and pressure data extended from classical thin boundary layer regime to near-free-molecule flow in study of low density effects in hypersonic wedge flows 11 p1633 A66-22928

Mass flow of nitrogen gas through circular orifice at five Knudsen number values from 0.13 to 1.78 and range of upstream to downstream pressure ratios 11 p1692 A66-22936

Optimum nose form determination for

minimum drag in free-molecule flow of asymmetric body 11 p1635 A66-22937

Free-molecule flow through conical tubes noting mass transport, axial momentum, energy, flow distribution and speed ratio 11 p1635 A66-22938

Impact tube pressure probe response to free molecular rarefied gas flow for arbitrary angle of attack 11 p1692 A66-22939

Internal flow problems in free, nearly free, molecular regimes and higher transition flows, using Boltzmann equation and series expansion to solve integral equation for surface collision density 11 p1693 A66-22940

Terminal reentry and dynamics evaluation computer program for small particles, using point-mass calculation during initial phase and determining drag coefficient [AIAA PAPER 66-380] 12 p1951 A66-24505

Flow in vicinity of right cylindrical body, considering shocks between molecules and solid 13 p1991 A66-25469

Rarefied gas mechanics based on Boltzmann equation with prescribed boundary conditions 13 p2071 A66-26726

Density ratio and transmission probability across conical converging diffuser in free-molecule flow with selected range of speed ratios, using Monte-Carlo method 14 p2219 A66-27416

Similarity law for longitudinal contours of optimum bodies minimizing drag in hypersonic and low subsonic free molecular flows constrained on length, base width, wetted area, etc 14 p2221 A66-28183

Boltzmann equation for Pitot tube problem, using distribution function, deriving equations for rarefied gas flow in impact tube under hypersonic and adiabatic conditions 15 p2481 A66-29738

Surface protrusions and holes, Maxwell kinetic gas theory and surface interaction of current of free molecules and rigid body 16 p2686 A66-31042

Book on radiation gas dynamics including radiative heat transfer, waves and shock waves, kinetic theory, relativistic mechanics, free-molecule flow, etc 16 p2829 A66-31314

Monte Carlo calculation of probability of free molecular conductance of cylindrical tube with wall sorption 17 p2906 A66-31977

Free-molecular flow of rarefied gas in plane channels or through cells of heat-conducting grid whose cells are smaller than mean free path of gas molecules 19 p3277 A66-36480

Heat conduction in rarefied gases between concentric spheres by moment method, considering accommodation coefficients at inner sphere surface 21 p3834 A66-38708

Free molecular flow as Markov chain, describing motion via probability function in multireflection system 22 p3951 A66-40454

Nearly free molecular flow in rarefied gas dynamics in comparison of theoretical and experimental results with reference to drag 23 p4060 A66-42025

**FREE OSCILLATION**

Free oscillations of elastic shells of revolution 01 p0154 A66-10469

Coupling method for determining natural oscillations of ideal incompressible liquid in vessel consisting of two regions 01 p0059 A66-11017

Large amplitude-free oscillations of beams and plates by means of Ritz-Galerkin technique 02 p0297 A66-11554

Form, period and spectrum of free oscillations in LC circuits with nonlinear capacitive p-n alloy junctions, 02 p0198 A66-11704

Large amplitude oscillation of anisotropic triangular plates 04 p0591 A66-14202

Longitudinal oscillations of Voigt body bar whose characteristics vary with time and are bounded 06 p0964 A66-16475

Behavior of fluids under weightlessness and in weak gravitational fields, formulating small linear oscillations of ideal fluid under surface tension 06 p0873 A66-16708

Beam on elastic supports, determining fundamental frequency of free oscillation for one weak nonlinear boundary condition 07 p1142 A66-17260

Unsymmetric free oscillations of conical shell of medium length and linearly variable thickness 08 p1312 A66-19432

Variational principle for free oscillations of

gravitating elastic compressible sphere 09 p1456 A66-20412  
Hamel and Cypkin methods, used to determine free oscillation of plus-or-minus servomechanism, applied to transfer function of certain type 10 p1517 A66-21283  
Frequency of free oscillations of beam when two of four boundary conditions for elastic clamping at both ends contain nonlinear terms 10 p1613 A66-21325  
Free oscillation stability of closed-loop self-adjusting system with several parameters, noting two methods of measuring relative damping 11 p1677 A66-22760  
Free oscillation of thin elastic shell, using asymptotic method for integrating dynamic equations in classical linear theory 13 p2196 A66-25630  
Free oscillation amplitude increase from resonance traversal occurring when perturbation frequency passes through resonant value in weakly nonlinear system 13 p2146 A66-25740  
Free gyroscope motion as affected by dry friction and free and forced oscillation 15 p2541 A66-29170  
Approximate solution of free axisymmetric oscillations of circular structurally orthotropic plate of specific laws of variable thickness 15 p2613 A66-29436  
Random variation of Earth rotation relation to amplitude of free nutation 16 p2693 A66-30589  
Periodic and quasi-periodic solutions to differential equations describing pulsed systems 16 p2738 A66-31709  
Reduction of Gilchrist two-equation set for free oscillations in conservative quasi-linear systems with two degrees of freedom 18 p3134 A66-33602  
Matrix methods of forces and displacements applied to free oscillations of aircraft structures, proposing procedure yielding coherent mass matrix 21 p3825 A66-38582  
Approximation of nonlinear characteristics of conservative vibrations by two polygon characteristics chosen so that mechanical energy of system remains same 21 p3833 A66-39599  
Cylindrical functions for calculating free oscillations of Saturn rings and estimation of upper limit to mass of ring if motion is stable against axisymmetric perturbations 23 p4125 A66-41063  
Free longitudinal oscillations of finite viscoelastic rod, neglecting relaxation 23 p4139 A66-41555  
**FREE RADICAL**  
IR and UV absorption spectra of free radical NCN observed following photolysis of matrix isolated cyanogen nitride 04 p0473 A66-13644  
Superhigh speed IR spectrometers used in detection and study of free radicals and photochemical reaction, pulse discharges in gases, etc 05 p0685 A66-15862  
Free radical CCO spectroscopy when produced by vacuum UV photolysis of matrix isolated carbon suboxide 06 p0821 A66-16128  
Hydroquinone and oxygen effects on photovoltaic characteristics of optically excited chlorophyll 06 p0812 A66-16357  
Paramagnetic resonance spectra of free radicals in hydrogen peroxide and alcohols during intense UV irradiation 11 p1650 A66-23216  
Free radical reactions in irradiation of model systems and role of radicals in radiation damage 13 p2010 A66-26227  
Electron spin resonance of gamma irradiated single crystal of barbituric acid dihydrate, noting formation and Hamiltonian parameters of free radicals 14 p2367 A66-27979  
Control of abundance of neutral hydroxyl radical in unionized interstellar gas 17 p3003 A66-32658  
Electron paramagnetic resonance study of tetraoxygen difluoride, showing existence of FOO free radical giving asymmetric spectrum 17 p2871 A66-32854  
Collisions in inner region of cometary head, structure of emission bands and formation of free radicals 17 p3010 A66-33376  
Rotational line intensities of lambda 4300

band of CH in spectrum of comet Ikeya 17 p3010 A66-33379  
Rotational and vibrational temperature of diatomic C in comets derived from high resolution spectra, considering transition probabilities in R and P branches 17 p3010 A66-33380  
Total number of cyanide molecules and diatomic carbon free radicals and density distribution in head of Arend-Roland 1957 III comet 17 p3010 A66-33381  
Triatomic carbon spectrum transition bands based on available photographic and densitometric data 17 p3013 A66-33401  
Microwave absorption spectrometer for measuring absolute concentrations of free radicals at any point in conventional gas flow reaction system [AIAA PAPER 66-677] 18 p3112 A66-34245  
Hydrogen bonding kinetics in free radical liquid-phase reactions 21 p3702 A66-38520  
Free radicals and metastable molecules produced by short-duration pulsed electrical discharges studied by mass spectrometer, using collision-free molecular-beam sampling system 22 p3949 A66-39909  
Qualitative detection of alkyl-free radicals generated by pyrolyzing certain organic compounds, using modified commercial mass spectrometer 23 p4067 A66-41246  
**FREE SPACE**  
Impedance cavity on radiation resistance of electromagnetic source 04 p0497 A66-13915  
General theory of minimum fuel free space trajectories 06 p0954 A66-16624  
Optimal free-space fixed thrust trajectories using impulsive trajectories as starting iteratives [AIAA PAPER 66-96] 06 p0956 A66-17094  
Eigenfunction expansions and scattering theory for free-space wave equation in exterior region 12 p1912 A66-23563  
Freely falling point mass problem solutions for Einsteinian free space equations that also satisfy Newtonian equations in suitable coordinate system 12 p1915 A66-24889  
Electromagnetic and plasma wave propagation in inhomogeneous compressible isotropic collisionless electron plasma bounded by closed surface in free space 15 p2449 A66-28592  
Optimal free-space fixed thrust trajectories using impulsive trajectories as starting iteratives [AIAA PAPER 66-96] 17 p3001 A66-32457  
Impedance cavity on radiation resistance of electromagnetic source 20 p3532 A66-37873  
Freely falling point mass problem solutions for Einsteinian free space equations that also satisfy Newtonian equations in suitable coordinate system 23 p4090 A66-41096  
**FREE STREAM**  
Oscillating laminar separated flow formed ahead of forward facing step oscillating transversely to hypersonic free stream, noting phase differences between separation point movement and that of step 14 p2221 A66-28110  
Series expansion solutions for shock tube laminar wall boundary layer, taking into account mutual interaction between boundary layer and free stream 15 p2479 A66-29270  
Source type hypersonic free stream effects on flow field about axisymmetric cone, obtaining properties in shock layer, boundary layer, pressure gradient, etc 17 p2837 A66-32080  
Shock wave instability and mass flow accommodation for ribbon-type parachutes, noting canopy porosity and free stream Mach number 22 p3845 A66-40594  
Flow of unsteady compressible boundary layer over semiinfinite flat plate whose temperature exceeds free stream temperature 22 p3902 A66-40707  
Laminar turbulent transition in freestream boundary layer behind axisymmetric and plane nozzle 23 p4061 A66-42036  
**FREE STREAM EFFECT**  
Near wake of slender cone at free stream Mach numbers of 8 and 12 08 p1164 A66-19130  
Plasma pulses free-streaming from source plate into vacuum along magnetic field 10 p1567 A66-21821  
Molecular beam approximation for plane normal shock in free stream monatomic gas

flow at large Mach numbers 11 p1690 A66-22911  
Free stream turbulence effects on heat transfer rates evaluated by boundary layer approximation 16 p2824 A66-30302  
Film cooling in supersonic free stream flowing along flat plate in Mach 3 wind tunnel, using air as secondary fluid 17 p2839 A66-32441  
Response of two-dimensional laminar boundary layer to fluctuating free stream or surface oscillation 17 p2908 A66-32443  
Relaxation processes behind shock wave in free stream partially dissociated and vibrationally excited by monitoring time history of radiative emission in shock tube [AIAA PAPER 66-519] 17 p2911 A66-32775  
Separation streamline for massive blowing in free stream for model injected into arc tunnel flow [AIAA PAPER 66-457] 18 p3046 A66-33650  
Spark discharge generated blast wave application to shock on shock simulation, free-stream sound speed determination and hypervelocity flow measurements [AIAA PAPER 66-763] 22 p3894 A66-40645  
**FREE VIBRATION**  
Free vibration and transient elastic response of thin shells within scope of linear theory 04 p0586 A66-13405  
Dynamic matrices for natural vibrations of missile considered as beam and as thin walled shell under given boundary conditions 04 p0587 A66-13534  
Eigenvalues of free vibration equation of simply supported beam with finite number of discrete masses, using differential equation 04 p0588 A66-13823  
Asymptotic analysis for equations of axisymmetric vibrations of thin shells [ASME PAPER 65-WA/APM-15] 05 p0777 A66-15437  
Vibration in aircraft jet engine rotating compressor disks of small and large blades [ASME PAPER 65-WA/GTP-11] 05 p0780 A66-15726  
Computer analysis of axisymmetric free vibrations of orthotropic shells of revolution and elastic rings [AIAA PAPER 65-109] 05 p0781 A66-15790  
Displaced frequency technique to determine generalized masses of freely vibrating structure 06 p0967 A66-16930  
Free flexural fundamental vibrations of simply supported isosceles triangular, rhombic and parallelogram plates using special adaptations of point-matching method 06 p0967 A66-16950  
Asymptotic solution of problem of thin spherical shell free vibration for axisymmetric and general cases 08 p1308 A66-18888  
Galerkin method to solve free vibration problem of thin oblate spheroidal shells 09 p1468 A66-20949  
Free vibrations of initially straight elastic bar with free-free or clamped-free ends, undergoing inextensional motion, neglecting shearing effects and rotatory inertia 10 p1616 A66-21484  
Classical theory of flexural motions of elastic plates used to determine natural frequencies of uniform annular plates for nine combinations of boundary conditions 10 p1616 A66-21490  
Frequencies of free lateral resonant vibration of conical beams and truncated wedges for all combinations of simply supported, clamped and free end conditions 10 p1616 A66-21491  
Generalized analysis of rotationally symmetric thin elastic shells applied to cases where shell wall consists of any number of layers of isotropic or orthotropic material 10 p1617 A66-21496  
Internal or external pressure effect on natural frequencies of conical shell, noting role of inertia forces, using linear shell theory 11 p1780 A66-22330  
Free transverse vibrations of parabolic membranes, obtaining eigenvalues and eigenfunctions for Dirichlet conditions [ASME PAPER 65-AV-1] 11 p1780 A66-22472  
Rayleigh-Ritz method, stationary complementary and potential energy principles and Lagrange undetermined multipliers applied to free vibration of elastic body 11 p1781 A66-22611

Lower bounds for frequencies of continuous linear elastic systems in free vibration 12 p1960 A66-23947

Vibration modes of conical frustum shells with free ends [AIAA PAPER 66-450] 16 p2814 A66-30603

Linearized theoretical motion equations for orthotropic cylindrical sandwich shells under initial stress, considering free vibrations 16 p2822 A66-31490

Free vibration of trapezoidal cantilever plates with swept-back leading edge 16 p2823 A66-31666

Frequency equations and mode displacement functions derived for plane strain free-transverse vibration of solid cylinder with elastic core bonded to thin elastic shell 16 p2823 A66-31716

Free vibration of complete and incomplete rings, considering ring centerline extensibility and rotary inertia 17 p3022 A66-32016

Small transverse vibrations of linearly viscoelastic Timoshenko beam of incompressible material, detailing free and forced vibration 17 p3024 A66-32361

Linearized theory of free-vibratory motion of cylindrical sandwich shells under state of initial stress 17 p3025 A66-32455

Frequency equation for free vibration of uniform cantilever beam carrying concentrated mass and moment of inertia at tip 17 p3030 A66-32966

Stability of unsymmetrical rigid rotor supported in axially unsymmetrical bearings, noting three methods of solution 18 p3116 A66-33672

Free flexural vibration of cylindrical shells stiffened by equidistant ring frames treated by finite difference calculus 18 p3250 A66-33673

Free vibrations of two flat plates fixed at right angle with cross-sectional distortion 18 p3251 A66-33678

Free vibrations and stability of rectangular orthotropic plates reinforced by network of ribs 18 p3252 A66-33705

Successive approximation method for solving fundamental equations of nonlinear flexural vibration for rectangular elastic plate, noting effect of temperature and large amplitude 20 p3672 A66-38236

Free vibration analysis techniques for computers and derivation from past methods 21 p3823 A66-38561

Two-dimensional vibration problems treated by Bolotin edge-effect procedure 21 p3823 A66-38565

Continuous system replacement by lumped parameter models, considering undamped flexural vibrations of beam systems, particularly free vibrations 21 p3825 A66-38581

Free vibration of composite system analyzed, using Rayleigh-Ritz method 21 p3825 A66-38583

Support flexibility effect on natural frequency free vibrations of uniform cantilever carried by mass supported on string 21 p3833 A66-39608

Finite Fourier sine transform method of obtaining closed-form solution, calculating eigenfrequencies for free vibrations of partially fixed beam carrying concentrated masses 22 p3992 A66-40296

Longitudinal, torsional and flexural free vibration of elastic slender bar of variable cross section with nonhomogeneous properties 22 p3992 A66-40299

Steady state free and forced vibration response of beams supported on nonlinear springs of Duffing type 23 p4140 A66-41913

Free and forced vibration effect on drift of gyroscope supported in gimbal 23 p4071 A66-41981

Out of plane free vibrations of uniform circular ring on elastic and torsional foundations producing restraints 24 p4287 A66-42165

**FREEDOM FIGHTER AIRCRAFT**

**S F-5 AIRCRAFT**

**FREEZING**

**SA FROST**

Melting and freezing of finite and semiinfinite bodies, discussing variational, heat balance integral, Riemann-Mellin contour integral, etc 06 p0971 A66-16728

Carbon dioxide effect on shattering of

freezing water drops, using methanol-cooled chamber with variable temperature control 10 p1552 A66-21290

Mathematical analysis of thermal wave technique for linear kinetics from viewpoint of solid-liquid interface 18 p3265 A66-34508

Freezing of supercooled water drops to determine dependence of heterogeneous nucleation on temperature and on duration of supercooling 19 p3394 A66-36384

**FREEZING POINT**

Freezing potential for ammonia and sodium chloride solution at constant freezing rates, noting stationary nature of potential under stationary conditions 13 p2121 A66-26124

Electrical conductivity variation with temperature of chlorine and bromine trifluoride, noting maximum conductivity below freezing point of chlorine trifluoride 23 p4118 A66-41241

**FREIGHT COST**

Specialized services provided by air freight forwarding industry to shipper and carrier 15 p2619 A66-29790

Transportation needs of business in small shipment category, discussing role of air freight 15 p2619 A66-29791

Outlook for air cargo handling indicates reduction of cost and increased efficiency by use of intermodel containers 15 p2620 A66-29799

**FRENCH SATELLITE**  
**S FR-1 SATELLITE****FREON**

Low thrust cold gas reaction jet system for small spacecraft with nitrogen, ammonia, Freon-12 and Freon-14, analyzing thrust chamber pressure history [ASME PAPER 65-WA/AUT-11] 05 p0624 A66-15608

Electrostatic field influence on nucleate boiling of Freon 113, noting improvement of peak heat flux 19 p3477 A66-35407

**FREON 12**

VECO 32A11 thermistor element for temperature and liquid level sensing in hazardous gases such as Freon 12 21 p3740 A66-39388

**FREQUENCY**

**SA AUDIOFREQUENCY**

**SA CARRIER FREQUENCY**

**SA CRITICAL FREQUENCY**

**SA CYCLOTRON FREQUENCY**

**SA HIGH FREQUENCY**

**SA ULTRALOW FREQUENCY**

**SA VERY HIGH FREQUENCY**

**SA VERY LOW FREQUENCY**

**SA VIBRATIONAL FREQUENCY**

Spectrum of spatial frequencies of object analyzed through Michelson method 21 p3738 A66-39130

**FREQUENCY AMPLIFIER**

**SA INTERMEDIATE FREQUENCY AMPLIFIER**

Parameters of tunnel diode mixer with RF amplifier measured, using tunnel diode as calibrated shot noise generator 02 p0196 A66-11423

Field effect transistors and unijunction transistors in sawtooth generator, cascade amplifier, voltage regulator, etc 06 p0856 A66-16920

Maximum gain condition of resonance amplifier for given passband, determining amplification coefficient 07 p1005 A66-17351

Output signal and noise components determination from difference-frequency amplifier of two-channel receiver 10 p1504 A66-21671

Microwave circuit design for HF amplifiers and radar systems using either hybrid approach with germanium transistors or monolithic one with silicon transistors 10 p1512 A66-21761

Bulk germanium arsenide operating

simultaneously as microwave amplifier mixer and oscillator under continuous wave conditions 12 p1835 A66-24144

5 kw LF power amplifier with improved frequency response, noting design and operation 12 p1843 A66-24688

Bandwidth of nonoverdriven abrupt-junction varactor-frequency doubler, deriving upper bounds for minimum constant T for lossless case 15 p2465 A66-29326

Recognition and subsequent amplification of difference frequency in plasma-beam system with two electromagnetic waves propagating in opposite direction 20 p3519 A66-38000

Block diagrams and frequency characteristics of resistance capacitance resonance amplifier 21 p3713 A66-39253

**FREQUENCY ANALYSIS****SA OSCILLOSCOPE**

RC circuit filter properties during operation under complex load in form of parallel connection of resistance and capacitance 01 p0036 A66-10220

Stability of single-frequency solutions to quasi-linear autonomous systems with two degrees of freedom 02 p0262 A66-12178

Forced discontinuous oscillations of fluid in pipeline, discussing energy dissipation effects in LF range 04 p0509 A66-13555

Frequency characteristics of pulse automatic control systems determined by auxiliary pulse system 04 p0502 A66-13700

Determination of spectral curves, using electrical frequency analyzers 04 p0520 A66-13760

Keying phase-sensitive loop with capacitive loading in selection circuits for frequency separation of telemetry signals 04 p0504 A66-13770

Frequency characteristics of single coordinate inversion photodiode in presence of low signal level, using equivalent circuit 04 p0499 A66-14050

Frequency analysis of wideband RL and RLC phase shifters, using Chebyshev polynomials 04 p0501 A66-14400

Distribution function of zeros in harmonic signals relation to frequency characteristics of latter undergoing maximum amplitude limitation 07 p1001 A66-17340

Short-pulse shaping of high repetition rate with transistorized blocking oscillator 07 p1001 A66-17350

Relay correlator for determining frequency characteristics in searchless self-adjusting systems under steady noise 07 p1012 A66-17370

Distortions of linear system reactions with change in amplitude-frequency and phase frequency characteristics 08 p1183 A66-19100

Exact frequency solution for steady state wave propagation for plane strain vibration of composite hollow cylinders 08 p1310 A66-19180

Resonance Raman effect in crystal, discussing spontaneous and stimulated scattering efficiency 08 p1259 A66-19230

Possible amplitude-frequency and phase frequency characteristics of selective systems with smooth passband control and nonminimal phase 09 p1352 A66-20290

Linear system induced amplitude-frequency and phase-frequency distortions 09 p1361 A66-20290

Radiation resistance of linear current strip of finite width immersed in uniaxial anisotropic plasma medium 09 p1408 A66-20370

Frequency stabilization method for reflex klystrons and other self-excited microwave oscillators 09 p1357 A66-20780

Operation of nonlinear servosystem with autocorrelator as measuring element in presence of noise 11 p1677 A66-22750

Model of spectrometer with external feedback in dynamic behavior analysis, considering control pulse and transfer process 11 p1677 A66-22760

Response of logarithmic frequency characteristics of dynamic linear systems to small parameter variations 12 p1848 A66-23780

Internal gravity waves in stratified liquid for two-dimensional case, noting relation between oscillation frequency and

wavelength 13 p2062 A66-25177  
 Coriolis interaction in first and third  
 fundamental frequencies of ozone, noting  
 vibration rotation spectrum and coupling of  
 two states 13 p2016 A66-25373  
 Microwave transmission and scattering  
 measured in laboratory plasma, noting  
 moving regions occulting microwave beam,  
 existence of turbulence elements and  
 frequency spectrum of uniformly scattered  
 component 13 p2143 A66-25709  
 Axisymmetric configurations of oscillations  
 of thin conical shell, solving equations for  
 fundamental frequency 13 p2207 A66-26497  
 Spectral features of stable generation of  
 oscillation in delayed-feedback microwave  
 oscillator consisting of TW amplifier and  
 waveguide delay line 14 p2267 A66-27738  
 Automatic speech analyzer capable of  
 detecting frequencies of three primary voice  
 formants 14 p2296 A66-27864  
 Frequency characteristics of pulse  
 automatic control systems determined by  
 auxiliary pulse system 15 p2469 A66-28544  
 Frequency spectrum of FM signal for  
 carrier modulation by any number of  
 subcarriers 16 p2649 A66-30547  
 Frequency of strong ionospheric  
 disturbances, noting effect of high and low  
 solar activity, deviations from monthly  
 median, use of statistical analysis,  
 etc 16 p2699 A66-31387  
 RC circuit filter properties during  
 operation under complex load in form of  
 parallel connection of resistance and  
 capacitance 17 p2880 A66-31908  
 Frequency characteristics of single  
 coordinate inversion photodiode in presence  
 of low signal level, using equivalent  
 circuit 17 p2885 A66-32222  
 Frequency analysis of simplex signals using  
 closed loop magnetic tape  
 recorder 17 p2925 A66-32312  
 Feedback control system digital computer  
 design and analysis, including frequency-  
 domain analysis, time-domain analysis, state-  
 space simulation program, etc 17 p2877 A66-32778  
 Aircraft mass and stiffness estimations by  
 displaced frequency 18 p3254 A66-33949  
 Possible amplitude-frequency and phase-  
 frequency characteristics of selective  
 systems with smooth passband control and  
 nonminimal phase 18 p3087 A66-34958  
 Linear system induced amplitude-frequency  
 and phase-frequency 18 p3091 A66-34959  
 Distortions Equivalent systems with identical accuracy  
 at fixed moment of time through transfer  
 function of steady state correcting  
 device 18 p3091 A66-34988  
 Conventional equivalent circuit of tunnel  
 diode with inverse frequency stability  
 characteristics 19 p3312 A66-35348  
 Frequency stabilization method for reflex  
 klystrons and other self-excited microwave  
 oscillators 22 p3874 A66-39839  
 Cut-off frequency of high voltage GaAs  
 varactors, comparing theoretical and  
 experimental values 24 p4183 A66-42632

**FREQUENCY ASSIGNMENT**  
 Synchronous stationary satellite system for  
 networking television and radio material to  
 broadcast stations, noting frequency  
 requirements and constraints  
 [AIAA PAPER 66-284] 12 p1821 A66-24755  
 Role of International Telecommunication  
 Union in satellite communication  
 development, noting history, organization,  
 operation  
 [AIAA PAPER 66-443] 12 p1983 A66-24800  
 International RF space allocation for  
 astronomical purposes 15 p2449 A66-28743

**FREQUENCY BAND**  
 SA C-BAND  
 SA K-BAND  
 SA KU-BAND  
 SA L-BAND  
 SA P-BAND  
 SA RADIO SPECTRUM  
 SA S-BAND  
 SA X-BAND

Wideband junction circulator design with  
 maximum product of isolation and frequency  
 bandwidth but maintaining minimum  
 temperature and DC magnetic field  
 variation 01 p0040 A66-10548

Radio search for intelligent extraterrestrial  
 life, estimating civilization distribution,  
 frequency of best sensitivity and aggregate  
 signal detection 02 p0191 A66-11610  
 Widening of frequency bands of frequency  
 multipliers and dividers by shifting spectra  
 to higher ranges 02 p0206 A66-12271  
 Bandwidth expansion of crystal filters by  
 spacing frequency response characteristics  
 in relay circuit at suitable distances from  
 each other 03 p0342 A66-12895  
 Harmonic structure and band splitting of  
 type II solar radio bursts 03 p0429 A66-13179  
 Transmission band and critical frequencies  
 calculation for straight waveguides of  
 stepped cross section 06 p0838 A66-15884  
 Quadrature modulation single-sideband  
 circuit as frequency translating two-port,  
 comparing performance with conventional  
 modulator-with-SSB filter 07 p1015 A66-17746  
 Existence of relationship between slope of  
 servo-system functions with limited  
 bandwidth and bandwidth  
 magnitude 09 p1346 A66-20575  
 Frequency spectrum of microwave emission  
 from n-type gallium arsenide 10 p1574 A66-21354  
 Data transmission by continuously-radiating  
 power source moving away from receiver  
 and fluctuation noise of uniform frequency  
 spectrum 11 p1654 A66-22633  
 Amplitudes and linewidth of discrete  
 spectrum of natural frequencies of thin  
 magnetic films, noting motion equations,  
 dispersion ratio and resonance  
 peaks 11 p1752 A66-22799  
 Widening of frequency bands of frequency  
 multipliers and dividers by shifting spectra  
 to higher ranges 12 p1831 A66-23875  
 Rarefying of dense frequency spectrum of  
 shell-shaped elements of aircraft engines by  
 corrugating shell surface, determining  
 natural oscillation modes and  
 frequencies 12 p1964 A66-24046  
 Models of hybrid AM-PM signal modulated  
 by single sinusoid and having one-sided  
 frequency spectrum described by using  
 MacLaurin series expansions, noting phase  
 relation of sidebands to  
 carrier 14 p2235 A66-27061  
 Log periodic Yagi-Uda dipole antenna array  
 and extension of frequency  
 bandwidth 14 p2256 A66-27920  
 Plasma diagnostics in terms of response  
 times, noting conversion of phase frequency  
 deviations of probing signal, data recording  
 for plasma in motion and expression for  
 waveguide frequency 14 p2298 A66-28472  
 Relation between frequency spectrum of  
 pulsations in auroral luminosity and energy  
 spectrum of auroral electrons, using  
 photometer 15 p2489 A66-29235  
 True radio-brightness distribution of  
 cosmic radiation source by reducing spatial  
 frequency distortions with passband radio  
 interferometer 16 p2806 A66-31544  
 Frequencies of secondary particles and  
 penetrating particles, using underground  
 scintillators, Geiger counters and flash  
 tubes 18 p3221 A66-35202  
 PCM bandwidth halving and twin working  
 method of superimposing two PCM channels  
 in frequency band occupied by one PCM  
 channel 19 p3305 A66-36625  
 Pulse-shaping networks with frequency-  
 band limitation, noting approximation of  
 idealized networks with echo  
 equalizers 19 p3306 A66-36656  
 Frequency spectrum of laser impulse in Q-  
 switching regime wider than that of single  
 impulse radiated by laser in ordinary  
 regime 20 p3576 A66-37141  
 Frequency sensing for protection of  
 frequency aircraft electric power systems,  
 applying storms saturating reactor  
 concept 20 p3499 A66-37175  
 Broadening frequency bandwidth of full-  
 wave directive loop antennas employing  
 reflectors and directors 20 p3531 A66-37727  
 Stepped structure of sunrise fall observed  
 at various frequency bands of atmospheric  
 activity suggest it is due to wave  
 propagation between Earth and E and D  
 layers 21 p3706 A66-39374  
 Statistical correlation-Fourier frequency  
 band analysis of coherent memory filter

 systems 23 p4035 A66-41023  
 Wide frequency bandwidth properties of  
 arrays of shunt slots in ridged  
 waveguide 24 p4187 A66-43194

**FREQUENCY CONTROL**  
 SA AUTOMATIC FREQUENCY CONTROL  
 Quartz crystals in frequency stabilization at  
 present and in future 01 p0045 A66-10991  
 Frequency stabilization for narrow band  
 microwave oscillators, using supplementary  
 resonator connected by transmission line  
 with basic resonator of  
 oscillator 04 p0496 A66-13904  
 Gunn effect n-type GaAs diode phase  
 locked to stable frequency by injecting CW  
 signal into circuit along with video  
 pulse 06 p0925 A66-16671  
 Tuning multicircuit resonant systems to  
 given frequency passband by graphical  
 resonance curves 07 p1005 A66-17401  
 Numerical representation of controlled  
 quantity expressed by linear frequency  
 signal 07 p1005 A66-17405  
 Stable single-frequency output from laser  
 cavity obtained by filter method and  
 resonance suppression 07 p1045 A66-18356  
 Frequency stabilization of gas lasers, using  
 atomic resonance and  
 interferometers 07 p1045 A66-18357  
 Motor controllers for DC current supply  
 must be inverters of constant or variable  
 frequency 08 p1168 A66-19299  
 Quartz crystals in frequency stabilization at  
 present and in future 10 p1510 A66-21667  
 Frequency correlation in radio  
 communication using scattering  
 media 10 p1504 A66-21677  
 Pulse-phase locked automatic frequency  
 control for multiplication  
 conversion 10 p1504 A66-21678  
 Interference ratios in space telecasting,  
 considering methods of control for  
 cochannel broadcasting  
 [AIAA PAPER 66-283] 12 p1821 A66-24754  
 Random vibration testing, discussing  
 Derritron vibration control oscillator and  
 frequency measurement by splitting into  
 narrow bands 16 p2715 A66-31202  
 Frequency agility theory and application  
 for improved radar, range and angle  
 detection 16 p2655 A66-31649  
 Tunnel diode application to tunable  
 microwave oscillators, noting coupling to  
 high Q factor resonator for frequency  
 stability 17 p2885 A66-32287  
 Frequency stabilization of gas laser by  
 servomechanism and Lamb dip  
 method 17 p2937 A66-33252  
 Dual mode frequency discriminator for  
 microwave source frequency stability,  
 discussing application of beam waveguide  
 resonator 17 p2895 A66-33274  
 Collision frequency control application to  
 control plasma-electromagnetic interaction  
 [IEEE PAPER CP-65-444] 18 p3068 A66-33907  
 Frequency control accuracy measured for  
 hydromechanical constant speed drive with  
 precise speed trim 20 p3499 A66-37174  
 Frequency stabilization for narrow band  
 microwave oscillators, using supplementary  
 resonator connected by transmission line  
 with basic resonator of  
 oscillator 20 p3532 A66-37862  
 Frequency stabilization of gas laser to lock  
 output to center of atomic resonance, using  
 error signal 20 p3580 A66-38241  
 Frequency distortions correction for  
 pulsation amplifier of  
 thermoanemometer 21 p3739 A66-39331  
 Programmed oscillators to control Doppler  
 tracking radar systems for space  
 communications and radar  
 astronomy 22 p3862 A66-39731  
 Frequency variations of pi-equivalent  
 circuit parameters of junction transistor,  
 noting expansion of hyperbolic function into  
 Taylor series 22 p3873 A66-39815  
 Four-layer p-n-p-n diodes having two  
 separate capacitance modes enables use as  
 controlled element in frequency keying  
 circuits 22 p3875 A66-40074  
 Pontryagin maximum principle  
 minimization of time frequency transition in  
 white noise driven phase-locked  
 loop 23 p4048 A66-41316  
 Frequency dependence of electrostatic

energy density in undamped longitudinal plasma oscillation, noting contribution of kinetic and thermal energy 23 p4104 A66-41507

RC filter with staggered notch frequencies for ease of adjustment and maintenance 24 p4183 A66-42628

## FREQUENCY CONVERSION

Serrrodyne frequency conversion determined, using sawtoothed FM of microwave oscillator and subsequent conversion with delay line in sawtoothed phase modulation, calculating phase distortion 04 p0499 A66-14052

Fourier analysis of modulation products in nonlinear device output and optimum frequency conversion for n-frequency input 09 p1396 A66-20639

Laser frequency tuning by dielectric material interaction to produce nonlinear effects 14 p2305 A66-26867

High directional antenna with variable aperture and signal processing after frequency conversion 14 p2251 A66-27237

Passive frequency conversion utilizing nonlinear conductance, establishing lower bound for noise figure 17 p2881 A66-32060

Serrrodyne frequency conversion determined, using sawtoothed FM of microwave oscillator and subsequent conversion with delay line in sawtoothed phase modulation, calculating phase distortion 17 p2884 A66-32218

Optical frequency breakdown threshold of inert gas mixtures, using focused beam radiation from Q-spoiled neodymium laser 18 p3138 A66-34236

Frequency doubling of laser light with variable Q-switched resonator 22 p3929 A66-39654

Convex programming procedure yielding algorithm for tuning out system from possible resonance zone 23 p4090 A66-41408

Frequency up-conversion technique with signal mixing, noting equipment and results 24 p4183 A66-42630

## FREQUENCY CONVERTER

### SA PARAMETRIC FREQUENCY CONVERTER

Design problem of transistorized frequency converters 01 p0045 A66-10993

Regenerative frequency converters used as signal limiters, determining characteristics from equivalent circuit of semiconductor diode 02 p0199 A66-11758

Nonlinear distortion and truncation errors in frequency converters and parametric amplifiers 02 p0201 A66-11902

Instability of tunnel diode frequency converter, discussing effects of temperature and instability 04 p0501 A66-14411

Linear voltage-to-frequency converter provides constant-amplitude output with varying frequencies and constant-frequency output with varying amplitudes 05 p0649 A66-15263

Tunnel diode mixer operation expressed as bias and local oscillator voltages available gain, minimum noise figure and output conductance, carrying out numerical analysis 06 p0846 A66-16095

Amplification factors and optimum matching conditions calculated for complex capacitive diode frequency converters 07 p1005 A66-17347

Gain-bandwidth limitations and optimum design of noninverting frequency converters comprised of parametric conductance in parallel with parametric capacitance pumped in time-quadrature 07 p1017 A66-18348

Design problem of transistorized frequency converters 10 p1510 A66-21669

Diode frequency converter parameter derivation incorporating capacitance of resistance converter and resistance of capacitance converter 11 p1667 A66-22794

Solid state UHF telemetry converter using microwave interdigital multiplexing filter containing integrated semiconductor elements 12 p1840 A66-24622

Coaxial-mounted silicon point-contact diode /1 N 26/ as frequency converter for millimeter waves 12 p1846 A66-24857

Noise factor of linear receiving systems in quantum and classical regions, noting role of dual push-pull amplifier and frequency converter 13 p2020 A66-25226

Variable speed constant frequency /VSCF/

generating system for helicopters 16 p2636 A66-30600

Results derived from dissipative four-terminal networks applied to varactor convertor, leading to capacitance variations determination as function of polarizing potential 16 p2662 A66-30961

Frequency converters using traveling wave and backward wave tubes, noting current-wave amplitude distribution, velocity and voltage 16 p2666 A66-31550

Analog computer and logic circuitry combination for variable frequency signal production, noting application to adaptive control systems 18 p3089 A66-33561

Transfer functions, optimum impedance matching conditions, input and output admittances and voltage spectra of transistorized frequency converters 20 p3525 A66-37125

Diode frequency converter parameter derivation incorporating capacitance of resistance converter and resistance of capacitance converter 20 p3525 A66-37131

Electrical power control and conditioning subsystem for Manned Orbital Research Laboratory /MORL/, noting Brayton cycle, system optimization, alternator and frequency converter selection 20 p3497 A66-37157

Varactor-diode frequency converter properties and operation at L-band 21 p3713 A66-39379

Parametric amplification at collector-base diode for microalloy graded-base transistor and normal mixing due to resistive nonlinearity at emitter 22 p3872 A66-39735

Conversion of finite discrete frequency spectrum by n-dimensional frequency converter with nonlinear active resistance with ideal characteristics 23 p4038 A66-41519

Three-circuit system with circuits connected by nonlinear capacitance applied to frequency converters, amplifiers, etc 23 p4049 A66-41565

## FREQUENCY DISTRIBUTION

### SA POISSON DISTRIBUTION

### SA WEIGHTING /MATH/

Wing broadening in plasma of hydrogen Lyman-alpha line by local electron and quasi-static ion fields calculated, considering impact theory of electron collisions, quadrupole and dipole interactions and existent asymmetries 03 p0405 A66-13138

Solutions for integral equation associated with equation of radiative transfer for isotropic scattering and complete redistribution in frequency cases 05 p0762 A66-15276

Nonsymmetric self-oscillations in relay system, discussing sliding mode of operation of controller with feedback loop 06 p0863 A66-16529

Frequency pattern for transmission from ground stations providing worldwide unambiguous navigation aid for civil aircraft, noting airborne equipment 07 p1073 A66-17769

Frequency distributions of characteristics of daily variation of cosmic ray intensity with solar activity from 1958 to 1962 07 p1125 A66-18006

Frequency distribution of route temperature at supersonic flight levels, noting effect on payload during extended trips [AIAA PAPER 66-371] 12 p1802 A66-24499

Band pass characteristics realized by four-layer distributed RC network without series resistance and amplifier scheme used as model for integrated circuits, noting frequency characteristics variation 13 p2051 A66-26069

Monte Carlo model of elementary fracture process, noting role of energy in comminution, uneven distribution of energy vs frequency, etc 13 p2207 A66-26600

Combined frequency and space correlation of wave fields scattered by rough surfaces where conditions of applicability of Kirchhoff approximation hold true 14 p2236 A66-27144

Dependence of frequency distribution of auroral displays in zenith on latitude and local time in magnetically quiet and disturbed periods analyzed by all-sky camera network in Northern Hemisphere 15 p2488 A66-29227

Circularity index of lunar craters indicating two populations as shown by frequency distribution curve 15 p2597 A66-29252

Frequency distribution of secondary lunar craters determined from Ranger VI photographs, hypothesizing that part of these depressions are subsidence formations 15 p2598 A66-29252

Atmospheric density statistics from cumulative frequencies for seasons a function of altitude for design of booster vehicles 16 p2741 A66-30600

Frequency distribution of atmospheric emissions by multiple lightning discharges 20 p3553 A66-38007

Energy spectral density of ideal sonoboom pressure signatures and equations for HF and LF asymptotic spectral behavior 22 p3848 A66-40300

Atmospheric turbulence effect on frequency spectra of light intensity fluctuations examined, using He-Ne laser 23 p4035 A66-41032

Solar corona pictures during July 1962 eclipse, analyzing polar rays frequency distribution along Sun limb and deviation from radial direction, all linked to solar activity cycle 23 p4123 A66-41831

## FREQUENCY DIVIDER

Phase shifter which includes ring potentiometer and passive network, noting possible frequency division application 01 p0043 A66-10870

Widening of frequency bands of frequency multipliers and dividers by shifting spectra to higher ranges 02 p0206 A66-12270

UHF quarter-wave frequency divider with parametric diode placed transversely in rectangular waveguide resonator 06 p0839 A66-15900

Economical frequency divider with arbitrary coefficient of division 06 p0849 A66-16360

Single tunnel diode multivibrator producing stable frequency division by factors to ten 06 p0852 A66-16510

Pulse-frequency division using parallel connected dividers 07 p1005 A66-17350

Harmonic frequency divider by using inertialess nonlinear element and inertialess nonlinear element such as thermistor 09 p1353 A66-20449

Synthesizing group of parallel-input filter while minimizing insertion loss and reflection coefficient 11 p1656 A66-23060

Widening of frequency bands of frequency multipliers and dividers by shifting spectra to higher ranges 12 p1831 A66-23870

Stability of automatic phase control system for output generation from voltage controlled oscillator 12 p1836 A66-24300

Multiple access modulation techniques /frequency-division, time-division, spread spectrum and pulse-address/ for use in communications satellites [AIAA PAPER 66-278] 12 p1821 A66-24750

Communications satellite system efficiency enhanced by using automatic adaptive voice multiplexer in ground terminal equipment [AIAA PAPER 66-291] 12 p1822 A66-24760

Single tunnel diode multivibrator producing stable frequency division by factors to ten 13 p2041 A66-25955

Economical frequency divider with arbitrary coefficient of division 13 p2042 A66-25955

Frequency division by various factors in magnetic frequency divider with gate excitation winding circuit 16 p2666 A66-31550

Frequency dividers for sequence of pulses using relaxation generators with rectangular timing voltage 17 p2887 A66-32700

Multiple-access systems and characteristics in communications satellite applications, specifically frequency-division multiplex and spread-spectrum modes 20 p3511 A66-36889

## FREQUENCY-DIVISION MULTIPLEXING

Circuit analysis of reduction of intermodulation distortion generated in high power coupled cavity traveling-wave tube for single sideband frequency division multiplex transmitters 04 p0498 A66-14030

Integration of spacecraft tracking, telemetry and command systems using frequency multiplex subcarriers and angle modulated RF signal 19 p3300 A66-35680

## FREQUENCY MEASUREMENT

Wide-range automatic electron-counting

frequency meter for sinusoidal and pulsed signals 02 p0230 A66-11813

Microelectronic digital chronometer and frequency meter, noting design details and thin film circuits 02 p0231 A66-11916

Frequency deviation measurement by digital circuit 03 p0372 A66-13332

Comparison of PCM and PFM telemetry systems in terms of transmission rate, bandwidth, error rate and power 04 p0477 A66-13584

Superimposed vibrations, corresponding to different propagation constants for same frequency parameter, satisfy boundary conditions at flat surfaces of cylinder 05 p0781 A66-15739

Helical oscillations of plasma immersed in time-varying static magnetic field, measuring frequency, amplitude and transition modes 07 p1103 A66-18216

Microwave emission from InSb in magnetic fields, explaining experimental results via modified traveling wave helicon model 07 p1104 A66-18219

Phase-locked marker for rapid identification and accurate measurement of arbitrary frequency in spectrum under analysis 09 p1382 A66-20673

Absolute wavelength stability of helium-neon laser measured by direct interferometric comparison with Hg 198 standard lamp 11 p1712 A66-22868

Instrumentation for measurement of short-term frequency stability of microwave sources 12 p1816 A66-24134

Direct frequency comparison of atomic hydrogen masers in different places and conditions by simultaneous monitoring of Loran C signals 12 p1890 A66-24145

Measuring system for analyzing performance of oscillators of moderate short-term stability, using readily available equipment 12 p1835 A66-24146

Mossbauer effect, frequency measurement and red shift in relativistic gravitational field 12 p1914 A66-24404

Computation method of damped resonance frequencies for system of equal masses, spring constants and viscous damping coefficients 13 p2194 A66-25140

Small frequency shift measurement method for X-band plasma-loaded cavities 13 p2084 A66-26562

Plasma frequency measurement based on Hall effect proportional to electron concentration 15 p2453 A66-29931

Navy navigation satellite system developed by APL, using Doppler frequency measurements for navigation fix 15 p2536 A66-30001

Digital measurement of differential Doppler effect using transposition of phase relation of two HF signals into audiofrequency band 15 p2453 A66-30070

Precision phase meter, discussing principle of operation, design, circuit description and uses 18 p3075 A66-33832

Rise and fall times of transistors in switching operation, comparing variation of lifetime of minority carriers with results obtained from cut-off frequency measurements 19 p3313 A66-35350

Data processing of PFM telemetry whereby resolution of frequency measurements is dependent upon SNR, for application to satellite parameters 19 p3301 A66-35696

One-port log-periodic circuits, determining conditions for which phase of input reflection coefficient varies linearly with logarithm of frequency 19 p3324 A66-35717

Feasibility of improved accuracy in light velocity measurement in vacuum by using superconducting parallelepiped hyperfrequency cavity 19 p3360 A66-36253

Frequency measurement using autocorrelator as frequency discriminator, noting technique and high-noise sensitivity 19 p3306 A66-36657

Frequency of wake shedding from circular cylinder in water flow with values above critical Reynolds number, noting eddy generation and drag coefficient dependence on cavitation number 20 p3548 A66-38012

Erosion destruction mechanism in polycrystalline graphite, noting effect of gas flow over surfaces, flow pulsation frequency and generated aerodynamic loads 21 p3754 A66-38957

Inverse transfer function of pulse-forming network for binary code transmission with small intersymbol interference in time domain and narrow bandwidth in frequency domain 22 p3866 A66-40182

Frequency meter for measuring center frequency of random pulses distributed according to Poisson law, consisting of integrating circuit with high time constant 22 p3918 A66-40404

Bridge circuit measurement of phase at UHF and microwave frequencies, examining amplitude modulation and mixer types 24 p4171 A66-42101

Increase in standard deviation of VLF propagation over very long paths 24 p4172 A66-42420

Frequency characteristic and transient delta function of plant, using algorithm based on correlation functions 24 p4188 A66-42483

Frequency temperature dependence of longitudinal and transverse hypersonic wave absorption coefficients in quartz and artificial ruby crystal 24 p4255 A66-42514

## FREQUENCY MODULATION

SA FEEDBACK FREQUENCY MODULATION /FBFM/

SA PULSE AMPLITUDE MODULATION /PAM/

SA PULSE FREQUENCY MODULATION /PFM/

SA PULSE MODULATION

Digitally coded frequency and pulse modulation with square wave, performing spectral analysis and measuring spectral response 01 p0030 A66-10875

Carrier frequency stabilization of FM laser with respect to center of atomic gain profile, using small distortion present in laser oscillation 01 p0083 A66-10966

Wideband FM transmitters and RF-to-RF repeaters for space application in S- and X-band frequency ranges 01 p0032 A66-11129

Compression of linear FM S-band pulses in axially magnetized yttrium-iron-garnet delay line 02 p0192 A66-11883

Collector modulation class C transistor amplifiers analyzed theoretically, revealing certain parameters influence on efficiency and modulation linearity 02 p0201 A66-11912

FM by mechanical tuning of cavity setting in gallium arsenide crystals for application to communication system 03 p0332 A66-12428

Synthesis of all-pass networks noting uses in signal expansion in time domain, signal phase-splitting, signal delay without FM, etc 03 p0345 A66-13273

Signal to noise ratios for band-limited signals and filtering processes, using simultaneously noise and modulated carrier, noting limiter, summation and bias noise 04 p0477 A66-13586

FM telemetry digitizing system operating on-line in real time environment results in automatic data processing 04 p0489 A66-13600

Five-channel FM/FM telemetry encoder using molecular electronics, noting oscillators, delay lines and linear amplification functional blocks 04 p0493 A66-13601

Data control constant-bandwidth frequency system and tricom system discussed as examples of better methods of taking advantage of communication frequency spectrum 04 p0480 A66-13727

Frequency manipulated signal spectrum for case of modulating function with arbitrary off-duty factor 04 p0482 A66-13912

FM laser oscillation theory discussing effect of arbitrary atomic line shape, saturation, mode pulling, power output, sideband amplitude, distortion, etc 04 p0530 A66-13954

Experiments on helium-neon FM lasers covering phase-locked and FM region power output, modulation index and distortion experiments 04 p0530 A66-13955

Zero conversion loss obtained for certain frequency change using second-order ideal ring modulator with reactive idler circuit at normal output terminals 04 p0500 A66-14094

Comparison of matched-filter analysis and quasi-matched filter analysis of linear FM pulse compression 04 p0486 A66-14117

Performance comparison of cascade two-transistor amplifier configuration with single high-performance transistor used in FM RF

application 05 p0645 A66-14586

Transistor CW amplifier delivering 14 watts into 15-ohm load over frequency band from 46 to 90 mc for use with FM optical modulator 05 p0649 A66-15177

Spectral density of FM baseband wave when it is quantized random facsimile signal 05 p0634 A66-15183

Operating principles of pulse and frequency modulation, using step-recovery diodes as circuit elements 05 p0651 A66-15835

Molecularized FM-FM telemetry system for providing more reliable FM subcarrier oscillators with reduced size, weight and power dissipation 06 p0824 A66-15968

Yttrium iron garnet filters, noting envelope limiting characteristics for submegacycle range modulating frequencies and response parameters 06 p0845 A66-16089

Frequency-selective transmission etalon replaces end mirror of FM laser so that total power is obtained as single optical frequency 06 p0890 A66-16381

Operation of FM microwave generator with external feedback connected to mismatched long line 06 p0852 A66-16512

Linear homodyne mixer used to eliminate interference and extract range information in CW radars 06 p0833 A66-16644

Reflex klystron as subcarrier detector for microwave signals modulated by RF carriers in 100 to 500 kc range 06 p0853 A66-16651

Multilevel narrow-band FM digital communication system using conventional modulators and demodulators 06 p0834 A66-16856

Suppression of FM in parallel signal channels, using Mix-On-Self /MOS/ loop 06 p0834 A66-16858

Binary FM signal originating from single frequency source 06 p0835 A66-16861

Tonks-Dattner resonances, describing frequency modulated technique to study microwave energy irradiated plasma column 06 p0920 A66-16993

Predicting and measuring FM of reflex klystron noise performance when subjected to random acoustical and mechanical vibration 07 p1008 A66-17512

Radar observations of Venus in Soviet Union in June 1964 using frequency keying and linear frequency modulation techniques 07 p1134 A66-17619

Tunnel diode voltage-controlled oscillator to expand FM system channel capacity 07 p1010 A66-18246

Phase-locking effect and phase sum of LF and HF oscillating modes in laser 07 p1046 A66-18413

Medium-capacity satellite receiving system for multiplex FM telephony transmission 08 p1183 A66-18947

Signal to noise ratios of AM, FM and PM systems applied to FM-FM receiver 08 p1185 A66-19563

Complex signal coding with on-off pulses of varying width and repetition period, using equal-slope approximation of signal waveforms 08 p1186 A66-19739

Plasma permittivity modulation by ion waves for thermally ionized alkali plasma in microwave resonator 08 p1266 A66-19811

Semiconductor lasers, FM techniques and multiple-scatter paths used to overcome modulation noise under varying weather conditions 09 p1385 A66-19915

Low-threshold FM demodulator with bandwidth subdivision 09 p1346 A66-20560

High resolution X-band FM/CW radar for radar cross section measurements 10 p1500 A66-21620

Spectral method of determining bandwidth requirement for FM signals based on amount of tolerable distortion at discriminator output 10 p1504 A66-21653

Nonstationary processes and destabilizing factors effect on nonlinear distortion in frequency detector with detuned circuits 10 p1510 A66-21672

Optimal amplitude modulations for radar signal design subject to simultaneous peak and average power constraints 10 p1505 A66-21840

Pressure and heat transfer measurement by FM telemetry for models flying freely in hypersonic wind tunnel streams 10 p1538 A66-22041

AM and FM of transferred electron microwave generators, noting voltage dependence 10 p1515 A66-22094

Small peak phase deviation measured from required characteristics in linear frequency-modulated and pulse-compression radar system 11 p1652 A66-22386

Matched filter for frequency modulated continuous wave radar signal processing system 11 p1669 A66-23110

Reflex klystrons as microwave FM detector and theoretical circuit predictions 11 p1670 A66-23160

Computer analysis of translators using diode ring modulators and dimensioning of frequency dependent networks preceding and following modulating four-pole to obtain specific response in passband, minimizing spurious signal effect 11 p1670 A66-23197

VHF power modulation receivers using germanium injection modulators produce no additional noise at frequencies around 25 cps 11 p1670 A66-23228

Spurious sideband power levels for linear FM carriers encountered in FM-CW and FM pulsed radars 11 p1658 A66-23482

Dynamic frequency response, noting measurement of phase and amplitude responses of active and passive devices under RF pulse conditions with very fast FM 12 p1879 A66-23814

Nomograph for FM/FM telemetry system design 12 p1815 A66-24103

Instrumentation for measurement of short-term frequency stability of microwave sources 12 p1816 A66-24134

Steady state modulation by given frequency external signal of electron flow through straight waveguide, determining relation of counterradiation phase and amplitude to system parameters 12 p1921 A66-24210

Clear air turbulence types at high altitude identified and intensity and wavelength measured by FM instrument, using vane gust probe installed in U-2 aircraft [AIAA PAPER 66-362] 12 p1907 A66-24494

Transverse wave FM phototube system for detection of microwave-frequency modulated light, noting design, operation and application 12 p1838 A66-24558

Power spectra formula of digital FM signals for phase continuous and discontinuous cases, noting results of Anderson and Saltz 13 p2020 A66-25213

Hybrid PCM-FM communication system, noting quantization error and threshold characteristics 13 p2020 A66-25218

Pulse frequency multistable devices whose states differ, along with output voltage, by generated pulse rate 13 p2045 A66-25297

Microwave varactor diode efficiency as waveguide frequency modulator and multiplier 13 p2039 A66-25641

Flutter, time base error and jitter analyzed in multichannel magnetic recorder, noting measurement techniques 13 p2079 A66-25662

Operation of FM microwave generator with external feedback connected to mismatched long line 13 p2041 A66-25952

Atmospheric turbulence effects on laser beam propagation, noting beam cross section, phase variation, AM and FM, etc 14 p2235 A66-27035

Book on modulation as applied to information transmission, discussing mathematical background, linear modulation systems, FM, PM, etc 14 p2239 A66-27718

Desensitization in FM or PM transistorized receivers 14 p2259 A66-28042

Five-channel FM/FM telemetry encoder using molecular electronics, noting oscillators, delay lines and linear amplification functional blocks 14 p2243 A66-28350

Relation between RF of Jovian decametric emission bursts and modulation by Io searching for modulation by three outer Galilean satellites 15 p2597 A66-29232

Effect of harmonic distortion on Bessel-zero technique for FM deviation measurement used in calibration of carrier deviation and FM signal generator instruments 15 p2467 A66-29857

Radiolocation theory compared with communication theory, noting trading of frequency bandwidth of radar signal for error suppression 15 p2535 A66-29860

Comparison of frequency-modulated tunnel diode oscillators 15 p2468 A66-29924

Propagation velocity and attenuation variation effect in coaxial cables on frequency modulated carrier evaluated, using IBM 1620 computer 16 p2649 A66-30542

FM telemetry Rf link performance evaluated by constructing model of subcarrier multiplex, based on predicted noise power spectrum at Rf demodulator output 16 p2649 A66-30543

FM error calculation via comparison of demodulated output with input 16 p2649 A66-30544

Expansion of Inter-Range Instrumentation Group FM/FM baseband, noting maintenance of system performance with added channels 16 p2649 A66-30545

Frequency spectrum of FM signal for carrier modulation by any number of subcarriers 16 p2649 A66-30547

FM 10 watt S-band transmitter for space telemetry and data application 16 p2651 A66-30560

FM/FM and PAM/PM integrated telemetry systems with MDI for missile evaluation system 16 p2651 A66-30562

Communication effectiveness over VLF paths impaired by variability of VLF field strength due to modal interference effects 16 p2653 A66-30723

Digital computer to decode digitized or sampled PCM waveform 17 p2875 A66-32502

Signal transmission through double FM regaining LF signal by two-stage frequency demodulation at receiving end 17 p2876 A66-33451

Spectrum broadening of long-duration high-frequency pulses by FM 17 p2877 A66-33521

Multilevel narrow-band digital FM modem noting design principles, signal to noise ratio vs error rates, etc 18 p3067 A66-33900

Ultrasonic cell which modulates intensity of He-Ne laser beam for communication of intelligence 18 p3118 A66-34059

Plasma jet electrical conductivity, using inductances with different diameters as measurement device 18 p3144 A66-34101

Interference in passband of FM or PM channel due to adjacent FM or PM channel in telemetry system 19 p3300 A66-35687

Optimization of control loop type for minimum threshold which is function of modulation index, obtaining results using sine wave modulation 19 p3301 A66-35695

FM modulator with frequency response from DC to video while maintaining crystal stability, accommodating FM narrow-and wideband with single design 19 p3316 A66-35699

Temperature sensing and control by fluidic devices, using FM and phase discrimination for gas turbine engine application 19 p3361 A66-36672

IBM 7094 programmed in FORTRAN IV used to determine sidebands in FM with complex periodic modulation functions 20 p3522 A66-37212

Resolution of multiple target ambiguities in twin-channel frequency-modulated continuous wave radar system using fixed antenna 20 p3596 A66-37218

Frequency modulation in quartz oscillators, deriving nonlinear distortion and frequency deviation factors and analyzing effect of destabilizing factors 20 p3516 A66-37383

Medium frequency, FM, VHF and UHF TV broadcasting and receiving antennas 20 p3530 A66-37717

Frequency manipulated signal spectrum for case of modulating function with arbitrary off-duty factor 20 p3518 A66-37870

Stationarity conditions for FM oscillations with noise-modulated frequency 20 p3519 A66-38003

FM data systems noting design, error analysis, applications to data recording and transmission, etc 21 p3708 A66-39478

Single-sideband FM for data transmission on vibration and acoustic measurements, noting SNR performance, transmission link, etc 21 p3706 A66-39479

Space vehicle telemetric data transmission by FM, PCM, frequency multiplex, etc 21 p3717 A66-39633

Light absorption by optically pumped atoms undergoing magnetic resonance, noting modulation amplitudes and

modulation frequency limitation for primary interaction 22 p3930 A66-39807

Distortion of FM signals after being processed through time-invariant channels with nonlinear phase characteristic and fluctuating amplitude function 22 p3864 A66-40061

Laboratory environment simulation of multipath propagation interference effects on low channel capacity FM systems 22 p3865 A66-40066

Steady state modulation by given frequency external signal of electron flow through straight waveguide, determining relation of counterradiation phase and amplitude to system parameters 22 p3878 A66-40574

Pulsed compression network for linear FM signals using short circuited delay line and with sweep frequency corresponding to output response peak 23 p4034 A66-41020

Adjustable time domain equalizer for reduction of distortion caused by paired echoes in pulse compression radar system 23 p4034 A66-41021

Error probability in PCM/FM with phase-locked loop discriminators, noting role of input SNR 23 p4037 A66-41326

Ballistic range blast-traversal testing technique using scale models containing fast response FM telemetry system modulated by capacitance type pressure transducer [AIAA PAPER 66-777] 23 p4053 A66-41333

Simultaneous FM telemetry measurement of four aerodynamic forces acting on free flying models in wind tunnel 24 p4209 A66-42190

Phase-lock servo-loop circuit for space communication providing estimate of incoming signal through correlation process 24 p4175 A66-42820

Square-law detection system for multiple FM signals with noise 24 p4175 A66-42963

**FREQUENCY MODULATION**

**PHOTOMULTIPLIER**

Traveling wave HF crossed field photomultiplier with helical output circuit for electron multiplication at microwave modulation rates 24 p4182 A66-42561

**FREQUENCY MULTIPLIER**

Frequency multiplication mechanism using microwave gas discharge of air, argon or neon 01 p0029 A66-10583

Increased efficiency and power-handling capability of high order idlerless frequency multipliers by using hyperabrupt varactors 02 p0195 A66-11363

Widening of frequency bands of frequency multipliers and dividers by shifting spectra to higher ranges 02 p0206 A66-12273

Two-cavity klystron frequency multiplier for generating waves less than 1 mm 03 p0342 A66-12881

Harmonics in cylindrical electron beams traveling in circular drift tube and velocity modulated by gridless buncher gap 04 p0491 A66-13420

CW klystron frequency multiplier for generating submillimeter waves 04 p0492 A66-13422

Varactors for frequency multiplication 05 p0649 A66-15363

Measurement results on frequency doublers in millimeter wave region, using unencapsulated silicon varactor diodes and gallium arsenide/ phosphor bronze point contact varactor 08 p1198 A66-19747

Gallium arsenide phosphide heterojunction diode used to triple from X band to Ka band 09 p1350 A66-19922

Pulse repetition rate of magnetic pulse generators increased by transforming generator power supply frequency, using static frequency multipliers 09 p1352 A66-20307

Strip transmission line for microwave circuit design such as varactor multiplier frequency sources, filters, multiple pole diode switches, etc 09 p1356 A66-20672

Three-centimeter wavelength frequency multiplier using gas-discharge plasma in nonuniform electric field, examining amplitude and phase instability 09 p1358 A66-20795

Step-recovery diode multiplier circuit for high-order harmonic generation 09 p1359 A66-20919

Signal to noise ratio at output of

frequency doubler performing nonlinear transformation by quadrature circuit 10 p1510 A66-21670

High-efficiency microwave frequency doublers using varactor diode design by technique based on Manley and Rowe energy relations 10 p1512 A66-21763

Transient behavior of varactor bridge doubler examined, using direct digital integration of circuit equations 10 p1513 A66-21859

Frequency multiplication circuits, examining effects of short-term stability on oscillator system 10 p1514 A66-22044

Effect of amplitude noise or spurious signals in varactor frequency multiplier 11 p1661 A66-22383

High-ratio multipliers and tunnel diode generators as solid state microwave sources considered in analysis of varactor circuits 11 p1670 A66-23196

Widening of frequency bands of frequency multipliers and dividers by shifting spectra to higher ranges 12 p1831 A66-23875

Broadband X to K band varactor frequency doubler, noting efficiency increase by replacing variable resistance element with varactor 12 p1832 A66-23908

Nonlinear systems including oscillators, frequency multipliers, limiters, etc, driven by periodic carrier, deriving circuit theory for small perturbations propagated throughout system 12 p1848 A66-24136

Output signal of harmonic generator with noise sources in circuit, using perturbation analysis and assuming noise effect on signal in transducer is band-limited 12 p1835 A66-24137

Additive phase noise measurement in step-recovery-diode in frequency multiplier compared to ideal multiplier 12 p1835 A66-24141

Step-recovery diode in shunt configuration as frequency multiplier 13 p2030 A66-25215

Varactor diode as frequency multiplication element, discussing design parameters and noise characteristics 13 p2039 A66-25699

Multiplier with varactor diode circuit examined, noting maximum obtainable conversion output power and efficiency 13 p2041 A66-25879

Light frequency multipliers for nonlinear optical effects at various wavelengths, considering focusing, laser beam finite divergence, air breakdown, stimulated Raman emission, etc 13 p2096 A66-26146

Modified series model for abrupt-junction varactor diode used as harmonic frequency doubler 14 p2257 A66-27952

Exact circuit analysis of abrupt-junction varactor diode frequency doubler 14 p2268 A66-27957

Dimensioning varactor diode frequency multipliers used in HF transmitters 14 p2259 A66-28113

Directivity diagram of N-antenna radio interferometer when interferometer is in frequency-multiplication regime, noting role of SNR 15 p2449 A66-28640

Developments in varactor technology, noting large-area step-recovery varactor with nearly twice power-handling capacity of step junction devices 15 p2457 A66-28654

Equivalent circuit evaluation of theoretical potential and limitations of millimeter wave semiconductor diode detectors, mixers and frequency multipliers 15 p2461 A66-29015

Gallium arsenide varactor diode design for parametric amplifiers and multipliers, noting efficient harmonic generation at higher microwave frequency 15 p2466 A66-29677

Varactor frequency doubler response to amplitude and phase modulated signals 17 p2878 A66-31811

Design of adaptive systems with forced oscillations, using correlation and filter methods 17 p2902 A66-32573

Series connection of varactor wafers for higher breakdown voltages without loss of cut-off frequency, noting power output 17 p2867 A66-32698

Broadband semiconductor diode frequency multipliers, examining performance, noise theory, realization and frequency multiplication mechanism 17 p2890 A66-32904

Varactor diode harmonic generators for S-band with VHF input and microwave output 17 p2892 A66-32916

Signal analysis of abrupt and graded junction varactor harmonic generators with idlers, showing how load and source resistances may be optimized 17 p2893 A66-32922

X-band solid state source using chain of frequency multiplier stages and driven by transistor crystal controlled driver unit 17 p2893 A66-32923

Signal to noise ratio in frequency multipliers with varactor diodes, noting relaxation oscillation type instability and techniques for minimizing noise effect on signal 17 p2894 A66-32988

Phase-jitter spectrum of oscillators and frequency multipliers, noting additive nature of output 17 p2894 A66-33111

Iterative solution of large signal abrupt junction varactor doubler as input frequency is varied, given power of source and load impedance 17 p2895 A66-33276

Broadband semiconductor diode frequency multipliers, examining performance, noise theory, realization and frequency multiplication mechanism 18 p3075 A66-33564

Signal analysis of abrupt and graded junction varactor harmonic generators with idlers, showing how load and source resistances may be optimized 20 p3531 A66-37831

Frequency multiplication using diffusion capacitance with derivation of efficiency expression 20 p3519 A66-38001

Possibility of realization of multicascade tunnel diode frequency doublers without intercascade amplification 20 p3533 A66-38009

Varactor frequency multipliers, discussing application in low-power ultra-short-wave devices in moving objects for communication purposes 21 p3709 A66-38623

J-band multiplier design noting extension of frequency coverage, components, noise performance, frequency stability, tuning range, etc 21 p3711 A66-38837

Multiplier with nonlinear capacitance and resistance showing improvement in conversion efficiency, allowable input power and converted output power 21 p3712 A66-39227

Solid state frequency multipliers for LEM landing and rendezvous 21 p3715 A66-39525

Three-centimeter wavelength frequency multiplier using gas-discharge plasma in nonuniform electric field, examining amplitude and phase instability 22 p3874 A66-39852

Four-layer p-n-p-n diodes having two separate capacitance modes enables use as controlled element in frequency keying circuits 22 p3875 A66-40074

Overlay transistors at microwave frequencies for amplifiers, oscillators, etc, used in telemetry 22 p3879 A66-40722

High power microwave frequency multiplier matching very low varactor impedances 22 p3879 A66-40723

Microwave solid state multiplier for space use noting temperature variations, vibration-induced noise, outgassing, etc 22 p3879 A66-40724

AC background in phase of output oscillation of multistage frequency multipliers attributed to presence of HF harmonics in automatic bias circuit 23 p4038 A66-41520

# FREQUENCY RANGE

Data control constant-bandwidth frequency system and tricom system discussed as examples of better methods of taking advantage of communication frequency spectrum 04 p0480 A66-13727

Measurement of small coefficients of nonlinear distortions from ratio between effective voltages of first harmonic and total signal 04 p0497 A66-13916

Practical technique for performing transformations between time and frequency domains applied to synthesis of four-terminal RLC networks 05 p0657 A66-14995

Frequency range of more than 60 gc obtained by introducing microwave absorber into last stage of multishaft absorber, improving reflection coefficient 05 p0648 A66-15029

Frequency dependence of dynamic properties of semiconductor small area ohmic contacts in volt-ampere characteristic regions when constant current and

sinusoidal pulses are applied 06 p0833 A66-15893

Received field strength dependence on maximum and minimum usable carrier frequency range for ionospheric scattering 06 p0836 A66-17034

Dynamic flexural rigidity of polymer plates, measuring elastic modulus, noting variation of Youngs modulus, Poisson ratio with temperature and rate of loading 09 p1466 A66-20183

Probability of signal acquisition by phase-locked oscillator system operating in frequency search mode, determining maximum admissible search rate without noise 09 p1345 A66-20443

Short-wave frequency range spacecraft communications, discussing Earth signal reception, signal trajectories from orbits above and below F-2 layer, etc 09 p1348 A66-21013

P-i-n diode modulators for K and Q frequency bands, extending operation from 18 to 40 gc 10 p1513 A66-21856

Atomic frequency standard fluctuation, instability due to noise and atomic beam frequency stability 12 p1881 A66-24125

Statistical analysis of circuit noise effect on oscillators according to perturbation theory, discussing power spectrum, power and signal phase spectral densities, frequency stability, etc 12 p1834 A66-24127

Cross correlation measurements of oscillator frequency stability and thermal noise and application to atomic hydrogen maser 12 p1835 A66-24128

Dependence of beat frequency of neodymium laser axial modes on distance between mirrors and neodymium rod position within resonator 12 p1891 A66-24881

Direct-coupled multistage integrated amplifier design for optimum performance under arbitrary cascade configuration, noting power gain and frequency range 13 p2040 A66-25831

Parameter indeterminacy in system identification for mathematical model with adjustable parameters matched to system output by feedback 13 p2054 A66-26091

Junction filters for eight channels in SHF range with provision for 1800 paths, noting bandpass width signal mixing for antenna feed, attenuation, capability, etc 14 p2252 A66-27351

Circuits incorporating varactor diodes, pumped at IF, as mixers, analyzing circuit characteristics 14 p2236 A66-27352

Orthotropic-elasticity solutions applied to wave propagation in infinite cylindrical shell, obtaining asymptotic solutions for HF range 14 p2400 A66-27662

High impedances obtained over wide frequency range with bipolar or unipolar transistors, noting current multiplication, bootstrapping, etc, and FET 14 p2262 A66-28377

Waveguide system using Chebyshev filters for channel separation in wide frequency ranges, applied for sounding plasmas with various electron concentrations 14 p2298 A66-28473

Response of aerospace structures to in-flight dynamic loads in HF range 16 p2813 A66-30446

Ten-inch stroke electrodynamic thruster, noting modifications in armature guidance, base, rotation system, trunnion lifting mechanism, etc 16 p2678 A66-30464

Vibration equipment, discussing armature and control oscillator 16 p2679 A66-30474

Dual polarized high-power synthetic conical scan tracking system at various frequency ranges for parabolic reflector used in communication link 16 p2650 A66-30552

Wind velocity spectra and correlation functions statistically analyzed in ULF range for lowest levels of atmosphere 16 p2742 A66-30773

Transistorized wideband and pulse type amplifiers for nanosecond frequency range 16 p2664 A66-31357

Noise behavior of X-band microwave mixer over range of intermediate frequencies and local oscillator powers, noting variation of mixer conversion gain, etc 17 p2892 A66-32920

Coupling coefficient between TE 11 and TM 11 mode in tapered circular waveguides,

noting behavior near cut-off frequency 17 p2895 A66-33275  
 Frequency spectrum of continuous thermal radiation emission of plasma layer 17 p2974 A66-33285  
 Transformation coefficient and secondary radiation pattern when doubling frequency of focused coherent light beam in approximation of given primary-beam field 20 p3576 A66-37145  
 Measurement of small coefficients of nonlinear distortions from ratio between effective voltages of first harmonic and total signal 20 p3532 A66-37874  
 Flux trapping of RF fields in superconductors from measurements on superconductive resonant circuits in frequency range of 10-1000 mc 21 p3796 A66-38555  
 Data statistical analysis of solar radio bursts over wide frequency range and relation to solar flares 21 p3815 A66-39372  
 Dependence of beat frequency of neodymium laser axial modes on distance between mirrors and neodymium rod position within resonator 23 p4076 A66-41088  
 Viscoelastic properties of liquids under steady flow determined experimentally in frequency range 5-75 mc/s, using internal reflection of pulse of shear wave at surface of fused quartz bar 23 p4066 A66-41159  
 Electrical properties and fabrication of zinc oxide-bismuth oxide low Q capacitor with high apparent dielectric constant over wide frequency range 24 p4180 A66-42311  
 Elimination of singularity in power radiated by point electric dipole in unbounded magnetoplasma within certain frequency range 24 p4241 A66-42373

**FREQUENCY REGULATOR**  
 Seven-stage RL feedback amplifier with 500-mc low-pass bandwidth and 52 db gain, employing frequency compensation technique 11 p1671 A66-23244  
 Coherent laser-type light generators with capability of adjusting frequency over visible spectrum 19 p3375 A66-36265  
 Synthesis of constant or time-varying linear feedback control laws for application in multiple input systems with frequency symmetry 20 p3645 A66-36864

**FREQUENCY RESPONSE**  
 Graphical method for determining closed-loop frequency response of nonlinear feedback control systems 03 p0349 A66-13021  
 Wind tunnel technique for measuring frequency response of flexible airplane to vertical sinusoidal gusts [AIAA PAPER 65-787] 03 p0438 A66-13071  
 Operational amplifier design using normal feedback equations with grounded output voltage for input, discussing frequency response and determination of open-loop gain magnitude 03 p0351 A66-13276  
 Parametric response of elastic clamped-free column, noting agreement between theory and experiments for first three spatial and first four temporal modes 04 p0594 A66-14391  
 Instability of tunnel diode frequency converter, discussing effects of temperature and instability 04 p0501 A66-14411  
 Frequency response function of lightly damped single-degree of freedom system estimated from truncated measurement of cross-correlation function of white noise excitation and response 05 p0781 A66-15788  
 Approximate methods for plotting logarithmic frequency responses of discrete systems with and without time lag, noting PAM systems 07 p1012 A66-17382  
 General performance indices for time and frequency response for free motion of linear discrete control systems 07 p1016 A66-18280  
 Loading frequency effects on fatigue strength of 45 and E1612 steel specimens at room temperature 07 p1147 A66-18385  
 Self-consistent-field type perturbation theory for stationary and homogeneous turbulence to determine energy spectrum and response frequencies 08 p1204 A66-18531  
 Root hodograph method for determining amplitude and phase frequency characteristics of dynamic linear systems 08 p1202 A66-19692  
 HF pulse decay in input of slightly detuned multistage synchronous single-circuit amplifier 08 p1198 A66-19737

Intrinsic noise effect on synchronization of self-excited oscillators, determining phase diffusion coefficient, frequency fluctuation spectra and spectral line 09 p1344 A66-20345  
 Weighting function and frequency response determination of linear system with N degrees of freedom, using convergent series solution 09 p1396 A66-20636  
 Circuit conveying continuously variable signals between points with large steady potential differences, having commercial resistors and capacitors and no RF coil 09 p1363 A66-20665  
 Laplace transform and analog computation applied to simulation of heat transfer between wall separated fluids, determining transfer functions and frequency responses 09 p1472 A66-20908  
 Hamel and Cypkin methods, used to determine free oscillation of plus-or-minus servomechanism, applied to transfer function of certain type 10 p1517 A66-21283  
 Spiking behavior of multimode ruby laser in spherical resonator, interpreting near-field patterns, frequency spectrum, etc 10 p1542 A66-21311  
 Resolving power and microphotometric granularity of IR films measured with resolvometer, noting dependence on frequency of incident light 10 p1534 A66-21332  
 Two-terminal current-controlled negative resistance devices examined, using equivalent circuit, noting stability criterion, frequency response, etc 10 p1513 A66-21860  
 Transient and frequency response of distributed resistance-conductance-capacitance network 11 p1675 A66-22389  
 Force and moment response of pneumatic tires undergoing nonstationary lateral motions, using motion equations [ASME PAPER 65-AV-2] 11 p1636 A66-22471  
 Distributed RC network synthesis, determining necessary and sufficient conditions for driving point impedance frequency response of transfer functions and Foster type 11 p1678 A66-23240  
 Surface roughness and tolerances in model scattering experiments, noting shape perturbation consequences, frequency characteristics wave behavior, etc 11 p1658 A66-23406  
 Forced oscillations of ferrite core circuit, showing phase characteristics and parameters of inductance and amplitude 12 p1958 A66-23725  
 Dynamic frequency response, noting measurement of phase and amplitude responses of active and passive devices under RF pulse conditions with very fast FM 12 p1879 A66-23814  
 Time resolution error of measured correlation function, based on frequency response of hot-film and hot-wire anemometer 12 p1880 A66-23847  
 Alteration of antenna spatial frequency response due to time constant of radiometer and scan velocity 12 p1837 A66-24311  
 Deviations from BCS behavior in temperature dependence of ultrasonic absorption in superconducting tin 13 p2158 A66-25056  
 Pulse forming networks whose step responses have ripples of equal height 13 p2029 A66-25205  
 Magnetic deflection for display systems offers improved design freedom and good frequency response 13 p2047 A66-25362  
 Differential amplifiers using common-collector, isolated and lateral complementary transistor structures, including frequency response, phase shift, etc 13 p2036 A66-25532  
 Unbounded isothermal atmosphere response to time harmonic point disturbances, exact solutions obtained for frequency ranges of acoustic waves, trapped oscillations and gravity 13 p2183 A66-25613  
 Fan-out filters giving flat response over broad bandwidths and minimization of variation of input impedance with frequency 14 p2249 A66-27106  
 Linearized motion equation of self-adaptive systems with stabilized frequency characteristics, considering effect of control and noise signals in basic control loop 14 p2265 A66-27525

HF transistor circuit design, noting effect of bias frequency and temperature on y and h parameters 14 p2261 A66-28368  
 HF amplifier design, using two-port theory, measurement of Si epitaxial mesa transistor y-parameters, discussing power gain, sensitivity and inherent stability 14 p2261 A66-28370  
 Modulus of loop-gain frequency responses and mean-square error in transistor operational amplifier 15 p2454 A66-28544  
 Frequency response of avalanche photodiodes, discussing multiplication ratio and extension of Townsend theory 15 p2458 A66-28888  
 Transfer function realization using R network and control source, noting constraints such as multiplicative factors, poles, boundary frequencies, etc 15 p2471 A66-29322  
 Output power frequency response of single mode helium neon laser, determining effect of atomic collisions on frequency responses of individual atoms 15 p2518 A66-29818  
 Transverse and axial magnetic field effects on gas lasers, deriving expression for atomic and macroscopic polarization, determining oscillation mode characteristics, frequency responses, etc 15 p2518 A66-29819  
 Mechanical shutter with time resolution 0.1 msec designed for spectroscopic observation of decaying plasmas 16 p2701 A66-30270  
 Forced aperiodic vibrations in idealized viscously damped system, subjected to parametric excitation by forcing function with uniformly accelerating frequency and constant displacement amplitude 16 p2678 A66-30468  
 International specification for shock pulse shapes and magnitudes, noting duration, tolerance, etc 16 p2712 A66-30470  
 Network analysis and amplitude frequency response characteristic of operational amplifier for DC analog computer 16 p2659 A66-30512  
 Physiological telemetry, using pulse duration approach for acceptable frequency response 16 p2642 A66-30544  
 Polarization characteristics of type IV solar radio bursts noting position, direction and frequency range 16 p2793 A66-30655  
 Pole-zero method to determine frequency response of second-order linear control systems with phase-advance signal shaping 16 p2671 A66-31157  
 Flowgraph techniques for closed systems, discussing properties, approximation methods, topology equation, frequency response constraints, oscillatory and stochastic processes, etc 17 p2898 A66-31957  
 Physical process effect on structure of F II regions, noting ionization, Lyman continuum spectral distribution and radiative transfer frequency dependence of absorptive processes 17 p3003 A66-32655  
 Simple diode parametric amplifier, discussing bandwidth and noise measurements, compensating circuits for gain-frequency response improvement 17 p2892 A66-32918  
 Parametric and tunnel diode amplifiers for radio astronomy, noting diode quality, operating frequency range, noise, temperatures, etc 17 p2892 A66-32919  
 Solid state microwave source for severe vibration environment and 20 mw of power, discussing circuit design, noise performance, frequency stability 17 p2893 A66-32922  
 Sonic boom measurement instrumentation, noting use of frequency response, vibration isolation, wind screening, etc 17 p2926 A66-33022  
 FM modulator with frequency response from DC to video while maintaining crystal stability, accommodating FM narrow-and wideband with single design 19 p3316 A66-35699  
 Sampling techniques for conversion of broadband signal into multiple narrow bandwidth and reconversion back to original signal 19 p3302 A66-35700  
 Normal modes and mode coefficients of lossless circular multimode waveguide determined from boundary conditions, noting frequency dependence of mode conversion 19 p3317 A66-35718  
 Resistance and frequency response range

of sheath surrounding electrostatic probe floating in tenuous plasma 19 p3357 A66-35808

Photographic process role in holography, noting relationship of exposure and transmittance by highly nonlinear inverse power law 19 p3357 A66-35815

Surface roughness effect on radar backscattering cross section of conducting spherical target examined by applying Kirchhoff method 19 p3304 A66-36407

Amplitude frequency response of blocked pneumatic lines used in fluidic systems, noting correlation to electric-pneumatic analogy prediction 19 p3372 A66-36684

Linear system with given structure identified from measured input and output time histories of frequency responses including curve-fitting, equation of motion and set of equations of motion methods 20 p3537 A66-36885

Analog computer method for reconstruction of data distorted by physical system response noise 20 p3627 A66-36888

Resistive effects in  $\gamma$ -type II superconductors near upper critical field examined, using Ginzburg-Landau equations 20 p3616 A66-37374

Phosphate glass effect on frequency behavior of n-inversion layers on silicon MOS diodes 20 p3529 A66-37545

Liquid instability of vibrating partially filled elastic tank, emphasizing resonant breathing mode and frequency response 20 p3672 A66-38153

Parameter change effect on feedback control system magnitudes directly measurable on step and frequency response diagram, including delay time, overshoot and passband 21 p3718 A66-38808

Electronic test method for determining ultrasonic transducer frequency response involving actual signal transmission and reception 21 p3738 A66-39151

Spectral response curves of superconducting point contacts, noting existence of frequency dependent Josephson current amplitudes peaking in vicinity of energy gap 21 p3803 A66-39262

Nonlinear automatic system with logical device analyzed in presence of external action, obtaining harmonic linearization coefficients 21 p3719 A66-39284

Dispersive network with attenuation equalizing network, weighting filter for control of output side lobe level with Gaussian shaped frequency response and matching system 23 p4034 A66-41016

Photodetectors capable of microwave modulation frequency response operating in visible or near IR portion of optical spectrum 24 p4212 A66-42808

Transistor parameters in integrated circuits including saturation resistance, voltage breakdown and frequency response and optimization of operation dependence on impurity concentration, geometry, etc 24 p4186 A66-43079

**FREQUENCY SCANNING**

Frequency sensor and roving notch filter for control system, discussing parasitic signals with time-varying frequencies 05 p0645 A66-14603

Properties of helical delay line used to feed frequency scanned X-band array, noting role of ball bearing inserted in helix 06 p0854 A66-16686

Frequency scanned antenna with dielectric loaded waveguide, discussing experimental results 20 p3531 A66-37729

Reception of signals reflected from ionosphere in vertical radar probing, examining frequency-difference combinations 22 p3869 A66-40780

Equations of motion of continuous single loop adaptive control system with scan modulated parameters, noting stability analysis method 24 p4188 A66-42479

**FREQUENCY SHIFT**

Linear accelerator for micrometeoroids operated in radially stable mode and variable frequency for hypervelocity impact studies 01 p0053 A66-10852

Real and theoretical accuracy of direction finding discussing phase, frequency and amplitude fluctuation of signal 04 p0544 A66-14412

Shifts in output frequency of cesium vapor

magnetometer due to temperature, light intensity and orientation, noting Zeeman component and geomagnetic field 05 p0678 A66-14968

Plasma conductivity measurement in terms of frequency shifts and Q-factor variation in RF oscillatory circuit produced by presence of plasma sample in induction coil 08 p1264 A66-19190

Raman laser materials selection, emphasizing frequency shifts and excitation power threshold 11 p1721 A66-23477

Frequency shift in resonance transition induced in potassium vapor by ruby laser pulse 13 p2089 A66-25103

Small frequency shift measurement method for X-band plasma-loaded cavities 13 p2084 A66-26562

Atmospheric noise FSK error probabilities for envelope detection receiver 14 p2243 A66-28352

Measurement of single line in P branch of carbon dioxide vibro-rotational absorption band using tuned optical maser spectroscopy, noting presence of shifted frequencies 15 p2512 A66-28691

Frequency shift in resonance transition induced in potassium vapor by ruby laser pulse 16 p2717 A66-30282

Tuning of ammonia beam maser resonator based on frequency shift method, noting hysteresis appearance and elimination 16 p2720 A66-31696

Frequency variation of ionospherically propagated radio waves by spectrum analysis of received signal 17 p2874 A66-32384

Automatic failure detection, location and correction system for failures in unmanned spacecraft using frequency-shift-keyed subcarrier 19 p3316 A66-35679

Nonstationary flicker-type frequency fluctuations effect on form and width of spectral line 20 p3513 A66-37153

Microwave emission frequency shift during uniaxial stress on Si epitaxial planar and diffused mesa type diodes 23 p4044 A66-41299

Pressure- and gain-dependent frequency shift measurements in stabilized 6328 angstrom He-Ne laser 24 p4224 A66-42803

**FREQUENCY-SHIFT KEYING**

Atmospheric noise effect on performance of noncoherent frequency shift keying /NCFSK/ under fading conditions compared with that obtained when noise is Gaussian 06 p0830 A66-16335

Nonorthogonal coding in communicating through dispersive or multipath fading channels for increased data rate without increased bandwidth 06 p0835 A66-16866

Radar observations of Venus in Soviet Union in June 1964 using frequency keying and linear frequency modulation techniques 07 p1134 A66-17619

Soviet radar observations of Venus in 1964 using frequency-shift keying and periodic linear FM of transmitter 09 p1452 A66-20123

Design of parallel frequency-shift keying system for use in multipath channels 10 p1504 A66-21661

Comparison of frequency shift keyed and phase shift keyed pulse compression systems via digital computer simulation 12 p1819 A66-24602

Upper and lower bounds on binary error probability as function of signal to noise ratio for digital data systems operating over complex Gaussian fading channel 21 p3720 A66-39638

**FREQUENCY STANDARD**

Flying clock experiment with traveling cesium beam clocks 11 p1703 A66-22251

History and development of atomic frequency standard, discussing newest atomic oscillators 12 p1880 A66-24122

Frequency fluctuations in frequency standards, analyzing noise and finite observation time effects and atomic standard characteristics, using servocontrolled oscillator 12 p1881 A66-24123

Optically pumped rubidium 87 maser oscillator 12 p1890 A66-24124

Atomic frequency standard fluctuation, instability due to noise and atomic beam frequency stability 12 p1881 A66-24125

Quartz crystal oscillators and effect on precise time measurements by atomic clocks 12 p1881 A66-24129

Statistical analysis of noise quality of atomic frequency standards including masers 12 p1881 A66-24130

Cesium beam atomic time and frequency standards 13 p2079 A66-25874

Atomic standards of frequency and second of ephemeris time, discussing frequency of Cs 133 transition at zero field 14 p2296 A66-27899

Atomic and molecular frequency standards, considering use of cesium 17 p2927 A66-33244

Frequency comparison by beat-frequency comparators, harmonic generators and permanent phase observation devices 17 p2927 A66-33245

Atomic clocks, frequency standards of atomic beam resonators, masers and gas cells and application to space research 18 p3110 A66-33982

Accelerometer standard designed for reciprocity and comparison calibrations of vibration transducers 18 p3112 A66-34207

Frequency standard system using quartz servo-oscillators for design and testing of high-stability frequency sources 18 p3087 A66-34705

Atomic time standards, describing cesium beam standard, ammonia maser and gas-cell type clocks 19 p3354 A66-35468

Atomic clocks and synchronization for space research 22 p3920 A66-40794

**FREQUENCY SYNCHRONIZATION**

Frequency synchronization of Gunn effect oscillators, frequency locking subharmonic generation, passive frequency stabilization, etc 10 p1516 A66-22095

Frequency stability and spectral purity of p-n junction laser output improved by synchronization with gas laser beam 15 p2518 A66-29717

Receiver design and results of dual VLF transmissions for obtaining timing information 19 p3357 A66-35693

Wave synchronization in gas laser with ring resonator cavity 21 p3748 A66-39301

Synchronized shadow photochronographic investigation of wire explosion shock waves in air 21 p3772 A66-39302

Photographic integration process using Loran-C pulses for precise synchronization of timing signals at any point in continental U.S. 22 p3862 A66-39733

**FREQUENCY SYNTHESIS**

Applications of microelectronics - IEE Symposium, Southampton University, England, September 1965 02 p0201 A66-11914

Frequency synthesizer producing or deriving any required channel frequency from small number of crystal references 02 p0203 A66-11927

LF transfer functions synthesized with microelectronic circuits 05 p0644 A66-14575

Design of variable structure automatic control system frequency characteristics, using harmonic linearization 11 p1677 A66-22763

Errors by mutual interference in frequency-time coding in satellite communications systems, deriving expressions relating commissive and omissive error rates, simultaneous users per unit bandwidth, etc 12 p1821 A66-24752

Aperture synthesis technique for increasing information rate to radio astronomy array by rejecting restriction of fractional bandwidths 13 p2037 A66-25553

Mixer cross products of mixer frequency charts to determine spurious responses with respect to desired output frequency 13 p2040 A66-25825

Tunable precision frequency source using phase locked variable frequency oscillator for mobile radio sets 15 p2451 A66-29313

High speed microwave frequency synthesizer with digital control 17 p2897 A66-33438

Higher harmonics generation of ion cyclotron frequency in longitudinally magnetized plasmas, noting experimental setup and pressure effects 21 p3777 A66-38766

**FREQUENCY TRANSLATION SYSTEM**

Serrodyne system using either TWT or solid state phase shift for frequency translation 01 p0044 A66-10933

Communications satellite transponder discussing system requirements for RF

conversion and amplification 04 p0492 A66-13595

Computer analysis of translators using diode ring modulators and dimensioning of frequency dependent networks preceding and following modulating four-pole to obtain specific response in passband, minimizing spurious signal effect 11 p1670 A66-23197

YIG magnetostatic mode serrodyne capable of milliwatt modulation power levels through 30 mc/s 15 p2463 A66-29029

Receiving and predetection recording system with frequency translation and wideband FM for Atlantic Missile Range 16 p2648 A66-30536

Device for frequency translations in microwave range employing latching ferrite phase shifter and digital switching driver to obtain multiple step approximation 19 p3314 A66-35520

**FRESNEL DIFFRACTION**

Fresnel diffraction laws for calculation of light amplitude distribution in image spot of point as function of aperture dimensions used on hologram, source function, etc 04 p0532 A66-14173

Hologram imaging process in which Fresnel diffraction pattern of object is recorded by scanning at X-band 06 p0881 A66-16638

Image luminance of paraxial rays, image formation and ray tracing in holography, using Fresnel-Kirchhoff diffraction formula 15 p2501 A66-28975

Near-field diffraction of helium-neon laser at circular apertures 16 p2720 A66-31727

EAS RF emission detection, discussing enhanced Cerenkov radiation, mutual coherence effects, diffraction, Fresnel zones, Coulomb-field bremsstrahlung, etc 18 p3208 A66-35117

Power transmission, gain, directivity pattern and reception between large aperture antennas in near-field region 20 p3529 A66-37709

**FRESNEL INTEGRAL**

Fresnel formulas for transformation of transverse electromagnetic wave into longitudinal plasma wave at dielectric-plasma interface, using Laplace transforms 22 p3869 A66-40929

**FRESNEL REFLECTOR**

Ground reflection effect on polarization of radiation scattered from top of Rayleigh atmosphere, using Fresnel and Lambert models [AIAA PAPER 66-514] 16 p2699 A66-31498

Modification to theory of differential absorption experiment involving Fresnel reflection coefficient of ionospheric irregularities 20 p3555 A66-38209

Passage of normal plane electromagnetic wave through bi-gyrotropic plate, examining transmission and reflection components 22 p3862 A66-39828

Optical thickness measurement of nonabsorbing dielectric film when it is inconvenient to apply overlay film to measure thickness by Fizeau fringe shift 22 p3968 A66-40889

**FRESNEL REGION**

Path-loss equation derived for two parabolic antennas with aperture illumination of form of second-order exponential function 03 p0336 A66-13101

Fresnel gain of aperture antenna, developing rigorous analytical formula for circular aperture antennas with parabolic tapered illumination 05 p0651 A66-15837

Engineering method of calculating Fresnel coefficients based on use of nomograms 08 p1182 A66-18917

Antenna field calculations in Fresnel and induction regions 09 p1356 A66-20772

Range requirements in radar cross section measurements in terms of permissible variations in amplitude and phase of incident field at target 10 p1498 A66-21601

Fresnel and Fraunhofer patterns of overmoded feeds and reflector antennas 12 p1841 A66-24632

Fresnel zone beam scanning antenna array, considering patterns, maximum scan ability and effect of interelement spacing 12 p1841 A66-24633

Diffraction pattern analysis of fields generated by hoghorn-fed Cassegrain antenna operating in Fresnel zone 18 p3083 A66-34289

Antenna field calculations in Fresnel and induction regions 22 p3873 A66-39831

Soret Zone Plate simulation by longitudinally distributed coaxial aperture system, noting system activation and operation 23 p4068 A66-41622

**FRETTING**

Wear and grease lubrication effects in matched aircraft spline specimens subjected to oscillatory motion 16 p2713 A66-30572

Surface shear traction and torsional compliance of elastic plate pressed between identical elastic spheres 18 p3249 A66-33586

**FRETTING CORROSION**

**SA WEAR**

Detection and causes of fretting corrosion, discussing prevention via lubrication, effects of load, surface finish, material hardness, friction coefficient, vibration, etc 18 p3117 A66-34400

Molybdenum bisulfide as lubricant in aircraft construction to combat fretting corrosion, facilitate assembly and dismantling of parts and reduce frequency of maintenance 23 p4074 A66-41658

**FRICITION**

**SA ABRASION**

**SA DRY FRICTION**

**SA INTERNAL FRICTION**

**SA KINETIC FRICTION**

**SA SKIN FRICTION**

**SA SLIDING FRICTION**

**SA STATIC FRICTION**

**SA WEAR**

Friction welding technique using heat produced by friction between two surfaces 03 p0374 A66-13117

Book on friction and wear covering nature of interaction between solid surfaces, general concepts and engineering and design calculations 04 p0526 A66-13834

Friction corrosion caused by alternate pivoting of steel ball on plane of light alloy 14 p2302 A66-27934

Starting friction and kinetic friction of PTFE fabric-lined spherical bearings and deflection and permanent set under static loading 17 p2929 A66-31932

Quadratic and linear friction effects on time-weighted fuel-optimal singular control of nonlinear systems 19 p3338 A66-36744

Friction and imbalance moments relative to gimbal axes and effects on gyrovertical motion under starting conditions 21 p3739 A66-39325

Die friction effects on plane stress and plane strain in plastic bending of steel and titanium alloy beams 21 p3745 A66-39528

**FRICITION COEFFICIENT**

Friction induced vibration to determine existence of critical velocity of driven surface [ASME PAPER 65-LUB-5] 04 p0527 A66-14241

Frictional and viscoelastic properties of plastics and rubber show relationship to sliding speed and temperature [ASME PAPER 65-LUB-15] 04 p0528 A66-14247

Limiting relative laws of friction and heat transfer applicable to nonisothermal gas flow with finite Reynolds numbers 04 p0598 A66-14440

Heat transfer and wall friction for low velocity flow of gases in downstream region of smooth electrically heated tubes, considering transition region [ASME PAPER 65-WA/HT-18] 05 p0790 A66-15646

Friction corrections introduced in results obtained by differential pendulum method in measuring acceleration of gravity at sea, noting motion equations 06 p0879 A66-16418

Dependence of dry friction force for steady state rubbing of rubberlike body on surface of crystalline elastic body 08 p1244 A66-19474

Approximate solutions with error estimate for stationary boundary layer with desired distribution of pressure and mass transfer along wall 08 p1166 A66-19828

Friction of rotating disk in revolving housing, noting parameters of dimensionless momentum coefficient, separation of fluid flow into core and secondary flow 09 p1384 A66-20486

Optimum slender body with variable skin friction coefficient, noting minimal drag

design for hypersonic flow under Newtonian pressure distribution 11 p1631 A66-22513

Shape of nonslender body of revolution for minimum total drag in viscous hypersonic flow at Newtonian pressure distribution and constant friction coefficient 11 p1631 A66-22516

Transversal contour of minimum pressure drag for body with noncircular cross section 11 p1631 A66-22517

Transversal contour of minimum total drag of body in Newtonian flow 11 p1631 A66-22518

Friction and inertia fields induced by electromagnetic effects arising in motion of hard magnetic moment in thin circular film 11 p1753 A66-22808

Solid and dry-film lubricants, tabulating kinetic coefficients of friction, noting particle size, viscosity, costs, wear life, application, etc 12 p1885 A66-24099

Effect of crystalline state and structural orientation of polymer on endurance of couplings with polytetrafluoroethylene components, analyzing dry friction and wear on interfaces 13 p2113 A66-25912

Friction and lubrication of polymers 13 p2087 A66-26304

Lubrication characteristics of dry, unbonded and bonded molybdenum sulfide films for varying speed, load, humidity and metal substrate [ASLE PREPRINT 65AM 5C1] 14 p2302 A66-27773

Metal flow, friction and lubricant performance during stamping of thin titanium alloy blanks 14 p2304 A66-28202

Experimental friction and lubrication system parameters including load coefficient, oil volume, friction coefficient and bearing temperature characteristics, in mathematical terms 15 p2505 A66-28523

Heat transfer and wall friction for low velocity flow of gases in downstream region of smooth electrically heated tubes, considering transition region [ASME PAPER 65-WA/HT-18] 16 p2828 A66-30991

Nitrogen tetroxide dissociation effect on surface friction in turbulent boundary layer 16 p2686 A66-31064

Graphite lubricant physical and chemical combinations with other materials for improved high temperature friction and wear, discussing nuclear irradiation for graphite lattice modification 17 p2929 A66-31933

Lift-to-drag ratio attainable by slender, homothetic body at hypersonic speeds, assuming Newtonian pressure distribution and constant skin-friction coefficient 17 p2838 A66-32348

Velocity and temperature profiles, hydrodynamic elements, heat transfer and friction coefficients of turbulent incompressible flow through circular and flat tube 17 p2909 A66-32583

Detection and causes of fretting corrosion, discussing prevention via lubrication, effects of load, surface finish, material hardness, friction coefficient, vibration, etc 18 p3117 A66-34400

Parameter variation effect on self-excited torsional oscillations and sustained frictional vibrations in mechanical systems, comparing results with analog computer predictions 18 p3256 A66-34558

Skin friction coefficient predictions in turbulent compressible flow, using design nomograph based on Spaiding-Chi method 18 p3100 A66-34603

Temperature effect on dry friction coefficient in titanium alloys 19 p3376 A66-35462

Wind profiles obtained from meteorological tower plotting wind velocity, normalized by value of friction velocity, as function of measurement heights 21 p3759 A66-39356

Frictional resistance of finite disks and cones rotating in power law non-Newtonian fluids 21 p3730 A66-39456

Friction moment of rotating ellipsoids in infinite medium, calculating turbulent boundary layer for rotating sphere 21 p3731 A66-39500

Two-wedge system analyzed by Coulomb friction law and applied to simple screw and worm gears and screw

- combination 22 p3922 A66-39668  
Measuring wear life and friction coefficient of dry film and solid film lubricants and plastic materials in ultrahigh vacuum 22 p3923 A66-40216  
Carrying capacity and moment of friction calculated for cylindrical MHD bearing for small magnitude of radial clearance 23 p4074 A66-41736  
Approximation of self-similar plane and axisymmetric problems for high temperature laminar boundary layer, based on equations for boundary layer of finite thickness for high temperature gas 23 p4149 A66-41783  
Friction and turbulent heat transfer as function of Reynolds number applied to missile rounded-off forebody, delta wings, etc, using boundary layer equations 23 p4151 A66-42056
- FRICITION DRAG**  
SA SKIN FRICITION DRAG  
Friction-drag and heat-transfer coefficients of plate in turbulent gas flow, estimating effect of turbulent Prandtl number 06 p0872 A66-16469  
Minimization of total drag /pressure and friction/ of two-dimensional wing with unspecified chord, finding extremal solutions which include one, two or three subarcs 11 p1630 A66-22504  
Friction resistance of compressible turbulent gas flow through initial section of cooled pipe with large gas-wall temperature gradients 11 p1688 A66-22597  
Maximum friction along jet path in mixing zone at constant pressure applied in finding irrotational wall velocity 13 p2063 A66-25468  
Classical and quantum mechanical turbulence in Helium 2 heat flow, noting transition from laminar turbulent flow of normal and superfluid component, Reynolds number dependence on mutual friction coupling, etc 13 p2128 A66-26275  
Stationary viscous incompressible fluid flow past rough surface, noting solution stability and friction stress determination for given pressure gradient 16 p2688 A66-31301  
Frictional drag and convective heat transfer of rotating cones of arbitrary vertex angles in mixed and turbulent flow 17 p3038 A66-33469
- FRICITION-LOSS COEFFICIENT**  
Losses in vaneless diffusers of centrifugal compressors and pumps due to wall friction and sudden expansion mixing at entrance [ASME PAPER 65-FE-1] 10 p1540 A66-21504
- FRICITION MEASUREMENT**  
Characteristics of flexible circular plate, considering stress and strain in friction zone at clamped section 01 p0160 A66-11181  
Characteristics of partially clamped corrugated membrane, investigating effect of forces of clamping friction 01 p0160 A66-11182  
Sliding friction tests at ultrahigh load of eight greases and 18 dry lubricants and various base materials [ASLE PREPRINT 65-LC-23] 02 p0237 A66-12249  
Friction and wear of hexagonal metals and alloys as related to crystal structure and lattice parameters in vacuum [ASLE PREPRINT 65-LC-18] 02 p0237 A66-12252  
Internal friction measurements for studying mechanical properties due to crystal dislocations 05 p0698 A66-14550  
Measurement of friction of materials sliding in JP-4 fluid to predict performance of hydraulic pump 06 p0884 A66-16136  
MHD traveling wave converter, determining frictional fluid losses due to boundary flow and calculating performance 07 p0990 A66-17240  
Friction stresses in turbulent lubrication film and dependence on Reynolds number and pressure distribution studied, using mixing-length hypothesis [ASLE PREPRINT 65AM 3A1] 07 p1039 A66-18289  
Thermal elastohydrodynamic lubrication of rolling and sliding cylinders, noting correlation with film thickness and friction experimental data [ASLE PREPRINT 65AM 4A2] 07 p1040 A66-18291  
Heat exchange, friction and mass exchange in laminar multicomponent boundary layer during injection of extraneous gases 09 p1368 A66-20705  
Heat exchange, friction and mass exchange in laminar multicomponent boundary layer during injection of extraneous gases 11 p1688 A66-22591  
Operation, maintenance and installation of friction and nonfriction bearings, noting characteristics, problems, etc 11 p1711 A66-22951  
Liquid film flow stability, considering two-dimensional perturbations, hydrodynamic friction with allowance for finite curvature radius of bounding surface 12 p1864 A66-24435  
Test rig for gas-lubricated journal bearings measuring frictional torque, gas film pressure distribution, static and dynamic eccentricity changes, etc 12 p1859 A66-24929  
Surface roughness effect on boundary friction for various loads, speeds and lubricants [ASLE PREPRINT 65 AM 6AZ] 13 p2085 A66-25367  
Mechanism of plastic deformation in crystalline bodies, discussing static and dynamic frictional forces in relation to dislocation structure of bodies in contact 13 p2110 A66-25887  
Friction and wear of hexagonal metals and alloys as related to crystal structure and lattice parameters in vacuum [ASLE PREPRINT 65-LC-18] 16 p2713 A66-30568  
Sliding friction tests at ultrahigh load of eight greases and 18 dry lubricants and various base materials [ASLE PREPRINT 65-LC-23] 16 p2713 A66-30571  
Turbulent flow of dilute viscoelastic non-Newtonian fluids in pipes, noting frictional characteristics, elastic fluid parameters, etc 17 p2906 A66-32036  
Displacement detector to provide direct measurement of shear forces in aerodynamics on small surface elements in hotshot wind tunnels 24 p4207 A66-42169
- FRICITION REDUCTION**  
Operation, maintenance and installation of friction and nonfriction bearings, noting characteristics, problems, etc 11 p1711 A66-22951  
Aircraft vibration in transonic region caused by aileron oscillations, eliminated by friction dampers 12 p1801 A66-24035  
Structural changes in metal surface layers under boundary friction conditions in presence of surface active lubricant additives 13 p2086 A66-25884  
SNAP-8 reactor oscillating bearings to provide low friction self-lubrication at 1150 degrees F 16 p2712 A66-30414  
Reduction of friction forces in radial thrust bearings and three-point-contact bearings when compulsory oscillations of outer and inner races have same direction in both bearings 21 p3745 A66-39333
- FRICITIONLESS ENVIRONMENT**  
Low friction environment effects on maintenance operations in simulator noting torquing-force capability, hand-eye coordination, etc 02 p0186 A66-11645  
Low friction environment effects on maintenance operations in simulator noting torquing-force capability, hand-eye coordination, etc 18 p3061 A66-33821
- FRIEDEL-CRAFT REACTION**  
Friedel-Crafts methylation of decaborane, determining reactant parameters and relationship of decaborane conversion and alkylate composition 05 p0629 A66-14541
- FRINGE**  
Fringing effect on sensitivity of magnetic flow meter 17 p2926 A66-32874
- FROG**  
Gravitational environment, effect of change on frogs measured using gravitoceptors in vestibular apparatus 17 p2865 A66-32183
- FRONT**  
S FLAME FRONT  
S SHOCK FRONT  
S WAVE FRONT  
S WEATHER FRONT
- FROST**  
Heat and mass transfer rates compared with correlations for frost formation on vertical plate in free convection [ASME PAPER 65-HT-32] 04 p0595 A66-13391  
Carbon dioxide frost as thermal insulation for hypersonic spacecraft, noting conductivity 06 p0969 A66-16301  
IR spectral reflectance of water frost and solid carbon dioxide 15 p2501 A66-28977  
Martian wave of darkening attributed to soil frost phenomena 22 p3981 A66-40478
- FROUDE NUMBER**  
Acceleration potentials applied to motion, at arbitrary Froud numbers, of high-aspect-ratio wing immersed in incompressible ideal fluid 08 p1205 A66-18601  
Acceleration potential method for solving linear problems of wing hydrodynamics above interface between fluids differing in density, for arbitrary Froude number 13 p2067 A66-26530  
Two-layer model of pressure jump produced by mountains 22 p3944 A66-40966
- FROZEN FLOW**  
Isentropic expansion of argon plasma in Laval nozzle, discussing parallel flow parameters, frozen flow, thermodynamic equilibrium, energy balance, etc 05 p0720 A66-14509  
Stagnation point heat transfer for binary air diffusion model including dissociation and ionization 05 p0665 A66-15775  
Numerical calculations of axially symmetric two-dimensional steady expansions of monatomic gas, using approximate Boltzmann equation with Krook collision term 11 p1690 A66-22908  
Species diffusion in frozen hypersonic boundary layer with Falkner-Skan velocity profiles, where surface is linear, given as Mellin transform, constructing series and asymptotic expansion of surface concentration 13 p2060 A66-25158  
Transonic nonequilibrium approximations for reacting gas mixture flow 17 p2913 A66-33080
- FUEL**  
S AIRCRAFT FUEL  
S CARBON  
S CHEMICAL FUEL  
S ENDOTHERMIC FUEL  
S FLAME  
S HYDROCARBON FUEL  
S HYDROGEN FUEL  
S JET FUEL  
S KEROSENE  
S METAL FUEL  
S NUCLEAR FUEL  
S OIL  
S PROPELLANT  
S REACTOR FUEL
- FUEL-AIR RATIO**  
Impact-induced combustion in hypersonic ramjet engines, determining hypersonic fuel-air mixing from hydrogen concentration at Laval nozzle outlet 10 p1591 A66-21359  
JP-5 fuel-air mixture ignition by platinum catalytic igniters, using ramjet engine baffle combustors 13 p2171 A66-25594  
Two-phase self-ignition of isooctane-air mixture, considering preignition phase and temperature zones 13 p2209 A66-25695  
Spectral analysis of organic flames, noting band intensity variation of different radicals with air-fuel composition and influence of diluents 14 p2413 A66-27722  
Organic flame temperatures and burning velocities at various fuel-air ratios measured, noting band intensity, effect of diluents, etc 14 p2413 A66-27723  
Correlation study of turbojet afterburner combustion efficiency and fuel/air ratio setting for maximization of efficiency [WSCI 66-1] 18 p3164 A66-34423
- FUEL CELL**  
SA BIOCHEMICAL FUEL CELL  
SA REGENERATIVE FUEL CELL  
Cobalt electrode performance in high temperature fuel cells, presenting V-I characteristics 01 p0014 A66-10358  
Static moisture removal system developed for space power application from tests determining vapor-pressure characteristics of capillary fuel cell 01 p0012 A66-10912  
Platinum metal as electrocatalyst for oxidation of methanol and number of saturated hydrocarbons 02 p0188 A66-11870  
Hydrogen fuel cells for space use noting Bacon cells, membrane cells and Gemini and Apollo fuel cells 03 p0323 A66-12482  
Fuel cells and potential as future chemical-

electric energy converters 03 p0324 A66-13234

Electrochemical current generator principles based on oxyhydrogen fuel cell for space travel, stressing regeneration by using solar radiation in photochemistry 04 p0459 A66-13545

Fuel cell operation utilizing liquid fuels, evaluating hydrazine and alcohol fuels and electrode materials 04 p0459 A66-13546

Electrodialytical removal of reaction water from alkaline electrolyte of oxygen-hydrogen fuel cells 04 p0460 A66-14033

Gas permeation measurements on ion exchange fuel cell membranes using chromatography 05 p0611 A66-14539

Energy conversion and storage . Conference, Oklahoma State University, October 1965 06 p0808 A66-16390

Fuel cell systems, particularly hydrogen peroxide type, noting electrochemical oxidation, water production, thermal energy, electrolyte, etc 06 p0808 A66-16391

High-pressure high-temperature hydrogen-oxygen fuel cells employing nonnoble metal catalyst /porous nickel/ as electrode 06 p0808 A66-16392

Auxiliary power devices using solar, chemical and nuclear sources 07 p0992 A66-18305

Fuel cell development, detailing Gemini, Apollo and asbestos systems 07 p0995 A66-18324

Electrochemical energy conversion, discussing fuel selection, oxidants, fused salt electrolytes, liquid metal, etc 07 p0995 A66-18325

Heat and mass transfer in ion exchange membrane fuel cells 07 p0995 A66-18326

Introduction to fuel cells 07 p0995 A66-18467

Kinetic effects in fuel cells, discussing declining efficiency with increasing output, slow electron transfer effects, concentration polarization, etc 07 p0996 A66-18469

Kinetic effects in fuel cells, measuring rate of change of electrode process characteristics 07 p0996 A66-18470

Hydrogen-oxygen fuel cells, using ion exchange electrolytes 07 p0996 A66-18471

Electrolyte-soluble fuels such as methanol, ammonia and hydrazine, noting electrochemical oxidation properties, power output, stored energy content, etc 07 p0996 A66-18472

Fuel cells with molten carbonate electrolytes such as matrix cells and free and paste electrolyte cells, noting construction, operation, performance 07 p0996 A66-18473

Solid oxide electrolyte with hydrogen fuel, discussing cell thermodynamics, application limitations, etc 07 p0996 A66-18474

Fuel cells oxidizing saturated and unsaturated hydrocarbons at high temperatures 07 p0996 A66-18475

Fuel cell economics connected with vehicle applications as power sources 07 p0997 A66-18477

Fuel cell considered from viewpoint of fuel costs, noting hydrocarbon fuel for application with low load factor and instant starting 07 p0997 A66-18478

Electrode types used in low temperature fuel cells, considering porous gas-diffusion, pore-free palladium membrane and slurry electrodes 08 p1168 A66-19064

Hydrogen feeding through single-layer metallic porous electrode of fuel cell on open circuit 08 p1171 A66-19649

Hydrogen and oxygen ionization at three-phase boundary in alkaline solutions on smooth metals 08 p1171 A66-19650

Microporous metallic gas-diffusion electrodes in low temperature acid-electrolyte fuel cells 08 p1172 A66-19651

Cell voltages and Coulomb efficiency in oxygen electrodes and hydrogen and hydrazine fuel cells for long duration discharges 08 p1172 A66-19652

Low temperature low pressure hydrogen/oxygen alkaline fuel cell and electrode selection 08 p1172 A66-19653

Thermodynamic and kinetic effects of gas pressure on performance of fuel cell using one or two gas electrodes 08 p1172 A66-19654

Methanol-air fuel cell with alkaline electrolyte, Ni or Pt catalysts and carbon

diffusion electrode, for use in signaling devices 08 p1172 A66-19655

Fuel cells using metallic barium as fuel electrode and oxygen or chlorine as cathode, noting net energy densities 08 p1172 A66-19656

Geometrically ordered gas-diffusion electrodes for fuel cells consisting of platinum steel with funnel-shaped cavities 09 p1333 A66-20424

System selection for hydrogen-oxygen low temperature fuel cell with aqueous KOH electrolyte [AICE PREPRINT 13B] 10 p1484 A66-21182

Molten carbonate fuel cell module featuring flexibility of construction, electrical simplicity and effective gas distribution characteristics [AICE PREPRINT 20D] 10 p1484 A66-21187

Fuel cell systems operating at low temperatures, noting control loops, hydrogen/oxygen, nickel electrode, asbestos systems, etc [AICE PREPRINT 15D] 10 p1484 A66-21192

Hydrogen-oxygen fuel cell for spacecraft power system 10 p1485 A66-21465

Application perspectives for dissolved fuel cells, particularly methanol and hydrazine cells 11 p1639 A66-22242

Carbon deposition boundaries and other constant parameter curves in triangular representation of C-H-O equilibria, with application to fuel cells 11 p1639 A66-22243

Fuel cell development in U.S., Europe and Great Britain, noting design, performance and problems 11 p1639 A66-22247

Two-and three-phase boundary electrodes for fuel cells 13 p1997 A66-25113

Electrochemical kinetics of fuel cells - Conference, Moscow, 1964 13 p1998 A66-25667

Functional mechanism of gas diffusion electrode 13 p1998 A66-25668

Performance of porous gas diffusion electrode 13 p1999 A66-25669

Theory of gas porous electrode with model 13 p1999 A66-25670

Design of gaseous diffusion electrode 13 p1999 A66-25671

Performance of wetted porous electrodes with reactant feed by diffusion 13 p1999 A66-25672

Operation of porous electrodes where reactant is fed in and reaction product is removed by forced stream of electrolyte, reactant and product mixture 13 p1999 A66-25673

Electro-oxidation of organic materials capable of functioning as fuel in fuel cells 13 p2017 A66-25674

Capillary equilibrium in gaseous porous electrode 13 p1999 A66-25677

Fuel cells compared with other power systems for space application [AIAA PAPER 64-723] 13 p2005 A66-26618

Engineering problems in design of fuel cell systems including complicated duty cycles, response time, high power density and efficiency [AIAA PAPER 64-743] 13 p2007 A66-26645

Hydrocarbon-air fuel cell power source using reformer to supply hydrogen and producing net output of 5 kw at 110 v and 60 cps [AIAA PAPER 64-745] 13 p2007 A66-26646

Fuel cell reliability maximized and weight minimized for space mission power requirement [AIAA PAPER 64-746] 13 p2007 A66-26647

Molten carbonate fuel cell system performance evaluated from engineering and economic aspects [AIAA PAPER 64-747] 13 p2007 A66-26648

Fuel cell power plant for Apollo command and service module from engineering viewpoint [AIAA PAPER 64-748] 13 p2007 A66-26649

Increasing solubility of hydrocarbons in cesium-salt fuel cell electrolyte by replacing some of carbonate anion by flouride 14 p2226 A66-27898

Hydrocarbon fuel cell anodes containing boron carbide as support for platinum electrocatalyst 14 p2226 A66-27902

Boron carbide as potential substitute for platinum as catalyst for fuel cell cathodes 14 p2227 A66-28174

Performance analysis of carbon-supported platinum-ruthenium alloy catalysts with

respect to anodic oxidation of methanol in acid electrolyte 17 p2870 A66-31898

Fuel cell systems for generating electricity 17 p2849 A66-33173

Electrical energy by direct conversion, noting fuel cell, thermoelectric generator, solar cell, etc 18 p3053 A66-33722

Direct and indirect oxidation fuel cell systems operating on hydrocarbon-air mixtures and using aqueous, molten and solid electrolytes, noting technological and economical problems 18 p3053 A66-33766

Book on direct energy conversion covering thermoelectric, photovoltaic, thermionic and MHD generators and fuel cell 18 p3054 A66-34164

Temperature profile and design parameters in adiabatic fuel cell with stationary electrolyte where cooling takes place by convection and conduction 18 p3263 A66-34386

Advantages and disadvantages of liquid fuels and oxidizers for direct fuel cells and electrode manufacturing techniques, noting role of nitric acid, methanol and hydrazine 18 p3056 A66-35239

Digital computer optimization program, determining minimum weight fuel cell primary power system for MOLAB 20 p3496 A66-37156

Effect of variations in mission and vehicle constraints on hydrogen-oxygen fuel cell system optimization 20 p3497 A66-37160

Fuel cell power conversion by AC link type static inverter 20 p3498 A66-37173

Lithium chloride power plant theory and technology, noting application to critical weapons systems 23 p4021 A66-41758

Primary electrochemical power systems including gas recombination devices, sterilizable battery, fuel cells, alcohol-air units, etc 23 p4023 A66-41768

Performance characteristics of sintered plate nickel-cadmium, silver-cadmium and silver-zinc batteries regarding energy output, discharge voltage, charging cycle life, etc 23 p4023 A66-41769

Oxygen electrolytic reduction using porous sintered silver electrode, noting effects of gas pressure, current and cathode thickness on potential as applied to fuel cells 24 p4161 A66-42333

Oxygen reduction on titanium nitride noting rate of electrochemical oxidation in fuel cell studies 24 p4170 A66-42422

Methanol-air fuel cells as long-life sources of energy for lighted buoys, TV stations, meteorological stations, etc 24 p4161 A66-42501

Mixing of gases in hydrogen-oxygen fuel cell, noting membrane allowing only electrolyte to pass through electrodes 24 p4161 A66-42502

Fuel cells with ceramic electrolyte operating at high temperatures, calculating voltage and efficiency 24 p4161 A66-42503

### FUEL COMBUSTION

#### SA METAL COMBUSTION

Steady state flame propagation regimes, taking into account effect of heat losses through pipe walls on fuel mixture combustion 02 p0302 A66-11401

Detonation theory of heterogeneous fuel mixture 02 p0217 A66-11402

Chemical kinetics of nonequilibrium combustion of propane-air and ethane-air mixtures in one-dimensional flow, including ignition delay and reaction time [CI PAPER WSCI-65-19] 05 p0788 A66-15143

Burning modes in initially unmixed reactants, describing stagnation region formation by interaction of opposed flows of fuel and oxidant [AIAA PAPER 66-71] 06 p0969 A66-16258

Mixing processes for isothermal and nonisothermal simulation of flows in combustion chambers 13 p2210 A66-26490

Spectral analysis of organic flames, noting band intensity variation of different radicals with air-fuel composition and influence of diluents 14 p2413 A66-27722

Automatic ignition in methane-chlorine mixture, investigating photochemical and thermal chlorination of methane in gas phase 17 p2989 A66-32824

Pressure dependence of burning rate of stoichiometric fuel-oxidizer mixtures 17 p3036 A66-32825

- Diffusion combustion in turbulent compressible gas flow 17 p3036 A66-32827
- Heat transfer caused by combustion of triethylaluminum on flat plate in Mach 3 flow, noting significance of lag at stagnation pressure 18 p3260 A66-33817
- Bench-top calorimeter for determining radiation and convection in small-scale combustion of fuel [WSCJ 66-14] 18 p3113 A66-34425
- Ignition analysis of condensed phase fuel suddenly exposed to stationary hot oxidizing gas, noting strong pressure effect due to feedback mechanism 20 p3626 A66-37386
- Polymer flammability measured in terms of minimum oxygen content needed for burning, noting effect of various agents for reducing flammability 20 p3680 A66-38040
- Book on fuel behavior in piston-engine, jet and rocket 21 p3806 A66-38950
- Correlation between chemi-ionization in flames containing organic fuels and heat of oxidation of carbon in fuel molecule 23 p4147 A66-41154
- Pressure variation induced by ignition of air-hydrocarbon mixtures - studied by stroboscopic cinematography and simultaneous pressure measurement 23 p4148 A66-41176
- Supersonic combustion simulation facility and duplicable static parameters for hydrogen fuel [AIAA PAPER 66-743] 23 p4052 A66-41327
- Combustion of atomized liquid fuels, noting optimum value of atomization fineness affecting completeness of combustion 24 p4293 A66-42208
- Model determination of effects of injecting and mixing fuel in inlet diffuser of two-shock inlet hypersonic ramjet or scramjet [AIAA PAPER 66-648] 24 p4261 A66-42641
- FUEL CONSUMPTION**
- Hybrid propulsion application to advanced missions covering fuel consumption, combustion efficiency and throttling performance [ATAA PAPER 64-226] 03 p0415 A66-12748
- Thrust modulation with minimum limit cycle in bang-bang system, reducing fuel consumption for spacecraft attitude control system 03 p0432 A66-13206
- General theory of minimum fuel free space trajectories 06 p0954 A66-16624
- Dual flow engines with high by-pass ratios, considering engine process parameter effects, fuel consumption, efficiency, etc 06 p0944 A66-17025
- Minimum fuel transfer solution of Lawden problem involving finite number of impulse thrusts separated by coasting arcs [ATAA PAPER 66-7] 07 p1136 A66-17881
- First-order perturbation solution to problem of minimum-fuel orbit transfer in form of equal slope guidance constraint [ATAA PAPER 66-11] 07 p1137 A66-17883
- Piston-type flowmeter for automatic recording fuel consumption 09 p1380 A66-20310
- Intake requirements and cold efflux of high-bypass turbofan engines can be turned to advantage by integrated installation arrangements which reduce long-haul operating costs 09 p1434 A66-20392
- Comparison of piston engine with turbojet engine, noting power-weight ratio, specific fuel consumption, performance characteristics, etc 10 p1591 A66-21392
- DC-9 Douglas short-and medium-range air transport, discussing takeoff field length, fuel capacity, payload and landing-field length 12 p1800 A66-23754
- Scramjet aircraft performance capabilities, noting operating parameters such as thrust coefficient, flight velocity, acceleration, fuel consumption, etc 13 p2173 A66-26032
- SST air traffic control and fuel consumption dependence on wind drift and atmospheric temperature 14 p2328 A66-28231
- Turbofan engine fuel consumption, noting high cycle pressure ratio compressor, regenerator, etc [SAE PAPER 660322] 15 p2573 A66-29842
- Analytic solution in terms of modified Bessel functions of synergetic turn in exponential atmosphere, using spacecraft engines only for drag cancellation and orbit trimming [AIAA PAPER 66-487] 16 p2811 A66-31493
- Optimum stabilization problem for axisymmetric satellite, considering fuel consumption 19 p3467 A66-35277
- Viscosity effect on performance of turbine type flow meters calculated to meet accuracy requirement for complete use of propellants in rocket propelled vehicles 19 p3361 A66-36646
- Trajectory corrections of space vehicle launched toward planet, noting fuel consumption 20 p3595 A66-36872
- FUEL CONTAMINATION**
- Microbiological attack in aircraft fuel systems and protective measures 06 p0940 A66-15996
- Contamination control in missile systems, considering rocket engine cleanliness as quality control parameter 09 p1432 A66-19954
- Contamination, viscosity, shear stability, breakdown and foaming of MIL-H-5606 hydraulic fluid and swelling effect on synthetic rubber 18 p3125 A66-34652
- FUEL CONTROL**
- Lucas fuel control system for Spey engine, using rotating metering valves and variable stroke fuel pump [SAE PAPER 660049] 08 p1282 A66-19389
- Fuel requirements for high altitude high-Mach number aircraft, noting thermal stability, autooxidation, self-ignition, specific heat, etc 10 p1590 A66-21400
- Gas turbine fuel controls, analysis and design 15 p2570 A66-28851
- Literal acceleration limiting fuel control for gas turbine engines during speed transients 15 p2571 A66-28854
- Gas turbine engine analog simulation for acceleration sensing fuel control studies, comparing results with actual engine performance 15 p2571 A66-28855
- Effect of recuperators on governing of single shaft gas turbine engines and methods used to provide satisfactory governing and overall characteristics 15 p2428 A66-28856
- Fuel flow reset and other methods of governing performance of gas turbines 15 p2571 A66-28857
- Microelectronic fuel control for gas turbine engines, discussing mechanical flow and microelectronic packages and component fabrication and assembly 15 p2571 A66-28859
- Lightweight universal fuel control for commercial aircraft, discussing engine requirements, design considerations, etc 15 p2571 A66-28860
- Random balance statistical method of identifying major causes of performance variations in jet engine fuel control units 15 p2572 A66-28863
- Pontryagin principle extended to control systems, computing optimal control laws 19 p3337 A66-36735
- Time-fuel optimal regulator for third-order model of reaction jet-controlled spacecraft with time delay 19 p3338 A66-36743
- Quadratic and linear friction effects on time-weighted fuel-optimal singular control of nonlinear systems 19 p3338 A66-36744
- Iterative computational procedures applicable to optimal control problems including treatment of minimum-error regulator, minimum-error rendezvous and minimum-fuel terminal control 20 p3536 A66-36855
- Analog computation of minimum fuel trajectories with soft landings in uniform gravitational field, using Pontryagin maximum principle to reduce two-point BVP with optimal controllers 23 p4133 A66-41618
- FUEL CORROSION**
- Corrosion problems with simulated fuel in launch vehicle models 21 p3750 A66-38799
- Throat erosion rates of carbon chokes in rocket motor nozzle predicted, using mathematical approach combined with experimental result [AIAA PAPER 65-351] 24 p4261 A66-42772
- FUEL ECONOMY**
- Analytical solution to determine rocket design for maximum payload 02 p0294 A66-11634
- Propellant extraction from lunar material, giving cost analysis of manufacture and use in Earth-Moon space flight with expendable and reusable tankers 10 p1610 A66-21943
- Fuel and energy minimization in three-dimensional attitude control by reaction jet or reaction wheel in orbiting satellite 18 p3244 A66-33865
- FUEL ELEMENT**
- Refractory materials properties used in nuclear fuel element 07 p1079 A66-18302
- FUEL FLOW**
- Quasi-linear partial differential equations of transients in liquid rocket engine propellant feed system solved, determining transient pressure ratio [ASME PAPER 65-FE-23] 06 p0942 A66-16217
- Molten carbonate fuel cell module featuring flexibility of construction, electrical simplicity and effective gas distribution characteristics [AICE PREPRINT 20D] 10 p1484 A66-21187
- Limiting factors of detonation in heterogeneous systems, using one-dimensional model 18 p3265 A66-34552
- FUEL GAUGE**
- SA CAPACITIVE FUEL GAUGE**
- Fluid content measurement in storage tanks under zero-g conditions discussing gas law system, trace material, capacitive panel and RF methods [AIAA PAPER 65-365] 19 p3340 A66-35611
- FUEL INJECTION**
- SA GAS INJECTION**
- SA LIQUID INJECTION**
- Combustion and heat transfer in rocket combustion chamber burning liquid oxygen and gaseous hydrogen 02 p0279 A66-11668
- Supersonic ramjet fuel injection, fuel-air mixing and combustion in turbulent air stream, noting mixing and combustion time 09 p1434 A66-20473
- Propellant injection distribution effect on transverse modes of liquid rocket engine instability [AIAA PAPER 65-613] 12 p1977 A66-23587
- Laminar air flow past porous plate through which fuel and oxidizer mixture is injected, deriving diffusion combustion processes that develop in laminar boundary layer 14 p2371 A66-28318
- Diffusion flame for stagnation mixing layer created by jet fuel injected into oxidant stream at stagnation region of blunt body 17 p3033 A66-32447
- Underwater thermal propulsion system powered by closed-cycle steam power plant fed by high-temperature variable gas flow from oxygen-hydrocarbon combustion apparatus [AIAA PAPER 65-481] 19 p3479 A66-36492
- Penetration distance for secondary liquid injection into supersonic airstream, emphasizing jet flow far from injection orifice 20 p3548 A66-38151
- Project Scorpio USAF Cellular Combustion Chamber Program for cost reduction and injection pattern simplification in liquid propellant rocket engines 20 p3629 A66-38256
- Shock tunnel external burning experiments to investigate effects of reactive fuel injection into air stream flowing around body [AIAA PAPER 66-744] 22 p3893 A66-40631
- FUEL PUMP**
- Jet pump development and testing on Lear Jet Model 24 and Model 40, noting fuel pump system performance, requirements and configuration [SAE PAPER 660223] 13 p2002 A66-26398
- Fluid dynamic characteristics of propellant pumps in presence of oscillatory cavitation, noting performance of J-2 rocket engine system [AIAA PAPER 66-559] 18 p3246 A66-34428
- FUEL SPRAY**
- Thermal radiation absorption by droplet or spray during ignition and combustion of atomized liquid fuels 01 p0164 A66-10899
- Combustion of hydrazine droplets burning in hydrazine vapor investigated via suspended droplet technique [AIAA PAPER 65-355] 14 p2370 A66-27413
- Compressed-gas dispersion effect on gas turbine engine operation, deriving spraying law, jet stream, penetration depth, etc 21 p3808 A66-38934
- FUEL SYSTEM**
- SA AIRCRAFT FUEL SYSTEM**
- Rocket equipment simulation on rocket engine test facilities, describing fuel tank design for experiment with suitable flow characteristics and parameters 12 p1829 A66-24317
- Relation between pressure-type fuel supply

system and pressure variation in combustion chamber of rocket engine 14 p2373 A66-27382  
Regression rates of metalized hybrid fuel systems applied to lithium hydride butyl rubber-fluorine-oxygen system, oxidizer flow, etc 15 p2569 A66-29289  
LF self-vibrations of laminar diffusion flames in axial mode at frequencies corresponding to fuel system natural frequencies [WSCI 66-30] 18 p3263 A66-34414

## FUEL TANK

SA PROPELLANT TANK  
SA STORAGE TANK

Structural design of transport aircraft to reduce fatalities, analyzing protective shell to withstand ground impact load and fuel containment

[AIAA PAPER 65-773] 03 p0434 A66-12592

Mechanical model for representing moment of inertia and fuel sloshing in baffled cylindrical missile tanks 08 p1205 A66-18834

Reactivity of titanium alloy oxidizer tank with nitrogen tetroxide oxidizer under vibration analyzed for LEM when subjected to impact 13 p2111 A66-26222

Tank design, optimization program and testing for effect on storage penalties associated with liquid hydrogen for hypersonic aircraft application 14 p2394 A66-28026

Convective heat transfer to and low gravity heating of liquids contained in rotating cryogenic fuel tanks in orbit [AIAA PAPER 66-432] 16 p2826 A66-30521

Flexible baffle effect on nature and magnitude of damping and sloshing motions of liquid propellants over wide range of conditions 16 p2685 A66-30915

Laminated reinforced plastics used in construction of jettisonable fuel tank, aircraft equipment components, radomes, missiles and satellite parts 23 p4074 A66-41654

## FUEL TANK PRESSURIZATION SYSTEM

Reliability design concepts in cryogenic fluid systems in Saturn S-IV stage propulsion system, noting hydrogen and LOX tank pressurization systems 01 p0129 A66-10079

## FUEL TESTING

Air conditions, flight altitude and fuel composition effects on ramjet engine, specific impulse and efficiency 01 p0130 A66-10925

Refractory material cermet fabrication, discussing techniques of preparation, fuel-metal compatibility and fuel canning 05 p0713 A66-15585

1965 supplement to 1958 ASTM manual for rating aviation fuels by supercharge and aviation methods 14 p2370 A66-27230

Cryogenic fuels evaluated for operational safety in space environment simulation laboratory /SESL/ 22 p3891 A66-40235

## FUEL VALVE

Four-way fluid state vortex hydraulic servovalve discussing design principles, performance and application 04 p0460 A66-13785

## FUNCTION GENERATOR

Electronic analog computer nonlinear function generation by using silicon carbide varistors 11 p1660 A66-23254

Nonohmic-resistor analog function generator, using output voltage summation of nonlinear combination channels for input range 11 p1660 A66-23255

Solid propellant rocket engine omniaxis liquid injection thrust vector control system, using function generator in signal-summing feedback loop to control flow in servovalves and increase motor reliability 14 p2226 A66-27700

Error estimation in diode function generator design 16 p2659 A66-30518

Infinite helical sheath antenna driven by ring delta-function generator analyzed, using Fourier transform, noting decomposition of current distribution 17 p2886 A66-32388

Sensitivity to variations in parameter of signals in networks of linear transfer functions and instantaneous function generators, noting relay characteristics 19 p3327 A66-36018

Trainable nonlinear function generator using threshold logic elements for pattern classifiers 19 p3338 A66-36737

## FUNCTION SPACE

## SA EUCLIDEAN SPACE

## SA HILBERT SPACE

Traces on coordinated hyperplanes of elements of functional space 07 p1057 A66-17844

Synthesis of adaptive control systems by function space methods 09 p1362 A66-20652

Nonlinear time varying open-loop feedback system design and infinitely integrable function space boundedness condition 13 p2053 A66-26085

Theory of physical systems governed by nonlinear functional equations such as vector nonlinear Volterra integral equation [AIAA PAPER 64-680] 14 p2375 A66-27884

Generalized measures and integration in function spaces, giving problems and application 17 p2946 A66-32298

Square-integrable approximate solution to certain ordinary differential equations in particular function space 18 p3127 A66-34640

Nonlinear transformations of probability measures in functional spaces, noting application of random-process theory 21 p3757 A66-38952

Spline theory methods of interpolating linear functional containing Peano kernel 21 p3757 A66-39257

## FUNCTION TEST

## SA DIAGNOSIS

Qualitative analytic function-test maintainability prediction equations from regression analyses on hardware 20 p3569 A66-37922

Functional subsystem analysis in Instructional System Approach to transition training of flight crews 23 p4030 A66-41579

## FUNCTIONAL ANALYSIS

## SA BANACH SPACE

## SA SERIES EXPANSION

Inverse problem of Khavinson and Khavir approximated for complex plane sets 02 p0250 A66-12096

Analysis of equation system for constructing regularizing algorithms for optimum control determination 02 p0209 A66-12103

Free-boundary nonlinear problem of smooth curve drawn in single circle so that doubly connected region formed by curve and circle satisfies specific existence conditions 02 p0250 A66-12103

Uniqueness of optimum approximation sums of single variable functions for multivariable functions in Lebesgue space 04 p0538 A66-13481

Monograph on Levy method for deflection of loaded simply-supported infinite plate strip, introducing class of real functions 04 p0589 A66-14013

System requirements analysis provides orderly identification of hardware, facilities personnel and procedures necessary for system mission success [ASME PAPER 65-WA/AV-2]

Optimal control, discussing fundamental general necessary conditions for Mayer problem solution 06 p0864 A66-16628

Direct method of calculus of variations for finding minimum point for scalar function on functional space 06 p0904 A66-17003

Calculation of integrals of infinitesimal differentiable functions, showing error estimate by network method for periodic functions 07 p1056 A66-17593

Estimates of Taylor coefficients in theory of regular function of several complex variables 07 p1056 A66-17603

Removable singularities in multidimensional minimal hypersurfaces in compact space 07 p1057 A66-17833

Wentzel-Kramer-Brillouin calculation of exact solution of universal instability and drift approximation 07 p1089 A66-17953

Existence of logarithm for nonsingular square matrix, uniqueness for linear ordinary differential equation systems logarithms of operators and spectral mapping 07 p1058 A66-17963

Uniform structure for Lipschitz condition on functions between sets, extensions to nonmetric spaces and fixed point theorems for uniform spaces 07 p1059 A66-17963

Boundaries of convexity of star-shaped functions, order alpha, in open circular region /0, 1/ 07 p1059 A66-18093

Bellman functional equation derived for class of optimal control problems without using Taylor series expansion or mean value theorem of differential calculus 07 p1017 A66-18343

Certain inequalities for solutions of elliptic equations and derivatives near metric region 07 p1060 A66-18463

Nearly ideal cartographic projections of variable type and reduction of certain functional to minimum 08 p1217 A66-19343

Interpolation function of real variable investigating process constructed for given system of points 09 p1394 A66-20453

Nonlinear creep and recovery behavior of polypropylene fibers and hereditary functionals describing nonlinear viscoelastic behavior 09 p1393 A66-20663

Matrix inequality theorems, discussing Krasnoselskii and Krein inequality and Kantorovich inequality 10 p1549 A66-21223

Random errors of derivatives obtained from least squares approximations to empirical functions 10 p1550 A66-21343

Boundedness and uniform boundedness of nonhomogeneous systems, obtaining necessary and sufficient conditions for existence of solutions 10 p1551 A66-21923

Theorems for uniform approximations by algebraic and trigonometric rational functions, noting application in determining functional properties 10 p1552 A66-21983

Nonlinear filters, including system analysis optimization, realization via Volterra functionals, etc 11 p1675 A66-22633

Linear ODEs in canonical form with aftereffect in functional space of continuous functions 11 p1676 A66-22643

Hypergeometric mean value, showing expression for mean of order t of series of

positive values with positive weights as limiting case 11 p1722 A66-22953

Simple inequality involving expectations of convex functions and 11 p1723 A66-23185

Majorization 11 p1723 A66-23185

Approximation of function of many variables by linear 11 p1723 A66-23313

Methods 11 p1723 A66-23313

Spectral analysis of bounded functions and method for constructing them either continuous or 11 p1724 A66-23403

Noncontinuous 11 p1724 A66-23403

Mathematical analysis of analogies between theory of heat conduction and theory of functions of complex 12 p1977 A66-23562

Approximate solution of equation with normally distributed 12 p1902 A66-23899

Operators 12 p1902 A66-23899

General vector notation for multiple integrals 12 p1903 A66-24091

Maximized elliptic equations, Dirichlet problem, distance function solution, maximum principle, removable singularity, etc 12 p1905 A66-24401

Man-machine systems for interplanetary exploration, using functional analysis techniques for system 13 p2013 A66-25281

Design 13 p2013 A66-25281

Minimizing functionals on normed linear spaces, discussing steepest descent and rendezvous problems in control theory 13 p2116 A66-25343

Functional analysis demonstrating existence and uniqueness of displacement field, providing solution for linear viscoelasticity problem for medium having behavior satisfying coercivity condition 13 p2195 A66-25463

Sensitivity operator as extension of time-domain sensitivity function to time-varying change of elements in nonlinear dynamic system, deriving sensitivity equations 13 p2050 A66-26060

Functional transformations revealing topological properties of single contact /SC/ network, simplifying task of synthesis 13 p2051 A66-26064

Bandlimited and approximately bandlimited signals by Fourier transforms of sampling function and prolate spheroidal wave function representing solutions of second order self-adjoint differential equations 13 p2120 A66-26077

Locating zeros of complex functions by computing topological 13 p2121 A66-26326

Index 13 p2121 A66-26326

Maximum information principle applied to search for minimum of function 13 p2028 A66-26475

Functional analysis of electromechanical control systems, noting application of mathematical methods for system reliability determination 15 p2428 A66-28797

Pearson universal random distribution generator, noting analysis of randomly chosen variables for unimodal underlying distribution 15 p2526 A66-28808

Expansion of arbitrary function of Mehler-Fok integral form in terms of spherical functions 15 p2526 A66-28952

Dynamic system stability, control and observation, noting optimal system synthesis, application of functional analysis, Liapunov function and dynamic programming 15 p2470 A66-29149

Formula involving two impedances leads to equations for positive real functions, for application to power gain of symmetric and antisymmetric filters 15 p2464 A66-29322

Uniqueness, existence and stability of solutions to polyvibrant systems with delayed remainder and arguments 15 p2528 A66-29652

Evaluation of solution moduli of nonlinear contour problems pertaining to polyvibrant systems with delayed remainders and arguments 15 p2529 A66-29653

Modified sprindzuk theorem, discussing transcendental functional analysis 16 p2732 A66-30531

Necessary and sufficient condition for growth of solution to second order PDE with delayed arguments 16 p2733 A66-30742

Analytic construction of skew derivative Green matrix for system of second order elliptic PDEs in many variables 16 p2734 A66-30749

Optimization of linear control systems when placing step limitations on control, using functional analysis 16 p2668 A66-30751

Function approximation from finite number of arbitrary points, using iteration methods 16 p2734 A66-30760

Solution of heat-conduction equation over functional spaces possessing fractional derivatives with respect to time, applied as solution to first boundary value problem 16 p2827 A66-30779

Uniqueness of solution to second and third boundary value problems for second-order elliptic equation in presence of boundary singular points 16 p2734 A66-30783

Functional analysis methods applied to optimal control system sensitivity problem 16 p2671 A66-31060

Volterra series analysis of aperiodic solutions to certain second order integrodifferential equations with nonlinear damping and nonlinear restoring force 16 p2737 A66-31334

Linear system damping while using minimum control intensity treated as functional analysis problem 16 p2672 A66-31504

Multipole analysis of acoustic radiation to explore dependence of mass density on functional character of source distribution 17 p2957 A66-31951

Limit properties of uniform process with independent increments 17 p2946 A66-32299

Necessary condition for optimal control in nonlinear automatic control system determined, using method of successive approximations 17 p2902 A66-32574

Accuracy problems in control systems, discussing error assessment and accuracy estimates of optimal control 17 p2902 A66-32576

Stochastic processes, formulation and solution using characteristic functionals, transformations, and measure theory 17 p2947 A66-33095

Torsion of nonlinear viscoelastic circular cylinder in terms of stress tensors prescribed by time-functionals of finite strains 17 p3032 A66-33332

Sufficient conditions for boundedness of solutions of linear system of differential equations with variable coefficients 18 p3126 A66-33929

Existence, uniqueness and periodicity of solutions to boundary value problems for quasi-linear ODEs on topological space of continuous mappings 18 p3127 A66-34138

Invariance effect for finite number of coordinates in infinite dimensional automatic control system 19 p3325 A66-35986

Functional derivative technique for designing self-adjusting control systems having main part implemented by solving differential equations 19 p3328 A66-36021

Nearly ideal cartographic projections of variable type and reduction of certain functional to minimum 19 p3348 A66-36054

Theorems for uniform approximations by algebraic and trigonometric rational functions, noting application in determining functional properties 19 p3390 A66-36189

Random variable-dependent probability measures induced in Borel body from uniform catenaries and related to Lebesgue measures 19 p3391 A66-36434

Optimal control of dynamic systems with minimax type performance index, discussing application of proposed method of solution 19 p3334 A66-36686

Functional polynomial fitting of continuous functional, using Laplace transforms to reduce number of measured records for identifying kernels of second-degree approximation 19 p3391 A66-36703

Generalizations of functional Lagrange expansion to multivariable nonlinear systems such as state space and functional equations in s domain for control problems application 19 p3391 A66-36704

Describing function for analysis of feedback control systems with time-invariant nonlinear elements, simplifying derivation by taking derivative of output of nonlinear element with respect to input 19 p3336 A66-36705

Input-output stability conditions of time-varying nonlinear feedback systems

obtained, using concepts of loop gain, concity and positivity 19 p3338 A66-36739

Weierstrass necessary condition and basic equations for optimal control of initial or boundary states of continuum mechanical MHD and hypersonic partial differential systems 20 p3535 A66-36853

Optimum transformation of linear system with minimal rms error from given point to fixed delta-environment of another given point 20 p3537 A66-36890

Subadditive functional expectations and inequality of variables 20 p3590 A66-37111

Monograph on approximate analysis of randomly excited nonlinear controls, discussing feedback system performance, functional and quasi-functional representation, zero mean systems, etc 20 p3538 A66-37577

Convolution type integral equation solution via reduction to Riemann problem in class of generalized functions 20 p3591 A66-37755

Abstract machine design with recursive function programming language, showing simulator construction in Fortran 20 p3523 A66-38018

Block diagonalization theorem for linear ordinary differential equation systems and applications 21 p3755 A66-38597

Asymptotic forms exhibited by powers of nonnegative matrix, discussing index of convergence and associated values 21 p3755 A66-38602

Computer program for numerical solution of ODE systems, noting generation of symbolic solutions via Taylor series expansion 21 p3707 A66-38679

Local structure of continuous and diffusion Markov processes compared with aid of M functionals for stochastic integrals 21 p3757 A66-39246

Spline theory methods of interpolating linear functional containing Peano kernel 21 p3757 A66-39257

Synthesis of optimal Liapunov-Bellman function, noting sequential solution method for independent variables and method using first-order partial differential equation 21 p3758 A66-39281

Uniqueness of solution to second and third boundary value problems for second-order elliptic equation in presence of boundary singular points 22 p3940 A66-40445

Optimal control synthesis for cost functionals involving convex single valued functions of state and control variables, noting steepest ascent method and evaluating gradient 22 p3885 A66-40871

Gauge transformations of third kind and operator gauge transformations of first and second kinds, relating electron and photon propagators to quantum electrodynamical vertex function 23 p4098 A66-41392

Parameters of dynamic systems described by PDEs determined by replacing PDE with integral equation and eliminating via recursion process terms resulting from initial and boundary conditions 23 p4084 A66-41396

Generalized function solution for ordinary differential equations 23 p4084 A66-41406

Finite realization extrema of continuous time stationary stochastic processes 23 p4085 A66-41535

Existence and uniqueness theorems in Poincare-Liapunov theory for multipoint control boundary value problems 23 p4085 A66-41539

System of differential equations describing stability of certain generalized processes in language of functional sets and distributions 24 p4230 A66-42214

Functional analysis applied to optimum control by reduction of variational problem to finite dimensional analysis and calculation of algorithms for use with digital computer 24 p4231 A66-42470

**FUNCTIONAL INTEGRATION**

Functional system integration as means of displaying complex electrical and electronic systems to minimize initial design, equipment checkout and trouble shooting problems 02 p0306 A66-11637

Control criterion for linear system with constant matrix, discussing quadratic functionals ensuring aperiodic transient 11 p1674 A66-22351

Averaging method for differential

equations with retarded arguments 13 p2118 A66-25827  
 Functional integration analysis of exponential behavior of nonlinear feedback control systems 13 p2052 A66-26076  
 Space-time correlation tensor of turbulent fields by phase space functional Lebesgue-Stieltjes integration, statistical hydromechanics and probability measure theory 15 p2479 A66-29398  
 Maximum error curves for Lanczos selected point method of polynomial solution to ordinary differential equations, using Chebyshev and Legendre functions 17 p2947 A66-32858  
 Payload integration in space experimentation, discussing commonality, flight and load matrices, experiment-spacecraft-ground system interfaces, computer methods, etc 20 p3662 A66-37186

## FUNGUS

SA SPORE  
 SA YEAST  
 Genetic control of gibberellin production in fungus *Gibberella fujikuroi* 23 p4025 A66-41307

## FURNACE

SA IMAGE FURNACE  
 SA SOLAR FURNACE  
 SA VACUUM FURNACE  
 Cylindrical black body furnace with graphite resistance built in France, attaining 1600 degrees C, for calibration of radiation pyrometers 09 p1383 A66-20909  
 Apparatus for melting boron carbide inductively on water-cooled hearth, noting application to other refractory materials 13 p2088 A66-26563

## FUSE

Fuse evaluation for spacecraft power system 08 p1196 A66-19504  
 Circuit overloading protection using automatic reset, breakers and fuses 14 p2249 A66-27120

## FUSELAGE

SA AIRFRAME  
 SA WING-FUSELAGE COMBINATION  
 Aircraft fuselage design in region of center section for case of asymmetric bending 11 p1782 A66-22854

## FUSION

SA CONTROLLED FUSION  
 SA NUCLEAR FUSION  
 Closed-form solution for constant velocity solidification of spheres initially at fusion temperature 10 p1622 A66-21889  
 Vanadium oxide single crystal growth by flame solution and fusion, noting burner construction, crystal structure and techniques 12 p1899 A66-23565  
 Space thermal control using fusible materials, with analysis of one-dimensional adiabatic system 18 p2826 A66-30505

## FUSION WELDING

Laser beam welding electronic-component leads 05 p0685 A66-14517  
 Laser welding evaluated with regard to performance and production application 05 p0686 A66-14692  
 Transverse weld shrinkage and distortion in aluminum butt welds due to lack of stress equilibrium about neutral planes of plate thickness 05 p0686 A66-14696  
 Aluminum alloy butt fusion welds, discussing ghost lack of fusion phenomenon mechanism, characteristics and causes 06 p0887 A66-16800  
 Pulsed laser welding, wire-to-wire, sheet-to-sheet, circuit board, vacuum tube, etc 07 p1038 A66-18153  
 Fusion welding processes dependent upon electric heat source 09 p1384 A66-20610  
 Hot cracking in Hastelloy X fusion weld as affected by microsegregation produced during solidification 10 p1547 A66-21768  
 Orbit arc automatic tungsten inert gas fusion welding and application to joining tubular systems in aerospace industry [ASTME PREPRINT AD66-719] 12 p1886 A66-24410  
 Porosity at weld fusion zone-base material interface in gas tungsten-arc and electron beam welds of tantalum 13 p2110 A66-26018  
 Laser welding of aerospace structural alloys and resultant joint properties 13 p2087 A66-26019  
 Metal welding technology, including problems of thermal deformation and heat

effect on properties of welded materials 14 p2298 A66-26945  
 Residual stress control in welded structure noting stress reduction by preheat, prestressing by fusion welding and spot weld impact treatment 22 p3924 A66-40262  
 Solid state laser application to fusion welding 22 p3926 A66-40274  
 Welding, thermal flux control and contamination prevention of Saturn rockets, particularly fusion 23 p4073 A66-41534

## F4H AIRCRAFT

## S F-4 AIRCRAFT

## F8U AIRCRAFT

## S F-8 AIRCRAFT

## G

## G FORCE

## SA ACCELERATION STRESS

## SA GRAVITY

Perception of apparent vertical without visual cues depending on longitudinal axes of body and head to direction of resultant acceleration above 1 g 04 p0468 A66-14086  
 Otolith organ activity within Earth standard, one-half standard and zero gravity environments and effect of extralabyrinthine factors effect upon counterrolling 15 p2431 A66-28664  
 Centrifugal acceleration effect on sexual apparatus, cardiovascular system and respiratory organs of female monkey 15 p2437 A66-29472  
 Prolonged hypokinesia effect on human resistance to transverse g-forces, detailing respiratory and circulatory systems, motor response and visual acuity 15 p2437 A66-29473  
 Model of vestibular apparatus emphasizing function of otolithic part, noting reactions of receptor-neuron system to g forces 15 p2444 A66-29496  
 Condensation tests in smooth and porous coated tubes in multi-g centripetal acceleration fields for increasing heat transfer coefficient of condensing nitrogen 18 p3262 A66-34379  
 Effect of head-to-foot accelerations of up to 10 g on rabbits, noting changes in ECG, EEG, brain histology, etc, leading to ischemic conditions 18 p3060 A66-34408  
 Origin of chest pains associated with G force sinusoidal vibration, noting effect of anterior chest wall anesthetization, results suggest pain originates in chest wall 19 p3286 A66-36375

## G-222 AIRCRAFT

## S FIAT G-222 AIRCRAFT

## GADOLINIUM

Specific heat of gadolinium near Curie point, discussing measuring procedure and line drawing of calorimetric setup 01 p0118 A66-10252  
 Emission current density and effective work function of samarium, europium and gadolinium hexaborides 02 p0270 A66-11426  
 Anomalous thermal expansion above and below Curie point as function of temperature in gadolinium single crystal 02 p0274 A66-11725  
 Specific heat evidence for gapless superconductivity, examining experimental results on lanthanum doped with magnetic impurity gadolinium 09 p1420 A66-20053  
 Gadolinium molybdenate as ferroelectric host in pulsed laser, noting light modulation and crystal domain 11 p1713 A66-23207  
 Fluorescence behavior of gadolinium and terbium, noting nonradiative energy transfer in borate glass 13 p2158 A66-25052  
 Lattice parameters and constant measured in gadolinium-yttrium alloy dihydrides, using X-ray diffraction techniques 13 p2162 A66-25382  
 Vapor pressures of solid samarium and liquid gadolinium at high temperatures using Knudsen effusion method, noting sublimation heats for samarium 14 p2314 A66-27462  
 Magnetic state of gadolinium impurities in superconducting lanthanum 16 p2768 A66-30134  
 Temperature dependences of coercive force, hysteresis loops and domain structure of thin iron-gadolinium alloy

films 16 p2774 A66-3064  
 Domain structure and hysteresis loops thin iron-gadolinium films of different thicknesses 16 p2775 A66-3064  
 X-band spectrometric observation of ES of trivalent gadolinium in reduced barium titanate 21 p3797 A66-3877

## GAIN

## SA POWER GAIN

Gain-bandwidth limitations for physical realizable systems obtained in integral form by employing generalized representation theorem for bounded-real functions 02 p0208 A66-1193  
 Predicting transistor gain degradation from neutron radiation environment from variation of radiation damage constant as function of temperature and current 05 p0735 A66-1481  
 Random error effect on directional gain of sectional parabolic antenna with automatic phasing, setting sections effectively by three control points method 14 p2250 A66-2710  
 Harmonic analysis of current gains of internal slope of nonuniform base transistors 14 p2254 A66-2766  
 Controlling gain of individual transistor amplifier stages to enable amplifier to handle input signals with wide dynamic ranges 14 p2262 A66-2833  
 Communication satellite design noting use for educational and commercial purposes instrumentation applied, etc 17 p2872 A66-3191  
 FET structures with linearly graded junctions noting maximum gain configuration, transconductance expressions etc 17 p2895 A66-3311  
 Relative circuit gain of common-emitter antisaturation feedback circuit configurations as function of circuit parameters 18 p3090 A66-3408  
 Approximate theory for estimating effect of manufacturing tolerances on design of parabolic reflector performance 18 p3082 A66-3428  
 Tolerance theory for parabolic reflector antenna, noting gain and radiation-pattern distortion 18 p3082 A66-3428  
 Reduced gain and increased sidelobe caused by errors in surface of parabolic reflector 18 p3085 A66-3439  
 Modified Goonhilly No. 1 aerial noise temperature, gain and figure of merit 18 p3085 A66-3439  
 Gain loss ratio between one antenna and two antennas used to analyze antenna gain loss for long-range tropospheric propagation of ultrashort waves 20 p3525 A66-3711  
 Antenna measurement for input impedance, gain and directivity characteristics 20 p3531 A66-3777

**GALACTIC EVOLUTION**  
**SA STELLAR EVOLUTION**  
 Galactic X-ray astronomy discussing neutron stars, thermal bremsstrahlung at synchrotron radiation 02 p0290 A66-1189  
 Origin of primary cosmic rays discussing galactic theory, propagation characteristics and measurement results 04 p0574 A66-1381  
 Origin of solar system, discussing monistic and dualistic theory, interstellar characteristics, star formation and planetary development 05 p0767 A66-1577  
 Book on galactic structure including distribution of common stars, solar motion, interstellar hydrogen distribution, galactic radio emission, planetary nebulae, etc 11 p1766 A66-2222  
 Distribution patterns of common stars in galactic plane according to spectral type noting density gradients, main sequence Hertzsprung-Russell diagram, etc 11 p1766 A66-2222  
 Statistical determination of stellar motion compounded of radial velocity in line of sight and transverse velocity perpendicular to it, considering galactic orbits of near stars, velocity ellipsoids, etc 11 p1766 A66-2222  
 Cosmological-galactic creation, steady state expansion and high energy particle production associated with radio sources 11 p1774 A66-2306  
 Elliptical galaxy formation by expansion from steady state according to Einstein-Sitter law 11 p1775 A66-2306  
 Dynamic evolution of clusters of

- galaxies 14 p2383 A66-27707
- Galactic evolutionary patterns in neighborhood of solar system, assuming rate of star formation depends on time parametrically 15 p2594 A66-28985
- Rapid mass ejection from highly evolved stars as explanation for observation of high abundance of galactic helium 15 p2599 A66-29680
- gas 15 p2599 A66-29680
- Metagalactic existence of type of hypothetical particles representing stable closed Einstein microcosms 18 p3233 A66-34547
- HF brightness intensity of cosmic background radiation at 20.7 cm wavelength may be primordial fireball residue of big-bang cosmology 18 p3171 A66-34717
- Galactic evolution examined, using luminosity and volume emissivity diagrams 18 p3178 A66-34760
- Galactic evolution and structure - Solvay Physics Conference, Brussels, September 1964 20 p3645 A66-36957
- Synchrotron theory to calculate energy content of radio sources as function of relativistic electrons and magnetic flux 20 p3645 A66-36961
- Perturbations of spatially isotropic expanding universe in terms of small curvature variations 21 p3817 A66-39559
- Forms of red shift magnitude relation for Friedmann type relativistic model universes 23 p4125 A66-41046
- Cosmological evolution from red shifts of quasi-stellar radio sources 23 p4127 A66-41150
- Dynamical requirements for existence of interstellar magnetic field in solar neighborhood 23 p4124 A66-41812
- Suggestion that quasar red shifts result from inflow of matter at relativistic velocity in gravitational field of highly condensed white dwarf 24 p4274 A66-42419
- GALACTIC MAGNETIC FIELD**
- Solar magnetic field may have originated during process of Sun formation from galactic magnetic field which pervaded interstellar gas from which Sun condensed 08 p1292 A66-19261
- Large-scale aspects of gaseous components of our Galaxy, noting dynamics of gaseous systems with magnetic fields, virial theory, angular momentum, spiral structure of galactic disk, etc 11 p1767 A66-22263
- IR radiation from interstellar grains, measuring intensity as wavelength function and radiation polarization for information on grain temperature and composition and galactic magnetic fields 14 p2377 A66-28122
- Irregularity of galactic magnetic field structure in vicinity of Sun indicated by starlight polarization, interstellar cloud motion and Milky Way photography 15 p2595 A66-29130
- Galactic magnetic field strength and distribution determined from synchrotron emission of relativistic electrons, noting Faraday rotation of polarized radiation from distant radio sources 18 p3235 A66-34744
- Dynamical behavior of cosmic ray gases, noting modes of hydromagnetic wave propagation and static equilibrium configurations for thermal interstellar gas and field 18 p3178 A66-34759
- Galactic model for studying hydromagnetic stability of spiral arm in which field lines are helices around axis 18 p3237 A66-35043
- Faraday rotation variation with galactic coordinates studied for emission from 86 linearly polarized radio sources 18 p3238 A66-35236
- Galactic magnetic fields, considering magnetic flux, frequency of fields in radio galaxy, disk, interstellar gas dynamics and spiral structure 20 p3645 A66-36958
- Radio electron density and magnetic field in galactic halo from primary cosmic ray and radio brightness measurements 21 p3817 A66-39563
- Underground telescopes confirm two-way sidereal anisotropy in charged primary cosmic radiation 22 p3973 A66-40534
- Theoretical model for quasars characterizes them as galactic flares, based on study of high energy phenomena associated with solar flares 22 p3982 A66-40536
- GALACTIC RADIATION**
- Expected cosmic ray intensity variations on Moon from analysis of such variations on Earth 01 p0132 A66-10323
- Radio astronomy research in solar system, galaxies, supernovas, radio galaxies and cosmology 01 p0139 A66-11159
- Solar modulation of low-energy galactic helium spectrum as observed on IMP I satellite 03 p0418 A66-12671
- High energy electron influence on electron distribution function and effect on spectra of nonthermal galactic and extragalactic radio sources 04 p0575 A66-14171
- Neutrino producing cooling reaction rates indicate that discrete X-ray sources located in direction of galactic center are not neutron stars 05 p0760 A66-14895
- Radio source spectrum, discussing spectral indices, electron energy and H II density in quasi-stellar and high brightness-temperature sources 05 p0762 A66-15279
- Solar and galactic cosmic ray characteristics, origin and flux-time variations, examining relation between solar flares and geomagnetic storms 05 p0756 A66-15751
- Galactic cosmic ray intensity modulation by interplanetary plasma turbulence, noting cosmic ray and geomagnetic storm 07 p1122 A66-17987
- Spectral variation of low energy galactic cosmic ray protons and helium nuclei measured by balloon flights 07 p1123 A66-17995
- Cosmic ray origins including galactic rays, RF radiation, metagalactic gamma radiation, etc 09 p1437 A66-20202
- Galactic and metagalactic cosmic gamma- and X-ray intensities 09 p1437 A66-20203
- Theoretical energy spectrum for galactic cosmic radiation based on experimental solar cosmic ray data 09 p1437 A66-20204
- Ultrahigh energy primary cosmic ray energy spectrum calculated from EAS particle-number spectrum 09 p1437 A66-20206
- Mechanisms for cosmic-radiation intensity variations, including cosmic-ray modulation effects, solar cosmic rays and variations of galactic origin 09 p1437 A66-20207
- Twenty-seven day modulation of galactic cosmic rays attributed to axisymmetric solar wind of magnetic inhomogeneities 09 p1438 A66-20211
- Galactical distribution of X-ray sources, noting concentration toward galactic plane 09 p1442 A66-20414
- Probable relation between OB associations, runaway stars, supernovas and X-ray sources 09 p1443 A66-20469
- Spectra of generically related cosmic ray species 09 p1443 A66-20688
- UV radiation from galaxies, radio sources, quasi-stellar objects and Seyfert galaxies, examining Lyman alpha fluxes 10 p1598 A66-21098
- Mechanism for production of X-rays and gamma rays in galaxies, noting photon and electron spectrum 10 p1598 A66-21100
- IR emission lines possibly originating from galactic, interstellar and stellar hydrogen regions 10 p1599 A66-21113
- Galactic X-rays, discussing soft X-rays, UV radiation, isotropic X-rays, electromagnetic radiation from X-ray sources, etc 10 p1600 A66-21854
- Lower limit of age of cosmic ray nuclei, flux ratio of Be nuclei to B nuclei and intergalactic cosmic ray propagation 12 p1938 A66-24092
- Solar wind and geomagnetic storm effects on galactic cosmic ray 11-year variations and energy spectrum, from neutron monitor data 12 p1940 A66-24160
- Solar wind as radial flux of electromagnetic inhomogeneities, galactic ray modulation by solar wind and cosmic ray intensity variation with sunspot cycle 12 p1940 A66-24162
- Electrical discharge theory of cosmic atmospheric phenomena, relating lightning, novae and quasars 12 p1950 A66-24394
- Quantum mechanics and gravitational effect on origin of cosmic particles, discussing Schroedinger wave equation, electric potential and alpha decay 12 p1944 A66-24465
- Shielding of manned Mars vehicles from solar and galactic cosmic radiation and radiobiological tolerance criteria 13 p2190 A66-25261
- Aerobee rocket measurements of cosmic X-ray sources emanating from Cygnus A, M-87 and galactic supernova remnant Cassiopeia A 13 p2174 A66-25836
- Galactic plane emission at 408 mc/s using Australian 210 ft radio telescope 13 p2186 A66-26030
- Solar radio burst at night during recording of 18-mc galactic noise by globally located antennas 13 p2176 A66-26367
- Galactic low RF background radiation spectrum and measurements of sky brightness temperature 14 p2383 A66-27708
- Telescopic measurements of primary energy spectra and abundances of He 3 and He 4 in galactic cosmic radiation 16 p2793 A66-30198
- Inverse Compton X-ray and gamma ray flux due to high energy electron interaction with cosmic blackbody radiation at 3.5 degrees K 17 p2992 A66-31914
- Free-free galactic X-ray emission from hot fully-ionized hydrogenic plasma 17 p2992 A66-31916
- Crystal spectra and broadband measurements of solar and galactic UV, X-rays, gamma rays, etc, outside Earth atmosphere 17 p2998 A66-32030
- Solar protons and neutrons shown not to play important part in production of radiation belt protons 17 p2993 A66-32529
- Proton energy density, pressure and compressibility of galactic cosmic ray gas 18 p3165 A66-34140
- Astronomical model study of physics of penetration of interstellar cosmic rays into solar system 18 p3168 A66-34342
- Galactic acceleration and solar modulation of cosmic rays examined via energy spectrum of galactic electrons, estimating Fermi acceleration, low energy electron flux, etc 18 p3177 A66-34756
- Galactic X-ray energy spectrum noting equipment used, shape of spectra in terms of thermal radiation intensity, etc 18 p3177 A66-34757
- Sidereal time variation of cosmic rays explained by diffusion in galactic arm for colinear magnetic field and proximity of solar system 18 p3178 A66-34762
- Galactic cosmic ray diffusion into solar system as affected by zonal distribution of solar activity, noting 11-year modulation 18 p3180 A66-34771
- Long-term modulation of cosmic ray intensity in interplanetary medium 18 p3180 A66-34774
- Galactic cosmic ray anisotropy behavior obtained from observations of daily variation of cosmic ray intensity 18 p3182 A66-34782
- Modulation effects in galactic and solar cosmic rays in interplanetary space 18 p3185 A66-34806
- First-order modulation effects of galactic cosmic radiation, considering hysteresis effect and variation of energy spectrum in 11-yr modulation 18 p3186 A66-34811
- Solar modulation of galactic protons and helium nuclei from 1963 to 1965 18 p3188 A66-34821
- Low energy galactic cosmic radiation studies by high altitude balloon flights carrying nuclear emulsions, including solar activity, energy and intensity spectra, etc 18 p3189 A66-34829
- Balloon flight data obtained at 50 and 65 degrees N geomagnetic latitude on spectra of primary cosmic ray hydrogen and helium nuclei, using Cerenkov scintillator technique 18 p3190 A66-34831
- Solar modulation and time variation of differential energy spectrum and flux of primary helium nuclei in 30 to 90 mev/nucleon energy range 18 p3190 A66-34832
- Chemical abundances and energy spectra of nuclei in galactic radiation measured in interplanetary space by OGO-I satellite 18 p3190 A66-34833
- Seventy-channel scintillation spectrometer high atmospheric measurement of cosmic gamma radiation of extraterrestrial origin 18 p3192 A66-34845
- Skyhook balloon flight Geiger counter cosmic ray monitor measurements of energy and charge spectra of galactic rays at solar minimum 18 p3192 A66-34847
- Energy spectrum of primary galactic X-rays

- between 20 and 50 kev observed during night with NaI crystal 50-channel spectrometer 18 p3193 A66-34851
- Delta electrons formed in interstellar hydrogen-galactic ray collision 19 p3452 A66-35283
- Galactic and atmospheric X-ray characteristics determined by two scintillation counters borne on sounding rocket booster 19 p3452 A66-35354
- Balloon measurements of cosmic ray hydrogen and helium nuclei at locations with nominal geomagnetic threshold rigidities 19 p3452 A66-35926
- Low energy cosmic ray modulation relationship to observed interplanetary magnetic field irregularities in terms of diffusion, using space probes 19 p3454 A66-36765
- Astronomical model for diffusion of galactic cosmic rays in solar system, based on zonal character of solar activity 20 p3630 A66-37329
- Cosmic radiation theories and experimental supporting evidence, origin of cosmic ray particles and relation between cosmic ray sources and radio wave 20 p3631 A66-37436
- Production and equilibrium spectrum of galactic cosmic ray secondary electrons arising from secondary pion and neutron decay 20 p3633 A66-38200
- Rocket instrumentation for galactic X-ray observation, noting scintillation counter, proportional counter and GM counter 20 p3636 A66-38237
- Sidereal anisotropy indicated for charged galactic cosmic radiation obtained by celestial scanning, using narrow angle moon telescope 21 p3808 A66-38466
- Radio electron density and magnetic field in galactic halo from primary cosmic ray and radio brightness measurements 21 p3817 A66-39563
- Spectroscopic evidence on helium abundance of stars in galactic halo 21 p3817 A66-39565
- Galactic radio sources noting disk model brightness distribution, relativistic particle energies, continuous particle acceleration and ratio between proton and electrical component of cosmic radiation 22 p3985 A66-40952
- Celestial X-ray sources at low galactic longitude located by rocket observation 23 p4123 A66-41148
- Rocketborne instruments for observing galactic X-rays including scintillation and proportional and GM counters 23 p4067 A66-41287
- Sporadic E layer formation at night, noting ionization sources and intensity 23 p4064 A66-41645
- Source spectra and composition of galactic cosmic rays implied by analysis of interstellar and interplanetary travel, noting solar modulation 24 p4265 A66-42716
- Shielding of manned Mars vehicles from solar and galactic cosmic radiation and radiobiological tolerance criteria 24 p4283 A66-42785
- GALACTIC RADIO WAVE**
- Preponderance of negative velocity hydrogen, found equally in north and south galactic polar caps, surveyed with Harvard 60-ft antenna 02 p0292 A66-12187
- Ionospheric effect on spectrum of general background galactic radio emission below 10 mc/s 02 p0284 A66-12192
- Comparison of optical and radio observations of spiral structure of galaxies 03 p0423 A66-12454
- Polarized OH emission near W3 region 04 p0579 A66-14175
- OH emission in direction of source W49, comparing earlier observations 04 p0579 A66-14176
- Survey of radio emission fluxes from eight Sb-type, ten Sc-type, two Ir-type and one Pec-type galaxy 05 p0759 A66-14873
- Galactic cluster radio emission 05 p0759 A66-14887
- Galaxy M82, analyzing continuous optical magnetobremssstrahlung and relativistic electrons 05 p0752 A66-15380
- Origin of continuum radio emission in directions away from Milky Way 05 p0766 A66-15480
- Times of peak cosmic radio noise concentration and usefulness to forward propagation ionospheric scatter reception on DEW-Line as performance monitor, etc 06 p0825 A66-15985
- Galactic center dynamics revealed by hydroxyl radicals present in interstellar medium, noting detection of radio emissions caused by star-excited atoms and molecules 09 p1453 A66-20239
- Galactic radio astronomy developments including 21-cm line studies, galactic discrete sources, background radiation and polarization 10 p1601 A66-21059
- Galactic radio noise between 1.5 and 10 mc observed by Alouette I satellite 10 p1604 A66-21121
- Continuous radio emission in our Galaxy, discussing radio stars, background features, corona, emission mechanisms, etc 11 p1767 A66-22259
- RF spectrum of OH radiation in interstellar space, including emission intensity and linear polarization 11 p1774 A66-22963
- OH emission and narrow spectral features made with circularly polarized field horn on 140-ft radio telescope in November 1965 14 p2384 A66-27901
- Radio astronomy applications, noting solar and galactical emissions, planetary radiation measurement, instrumentation, etc 17 p2998 A66-32028
- Empirical decision-making techniques, determining nature of quasi-stellar source or galaxy 18 p3234 A66-34616
- Brightness distribution of 3C444 radio source obtained from lunar occultation 18 p3235 A66-34658
- First spectral observation at 21-cm line with radiotelescope at Nancy, France 20 p3654 A66-37825
- Direction, frequency and polarization of radio emission from galactic OH determined by hypothesis of stimulated emission 21 p3814 A66-39213
- Linear polarization of continuum emission from galaxy and discrete sources, detection in radio astronomy, noting relevant synchrotron theories 21 p3815 A66-39488
- Millimeter wave radio astronomy, discussing solar system, galaxy and extragalactic sources 22 p3983 A66-40732
- GALAXY**
- SA MILKY WAY
- SA RADIO GALAXY
- SA SPIRAL GALAXY
- SA STAR
- SA SUPERNOVA
- Einstein gravitational equation applied to galaxies and quasars, using spherical model with spherically symmetric distribution of matter 01 p0138 A66-11033
- Ring of ionized hydrogen in region 3.5 to 4.5 kpc from galactic center 03 p0426 A66-12908
- Resonance cases and small divisors in third integral of motion used to calculate galactic orbits on plane of symmetry of nonaxisymmetric galaxy 08 p1296 A66-19353
- Data on large-scale distribution of interstellar hydrogen important for studies of spiral arms and galactic disk 11 p1766 A66-22257
- Optical interstellar absorption lines and galactic structure, noting observational data and comparison with 21 cm studies 11 p1767 A66-22258
- Stellar dynamics of Galactic system, discussing relations between density and velocity distributions of stars 11 p1767 A66-22262
- Elliptic galaxy formation by expansion from steady state according to Einstein-de Sitter law 11 p1775 A66-23069
- Peculiar galaxies and associated radio sources and quasars 12 p1947 A66-23659
- Dimensional structure and particle dynamics of metagalaxy 14 p2379 A66-27224
- Ring of ionized hydrogen in region 3.5 to 4.5 kpc from galactic center 14 p2380 A66-27256
- Gravitational theory for dynamical basis of quasi-stationary spiral structure of stars 14 p2381 A66-27500
- Galactic structure observational aspects - NATO International Summer Course, Athens September 1964 15 p2593 A66-28980

- Formula derivation for stellar motion and analysis of stellar spatial distribution using Kapteyn scheme and Schalen-Lindblad method 15 p2593 A66-28980
- Radio astronomy measurement of galactic structure, using thermal and nonthermal radiation and neutral hydrogen line emission 15 p2594 A66-28980
- Density and velocity distributions of steady state stellar systems in Galaxy, examining relation between spiral structure and composition 15 p2594 A66-28980
- Observational needs for galactic research, discussing stellar luminosity, interstellar absorption, etc 15 p2594 A66-28980
- Energy dissipation channels of nuclear and electron components of cosmic rays in Galaxy and Metagalaxy 15 p2576 A66-29130
- Cometary motion in outer solar system, region, taking galactic nucleus as perturbing body 15 p2596 A66-29130
- Interstellar medium survey including cloud structure and velocity field of interstellar gas, galactic magnetic field, etc 16 p2799 A66-30520
- Presence and detectability of hydrogen molecular form in galaxy 17 p3001 A66-32230
- Identification of radio source 05 21-36 with N-galaxy, noting high optical luminosity and tabulated spectrogram data 20 p3650 A66-37329
- Spiral patterns of disk-like galaxies explained in terms of density waves that are collective modes of stellar system analogous to plasma waves 24 p4273 A66-42220
- GALERKIN METHOD**
- Asymptotically accurate estimates
- Bubnov-Galerkin method error in eigenvalue problem as applied to boundary value problem 01 p0091 A66-10101
- Stability theory for elastomechanics systems using algebraic techniques based upon Galerkin method 01 p0153 A66-10401
- Amplitude of subharmonic vibrations at even order and frequency limits
- excitation for systems described by Duffing equation 01 p0159 A66-11101
- Large amplitude-free oscillations of beams and plates by means of Ritz-Galerkin technique 02 p0297 A66-11501
- Solution to nonlinear periodic system using Galerkin approximation method of generated trigonometric polynomials 04 p0539 A66-13901
- Bubnov-Galerkin method extended
- solution of any system of equations not associated with variational principles 08 p1306 A66-18601
- Convergence of Galerkin method
- nonconservative stability problems of thin elastic plates and thin elastic rods 08 p1311 A66-19301
- Galerkin method to solve free vibration problem of thin oblate spheroidal shells 09 p1468 A66-20901
- Quasi-linear boundary value problem solved with Galerkin convergence method 12 p1902 A66-23801
- Stress concentration at circular hole in orthotropic cylindrical shell, using coordinates system and Bubnov-Galerkin method 13 p2206 A66-26401
- Compatibility conditions for stress-strain and Galerkin-Papkovich representations of field equations for linear asymmetric elasticity theory 14 p2408 A66-28301
- Convergence rate of method of least squares and some approximate Galerkin type methods in eigenvalue problems 15 p2526 A66-28601
- Differential approximation linearization technique compared with Galerkin method 16 p2732 A66-30201
- Intrinsic electric field of rarefied ion electron plasma in external magnetic field and plasma stability, noting use of Galerkin method to determine plasma layer slippage 16 p2760 A66-30701
- Monograph on nonlinear bending theory of three layer plates, covering mathematical theory of elasticity stress-strain diagram Galerkin method, maximum deflection criteria, etc 16 p2819 A66-31101
- Numerical problems in application of Urabe results in considering periodic nonlinear differential systems, obtaining Galerkin approximations 16 p2737 A66-31201
- Stationary viscous incompressible fluid

Flow past rough surface, noting solution stability and friction stress determination for given pressure 16 p2688 A66-31301

Gradient Galerkin vector for elastodynamic problem of isotropic inhomogeneous body 16 p2823 A66-31707

Computer solution using Bubnov-Galerkin method to determine concentrated force effect on shallow spherical dome 17 p3026 A66-32601

Nonconservative elastic stability problems treated by Galerkin and Ritz methods 20 p3669 A66-37541

Taylor stability of time-dependent flow between two concentric circular cylinders, noting solution of differential equations for perturbations by Galerkin method 22 p3902 A66-40706

Periodic solutions of nonlinear differential systems, examining Galerkin procedure and method of averaging 23 p4084 A66-41054

Analogue of Galerkin method for solving boundary value problems and quasi-linear operator equations 23 p4086 A66-41569

Steady fully developed MHD channel flow of viscous electrically conducting fluid studied by Galerkin method under applied magnetic and electric fields 23 p4107 A66-41886

Galerkin based stability theory of elastic equilibrium extended to include nonconservative loads 23 p4097 A66-41983

Nonlinear flexural vibrations of thin circular rings analyzed, using Galerkin procedure on motion equations 24 p4285 A66-42142

Method of weighted residuals /MWR/, Galerkin method and variational method compared for approximate solution of differential equations 24 p4232 A66-42836

Flow behind shock wave in long tube analyzed by time effect and integrating equations, using Galerkin method 24 p4197 A66-42997

**GALLIUM**

Radiation damage to germanium, silicon, indium and gallium antimonides and arsenides 01 p0119 A66-10373

Gallium concentrations in iron phases of several chondritic meteorites 02 p0290 A66-11962

Retardation of gallium and arsenic or phosphorus diffusion in silicon 05 p0736 A66-14976

Experimental assembly using liquid gallium cycle for testing electromagnetic pumps and flow meters 06 p0918 A66-16847

Superconductivity of gallium metastable phase, noting transition temperature and critical field 08 p1267 A66-18649

Thermoconductivity of germanium alloyed with arsenic and gallium depends on impurity type starting from certain impurity concentration 14 p2359 A66-27178

Cyclotron resonance observation of electron scattering by Ga and In atoms in Ge 21 p3797 A66-38754

Butler iron meteorite composition, noting very high concentration of germanium, gallium and nickel exhibiting Widmanstätten pattern 22 p3978 A66-40014

**GALLIUM ALLOY**

Superconducting properties of niobium-gallium alloys at high temperatures, high current densities and high magnetic field intensities 01 p0123 A66-10703

Solubility range of 75 atomic percent vanadium-gallium system to determine phases in equilibrium and ascertain presence or absence of superconductivity 07 p1052 A66-18352

Superconducting properties and phase composition of silver-gallium alloys 09 p1411 A66-19960

Superconducting properties of niobium-gallium alloys at high temperatures, high current densities and high magnetic field intensities 11 p1758 A66-23308

Semiconducting properties of several gallium and indium antimony tellurides systems and their metallurgical aspects 17 p2986 A66-33296

**GALLIUM ANTIMONIDE**

Microstructural and X-ray studies of solid solutions of Ga-Sb-Te system to determine solubility region in gallium antimonide section of phase diagram 01 p0120 A66-10458

Resistivity and Hall coefficient vs temperature in heavily doped n-type GaSb and related semiconductors 04 p0561 A66-13734

Stimulated radiation from zinc diffusion p-n junctions in gallium antimonide crystals 04 p0569 A66-14355

Recombination radiation spectra of n-type gallium antimonide on concentration of tellurium base region 04 p0570 A66-14364

Galvanic and thermomagnetic coefficients of undoped polycrystalline p-type GaSb sample in weak magnetic field, emphasizing hole mobility 04 p0571 A66-14499

Stimulated emission in GaSb diodes made from crystals prepared by Czochralski method 07 p1096 A66-17336

Structural formation and electrical properties of polycrystalline thin films of GaSb obtained by discrete vacuum evaporation method 08 p1267 A66-18588

Lithium diffusion effects on electrical properties of tellurium doped n-type GaSb 10 p1578 A66-21582

Thermoconductivity measurements of p-type gallium antimonide in solid and liquid state 10 p1590 A66-22176

Optical excitation in indium arsenide and gallium antimonide yielding laser radiation 13 p2090 A66-25438

Laser action in gallium antimonide diodes, examining emitted light spectrum vs injected current, temperature effect, radiative efficiency, etc 13 p2100 A66-26184

Current dependence of recombination radiation intensity in gallium antimonide, determining radiation spectral distribution at low temperature 14 p2358 A66-27089

Shubnikov-de Haas oscillations in magnetoresistance of Li-diffused Te-doped n-type GaSb 14 p2366 A66-27764

Stimulated radiation from zinc diffusion p-n junctions in gallium antimonide crystals 14 p2368 A66-28253

Recombination radiation spectra of n-type gallium antimonide on concentration of tellurium base region 14 p2369 A66-28263

Coupling of electron motion to lattice longitudinal acoustic mode in n-gallium antimonide leading to variations in sound velocity 16 p2775 A66-30732

Minimum spectral line width, threshold current density, radiation-peak displacement and possible recombination mechanism for GaSb laser diode p-n junctions in coherent radiation 16 p2721 A66-31764

Thermoconductivity measurements of p-type gallium antimonide in solid and liquid state 19 p3441 A66-35790

Coupling between plasmons and polar phonons in degenerate semiconductor gallium antimonide analyzed, starting from electron-phonon Hamiltonian 19 p3447 A66-36400

Recombination radiation from Ga-Sb p-n junctions, noting spectral composition as function of current density and impurity concentration 20 p3618 A66-37563

Quasi-localized states associated with high-energy conduction-band minima in semiconductors, particularly Se-doped GaSb, plotting pressure-dependence of photoluminescence 20 p3618 A66-37598

Impurity atom behavior in diatomic InSb and GaSb crystal lattices analyzed, using nuclear gamma resonance, measuring absolute values of  $f$ , chemical displacements and line widths 21 p3799 A66-38922

I-V characteristics of p-gallium antimonide based tunnel junction at various temperatures analyzed, finding secondary peaks exhibited by inverted diodes 21 p3799 A66-38925

Current dependence of recombination radiation intensity in gallium antimonide, determining radiation spectral distribution at low temperature 22 p3967 A66-40845

Ultrasonic wave absorption in GaAs and GaSb compounds at temperatures from 95 to 300 degrees K 23 p4113 A66-41417

Hall coefficient, electrical conductivity and thermoelectric power of GaSb-Ga<sub>2</sub>Te<sub>3</sub> solid solutions as functions of composition and temperature 24 p4254 A66-42425

**GALLIUM ARSENIDE**

Laser transition identification in electron beam pumped gallium arsenide, primarily on concentration of shallow donors and

acceptors 01 p0081 A66-10348

Controlled bulk semiconductor amplification possible using n-type gallium arsenide with applied electric field greater than 3000 v/cm 01 p0036 A66-10351

Gallium arsenide injection laser for prolonged operation at liquid nitrogen temperatures 01 p0081 A66-10369

P-n transitions in gallium arsenide investigated as factor in performance of such diodes as converters of ultrasonic into electrical oscillations 01 p0036 A66-10422

Domain characteristics and crystal property effects in materials and configurations for Gunn effect devices 01 p0041 A66-10571

Growth and propagation of space charge waves in presence of differential negative resistance in n-GaAs 01 p0122 A66-10577

Thermal limitations on capabilities of gallium arsenide p-n junction lasers 01 p0082 A66-10895

Electrical and electroluminescent properties of gallium arsenide diodes with high resistivity region flanked by low resistivity R and N regions 01 p0043 A66-10896

Laser-action threshold in electron-beam excited gallium arsenide and effect of temperature and doping 01 p0083 A66-10971

Continuous operation of gallium arsenide injection laser cooled by helium gas flow 01 p0084 A66-11190

Impurity bandwidth and separation from conduction band in n-type GaAs determined from electroconductivity and Hall effect data 02 p0276 A66-12077

Electric properties of n-type GaAs after alloying with Cu, determining impurity concentrations 02 p0277 A66-12095

FM by mechanical tuning of cavity setting in gallium arsenide crystals for application to communication system 03 p0332 A66-12428

GaAs optically coupled transistor structure with lasing emitter 03 p0377 A66-12442

Synchronization of microwave oscillations in n-type GaAs, noting pulse spectrum 03 p0377 A66-12444

Acceptor level in iron doped Ga-As moves toward valence band with increasing temperature at approximately same rate band gap decreases 03 p0410 A66-13004

Lasing in p-type GaAs in which population inversion is brought about by avalanche breakdown of high resistivity region in material 03 p0378 A66-13008

Electrical resistivity and Hall coefficient of undoped n-type gallium arsenide with carrier concentrations measured at various temperatures as function of uniaxial compression and hydrostatic pressure 03 p0412 A66-13149

Current-voltage characteristics of gallium arsenide diode noting temperature effect on threshold voltage and breakdown current 03 p0346 A66-13323

Current-voltage characteristics of zinc-diffused gallium arsenide diodes measured between 4.2 and 300 degrees K with varying carrier concentrations in n-type region 04 p0494 A66-13733

Temperature dependence of electric conductivity in indium antimonide and gallium arsenide measured by noncontact method in terms of Q-factor change 04 p0563 A66-13892

Thermometric characteristics of gallium arsenide and germanium diodes 04 p0495 A66-13894

Semiconductor maser design and principles tabulating indium phosphide, gallium and indium arsenide types 04 p0532 A66-14183

Recombination radiation in gallium arsenide due to alpha particles 04 p0565 A66-14269

Semiconductor p-n junction laser consisting of gallium arsenide-phosphorus solid solution 04 p0532 A66-14274

Thermoconductivity of gallium arsenide from 300 to 470 degrees K 04 p0566 A66-14299

Laser excitation in gallium arsenide anode by slow electrons, taking into account diffraction and absorption losses 04 p0533 A66-14319

Tellurium alloyed impurity on IR absorption spectrum in n-type gallium arsenide 04 p0569 A66-14360

Electric oscillation by monochromatic light

in high resistivity gallium arsenide, noting temperature dependence 04 p0569 A66-14361

Electrical properties of germanium-gallium arsenide heterojunctions of p-n and n-n structure 04 p0569 A66-14362

Optically connected laser constructed on gallium arsenide p-n junction, noting coherent radiation 04 p0533 A66-14363

Electron spectrum in highly alloyed gallium arsenide 05 p0730 A66-14650

Gallium arsenide recombination-radiation spectrum discussing effects of impurities on short wave radiation band energy 05 p0731 A66-14657

Oxygen alloyed gallium arsenide, explaining anomalous mobility distribution in crystals during fusion in presence of oxygen 05 p0731 A66-14658

Gallium arsenide p-n junction laser diode covering injection current distribution, density and emission spectra variation 05 p0692 A66-14659

Diffusion rate of silicon from sputtered film of silicon into gallium arsenide as function of ambient arsenic pressure at 900 and 1000 degrees C 05 p0732 A66-14665

Thermal diffusion of impurity atoms suggested as possible cause of GaAs Esaki diode deterioration by Weisberg and Gold 05 p0733 A66-14672

Recombination emission process in direct semiconductor devices for realization of high speed nondestructive readout from tunnel diodes without direct measurement or perturbation 05 p0647 A66-14828

Shift of emission spectrum in pulsed GaAs laser, noting waveform characteristics 05 p0696 A66-14974

Radiation damage and annealing of gallium arsenide laser diode 05 p0696 A66-14979

Exponential absorption edge of gallium arsenide 05 p0742 A66-15870

Lattice thermal conductivity of GaAs and InSb calculated for 2 to 300 degrees K, considering separate contributions of longitudinal and transverse phonons 05 p0742 A66-15872

Electron mobility of gallium arsenide-phosphorus alloys 06 p0923 A66-16380

GaAs diffusion-layer transducer for VHF acoustic delay line 06 p0852 A66-16639

Gallium arsenide tunnel diode oscillator tuned with 5-10 GHz YIG 06 p0853 A66-16648

Gunn effect n-type GaAs diode phase locked to stable frequency by injecting CW signal into circuit along with video pulse 06 p0925 A66-16671

Current instabilities in gallium arsenide, noting oscillation frequency and volt-ampere characteristics 06 p0925 A66-16688

Characteristics of spontaneous IR source for which external quantum efficiency of forward-biased GaAs p-n junction measures 40 percent at 20 degrees K 06 p0855 A66-16766

X-ray diffraction method for measuring thermal expansion coefficient of germanium, silicon, indium antimonide and gallium arsenide 06 p0930 A66-17047

Current oscillations accompanied by mobile regions in high resistance gallium arsenide subjected to electric field, measurement of Hall effect shows these regions are of high resistance 06 p0930 A66-17066

Semiconductor radiation damage in III-V compounds indium antimonide, gallium arsenide and indium arsenide, including values of threshold displacement energies, post-irradiation recovery, etc 06 p0935 A66-17129

Diffusion of Li and Cu in GaAs crystals indicates reaction involving divacancies in donor-doped and undoped crystals 06 p0935 A66-17132

Implementation of Kossel line technique of crystallographic analysis and lattice parameter measurement in study of lattice defects in semiconductor crystals 06 p0935 A66-17133

Proton and electron bombardment induced defects in GaAs studied by examining spectral composition and intensity of proton and cathode luminescence 06 p0936 A66-17135

Electron mobility changes in GaAs single crystals due to electron irradiation interpreted in terms of ionized-scattering theory 06 p0939 A66-17151

Radiative recombination in p-n junctions

produced by diffusion of beryllium into GaAs with very high electron concentration 07 p1096 A66-17325

Energy spectrum of recombination radiation from forward-biased heavily doped GaAs diodes at 4.2, 77 and 290 degrees K as function of current 07 p1096 A66-17326

Optical model for refractive index variation of zinc-diffused GaAs injection laser at 77 degrees K and 8400 angstroms 07 p1041 A66-17328

Temperature dependence of loss and gain factor of GaAs diode and threshold current density of GaAs laser and junction luminescence of GaAs 07 p1042 A66-17332

Temperature dependence of emission spectrum and threshold current in GaAs lasers 07 p1042 A66-17333

Uniaxial strain effects in /100/ junction orientation GaAs laser diodes, discussing photon polarization 07 p1042 A66-17335

Optical emission induced in gallium arsenide samples by bombardment with high energy electron pulses 07 p1096 A66-17338

Spectral distribution of luminescence excited in n-type GaAs and p-type GaP by fast-electron bombardment 07 p1096 A66-17339

Spectral distribution of recombination radiation observed in various samples of GaAs irradiated by electron beam 07 p1043 A66-17340

Depletion layer 1000 mc transducers for producing or detecting hypersonic waves in solids, using CaS or GaAs for high acoustoelectrical conversion efficiency 07 p1009 A66-17827

Time dependent fluctuations in photoconductivity of Cu doped low ohmic n-type gallium arsenide exposed to IR radiation 07 p1099 A66-17876

Instabilities of current and potential distribution in n-type GaAs and InP in electric field of several thousand v/cm 07 p1104 A66-18221

Continuous-wave operation of laser diode at room temperature 07 p1044 A66-18245

Coherent radiation from gallium arsenide p-n junction formed by beryllium diffusion, noting radiative recombination with zinc 07 p1105 A66-18378

Current-voltage relationship of Au on GaAs Schottky barrier, examining introduction of single temperature independent parameter 07 p1106 A66-18399

Formed point contact gallium arsenide backward diodes compared with conventional millimeter-wave diodes show advantage as low level baseband current detectors 08 p1189 A66-18658

Radiotracer measurements of copper incorporated from quartz into GaAs 08 p1268 A66-18663

Photoelectric behavior of n-type Ga-As wafers having shallow zinc diffused surface layers 08 p1269 A66-18869

Behavior of high field instabilities in n-type gallium arsenide, examining device prospects related to phenomenological model for Gunn effect 08 p1270 A66-19122

Gallium arsenide luminescent diodes with triangular resonator producing coherent emission at high density current 08 p1193 A66-19195

Work function of A and B faces of /111/ surface of gallium arsenide in dry and humid media 08 p1274 A66-19317

Mossbauer effect in polycrystalline indium phosphide and gallium arsenide 08 p1277 A66-19618

Fe, Ni and Co in gallium arsenide determined by tunnel spectroscopy 08 p1278 A66-19624

Thermal conductivity and emf of gallium arsenide at low temperatures, showing phonon drag effect 08 p1278 A66-19626

Measurement results on frequency doublers in millimeter wave region, using unencapsulated silicon varactor diodes and gallium arsenide/phosphor bronze point-contact varactor 08 p1198 A66-19745

Electroreflectance effect on gallium arsenide surfaces at various ranges of photon energies 08 p1279 A66-19838

Gallium arsenide phosphide heterojunction diode used to triple from X band to Ka band 09 p1350 A66-19924

Recombination-radiation spectra of GaP-GaAs p-n heterojunctions 09 p1412 A66-19984

Mobility of hot electrons in runaway regime of n-type InSb and GaAs at low temperatures 09 p1412 A66-19987

Orientation effect on zinc diffusion rate in p-n junctions, using gallium arsenide single crystals as initial material 09 p1412 A66-19996

Change in photoconductivity and photoelectromagnetic effect of gallium arsenide single crystals caused by constant illumination of spectral compositions 09 p1412 A66-19997

Dark electric conductivity, Hall effect and thermally stimulated currents in gallium arsenide single crystals 09 p1413 A66-19998

Phonon drag in p-GaAs, graphing temperature dependence of thermoelectric power 09 p1426 A66-20196

Effective mass of electrons in n-type gallium arsenide deduced from measurements of Hall coefficient and thermoelectric power 09 p1426 A66-20197

Electron Hall mobility from 4 to 300 degrees K with undoped single crystals of GaAs grown in quartz boats by Bridgman method and zone-melting technique 09 p1430 A66-20848

Frequency spectrum of microwave emission from n-type gallium arsenide 10 p1574 A66-21357

Vapor etching of gallium arsenide crystals with hydrogen chloride, noting usefulness in pretreatment for epitaxial substrates 10 p1575 A66-21358

X-ray analysis of zinc diffusion induced defects in gallium arsenide 10 p1576 A66-21547

Microplasma breakdown in reverse biased p-n junctions in epitaxial gallium arsenide 10 p1577 A66-21571

Directional radiation from incoherent electroluminescent diodes, noting increase in refractive index for dielectric slab model 10 p1509 A66-21583

Silicon and selenium doping effects on gallium arsenide laser characteristics 10 p1543 A66-21879

Increased luminescence of gallium arsenide diodes by coating with titanium oxide 10 p1514 A66-22031

Boltzmann equation for Gunn effect in GaAs, discussing scattering processes, unjustifiability of use of drifted Maxwell distribution, etc 10 p1583 A66-22067

Growth and propagation of infinitesimal space charge waves under differential negative resistance and inhibition of dipole waves and domains in gallium arsenide, estimating thermoelectric effects 10 p1584 A66-22068

Dependence of threshold field for Gunn oscillations on energy minima separation, noting decrease under uniaxial stress 10 p1584 A66-22073

Properties of high field domain in long samples of gallium arsenide, determining domain velocity and amplitude, using surface potential probe 10 p1584 A66-22074

Gunn effect in polar semiconductors described by transferred electron model, that predicts bulk differential negative resistance and domain formation 10 p1585 A66-22075

Gunn effect oscillations in high resistivity gallium arsenide cease when product of conduction electron density and sample length drops below certain level 10 p1585 A66-22076

CW microwave oscillation in bulk GaAs, discussing harmonic content, linewidth, circuit and electronic tunability, etc 10 p1585 A66-22077

Device fabricating techniques and circuit configurations for high peak power gallium arsenide oscillators 10 p1585 A66-22078

Linear microwave amplification in n-type gallium arsenide bulk semiconductor at room temperature, noting negative conductance and peak gain 10 p1515 A66-22079

Microwave oscillations in epitaxial layers of gallium arsenide 10 p1585 A66-22080

Model technique calculation of electrostatic domains in two-valley /GaAs/ semiconductors 10 p1586 A66-22092

Threshold field dependence on intervalley separation in transferred electron GaAs

- oscillator 10 p1586 A66-22093
- Current saturation from negative resistance and domain trapping in n-type gallium arsenide crystal 10 p1586 A66-22096
- Phase locking of two gallium arsenide oscillators at 2 to 4 gc under CW operation 10 p1516 A66-22097
- Microwave amplification in n-type germanium arsenide 10 p1516 A66-22098
- Floating zone technique for preparing high purity GaAs crystals for CW microwave devices 10 p1516 A66-22099
- Microwave oscillations from reverse-biased gallium arsenide diodes of diffused p-n junctions and surface barrier structures 10 p1516 A66-22102
- High cut-off frequency epitaxial gallium arsenide varactors generating continuous wave power when biased in avalanche region, showing dimensions, resistivities, etc 10 p1516 A66-22103
- Gallium arsenide laser excitation by fast electrons 10 p1544 A66-22146
- Retention of semiconductor properties by gallium arsenide after irradiation by fast-neutron flux 10 p1589 A66-22167
- P-n transitions in gallium arsenide investigated as factor in performance of such diodes as converters of ultrasonic into electrical oscillations 11 p1664 A66-22608
- Current-voltage characteristics of CW X-band GaAs microwave Gunn generator 11 p1713 A66-23029
- Gallium arsenide whiskers on germanium structure, using electron diffraction photography and electron microscopy 11 p1757 A66-23280
- Behavior of trace elements in gallium arsenide and materials and methods used for ohmic contacts to n-and p-type specimens, stressing importance of indium 11 p1757 A66-23283
- Film scanning system using GaAs light-emitting diode and phototransistor light detector 11 p1709 A66-23476
- Hole and electron smearing and p-type absorption influence on threshold current 11 p1715 A66-23478
- Conductivity effective-mass of holes of gallium arsenide crystals with various hole concentrations determined from frequency dependence of spectral reflectivity in IR 12 p1928 A66-23942
- Parameter dependence of intermediate frequency voltage indicated during establishment of optimum conditions for optical receivers and merit of subcarrier mixing 12 p1832 A66-23960
- Continuous operation of gallium arsenide injection laser cooled by helium gas flow 12 p1890 A66-24011
- Reactance of gallium arsenide bulk oscillator in oscillating state, plotting values together with capacitance 12 p1835 A66-24140
- Differential equation for prediction of output spectra of unlocked driven bulk-GaAs and tunnel diode 12 p1836 A66-24147
- Oscillators in gallium arsenide p-n junctions for weak currents, obtaining relation between emission spectra and current-voltage characteristics of diodes 12 p1929 A66-24456
- Threshold energy for avalanche multiplication in semiconductors obtained from energy band structure and crystal momentum conservation in ionization process 13 p2157 A66-25035
- Defects in gallium arsenide crystals studied by internal friction with measurements showing damping peak at 140 degrees C 13 p2157 A66-25045
- Electroreflectance effect on gallium arsenide surfaces, noting reflectance response upon electric field modulation 13 p2158 A66-25051
- Width of spontaneous emission region in degenerate gallium arsenide p-n junction, noting spectral shifts, emission, interference, etc 13 p2159 A66-25064
- Quantitative observation of light modulation by electro-optic effect in reverse-biased GaAs p-n junctions at wavelength of 1.15 microns 13 p2159 A66-25067
- Gallium arsenide laser diode characteristics 13 p2089 A66-25112
- Transport equation for germanium-gallium arsenide-iodine system and epitaxial vapor growth preparation of GaAs-Ge heterojunction by closed tube process 13 p2161 A66-25185
- Copper diffused gallium arsenide p-n junctions, explaining current-voltage characteristics, light emission and capacitance of diodes at 300 and 77 degrees K 13 p2161 A66-25186
- Radial solution growth of GaAs single crystal layers and analysis of photoluminescence spectrum 13 p2164 A66-25488
- Consistency of Gunn effect with excitation of conduction band electrons from high mobility minimum to low mobility valleys 13 p2164 A66-25517
- Optically coupled linear circuit techniques, discussing GaAs p-n junction diode, noncoherent light emitters and silicon p-n junction photosensors 13 p2036 A66-25521
- Gunn effect in gallium arsenide, noting negative differential electron mobility at high electric fields in conduction band 13 p2165 A66-25546
- Photo emf of gallium arsenide determined as function of temperature, light intensity, external electric field and surface quality 13 p2165 A66-25679
- Solar noise in optical communications, background radiation dependence on detector aperture, noise power and application to GaAs diodes and gas lasers 13 p2024 A66-25833
- Electron spectrum in highly alloyed gallium arsenide 13 p2167 A66-25925
- Gallium arsenide recombination-radiation spectrum, discussing effects of impurities on short wave radiation band energy 13 p2167 A66-25932
- Oxygen alloyed gallium arsenide, explaining anomalous mobility distribution in crystals during fusion in presence of oxygen 13 p2167 A66-25933
- Gallium arsenide p-n junction laser diode, injection current distribution, density and emission spectra variation 13 p2092 A66-25934
- Photoluminescence and stimulated emission of gallium arsenide and indium antimonide obtained by optical pumping, noting effect of applied magnetic field on laser and diode emissions 13 p2099 A66-26182
- Spectral characteristics of gallium arsenide junction luminescence, noting radiative recombination mechanism, energy spread of impurity states and line shape temperature dependence 13 p2168 A66-26186
- Photoluminescence for p-and n-type gallium arsenide as function of exciting light intensity, noting minority carrier recombination mode, electron energy spectrum, etc 13 p2169 A66-26187
- Correlations and intensity fluctuations in light from individual lasing and nonlasing modes of CW GaAs laser and threshold noise change in laser emission 13 p2102 A66-26210
- Cooler for semiconductor lasers and photodetectors using low temperature gas 13 p2104 A66-26559
- Inverse variation of external efficiency of incoherent radiation in GaAs diode with temperature due to increased absorption, noting constancy of quantum efficiency 13 p2105 A66-26570
- Mathematical model of GaAs injection laser applied in determining maximum obtainable power output, using rate equations of electron and photon densities and thermal resistance for optimum value 13 p2105 A66-26572
- Morphology and structure of gallium arsenide crystals containing germanium core grown by iodine transport process in closed tube 13 p2170 A66-26587
- Gunn effect involving current oscillations higher than 1000 mc in GaAs crystal under applied electric field 14 p2355 A66-26920
- Superradiance in n-type gallium arsenide at room temperature excited by electron beam 14 p2306 A66-27028
- Gunn oscillators fabricated from ultra-thin gallium arsenide chips 14 p2248 A66-27050
- Spectral distribution of photosensitivity of gallium arsenide p-n junctions in near UV region 14 p2356 A66-27067
- Dislocation structure in single crystal indium antimonide and gallium arsenide studied by X-ray diffraction 14 p2357 A66-27071
- Tunnel effect in gallium arsenide diodes at low temperatures 14 p2248 A66-27081
- Injection-current dependence of intensity of recombination radiation of separate bands in gallium arsenide 14 p2249 A66-27084
- Beryllium diffusion into gallium arsenide in /111/ plane with various electron concentrations through vacuum deposition 14 p2358 A66-27087
- Semiconductor GaAs quantum generator with two-photon absorption of neodymium laser emission 14 p2307 A66-27187
- Time parameters of powerful laser measured with GaAs photodiode, noting time constant and time resolution of photodiode 14 p2309 A66-27750
- Tellurium alloyed impurity on IR absorption spectrum in n-type gallium arsenide 14 p2369 A66-28258
- Electric oscillation by monochromatic light in high resistivity gallium arsenide, noting temperature dependence 14 p2369 A66-28259
- Electrical properties of germanium-gallium arsenide heterojunctions of p-n and n-n structure 14 p2369 A66-28260
- Optically connected laser constructed on gallium arsenide p-n junction, noting coherent radiation 14 p2310 A66-28262
- Current-voltage characteristics of gallium arsenide diode, noting temperature effect on threshold voltage and breakdown current 14 p2260 A66-28297
- Degree of perfection of Ge and GaAs single crystals and epitaxial films effect on integral intensity jump at K absorption edge seen in Bragg diffraction 15 p2557 A66-28561
- Spontaneous emission and transverse gain measurements in GaAs injection laser at 80 degrees K and for 8466 angstrom wavelength 15 p2511 A66-28627
- IR radiation from gallium arsenide prepared with ohmic contacts and excited by various nanosecond pulses, noting radiation above Gunn effect instability region 15 p2561 A66-28688
- Free carrier absorption on GaAs films which exhibit absorption edge shift to lower energies 15 p2561 A66-28698
- Emission bands in electroluminescence from gallium arsenide diodes, noting intensity at high and low voltages and radiation and doping effect 15 p2562 A66-28714
- Optical inhomogeneities in n-type gallium arsenide crystals containing growth axis examined in transmission, using IR image converter, noting band gap changes 15 p2562 A66-28720
- Measurement of ultrasonic attenuation vs temperature for longitudinal and transverse phonons in semiinsulating gallium arsenide 15 p2563 A66-28729
- Tellurium concentration in doped GaAs correlated by electron probe microanalysis with variations in cathodoluminescence efficiency 15 p2564 A66-28878
- Capacitance variation of gold n-type gallium arsenide surface barrier diode when illuminated, applied to light detector, frequency modulation, etc 15 p2463 A66-29034
- Oscillations in power generation of n-type GaAs at frequencies far in excess of intrinsic Gunn frequency 15 p2565 A66-29041
- Gallium arsenide laser design using p-n junction obtained by diffusion of zinc in tellurium doped n-GaAs single crystal 15 p2514 A66-29057
- Electric characteristics of epitaxial Ge films vacuum deposited on semiinsulating GaAs substrates with thicknesses near one million angstroms 15 p2566 A66-29386
- Spontaneous and coherent photoluminescence in cadmium mercury telluride crystals excited optically by GaAs diode laser 15 p2517 A66-29390
- Gallium arsenide varactor diode design for parametric amplifiers and multipliers, noting efficient harmonic generation at higher microwave frequency 15 p2466 A66-29677
- Temperature dependence of electric conductivity in indium antimonide and gallium arsenide measured by noncontact method in terms of Q-factor change 15 p2568 A66-29705
- Thermometric characteristics of gallium

arsenide and germanium diodes 15 p2467 A66-29708

Gallium arsenide absorption edge dependence on strong electric fields 16 p2769 A66-30166

Intervalley scattering in III-V semiconductors, noting relation to Gunn effect, scattering in GaAs by longitudinal optic phonons, in InP by longitudinal acoustic phonons 16 p2776 A66-30733

Increased luminescence of gallium arsenide diodes by coating with titanium oxide 16 p2661 A66-30851

Static uniaxial compression effect measurement along /100/, /110/ and /111/ on electroreflectance spectrum of gallium arsenide, using electrolyte technique 16 p2777 A66-30951

Activation energy and corresponding concentration of unknown donor level in n-type gallium arsenide 16 p2777 A66-31002

Pump modulation factor of various GaAs and Si varactor diodes under operating conditions, noting experimental bandwidth gain via increased shot noise 16 p2663 A66-31017

Gallium arsenide and silicon solar cells under proton irradiation, noting decrease of short circuit current and open circuit voltage 16 p2636 A66-31018

Hall effect and resistivity of Zn doped GaAs 16 p2778 A66-31069

Dislocations and precipitates in GaAs injection lasers revealed by new A-B etchant 16 p2718 A66-31071

Arsenic overpressure, obtained by including metallic arsenic along with gallium arsenide, depresses defect concentration identifying primary defect species as arsenic monovacancies 16 p2779 A66-31086

Selective epitaxial deposition of semiinsulating GaAs for p-n junction and integrated circuit application 16 p2665 A66-31418

Laser cavity output optimization for maximum external quantum efficiency showing dependence on length and reflectivity for given current density 16 p2720 A66-31535

Vapor growth of Ge on Ge, GaAs and Si substrates, noting preparation methods, characteristics, etc 16 p2786 A66-31686

Origin of polarization of radiation from GaAs diodes, noting intensity dependence on current density and effect of anisotropic electron velocity distribution 16 p2667 A66-31770

Temperature dependence of lifetime of electrons and holes in GaAs, noting trapping effect of recombination centers and capture levels 16 p2787 A66-31771

Energy levels in forbidden band of gallium arsenide alloyed with silver or gold, determining impurity levels from temperature dependence of electric conductivity and Hall constant 16 p2789 A66-31791

Conduction-electron plasmons interaction with longitudinal optical phonon in Raman spectrum of gallium arsenide 17 p2975 A66-31888

P-n junction lasers for short range communications, examining design, technological problems and performance 17 p2933 A66-31956

High field V-I characteristics of n-type GaAs, noting critical field current saturation, field distribution, trapping, hysteresis, etc 17 p2978 A66-32403

Selective diffused junction laser, discussing GaAs laser used for quenching experiment 17 p2934 A66-32408

Large wavelength changes in gallium arsenide injection lasers due to changes in cavity Q 17 p2935 A66-32635

Schottky theory for metal semiconductors, noting correlation between work function and barrier height, electron affinity, etc 17 p2980 A66-32650

Intensity noise in multimode GaAs laser emission 17 p2935 A66-32689

Series connection of varactor wafers for higher breakdown voltages without loss of cut-off frequency, noting power output 17 p2887 A66-32698

Dipole phenomena in n-type GaAs caused by field perturbations, showing conditions for high and low field

nucleation 17 p2983 A66-33106

Continuous wave oscillations in n-type GaAs due to voltage controlled negative conductance 17 p2983 A66-33107

Current wave form observation in GaAs, using transmission line concept and pulse splitting technique 17 p2983 A66-33109

Self-modulation in gallium arsenide oscillators, noting material and field characteristics, Gunn effect, etc 17 p2895 A66-33114

Mossbauer effect in polycrystalline indium phosphide and gallium arsenide 17 p2983 A66-33132

Fe, Ni and Co in gallium arsenide determined by tunnel spectroscopy 17 p2984 A66-33138

Thermal conductivity and emf of gallium arsenide at low temperatures, showing phonon drag effect 17 p2984 A66-33140

Electroluminescent phenomena in injection lasers and laser diodes 17 p2985 A66-33251

Volt-ampere characteristics, electrical resistivity, and pressure effect on Gunn phenomena in n-type GaAs in high electric fields 17 p2985 A66-33292

Spectral and spatial distribution of origin of injection luminescence from epitaxial gallium arsenide transistors, noting correlation between energy peak and radiation recombination 17 p2986 A66-33295

Scanning electron microscope to examine crystal mosaic structures and lasing properties of gallium arsenide laser diodes 17 p2937 A66-33300

Gallium arsenide four-layer device doped with selenium fabricated by triple diffusion 17 p2896 A66-33302

Photocurrent and leakage current in zinc diffused GaAs junction diodes in terms of channel effect 17 p2987 A66-33319

Optical modulation in bulk gallium arsenide, using Gunn effect 18 p3152 A66-33606

Gallium arsenide diode laser as pulsed IR source for experiment and design considerations for radar indication of cloud height and visibility 18 p3066 A66-33616

Thermodynamic and optical properties of Ge, Si, diamond and GaAs, obtained by inelastic neutron scattering technique, used to measure vibrational spectrum 18 p3154 A66-33922

Coherent and spontaneous emission from lead-tin telluride alloys upon excitation by GaAs diode laser, noting band structure of alloy system 18 p3119 A66-34159

V-I characteristics of GaAs Schottky barrier rectifiers applied in determining relation between electron energy and complex wave vector over portion of forbidden energy gap 18 p3155 A66-34161

External quantum efficiency of tin doped GaAs electroluminescent diode, noting effect of zinc diffusion conditions 19 p3312 A66-35347

Reproducible ohmic contact preparation for high resistivity n-type GaAs in fabrication of Gunn oscillators 19 p3313 A66-35351

Orientation effect in GaAs injection lasers, noting emission characteristics and structural spectra 19 p3373 A66-35404

Thermal and electric properties of InAs-GaAs alloy as function of composition, impurity additions and temperature 19 p3436 A66-35427

Photoluminescence measurements on silicon doped gallium arsenide for detection of compensation in shallow surface layers 19 p3436 A66-35430

Distribution of edge-type dislocations in GaAs grown from solution by traveling solvent method determined, using etching techniques 19 p3437 A66-35432

Oxide films grown on GaAs in oxygen plasma 19 p3437 A66-35435

Gallium arsenide laser excitation by fast electrons 19 p3374 A66-35760

Retention of semiconductor properties by gallium arsenide after irradiation by fast-neutron flux 19 p3441 A66-35781

Spontaneous LF conductivity fluctuations in n-type gallium arsenide samples at 77 degrees K 19 p3442 A66-35822

Gallium arsenide lasers operating at room temperature investigated, based on diffusion p-n junctions, discussing emission spectrum 19 p3375 A66-36070

Enhancement of optical second-harmon generation by reflection phase matching ZnS and GaAs 19 p3375 A66-360

Varactor characteristics, applications, equivalent circuits, measurement problem etc 19 p3319 A66-361

Electron-phonon interaction phenomenon observed in GaAs and CdS, examining current saturation, ultrasonic emission charge carriers and acoustic amplification 19 p3445 A66-362

Replacing heated tungsten filament and filter by GaAs electroluminescent diode without filter for IR illumination 19 p3320 A66-362

Separation centers and dislocations during diffusion of Zn into GaAs at high temperatures, analyzing photographs of p-n junctions 19 p3445 A66-363

Microwaves from gallium arsenide excited by impressed voltage 20 p3612 A66-372

Crystal growth, diffusion and fabrication of gallium arsenide-phosphide junction laser with low threshold current densities 20 p3577 A66-374

Isolated GaAs transistors on high resistivity GaAs substrate, noting production via epitaxial etch-refill technique, performance and isolation properties 20 p3616 A66-374

Fourier analysis determination of optimum efficiency of cavity-controlled Gunn-effect oscillator when bias voltage is almost twice times voltage 20 p3527 A66-374

Avalanche transistor generation of jitter free nanosecond current pulses for driving GaAs laser diodes at low temperatures 20 p3528 A66-374

Space-charge-limited current voltage-dependent behavior in gallium arsenide 20 p3616 A66-374

Polarization of pulsed radiation from GaAs laser diode to determine origin of natural oscillations of resonator 20 p3578 A66-375

Reflectivity of heavily doped samples of n-type gallium arsenide of known carrier concentration and determination of dependence of effective mass upon carrier concentration 20 p3619 A66-376

Radiative recombination in gallium arsenide p-n junctions for weak current obtaining relation between emission spectrum and current-voltage characteristics of diodes 20 p3619 A66-376

Impurity concentration effect on maximum continuous wave power from gallium arsenide lasers at 77 degrees K 20 p3580 A66-377

Temperature dependence of absorption bands by localized vibration mode associated with substitutional impurities in phosphorus-doped gallium arsenide 20 p3622 A66-382

Gain factor variation with threshold current in reflective and antireflective film of GaAs laser with photon and current densities 20 p3581 A66-383

GaAs field emission cathode microscope patterns prepared by chemical etching at low temperature field desorption 20 p3623 A66-383

Vacuum thermal decomposition of InSb and GaSb surfaces, noting evaporation rates 20 p3624 A66-384

Fast-neutron irradiation effects on photoconductivity spectra and induced crystal structure defects for n- and p-type gallium arsenide single crystals 20 p3624 A66-384

Electron scattering mechanism in compensated gallium arsenide determined from Hall effect, Nernst-Ettingshausen effect and reluctance 21 p3798 A66-389

Optical coupling using gallium arsenide laser for variation of frequency of diode emission through small change in current density 21 p3746 A66-389

Radiation intensity dependence for various spectral bands of diffused gallium arsenide p-n junctions on current density 21 p3798 A66-389

Performance of GaAs semiconductor laser with resonator, noting dependence of forbidden zone width and absorption coefficient on free carrier concentration and incident photon energy 21 p3746 A66-389

Modulation by ultrasonic diffraction of 10 micron laser radiation in photoelastic Cd

GaAs and Si crystals 21 p3747 A66-39112  
 IR and microwave radiations associated with current controlled instability /negative resistance/ in GaAs, noting Gunn threshold and V-I characteristics 21 p3802 A66-39162  
 IR absorption, reflectivity and transmission in n-type gallium arsenide single crystals at room temperature due to impurities and high carrier concentration 21 p3805 A66-39580  
 Applications for ferroelectric cold conductors and GaAs light-sensitive diodes, examining supersonic amplification in CdS 21 p3716 A66-39620  
 High power Gunn-effect oscillators constructed from thin epitaxial layers of GaAs, noting relation of drive voltage to frequency, efficiency and power output 22 p3959 A66-39725  
 Temperature gradient-induced GaAs crystal inhomogeneity effects on electric properties 22 p3959 A66-39742  
 Far-field light emission mode pattern of GaAs diode injection lasers, dielectric gradient in inversion layer and refractive index in junction 22 p3930 A66-39743  
 Separation method for two components of excess and thermal currents in gallium arsenide tunnel diodes 22 p3873 A66-39748  
 Gallium arsenide crystal properties for use in optical filter 22 p3959 A66-39773  
 Photovoltaic response of p-n Ge-Si and Ge-GaAs heterojunctions dominated by carrier generation in narrow or wide gap material 22 p3960 A66-39813  
 Effect of donor Zn and Cd additions and acceptor Se and Te additions on rate of growth and morphology of epitaxial GaAs films grown from gas phase by chemical reaction 22 p3961 A66-39929  
 Performance characteristics of avalanche-breakdown transit-time GaAs varactor diodes for miniaturized microwave circuits 22 p3874 A66-39991  
 Curve analysis of current instabilities including Gunn effect in n-type gallium arsenide 22 p3961 A66-40045  
 Thermal conductivity of InP-GaAs solid solutions in vacuum 22 p3962 A66-40051  
 Deep centers in conducting n-type GaAs and production of Schottky layer 22 p3963 A66-40088  
 Stable space-charge layers in two-valley semiconductors 22 p3963 A66-40101  
 Spontaneous and stimulated emission from GaAs diodes with three-layer structures consisting of n-n-p, n-i-p or n-p-p diodes 22 p3932 A66-40102  
 Epitaxial germanium films on gallium arsenide substrate by vacuum evaporation, considering surface preparation 22 p3963 A66-40106  
 Resistivity measurement of large number of samples of bulk-grown n-type GaAs as function of temperature near 300 degrees K 22 p3877 A66-40179  
 Recombination radiation from GaAs p-n junctions with and without Fabry-Perot resonator, noting parameter dependence on current density 22 p3932 A66-40314  
 Solid state millimeter wave receivers for space vehicle environments, discussing integral mixer IF amplifiers, oscillators and varactor multipliers 22 p3879 A66-40733  
 Spectral distribution of photosensitivity of gallium arsenide p-n junctions in near UV region 22 p3966 A66-40826  
 Dislocation structure in single crystal indium antimonide and gallium arsenide studied by X-ray diffraction 22 p3966 A66-40829  
 Tunnel effect in gallium arsenide diodes at low temperatures 22 p3882 A66-40837  
 Injection-current dependence of intensity of recombination radiation of separate bands in gallium arsenide 22 p3882 A66-40840  
 Beryllium diffusion into gallium arsenide in /111/ plane with various electron concentrations through vacuum deposition 22 p3967 A66-40843  
 Steady state behavior of free steadily traveling electrical domain in gallium arsenide 22 p3967 A66-40864  
 Domain and circuit properties effect on oscillations in GaAs 22 p3967 A66-40865  
 Current characteristics of solution and vapor grown p-n Ge-Si and Ge-GaAs heterojunctions as function of voltage and

temperature 22 p3968 A66-40963  
 Degree of perfection of Ge and GaAs single crystals and epitaxial films effect on integral intensity jump at K absorption edge seen in Bragg diffraction 23 p4112 A66-41282  
 Continuous current oscillation in GaAs caused by acoustoelectric effect 23 p4112 A66-41296  
 Domain propagation with velocity of sound from negative to positive electrodes in GaAs single crystal rods under acoustoelectric oscillation 23 p4112 A66-41297  
 Ultrasonic wave absorption in GaAs and GaSb compounds at temperatures from 95 to 300 degrees K 23 p4113 A66-41417  
 GaAs semiconductor quantum generator heating during injection pulse, analyzing temperature effect on external quantum output and generator efficiency 23 p4078 A66-41621  
 Radiative recombination in annealed electron irradiated zinc doped gallium arsenide 24 p4250 A66-42229  
 Zn diffusion effect on uniformly Mn-doped GaAs wafer showing via radiotracer technique changes in impurity concentration profile 24 p4250 A66-42255  
 IR active localized vibrational modes absorption in lithium and copper compensated silicon doped gallium arsenide 24 p4251 A66-42298  
 Epitaxial growth of bulk quality GaAs on GaAs and Ge substrates, using hydrogen stream saturated at room temperature with arsenic chloride 24 p4251 A66-42307  
 Decaying free carrier concentration increase in GaAs when subjected to increased level of drive during first cycle 24 p4253 A66-42370  
 Tin and zinc diffusion from doped pyrolytic silicon oxide layers used to form base regions of planar n-p-n and p-n-p-GaAs transistors 24 p4254 A66-42384  
 Conversion efficiency of GaAs solar cell at various light intensities 24 p4161 A66-42391  
 Temperature dependence of Hall coefficient and resistivity of n-type epitaxial gallium arsenide in 4.2 to 300 degree K temperature range 24 p4254 A66-42423  
 GaAs crystal as electro-optic modulator at 10.6 microns due to small carrier absorption, freedom from interband transitions and high resistivity 24 p4222 A66-42553  
 Transverse gain and spontaneous and stimulated emission at 8466 angstroms in GaAs structures 24 p4222 A66-42561  
 IR GaAs laser amplifier with gains as high as 2000, output powers of 150 mw and saturation occurring with current increase at low light levels 24 p4223 A66-42562  
 Cut-off frequency of high voltage GaAs varactors, comparing theoretical and experimental values 24 p4183 A66-42632  
 Semiconductor laser technology, operating principles, material properties and performance, with emphasis on GaAs junction lasers 24 p4224 A66-42802  
 Electro-optic modulators for IR region 0.9 to 16 microns constructed by using large single crystals of high resistivity gallium arsenide 24 p4258 A66-42957  
 Curves computed for avalanche multiplication and Zener tunneling for gallium arsenide specimens of various thicknesses 24 p4258 A66-42958  
 Light emission in near IR by semiconducting GaAs under current oscillations caused by electron-phonon coupling 24 p4258 A66-43000  
 Semiconductor GaAs quantum generator with two-photon absorption of neodymium laser emission 24 p4226 A66-43085  
**GALLIUM COMPOUND**  
 Superconducting transition temperatures measured for various tin-gallium compositions in quenched and annealed states 02 p0271 A66-11482  
 Changes in ordinary refractive index and birefringence of gallium sulfide and gallium selenide as function of wavelength for visible and near IR at low temperatures 06 p0929 A66-16940  
 Donor impurity effect on direct-indirect transition in gallium arsenic phosphide, particularly at low temperature 13 p2170 A66-26590  
 Optical reflection of gallium sulfide and gallium selenide single

crystal 15 p2566 A66-29206  
 Optical reflection of gallium sulfide and gallium selenide single crystals 17 p2982 A66-33055  
 Hall coefficient, electrical conductivity and thermoelectric power of GaSb-Ga<sub>2</sub>Te<sub>3</sub> solid solutions as functions of composition and temperature 24 p4254 A66-42425  
**GALLIUM PHOSPHIDE**  
 Photoluminescent time decay of red band in gallium phosphide doped with shallow acceptor Zn and deep donor O 04 p0560 A66-13722  
 Extrinsic and intrinsic epitaxially deposited single crystal gallium phosphide solar cells, noting conversion efficiencies 07 p0990 A66-17232  
 Light emission and photovoltaic effect of GaP diodes near bandgap 07 p1004 A66-17319  
 Spectral distribution of luminescence excited in n-type GaAs and p-type GaP by fast-electron bombardment 07 p1096 A66-17339  
 Measurement of energy required to form one hole-electron pair in gallium phosphide by alpha particles 07 p1107 A66-18407  
 Diffusion technique preparation of GaP p-n junctions and relation of p-i-n junction electric field calculation to Baraff carrier ionization rate theory 07 p1108 A66-18415  
 Rectifying and ohmic contacts used in manufacture of gallium phosphide diodes that emit light when current is reversed 08 p1273 A66-19291  
 Gallium arsenide phosphide heterojunction diode used to triple from X band to Ka band 09 p1350 A66-19924  
 Recombination-radiation spectra of GaP-GaAs p-n heterojunctions 09 p1412 A66-19984  
 Light emission associated with growth defects from reverse biased gallium phosphide p-n junctions 10 p1577 A66-21556  
 Direct-indirect transition effect on Hall effect in gallium /arsenic phosphide/ 10 p1543 A66-21570  
 Green emission lines from solution-grown p-n junctions in GaP diodes doped with shallow donors and acceptors 14 p2251 A66-27231  
 Photoreponse measurements of depletion capacitance and diffusion potential of GaP Schottky-Barrier diodes 20 p3534 A66-38390  
 Electrical and photoconductivity properties of high-resistivity gallium phosphide in intrinsic and near IR region, noting electron trap effect 21 p3800 A66-38992  
 Electrical and electroluminescent property of GaP diffused p-n junctions, accounting for V-I characteristics due to space-charge recombination by Sah-Noyce-Shockley theory 24 p4249 A66-42226  
**GALLIUM SELENIDE**  
 Measurement of exciton absorption of gallium selenide at low temperatures in presence of electric field, noting line broadening and no splitting 06 p0929 A66-16942  
 Optical reflection of gallium sulfide and gallium selenide single crystal 15 p2566 A66-29206  
 Optical reflection of gallium sulfide and gallium selenide single crystals 17 p2982 A66-33055  
 Absorption and dispersion spectrum of laminar gallium selenide crystal 21 p3802 A66-39159  
**GALVANIC CELL**  
 Electrical capacity of galvanic cell and crystal habit and surface property effects on porous cadmium hydroxide electrode electrochemical properties 08 p1171 A66-19644  
 Solid electrolytes which exhibit appreciable electron conduction for use in galvanic cells 13 p1999 A66-25675  
 Thermodynamics of molten lithium nitride galvanic cell, noting emf temperature dependence 20 p3503 A66-38189  
**GALVANOMAGNETISM**  
 Anisotropy of scattering in tellurium, correlating cyclotron frequency data and galvanomagnetic measurements 05 p0738 A66-15353  
 Anisotropy axes dispersion relation to plane galvanomagnetic effect in thin permalloy films to obtain Gaussian directional distribution 07 p1092 A66-17222  
 Galvanomagnetic effects in semiconductors,

including Hall effect and magnetoresistivity, noting influence of carrier scattering on lattice vibrations and impurities 08 p1267 A66-18607

Magnetoresistance measurements of germanium in strong magnetic field 08 p1277 A66-19616

Variable impedance device using galvanomagnetic effects in semiconductors 09 p1351 A66-19932

Galvanomagnetic and field effect measurements on Ge double crystals 09 p1427 A66-20419

Anisotropy of scattering in tellurium, correlating cyclotron frequency data and galvanomagnetic measurements 09 p1431 A66-20894

Transport properties of III-V and II-VI semiconducting compounds with zincblende structure under uniaxial stress, calculating galvanomagnetic coefficients, Faraday effect, plasma frequency, etc 10 p1578 A66-21665

Gradient instability of galvanomagnetic and galvanomagnetoacoustic waves in electrical fields 10 p1587 A66-22156

Electrophysical parameters of epitaxial p-n junction regions determined, using galvanomagnetic and photomagnetic measurements 11 p1751 A66-22734

Transverse galvanomagnetic effect in single-domain ferromagnetic film, noting role of Hall effect equation 11 p1752 A66-22801

Hall effect and galvanic magnetoresistance measurements in single crystal /mercuric manganese/ telluride solid solutions 12 p1927 A66-23729

Nonlinear galvanomagnetic effects in n-type InSb in quantum limit, using uncompensated and compensated samples 14 p2366 A66-27762

Galvanomagnetic and thermomagnetic effects in mixed state of type II superconductor 16 p2771 A66-30197

Anisotropy axes dispersion relation to plane galvanomagnetic effect in thin permalloy films to obtain Gaussian directional distribution 17 p2976 A66-31993

Magnetoresistance measurements of germanium in strong magnetic field 17 p2983 A66-33130

Galvanomagnetic effect in ferromagnetic metals, developing theory of planar Hall effect in terms of spin-orbit interaction of electrons 18 p3158 A66-34682

Gradient instability of galvanomagnetic and galvanomagnetoacoustic waves in electrical fields 19 p3440 A66-35770

Galvanomagnetic effect of anisotropic electron energy spectrum on acoustical branch perturbation spectrum of system of electrons and ions in homogeneous magnetic field 20 p3618 A66-37559

Relation between surface grain structure and galvanomagnetic properties of polycrystalline mercury telluride thin films with high current-carrier mobility 20 p3624 A66-38434

Galvanomagnetic effects in p-type aluminum antimonide, discussing field dependence of Hall effect and magnetoresistance 21 p3801 A66-38999

Infinite plate consisting of monopolar semiconductor of given thickness under effect of electric field results in change in galvanomagnetic, piezoresistance and optical properties 22 p3965 A66-40317

Electrophysical parameters of epitaxial p-n junction regions determined, using galvanomagnetic and photomagnetic measurements 23 p4113 A66-41472

Nonlinear dependence of current in electric field in thin semiconductor film in quantizing magnetic field 24 p4256 A66-42525

**GALVANOMETER**

**SA ELECTROMETER**

Shock spectrum analyzer for space vehicle structures, etc, noting galvanometer selection 16 p2703 A66-30489

**GAME THEORY**

**SA ARTIFICIAL INTELLIGENCE**

Decomposition theory of continuous submartingales 01 p0094 A66-10728

Differential games, theorem and analysis, discussing controlled object pursuits and computation of minimal time of termination 04 p0539 A66-13989

Optimal program control for minimization

of finite state vector norm of linear system with two types of sets of permissible controls 07 p1013 A66-17425

Mathematical stabilization theory for dynamic systems from Liapunov motion stability theory and theory of games 11 p1736 A66-22639

Sensitivity design of systems with optimal controller structures, using game theory 13 p2050 A66-26061

Communication design techniques for coding set of discrete memoryless channels where transmitter and receiver have no knowledge of channels selected 21 p3705 A66-39144

Continuous sequential decision for derivation of minimum search time for determining one nonzero mean process in presence of finite number of hypotheses 21 p3705 A66-39148

**GAMMA FUNCTION**

Reliability of system, with recovery, consisting of n plus m elements, m elements being in redundant system 08 p1200 A66-19670

Handbook of generalized gas dynamics including one-dimensional gas dynamics, compressible flow tables, gamma function, isentropic flow, etc 13 p2063 A66-25694

Mean time to failure within given time boundaries and for continuous failure density evaluated via Weibull density function 15 p2526 A66-28806

Reliability of system with recovery consisting of n plus m elements, m elements being in redundant system 20 p3538 A66-37262

Iterative algorithms for calculating sum of some series, considering gamma and theta functions 21 p3758 A66-39368

Data analysis on probability papers for gamma, normal and Weibull /including exponential/ distributions 24 p4230 A66-42088

**GAMMA GLOBULIN**

Solubility characteristics and electrophoretic and ultracentrifugal properties of human gamma globulins 09 p1334 A66-19900

Ultrasonic wave splitting of individual fragments and isolated polypeptide chains of human gamma globulin molecule 16 p2639 A66-30793

**GAMMA RADIATION**

**SA BREMSSTRAHLUNG**

**SA CERENKOV RADIATION**

**SA NUCLEAR RADIATION**

**SA SPACE RADIATION**

Transient gamma radiation pulse effects on MOS field effect transistors 01 p0049 A66-11151

Simulated nuclear power plant gamma radiation effects on magnetic film-insulated magnetic wire 02 p0248 A66-11293

Photon-flux measurements by high energy gamma-photon detectors onboard Explorer XI and OSO-I 03 p0423 A66-13028

Silicon surface damage, discussing low energy gamma irradiation effect on bulk lifetime and recombination velocity 05 p0729 A66-14565

Neutron and gamma sensitivities of nine detectors tested at Sandia Pulsed Reactor 05 p0734 A66-14854

Drift mobility induced by pulsed gamma irradiation of polystyrene 05 p0735 A66-14858

Stratospheric measurements of electrons and gamma radiation in cosmic rays, using plastic scintillator and lead sheet supplemented Geiger counters 05 p0752 A66-15386

Electronic components, considering noise characteristics, particularly effect of gamma radiation on resistors, capacitors, diodes, etc 05 p0650 A66-15834

Cosmic X-ray and gamma ray astronomy in studying stellar evolution, cosmic ray origin and structure of universe 06 p0944 A66-16314

Surface state density variations on metal oxide semiconductor capacitors due to gamma radiation 06 p0925 A66-16646

Gamma irradiated germanium at zero degrees C, studying annealing of recombination center, obtaining life times from transient decay of photoconductivity 06 p0934 A66-17126

In-pile neutron and gamma-ray irradiation of n-type indium antimonide, isochronous annealing indicating existence of five

recovery stages 06 p0936 A66-17126

Gamma irradiation effects on float-zone single-crystal p-type boron-doped silicon, using lithium drifted p-i-n junctions 06 p0937 A66-17126

Nucleon passage through atmosphere as meson production data including nuclear cascade intensity, gamma ray production, etc, and mean free path values for nuclear interaction 07 p1115 A66-17512

Extensive air shower high energy gamma rays in upper third of atmosphere 07 p1118 A66-17512

USAF whole body gamma spectrometry support of Air Force aerospace mission 07 p0999 A66-17606

Compton scattering of laser photon noting transformation into gamma radiative photons upon collision with high energy electrons 07 p1044 A66-17812

Gamma-electric cell, solid state device for direct conversion of gamma-ray energy into electrical energy 07 p1079 A66-18332

Lifetime degradation rate due to cobalt gamma irradiation reduced in p-silicon due to electron injection at low temperature 07 p1106 A66-18406

Gamma irradiation intermediates of polyamide MXD-6 examined, using electron spin resonance and optical spectroscopy 08 p1243 A66-19066

Low-background gamma-ray spectrometry of induced radioactivity resulting from Bogov meteorite cosmic radiation 08 p1291 A66-19066

Positron annihilation of single oriented crystals of vanadium silicide, measuring angular correlation between gamma rays for calculation of Fermi surface 09 p1419 A66-20042

Cosmic ray origins including galactic ray, RF radiation, metagalactic gamma radiation, etc 09 p1437 A66-20202

Galactic and metagalactic cosmic gamma and X-ray intensities 09 p1437 A66-20202

Radiation effects on electronic component noting sensitivity to gamma, fast neutron and electron radiation 09 p1359 A66-20966

Proton-nuclear and electron-positron component of primary cosmic rays 09 p1446 A66-21042

Mechanism for production of X-rays and gamma rays in galaxies, noting photon an electron spectrum 10 p1598 A66-21102

Upper limits to cosmic ray intensity 10 p1599 A66-21102

Cerenkov measurements of high energy gamma ray flux from quasi-stellar radiation sources in mountains near Dublin 10 p1599 A66-21102

Collision of cosmic rays and intergalactic gas to produce neutral pions which decay into high energy gamma rays 10 p1599 A66-21102

Transistor portable radioactivity detector utilizing self-quenching Geiger-Muller tube 11 p1703 A66-22226

Physical pattern of high altitude fission cloud and motion of gamma and beta fission fragments captured by geomagnetic field and observed by Cosmos satellite 11 p1764 A66-23042

Spark chamber with vidicon readout for balloon-and satellite-borne high energy gamma ray astronomy analysis, noting Cerenkov counter 12 p1877 A66-23688

Digitized spark chamber for balloon and satellite gamma ray astronomy, noting detector array, high voltage system and data acquisition and handling systems 12 p1877 A66-23688

Gamma ray spark chamber with photographic recording for manned satellites, determining energy spectrum 12 p1877 A66-23688

Nuclear instrumentation for lunar surface and subsurface measurements in Apollo Extensions System 12 p1878 A66-23699

Gamma radiating debris cloud of high altitude nuclear explosions scanned by gamma scintillation detector assembled into directional uranium shield 12 p1878 A66-23699

Neutron and gamma radiation measurements during low and high power NERVA reactor tests, determining leakage and radiation environment 12 p1911 A66-23704

- Atomic origins of transient nuclear radiation effects in electronics such as neutron and gamma 12 p1918 A66-24680
- Irradiation effects by fast neutrons and gammas on collector cut-off current and base current at low current densities analyzed on silicon planar 13 p2032 A66-25486
- Resistance transfer factor episode analyzed by measuring inactivation by cobalt gamma radiation, phosphorus and tritium, suggesting existence of 14 p2228 A66-27308
- DNA Electron spin resonance of gamma irradiated single crystal of barbituric acid dihydrate, noting formation and Hamiltonian parameters of free 14 p2367 A66-27979
- Radicals Neutron analysis techniques for determining hydrogen presence on lunar or planetary surfaces, based on measurement of gamma radiation 14 p2233 A66-28105
- Recombination centers in gamma irradiated silicon either float-zoned or melt-pulled and doped with phosphorus, arsenic or boron 15 p2562 A66-28721
- Annealing effects of gamma ray irradiation on MOS FET increase donor surface state density 15 p2567 A66-29413
- Injurious effect of gamma radiation and 660 and 120 mev protons on white mice and protective action of certain pharmacologicals 15 p2438 A66-29480
- Effect of shielding individual parts of rats on variations in reaction to radiation during exposure to gamma rays and high energy protons 15 p2438 A66-29481
- Extensive air shower generation by high energy primary rays over Bolivia studied by methods of fast timing and density sampling 15 p2577 A66-29515
- Cosmic ray anisotropy and gamma rays in Orion analyzed, using Geiger counter and Cerenkov telescope 15 p2579 A66-29525
- Cosmic ray showers, discussing high energy interactions of nuclear active particles, intensity and energy spectra of gamma rays and muons, young air showers, ionization bursts, etc 15 p2584 A66-29555
- Flux and energy spectra of primary cosmic X and gamma rays between 20 kev and 1 mev from balloon-rocket measurements 15 p2591 A66-30020
- Solar flare analysis by examination of high energy gamma rays, noting solar proton and solar material interaction, energy spectrum, generation of fast protons and alpha particles, etc 15 p2592 A66-30076
- Discrete source of cosmic gamma rays above 1 gev in balloon-borne detection 16 p2792 A66-30171
- Gamma radiation and fast neutron effects on dark resistance, photoconductivity, majority carrier mobility, recombination kinetics, etc, in CdS single crystal 16 p2787 A66-31765
- Thermal conductivity cell measurements of depolymerization rate of polytetrafluoroethylene exposed to gamma radiation in flowing helium atmosphere 17 p2942 A66-31880
- Inverse Compton X-ray and gamma ray flux due to high energy electron interaction with cosmic blackbody radiation at 3.5 degrees K 17 p2992 A66-31914
- Crystal spectra and broadband measurements of solar and galactic UV, X-rays, gamma rays, etc, outside Earth atmosphere 17 p2998 A66-32030
- Hazards of macrofractionated gamma ray irradiation hazards upon Rhesus monkeys 17 p2858 A66-32189
- Gamma irradiation effects on minority carrier lifetime in germanium, noting temperature effect 17 p2987 A66-33321
- Current decay in anthracene irradiated by gamma ray 18 p3157 A66-34476
- Balloon flight near peak of solar cycle in search for solar and cosmic gamma rays 18 p3169 A66-34515
- Balloon experiment for measurement of secondary gamma spectrum in 100-2000 mev range, using lead scintillator sandwich spectrometer 18 p3171 A66-34708
- X-ray and gamma ray astronomy, discussing observational methods, physical processes of generation, radiation intensity, etc 18 p3176 A66-34749
- Flux limits for high energy gamma rays from quasars and other possible cosmic ray sources 18 p3186 A66-34813
- Seventy-channel scintillation spectrometer high atmospheric measurement of cosmic gamma radiation of extraterrestrial origin 18 p3192 A66-34845
- Spark chamber experimental investigation of flux of high energy gamma rays at high altitudes near magnetic equator 18 p3193 A66-34849
- Extensive air shower research aimed at study of composition of primary cosmic rays and component properties 18 p3204 A66-35090
- Decrease in distribution of arrival directions of muon-rich air showers between 15 h and 21 h in right ascension confirmed by analysis of EAS 18 p3205 A66-35097
- Primary gamma ray production, arrival directions, particle collisions and distribution of EAS penetrating particles in intergalactic space 18 p3209 A66-35120
- Lateral distribution of high energy gamma rays, successive interactions and core structure of EAS, using emulsion chambers at mountain altitudes 18 p3211 A66-35132
- High energy nuclear interactions in graphite 18 p3140 A66-35159
- High energy interaction studied on Norikura Mountain and Mount Chacaltaya, using large area emulsion chamber 18 p3216 A66-35170
- Energy spectra of nucleons, muons and gamma rays for truncated power law primary energy spectra calculated, using model for nucleon and meson production 18 p3217 A66-35174
- Planar and needle-like defects in natural quartz examined via X-ray diffraction, noting composition and diffraction contrast when observed from different Bragg planes 19 p3434 A66-35403
- Absorption spectra modification in silica ceramics after gamma irradiation from Co-60 19 p3388 A66-35463
- Lithium-drifted germanium detector resolution and efficiency as function of temperature for gamma rays 19 p3359 A66-35915
- Range of atoms recoiling from photonuclear reactions in solids measured by foil-sandwich irradiations followed by radiochemical detection methods 19 p3402 A66-36002
- Stress relaxation of gamma irradiated fluorocarbon elastomers to study radiation induced chain scissions in copolymers 20 p3587 A66-37310
- Prior gamma irradiation effect on thermal volatilization of vinyl and vinylidene fluoride polymers 20 p3587 A66-37311
- Anomalous permanent changes in transistor gain after low exposure dosage of electron and/or gamma radiation related to recombination current-component buildup 20 p3528 A66-37320
- Gamma irradiation from Co 60 effect on indium antimonide, determining defect formation on dose and limiting position of Fermi level for n-and p-type material 20 p3617 A66-37552
- Anomalous high count of gamma rays from direction of constellation Cygnus associated with energy spectrum differing from spectrum of secondary gamma rays generated by cosmic rays 20 p3631 A66-37600
- Ionization due to alpha, beta and gamma radiation from ground and atmosphere in ground proximity, noting ion pair production rate and energy spectra 20 p3552 A66-37759
- Gamma-spectroscopy determination of special reaction products of cosmic radiation in meteorites 20 p3656 A66-38060
- High-energy gamma-ray absorption in photon field between sources and Earth and within radio sources themselves 21 p3809 A66-39210
- Fission spectrum neutron damage and gamma ray damage in n-type Si, comparing results of measurements by degradation of minority carrier lifetimes 22 p3962 A66-40086
- Riometric data on ionospheric absorption applied to determination of dissociative recombination coefficient, noting atmospheric ionization by fragment gamma-radiation 22 p3973 A66-40468
- Upper limits resulting from search for solar photons in 100-kev to 2-mev range from balloon observations 22 p3973 A66-40549
- Resonance absorption of gamma-quanta by tin in germanium 23 p4110 A66-41133
- High energy gamma rays energy spectrum of solar flares, elucidating proton interaction with solar material 23 p4123 A66-41276
- Neutron, proton and gamma radiation effect on small animals examined, using conditioned response drinking method 23 p4027 A66-41345
- Gamma and fast neutron radiation effect on nervous activity of mice examined, using conditioned reflex drinking method 23 p4028 A66-41346
- Gamma radiation, fast neutron and proton effect on conditioned and motor responses, nervous activity, excitation and inhibitory processes of white rats 23 p4028 A66-41347
- Effect of total chronic and acute gamma radiation on higher nervous activity of white rats 23 p4028 A66-41348
- Prolonged gamma-radiation induced electromiographic characteristics of vestibular reflex guinea pig hind-leg muscle 23 p4028 A66-41349
- Balloon-borne spark chamber observations of cosmic gamma rays from 30 to 500 mev 23 p4124 A66-42066
- Effects of isothermal decomposition of gamma ray irradiated orthorhombic crystals of ammonium perchlorate 24 p4170 A66-42421
- Spark chamber system designed to detect gamma rays in cosmic radiation on high altitude balloon flights 24 p4215 A66-43212
- GAMMA RAY ASTRONOMY EXPLORER S EXPLORER XI SATELLITE**
- GAMMA RAY BEAM**
- Monopole antenna signal produced via bombardment by flux of gamma rays from nuclear explosion 11 p1663 A66-22546
- Gamma photon flux from solar Na 22 disintegration emitted by Sun after chromospheric eruption 13 p2176 A66-26760
- Cosmic ray measurements, muon production from decay of charged pions and kaons, muon polarization, momentum spectra, atmospheric gamma cascades and derivation of kaon/pion ratio 15 p2587 A66-29573
- GAP**
- SA SPARK GAP**
- Gap size effect on pressure and aerodynamic heating over flap of blunt delta wing in hypersonic flow [AIAA PAPER 66-408] 17 p2840 A66-32747
- Half-wavelength resonators as capacitive-gap strip-line bandpass-type microwave filters, discussing parameter derivation for equivalent circuit and Cohn synthesis method 18 p3087 A66-34621
- GARNET**
- SA YTTRIUM-ALUMINUM GARNET /YAG/ CRYSTAL**
- SA YTTRIUM-IRON GARNET /YIG/ CRYSTAL**
- Fine-grain structure effect on microwave power absorption thresholds of ferrimagnetic garnets and spinels 14 p2350 A66-26880
- Chemically deposited thin ferrite and garnet films 14 p2249 A66-27104
- Faraday effect in rare earth garnet ferrites and metallic ion g values in IR spectrum 14 p2364 A66-27703

SA POLAR GAS  
SA POLYATOMIC GAS  
SA RARE GAS  
SA RAREFIED GAS  
SA REAL GAS  
SA RESIDUAL GAS  
Nonlinear optical polarization of gases and liquids, stressing second degree contribution in macroscopic electric field 13 p2132 A66-26147

## GAS ANALYZER

Portable photoelectric instrument for determining oxygen admixture in hydrogen, nitrogen and inert gases with low sensitivity 02 p0231 A66-11999  
Miniature proportional counters with low background level for determining ultrasmall quantities of Ar 37 and H 10 p1610 A66-22017  
Interferometric measurement of ultrasonic velocity in gases at frequencies around 100 kc/s to determine vibrational relaxation 12 p1913 A66-23821  
Automatic electroanalytical equipment for determination of gas traces by conductometry, potentiometry, coulometry and galvanometry 14 p2296 A66-27734  
Cryopumping, titanium-sublimation and ion-pumping mechanisms studied for exhausting vacuum chambers to simulate outer space 16 p2677 A66-30456  
Efficiency of radiation sources in IR gas analyzer 16 p2706 A66-30849  
Photoionization mass spectrometer with 180-degree magnetic analyzer with inclined pole faces, applicability to gas analysis 19 p3354 A66-35419  
Miniature proportional counters with low background level for determining ultrasmall quantities of Ar 37 and H 19 p3453 A66-36103  
Residual gas analyzer determining qualitative distribution of gases in ultrahigh vacuums by using mass spectrometer for spatial simulation 19 p3360 A66-36614  
Fluorine concentration in oxygen monitored by instrument with nickel thermoconductivity cell 20 p3511 A66-38173

## GAS BEARING

Gas lubricated bearing principles and application problems 01 p0077 A66-10217  
Navigation gyro design with respect to cost factors noting electrically suspended, gas bearing and other types 01 p0104 A66-10676  
Opposed hydrostatic pad proportions and flow restriction in affecting load capacity, flow and pad stiffness 03 p0373 A66-12930  
Gas-lubricated bearing equations derived that are valid for wide range of temperature and Mach numbers 04 p0526 A66-14156  
Stability of symmetrical elastic rotor in journal bearings with flexible damped supports [ASME PAPER 65-APMW-8] 04 p0526 A66-14214  
Externally pressurized foil gas bearings, employing successive approximations method to solve Reynolds equation for fluid and equilibrium equation for foil [ASME PAPER 65-LUB-1] 04 p0526 A66-14237  
Whirl instability and pneumatic hammer for rigid rotor in pressurized gas journal bearings [ASME PAPER 65-LUB-12] 04 p0527 A66-14245  
Cylindrical squeeze-film gas journal bearing, noting load deflection experiments [ASME PAPER 65-LUB-13] 04 p0527 A66-14246  
Reynolds equation for compressible and incompressible lubrication for load coefficients and attitude angles of axial groove cylindrical bearings [ASME PAPER 65-LUB-16] 04 p0528 A66-14248  
Stability bounds for externally pressurized gas-lubricated thrust bearing [ASME PAPER 65-WA/APM-31] 05 p0689 A66-15452  
Exponential thermodynamic path function to predict pressure distribution and load-carrying capacity of infinite gas-lubricated slider bearing 06 p0885 A66-16223  
Load capacity and attitude angle of gas lubricated short journal bearing 06 p0885 A66-16224

Dynamic stability conditions of self-acting gas lubricated journal bearings 07 p1039 A66-18231  
Measurements of dynamic behavior of rotors supported by externally pressurized gas bearings subjected to impact [ASLE PREPRINT 65AM 3A4] 07 p1039 A66-18287  
Lift in spherical ball bearings with air lubrication calculated, taking into account inertial term in general equations of aerodynamics, gap variability and air compressibility 08 p1232 A66-19693  
Gas-bearing facilities for determining axial stress-strain and lateral strain of brittle materials to high temperature 08 p1242 A66-19722  
Modern gas bearings of self-acting and externally pressurized types in turbomachinery 09 p1384 A66-20297  
Gas bearing analysis and design, presenting specifications of European and American turbomachinery 10 p1539 A66-21170  
Stability of symmetrical elastic rotor in journal bearings with flexible damped supports [ASME PAPER 65-APMW-8] 10 p1539 A66-21488  
Stability bounds for externally pressurized gas-lubricated thrust bearing [ASME PAPER 65-WA/APM-31] 12 p1885 A66-23970  
Cylindrical squeeze-film gas journal bearing, noting load deflection experiments [ASME PAPER 65-LUB-13] 12 p1888 A66-24551  
Test rig for gas-lubricated journal bearings measuring frictional torque, gas film pressure distribution, static and dynamic eccentricity changes, etc 12 p1859 A66-24929  
Design and function of air bearings, measuring displacement force of system checking by autocollimation 13 p2085 A66-25074  
Designing hydrostatic journal-and thrust-gas bearings 13 p2085 A66-25365  
Brayton-cycle space power system, describing solar collector, heat receiver/storage unit, recuperator, radiator and gas bearings [AIAA PAPER 64-726] 13 p2006 A66-26635  
Gas lubricated bearings used in Brayton cycle closed-loop system turbomachinery in design of two-shaft power plant [ASME PAPER 66-GT/CLC-9] 14 p2300 A66-26982  
Design of 500-kwe closed Brayton cycle power conversion system, analyzing various turbomachinery configurations hermetically sealed and operating on gas bearings [ASME PAPER 66-GT/CLC-15] 14 p2225 A66-26985  
Differential equation for lubrication layer pressure in gas lubrication of sliding bearings at large transverse temperature drops 15 p2505 A66-28524  
Externally pressurized gas journal bearings, evaluating various design parameters for operating at high temperatures and high speeds [ASLE PAPER 66AM 4B2] 16 p2711 A66-30410  
Rotor-tilting pad gas lubricated journal bearing system performance determined by solving dynamic equations together with time-transient Reynolds equation [ASME PAPER 66-LUBS-3] 17 p2931 A66-33177  
Spherical squeeze-film hybrid bearing with small steady-state radial displacement treated by perturbation method [ASME PAPER 66-LUBS-5] 17 p2931 A66-33179  
Surface roughness effects in hydromagnetically lubricated externally pressurized bearings and hydromagnetic squeeze film between two circular plates [ASME PAPER 66-LUBS-9] 17 p2931 A66-33182  
Turbulent hydrodynamic lubrication theories and solution of Constantinescu equation for finite-length journal bearing [ASME PAPER 66-LUBS-11] 17 p2931 A66-33184  
Performance of hydrodynamic, hydrostatic or hybrid bearings determined by numerical solution of Reynolds lubrication equation for incompressible fluid films

## [ASME PAPER 66-LUBS-4]

17 p2932 A66-3318  
Prediction of hydrostatic gas journal bearing performance by solving simultaneous flow equations with Fortran II computer program [ASME PAPER 66-LUBS-16] 17 p2932 A66-3318  
Closed loop control system combined with air heating technology for measurement of multicomponent microforces 20 p3555 A66-3687  
Carrying capacity and moment of friction calculated for cylindrical MHD bearing of small magnitude of radial clearance 23 p4074 A66-417

**GAS CELL**  
Relaxing gas in cylindrical heat conductivity cell showing homogeneous phase maintained in thermal equilibrium with surface effects and exhibiting characteristics of monatomic gas 12 p1980 A66-2490  
Atomic time standards, describing cesium beam standard, ammonia maser and gas-cell type clocks 19 p3354 A66-3541  
Gaseous diffusion cells to remove carbon dioxide from spacecraft life support systems discussing construction material in terms of permeability coefficients substrate porosity 19 p3293 A66-3628

**GAS CHROMATOGRAPHY**  
Thermal stability to racemization at resolution of several racemic amino acid diastereomeric derivatives by gas chromatography 01 p0021 A66-106  
Pyrolysis of diol succino-maleates copolymerized with styrene at various temperatures, using gas chromatography [ONERA TP 251] 02 p0188 A66-116  
Gas phase nonideality and mean column pressure effects on sample retention in gas-solid partition chromatographic systems with real carrier gases 04 p0472 A66-133  
Gas permeation measurements on 1 exchange fuel cell membranes using chromatography 05 p0611 A66-145  
Quantitative interpretation of gas chromatograms, discussing separation process and identification of mixture components 08 p1179 A66-192  
Isolation and identification of bioglyceranes and pentacyclic triterpanes Eocene shale 12 p1805 A66-235  
Hydrocarbons synthesized abiogenically at those found in terrestrial samples, using gas chromatography and mass spectrometry connection with terrestrial life 12 p1806 A66-249  
Chemical analysis of permanent and trace organic gases in 30-day manned experiments using gas chromatography 12 p1811 A66-250  
Micro gas chromatographic system for Mars atmosphere analysis during capsule descent 14 p2232 A66-272  
Elutriation diagrams in determination of adsorption enthalpies from temperature dependence of retention volume in bar maximum 14 p2232 A66-276  
Gas chromatography for resolution of a separation of racemic amino acids as TF sec-butanol ester derivatives applied to protein analysis 15 p2446 A66-286  
Optical scanning and resolution of D, amino acids by gas-liquid chromatography and mass spectrometry 15 p2446 A66-286  
Tandem column gas-liquid chromatography labeling technique for mass spectrometry noting ketones exchange and data deuterium and oxygen compounds 15 p2446 A66-286  
Focused laser coherent radiation-induced degradation of solid methylene and gas chromatographic analysis of reaction products 17 p2933 A66-3317  
Stereospecific hydrolytic action of acyls studied by gas-liquid chromatography 17 p2869 A66-316  
Resolution method for DL-amino-acids menthyl ester derivatives and gas-liquid chromatographic analysis of crystalline products 17 p2869 A66-316  
High sensitivity optical resolution of amino diastereoisomers by gas liquid chromatography 17 p2869 A66-316  
Space cabin contamination control discussing temperature effects, analysis of IR gas chromatography and chemical methods 17 p2863 A66-320

Liquid oxygen purity control for onboard breathing equipment by IR absorption spectrophotometry and gas chromatography 17 p2866 A66-32233

Alpha-chloro alkanoyl valine methyl esters analyzed, finding that diastereoisomeric pairs separation by gas-liquid chromatography can assess steric conditions around amide bond 17 p2871 A66-32932

GLC-mass spectrometric stereoisomer discrimination as means of detecting biological processes 18 p3059 A66-34372

Mass spectrometry and gas chromatography in analysis of organic compounds present in extraterrestrial bodies to provide information on existence of life 18 p3059 A66-34373

Paraffinic hydrocarbons composition in Orgueil, Murray, Mokoia and other meteorites identified by gas chromatography 19 p3459 A66-35571

Probabilistic model equations relating column height, feed location, degree of separation and flow rates for continuous chromatographic column 20 p3510 A66-37363

Gas liquid chromatography resolution of racemic hydroxy and beta-mercapto-amino acids involving suitable derivation of functional group 20 p3510 A66-37606

Gaseous dispersion in laminar flow through circular tube with mass transfer to retentive layer 22 p3900 A66-40411

Electrolysis of wet hydrogen fluoride, noting analysis of anode products by gas chromatography and water content measurement by IR spectroscopy 23 p4118 A66-41236

Chlorine trifluoride analysis using combination of gas chromatography and IR spectrophotometry, noting column containing trichloroethylene 23 p4032 A66-41239

Nuclear magnetic resonance techniques applied to nitrogen tetroxide for determining proton content, noting gas chromatograph with two stainless steel columns packed with porous glass 23 p4032 A66-41240

Gas chromatography analysis of ambient gas and vapor effects on semiconductor and solid state devices at low temperatures 24 p4179 A66-42095

Backstreamed fluid analysis via gas chromatography, using polyphenyl ether as diffusion pump fluid 24 p4239 A66-43164

**GAS COMPOSITION**

Methane-rich premixed flames of perchloric acid analysis noting burning velocities, temperatures and burnt gas composition required for stoichiometric mixtures 02 p0304 A66-12018

Stagnation point viscous shock layer equations for three-component gas model in chemical nonequilibrium and binary gas model in vibrational and chemical nonequilibrium, noting heat transfer rates 08 p1164 A66-19125

Quantitative interpretation of gas chromatograms, discussing separation process and identification of mixture components 08 p1179 A66-19383

Equation of state in closed form obtained for gas composed of molecules with Lennard-Jones potential, noting compressibility factor and radial distribution function 13 p2018 A66-26446

Approximate and characteristics methods to predict effect of gas composition on forces and static stability of planetary entry configurations in air and assumed Martian atmospheres [AIAA PAPER 65-318] 19 p3275 A66-35605

**GAS COOLED REACTOR /GCR/**

Nonconventional application of electric power-generating closed-cycle gas turbines [ASME PAPER 66-GT/CLC-8] 14 p2224 A66-26981

**GAS COOLING SYSTEM**

Injection method for coolant has no substantial effect on efficiency of gas curtain used to shield machine parts 04 p0598 A66-14438

Gas film for protective cooling of surface having regular macroroughness 14 p2410 A66-26783

Differential equation derived for cooling of infinite porous tube by gas injection through wall, determining wall temperature distribution 16 p2827 A66-30674

Mathematical solution for expressing comfort level of man in gas-cooled space suit and space cabin, noting environmental parameters 17 p2863 A66-32142

Gas-film-cooled nozzle extension application to large rocket engines, discussing operational parameters, advantages, etc [SAE PAPER 660455] 17 p2991 A66-33163

Cryogenic propellant boiloff losses in long duration space storage elimination by mechanical reliquifier, considering lunar, Earth-orbit and deep space application for hydrogen and oxygen 20 p3625 A66-37079

Ranque tube application for gas cooling, discussing performance characteristics of vortex tube with and without heat exchanger 21 p3834 A66-38625

Adiabatic exponents in equations for gas cooling by vaporization 21 p3835 A66-38905

**GAS DENSITY**

Boltzmann-Landau equation to calculate transport coefficients of moderately dense quantum gases 04 p0549 A66-14478

Instrumentation techniques for new type of gas density measuring system using light scattered from laser beam as measured quantity 05 p0698 A66-15794

Initial value problem of converging shock wave propagation in quiescent gas of variable density 10 p1521 A66-21228

Dissociation rate of nitrogen behind strong shock waves in nitrogen-argon mixtures determined, using time-resolved interferometric measurements of gas density 12 p1861 A66-23616

Vacuum effects on lubricants and bearing materials due to reduced ambient pressure and low concentration of oxidizing gases 12 p1885 A66-24383

Kinetic theory of dense gases generalized for all orders, deriving integral equations for transport coefficients and showing temperature dependence of bulk viscosity 12 p1979 A66-24565

Enthalpy and density fluctuations in high speed wakes, noting typical reentry and ballistic range cases 14 p2219 A66-27431

Mass calculation for absorbing gases such as water vapor, carbon dioxide and ozone along oblique paths between two arbitrary points in atmosphere, considering vertical distribution, refraction and Earth curvature 14 p2284 A66-27541

Integral equations derived from correlation functions, determining transport coefficients in classical fluid, formally valid to general order in density 14 p2276 A66-27635

First order in density corrections to transport coefficients of moderately dense gas /viscosity and thermoconductivity/, using Boltzmann equation 14 p2276 A66-27636

Integral equations defining transport coefficients of moderately dense gas obtained from Boltzmann equation shown to be identical to first order in density, with results obtained by autocorrelation function method 14 p2276 A66-27639

Seaton formulas used to determine when gas is collision-dominated 14 p2337 A66-28115

Shock wave thicknesses and density ratios measured in helium, argon and nitrogen, using electron beam fluorescence method at various Mach numbers in wind tunnel 15 p2480 A66-29736

Hypersonic flow past blunt body near stagnation point examined, noting surface layer, characterized by increased density and decreased entropy of gas 16 p2630 A66-31305

Local density and temperature measurement in wind tunnels determined by 50-kev electron scattering, using air as test gas 24 p4192 A66-42199

Mass calculation for absorbing gases such as water vapor, carbon dioxide and ozone along oblique paths between two arbitrary points in atmosphere, considering vertical distribution, refraction and Earth curvature 24 p4198 A66-42326

**GAS DISCHARGE**

**SA ELECTRIC DISCHARGE**

**SA GLOW DISCHARGE**

Cold cathode gas discharge controlled by magnetic field in design of plasma switch 01 p0042 A66-10582

Frequency multiplication mechanism using microwave gas discharge of air, argon or neon 01 p0029 A66-10583

HF discharge in rectangular high vacuum waveguide in crossed magnetic and electric fields, calculating electron energy 02 p0268 A66-11773

Positive gas discharge column equilibrium and instability factors, noting increase in ionization and plasma conductivity from decreased electron heating 03 p0398 A66-12509

Electron beam-hot plasma interaction at low frequencies, explaining cesium discharges and gas noise 03 p0398 A66-12539

Intense laser beam focusing effect in gas to study light-induced discharges by time-resolved spectroscopy and photography 03 p0378 A66-12978

Characteristics of Schuler tube with two anodes compared with one anode tube 04 p0492 A66-13472

Temperature in toroidal theta pinch discharge with image converter camera 04 p0553 A66-14284

Effect of heat removal through MHD channel walls on stability of temperature distribution during electrical discharge in gas between two planes 04 p0557 A66-14421

Z-pinch discharge in rare gases and light phenomena as described by model of converging cylindrical shock waves impelled by magnetic piston 04 p0558 A66-14495

Laser oscillations of silicon tetrachloride, silicon tetrafluoride and ethyl silicate in gaseous discharge 05 p0696 A66-14973

Inert gas-filled controllable thermionic generator in form of gas triodes based on gas discharge phenomena 05 p0618 A66-15556

Superhigh speed IR spectrometers used in detection and study of free radicals and photochemical reaction, pulse discharges in gases, etc 05 p0685 A66-15862

CW IR laser oscillation in HBr and HI gas discharge 06 p0892 A66-16756

HF electrodeless discharge in argon and krypton at high pressure noting energy radiation losses, electron density and plasma temperature 06 p0919 A66-16873

Evolution of spark channels initiated in oxygen at 411, 680 and 950 torr by current pulses of approximately 30 amperes with durations of 30 and 40 nanoseconds 06 p0920 A66-17028

Current noise of gas-discharge plasma reduced by adding grid with negative bias 06 p0837 A66-17200

Magnetic field effect on electron temperature, number of ionization events and potential gradient in argon and neon HF discharge 08 p1264 A66-19186

Plasma conductivity measurement in terms of frequency shifts and Q-factor variation in RF oscillatory circuit produced by presence of plasma sample in induction coil 08 p1264 A66-19190

Cell voltages and Coulomb efficiency in oxygen electrodes and hydrogen and hydrazine fuel cells for long duration discharges 08 p1172 A66-19652

Three-centimeter wavelength frequency multiplier using gas-discharge plasma in nonuniform electric field, examining amplitude and phase 09 p1358 A66-20793

Instability Electron density in gas-discharge attenuator with hollow cathode 09 p1358 A66-20811

Guarding probes in hot-cathode mercury vapor discharge 10 p1564 A66-21552

Excitation of neon levels in hollow-cathode discharge in neon-hydrogen mixture as result possibly from recombination processes involving dissociation and triple collisions 10 p1558 A66-22023

Electric discharges in gases analyzed in terms of ion and electron drift velocity and ionization coefficient 10 p1558 A66-22057

Faust 1, hardcore discharge stability experiment with final configuration obtained from radial inward collapse of plasma sheath from tube wall 11 p1744 A66-22451

Conductance and susceptance of neon plasma measured by Q-meter method in frequency range from 0.5 to 25 mc 11 p1745 A66-22587

Breakdown regime of diffusion-controlled HF resonance gas discharge analyzed kinetically, solving Boltzmann equation for electron distribution 11 p1740 A66-23081

Characteristics of periodic fluctuations in voltage, current and luminous intensity of discharge through inert gases and mercury vapor, using commercial discharge tubes 11 p1747 A66-23369

Electron temperatures in several RF-generated plasmas, using air as medium 12 p1919 A66-23599

Nonlinear phenomena in HF plasma discharge, establishing qualitative relation between gas pressure, consumed microwave power and harmonic generation efficiency 12 p1919 A66-23711

Discharge rate of multicomponent gas mixtures through de Laval nozzle from chamber containing adsorbent bed 12 p1979 A66-24587

Gas discharge by laser pulse, taking into account photoionization due to electron impact 12 p1891 A66-24887

Wave interaction underlying diocotron effect and model of instability presentation, analyzing cylindrical wall-enclosed charge layers for application to plasmas and gas discharges 13 p2136 A66-25041

Design of gravity-independent force-fed liquid-metal cathode providing unlimited cathode life in gas discharge devices and mercury electron-bombardment thrusters [AIAA PAPER 66-245] 13 p2106 A66-25175

Conductivity of ionized gas in DC discharge in argon for various magnetic field intensities 13 p2139 A66-25406

Ionization phase of impurity in pulsed hydrogen discharge and electron temperature measuring method 13 p2141 A66-25478

Gabor type auxiliary discharge thermionic converter producing ions for space charge neutralization by impact, noting critical converter equation 13 p1998 A66-25530

Cold cathode magnetron gauge characteristics and striking characteristics of gaseous discharge 13 p2078 A66-25647

Laser pumping by intense noble gas discharge in zeta-pinch geometry 13 p2092 A66-25995

Plasma resonance and scattering, threshold variation and optical reflectivity in pulsed laser beam-induced gas breakdown 13 p2134 A66-26192

Growth rate of ionization by electron impact in presence of laser beam, elastic and inelastic scattering cross sections, free-free absorption, excitation and ionization coefficients, breakdown times and thresholds 13 p2134 A66-26193

Current changes in gas discharge as affected by lasing action 14 p2306 A66-27055

Microsecond pulsed discharges at short tube with wire electrodes containing helium gas at intermediate pressures 14 p2341 A66-27314

Radiative cascade patterns in helium-neon gas system using idealized model, computing spontaneous decays which are compared with laser experiments 15 p2512 A66-28699

CW IR laser oscillation in atomic Cl in HCl and HI gas discharges, noting use of two power supplies and energy level diagram 15 p2513 A66-28880

Coefficient of light amplification in gas discharge 15 p2515 A66-29203

Current voltage characteristic of gas discharge for one-dimensional stationary case with fixed temperatures at conductor end, noting voltage saturation 15 p2551 A66-29224

Normal atom concentration in cesium and mercury vapors during pulse discharge 15 p2545 A66-29343

Electrical discharge in air, mercury vapor and nitrogen, using RF signal probe, determining electron density and temperature and random velocity in plasma 15 p2548 A66-29715

Intensity growth and decay in Ar and Hg lines after switching on mercury vapor discharge lamps filled with Ar 15 p2542 A66-29716

Excitation of neon levels in hollow-cathode discharge in neon-hydrogen mixture as result possibly from recombination processes involving dissociation and triple collisions 16 p2753 A66-30842

Cyclotron harmonic radiation from rare gas discharge in magnetic field 16 p2764 A66-31351

High voltage pulsed electrodeless discharge in rare gas as light source for ruby and Nd glass laser excitation and observation of output characteristics 16 p2720 A66-31448

Electric current density in ionizing discharge layer determined, using multifluid equations of conservation of momentum and gas mass 17 p2967 A66-32435

Electric conductivity in low voltage atmospheric pressure gas discharge, noting Maxwellian electron density distribution 17 p2968 A66-32484

Formation process of rotating plasma in homopolar-type short coaxial-electrode system in hydrogen, nitrogen or argon discharge 17 p2972 A66-32973

Coefficient of light amplification in gas discharge 17 p2935 A66-33052

Electrostatic ion drives technology problems, discussing gaseous discharge ion sources, duoplasmatron and electron bombardment ion generator 17 p2991 A66-33234

Type II collision roles in population buildup in zinc vapor and in zinc mercury vapor mixture 17 p2960 A66-33511

Excitation of 3S sub 2 neon level by metastable helium atoms during He-Ne discharge 17 p2938 A66-33513

Electrodeless annular discharges in argon and air 18 p3144 A66-34039

Atomic concentration measurement in discharged nitrogen, oxygen and hydrogen 18 p3139 A66-34507

Current noise of gas-discharge plasma reduced by adding grid with negative bias 19 p3297 A66-35558

Alumina high temperature gas discharge tube for investigation of pulsed metal vapor laser oscillations 19 p3374 A66-35810

Hot cathode-gas discharge in equipotential space of magnetic field, noting formation of plasma column with opposite charge and discharge instability 19 p3408 A66-36275

Numerical calculations of parameters of steady state HF high pressure vortical discharge of argon in air 20 p3607 A66-36975

Geometry of steady state annular electrodeless discharge in argon and xenon as function of discharge power, type of gas, gas pressure, etc 20 p3607 A66-36976

Normal atom concentration in cesium and mercury vapors during pulse discharge 20 p3604 A66-37348

Thermoconductive energy transfer from cathode of low pressure gas discharge 20 p3679 A66-38010

Discharge current and laser light noise measurements effect in gas discharge helium-neon laser, using equivalent circuit 20 p3580 A66-38240

Conical electrode plasma source consisting of organic-glass discharge chamber with cylindrical electrode at apex, examining performance characteristics with pulsed gas admission 21 p3786 A66-39040

Equations for ionized positive plasma column of gas discharge between infinite dielectric planes under oblique magnetic field with component in direction of external electric field 22 p3953 A66-39756

Radial current density distribution in homopolar, noting deviation of magnetic field and nature of current distribution around anode 22 p3953 A66-39757

Magnetic resonance in He 3 ground states examined through interaction with metastable atoms in gas discharge, observing transfer of transverse magnetization by collision 22 p3931 A66-39809

Three-centimeter wavelength frequency multiplier using gas-discharge plasma in nonuniform electric field, examining amplitude and phase 22 p3874 A66-39852

Four electron paramagnetic resonance transitions of SO free radical generated in gas-phase discharge of sulfur dioxide 22 p3859 A66-39908

High temperature high density carbon plasma production in arc chamber of shock tube 22 p3955 A66-40092

Paschen series laser lines in atomic and molecular hydrogen 22 p3933 A66-40892

Spectral analysis of laser discharge in pure and impure He, obtaining spectra of spark at various pressures, determining electron concentration at various

stages 22 p3934 A66-40909

Gas discharge by laser pulse, taking into account photoionization due to electron impact 23 p4076 A66-41009

Microwave discharge technique for depositing noncrystalline oxide films of silicon, germanium, boron, titanium or selenium on substrates by decomposition compounds by oxygen 23 p4109 A66-41109

Diffusion controlled breakdown theory applied to compute breakdown potential of helium in coaxial geometry by solving continuity equation 23 p4105 A66-41589

Excitation of 3S sub 2 neon level by metastable helium atoms during He-Ne discharge 24 p4219 A66-42219

Gas-discharge CW lasers, particularly H, Ne, carbon dioxide, argon-ion and pulse self-terminating lasers, discussing classification, power output and gain Doppler width, coherence and noise 24 p4224 A66-42289

### GAS DISCHARGE COUNTER

Radiation measurement equipment 24 p4224 A66-42289

Cosmos 41 satellite including scintillation counter, gas discharge counter, etc 08 p1228 A66-19708

Cosmic rays during flights of Sputniks and Cosmos satellites investigated by analysis of charged particle fluxes obtained by gas discharge counter 10 p1595 A66-21095

Electric field distribution in gas discharge counters at moment radiation recorded allowing for space charge effect 17 p2928 A66-33428

Radiation measurement equipment 24 p4224 A66-42289

Cosmos XLI satellite including scintillation counter, gas discharge counter, etc 21 p3736 A66-38736

Penetrating radiation measurement of Moon surface obtained by Luna 1 spacecraft 23 p4128 A66-41428

### GAS DISSOCIATION

Convective heat transfer measurements from partially dissociated carbon monoxide and hydrogen with high Lewis number [ASME PAPER 65-WA/HT-27] 05 p0793 A66-15693

Comments on radiative recombination of molecular helium ions into dissociative state 06 p0912 A66-16692

Microinstability limitations of DCX energetic plasma from gas dissociation at Lorentz force dissociation 10 p1568 A66-21838

Iodine evaluated as working fluid in supersonic wind tunnel through study of iodine dissociation process 11 p1683 A66-22583

Nonsteady isentropic compression wave generate high-velocity air flows with very low ambient dissociation levels 11 p1684 A66-22584

Rate of effusion for gas flow through orifice and application to fluorine gas dissociation energy 11 p1688 A66-22838

Dissociation rate of nitrogen behind strong shock waves in nitrogen-argon mixture determined, using time-resolved interferometric measurements of gas density 12 p1861 A66-23681

Microwave plasma torch noting design, operation and application 12 p1857 A66-23857

Parametric method of solving equations of laminar boundary layer with longitudinal pressure gradient during equilibrium gas dissociation 12 p1863 A66-24383

Ionization cross section for rare gases and hydrogen atoms calculated from perturbation theory, noting ruby laser photon absorption 13 p2133 A66-26133

Electrical breakdown of gases by optical frequency radiation, noting laser beam attenuation and subsequent energy absorption by plasma 13 p2134 A66-26134

Nonequilibrium laminar boundary layer binary dissociating gas determined by solving nonlinear partial differential equations governing system [AIAA PAPER 65-129] 14 p2274 A66-27474

Inverse problem of nonequilibrium dissociation and vibrational relaxation in diatomic duct flow 14 p2219 A66-27479

Viscosity of equilibrium dissociating nitrogen tetroxide calculated from compressibility and critical parameters 14 p2371 A66-27871

Thermal conductivity of equilibrium

- dissociating nitrogen 14 p2371 A66-27828  
 tetraoxide dissociation 14 p2371 A66-27829  
 equations 14 p2371 A66-27829  
 Hypersonic laminar boundary layer flow of equilibrium dissociating 16 p2630 A66-31306  
 Dissociation rate of undiluted carbon monoxide behind strong shock waves produced in arc discharge shock tube AIAA PAPER 66-518] 18 p3063 A66-33660  
 Dissociational rate constants and vibrational relaxation times modifications, considering coupling of vibrational and dissociational nonequilibrium of expanding gas in nozzle 18 p3047 A66-33661  
 Buoyancy in convecting ideal dissociating gas analyzed, obtaining solution for one-dimensional unsteady free mixing 18 p3103 A66-34931  
 General theorems for dissociated and chemically reacting compressible laminar unsteady two-component boundary layers derived, based on Nirenberg maximum principle 20 p3510 A66-37524  
 Supersonic nozzle flow of dissociated oxygen, nitrogen and carbon dioxide 21 p3694 A66-39089  
 Recombination rate of diatomic gases determined from Mach number of supersonic nozzle outlet 21 p3694 A66-39090  
 Restoration rate of equilibrium dissociation disturbed by shock reflection 21 p3726 A66-39093  
 Nonequilibrium dissociation losses in hydrogen-fluorine propellant system, indicating rate control of recombination steps AICE PREPRINT 28A] 22 p3969 A66-39882  
 Carbon dioxide dissociation rate measured from 3000 to 5000 degrees K, considering decrease in temperature and increase in density caused by endothermic dissociation 22 p3859 A66-39915
- AS DYNAMICS**  
**SA AERODYNAMICS**  
**SA FLUID MECHANICS**  
**SA MAGNETOHYDRODYNAMICS**  
**SA RAREFIED GAS DYNAMICS**  
 Numerical solution to problems with spatial variables, using partial differential equations of gas dynamics 01 p0055 A66-10169  
 Dynamic pressure and temperature measurements of forward gas expulsion during high speed stall of jet engines [SAE PAPER 650840] 01 p0130 A66-10832  
 Cauchy problem for linearized Boltzmann equation in kinetic theory of gases 01 p0107 A66-11011  
 Transformation of unknown functions and independent variables entering into differential equations for motion of nonviscous nonheat-conducting gas 02 p0220 A66-12178  
 Two-dimensional problems of gas dynamics with free boundaries, discussing existence and uniqueness of subsonic potential gas flow 04 p0510 A66-13870  
 Post-Newtonian hydrodynamics and stability of gaseous masses for radial and nonradial oscillations 05 p0715 A66-14523  
 Book on physical gas dynamics including transport theory, kinetic theory, thermodynamics, equilibrium, fluid flow, radiative transfer, etc 05 p0666 A66-15848  
 Self-similarity of solutions to motion equations for relativistic gas possessing point symmetry and nonexistence of isentropic flow 06 p0954 A66-16538  
 One-dimensional unsteady motions of heat conducting gas in which heat conduction has significant role, formulating boundary value problems with self-similar solutions 06 p0917 A66-16709  
 Gas dynamics equation for wing of zero-thickness with two subsonic leading edges in supersonic flow reduced to wave equation 06 p0803 A66-17006  
 Rarefied gas dynamics in space flight and hypersonic low density wind tunnel of Goettingen Aerodynamics Research Facility 07 p1017 A66-17479  
 Variational problems in gas dynamics, examining vortex and vortex free motion, minimum drag conditions, etc 07 p0983 A66-18144  
 Analogy between gas flow through convergent/divergent nozzles and open side-contracted channel 08 p1205 A66-18628  
 Stability of motion of spherically symmetric mass of compressible gas with constant space density in absence of gravitational field 08 p1298 A66-19483  
 Supersonic gas dynamics variational problems concerning determination of axisymmetric minimum drag 08 p1166 A66-19573  
 Book on thin wing and aerodynamic characteristics in subsonic gas flow 09 p1327 A66-19975  
 Group properties of short wave equations in gas dynamics 10 p1522 A66-21315  
 Chemical reaction kinetics and gas dynamics combined to analyze processes occurring in combustion chambers and nozzles of jet and rocket engines 10 p1620 A66-21367  
 Ballistic performance change in spinning rocket motors attributed to internal gas dynamics and combustion effects, noting grain geometry influence 10 p1590 A66-21945  
 Large-scale aspects of gaseous components of our Galaxy, noting dynamics of gaseous systems with magnetic fields, virial theory, angular momentum, spiral structure of galactic disk, etc 11 p1767 A66-22263  
 Numerical solution of heat conduction and gas dynamics equations by sifting over separate regions 11 p1785 A66-22339  
 Gas dynamic problems in low pressure microthrust engines, noting parameters such as type of nozzle flow, pressure drop causes, etc 11 p1761 A66-22461  
 Kinetics and gas dynamics equations derived to determine state of gas behind strong shock waves, accounting for all excited states of neutral atoms 11 p1688 A66-22586  
 Aerodynamic drag torque on rotating sphere in transition regime, noting dependence of gas inertia on Reynolds number 11 p1635 A66-22935  
 Book on basic developments in fluid dynamics including numerical solution of problems in gas dynamics, stability of parallel flows, blast wave theory, etc 12 p1861 A66-23806  
 Numerical solutions of problems in gas dynamics in U.S.S.R., using computers stressing methods for solving systems of nonlinear partial differential equations 12 p1861 A66-23807  
 Two-dimensional problems of gas dynamics with free boundaries, discussing existence and uniqueness of subsonic potential gas flow 12 p1863 A66-24026  
 Handbook of generalized gas dynamics including one-dimensional gas dynamics, compressible flow tables, gamma function, isentropic flow, etc 13 p2063 A66-25694  
 Electrical and gas dynamical parameters effect on length of linear constant Mach number MHD duct, assuming gas is ionized by neutron irradiation in expansion nozzle preceding duct and electron recombination takes place in duct 13 p2000 A66-25739  
 Soviet text on gas dynamics including thermodynamics, gas motion equations, aerodynamic heating, rarefied and supersonic gas flow, etc 13 p2064 A66-26252  
 Experimental analysis of regression rates in hybrid rocket engines for both chemical kinetics and gas dynamics domains 13 p2173 A66-26369  
 Propagation stability of spherical flame in gas dynamic configuration of Landau and Markstein, showing that flame is stable relative to first spherical harmonics 14 p2410 A66-26779  
 Book on interstellar gas dynamics 14 p2378 A66-26807  
 Electro-magnetoplasma-gas-dynamics /EMPGD/ equations for warm compressible electron gas drifting at constant velocity, finding equation for refractive index of plasma waves 14 p2339 A66-26862  
 Text on vacuum science and technology including kinetic theory of gases, gas flow, pumps, vacuum measurements and equipment, etc 14 p2335 A66-27721  
 Book on shock wave relaxation processes, discussing laws governing statistical equilibrium, thermal dislocation and ionization, nonequilibrium zones behind shock wavefront, plasma shock propagation, etc 14 p2277 A66-27788  
 Book on uniform steady motion of ideal gas and gas dynamics of supersonic wind tunnels 14 p2220 A66-27789  
 Adiabatic dispersion into empty space of triaxial gaseous ellipsoid studied by Ovsinnikov exact solution of equations of gasdynamics 14 p2278 A66-28060  
 Range of gas dynamic stability of arc-type electric heaters, characteristics for design and calculation of electrode diameter ensuring vortex stabilization 14 p2348 A66-28314  
 MHD equations applied to hypersonic flow of solar plasma around magnetosphere and approximation with simpler equations of gas dynamics 15 p2483 A66-28815  
 Variation problem solution in hypersonic gas dynamics, noting intake portion construction for body with minimum resistance for limited length and flat end 15 p2477 A66-28956  
 Spatial problems in gas dynamics solved by difference methods, discussing supersonic flow 15 p2423 A66-29174  
 Oscillatory behavior in rocket engines, analyzing interaction between shock wave and burning solid propellant surface and stressing gas dynamics 15 p2572 A66-29298  
 Book on dynamics and thermodynamics of gases, emphasizing modern theory of gas behavior at hypersonic velocities and extremely high altitudes 15 p2482 A66-29914  
 Self-similarity of solutions to motion equations for relativistic gas possessing point symmetry and nonexistence of isentropic flow 15 p2603 A66-29978  
 Book on radiation gas dynamics including radiative heat transfer, waves and shock waves, kinetic theory, relativistic mechanics, free-molecule flow, etc 16 p2829 A66-31314  
 Heat-conducting gas converging spherical shock wave analysis, emphasizing energy accumulation 16 p2689 A66-31514  
 Oblique condensation discontinuities calculated during flow of supercooled water vapor in supersonic jets 16 p2690 A66-31608  
 Unsteady expansion of plane layer of ideal gas into vacuum for various laws and durations of energy release described by equations of gas dynamics 16 p2690 A66-31617  
 Shock wave excited by pulsed current flowing between two plane parallel electrodes in rarefied air 16 p2690 A66-31621  
 Relaxation and evaporation zones behind normal shock in mixture of air, water vapor and water droplets 17 p2908 A66-32445  
 Primary and secondary flow interaction in plug nozzle, obtaining solutions by iteration and isentropic relation 17 p2839 A66-32476  
 Successive approximation solution to integral kinetic equation and corrections to moments of distribution function for viscous and rarefied gases 17 p2909 A66-32585  
 Virial theorem study of magnetic field effect on gravitational instability of primeval gas cloud, noting possibility of collapse upon change in magnetic flux 17 p3005 A66-33002  
 Melting of solid bodies in chondrule size, discussing accumulation mechanisms involving electrostatic acceleration and gas motions 18 p3225 A66-33622  
 Large-dimensional inverse pinch discharge study of impulsive plasma acceleration, gas dynamics and stability of unrestrained current sheet [AIAA PAPER 66-482] 18 p3141 A66-33655  
 Equilibrium thermodynamic and gas dynamic parameter calculation for low temperature plasma, using electromagnetic and diaphragm-type shock tubes 18 p3144 A66-34037  
 Book on mechanics of liquids and gases 18 p3102 A66-34731  
 Shock front and current sheet separation predicted in magnetically driven shock tube with axial magnetic field and hydrogen as test gas 18 p3149 A66-34917  
 Asymptotic solution of nonlinear hyperbolic equation in gas dynamics, with applications in explosion theory, astrophysics, etc 19 p3390 A66-36200  
 Book on physics of shock waves and high temperature hydrodynamic

- phenomena 19 p3341 A66-36316  
Optimum thrust nozzle contours for chemically reacting gas flows, obtaining set of partial differential equations for gas dynamic properties [AIAA PAPER 66-638] 19 p3277 A66-36599  
Propagation of spherically symmetric, cylindrically symmetric and plane waves examined via analytic perturbation method in solving gas dynamics equation for nonstationary compressible flow 19 p3343 A66-36638  
Galactic magnetic fields, considering magnetic flux, frequency of fields in radio galaxy, disk, interstellar gas dynamics and spiral structure 20 p3645 A66-36958  
Steady state oscillations in semiinfinite gas excited by harmonically oscillating wall, using single-collision time kinetic model 20 p3605 A66-37635  
Internal ballistic considerations in hybrid rocket design, noting throttling and regimes of operation involving effects of surface-or gas-phase reaction kinetics [AIAA PAPER 66-628] 20 p3663 A66-38035  
Supersonic gas flow states in transition regime, discussing change from dynamical to molecular flow, velocity and pressure distribution and conditions for freezing of translational degrees of freedom 20 p3548 A66-38084  
Gas sorption and desorption processes at low pressures, discussing molecular adherence to cold solid surfaces, adsorption mechanism of isotherms, vacuum generation via cryotrapping effect, etc 20 p3605 A66-38088  
Electromagnetic and gas dynamic effects on magnetic compression of plasma loop 20 p3611 A66-38120  
Nonisentropic two-dimensional MHD flow 21 p3777 A66-38725  
Book on aerodynamic experiment in machine building, noting self-simulation problems of machines using gas dynamics, analyzing wind tunnels 21 p3694 A66-38743  
Gas molecule excitation in shock wave analysis based on behavior of gas flow past obstacle in shock tube 21 p3726 A66-39092  
Quantum corrections to second virial coefficient for low-temperature gas 21 p3836 A66-39175  
Free jet MHD accelerator for determining minimum length of crossed field accelerators, noting operation and solution in closed form 21 p3699 A66-39645  
Carbon dioxide dissociation rate measured from 3000 to 5000 degrees K, considering decrease in temperature and increase in density caused by endothermic dissociation 22 p3859 A66-39915  
Weak plane shock waves formation by impulsive motion of piston for viscous heat conducting gas 22 p3900 A66-40383  
Shallow water theory of formation and decay of hydraulic shock waves in nonsteady homentropic gas flow 23 p4055 A66-41541  
Stability analysis of discontinuous solution of gas dynamics PDEs for ideal fluid 23 p4055 A66-41559  
Gas dynamic calculations of power generator with closed circulation of fissionable gas supported by nuclear reaction behind supersonic diffuser 23 p4022 A66-41763  
Three-dimensional supersonic gas flow past smooth blunt bodies, considering gas dynamic equations for mixed and purely supersonic regions 23 p4013 A66-42016  
Partly invariant solutions of equations admitting Lie group and application to gas dynamics 23 p4086 A66-42024  
Radiation fronts in gas dynamics, examining flow through or behind aerodynamic shock 23 p4062 A66-42052  
Static elastic and thermoelastic stability, discussing kinetic theory and physical interpretation of energy methods 24 p4287 A66-42271  
Invariant solution classification for equations of two-dimensional steady state motion of gas 24 p4196 A66-42867
- GAS EVACUATION**  
Gas capture coefficient prediction for cryopumping based on critical velocity model in space chamber simulator 10 p1520 A66-21937  
Ultrahigh-vacuum mercury-vapor unit design, noting performance characteristics 15 p2429 A66-29700
- GAS EVOLUTION**  
Mass flow rate of gas evolution from burning solid rocket propellant during transient depressurization of combustion chamber [AIAA PAPER 65-104] 08 p1282 A66-19163  
Porosity in titanium arc welds, noting sources of gas evolution and probable causative gases, particularly molecular hydrogen and oxygen 14 p2302 A66-27346  
Thermal conductivity cell measurements of depolymerization rate of polytetrafluoroethylene exposed to gamma radiation in flowing helium atmosphere 17 p2942 A66-31880  
Evolution of gases from cometary nuclei by sublimation or desorption 17 p3009 A66-33372  
OH production by sublimation and gas hydrate occurrence in cometary nuclei 17 p3009 A66-33373  
Graphite and C-H-O gas phase equilibrium at high temperatures and pressures in implication of Earth ocean and atmosphere development 17 p3015 A66-33432
- GAS EXCHANGE**  
**SA OXYGEN PRODUCTION**  
Alveolar nitrogen concentration and environmental pressure influence upon rate of gas absorption from nonventilated lung in dog 03 p0324 A66-12357  
Vibrational excitation effect in hydrogen-deuterium exchange 05 p0718 A66-15156  
Apparatus for measurement of flow resistance of gas diffusion electrodes 07 p0990 A66-17233  
Nonequilibrium internal distributions effect on rates of chemical gas-phase exchange reactions 11 p1650 A66-23212  
Algal bioregenerative photosynthetic gas exchange system 19 p3293 A66-36239
- GAS EXPANSION**  
Nonequilibrium expansion of air through hypersonic nozzle extended to higher reservoir temperatures and pressures 02 p0303 A66-11565  
Water-vapor condensation zones of moist air expansions in Laval type nozzles with thermal choking 03 p0317 A66-12948  
Velocity distributions in molecular beams of argon produced by supersonic nozzle sources, using time of flight method 04 p0548 A66-14012  
Nonsteady expansion of gas into vacuum in analysis of asymptotic solutions of Sedov 08 p1210 A66-19574  
Device for generation of strong shock waves in air 10 p1525 A66-22014  
Numerical calculations of axially symmetric two-dimensional steady expansions of monatomic gas, using approximate Boltzmann equation with Krook collision term 11 p1690 A66-22908  
Steady state expansion of gas into vacuum, considering continuum inviscid analysis, collision-free analysis, supersonic flow and hypersonic limits, etc, for spherical and cylindrical symmetry 12 p1860 A66-23607  
Adiabatic dispersion into empty space of triaxial gaseous ellipsoid studied by Ovsinnikov exact solution of equations of gasdynamics 14 p2278 A66-28060  
Steady nonisentropic jet expansion in vacuum with pressure tensor approximated by second-order moment technique and BGK model 16 p2684 A66-30605  
Unsteady expansion of plane layer of ideal gas into vacuum for various laws and durations of energy release described by equations of gas dynamics 16 p2690 A66-31617  
Relativistic gas expansion into intergalactic space noting energy content, modes of expansion and radio source distribution 18 p3236 A66-34761  
Density field calculation for collisionless expansion of moving cylindrical gas cloud, with Maxwellian random velocity distribution superimposed on uniform initial velocity 18 p3103 A66-34933  
Shock wave and glow cloud of nitrogen dioxide released at 110 km altitude 19 p3345 A66-35492  
Population inversion in adiabatic expansion of molecular gas mixture with three vibrational levels 19 p3402 A66-36068  
Device for generation of strong shock waves in air 19 p3341 A66-36316  
Laval points in ideal gas expansion with energy losses in nozzle or turbine-blade cascade 19 p3276 A66-36316  
Rarefied gas motion instability, constructing general solution for effect of various force fields 19 p3343 A66-36316  
Pneumatic vernier engines in aircraft spacecraft, discussing weight, gas expansions and gas temperature 20 p3627 A66-36316  
Kaufman assumption regarding universe expansion considered untenable because requires intergalactic hydrogen temperature to remain constant while hydrogen expanded in volume 22 p3978 A66-40316

- Group properties of PDE system for one-dimensional gas flows with plane waves, using external Cartan forms 07 p1019 A66-17859
- Gas and sound velocity measurements downstream of shock wave in electromagnetic tube for subsonic and supersonic flows 07 p1023 A66-18119
- Method of characteristics applied to three-dimensional supersonic flow equations for compressible inviscid gas 07 p0982 A66-18130
- Tube gas flow theory applicable to laminar flow, slip flow, transition region of flow and free molecular flow 07 p1023 A66-18131
- Numerical computer solutions for several nonlinear gas flow problems in high speed aerodynamics 07 p0983 A66-18143
- Two-dimensional steady MGD flow of ideal thermally nonconducting fluid with infinite conductivity, when magnetic intensity and velocity are orthogonal 08 p1261 A66-18675
- Thrust-vector control and flow field produced by secondary gas injection into supersonic stream 08 p1162 A66-18831
- Inviscid supersonic nozzle flow of ideal dissociating gas, sudden freezing, equilibrium-recombination mechanism and velocity distribution [AIAA PAPER 66-1] 08 p1163 A66-18983
- Large-scale expansion nozzle control by heterogeneous nucleation and mercury vapor and drop growth processes in nitrogen flow [AIAA PAPER 66-85] 08 p1318 A66-18997
- Performance correlation of conical and contoured nozzles for gas-particle flows, defining differences between particle effects for such nozzles 08 p1165 A66-19157
- Aerodynamic pressure and resistance calculated from gas flow past circular cylinders with piecewise constant diameters 08 p1232 A66-19338
- Atomization of liquid-spray particles in Venturi scrubber, investigating acceleration by high-speed photography 08 p1208 A66-19422
- Laminar boundary layer in gas flow with arbitrary external velocity and temperature gradient solved by single-parameter approximation 08 p1319 A66-19424
- Coolant injection in turbulent boundary layer for protection of surfaces from effects of high temperature and high energy gas flows 08 p1320 A66-19429
- Exact partial solutions to transonic gas flow equations used to describe flow around shape streamlined by supersonic flow with additional shock wave 08 p1209 A66-19473
- Peculiarities of aerodynamic characteristics of flow past plate and pointed and blunt slender cones in viscous hypersonic thermodynamically ideal gas 08 p1165 A66-19571
- Approximate methods for integration of equations of plane isentropic motion of gas at supersonic velocities 08 p1165 A66-19572
- Nonisentropic simple waves in two-dimensional steady flow of ideal gas 08 p1210 A66-19585
- Engineering method for measuring rapidly changing temperatures of gas flow with steady or variable heat transfer 09 p1470 A66-20142
- Conducting gas flow in Hall MHD generator reduced to quasi-one-dimensional problem 09 p1331 A66-20145
- Asymptotic steady state solution to problem of thermal separation of components across shear layer between cold jet mixture and hot ambient gas 09 p1470 A66-20178
- One-dimensional adiabatic compressible gas flow in cylindrical tube taking into account Reynolds number variations along tube and compressibility effect on friction factor 09 p1368 A66-20827
- Pressure drop in entrance region of abrupt inlet circular tube for continuum laminar flow conditions [ASME PAPER 65-WA/APM-5] 10 p1523 A66-21471
- Electric arc interaction with argon flow analyzed in crossed convective and magnetic fields [ASME PAPER 65-WA/ENER-1] 10 p1563 A66-21503
- Scalar formulation of ideal charged adiabatic gas flow in presence of gravitational and electromagnetic fields 10 p1524 A66-21814
- Relative effect of restrictive orifices, venturils or nozzles on measurement accuracy of fluid flow rates in pipes 11 p1703 A66-22207
- Three-dimensional supersonic gas flow past truncated cone with shock separation calculated by method of characteristics 11 p1629 A66-22336
- Gas flow in free-molecular regime with negligible collision approached by diffuse reflection model 11 p1688 A66-22525
- Rate of effusion for gas flow through orifice and application to fluorine gas dissociation energy 11 p1688 A66-22880
- Molecular beam approximation for plane normal shock in free stream monatomic gas flow at large Mach numbers 11 p1690 A66-22911
- Coaxial capacitor for measuring density of fluids in both liquid and gaseous phase over wide range of temperatures and pressures 11 p1707 A66-22961
- Thermal transpiration analysis with various gases, testing relation between translation component of thermoconductivity coefficient and maximum transpiration effect for particular gas, obtaining rotational collision numbers 11 p1787 A66-23214
- Secondary flows influence on concentration distribution of heavy species in vortex comprised primarily of lightweight gas [AIAA PAPER 65-582] 12 p1860 A66-23573
- Rugged micromanometer capable of reliably measuring pressure differences as low as 10 mtorr in flow of gaseous media 12 p1876 A66-23601
- Blast wave theory with and without entropy layer effect, determining asymptotic flow, far downstream of blunted nose, past

given body 12 p1861 A66-23808  
 Supersonic viscous gas flow near blunt body numerically determined by equations similar to Navier-Stokes 12 p1796 A66-23900  
 Two-dimensional potential flow of polytropic gas with stationary streamlines 12 p1862 A66-24007  
 Equation for laminar boundary layer on flat plate in viscous compressible gas flow under chemical relaxation, solved by approximate method in series 12 p1863 A66-24244  
 Exact solutions for triple wave type hydrodynamic equations for confined isothermal gas flow and polytropic gas efflux into vacuum 12 p1863 A66-24360  
 Airfoil cascade oscillation in near-sonic gas flow 12 p1798 A66-24432  
 Aerodynamic forces on system of N thin slightly twisted profiles in subsonic unsteady flow for small angle of attack, examining acoustic resonance for arbitrary small harmonic oscillations 12 p1798 A66-24436  
 Supersonic gas flow past cylindrical obstacle on plate in wind tunnel at Mach number 2.5, noting separation line, pressure distribution and flow orientation 12 p1798 A66-24437  
 Hypersonic flow of inviscid gas past cone, obtaining solution for entire flow including turbulent boundary layer and velocity field, using zero approximation method 12 p1798 A66-24440  
 Gas flow regulator system conforming to prescribed time-dependent program, based on mass flow limitation properties of sonic orifices and polynomial approximation for exponential 12 p1859 A66-24713  
 Nonequilibrium effect in two-dimensional steady flow of ionizing gas past magnetized wall, calculating velocity distribution along wall 12 p1924 A66-24809  
 Evolution of plane switch-on and switch-off shocks in gas of finite electrical conductivity in presence of small normal disturbances 12 p1866 A66-24950  
 Chemical reactions in gas flows including relation between dissociation and recombination kinetics, thermal decomposition of hydrazine, kinetics of high temperature air, etc, analyzed, using shock tube 13 p2016 A66-25160  
 Rarefied gas flow problems solved by hydrodynamic equations and representations of stress tensor and heat flux reproducing Navier-Stokes continuum limit and free molecule limit, noting velocity distribution interpolation 13 p2061 A66-25163  
 Shape of plane and circular jet deformed by gas flow impinging at angle of incidence determined from head drag of jet relative to flow 13 p2062 A66-25320  
 Potential double waves at interface between two-dimensional nonsteady barotropic gas flow and region of undisturbed gas 13 p2063 A66-25633  
 Drag coefficient of gas flow in circular tube at transonic velocity 13 p2065 A66-26485  
 One-dimensional gas flow in tube with heat transfer 13 p2066 A66-26488  
 Electrical analog method used in determining potential gas flow past airfoil lattice, noting components of solution 13 p2068 A66-26541  
 Properties of laminar boundary layer undergoing surface catalysis with two reactants and two products obeying Langmuir-Hinshelwood mechanism, solving concentration field by integral equation 13 p2019 A66-26663  
 Mixed flow of two gases through coaxial cylindrical tubes separated by perforated plate 14 p2273 A66-26782  
 Shock tube study of high temperature gas flow around circular cylinders caused by electrical discharge 14 p2218 A66-27348  
 Argon flow through long tube compared with Weber theoretical model, applying classical continuum 14 p2274 A66-27444  
 Measurement of temperature profile in gas stream by moving thermocouple at constant rate in both directions across cross section of stream 14 p2294 A66-27485  
 Dynamic method of measuring gas temperature up to 2500 degrees C by short-

term exposure of thermocouple to gas stream 14 p2294 A66-27486  
 Hydrodynamic systems expressed by kinetic equations, deriving equations of aerodynamics without knowledge of interaction of gas molecules 14 p2275 A66-27569  
 Streamline flow of ideal stable gas with constant ratio of specific heats around conical body with arbitrary taper, determining flow velocity components 14 p2220 A66-27679  
 Convective heat transfer in centrifugal force field of cavity between two rotating disks in turbulent gas flow 14 p2375 A66-27692  
 Trails arising in wake of fan-type jets in transverse gas flow during uniform fuel-air mixture combustion 14 p2413 A66-27693  
 Gas-particle flow, particle velocity distributions and lag loss reduction for rocket nozzles 14 p2375 A66-27893  
 Dorodnitsyn-Belotserkovskii method for nonuniform supersonic gas flow past sphere 14 p2221 A66-28066  
 Hartmann problem solved for isothermal motion of heavy neutral viscous gas containing small impurities of light ions and electrons in crossed electric and magnetic fields 14 p2345 A66-28088  
 Arc cathodes as heat sources in low pressure gas flows, noting loss of material and other effects 14 p2346 A66-28178  
 Gas rate control of given Laval nozzle when asymptotic gas flow of unvariable type is maintained continuously near nozzle center 14 p2221 A66-28281  
 Ideal gas flow past infinite circular cone at angle of attack, noting finite-difference method for self-similar solution of Prandtl boundary layer equation 14 p2222 A66-28283  
 Points in interior and boundary of three-dimensional supersonic gas flow determined, using characteristic method, deriving difference equations 14 p2278 A66-28284  
 Laminar adiabatic gas flow in parallel plane channel taking place up to 3/4 of critical velocity 14 p2278 A66-28315  
 Stimulated interphase heat transfer in nonuniform gas flow with suspended particles and periodic motion variations 14 p2415 A66-28322  
 Scanning-electron-beam densitometer for measuring density distributions in rarefied gas flow 14 p2298 A66-28342  
 Heat and mass transfer process in reacting boundary layer of compressible gas in laminar flow along semiinfinite porous plate 14 p2416 A66-28484  
 Approximate iterative calculation of non-Newtonian supersonic gas flow past highly blunt bodies 15 p2423 A66-28959  
 Characteristic for partially invariant solutions of hydrodynamic equations, specifically adiabatic plane-parallel gas motion 15 p2478 A66-29177  
 Rotational distribution function of flowing nitrogen in low density wind tunnel using electron beam fluorescence 15 p2481 A66-29737  
 Existence of convective interaction mechanism affecting direction and stability of electric current in flowing gas, using electric arc confined in supersonic flow 15 p2481 A66-29744  
 Exact solution derived for gas jet flow with three characteristic high subsonic velocities, using Falkovich extension of Chaplygin hodographic method 15 p2425 A66-29850  
 Steady flow of highly rarefied ionized gas through channel with magnetic field solved by Monte Carlo method obtaining density, energies, wall shear stress, etc 16 p2759 A66-30371  
 Response of impact and static pressure probes in rarefied high speed gas flow 16 p2628 A66-30378  
 Chronic exposure of rats to gaseous environments of varied composition and pressure, noting exposure capsules, gas flow system, respiratory gas analyzer, etc 16 p2643 A66-30650  
 High accuracy variable area meter calibrations with multiple gases 16 p2704 A66-30672  
 Limiting conditions of temperature, gas flow rate and heat removal for combustion

of methane in atomic oxygen, calculating heat balance of process 16 p2827 A66-30  
 Heat transfer and wall friction for velocity flow of gases in downstream region of smooth electrically heated tube considering transition region [ASME PAPER 65-WA/HT-18] 16 p2828 A66-30  
 Surface protrusions and holes, Maxwell kinetic gas theory and surface interaction current of free molecules and radiation body 16 p2686 A66-31  
 Axially flowing gas through arc discharge examining effect on I-V characteristic radial temperature distribution in column 16 p2762 A66-31  
 Ionized gas flow rate behind detonation wave used with Chapman-Jouguet condition to determine speed of sound in reaction products 16 p2687 A66-31  
 Steady flow of conducting dissociating in channel of constant cross section in presence of magnetic field 16 p2687 A66-31  
 Mixed sub-and supersonic gas flow in pressure nozzle free of vortex neglecting viscosity and heat conduction 16 p2630 A66-31  
 Approximation of Chaplygin plane motion equations of gas flow at high supersonic velocities 16 p2688 A66-31  
 Self-excited vibrations of infinitely cylindrical shell, situated in flow supersonic ideal gas, obtaining motion equations and analyzing stability conditions 16 p2820 A66-31  
 General solutions of MHD equations of linear nonsteady and plane steady motion of ideally conducting gas 16 p2764 A66-31  
 Flow of compressible conducting around symmetrical wing in longitudinal magnetic field 16 p2766 A66-31  
 Thermodynamic parameters of gas behind strong shock wave in helium 16 p2690 A66-31  
 Fully ionized gas flow over wedge of finite angle for applied magnetic field aligned with incident stream 16 p2767 A66-31  
 Approximation for moment equations of kinetic theory which describe source expansion with application to free jet 17 p2907 A66-31  
 Convective heat transfer during subsonic and supersonic gas flow in inlet section of cylindrical tube 17 p3034 A66-31  
 Velocity of arc wind measured for various magnetic fields and distances above path, using temperature probe dragmeter 17 p2969 A66-31  
 Gas flow and self-diffusion in capillaries 17 p2909 A66-31  
 Capillary gas flow and self-diffusion affected by pressure ranging from free molecule to continuum regimes 17 p2910 A66-31  
 Oscillations and stability of cylindrical shell in gas flow, taking into account internal forces 17 p3029 A66-31  
 Diffusion combustion in turbulent compressible gas flow 17 p3036 A66-31  
 Effect of sudden enlargements and contractions in flow area on single pressure waves in gases in pipes, covering incident waves of various pressure amplitudes 17 p2841 A66-31  
 Diurnal variation of hydrogen concentration at base of exosphere including effects of lateral flow of gas around Earth 17 p2919 A66-31  
 Hydraulic analogy to compressible gas flow discussing application to aerodynamic motions, flow visualization, measurement techniques and instrumentation [ASME PAPER 66-FE-16] 17 p2915 A66-31  
 Theoretical and physical limitations restricting hydraulic analogy to compressible gas flow [ASME PAPER 66-FE-17] 17 p2915 A66-31  
 Accelerating particulate flow studied, using blowdown system for component velocities and friction 17 p2916 A66-31  
 Gas-phase heat-transfer augmentation in steady and alternating electric field pipeflow 17 p3039 A66-31  
 Boundary layer problem concerned with effects of radiation absorption and emission for flow of high speed gas over flat plate [AIAA PAPER 66-521] 18 p3047 A66-31

- Numerical approximation of Riemann integration for plane gas flow at supersonic speeds 19 p3276 A66-36475
- Finite difference method approach to discontinuity in parabolic equations for shear laminar boundary layer flow of injected gas past wall 19 p3342 A66-36477
- Separation of laminar boundary layer of gas flow from cone as function of angle of attack, Mach number, etc 19 p3277 A66-36478
- Free-molecular flow of rarefied gas in plane channels or through cells of heat conducting grid whose cells are smaller than mean free path of gas 19 p3277 A66-36480
- Steady isothermal motion of viscous gas between outer fixed sphere and eccentrically located rotating inner sphere 19 p3371 A66-36481
- Optimization analysis for axisymmetric rocket motor nozzle design based on assumptions for gas particle flow [AIAA PAPER 66-538] 19 p3277 A66-36598
- Mutual effects of vaporization, combustion and coking processes during material decomposition in high temperature gas flow 19 p3479 A66-36770
- Pulse transmitter for measuring heat transfer in ionized gas 19 p3362 A66-36772
- Plane viscous problem of gas motion through weak straight line discontinuity of acceleration, noting formation of boundary layer 19 p3278 A66-36845
- Simultaneous passage of two unmixed gas flows through joint two-circuit turbojet nozzle into ambient medium 20 p3627 A66-36917
- Jet deflection in drifting subsonic gas flow 20 p3491 A66-36919
- Field of high temperatures produced by transitional and steady state processes, using electric arcs in nonrarefied gases, obtaining existence and stability criteria for arc 20 p3606 A66-36965
- Transient gas-flow process in multilayer insulation systems during evacuation predicted by equations in conjunction with measured permeabilities and diffusion coefficients 20 p3675 A66-37065
- Laminar forced convection heat transfer to gas from circular tube, achieving boundary condition of uniform heat flux 20 p3679 A66-37508
- Compressibility law corresponding to Tomotika and Tamada generalized approximation for transonic flow, noting Tomotika and Tamada gas 20 p3492 A66-37574
- Second approximation of transonic theory gas laws for thin bodies 20 p3493 A66-37988
- Vacuum technique application to space research, discussing partial pressure measurements, space simulation procedures and rarefied gas flow 20 p3544 A66-38089
- Radiative heat transfer effect on propagation of plane pressure waves in inviscid nonheat-conducting gas applied in theory of angular intensity distribution of integral radiation 20 p3548 A66-38107
- Semiinfinite flow of axisymmetric flow of viscous thermoelectric gas around blunt body with ablation shield, noting magnetic field effect 20 p3611 A66-38108
- Density of steady state gas flow expanding from viscous to molecular flow regime approximately calculated 21 p3723 A66-38507
- Inviscid hypersonic nonequilibrium flow of three-component gas past circular cone, using exact reaction-rate equations to correct solution first obtained from approximate equations 21 p3693 A66-38711
- Modified Poiseuille equation for gas flow through capillaries, applicable to flow regimes extending from molecular to viscous flow 21 p3725 A66-38943
- Erosion destruction mechanism in polycrystalline graphite, noting effect of gas flow over surfaces, flow pulsation frequency and generated aerodynamic loads 21 p3754 A66-38957
- Gas molecule excitation in shock wake analysis based on behavior of gas flow past obstacle in shock tube 21 p3726 A66-39092
- Gas flow formation ahead of flame front in circular and rectangular shock tubes analyzed, based on high speed photographs and method of characteristics 21 p3836 A66-39097
- Temperature associated with longitudinal thermal velocities overshoots for Mach numbers slightly higher than 1 for monatomic gases in rarefied gas flows 21 p3727 A66-39184
- Aerodynamic effect of free transverse gas flow on propagation of turbulent gas jet, analyzing jet mixing process and jet axis curvature 21 p3727 A66-39255
- Engineering method for measuring rapidly changing temperatures of gas flow with steady or variable heat transfer 21 p3836 A66-39413
- Conducting gas flow in Hall MHD generator reduced to quasi-one-dimensional problem 21 p3698 A66-39416
- Vector equations of steady inviscid thermally nonconducting gas flows from geometric theory of triply orthogonal spatial curves 21 p3729 A66-39446
- Close binary systems involving transfer of angular momentum, considering circulatory patterns of gaseous flow and axial rotation of component stars 21 p3815 A66-39483
- Field, mass, momentum and energy conservation, entropy and evolution conditions for steady MHD oblique shock discontinuities in perfectly conducting gas flow with Mach and Alfvén number parameters 21 p3795 A66-39577
- Gas flow equations for multilayer insulation systems for both continuum and free molecular flow regimes of interest in cryogenic space vehicle design [AICE PREPRINT 22A] 22 p3897 A66-39888
- Hypersonic gas flow past blunt body problem solved by integral correlation method, taking into account radiation effects and gas dynamic parameter distribution in shock wave layer 22 p3897 A66-39902
- Heat losses from turbulent gas flowing through poorly insulated pipe where heat lost from outer surface is by free convection and radiation, solving heat equation [ASME PAPER 65-WA/HT-16] 22 p3997 A66-40027
